FEDERAL TRADE COMMISSION RECEIVED DOCUMENTS 07 07 2015 578181 SECRETARY

LabMD's Unopposed Motion to Accord Portions of Exhibits Containing Michael Daugherty's Home Address, as well as Sensitive Personal Information, <u>In Camera Treatment</u>

On June 15, 2015 Judge Chappell extended "a provisional grant . . . to protect [Michael Daugherty's] home address [from] being included in the public record." *In the Matter of LabMD, Inc.*, Transcript Vol. 10, June 15, 2015, at 1482-1483. Pursuant to Rule 3.45(b) and (g), Respondent respectfully requests a final ruling that *in camera* treatment is appropriate for certain exhibits in the Record that contain LabMD, Inc. ("LabMD") owner Michael Daugherty's home address and sensitive personal information.

<u>ARGUMENT</u>

Under Rule 3.45(b), an Administrative Law Judge may order that material be placed *in camera*:

> after finding that its public disclosure will likely result in a clearly defined, serious injury to the person, partnership, or corporation requesting in camera treatment or after finding that the material constitutes sensitive personal information. "Sensitive personal information" shall include, but shall not be limited to, an individual's Social Security number, taxpayer identification number, financial account number, credit card or debit card number, driver's license number, state-issued identification number, passport number, date of birth (other than year), and any sensitive health information identifiable by individual, such as an individual's medical records.

---

[1] Respondent's Counsel contacted Complaint Counsel by email and sent them a draft of this motion. Respondent's counsel anticipates no formal objections from Complaint Counsel, anything to the contrary notwithstanding.

16 C.F.R. § 3.45(b). LabMD requests that portions of exhibits referencing Michael Daugherty's home address, ████████████████████████████████ be accorded *in camera* treatment. This case has received significant publicity, and Respondent wishes to protect Michael Daugherty's privacy. Michael Daugherty's home address appears in:[2]

- JX 1 – Joint Stipulations of Fact, Law, and Authenticity, attached hereto in relevant part as Exhibit A.

- RX 487, CX 705 – Deposition Transcript of Brandon Bradley, Feb. 14, 2014, attached hereto in relevant part as Exhibit B.

- RX 492, CX 710 – Deposition Transcript of LabMD designee, Mike Daugherty, attached hereto in relevant part as Exhibit C.[3]

- RX 495, CX 713 – Deposition Transcript of Kimberly Gardener, Feb. 14, 2014, attached hereto in relevant part as Exhibit D.

- RX 507, CX 725 – Deposition Transcript of Jeffery Martin, Feb. 6, 2014, attached hereto in relevant part as Exhibit E.

- RX 511, CX 727- Deposition Transcript of Jennifer Parr, Feb. 11, 2014, attached hereto in relevant part as Exhibit F.

- CX 627 – Train Technologies Invoice #1984, Sept. 12, 2005, attached hereto in relevant part as Exhibit G.

---

[2] Michael Daugherty's address also appears in CX 451; however, this document was already accorded permanent in camera treatment by order of the ALJ on May 6, 2014.

[3] The parties submitted a Joint Motion on May 27, 2014 seeking in camera treatment of CX 710, among other exhibits, because it contains sensitive personal information pertaining to a former LabMD employee. By Order also dated May 27, 2014, the ALJ accorded in camera treatment to the "sensitive personal information" contained in CX 710. Out of an abundance of caution, and to the extent that *in camera* treatment does not already apply, Respondent formally requests *in camera* treatment of the portions of CX 710 which contain Michael Daugherty's home address.

- CX 628 – Train Technologies Invoice, #1962, Aug. 30, 2005, attached hereto in relevant part as Exhibit H.

Respondent requests that the above-designated portions of these exhibits containing Michael Daugherty's home address, attached in relevant part hereto as Exhibits A through H, be accorded *in camera* treatment.

Respondent also requests that CX 838, LabMD's 2007 tax return, be accorded *in camera* treatment. This document is attached hereto as Exhibit I, and contains several pieces of Michael Daugherty's sensitive personal information, including his social security number, date of birth, as well as home address.

WHEREFORE, LabMD respectfully requests that the Court grant this motion and issue a final ruling that *in camera* treatment is appropriate for certain exhibits contained in the Record which contain LabMD Inc. owner Michael Daugherty's personal home addresses, as well as sensitive personal information.

Dated: July 7, 2015   Respectfully submitted,

EXHIBIT A

evidence. *In re Daniel Chapter One*, No. 9329, 2009 FTC LEXIS 157, at *133-35 (Aug. 5, 2009).

6. Complaint Counsel has the burden of proof to prove by a preponderance of the evidence that LabMD's practices are likely to cause substantial injury to consumers which is not reasonably avoidable by consumers themselves and not outweighed by countervailing benefits to consumers or to competition.

7. Complaint Counsel does not seek to enforce HIPAA in this case.

STIPULATIONS OF FACT

1. Since January 2014, LabMD has had its principal place of business at 1250 Parkwood Circle, Unit 2201, Atlanta, GA 30339.

2. Since January 2014, LabMD has maintained at least a portion of its computer network at

    ███████████████████████████████

3. LabMD currently does not have any plans to dissolve as a Georgia corporation.

4. The Personal Information that LabMD maintains on its computer network, which LabMD contends is PHI, includes: names; addresses; dates of birth; gender; telephone numbers; Social Security numbers; health care provider names, addresses, and telephone numbers; test codes, test results, and diagnoses; and health insurance company names and policy numbers.

5. LabMD maintains on its computer network Personal Information, which LabMD contends is PHI, about approximately 100,000 consumers for whom it never performed testing (either directly or by outsourcing to another laboratory).

1 and I'll try to rephrase it so that it's a better
2 question.
3   A. Okay.
4   Q. You took an oath this morning. Do you
5 understand the nature of the oath?
6   A. Yes.
7   Q. It requires you to fully answer each
8 question to the extent that you can. If you're not
9 sure of an answer or don't have a complete answer,
10 then you still must answer to the extent that you can.
11 Do you understand this?
12   A. Yes.
13   Q. As you can see, the court reporter is
14 recording all that is said here. Because the reporter
15 can only record our words, please answer each question
16 with a verbal response. Will that be okay?
17   A. Yes.
18   Q. It's also important that you wait until I
19 finish the question before you start to answer, and
20 for my part I'll try not to interrupt you with
21 questions while you're answering.
22   Have you taken or do you intend to take
23 any medication today that would prevent you from
24 answering the questions accurately and honestly?
25   A. No.

1   Q. Everything we say will be transcribed and
2 you'll have an opportunity to review the transcript
3 and to clarify any answers.
4   You understand that unless I specify
5 differently, I'm asking you about the time period when
6 you worked at LabMD?
7   A. Yes.
8   Q. I'm going to enter into the record CX322.
9 which is a subpoena you received; Exhibit CX16, which
10 is the protective order that's been issued in this
11 case; and Exhibit CX14, which is the revised
12 scheduling order.
13   (Exhibits CX322, CX16, and CX14 were
14   marked for identification.)
15   MS. HARRIS: Alain, pardon me. The
16 witness never received a subpoena.
17   THE WITNESS: I voluntarily came in
18 because I wanted to get it over with.
19   MR. SHEER: I did not realize that. All
20 right. Thank you.
21   MS. HARRIS: I communicated that in an
22 email to your office. I think you were on the
23 email, but --
24   MR. SHEER: I may well have been. Okay.
25   Q. (By Mr. Sheer) All right. What did you

1 do to prepare to testify today?
2   A. I just talked to my counsel a little bit.
3 That's about it.
4   Q. Did you talk to anyone else?
5   A. No.
6   Q. Did you review any documents?
7   A. Did I -- like what?
8   Q. I'm asking. Did you review any documents
9 in preparing to testify today?
10   A. Some documentation they showed me, yes.
11   Q. What documentation would that be?
12   A. I would assume the documentation you're
13 going to show me.
14   Q. I'm asking you though. What documentation
15 were you shown?
16   A. I don't recall.
17   Q. When did you work for LabMD?
18   A. I think it was like May 2010. I started
19 as a temp.
20   Q. You started as a temp, did you say?
21   A. Yes.
22   Q. And how long were you a temp?
23   A. Three months.
24   Q. And then you moved on to full-time; is
25 that right?

1   A. Yes.
2   Q. When did you leave the company?
3   A. Let's see. Today's Friday. Last Friday.
4   Q. Which locations did you work at for LabMD?
5   A. Powers Ferry location.
6   Q. Anyplace else?
7   A. The home office location.
8   Q. What's the address there?
9   A. [redacted] I
10 think, Atlanta, Georgia.
11   Q. Anyplace else?
12   A. No.
13   Q. Did you work at the corporate condo?
14   A. No. I've done work for them at that
15 location, not worked there.
16   Q. What were your responsibilities at LabMD?
17   A. I was the IT. I was mainly the computer
18 helpdesk for the customers.
19   Q. Did you have a job title?
20   A. That's a good question. If I did, I
21 didn't really know the positional job title. I was
22 just a computer person.
23   Q. Did your responsibilities change over
24 time?
25   A. They pretty much remained the same.

CX0705
RX487

RX487

1 server. Those are the big ones.
2 Q. Was there an email server?
3 A. Not virtualized.
4 Q. Was there a backup server?
5 A. Yes. Veeam, that server too.
6 Q. Was that virtualized?
7 A. Yes, sir.
8 Q. You mentioned that someone had come in who
9 did this virtualization for LabMD and that you
10 followed your work with them.
11 A. Uh-huh (affirmative).
12 Q. Who was that?
13 A. I don't recall his name.
14 Q. Was it someone who was employed by LabMD,
15 or was it an outside contractor?
16 A. Outside contractor.
17 Q. A moment ago you mentioned something, and
18 I'm probably going to misstate it, but it sounded like
19 a Nagios server.
20 A. Uh-huh (affirmative).
21 Q. What is that?
22 A. It's a monitoring server. Basically when
23 the printer needs toner or something like that, it
24 will monitor all the printers and stuff and send you
25 an alert if the toner is running low and stuff like

1 that.
2 So it just -- it keeps us on top of the
3 problems before they actually happen.
4 Q. Did it monitor anything else besides
5 printers?
6 A. Uh-huh (affirmative). It monitored our
7 servers for uptime and different -- you could really
8 configure it to do -- to monitor pretty much anything
9 you wanted it to do.
10 But mainly we just monitored to make sure
11 the servers were functioning and working, and then I
12 used it a lot to monitor the printers.
13 Q. Anything else?
14 A. No.
15 Q. Did it monitor the desktops?
16 A. No.
17 Q. Monitor laptops?
18 A. No.
19 Q. When you say it monitored the servers
20 uptime, what does that mean?
21 A. Uptime may not have been the right word.
22 It just monitors to make sure it's working, it's
23 turned on, and it's functioning. It has a couple of
24 services that whatever the server is doing, and it
25 would just monitor to make sure those services were

1 running. So that way you don't get a call, my stuff
2 doesn't work, and you not know about it.
3 Q. The second bullet says, "Administer,
4 monitor, and support two production Dell EqualLogic
5 PS4000 iSCSI network type SANs that serve three Dell
6 VMware ESXI host servers."
7 Are the Dell VMware host servers that are
8 mentioned here the ones of the three that we were
9 talking about a few moments ago?
10 A. Yes, sir.
11 Q. And what are the two production Dell
12 EqualLogic?
13 A. Storage SANs, storage array networks.
14 Q. What's stored on them?
15 A. Everything that's in the virtual
16 environment.
17 Q. Are these simply backup servers?
18 A. No.
19 Q. What are they then?
20 A. They're hard drives. It's like, you know
21 your computer has a hard drive in it, right? So it's
22 basically like that. It's just a centralized storage
23 for everything that's virtualized.
24 Q. Does that mean that the virtual servers
25 are calling on these storage units when information is

1 required by them?
2 MS. BURROWS: Objection, vague as to
3 calling.
4 THE WITNESS: The operating systems are
5 stored on them, so the virtual servers will not
6 function without them.
7 Q. (By Mr. Sheer) Okay. You've testified
8 that LabMD has closed. And you've also said that
9 you've worked at two locations, the Powers Ferry Road
10 and _____ right?
11 A. Yes, sir.
12 Q. Did LabMD move? Did LabMD close its
13 Powers Ferry Road offices?
14 A. Yes.
15 Q. Where did the computer equipment and
16 network from those offices get moved to?
17 A. Mike's home office.
18 Q. Is that the _____?
19 A. Yes.
20 Q. Did you participate in that move in any
21 way?
22 A. Like what do you mean?
23 MS. BURROWS: Objection, vague.
24 Q. (By Mr. Sheer) Did you move equipment to
25 425 Broadland?

5 (Pages 17 to 20)

CX0705
RX487

1   A.   Not really, no. The movers pretty much
2 did that.
3   Q.   Did you set up equipment at ▓▓▓▓▓▓▓?
4   A.   Yes.
5   Q.   What else did you do at ▓▓▓▓▓?
6   A.   I did some networking.
7   Q.   What networking?
8   A.   Wiring the network, the jacks.
9   Q.   Are you talking about physically
10 connecting different pieces of equipment with cords?
11   A.   Yes.
12   Q.   Did you do anything else besides that?
13   A.   I set up the wireless network.
14   Q.   What wireless network?
15   A.   Huh?
16   Q.   What wireless network?
17   A.   For the house.
18   Q.   Is this part of LabMD's network or
19 something separate?
20   A.   Something separate.
21   Q.   Did the wireless network have access to
22 the LabMD equipment at ▓▓▓▓▓▓▓?
23   A.   Absolutely not.
24   Q.   What else did you do?
25   A.   That pretty much sums it up. I didn't

1 really work there too long.
2   Q.   How long did you work there?
3   A.   A couple weeks.
4   Q.   Were you supervised while you worked
5 there?
6   A.   Yes.
7   Q.   Who was the supervisor?
8   A.   Jeff Martin.
9   Q.   Is LabMD continuing any of its operations
10 at ▓▓▓▓▓▓?
11   MS. BURROWS: Objection, calls for
12 speculation.
13   THE WITNESS: I really don't know.
14   Q.   (By Mr. Sheer) What servers did you set
15 up at ▓▓▓▓▓?
16   A.   The virtual servers.
17   Q.   Did the virtual network at ▓▓▓▓▓▓▓
18 simply duplicate what had been at the Powers Ferry
19 Road address?
20   MS. BURROWS: Objection, vague.
21   THE WITNESS: No.
22   Q.   (By Mr. Sheer) How was it different?
23   A.   It's the same thing.
24   Q.   I'm sorry?
25   A.   It's the same thing.

1   Q.   So let me -- tell me if I misunderstood
2 you because it seems like you may have misunderstood
3 my question.
4   I was asking is the virtualized network
5 that had been set up at Powers Ferry Road simply moved
6 to ▓▓▓▓▓▓?
7   A.   The virtualized network?
8   Q.   Let me backtrack. The entire network from
9 LabMD at Powers Ferry Road, was it just moved to the
10 ▓▓▓▓▓▓▓?
11   MS. BURROWS: Objection, vague as to
12 moved.
13   THE WITNESS: The server equipment for the
14 virtual host, that physical rack was moved.
15   Q.   (By Mr. Sheer) Anything else moved?
16   A.   There's a few desktops. That's about it.
17   Q.   How was the virtual equipment that was
18 moved from Powers Ferry to the ▓▓▓▓▓▓ -- let me
19 backtrack. I'm going to ask it differently.
20   Was the virtual equipment that had been at
21 Powers Ferry changed in any way when it was moved to
22 ▓▓▓▓▓▓?
23   A.   Was it changed in any way?
24   Q.   Uh-huh (affirmative).
25   A.   Could you elaborate?

1   Q.   Were any servers that had been operating
2 at Powers Ferry turned off at the ▓▓▓▓▓▓▓
3 address?
4   A.   Yes.
5   Q.   Which ones were those?
6   A.   The ones that were used for production for
7 LabMD when it was in business. So, for instance, the
8 Nagios server wasn't turned on. The Mapper server
9 wasn't turned on. There's a couple other ones. I
10 don't recall their specific names. They weren't
11 turned on, but just the -- yeah, that's it.
12   Q.   Was the email server turned on?
13   A.   No.
14   Q.   Was the file server turned on?
15   A.   Yes.
16   Q.   Was the Lytec server turned on?
17   A.   Yes.
18   Q.   Was the LabNet or laboratory information
19 system server turned on?
20   A.   Yes.
21   Q.   Were there any other servers that were
22 turned on at ▓▓▓▓▓▓?
23   A.   Not to my knowledge.
24   Q.   Were any of the servers that were turned
25 on at ▓▓▓▓▓▓ different from how they had been

6 (Pages 21 to 24)

CX0705
RX487

RX487

1 at the Powers Ferry Road?
2   MS. BURROWS: Objection, vague and
3 ambiguous.
4   THE WITNESS: Yeah. I really don't know
5 what you mean by different.
6   Q. (By Mr. Sheer) Well, what I'm trying to
7 understand is whether you simply picked up the rack at
8 Powers Ferry and physically transported it to the ▓
9 ▓ address. I think that's what you said; is
10 that right?
11   A. Yes.
12   Q. Did you remove any of the servers that had
13 been on the rack at Powers Ferry when you moved it
14 over to ▓?
15   A. No.
16   Q. Is it correct, and I'm asking, I think
17 what you've told me is that you moved the rack intact
18 but that some of the servers that had been operating
19 at the Powers Ferry address were turned off at ▓
20 ▓
21   A. Correct.
22   Q. That's right?
23   A. That's right.
24   Q. And the servers that were running at both
25 locations included the Lytec, the laboratory

1 information, I think you said the email server, the
2 file server?
3   A. Right.
4   Q. Was there anything else?
5   A. Not to my knowledge, no.
6   Q. Since you moved the rack over to ▓
7 ▓ have any of the other servers been turned
8 on that had been turned off?
9   MS. BURROWS: Objection, calls for
10 speculation.
11   THE WITNESS: Have any of the other
12 servers been turned on that have been turned
13 off?
14   Q. (By Mr. Sheer) Let me try and unpack it a
15 bit.
16   We've talked a bit now about moving the
17 rack from Powers Ferry to the ▓ address;
18 right?
19   A. Yes.
20   Q. And we talked about servers that were
21 operating at both addresses; right?
22   A. Uh-huh (affirmative).
23   Q. And we've talked about servers that have
24 been turned off in moving from Powers Ferry to
25 ▓

1   A. Uh-huh (affirmative).
2   Q. And now I'm asking during the time that
3 you worked at ▓ were any of the servers
4 that initially were turned off turned back on?
5   A. It's possible, but I don't recall it -- I
6 don't think that they would have been because the only
7 ones -- yeah.
8   Q. Why do you think they wouldn't have been?
9   A. We didn't need them.
10   Q. How do you know that?
11   A. Because we weren't in business anymore.
12   Q. Why did you need -- again, I'm talking
13 about LabMD. Why did LabMD need to have the Lytec
14 server turned on at ▓?
15   MS. BURROWS: Objection, calls for
16 speculation.
17   THE WITNESS: To continue the billing for
18 work that was done when they were still in
19 business.
20   Q. (By Mr. Sheer) What do you mean?
21   A. They had to continue issuing billing
22 statements for work that they did up to the day that
23 they closed.
24   Q. Why did LabMD need to have the laboratory
25 information system running at ▓

1   A. For results that -- for results they
2 needed if anybody -- if doctors' offices called and
3 requested them.
4   Q. How do you know that?
5   A. How do I know that?
6   Q. Uh-huh (affirmative).
7   A. I just do. I don't really -- what do you
8 mean how do I know that?
9   Q. Did someone tell you that?
10   A. No.
11   Q. Then how do you know?
12   A. I don't, I guess.
13   Q. How many physical workstations are there
14 at the ▓ address?
15   A. For LabMD?
16   Q. Yes, of course, yes.
17   A. There is -- and -- okay. One, two, three.
18   Q. There are three physical servers?
19   A. Uh-huh, three physical workstations.
20   Q. Three physical workstations. Thank you.
21   Do they hook up to the virtual network --
22   A. Yes.
23   Q. -- at ▓
24   A. Uh-huh (affirmative).
25   Q. Did you help set up the network at ▓

CX0705
RX487

RX487

1 █████████?
2   A.   I did the physical networking side. I
3 connected it to the cable modem for Internet access.
4   Q.   Anything else?
5   A.   No.
6   Q.   Did you install applications?
7   A.   No.
8   Q.   Did you test the network to see if it was
9 working correctly?
10   MS. BURROWS: Objection, vague.
11   THE WITNESS: Could you define working
12 correctly?
13   Q.   (By Mr. Sheer) Well, did you test the
14 network to see -- did you test to see whether the
15 workstation could actually access the servers?
16   A.   Yes.
17   Q.   Did you do anything else to test the
18 network?
19   A.   Yes.
20   Q.   What did you do?
21   A.   I tested to make sure that it was separate
22 from the rest of the network so that it didn't have
23 access because it was -- so that it was physically
24 separated from the rest of the network.
25   So anything that was on that network could

1 not -- did not have access to anything on -- anywhere
2 else in the home office or the rest of the Internet.
3 It was pretty locked down.
4   Q.   I'm not following what the "it" was in
5 your answer.
6   A.   The network, it.
7   Q.   Break it down into pieces for me. There
8 is the network, the LabMD network, that's been moved
9 to █████████.
10   A.   Uh-huh (affirmative).
11   Q.   You just testified, I think, that you had
12 locked it down pretty tightly; right?
13   A.   I tested that it was locked down.
14   Q.   Okay.
15   A.   I did not lock it down.
16   Q.   I understand the difference. What did you
17 test to see if it was locked down?
18   A.   I tested that you could not access locally
19 any of the file servers or anything. You could not be
20 on one segment of the network and then still access
21 the server. You had to be physically plugged into
22 that switch to have access to it, so --
23   Q.   Break it down to something a little
24 simpler for me to understand. Are you saying that in
25 order to access the laboratory information system

1 server, the workstation would have to be plugged into
2 that server, physically plugged into it?
3   A.   Yes.
4   Q.   Is the same true for access to the Lytec
5 server?
6   A.   Uh-huh (affirmative). They were both in
7 that private network segment.
8   Q.   What else was in the private network
9 segment?
10   A.   The three workstations.
11   Q.   How was that segment created?
12   MS. BURROWS: Objection, vague and
13 ambiguous.
14   THE WITNESS: That would be a Jeff Martin
15 question. I did not create it.
16   Q.   (By Mr. Sheer) Do you know how it was
17 segmented from the rest of the system?
18   A.   Through the -- yes and no. I don't know
19 the best way how to explain it.
20   Q.   Do your best.
21   MS. BURROWS: Objection, calls for
22 speculation.
23   THE WITNESS: Okay. You've got the
24 Internet, the modem, right? And then it's got
25 four ports coming out of it. So one of those

1 ports we have going to the network where the
2 LabMD is at.
3   And all of that is held separate by a
4 firewall put on the end of that port from the
5 cable modem in the home office. And that
6 firewall is what's blocking everything else from
7 having access back to the cable modem in through
8 the rest of the -- to the rest of the world.
9   Q.   (By Mr. Sheer) All right. So tell me if
10 I'm misunderstanding, but I think what you're telling
11 me is that the system that you moved from Powers Ferry
12 to █████████ is protected by a firewall between
13 the cable modem to the Internet and the network
14 itself?
15   A.   Correct.
16   Q.   Is there anything else besides the
17 firewall?
18   A.   On what level?
19   Q.   You tell me.
20   MS. BURROWS: Objection, overbroad.
21   THE WITNESS: I don't understand.
22   Q.   (By Mr. Sheer) You're asking on what
23 level. Is there a different level on which the
24 protection could be provided?
25   A.   There's the cable modem and it has a

CX0705
RX487

RX487

1 firewall built in it too. So it's the firewall for
2 the cable modem, and then it's going into another
3 firewall for the LabMD equipment, and so --
4   Q.   All right. If someone was reaching from
5 the Internet to the cable modem inside ▮▮▮▮
6 what could they reach --
7   MS. BURROWS: Objection, calls for a
8 hypothetical.
9   MR. SHEER: Are you going to let me
10 finish, or are you just going to interrupt?
11   MS. BURROWS: Go ahead.
12   Q.   (By Mr. Sheer) What could they reach on
13 the inside of the network at ▮▮▮▮▮
14   MS. BURROWS: Objection, calls for a
15 hypothetical.
16   THE WITNESS: Should not be able to reach
17 anything.
18   Q.   (By Mr. Sheer) Why is that?
19   A.   Because it's firewall.
20   Q.   What is the purpose then of having an
21 Internet connection to that network?
22   A.   Could you repeat the question?
23   Q.   What's the purpose of having an Internet
24 connection to that network if you can't reach anything
25 from the network -- from the Internet in the network?

1   A.   You can still go out, but it's not going
2 to let just anybody in.
3   Q.   Will it let anyone in?
4   A.   No.
5   Q.   Could someone at the corporate condo, for
6 example, reach the Lytec server inside the network?
7   MS. BURROWS: Objection, calls for a
8 hypothetical.
9   THE WITNESS: They can use it, access it
10 through LogMeIn, so not physically connect to
11 it.
12   Q.   (By Mr. Sheer) So are you saying that
13 using LogMeIn someone could remotely access the
14 network that's located at ▮▮▮▮▮▮
15   A.   Yes.
16   Q.   What could they connect to inside that
17 network?
18   A.   They could connect to their Lytec
19 workstation, which is -- which has access to Lytec for
20 their billing.
21   Q.   Could they connect to anything else?
22   A.   Not to my knowledge, no.
23   Q.   Just to create a picture, a word picture,
24 and tell me if I'm misunderstanding this, but are you
25 saying that LogMeIn reaches the physical workstation

1 inside the ▮▮▮▮▮▮ address?
2   MS. BURROWS: Objection, asked and
3 answered.
4   Q.   (By Mr. Sheer) I'm sorry. I didn't hear
5 your answer.
6   A.   It's the virtual workstation.
7   Q.   It's a virtual workstation?
8   A.   Correct.
9   Q.   And that virtual workstation can reach the
10 Lytec server?
11   A.   Yes.
12   Q.   Is it possible to LogMeIn to the other two
13 workstations at 425 -- use LogMeIn to reach the other
14 workstations at ▮▮▮▮▮▮
15   MS. BURROWS: Objection, calls for a
16 hypothetical.
17   THE WITNESS: I can only say for mine, no.
18 I don't know how the other two are set up.
19   Q.   (By Mr. Sheer) What control prevented
20 reaching the laboratory information server from the
21 workstation you were using?
22   A.   Could you repeat the question?
23   Q.   Yes. What controls were in place that
24 prevented the workstation you were using from reaching
25 the laboratory information server at ▮▮▮▮▮?

1   A.   My workstation from accessing the
2 laboratory control server?
3   Q.   Correct.
4   A.   And you're asking what was put to prevent
5 it from reaching it?
6   Q.   I am.
7   A.   Well, I testified earlier that my computer
8 was on that network, so it did have access to it, but
9 it didn't have the laboratory information system
10 installed on it, so it couldn't access it.
11   Q.   Are you saying that your workstation
12 didn't have the client for the laboratory information
13 system?
14   A.   Yes, correct.
15   Q.   And so the reason that your workstation
16 was not able to reach the laboratory information
17 system server was it just didn't have the software on
18 your workstation to do so?
19   A.   Correct.
20   MS. HARRIS. Alain, I need to take a short
21 break.
22   MR. SHEER: Okay. Let's take ten minutes.
23   (Deposition in recess, 9:47 a.m. to
24 9:53 a.m.)
25   Q.   (By Mr. Sheer) Back on the record. Just

9 (Pages 33 to 36)

Complaint Counsel = Yellow   Both = Green
LabMD = Blue

CX0705
RX487

RX487

1 Q. Uh-huh (affirmative).
2 A. Because not everybody, I don't think,
3 understands how virtual machines work or even know how
4 to begin to access them.
5   So you would have to gain access to that
6 virtual machine, and if you had no idea what the
7 password was, then you would be stopped right there.
8   And then if you did gain access to it,
9 then you would still have to know the passwords to get
10 into any of the machines that were running on that
11 virtual machine.
12   And to even get to that point you would
13 have to have a physical presence inside the building
14 to even have access to that part of that because that
15 machine did not have LogMeIn installed on it.
16 Q. Now, the machine you're talking about
17 is -- this is the LIS server?
18 A. I thought we were talking about my
19 workstation.
20 Q. I thought we were talking about your
21 workstation too. And I thought you had said earlier
22 that you could LogMeIn to that workstation so you
23 could get to it remotely. Did I misunderstand?
24 A. I think you did because you asked me if
25 LogMeIn had -- you said if LogMeIn had any -- if any

1 of the workstations had LogMeIn on it.
2   I said I can't speak for those other two,
3 but mine I know did not have LogMeIn on it.
4 Q. All right. I misheard you. All right.
5   What else from LabMD at ▓▓▓▓▓▓▓?
6   MS. BURROWS: Objection, overbroad.
7   THE WITNESS: Could you repeat the
8 question?
9 Q. (By Mr. Sheer) What else from LabMD is at
10 ▓▓▓▓▓▓▓?
11 A. What else from LabMD?
12 Q. Uh-huh (affirmative).
13 A. What do you mean by what else?
14 Q. Are there paper documents from LabMD at
15 ▓▓▓▓▓▓?
16 A. I don't know. There are slides.
17 Q. What kind of slides?
18 A. Glass sides with -- I think it has
19 something to do with their laboratory part of what
20 they do, stuff that they look at in the microscope.
21 That's really about all I know about them.
22 Q. How do you know about that?
23 A. Because they're in a room that our IT
24 equipment was in too.
25 Q. How many samples are there there?

1 A. I don't know.
2 Q. How many boxes of samples?
3 A. A lot.
4 Q. More than a hundred?
5 A. Yes.
6 Q. How big are the boxes?
7 A. Individually, they're about like that and
8 about like that. And then they're stacked.
9 Q. You have to do something better than like
10 that and like that. So give me rough inches.
11 A. I'd say about two feet, two feet long by
12 about six inches tall. There's several.
13 Q. And how deep are they?
14 A. Two feet.
15 Q. So two feet by two feet by six inches,
16 roughly?
17 A. No. Two feet by probably about six inches
18 and six inches.
19 Q. All right. And how many boxes? More than
20 a hundred you said?
21   MS. BURROWS: Objection, asked and
22 answered.
23   THE WITNESS: I have no idea, to be honest
24 with you.
25 Q. (By Mr. Sheer) Do you think more than a

1 hundred?
2   MS. BURROWS: Objection, calls for
3 speculation.
4   THE WITNESS: There's definitely more than
5 a hundred slides. I couldn't say if there's
6 more than a hundred boxes or not. I really
7 don't know.
8 Q. (By Mr. Sheer) How are the boxes stored?
9 A. Well, the slides, they're stored in the
10 boxes, and the boxes are stored --
11 Q. Go ahead.
12 A. -- in that room.
13 Q. Are the boxes stored on a shelving system?
14 A. Uh-huh (affirmative).
15 Q. What's the dimensions of the shelving
16 system they're on?
17 A. I don't know. Just a metal --
18 Q. Five feet wide?
19 A. Just a metal rack probably about six feet
20 long and seven feet tall maybe. And there's several
21 of those racks, and they're all sitting in those
22 racks.
23 Q. So let's backtrack. There are several of
24 those racks. Does that mean there are three? Four?
25 Two?

Complaint Counsel = Yellow   Both = Green
LabMD = Blue

CX0705
RX487

RX487

1   A.   I don't know the specific amount of racks.

2   Q.   Are each of the racks full of samples, the
3 slide samples?

4   A.   Yes.

5   Q.   Are there any electronic records at ▮▮
6 ▮▮▮▮▮▮ besides what might be included on the
7 network that we've been talking about?

8   MS. BURROWS: Objection, vague and
9 ambiguous.

10   THE WITNESS: Not that I'm aware of. I
11 don't know. I don't know.

12   Q.   (By Mr. Sheer) Any backup drives there?

13   A.   Yes.

14   Q.   What are the backup drives?

15   A.   They are encrypted backups of the
16 virtual -- of the virtual servers.

17   Q.   How are they encrypted?

18   A.   TrueCrypt. They're password protected,
19 and they're also protected with a key.

20   Q.   Are they accessible from your workstation?

21   A.   No.

22   Q.   How are they accessible?

23   A.   Through the server rack. I have a server
24 dedicated just for those backups.

25   Q.   And how is that server accessed?

1   A.   Remotely through my workstation.

2   Q.   Where is the encryption key stored?

3   A.   On that server.

4   Q.   Setting aside the backup that we've just
5 talked about, are there any other hard drives or media
6 on which electronic records are stored at ▮▮
7 ▮▮▮▮▮?

8   MS. BURROWS: Objection, overbroad.

9   THE WITNESS: To my knowledge, no.

10   Q.   (By Mr. Sheer) We've talked a bit about
11 the security measures at ▮▮▮▮▮▮▮, and I'd like
12 to talk a bit more about the measures in place to
13 prevent unauthorized disclosure of information from
14 the network.

15   You've told us there's a firewall.
16 Actually, you've told us there's two firewalls, one on
17 the modem and one inside the network from the modem;
18 right?

19   A.   Right.

20   Q.   Is there file integrity monitoring?

21   A.   File integrity monitoring?

22   Q.   Uh-huh (affirmative).

23   A.   What is that?

24   Q.   Is there a way for checking to see if
25 there have been changes in critical files?

1   MS. BURROWS: Objection, vague and
2 ambiguous.

3   THE WITNESS: Could you give me an example
4 of a file integrity monitoring? Something
5 that --

6   Q.   (By Mr. Sheer) No. I'm actually asking
7 you whether there's some application or device that is
8 on the network that checks to see whether critical
9 files have been changed.

10   A.   What would do that? What would check
11 that?

12   Q.   I'm just asking you if you have such a
13 thing.

14   A.   I don't really understand. I don't really
15 understand what would be doing that, so I don't think
16 that I know of anything because I don't really
17 understand the --

18   Q.   Okay.

19   A.   -- what would be a file. So you're saying
20 if a file is changed, would we get like an alert or
21 something like that if a file was changed?

22   Q.   That is the idea, yeah.

23   A.   No. I don't even know how you would do
24 something like that.

25   Q.   All right. Is there any kind of intrusion

1 detection system at ▮▮▮▮▮▮?

2   MS. BURROWS: Objection, vague and
3 ambiguous.

4   THE WITNESS: Like what?

5   Q.   (By Mr. Sheer) Well, I'm asking you. Is
6 there any device or application that is installed
7 there that would detect a possible intrusion?

8   A.   Not to my knowledge.

9   Q.   Is there any intrusion prevention system
10 at ▮▮▮▮▮▮?

11   MS. BURROWS: Objection, vague and
12 ambiguous.

13   THE WITNESS: Not to my knowledge.

14   Q.   (By Mr. Sheer) Is traffic coming into and
15 going out of ▮▮▮▮▮▮ the network at ▮▮
16 ▮▮▮▮▮ being monitored?

17   MS. BURROWS: Objection, vague and
18 ambiguous.

19   THE WITNESS: I don't know.

20   Q.   (By Mr. Sheer) Is traffic being logged in
21 and out of the network?

22   MS. BURROWS: Objection, calls for
23 speculation.

24   THE WITNESS: Can you repeat the question?

25   Q.   (By Mr. Sheer) Is traffic being logged

CX0705
RX487

RX487

1 going into and out of the network?
2   A. For LabMD?
3   Q. Yes. We're talking about the LabMD
4 network at ████████████
5   A. Yes, I would say that that would be true.
6   Q. How is that being done?
7   A. Firewall would keep a log, and then if
8 anything was accessed through LogMeIn, it would also
9 be logged through LogMeIn.
10   Q. Is there a process in place there to
11 review the logs?
12   A. I wouldn't say that there's a process in
13 place to view the logs.
14   Q. Is there someone there who will review the
15 logs?
16   A. Not to my knowledge, no.
17   Q. Are there user groups that have been
18 assigned at ████████████?
19   A. On what?
20   Q. On the resources on the network.
21   A. Are there user groups that would be
22 assigned to ████████?
23   Q. Are there user groups that have been
24 assigned to ████████
25   MS. BURROWS: Objection, vague and

51

1 network at ████████████
2   A. No.
3   Q. If someone were to -- some authorized
4 person were to come to the ████████ address and
5 try to use your workstation, would they be able to?
6   MS. BURROWS: Objection, calls for a
7 hypothetical.
8   THE WITNESS: They could turn it on.
9   Q. (By Mr. Sheer) Could they do anything
10 else?
11   A. Not unless they knew my password.
12   Q. Are there any instructions that you left
13 about how someone at the workstation, your old
14 workstation, could access the network?
15   MS. BURROWS: Objection, vague and
16 ambiguous.
17   THE WITNESS: Absolutely not.
18   Q. (By Mr. Sheer) So how would a new user
19 learn how to access the network?
20   MS. BURROWS: Objection, calls for a
21 hypothetical.
22   THE WITNESS: They would have to talk to
23 somebody who knew about the network, I guess,
24 right?
25   Q. (By Mr. Sheer) They'd have to talk to

50

1 ambiguous.
2   THE WITNESS: I really don't understand
3 what you're asking.
4   Q. (By Mr. Sheer) Well, are you an
5 administrative user or were you an administrative user
6 at ████████?
7   A. Yes.
8   Q. Were there other administrative users?
9   A. Jennifer and Jeff.
10   Q. Anyone else?
11   A. No.
12   Q. Were there any users who were assigned to
13 a lesser group, a more restricted group?
14   MS. BURROWS: Objection, vague and
15 ambiguous.
16   THE WITNESS: If there was, I don't know
17 about it.
18   Q. (By Mr. Sheer) Were there any other users
19 besides the three of you?
20   MS. BURROWS: Objection, calls for
21 speculation.
22   THE WITNESS: Were there any other users
23 that were -- could you repeat the question?
24   Q. (By Mr. Sheer) Were there any other users
25 who had -- any other people who had access to the

52

1 who?
2   A. Huh?
3   Q. Who would they have to talk to?
4   A. They would have to talk to myself,
5 Jennifer, or Jeff.
6   Q. And why is that?
7   A. To learn how to access the network.
8   Q. We talked earlier about the corporate
9 condo. I wasn't quite clear on what work you did
10 there.
11   A. Uh-huh (affirmative).
12   Q. So could you tell me what work you did
13 there?
14   MS. BURROWS: Objection, asked and
15 answered.
16   THE WITNESS: I set up two printers and
17 one workstation, and that's it.
18   Q. (By Mr. Sheer) What could the workstation
19 do?
20   A. The workstation was a billing workstation
21 from the billing department at LabMD, and that
22 workstation was connected to the two printers. And
23 that workstation was primarily to run billing, the
24 billing statements, continuing the billing process
25 until the course ended.

13 (Pages 49 to 52)

Complaint Counsel = Yellow   Both = Green
LabMD = Blue

CX0705
RX487

RX487

1 Q. Understood. In order to do that, would
2 the workstation or the user of the workstation need to
3 have access to Lytec, the Lytec server?
4 A. Yes.
5 Q. How did they get access to the Lytec
6 server?
7 A. LogMeIn.
8 Q. Walk us through how that works.
9 A. They would have to log-in to LogMeIn with
10 their account, and that would -- that would open up
11 the -- have you ever used LogMeIn?
12 Q. No, I haven't.
13 A. Okay. Well, then you get your list of
14 computers, and they would have been in the billing
15 group, so they would only have a list of billing PCs,
16 and they would just click on that PC and do remote
17 control.
18 And then it would open up that computer's
19 locked screen, and then they would have to enter in
20 user credentials to get to that part of the screen or
21 to get into Windows.
22 And then they would have to have
23 credentials to get into Lytec, to get into Lytec, to
24 access any of that.
25 So they would need LogMeIn access, Windows

1 access, and then they would need Lytec access.
2 Q. From the workstation at the corporate
3 condo, what else on the network at ▓▓▓▓ could
4 be reached besides the Lytec server?
5 A. I think they have access to the LabNet
6 server too.
7 Q. The LabNet server is the laboratory
8 information system?
9 A. Uh-huh (affirmative), not the actual
10 physical server, but the LabNet client, the client on
11 the workstation to access -- to use it for -- to get,
12 I guess, lab records and stuff.
13 Q. So if I understand you correctly, what I
14 think you're telling us is from a workstation in the
15 corporate condo the user could reach the billing
16 server and the laboratory information system server;
17 is that right?
18 A. It could access the clients, not
19 physically not access the servers, no. They don't
20 have access to servers at all.
21 Q. Let's backtrack then. They accessed the
22 clients, and once they accessed the clients for Lytec
23 and the laboratory information system, what could they
24 do?
25 A. Well, the clients would talk to the

1 server, and then they could do whatever those clients
2 would allow them to do.
3 Q. So does that mean that the workstation at
4 the corporate condo could access the Lytec application
5 and through that application reach the Lytec server at
6 ▓▓▓▓?
7 MS. BURROWS: Objection, misstates
8 testimony.
9 THE WITNESS: The corporate condo would
10 give them LogMeIn access to the virtualized
11 client, which would -- yes, it would give
12 them -- they would be able -- if they had the
13 credentials, they could have access to both
14 those clients; correct.
15 Q. (By Mr. Sheer) And so let's just kind of
16 deal with one of them at a time.
17 A. Sure.
18 Q. Once the remote user in the corporate
19 condo has gotten to the Lytec, the billing server,
20 what could they do there?
21 A. Lytec stuff.
22 Q. Could they extract information from the
23 server?
24 MS. BURROWS: Objection, calls for
25 speculation.

1 THE WITNESS: Yeah, I would really be
2 speculating what they could do because I really
3 had very little -- played a very little role in
4 the actual Lytec client. So I don't know what
5 they would have full access to or not.
6 Q. (By Mr. Sheer) All right. Going on to
7 the laboratory information system, a user at the
8 workstation in the corporate condo is able to reach
9 the network at ▓▓▓▓ and connect to the client
10 for the laboratory information system; right?
11 A. Uh-huh (affirmative).
12 Q. What can they do with the laboratory
13 information system once they've done that?
14 MS. BURROWS: Objection, calls for a
15 hypothetical.
16 THE WITNESS: Well, they would have access
17 to tests that were performed probably in regards
18 to billing, for billing purposes.
19 Q. (By Mr. Sheer) Could they print whatever
20 it is they viewed in the laboratory information
21 system?
22 MS. BURROWS: Objection, calls for
23 speculation.
24 THE WITNESS: Sure.
25 Q. (By Mr. Sheer) Where could they print it?

CX0705
RX487

RX487

57

1 A. Where could they print it?
2 Q. Uh-huh (affirmative).
3 A. They could print it to the printer
4 probably that hooked up to that workstation right
5 there.
6 Q. That's a printer that's located at the
7 corporate condo?
8 A. Uh-huh (affirmative).
9 Q. Could they print Lytec reports to the
10 corporate condo?
11 A. I think so, yeah.
12 Q. Are there any other servers on the ███
13 ███████ network that could be reached from the
14 workstation at the corporate condo?
15 A. Not to my knowledge, no.
16 Q. What else from LabMD is at the corporate
17 condo?
18   MS. BURROWS: Objection, overbroad and
19 asked and answered.
20   THE WITNESS: Could you repeat the
21 question?
22 Q. (By Mr. Sheer) Yeah. We spoke a few
23 minutes ago about other materials from LabMD at ███
24 ███████ and you described slide samples.
25 A. Uh-huh (affirmative).

58

1 Q. I'm asking you the same basic question for
2 the corporate condo. And so it is: What other
3 materials from LabMD is at the corporate condo?
4 A. I know we had some stuff moved there. I
5 really don't know what all is there though. I didn't
6 ask, and they didn't tell me. I was only there
7 briefly for just hooking up that printer and those
8 computers there.
9 Q. Are there paper documents there in boxes?
10   MS. BURROWS: Objection, asked and
11 answered.
12   THE WITNESS: Paper documents in boxes? I
13 don't think so.
14 Q. (By Mr. Sheer) Are there other computer
15 equipment? Is other computer equipment there?
16 A. Yes.
17 Q. What is that?
18 A. I think that they may have moved some of
19 those workstations down there from like --
20 workstations that had the hard drives removed. And
21 they physically -- and they were put there, and
22 odd-and-end computer junk, nothing special though.
23 Q. When you say workstations that had the
24 hard drives removed, what are you referring to?
25 A. Client, like the billing department and

59

1 customer service department's computers, those
2 computers had to go somewhere, and that's where they
3 went.
4 Q. You said the hard drives were removed from
5 those computers?
6 A. Uh-huh (affirmative).
7 Q. How do you know that?
8 A. Because I removed most of them.
9 Q. Where are the hard drives now?
10 A. To my knowledge, they're in a secure
11 location that I am not fully aware where they're at,
12 but they put them somewhere supposedly secure to keep
13 them safe from --
14 Q. Did you see them at ████████████?
15 A. I don't remember.
16 Q. What kind of security measures are in
17 place at the corporate condo for the workstation that
18 can remotely log into the computer network at ██████
19 ████?
20   MS. BURROWS: Objection, overbroad.
21   THE WITNESS: It has a Windows user name
22 password requirement to log into it.
23 Q. (By Mr. Sheer) Anything else?
24 A. No.
25 Q. Your answer is no?

60

1 A. No, right. Yes. No, yes.
2 Q. We've talked about using LogMeIn to
3 remotely log into the network at ████████. Could
4 the LogMeIn service be used to remotely log into the
5 425 networks from anywhere or just from the corporate
6 condo?
7   MS. BURROWS: Objection, overbroad.
8   THE WITNESS: With the correct
9 credentials, you could log in from anywhere.
10 Q. (By Mr. Sheer) Back to ████████,
11 what else -- where in the house is the network
12 located?
13 A. The lower level, basement.
14 Q. It's the basement?
15 A. Uh-huh (affirmative).
16 Q. What else is in the basement?
17 A. We already went over this, didn't we?
18 Q. I don't think we did.
19 A. You asked what else was in there, and I
20 said the slides.
21 Q. No. I understand. I'm not asking you the
22 material that came from LabMD that's now in the
23 basement. I'm asking you kind of what else is in the
24 basement.
25 A. Okay. There is slides, the server racks,

CX0705
RX487

RX487

1 the three workstations, some tools, like networking
2 tools and stuff like that, some spare computer
3 equipment, and I think there's some chairs down there,
4 a cart, and that's about all I can think of.
5   Q. Are the utilities down there, the house
6 utilities down there, heating and air conditioning?
7   A. I don't know.
8   Q. Anything else down there besides what
9 you've described?
10   A. I would be speculating. I don't know.
11   Q. Is it accessible from the outside?
12   A. The basement?
13   Q. Yeah.
14   A. No.
15   Q. What security measures are in place for
16 the perimeter of the house?
17   MS. BURROWS: Objection, vague and
18 ambiguous.
19   THE WITNESS: Security measures? Could
20 you repeat the question?
21   Q. (By Mr. Sheer) What security measures are
22 there for the perimeter of the house?
23   A. I'm not aware of any.
24   MR. SHEER: Can we stop for just five
25 minutes so we can talk briefly?

1   (Deposition in recess, 10:24 a.m. to
2 10:34 a.m.)
3   Q. (By Mr. Sheer) Back on the record.
4 You've told us that you stopped working for LabMD. Do
5 you have any plans to work for the company in the
6 future?
7   A. If they ask me.
8   Q. Have they told you that that's likely?
9   A. No.
10   Q. Have they told you that that's possible?
11   A. Nope.
12   Q. Okay. If Mr. Daugherty wanted to sit down
13 at your workstation at ██████████ and log in, could
14 he do it?
15   MS. BURROWS: Objection, calls for
16 speculation.
17   THE WITNESS: He could log in under his
18 credentials.
19   Q. (By Mr. Sheer) What did his credentials
20 allow him to do on that network?
21   A. I don't know. I wasn't in charge of that.
22 That was something that Jennifer handled was
23 credentials. I know he wasn't a domain administrator.
24   Q. If he's not a domain administrator, what
25 is he?

1   A. Regular user.
2   Q. Regular user?
3   A. Uh-huh (affirmative).
4   Q. I asked you earlier whether there were
5 groups that had been set up at ██████████, and what
6 I think you're telling me now is there is a regular
7 user group and it's Mr. Daugherty; is that right?
8   A. Right. You asked if there's any other
9 users that were going to be logged in, so it was just
10 me, Jennifer, and Jeff, so I guess if Mike wanted to
11 use his old LabMD domain account, he could get in.
12   Q. That account is still good?
13   A. I'm going to speculate and say, yes, it's
14 probably still good.
15   Q. What did that account give him access to
16 at Powers Ferry?
17   MS. BURROWS: Objection, calls for
18 speculation.
19   THE WITNESS: He had access to his -- like
20 the administrative upper-level file shares. So
21 it was basically just the file -- special file
22 shares for the administrators.
23   Q. (By Mr. Sheer) What other file shares did
24 he have access to at Powers Ferry?
25   A. Mike?

1   Q. Uh-huh (affirmative).
2   A. None other than just those ones that they
3 had set up for him.
4   Q. What were they though?
5   A. That would probably be a better question
6 to ask somebody else because that was kind of above
7 me. I didn't really participate in setting up any of
8 those file shares.
9   Q. Well, you said he had the administrative
10 shares; right? He had access to the administrator
11 share?
12   A. Uh-huh (affirmative).
13   Q. What other shares were there?
14   A. Billing and client services each had a
15 share they would share stuff off that they would put
16 their documentation on.
17   Q. Any other shares besides that?
18   A. IT department had a share too.
19   Q. Did Mr. Daugherty have access to that
20 share?
21   A. No.
22   Q. With the administrator share, what
23 applications could be reached?
24   A. With the administrator share, what
25 applications could be reached? That's a file.

16 (Pages 61 to 64)

Complaint Counsel = Yellow   Both = Green
LabMD = Blue

1   And then the normal user would be limited
2   access and control.
3   Q. (By Mr. Sheer) Did you simply use the
4   default components of each one of those categories,
5   administrator, power user, and normal?
6   A   Yes.
7   Q. How many people at LabMD at Powers Ferry
8   had normal user permissions? I think we've talked
9   about this, but I just want to clarify things.
10   MS. BURROWS: Objection, vague and
11   ambiguous.
12   THE WITNESS: It was our policy to have
13   all the users be users or -- normal users or
14   power users. And then the managers and IT were
15   allowed to be administrators.
16   Q. (By Mr. Sheer) The reason why all the
17   normal -- all the regular employees, not managers and
18   not IT employees, were power users was because of the
19   difficulty with making Lytec work; is that right?
20   MS. BURROWS: Objection.
21   THE WITNESS: Correct.
22   Q. (By Mr. Sheer) Is there any other reason?
23   A   No. If we could made them all normal
24   users and the software would have worked fine, then
25   they would have all been just normal users.

1   Q. Did the IT department try to resolve the
2   conflict that prevented -- the conflict between a
3   normal user permission and Lytec?
4   A   There was little that we could do to
5   resolve that.
6   Q. I didn't hear you.
7   A   There was not much that we could do to
8   resolve it.
9   Q. What did you try to do?
10   A   Tried reinstalling, uninstalling it and
11   reinstalling it a couple different times on a couple
12   different computers, and it only came back to the --
13   it had to be in the power user group for them to have
14   permission to do it.
15   Q. Do you know what the technical problem was
16   though?
17   MS. BURROWS: Objection, misstates
18   testimony.
19   THE WITNESS: It was a permission that the
20   client needed to utilize to talk to the server
21   or to load up into Windows. I don't know the
22   specific details of why it was like that.
23   Q. (By Mr. Sheer) All right. Turning now to
24   ████████ do you have any concerns about the
25   adequacy of the security at that location for the

1   computer network there?
2   MS. BURROWS: Objection, calls for expert
3   witness conclusion.
4   THE WITNESS: No. I'm pretty -- very
5   confident that the security of the network there
6   is very well. I think it's good.
7   Q. (By Mr. Sheer) What's the basis for that?
8   A   Because it's separated from the -- like I
9   said earlier, it's separated from the rest of the
10   network inside the house. And it's got the -- and
11   it's behind the same firewall that we used at LabMD
12   for their firewall. And it's on a separate switch, so
13   it's completely separate from it, so --
14   Q. It's on a separate switch and it's
15   completely separate from what?
16   A   I mean, like I said earlier, you've got
17   the -- you've got two connections. One is going to
18   the rest of the house where it's all wireless and
19   everything. And the other one is going to just that
20   server. So there's two different switches, one for
21   the house and then another switch for the LabMD stuff.
22   Q. Turning to the corporate condo, do you
23   have concerns about the security of that computer
24   equipment at the corporate condo?
25   MS. BURROWS: Objection, calls for expert

1   witness conclusion.
2   THE WITNESS: No. I think that that
3   equipment is safe there.
4   Q. (By Mr. Sheer) Are you aware of any
5   instance where there was a violation of any security
6   policy or procedure when you worked at LabMD?
7   MS. BURROWS: Objection, calls for a legal
8   conclusion.
9   THE WITNESS: Could you repeat the
10   question?
11   Q. (By Mr. Sheer) Are you aware of any
12   violation of a security policy or procedure when you
13   worked at LabMD?
14   A   Security policy or procedure?
15   MS. BURROWS: Same objection.
16   THE WITNESS: I can't think of any, no.
17   Q. (By Mr. Sheer) When you worked for LabMD,
18   did IT employees have discretion to purchase computer
19   equipment and supplies?
20   MS. BURROWS: Objection, overbroad.
21   THE WITNESS: No.
22   Q. (By Mr. Sheer) How did IT employees go
23   about getting -- purchasing computer equipment and
24   supplies?
25   A   All purchasing went through Mike

Michael Daugherty

Condensed Transcript with Word Index

For The Record, Inc.
(301) 870-8025 - www.ftrinc.net - (800) 921-5555

1   25 percent of the nearly one million patients were
2   patients for whom LabMD did not conduct a test, right?
3   A. Yeah, approximately, yes.
4   Q. And about 25 percent of that 20 or
5   25 percent of the nearly one million who LabMD did not
6   perform a test where some other lab performed a test
7   for?
8   A. The 25 percent of the 25 percent?
9   Q. Correct.
10   A. Yes. Yes, right. Right. Like managed care
11   stuff and stuff like that.
12   Q. Okay.
13   A. And that's an ever-changing accuracy desire
14   from physician's offices that will give you that.
15   Q. Where was the information about patients,
16   both types of information, the specific diagnoses and
17   laboratory results and the more general PHI kept on
18   LabMD's network?
19   A. In the laboratory information system.
20   Q. And where?
21   A. And Lytec
22   Q. Anywhere else?
23   A. Not that I know of, no.
24   Q. Where is it now?
25   A. Meaning electronically?

1   Q. Yes.
2   A. Yes
3   Q. Where is it now?
4   A. It's all at the undisclosed location of
5   ▮▮▮▮▮
6   Q. When did LabMD begin winding down?
7   A. Begin winding down?
8   Q. Let me rephrase my question.
9   A. Okay.
10   Q. The letter that you sent to physicians says
11   stopped accepting specimens around January 15th I
12   think, all right.
13   A. Yeah, I think so.
14   Q. Yeah. And the request for admissions that
15   were served yesterday says January -- December 20th.
16   A. No, I don't --
17   Q. So there's a, basically a month difference
18   in there.
19   A. I think that -- well, go ahead. I'm sorry,
20   go ahead.
21   Q. So I'm trying to understand the discrepancy.
22   A. I think it's a definitional discrepancy. We
23   didn't start winding down until January. I believe
24   the question where December came from was when I told
25   an employee

1   Q. I thought it was when specimens were no
2   longer being accepted?
3   A. That would be, specimens were no longer
4   accepted in January.
5   Q. Not earlier than that?
6   A. No.
7   Q. All right.
8   A. No.
9   Q. When LabMD began winding down in 200 -- in
10   January 2014, how many patients did it have more
11   general PHI about?
12   A. I would, I would, I would have to check
13   that.
14   MR. SHERMAN: Wait, objection. The question
15   is not clear to me, but, so I'd object to the form of
16   the question.
17   You may answer it if you understand it
18   BY MR. SHEER:
19   Q. Let me try and state it a different way.
20   The Exhibit 501, paragraph 17 that we've been talking
21   about refers to general PHI for nearly a million
22   people and that document is dated April 20th --
23   April 12th, 2010, and it's signed by you on the 12th
24   of that same month.
25   A. Are you --

1   Q. And so what I'm asking is that was several
2   years ago. In the interim LabMD continued in business
3   and so what I'm asking now is when it began to wind
4   down in January 2014, how many people did it have more
5   general PHI about?
6   MR. SHERMAN: Objection. Are you asking the
7   question with reference to those individuals for whom
8   LabMD did not test or are you asking for the entire?
9   MR. SHEER. The more, if I'm understanding
10   Exhibit 501 correctly, paragraph 17 is saying the
11   nearly one million people is the larger universe and
12   so I'm asking how big, how much bigger is it when,
13   when January 14th -- January 2014 rolled around
14   THE WITNESS: Not, it's -- I don't believe
15   it's over a million patients and I want to make sure
16   you're understanding that the more general PHI for a
17   million patients is, as I would interpret this, is
18   inclusive of the laboratory result people as well
19   BY MR. SHEER.
20   Q. That's how I'm interpreting it as well.
21   A. Okay. Okay.
22   Q. So I'm simply saying look, it's almost four
23   years between document CX 501 and the wind-down in
24   January 2014, the company was in business during that
25   period of time, presumably it conducted tests, how

1 Q.   During your tenure at LabMD, how much time
2 in an average week would you spend dealing with the
3 Destin condos, if you can recall?
4   MS. HARRIS: Objection, overbroad.
5   THE WITNESS: It varied due to the
6 seasonality of it. I'd say during a heavy
7 period, maybe four to five hours a week. That's
8 just guessing.
9   Q.   (By Ms. Lassack) What would the heavy
10 periods be?
11   A.   June through Labor Day, a little bit in
12 March when spring breakers would start. And then
13 there would be a break, and then it would pick back up
14 again once school got out.
15   Q.   I believe you also said that you did some
16 work with respect to Mr. Daugherty's current
17 residence; is that correct?
18   A.   Uh-huh (affirmative).
19   Q.   What types of work did you do?
20   A.   He renovated that home, and I would help
21 coordinate people being there to finish up the work
22 that needed to be done, electricians, plumbers, that
23 type of people.
24   Q.   And you say help coordinate, what did you
25 do?

1   A.   Called them and said, when are you going
2 to get there to finish it.
3   Q.   Typical contractor correspondence, huh?
4   A.   And then in October he said that he wanted
5 to be in by the end of the year because he had a loan
6 pending and it needed to close by the end of December.
7 So then it became really full-on.
8   And then he told me that I had to have the
9 certificate of occupancy before I could leave for
10 vacation because I was going to be gone over the
11 period he would be doing the closing on that loan,
12 which was the 30th or 31st of December. So I had to
13 make sure I had the certificate of occupancy the 20th
14 before I left for the Christmas break.
15   Q.   Because the certificate of occupancy was
16 required to close the loan?
17   A.   Yes, correct.
18   Q.   Did you ever hire contractors for work on
19 Mr. Daugherty's house?
20   A.   No. They were all previously hired.
21   Q.   Did you ever hire contractors for
22 Mr. Daugherty?
23   A.   I think they were all already people that
24 had been there prior that needed to go back and finish
25 up little, you know, loose ends.

1   Q.   The house you described for which you got
2 the certificate of occupancy, where is that house
3 located?
4   A.   In Buckhead on ███████
5   Q.   Do you know the address?
6   A.   ████████████
7   Q.   Did you ever pay LabMD bills?
8   A.   No. Well, take that back. Very rarely if
9 he was out of town and something needed to be sent
10 immediately, he would tell me to get -- well, he would
11 bring me the bills that he wrote, and I would have to
12 send them out.
13   And then occasionally, very rarely, he
14 would ask me to send a bill out that he didn't write,
15 and I'd have to use one of his checks to write it out
16 and send it, but that was rare.
17   Q.   Do you recall what types of expenses it
18 was for when you had to do it?
19   A.   Lab expenses. Occasionally it would be a
20 personal check of his that, you know, I had to pay
21 somebody that did some work for him or something, but
22 that, again, was very rare.
23   Q.   Sorry. When you said you paid a check on
24 those rare occasions from Mr. Daugherty's personal
25 work, was that from his personal account or a LabMD

1 account?
2   A.   Yes. He gave me some of his personal
3 checks just in case of an emergency. They were in a
4 file in my office.
5   Q.   Did you have any role, other than the
6 check, handling the checks, any role with patients and
7 clients?
8   A.   No.
9   Q.   And did you do any personal work for
10 Mr. Daugherty that we haven't already discussed?
11   A.   Dog sitting.
12   Q.   How often did you dog sit?
13   A.   A lot. Every time he went out of town.
14   Q.   More than once a week?
15   A.   Sometimes, yes. Sometimes it was for
16 weeks on end, yes.
17   Q.   When you dog sat, did you have to stay at
18 his house?
19   A.   No. I stayed at my house because I have a
20 dog myself, and it needed me to be there for it. So I
21 would bring the dogs to my house.
22   Q.   Did your role at LabMD change at all
23 during your tenure?
24   A.   Huh-uh, no.
25   Q.   Did you ever assist with Websense?

RX495

RX495

1 speculation, overbroad as to time frame.

2 THE WITNESS: When I would have to go to

3 his other home where he was living before he

4 moved back into ████████ he would frequently

5 leave the door unlocked when I was on my way

6 over there to pick up the dogs.

7 Q. (By Ms. Lassack) About how often would he

8 do that?

9 A. I'd say 50 percent of the time. And

10 sometimes he'd tell me to leave it unlocked once I

11 left because he -- I don't know why he didn't want it

12 locked, but I didn't relock it. Other times I locked

13 it.

14 Q. Did he tell you why he wanted you to leave

15 it unlocked?

16 A. No. He just said, don't bother locking it

17 when you leave.

18 Q. How often did he tell you that?

19 A. Maybe ten percent of the time, not often.

20 Q. Did you ever do any work for Mr. Daugherty

21 at the ████████ location?

22 A. Other than the home renovation, being

23 there for inspections, no.

24 Q. When Mr. Daugherty proposed during your

25 December 15th conversation that you continue working

1 Mr. Daugherty personally versus working doing LabMD

2 work?

3 MS. HARRIS: Objection, irrelevant,

4 overbroad as to time frame.

5 THE WITNESS: I'd say it varied, but

6 towards the end I was probably working at least

7 80 percent for Michael and 20 percent for LabMD

8 towards the end once John Boyle left and the lab

9 was not doing well.

10 Q. (By Ms. Lassack) When you said it varied,

11 the percentage varied, how did it vary? What was the

12 other end of the variance?

13 A. If something big was going on at the lab

14 that, you know, they needed my help with or whatever,

15 but I never worked in the lab itself. I always worked

16 on the admin side.

17 Q. So you said near the end you spent about

18 80 percent of your time doing work for Mr. Daugherty

19 and about 20 percent doing LabMD-related work.

20 What were those percentages when you

21 started working for LabMD?

22 A. I'd say it was more 50/50. And at times

23 maybe 60/40.

24 Q. And is that 60/40, what would be the 60?

25 A. 60 for LabMD, 40 for Mike. Michael was

1 for him out of his home at ████████ were you

2 planning to do that?

3 A. Yes, because I didn't have a choice.

4 Q. Is it fair to say then that was not

5 something you wanted to do?

6 MS. HARRIS: Objection, mischaracterizes

7 the testimony.

8 THE WITNESS: It would have been the same

9 job, just a different location.

10 Q. (By Ms. Lassack) Was that a desirable

11 location for you?

12 MS. HARRIS: Objection, vague and

13 ambiguous, irrelevant.

14 THE WITNESS: It was a further drive for

15 me, if that makes a difference.

16 Q. (By Ms. Lassack) Did that make a

17 difference to you?

18 A. Well, yeah, because gas is expensive and

19 traffic is terrible in Atlanta.

20 Q. Are there any other reasons why working

21 from ████████ would be less desirable than

22 working from Powers Ferry?

23 A. No.

24 Q. During your tenure at LabMD, how much --

25 what percentage of your time did you spend working for

1 writing the book, so he was out of town a lot. So

2 there wasn't a lot of personal work at that point.

3 Q. At what point was that?

4 A. When he was writing the book.

5 Q. When was that in terms of the calendar?

6 A. Again, I'm going to guess and say most of

7 2000 -- lord, when did he start writing that book?

8 I'm going to say half of 2011 into the early part of

9 2012. I can't remember exactly when he wrote --

10 started writing it and went out of town.

11 Q. And I believe you also said -- made a

12 reference to once John Boyle left and the lab was not

13 doing well. When was the lab not doing well?

14 A. Once clients started dropping him and we

15 lost our salespeople.

16 Q. When was that?

17 A. Late 2012 -- no, 2013.

18 Q. Do you know why clients started dropping

19 him?

20 A. Say the second half of 2013.

21 No, I wasn't privy to that information.

22 Q. Do you know who at LabMD was privy to that

23 information?

24 MS. HARRIS: Objection, calls for

25 speculation.

```
1        THE WITNESS: No, I don't know.
2    Q.   (By Ms. Lassack) Do you know why LabMD
3 lost salespeople?
4        MS. HARRIS: Objection --
5        THE WITNESS: They found other jobs.
6    Q.   (By Ms. Lassack) I'm sorry. I didn't
7 hear you.
8    A.   They found other jobs.
9    Q.   How do you know that?
10   A.   Because they gave their resignation and
11 took other jobs.
12       MS. LASSACK: Let's go off the record and
13 take a quick break. It's 3:02.
14       (Deposition in recess. 3:03 p.m. to
15 3:14 p.m.)
16   Q.   (By Ms. Lassack) We are back on the
17 record at 3:14. Ms. Gardner, I believe you said you'd
18 like to clarify an earlier answer.
19   A.   I forgot to add that one of my duties was
20 to ship out his books to lists that he gave me. I
21 thought of that.
22   Q.   How many copies of his book did you ship
23 out?
24   A.   At least 500, I'd guess.
25   Q.   To whom did you ship them?
```

```
1        MS. HARRIS: Objection, overbroad.
2        THE WITNESS: Lists that he gave me.
3    Q.   (By Ms. Lassack) Were there certain types
4 of people on the list?
5    A.   It would just be media or whatever. He'd
6 just give me the list, and I'd ship it to whatever
7 name was on the list.
8    Q.   So you -- I believe you said media; is
9 that correct?
10   A.   Media people or PR people.
11   Q.   Any other categories of people you recall
12 from the lists?
13   A.   No.
14   Q.   I believe you testified earlier that you
15 participated in inspections at ████████ is that
16 correct?
17   A.   Uh-huh (affirmative).
18   Q.   Do you know if ████████ has any sort
19 of security system?
20       MS. HARRIS: Objection, vague and
21 ambiguous as to security system.
22       THE WITNESS: I don't know that.
23   Q.   (By Ms. Lassack) Do you know if it has
24 any alarm system?
25   A.   I don't know.
```

```
1    Q.   Do you know anything about the doors at
2 425 Broadland? I'll give you an example. Like, for
3 instance, is there a lock on the door between the
4 garage and the house?
5    A.   Yes.
6    Q.   Do you know if there's a lock on the door
7 leading to the basement?
8    A.   I don't recall.
9    Q.   Do you know what type of door the front
10 door is?
11   A.   I believe it's like a double door, but I
12 don't even remember. I'm not sure.
13   Q.   Who paid your salary when you worked at
14 LabMD?
15   A.   LabMD.
16   Q.   Did Mr. Daugherty personally pay any
17 portion of your salary?
18   A.   No.
19   Q.   When you began working at LabMD, did you
20 have a personal computer that you used?
21   A.   No.
22   Q.   Did you have a computer that LabMD
23 provided that you used?
24   A.   Yes.
25   Q.   What type of computer was that?
```

```
1    A.   I believe it was a Dell desktop.
2    Q.   Do you recall what operating system was on
3 it?
4    A.   I think Windows 7. I'm not sure though.
5    Q.   Do you recall if the operating system
6 changed during your tenure at LabMD?
7    A.   No, I don't believe.
8    Q.   Did your computer change during your
9 tenure at LabMD?
10   A.   No.
11   Q.   When you first started using your computer
12 at LabMD, was there any data on it?
13   A.   Yes.
14   Q.   What types of data?
15   A.   Forms that the previous admins used,
16 correspondence that had been written and saved in
17 files, various charts and old handbooks, employee
18 handbooks, you know, that had been saved, various
19 documents.
20   Q.   Were there any pictures?
21   A.   I believe there were some pictures saved
22 on there as well.
23   Q.   Do you recall what types of pictures?
24   A.   I remember some pictures of his dogs on
25 there. I can't even recall. I think there were some
```

14 (Pages 53 to 56)

1 record at 4:30. Ms. Gardner, earlier you talked about
2 a conversation with Mr. Fusco about the key above
3 Mr. Daugherty's door. And I just want to ask you a
4 couple of questions to try to understand Ms. Harris's
5 claim of attorney/client privilege.
6   When Mr. Fusco talked to you about the
7 key, did he tell you that he was giving Mr. Daugherty
8 legal advice when he spoke to him?
9   MS. HARRIS: Objection. I'm going to
10   instruct her not to answer. It's
11   attorney/client privileged.
12   Q. (By Ms. Lassack) Are you following
13 Ms. Harris's instruction, Ms. Gardner?
14   A. I don't know what to say because I just --
15 I don't know what to -- I don't know what I'm supposed
16 to say at this point.
17   Q. I'm sure that there is no right answer.
18 Neither one of us is your lawyer, and neither one of
19 us can give you legal advice.
20   A. So say the question again, and I'll tell
21 you yes or no.
22   Q. I just was asking if you were following
23 Ms. Harris's instruction not to answer my question.
24   A. She's technically not representing me. So
25 I can say, I guess, what I know, and if it's not

1 allowed, that's between, I guess, the two of you to
2 delve out. I don't know.
3   All I -- the way it happened was that
4 Stephen Fusco told me that that key over Mike's door
5 needed to be taken down and that he advised Mike on
6 several occasions to take it down.
7   MS. HARRIS: And I object, attorney --
8   THE WITNESS: That's all I know.
9   MS. HARRIS: And I object. That's
10   attorney/client privileged, and I move that that
11   be stricken from the record.
12   MS. LASSACK: Okay. Then we're going to
13   reserve the remainder of our time right now. Do
14   you have any questions, Ms. Harris, or would you
15   like to take a break?
16   MS. HARRIS: No. I'm okay. Thank you.
17   EXAMINATION
18 BY MS. HARRIS:
19   Q. Good afternoon, Ms. Gardner. As you know,
20 my name is Lorinda Harris. I'm an attorney for LabMD,
21 and with me is my colleague Robyn Burrows.
22   When you were talking earlier about items
23 in the garage at [REDACTED] as had been described
24 to you by Jennifer Parr, do you have any personal
25 knowledge as to exactly what those items were in the

1 garage?
2   A. No. I never saw them myself.
3   Q. Okay. Did Jennifer Parr tell you what
4 those items were in the garage at [REDACTED]
5   A. She said that it was a -- basically a
6 mishmash of boxes and everything from Mike's personal
7 items to the lab items were thrown in the garage.
8   Q. Do you have any personal knowledge as to
9 what those lab items were in the garage?
10   A. I never saw them.
11   Q. You also talked about you understood that
12 there were items from the lab that were not packed
13 securely. Do you have any personal knowledge --
14   A. No.
15   Q. -- as to what any of those items were that
16 you had been told were not packed securely?
17   A. No.
18   Q. Since LabMD materials have been moved from
19 the Powers Ferry address to [REDACTED] have you
20 been inside [REDACTED]?
21   A. No.
22   Q. So you have not seen what state or
23 condition any of the LabMD materials are at 425
24 Broadland?
25   A. No.

1   Q. When you were talking about Mr. Daugherty
2 leaving a door unlocked for you in a home in which he
3 was temporarily residing, do you have any personal
4 knowledge of him leaving a door unlocked for anyone
5 else when he wasn't expecting someone to come to the
6 house?
7   A. I don't have any personal knowledge of
8 that.
9   Q. At any time during your tenure at LabMD,
10 did you ever have any patient information on your
11 LabMD hard drive such as patient Social Security
12 numbers, addresses, et cetera?
13   A. No.
14   Q. Did you ever email any patient
15 confidential to Mr. Daugherty at his AOL email
16 address?
17   MS. LASSACK: Objection to form.
18   THE WITNESS: No.
19   Q. (By Ms. Harris) During your tenure at
20 LabMD, are you aware of anyone either at LabMD or on
21 behalf of LabMD engaging in the unauthorized
22 disclosure of any confidential patient information?
23   A. No.
24   Q. There was no peer-to-peer software on your
25 computer; is that correct?

26 (Pages 101 to 104)

For The Record, Inc.
(301) 870-8025 - www.ftrinc.net - (800) 921-5555

1 Q. Do you have any other post-high school
2 education?
3 A. No.
4 Q. How about any other training in
5 information technology besides your BS in computer
6 science?
7 A. No.
8 Q. Do you have any information technology
9 certifications?
10 A. No.
11 Q. Are you currently employed?
12 A. Yes.
13 Q. Where are you currently employed?
14 A. LabMD.
15 Q. How long have you been employed by LabMD?
16 A. Since January 25th of 2012.
17 Q. How did you come to work for LabMD?
18 A. I had done some consulting work for LabMD,
19 and they made me an offer.
20 Q. What was that offer for?
21 A. IT manager position.
22 Q. What were your duties as IT manager at
23 LabMD?
24 A. Can you be more specific?
25 Q. Let's start with did any employees report

1 what do you mean by that?
2 A. Installing like Microsoft Office or
3 installing the proprietary software for the LIS, for
4 the billing system.
5 Q. When you described Mr. Bradley's role, I
6 believe you used the word was. Has his role changed
7 recently?
8 A. Currently we are all working on setting up
9 the new environment.
10 Q. When you say we, what do you mean?
11 A. Myself, Jennifer Parr, and Brandon
12 Bradley.
13 Q. When you say the new environment, what do
14 you mean?
15 A. LabMD has transitioned from the building
16 that we were in to two locations.
17 Q. What are those two locations?
18 A. ████████ and the other one is -- I
19 cannot remember the exact address.
20 Q. What do you remember about the second
21 address?
22 A. It is in a condo park.
23 Q. Where is that condo park?
24 A. In Atlanta.
25 Q. Is there a particular neighborhood in

1 to you as IT manager.
2 A. I had two direct reports to me.
3 MR. SHERMAN: Wait until she finishes
4 asking the question before you jump in and answer
5 the question. Just take your time.
6 THE WITNESS: I am sorry.
7 Q. (By Ms. Lasseek) Who were those direct
8 reports?
9 A. Brandon Bradley and Jennifer Parr.
10 Q. What was Mr. Bradley's role at LabMD?
11 A. Desktop support.
12 Q. When did Mr. Bradley work for LabMD?
13 A. He began in 2009. I do not know the exact
14 date.
15 Q. Does Mr. Bradley still work for LabMD?
16 A. Yes.
17 Q. Is Mr. Bradley still desktop support at
18 LabMD?
19 A. Yes.
20 Q. What are Mr. Bradley's duties as desktop
21 support at LabMD?
22 A. He was responsible for maintaining
23 printers, setting up desktops, and addressing certain
24 software situations, installing needed software.
25 Q. When you say certain software situations,

1 Atlanta?
2 A. It was down the street from the 2030
3 Powers Ferry.
4 Q. That's the prior office location?
5 A. Prior office location, yes.
6 Q. Who owns the condo location?
7 A. I do not know.
8 Q. Does LabMD have a lease for the condo
9 location?
10 A. I do not know.
11 Q. How about the ████████ address, what
12 kind of building is that?
13 A. That's a residential address.
14 Q. Whose address is that?
15 A. Mike Daugherty.
16 Q. I just want to understand, I guess, what
17 is being moved to each of those locations, starting
18 with the ████████ address.
19 A. At that location is currently the
20 information systems, the servers. And there is a
21 workstation that has been moved into the condo for
22 billing.
23 Q. The ████████ address, you said
24 servers are there. Is there anything else that is
25 there?

CX0725
RX507

RX507

1   A.   There are a handful of workstations, a
2 number of printers. Is there -- can you give me an
3 idea of what else you might be looking for?
4   Q.   Is there anything else that comes to your
5 mind?
6   A.   No.
7   Q.   Are there any paper records located at the
8 ████████████ address?
9   A.   Yes.
10   Q.   What types of paper records?
11   A.   Legal and other business-related files,
12 employee files, receipts.
13   Q.   When you say legal, what do you mean by
14 that?
15   A.   Documents from previous legal proceedings.
16   Q.   Do you know what other type of business
17 documents are located at the ████████ address?
18   A.   No.
19   Q.   Do you know what type of information is
20 contained in the documents located at the
21 ████████ address?
22   A.   What type of -- with you be more specific
23 or rephrase your question, please.
24   Q.   Do you know what types of information
25 about consumers are in the documents at the ████

1 ████████ address?
2   A.   No.
3   Q.   Are there any types of slides or patient
4 specimens located at the ████████ address?
5   A.   Yes.
6   Q.   What types?
7   A.   There is blocks and slides.
8   Q.   I'm sorry, what is the first thing you
9 said?
10   A.   Block.
11   Q.   What is a block?
12   A.   A block is a tissue sample embedded in
13 paraffin wax.
14   Q.   What are blocks used for?
15   A.   They are sliced and that is what a slide
16 is created from. ████████
17   Q.   Approximately how many blocks are located
18 at the ████████?
19   A.   I couldn't guess.
20   Q.   Could you guess even a ballpark, like more
21 than a hundred?
22   A.   They are in boxes, and I do not know how
23 many is in each box. No, I cannot render a good
24 guess.
25   Q.   Do you know how many boxes there are?

1   A.   There are two sets of racks with boxes.
2 No. I can't. I don't know how many boxes there are.
3   Q.   Do you have any sense of saying it is more
4 or less than 50 boxes?
5   A.   More.
6   Q.   Do you know if it is more than a hundred
7 boxes?
8   A.   Possibly. I do not know for sure.
9   Q.   And how about the slides, how many slides
10 are located at the ████████ address?
11   A.   Again, those are in cases and I cannot
12 venture a guess as to how many slides there are.
13   Q.   How many cases are there of slides?
14   A.   Potentially 50.
15   Q.   About how large is a case of slides?
16   A.   Roughly a 14-by-14 square.
17   Q.   Those are inches?
18   A.   Yes.
19   Q.   Are there any other types of LabMD data or
20 equipment located at the ████████ address we
21 didn't talk about?
22   A.   There are switches, routers, a scanner.
23 Monitor, keyboard, mouse. Other than that, I cannot
24 think of anything else.
25   Q.   Let's start with the servers, where are

1 the servers located in the ████████ address?
2   A.   They are in the basement.
3   Q.   How are they secured?
4   A.   The residence is locked and there is a
5 perimeter of cameras.
6   Q.   Are there any firewalls at the ████
7 ████████ address?
8   A.   Yes. Router is synonymous with the
9 firewall in my terms.
10   Q.   Who is the manufacturer of the router
11 firewall?
12   A.   Juniper.
13   Q.   When did LabMD obtain the router firewall?
14   A.   2011, I believe.
15   Q.   How are the servers set up at the ████
16 ████?
17   A.   Can you be more specific?
18   Q.   Is there an operational LabMD network at
19 the ████████?
20   A.   Yes.
21   Q.   How is that network set up?
22   A.   There is one workstation connected to the
23 servers.
24   Q.   Is there anything else connected to the
25 servers?

CX0725
RX507

RX507

```
 1    A.   KVM switch.
 2    Q.   Do any outside locations have access to
 3  the network?
 4    A.   Yes.
 5    Q.   What outside locations?
 6    A.   The condo.
 7    Q.   How does the condo access the network?
 8    A.   Through LogMeIn.
 9    Q.   How does LogMeIn work?
10    A.   Can you be more specific?
11    Q.   Could you walk me through the process if
12  someone is sitting at the computer at the condo, how
13  they use LogMeIn to access the network.
14    A.   LogMeIn is a third-party service that they
15  log into and it provides a remote connection to a
16  remote computer.
17    Q.   What type of credentials does someone use
18  to log into LogMeIn?
19    A.   A user name and password.
20    Q.   Is that user name and password unique to
21  LogMeIn or would it be the same user name and password
22  for the LabMD network?
23    A.   Unique to LogMeIn.
24    Q.   So after those passwords and login
25  credentials, password and user name credentials are
```

```
 1  used to log into LogMeIn, what happens next?
 2    A.   A connection is created to the remote
 3  computer.  They are forced to log in again with a
 4  different user name and password.
 5    Q.   Would this user name and password be the
 6  same as one would use if they were physically
 7  connected?
 8    A.   Correct.
 9    Q.   Besides the condo, can any other outside
10  locations connect into the LabMD network at the
11        address?
12    A.   Using LogMeIn, yes.
13    Q.   Who could use LogMeIn to access the
14  network at                ?
15    A.   Only people with user name and password.
16    Q.   What user name and password is that?
17    A.   The user name and password specific to the
18  LogMeIn account.
19    Q.   That's a LabMD-specific LogMeIn account?
20    A.   Yes.
21    Q.   Would someone logging in also have to have
22  the LabMD user name and password?
23         MR. SHERMAN:  Wait until she is finished
24  asking the question before you answer.
25         THE WITNESS:  Yes, sir.
```

```
 1    Q.   (By Ms. Lassack)  Can any of LabMD's
 2  clients or former clients access the network located
 3  at
 4    A.   No.
 5    Q.   What information is stored on the network
 6  at              ?
 7    A.   There are two different systems.  There is
 8  the laboratory information system and the billing
 9  system.
10    Q.   Is the laboratory information system set
11  up the same way that it was when LabMD was at the
12  Powers Ferry location?
13    A.   Yes.  And that system is not accessible
14  through LogMeIn.
15    Q.   What is accessible through LogMeIn?
16    A.   Only the billing system.
17    Q.   Is the billing system set up the same way
18  as it was at the Powers Ferry location?
19    A.   Yes.
20    Q.   What is the laboratory information system
21  used for currently?
22    A.   Currently it is used when someone requests
23  historical result report.
24    Q.   Who would request a historical log report?
25    A.   A former client.
```

```
 1    Q.   Will you please walk me through the
 2  process of when a former client would request a
 3  historical log report, what happens?
 4    A.   They send a fax to us.  That report is
 5  then printed out of the LIS system and faxed back.
 6    Q.   Where is the fax sent to?
 7    A.   They are remote -- the location?
 8    Q.   Sorry.  The fax coming in with the
 9  request, where does LabMD receive that fax?
10    A.   The condo.
11    Q.   What LabMD employee or employees handle
12  those fax requests?
13    A.   Currently, Kindell Alvarez.
14    Q.   Do you know how to spell that name?
15    A.   K-i-n-d-e-l-l A-l-v-a-r-e-z.
16    Q.   What is Kindell Alvarez's role at LabMD?
17    A.   Currently she is in charge of billing.
18    Q.   How long has Ms. Alvarez worked for LabMD?
19    A.   I do not know.
20    Q.   How many other employees does LabMD have
21  currently?
22    A.   I do not know.  I am aware of four.
23    Q.   Who are those four?
24    A.   Jennifer Parr, Brandon Bradley, Kindell
25  Alvarez, and myself.
```

RX507

1 Q. When Ms. Alvarez receives a fax for a
2 request for a historical log report, what happens
3 next?
4 MR. SHERMAN: Objection to the extent it
5 calls for speculation. You may answer the
6 question if you know.
7 THE WITNESS: She brings the report to ▉
8 ▉▉▉▉ where it is printed out of the local
9 system, then she hand carries the result back and
10 faxes it to the location.
11 Q. (By Ms. Lassack) So she physically drives
12 from the condo to the Broadland location?
13 A. Yes.
14 Q. Who prints the report?
15 A. Either herself or myself.
16 Q. Who currently has access to the laboratory
17 information system?
18 A. Myself, Jennifer Parr, Kindell Alvarez,
19 Brandon Bradley.
20 Q. Does Mr. Daugherty have access?
21 A. Yes.
22 Q. Is there anyone else who has access that
23 we didn't mention?
24 A. No.
25 Q. How far is the condo from the ▉

1 ▉▉▉ address?
2 A. Five miles.
3 Q. About how often does Ms. Alvarez deliver
4 historical log reports?
5 A. Infrequently. I would say we have done
6 maybe seven.
7 Q. Seven since when?
8 A. January 15th.
9 Q. Where are the paper records located at the
10 ▉▉▉▉ address?
11 A. In various locations.
12 Q. Such as?
13 A. There is a couple of different rooms that
14 have those records in them.
15 Q. Are those rooms within the house?
16 A. Yes.
17 Q. Are the paper records secured in any way,
18 like in a locked file cabinet?
19 A. No.
20 Q. I think you may have already answered
21 this, but do you know what types of consumer
22 information are in the paper records?
23 A. No.
24 Q. That is no, you do not know, correct?
25 A. No, I do not know.

1 Q. Where are the blocks and slides stored?
2 A. Also in the basement.
3 Q. Are they secured in any way?
4 A. The same ways. The house is locked with
5 the camera perimeter.
6 Q. No additional security within the house,
7 though.
8 A. No.
9 Q. Is any LabMD information stored in the
10 garage of the ▉▉▉▉ house?
11 A. Not that I am aware of.
12 Q. What are your current duties at LabMD?
13 A. Finalizing the setup of the network at
14 Broadland and the connection issues between there and
15 the condo.
16 Q. What does that entail?
17 A. Making sure that the system is stable,
18 backed up and that the connection is secured and
19 stable.
20 Q. When you say stable, what do you mean?
21 A. That there are not issues with
22 connectivity when they were attempting to do billing.
23 Q. When you say secured, what do you mean?
24 A. That it is behind a firewall and the
25 firewall is set up with the appropriate rule set.

1 Q. What would that set entail?
2 A. Blocking anything that isn't absolutely
3 required for communication.
4 Q. What types of things would be blocked?
5 A. FTP traffic. File sharing. A myriad of
6 things would be blocked.
7 Q. What are the essential things that are not
8 blocked?
9 A. Only http or web traffic and DNS.
10 May I amend that?
11 Q. Sure.
12 A. Http, https, DNS.
13 Q. Why are each of those items needed?
14 Explain to me how those work.
15 A. Those items are essential for allowing the
16 LogMeIn access.
17 Q. When do you expect to be completed with
18 your current tasks?
19 A. Friday.
20 Q. That's this coming Friday?
21 A. This coming Friday, yes.
22 Q. Will you remain employed at LabMD after
23 these tasks are completed?
24 A. No.
25 Q. Why not?

Complaint Counsel = Yellow   Both = Green
LabMD = Blue

CX0725
RX507

1   A.   Yes.
2   Q.   What were those instances?
3   A.   There was a communication process as well
4 as a data massage process.
5   Q.   What server was that on?
6   A.   MAPPER.
7   Q.   Communications process is the
8 communication with the doctor's office?
9   A.   Yes.
10   Q.   Any other communications processes on that
11 server?
12   A.   No.
13   Q.   Is that the data massage process we
14 discussed earlier?
15   A.   Yes. I need to amend that on the MAPPER,
16 yes, there was additional between -- there was the
17 doctors and there was also the EMR third-party group
18 as we discussed earlier.
19   Q.   The EMR third-party group, that's outgoing
20 communication; is that correct?
21   A.   That is correct.
22   Q.   Can you describe for me the information
23 flow for those outgoing communications.
24   A.   There were two different tacts of that.
25 If the practice requested the embedded report, it

1 side is on MAPPER, where does it go?
2   A.   I mean, it is picked up at that point by
3 the third-party vendors and goes -- after that I do
4 not know.
5   Q.   How is it transmitted to the third-party
6 vendors?
7   A.   They come in and get it via secure FTP.
8   Q.   Is that true both ways, when there is an
9 embedded report and when there is not?
10   A.   Yes.
11   Q.   After that process, does any information
12 remain residing on MAPPER?
13   A.   No.
14   Q.   Besides that, are there any other
15 different examples where different logical processes
16 were run on the same server?
17   A.   Not that I can recall.
18   Q.   Is anything else run on the e-mail server?
19   A.   Yes. E-mail server also hosts websites.
20   Q.   Would you consider those two different
21 logical functions or are they similar logical
22 functions?
23   A.   Two separate logical functions.
24   Q.   Does the e-mail server currently also host
25 web?

1 would go through the MAPPER process, the HL7 process
2 then be made available for them to come and pick up
3 the reports to deliver to the locations.
4   If it didn't require the embedded report,
5 then it would go through the MAPPER process and be
6 made available for them to pick up.
7   Q.   When you say the MAPPER process, what do
8 you mean?
9   A.   The process of looking at the data and
10 potentially reformatting it or putting it into a
11 format that they could then read.
12   Q.   So this is a formatting process on the way
13 out.
14   A.   Yes.
15   Q.   Different from what we talked about
16 earlier?
17   A.   Yes. It goes through the same server.
18 But yes, there is logical consideration thought
19 process. There is an inflow to that server and an
20 outflow from that server, moving information in both
21 directions.
22   Q.   On the outbound side, where does the
23 information come from?
24   A.   The LIS system.
25   Q.   After that information on the outbound

1   A.   Currently there is no e-mail server.
2   Q.   What happened to the e-mail server?
3   A.   It was taken off line.
4   Q.   Where is it physically?
5   A.   At █████
6   Q.   Is that with the other servers you
7 described earlier?
8   A.   It is with them, yes.
9   Q.   Back to that paragraph we were on on Page
10 FTC-LABMD-004395 which is Page 2 of CX 313. The last
11 sentence says, During the server setup for the HL7
12 server, the software version was upgraded to MS 2008
13 to provide continued security support as Microsoft
14 discontinued support on the previous MS 2000 software
15 version.
16   Do you know when Microsoft discontinued
17 support on the MS 2000 version?
18   A.   I do not.
19   Q.   Do you know why the software wasn't
20 updated before the time reflected in CX 313?
21   MR. SHERMAN: Objection to the form of the
22 question. You can answer the question. I think
23 you already have.
24   Q.   (By Ms. Lassack) Did you recommend
25 updating the software on the HL7 server?

CX0725
RX507

RX507

1 specifically for the billing process.
2   Q. What does each workstation do?
3   A. They run the client that is necessary to
4 connect back to the billing server.
5   Q. Who can access billing information through
6 LogMeIn today?
7   A. Kindeli Alvarez. Wanda Robertson.
8 Myself. And Jennifer Parr.
9   Q. Can anyone else?
10   A. Not that I am aware of.
11   Q. Who is Wanda Robertson?
12   A. A contractor.
13   Q. What work does Wanda Robertson do for
14 LabMD?
15   A. She has been brought in recently to take
16 over billing.
17   Q. From where does she work?
18   A. The condo.
19   Q. Are any network scans scheduled for the
20 network at [redacted] which you described here on
21 CX 700?
22   A. Not at this time.
23   Q. Is any information stored on the network
24 at CX 700 encrypted?
25   A. Can you be more specific?

1   Q. Are there any measures that LabMD is using
2 to secure the network at CX 700?
3   A. Other than the electronic and the
4 physical, no.
5   Q. When you say the electronic, what do you
6 mean?
7   A. The firewall.
8   Q. Is any patient information stored on the
9 network depicted at CX 700?
10   A. Yes.
11   Q. Is that information stored in encrypted
12 format?
13   A. No.
14   Q. Is there any other information on the
15 network at CX 700 that is stored in encrypted format?
16   A. No.
17   Q. Do you know who is responsible for network
18 security going forward at LabMD after your departure
19 on Friday?
20   A. I do not.
21   Q. One last question for right now. From
22 LabNet, are you able to determine how many patients on
23 which LabMD has performed one or more tests?
24   A. From within the software, no.
25   Q. Is there another way you can determine?

1   A. Using a SQL query, yes.
2   Q. Have you ever done that?
3   A. For specific timeframes, yes.
4   Q. Do you recall which specific timeframes?
5   A. I do not.
6   Q. Do you know today how many patients there
7 are on which LabMD has performed one or more tests?
8   A. I do not.
9   MS. LASSACK: It is 1:50. I am going to
10 go off the record and use whatever remaining time
11 I have after William uses his time. Whatever
12 time William does not use will then revert to me.
13   MR. SHERMAN: Well, give us ten, 15
14 minutes. We will be ready to go.
15   (Recess from 1:50 p.m. to 2:13 p.m.)
16   EXAMINATION
17 BY MR. SHERMAN:
18   Q. I am ready. Let's go on the record.
19   Mr. Martin, you were asked quite a few
20 questions this morning and into this afternoon. I
21 want to go back over some of what you were asked and
22 also ask you some other questions.
23   Where I want to begin is with Managed Data
24 Solutions. Managed Data Solutions.
25   When was that founded?

1   A. Early in 2011.
2   Q. And I understand it was a company that you
3 owned partially with your parents; is that correct?
4   A. Yes.
5   Q. And with three other individuals, is that
6 correct?
7   A. That is correct.
8   Q. Do all of the owners of MDS participate in
9 providing services to your clients?
10   A. No.
11   Q. Were there silent partners in MDS?
12   A. Yes.
13   Q. And who were they?
14   A. Kathy Martin and Nancy Morton.
15   Q. So who were the individuals who actually
16 went out and provided services to your clients?
17   A. Myself, Bill Lindsey, and on very rare
18 occasions Neil Martin.
19   Q. What did your parents do? Did they work
20 in the office?
21   A. My mother was a silent partner and did not
22 work at all.
23   Q. Okay.
24   A. My father was in charge of the
25 administrative side, the billing, the accounts

Complaint Counsel = Yellow   Both = Green
LabMD = Blue

CX0725
RX507

RX507

1 was changed then I still should have found it. But
2 yes, using the other search terms if the name had been
3 changed, the other programs and things would not have
4 found it.
5 Q. What if the hash value had been changed?
6 A. Then I would not have found it.
7 Q. How did you get the hash value to search
8 for it?
9 A. The file that they -- that Tiversa
10 presented to LabMD was made available to me.
11 Q. How was it made available to you?
12 A. It was brought to me on a memory stick.
13 Q. By whom?
14 A. John Boyle.
15 Q. Do you know how Mr. Boyle obtained the
16 file?
17 A. I do not.
18 Q. Earlier we spoke, we talked about the
19 e-mail server.
20 A. Yes.
21 Q. Did LabMD during your tenure have any
22 policy of purging e-mails from the e-mail server after
23 a certain period of time?
24 A. No.
25 Q. Do you know how much data was on the

1 e-mail server at the time of the move from the Powers
2 Ferry location?
3 MR. SHERMAN: Objection to the form.
4 You may answer.
5 THE WITNESS: I do not know off the top of
6 my head.
7 Q. (By Ms. Lassack) Do you know if LabMD had
8 any policy of purging e-mails from the e-mail server
9 before you became IT manager?
10 A. I do not know.
11 Q. During your time as IT manager, was the
12 e-mail server backed up?
13 A. Yes.
14 Q. How often?
15 A. Daily.
16 Q. What type of media was the server backed
17 up to?
18 A. External hard drives.
19 Q. For how long were the backup hard drives
20 maintained?
21 A. Off the top of my head, I do not know.
22 Q. Where were those hard drives stored?
23 A. On site at LabMD.
24 Q. Do e-mail backup hard drives exist now?
25 A. Yes.

1 Q. Where are they located?
2 A. Broadland.
3 Q. That's the address you spoke of earlier?
4 A. Yes.
5 Q. Do you know how many hard drives of e-mail
6 backup are there?
7 A. I do not.
8 Q. Do you know what time period those hard
9 drives would cover?
10 A. I do not.
11 Q. Do you have any sense at all of what time
12 period typically would be on one of the e-mail backup
13 hard drives?
14 A. Again, it was a scenario where we would
15 write multiple generations on a hard drive until it
16 ran out of space. I do not.
17 Q. How many backup e-mail hard drives were
18 there?
19 A. I do not know.
20 Q. I want to turn back to CX 700 which was
21 your diagram of the ▮▮▮▮▮▮ network.
22 A. Yes.
23 Q. So there is looks like two workstation
24 boxes in that diagram; is that correct?
25 A. Those represent workstations. There is

1 only one workstation on the LIS virtual network.
2 There are multiple workstations, it is not clear but
3 there is an S on workstations.
4 Q. So starting with the LIS, the bottom of
5 the drawing, there's only one workstation that
6 connected to the LIS.
7 A. Correct.
8 Q. Where is that workstation physically
9 located?
10 A. ▮▮▮▮▮▮▮
11 Q. Now, with respect to the workstations --
12 plural -- that connect to the billing part of the
13 network, how many of those workstations are there?
14 A. There are currently three.
15 Q. Where are those workstations located?
16 A. ▮▮▮▮▮▮▮
17 Q. All three are in ▮▮▮▮▮▮
18 A. Yes.
19 Q. Earlier when you described that an
20 employee from the condo would connect through LogMeIn,
21 does that employee connect to one of those
22 workstations that are described in the top box on CX
23 700?
24 A. No. They connect to virtual workstations.
25 Q. Are those virtual workstations depicted on

Complaint Counsel = Yellow   Both = Green
LabMD = Blue

CX0725
RX507

RX507

1 CX 700?
2 A. No.
3 Q. How do those virtual workstations work in
4 connection with this network drawing on CX 700?
5 A. They are in the same environment as the
6 billing virtual machine. They are on the VMware
7 cluster.
8 Q. Am I correct in understanding that the
9 LogMeIn connects to the virtual workstations which
10 then connect to the billing server?
11 A. Yes.
12 Q. When employees connect in that way from
13 the condo, is there any sort of two-factor
14 authentication used?
15 A. Aside from the multiple users names?
16 Q. Yes. Anything like RSA token?
17 A. No.
18 Q. What do the physical workstations depicted
19 on CX 700 that are connected to the billing part of
20 the diagram, what are they used for?
21 A. Currently they are my workstation,
22 Jennifer Parr's workstation, and Brandon Bradley's and
23 they are used for creating documentation and setting
24 up the network, testing the network.
25 Q. Are LabMD employees able to access the LIS

1 Q. What happens to the reports after they are
2 faxed?
3 A. I do not know.
4 Q. Draw your attention back to CX 313. CX
5 313 as we discussed described some network-related
6 work that you did for LabMD; is that correct?
7 A. It lists certain things that I assisted
8 with. This is not -- I did not do the scope of
9 everything listed, no.
10 Q. Am I correct in understanding, though,
11 that you replaced the firewall to the Juniper
12 firewall?
13 A. Yes.
14 Q. Do you recall how much that project cost?
15 A. I do not.
16 Q. What is the expected life of the Juniper
17 firewall?
18 A. I use five years for all electronic
19 equipment.
20 Q. Does five years reflect your experience
21 that you have seen of the actual life of the
22 equipment?
23 A. At the end of five years, it makes sense
24 to replace it with a newer model.
25 Q. Why is that?

1 server from the workstations that are on the top part
2 of the diagram that you just discussed?
3 A. No, not from those three workstations, we
4 are not.
5 Q. Am I correct that the only access to the
6 LIS server is through the bottom workstation shown on
7 CX 700?
8 A. Yes.
9 Q. I think earlier you testified that the
10 employee who answers the phone and faxes from the
11 condo physically comes to ████████ obtain reports
12 from the lab system.
13 A. Yes.
14 Q. Does that employee connect to the lab
15 server through the workstation described on the bottom
16 of CX 700?
17 A. Yes. Or I have made those results
18 available, those reports available through that
19 workstation.
20 Q. After that employee who works in the condo
21 physically picks up those reports from ████████, are
22 those reports then taken back to the condo?
23 A. Yes.
24 Q. Then they are faxed to the requester?
25 A. Yes.

1 A. Functionality, speed, reliability.
2 Q. I believe earlier today you testified that
3 part of your role as IT manager was updating operating
4 systems; is that correct?
5 A. Ensuring that they were updated, yes.
6 Q. What did that process involve?
7 A. Checking to make sure that all of the
8 servers had all of the applicable Windows updates.
9 Q. How often did you do that checking?
10 A. That checking was done monthly by myself
11 or Jennifer Parr.
12 Q. Were those server operating systems
13 centrally managed?
14 A. No.
15 Q. Did you keep any documentation of the
16 updating process?
17 A. Of the updating process, no. However, on
18 the scanned documentation, that is one of the items
19 requested, that is checked.
20 Q. I am sorry, when you say the scanned
21 documentation, are you referring to the quarterly
22 scans that Trustwave performs?
23 A. No. The monthly scans.
24 Q. I am sorry. What are the monthly scans?
25 A. Previously I had testified about monthly

1 personnel types of issues?
2   MS. HARRIS: Objection, overbroad.
3   THE WITNESS: What do you mean by
4 personnel issues?
5   Q. (By Ms. Lassack) Were you ever reviewed
6 at LabMD?
7   MS. HARRIS: Objection, vague.
8   THE WITNESS: Formally, no.
9   Q. (By Ms. Lassack) Were you reviewed
10 informally at LabMD?
11   A. Yes.
12   Q. By whom?
13   A. John Boyle, Bob Hyer, Jeff Martin.
14   Q. Did you ever report to Jeff Martin during
15 your tenure at LabMD?
16   A. Yes.
17   Q. When was that?
18   A. 2012 to 2014, January 2012.
19   Q. Did any employees report to you during
20 your tenure at LabMD?
21   A. No.
22   Q. When you began working at LabMD, who else
23 worked in the IT department?
24   A. Bob Hyer, Brandon Bradley, Nicole Elliott.
25   Q. Is there anyone else?

1   A. I don't think so.
2   Q. Were there any changes to the LabMD IT
3 staff during your tenure?
4   A. Yes.
5   Q. What were those changes?
6   A. Nicole Elliott left.
7   Q. When did Ms. Elliott leave?
8   A. I'm not sure.
9   Q. Do you recall if it was in 2010?
10   A. Would have been 2010 or 2011, I believe.
11   Q. Were there any other changes?
12   A. Bob Hyer was replaced by Jeff Martin.
13   Q. Did LabMD use any outside IT contractors
14 during your tenure?
15   A. Jeff Martin.
16   Q. Anyone else?
17   A. ProviDyn.
18   Q. How do you spell that?
19   A. P-r-o-v-i-D-y-n.
20   Q. Thank you. Were there any other outside
21 IT contractors that LabMD used during your tenure?
22   A. Not that I recall.
23   Q. What did Nicole Elliott do at LabMD?
24   A. She created reports.
25   Q. What types of reports?

1   A. Created templates so that test results
2 would show up as a document.
3   Q. Show up where?
4   A. In the laboratory information system.
5   Q. Did Ms. Elliott have any other duties?
6   A. I don't know.
7   Q. Do you know if anyone else would know
8 besides Ms. Elliott?
9   MS. HARRIS: Objection, calls for
10 speculation.
11   THE WITNESS: The IT manager.
12   Q. (By Ms. Lassack) Is that Mr. Martin?
13   A. She did not work for Jeff. She worked for
14 Bob Hyer.
15   Q. What was your salary when you began
16 working at LabMD?
17   MS. HARRIS: Objection, relevance.
18   THE WITNESS: 65,000.
19   Q. (By Ms. Lassack) And what was your salary
20 as of this past Friday when you stopped working
21 full-time at LabMD?
22   A. 69,000.
23   Q. When you began working at LabMD, where did
24 you physically work?
25   A. At the 2030 Powers Ferry Road, Atlanta

1 30339.
2   Q. Did you ever work at any other location?
3   A. ████████
4   Q. Anywhere else?
5   A. No.
6   Q. Did you ever access LabMD's network
7 remotely?
8   A. Can you be more specific?
9   Q. For instance, did you ever work from home
10 and connect to LabMD's network?
11   A. Yes.
12   Q. How did you do that?
13   A. Through LogMeIn.
14   Q. What is LogMeIn?
15   A. It's a remote access application.
16   Q. Can you walk me through the process of
17 logging into LabMD's network remotely through LogMeIn?
18   A. Go to a secure website called LogMeIn, you
19 sign in with a password and ID and click on whatever
20 server or computer you have set up.
21   Q. And then what happens next?
22   A. Then you log into our domain.
23   Q. Am I correct in understanding you have to
24 enter in two different log-in credentials?
25   A. At least two.

CX0727
RX511

RX511

```
 1     Q.   You say at least. Why would there be
 2  more?
 3     A.   Depending what you're accessing.
 4     Q.   Can you give me an example where it would
 5  be more than two log-in credentials?
 6     A.   If you needed to get to the laboratory
 7  information system, that would be a third set; or any
 8  other application that required a log-in would require
 9  different credentials.
10     Q.   What other applications required separate
11  log-in credentials?
12     A.   Email system, the antivirus console, for
13  me that would primarily be things I would log into.
14     Q.   Would Lytec also involve a separate log-in
15  credential?
16     A.   Yes, it would.
17     Q.   What was LabMD's email system?
18          MS. HARRIS: Objection, vague.
19          THE WITNESS: I don't understand the
20  question.
21     Q.   (By Ms. Lassack) I believe earlier you
22  said the email system was one of the things that
23  required a separate log-in; is that correct?
24     A.   Correct.
25     Q.   What was that email system you were
```

```
 1  referring to?
 2     A.   The software that runs it is your
 3  question?
 4     Q.   I'm wondering what you were referring to
 5  when you said email system.
 6     A.   I don't understand the question.
 7     Q.   I just want to make sure. I believe you
 8  said earlier that the email system involved a separate
 9  log-in.
10     A.   Yes.
11     Q.   What were you referring to when you said
12  that?
13     A.   Our email program. IceWarp is the
14  application.
15     Q.   So am I correct in understanding that what
16  you were referring to with the separate log-in would
17  be to access the IceWarp program to view your own
18  emails?
19     A.   It could be. It could also be
20  administration of email.
21     Q.   Would the administration of email be done
22  through the same IceWarp program?
23     A.   Yes and no.
24     Q.   What do you mean by that?
25     A.   Yes, it's IceWarp, but you would log in
```

```
 1  differently.
 2     Q.   How would you log in differently?
 3     A.   To get access to your email, you would log
 4  in with your email ID and password. To get access to
 5  the administration application, you would log into the
 6  email server and then log into the administration
 7  portion of the email program.
 8     Q.   Did everyone at LabMD who had an email
 9  account have to enter in separate log-in credentials
10  to access their email through the IceWarp program?
11     A.   Yes.
12     Q.   Did part of your role as systems
13  administrator include administration of the email
14  system?
15     A.   Yes.
16     Q.   What did you do with respect to that?
17     A.   Create IDs, shut down IDs, update the
18  application.
19     Q.   Anything else?
20     A.   Primarily that was it.
21     Q.   Did the email system have any sort of
22  automatic purge procedure?
23          MS. HARRIS: Objection, vague.
24          THE WITNESS: Could you be more specific?
25     Q.   (By Ms. Lassack) For instance, were
```

```
 1  emails automatically deleted every, let's say, 30
 2  days, 40 days, something like that?
 3     A.   Not by the administration program.
 4     Q.   Were emails automatically deleted in some
 5  other sort of way?
 6     A.   If the user set their email to delete
 7  automatically.
 8     Q.   Am I correct in understanding that it
 9  wasn't done systemwide at LabMD?
10          MS. HARRIS: Objection to the extent it
11  misstates the testimony, lacks foundation.
12          THE WITNESS: Can you restate the
13  question?
14     Q.   (By Ms. Lassack) Did LabMD have any
15  systemwide auto delete procedure?
16     A.   No.
17     Q.   Do you know of any users who set up their
18  accounts to automatically delete emails?
19     A.   No.
20     Q.   I believe you said you worked at the
21  location of            during your tenure at LabMD?
22     A.   Yes.
23     Q.   What is that location?
24     A.   Michael Daugherty's house.
25     Q.   When did you start working at
```

CX0727
RX511

RX511

1 ▓▓▓ ?
2   A.   Mid-January.
3   Q.   Why did you start working at ▓▓▓
4 ▓▓▓ ?
5   A.   With the company closing down, that's
6 where the network was moved.
7   Q.   Were you involved in moving the network to
8 ▓▓▓
9   MS. HARRIS: Objection, vague as to
10 involved.
11   THE WITNESS: Can you be more specific?
12   Q.   (By Ms. Lassack) Did you have any role in
13 connection with moving the network to ▓▓▓ ?
14   A.   Moving, no.
15   Q.   Do you know how the network was moved to
16 425 Broadland?
17   A   I was not involved in that.
18   Q.   Do you know who was?
19   A.   Jeff Martin.
20   Q.   Was anyone else?
21   A.   I'm unsure.
22   Q.   Did you do any work with respect to
23 setting up the network at ▓▓▓ ?
24   A.   Yes.
25   Q.   What work did you do?

1   Q.   What information was on the backup email
2 server?
3   A.   Archived email.
4   Q.   Do you know what time period was covered
5 by the archived email?
6   MS. HARRIS: Objection, vague.
7   THE WITNESS: Not when it started, no.
8   Q.   (By Ms. Lassack) Did it start before your
9 tenure at LabMD?
10   A.   Yes.
11   Q.   Do you know who handled email backup
12 before you joined LabMD?
13   A.   No.
14   Q.   Did you handle email backup during your
15 tenure at LabMD?
16   MS. HARRIS: Objection, vague as to
17 handle.
18   THE WITNESS: Can you be more specific?
19   Q.   (By Ms. Lassack) Did you back up the
20 email server at LabMD during your tenure?
21   A.   Yes.
22   Q.   How often did you back it up?
23   A.   Daily.
24   Q.   Does the backup email server contain
25 emails back through your entire tenure at LabMD?

1   A.   I ensured that the servers were working.
2   Q.   Anything else?
3   A.   I tested access.
4   Q.   Anything else?
5   A.   No.
6   Q.   So what servers are working in the network
7 at ▓▓▓ ?
8   A.   As of --
9   MS. HARRIS: Objection, assumes facts and
10 vague as to working, but you can answer.
11   THE WITNESS: As of Friday, Lytec, LabNet.
12   Q.   (By Ms. Lassack) When you said you
13 ensured that the servers were working, what did you
14 mean by that?
15   A.   They were functioning.
16   Q.   So am I correct in understanding that you
17 ensured that the Lytec and LabNet servers were
18 functioning at ▓▓▓ ?
19   A.   Yes.
20   Q.   Did you ensure that any other servers were
21 functioning at ▓▓▓ ?
22   A.   Yes.
23   Q.   Which ones?
24   A.   Backup email server, the file server. I
25 believe that's it.

1   A.   Yes.
2   Q.   Do you know how much data is on the email
3 backup server?
4   A.   I'm sorry?
5   Q.   Do you know how much data is on the email
6 backup server?
7   A.   No.
8   Q.   Do you have any ballpark estimate?
9   MS. HARRIS: Objection, calls for
10 speculation, asked and answered.
11   THE WITNESS: I would back it up to a two
12 terabyte drive, and there was space left.
13   Q.   (By Ms. Lassack) Do you know what
14 percentage of space was left?
15   A.   No.
16   Q.   I'm sorry. That's no you don't know how
17 much space was left?
18   A.   No.
19   Q.   Are there any other LabMD servers stored
20 at 425 Broadland that are not operational?
21   A.   Yes.
22   Q.   Which servers?
23   A.   The previous servers.
24   Q.   I'm sorry, which servers?
25   A.   All the servers that were in use

12 (Pages 45 to 48)

CX0727
RX511

RX511

Page 49

1 previously.
2 Q. What are those servers?
3 A The old mail server, the servers that
4 would handle the demographics transfers, machines that
5 will handle the -- sorry. I'm trying to go through
6 all this in my head. The results transfers from the
7 other labs. That's all I can think of.
8 Q. Of those servers that are operational at
9 ███████ right now, do you know how they're
10 networked?
11   MS. HARRIS: Objection, assumes facts not
12 in evidence.
13   THE WITNESS: Not specifically. That was
14 not handled by me.
15 Q. (By Ms. Lassack) That was handled by Jeff
16 Martin; is that correct?
17 A Yes.
18 Q. What do you know generally about how those
19 servers are networked?
20 A LabNet is not accessible unless you're
21 sitting at a PC connected to the server.
22 Q. Is that a PC physically located at ████
23 ████?
24 A. Yes.
25 Q. What else do you know generally about --

Page 50

1 A. Lytec is accessible via LogMeIn.
2 Q. Are there any other particular locations
3 from which Lytec is accessible through LogMeIn?
4 A. I'm unsure.
5 Q. Are there any other locations from which
6 LabMD is currently operating?
7   MS. HARRIS: Objection, assumes facts,
8 calls for speculation, lacks foundation.
9   THE WITNESS: Corporate condo.
10 Q. (By Ms. Lassack) How do you know that
11 LabMD is operating from the corporate condo?
12 A. I've assisted the person who's doing
13 billing.
14 Q. Where is the corporate condo located?
15 A. Off of Powers Ferry Road.
16 Q. Who is the person working in the corporate
17 condo that you assist?
18 A. I can't think of her name. Last name is
19 Alvarez.
20 Q. Is the first name Kendall?
21 A. Yes. Thank you. God, she'd kill me.
22 Q. How did you assist Ms. Alvarez?
23 A. I set her up. I connected her printers.
24 Q. Did you assist her in any other ways?
25 A. I helped her with her scanner.

Page 51

1 Q. Did you do anything else to assist
2 Ms. Alvarez?
3 A. I don't think so.
4 Q. Did you assist Ms. Alvarez from the
5 corporate condo, or were you located off-site?
6 A. Both.
7 Q. When did you assist Ms. Alvarez in the
8 corporate condo?
9 A. I don't have specific dates, between
10 mid-January and Friday.
11 Q. How many times did you go to the corporate
12 condo?
13 A. Three, four.
14 Q. Do you know what the printers at the
15 corporate condo are being used for?
16   MS. HARRIS: Objection, assumes facts and
17 calls for speculation.
18   THE WITNESS: Printing reports, I would
19 guess.
20 Q. (By Ms. Lassack) Do you know what type of
21 reports?
22 A. Billing reports.
23 Q. Do you know what the scanner at the
24 corporate condo is being used for?
25 A. I would assume the same thing.

Page 52

1 Q. Is there a fax machine at the corporate
2 condo?
3 A. I don't know.
4 Q. Is there any computer hardware located at
5 the corporate condo?
6 A. Yes.
7 Q. What types of hardware?
8 A. There are PCs and monitors.
9 Q. Anything else?
10 A. Networking cable.
11 Q. Are there any servers located at the
12 business condo or the corporate condo?
13 A. Not in-use servers.
14 Q. Are there any servers located at the
15 corporate condo that aren't being used?
16   MS. HARRIS: Objection, asked and
17 answered.
18   THE WITNESS: Yes.
19 Q. (By Ms. Lassack) What servers are those?
20 A. They're mostly parts is what they are,
21 server parts.
22 Q. What types of parts?
23 A. Shells.
24 Q. You said mostly parts. Are there any
25 actual complete servers located at the corporate

Complaint Counsel = Yellow   Both = Green
LabMD = Blue

1　condo?
2　A.　No.
3　Q.　Are there any server parts that contain
4　information that are stored at the corporate condo?
5　A.　Not that I'm aware of.
6　Q.　About how many PCs are located at the
7　corporate condo?
8　A.　I don't know.
9　Q.　Do you know if it's more than five?
10　A.　Yes.
11　Q.　Do you know if it's more than ten?
12　A.　I don't know.
13　Q.　Do you know if there are any hard copy
14　LabMD documents stored at the corporate condo?
15　A.　I don't know.
16　Q.　Do you know if there are any patient
17　specimens located at the corporate condo?
18　A.　No.
19　Q.　Besides yourself and Ms. Alvarez, are
20　there any other LabMD employees who have done work at
21　the corporate condo?
22　　　　MS. HARRIS:　Objection, overbroad as to
23　time frame.
24　　　　THE WITNESS:　Yes.
25　Q.　(By Ms. Lassack)　Who are those employees?

1　A.　Require a gate card to get into the
2　complex, and the door is locked.
3　Q.　Is there any type of security system at
4　the corporate condo?
5　A.　I don't know.
6　Q.　Do you have a gate card to enter the
7　complex where the corporate condo is located?
8　A.　No.
9　Q.　How did you enter the complex when you
10　went to the corporate condo?
11　A.　Kendall let me in.
12　Q.　Turning back to --
13　　　　MS. HARRIS:　Actually, if you're going to
14　change topics, can we take a quick break?
15　　　　MS. LASSACK:　That's fine.　Let's go off
16　the record at 10:42 and take a break.
17　　　　(Deposition in recess, 10:42 a.m. to
18　11:01 a.m.)
19　Q.　(By Ms. Lassack)　We are back on the
20　record at 11:01.　Ms. Parr, I believe earlier this
21　morning you said that you tested access to the servers
22　that were working at ████████ is that correct?
23　A.　Correct.
24　Q.　How did you do that?
25　A.　Would log into them.

1　A.　Jeff Martin, Brandon Bradley.
2　Q.　Do you know what work Mr. Martin did at
3　the corporate condo?
4　A.　Not specifically, no.
5　Q.　Do you know generally?
6　A.　I believe he helped move some of the
7　things there.
8　Q.　Do you know which things?
9　A.　No.
10　Q.　Do you know what work Brandon Bradley did
11　at the corporate condo?
12　A.　He set up the PCs.
13　Q.　Are all of the PCs at the corporate condo
14　set up?
15　A.　No.
16　Q.　How many are set up?
17　A.　One.
18　Q.　Is it just one?
19　A.　As far as I know.
20　Q.　Is the corporate condo secured in any way?
21　　　　MS. HARRIS:　Objection, vague and
22　ambiguous as to secured.
23　　　　THE WITNESS:　Can you be more specific?
24　Q.　(By Ms. Lassack)　Are there locks on the
25　doors?

1　Q.　From where would you log into them?
2　A.　A workstation on the network.
3　Q.　Where was the workstation located?
4　A.　The basement of ████████.
5　Q.　Did you use the same workstation to test
6　access to each server?
7　A.　Not necessarily.
8　Q.　Did you do anything else to test access to
9　the servers that were operational?
10　A.　Yes.
11　Q.　What did you do?
12　A.　Make sure services were running.
13　Q.　What were those services?
14　A.　A multitude of services that require --
15　required by a server to run.
16　Q.　Can you give me a couple of examples?
17　A.　Log-in service, TCP/IP, make sure
18　antivirus is working and connected.
19　　　　I did just think of two other servers on
20　the network that I didn't mention before.　Those are
21　the domain controllers.　You mentioned for a previous
22　question.
23　Q.　Thank you.　So to clarify, you said there
24　are two other --
25　A.　The domain controllers are also on the

CX0727
RX511

RX511

1 network.
2 Q. So domain controllers are also --
3 A. On the network.
4 Q. -- operational --
5 A. Yes.
6 Q. -- and on the network at ████████?
7 A. Yes.
8 Q. What do domain controllers do?
9 A. Control access to the domain.
10 Q. Why are there two of them?
11 A. One is backup.
12 Q. When you tested access to the servers, did
13 you test access to applications housed on those
14 servers?
15 A. Yes.
16 Q. What applications did you test?
17 A. Antivirus, malware protection, make sure
18 LabNet was functioning.
19 Q. Did you test the functionality of Lytec?
20 A. No.
21 Q. Did anyone else test the functionality of
22 Lytec?
23 A. Yes.
24 Q. Who?
25 A. Jeff Martin and Kendall Alvarez.

1 Q. Where in the home at ████████ are the
2 servers that we discussed located?
3 MS. HARRIS: Objection, asked and
4 answered.
5 THE WITNESS: In the basement.
6 Q. (By Ms. Lassack) What other hardware is
7 located at ████████ if any?
8 A. Can you be more specific?
9 Q. For example, are there computers?
10 A. Yes.
11 Q. How many?
12 A. Some are virtual machines, so they're not
13 actual physical machines.
14 Q. What do the virtual machines do?
15 A. Some are workstations. Most are servers.
16 Q. What do the virtual servers do?
17 A. One is LabNet. One is Lytec. Provide
18 functionality. One is a file server.
19 Q. What do the virtual workstations do?
20 A. I'm unsure.
21 Q. Who would know?
22 A. Jeff Martin, Brandon Bradley.
23 Q. When you say that Lytec and LabNet are
24 virtual servers, does that mean they're not physical
25 servers located at ████████?

1 Q. Going forward, who has access to Lytec?
2 MS. HARRIS: Objection, calls for
3 speculation, vague and ambiguous.
4 THE WITNESS: Kendall Alvarez.
5 Q. (By Ms. Lassack) Does anyone else?
6 A. I don't believe so.
7 Q. Does Mr. Daugherty have user credentials
8 that would allow him to access Lytec?
9 A. I don't believe so.
10 Q. When LabMD was still operating from the
11 Powers Ferry location, did Mr. Daugherty have
12 credentials that allowed him to access Lytec?
13 A. I don't believe so.
14 Q. Who has credentials to access the LIS
15 going forward?
16 MS. HARRIS: Objection, calls for
17 speculation.
18 THE WITNESS: Jeff Martin, Kendall
19 Alvarez. I believe that's all.
20 Q. (By Ms. Lassack) Do you know if
21 Mr. Daugherty does?
22 A. I don't believe so.
23 Q. Is Kendall Alvarez still employed by
24 LabMD, to your knowledge?
25 A. I believe so.

1 A. It means that they are not physical
2 servers located at Broadland.
3 Q. When those servers were being used at the
4 Powers Ferry location, were they also virtual servers?
5 A. Yes.
6 Q. How many physical servers are located at
7 ████████?
8 A. I'm unsure. Five maybe.
9 Q. Are any of those physical servers
10 operational?
11 A. Yes.
12 Q. Which ones?
13 A. Two domain controllers and the server that
14 runs the SAN, which is where the virtual machines run.
15 SAN is S-A-N.
16 Q. What does S-A-N stand for?
17 A. Storage area network.
18 Q. Is the backup email server a physical
19 server?
20 A. No.
21 Q. Is the backup email server run from the
22 same location as the LabNet and Lytec servers?
23 A. Can you be more specific?
24 Q. What type of server is the backup email
25 server?

CX0727
RX511

Complaint Counsel = Yellow   Both = Green
LabMD = Blue

RX511

1   A.   Can you be more specific?
2   Q.   Is it a virtual server?
3   A.   Yes.
4   Q.   Is it connected to any other servers?
5   A.   It is on the network.
6   Q.   What else is on the network?
7   A.   Two domain controllers, virtual machines,
8 four workstations.
9   Q.   When you say virtual machines, does that
10 include the virtual server running LabNet?
11   A.   Yes.
12   Q.   I thought you said earlier that you had to
13 physically connect to LabNet from a workstation?
14   A.   Yes.
15   Q.   Am I misunderstanding your earlier
16 testimony?
17   MS. HARRIS: Objection, calls for
18   speculation as to your understanding.
19   MS. LASSACK: Fair enough.
20   Q.   (By Ms. Lassack) Is the virtual server
21 operating LabNet connected to other servers?
22   A.   It is on the network, yes.
23   Q.   How is the network at ▓▓▓▓▓▓ being
24 secured?
25   MS. HARRIS: Objection, vague and

1 ambiguous, and to the extent that you've already
2 testified about this, you can answer.
3   THE WITNESS: There are firewalls.
4 There's domain security.
5   Q.   (By Ms. Lassack) Am I correct that
6 there's antivirus?
7   A.   Uh-huh (affirmative).
8   MS. HARRIS: Is that yes?
9   THE WITNESS: Yes. Sorry.
10   Q.   (By Ms. Lassack) Have any network scans
11 been conducted of the network at ▓▓▓▓▓▓?
12   A.   I'm unsure. Actually, yes, Jeff Martin
13 would have.
14   Q.   How do you know that?
15   A.   Because it's part of making sure it's
16 secure.
17   Q.   Do you know that he actually did it?
18   A.   No.
19   Q.   Do you know of any future plans to conduct
20 network scans on the LabMD network at ▓▓▓▓▓▓?
21   MS. HARRIS: Objection, calls for
22   speculation.
23   THE WITNESS: Not by me, not that I'm
24 aware of.
25   Q.   (By Ms. Lassack) Is any of the

1 information stored on the network at ▓▓▓▓▓▓
2 encrypted?
3   A.   I believe so.
4   Q.   What information?
5   A.   I'm unsure. Backups for sure.
6   Q.   You said backups for sure?
7   A.   Yes.
8   Q.   What backups?
9   A.   The network backups.
10   Q.   Where are the network backups stored?
11   A.   I'm unsure.
12   Q.   How do you know the network backups are
13 encrypted?
14   A.   Because I've heard Jeff Martin and Brandon
15 Bradley discuss it.
16   Q.   Besides the network backups, are you aware
17 of any other information on the network at ▓▓▓▓▓
18 ▓▓▓▓ that's encrypted?
19   A.   No, but that's covered by Jeff and
20 Brandon.
21   Q.   Earlier you mentioned domain security on
22 the network at ▓▓▓▓▓▓. What is that?
23   A.   What is domain security?
24   Q.   On that network, what does it entail?
25   MS. HARRIS: Other than what you've

1 already testified to.
2   THE WITNESS: The same as at the other
3 location. ID, password required to log into the
4 domain.
5   Q.   (By Ms. Lassack) Are there any different
6 levels of access to the network at ▓▓▓▓▓▓?
7   A.   Can you be more specific?
8   Q.   Does anyone who has access with user ID
9 and password to the ▓▓▓▓▓▓ network have the
10 same level of access, or are there different levels?
11   MS. HARRIS: Objection, assumes facts not
12   in evidence, lacks foundation, mischaracterizes
13   testimony.
14   THE WITNESS: Yes, access is different.
15   Q.   (By Ms. Lassack) How is it different?
16   A.   IT people have domain administrator
17 access. Kendall Alvarez would have access only to the
18 systems that she requires.
19   Q.   What are those systems?
20   A.   The billing share, the lab share, and
21 Lytec and LabNet.
22   Q.   Does anyone besides IT staff and Kendall
23 Alvarez have access to the network at ▓▓▓▓▓▓?
24   MS. HARRIS: Objection, calls for
25   speculation.

16 (Pages 61 to 64)

	Page 65		Page 67

Page 65

1   THE WITNESS: I don't think so.
2   Q.   (By Ms. Lassack) Does Mr. Daugherty?
3   A.   I don't think so.
4   Q.   Did you set up --
5   A.   Actually, that's not true. Mike Daugherty
6   does have a domain log-in.
7   Q.   Did you set up Mr. Daugherty's domain
8   log-in?
9   A.   Yes.
10   Q.   What does that domain log-in have access
11   to?
12   A.   The executive share, the admin share, the
13   admin executive share -- I'm sorry -- the admin
14   assistant share, legal share. That's all I can
15   recall.
16   Q.   Are there any hard copy LabMD documents
17   stored at ▓▓▓▓?
18   MS. HARRIS: Objection, calls for
19   speculation.
20   THE WITNESS: Can you ask that question
21   again?
22   Q.   (By Ms. Lassack) Do you know if there are
23   any hard copy LabMD documents stored at ▓▓▓▓?
24   A.   Yes.
25   Q.   How do you know that?

Page 67

1   Q.   What types of LabMD materials are in those
2   boxes?
3   A.   Staplers, scanners, office equipment.
4   Q.   Anything else?
5   A.   Not that I can think of.
6   Q.   Are all LabMD materials at ▓▓▓▓
7   stored in the basement of that building?
8   A.   Sorry. Can you ask the question again?
9   Q.   Are all of the LabMD materials that are
10   located at ▓▓▓▓ are they stored in the
11   basement there?
12   A.   Can you define materials?
13   Q.   Are there any hard copy LabMD documents
14   that are stored anywhere at ▓▓▓▓ other than
15   the basement?
16   A.   Yes.
17   Q.   What are those?
18   A.   There are some media documents.
19   Q.   When you say media documents, what do you
20   mean?
21   A.   Documentation for people who were working
22   on marketing his book.
23   Q.   Where are those media documents located?
24   A.   In one of the rooms in the house.
25   Q.   Is that room located in the basement?

Page 66

1   A.   I've seen boxes.
2   Q.   How many boxes?
3   A.   I'm unsure.
4   Q.   Do you know if it's more than a hundred?
5   A.   Of documents, no.
6   Q.   Of boxes of documents, do you know if it's
7   more than 50?
8   A.   No.
9   Q.   Do you know if it's more than 20?
10   A.   I don't think so.
11   Q.   Do you know if it's more than ten?
12   A.   Yes.
13   Q.   Do you know what types of documents are
14   contained in those boxes?
15   A.   Employee records, that's all I've seen.
16   Q.   Are there other types of boxes stored at
17   ▓▓▓▓?
18   A.   Yes.
19   Q.   What's contained in those boxes?
20   A.   Michael Daugherty's personal -- he's
21   moving into -- he's in the process of moving into the
22   house, moving his personal possessions into the house.
23   Q.   Are there any other boxes containing LabMD
24   materials stored at ▓▓▓▓?
25   A.   Yes.

Page 68

1   A.   No.
2   Q.   Are those LabMD documents or
3   Mr. Daugherty's personal documents?
4   MS. HARRIS: Objection, asked and
5   answered.
6   THE WITNESS: I'm unsure.
7   Q.   (By Ms. Lassack) Are there any other
8   LabMD documents stored at ▓▓▓▓ somewhere
9   other than the basement?
10   A.   Yes.
11   Q.   What types of documents?
12   A.   I don't know.
13   Q.   Where are those documents stored?
14   A.   In the garage.
15   Q.   Are they stored in boxes?
16   A.   Yes.
17   Q.   Do you know how many boxes there are?
18   A.   No.
19   Q.   Do you know if it's more than 20?
20   A.   No.
21   Q.   Is that no you don't know, or no --
22   A.   I don't know.
23   Q.   Do you know if it's more than ten?
24   A.   No, I don't know.
25   Q.   Are there any patient specimens stored at

CX0727
RX511

RX511

1 ▮▮▮▮▮?
2 A. Yes.
3 Q. Where are they stored?
4 A. In the basement.
5 Q. How are they stored?
6 A. In metal filing cabinets specific to lab
7 specimens.
8 Q. Do those filing cabinets have locks?
9 A. No.
10 Q. How is the basement at ▮▮▮▮▮
11 secured?
12 MS. HARRIS: Objection, vague.
13 THE WITNESS: Be more specific.
14 Q. (By Ms. Lassack) Let's start is there an
15 outside entrance to the basement at ▮▮▮▮▮?
16 A. No.
17 Q. Is there a lock on the interior door to
18 the basement at ▮▮▮▮▮
19 A. I don't know.
20 Q. To your knowledge, is there any security
21 system at ▮▮▮▮▮?
22 A. Can you be more specific?
23 Q. Like an alarm?
24 A. I don't know.
25 Q. Do you know if there are any security

1 cameras at ▮▮▮▮▮
2 A. Yes.
3 Q. Where are those cameras?
4 A. I believe they surround the entire house.
5 Q. Do you know if those cameras are
6 monitored?
7 MS. HARRIS: Objection, calls for
8 speculation.
9 THE WITNESS: Can you be more specific?
10 Q. (By Ms. Lassack) Do you know if there's
11 any service that monitors the footage from those
12 cameras?
13 MS. HARRIS: Objection, calls for
14 speculation.
15 THE WITNESS: I don't think I'm getting
16 the question about service.
17 Q. (By Ms. Lassack) Do you know if there's
18 any security provider that operates the cameras?
19 A. I don't know.
20 Q. Do you know if footage from the cameras is
21 viewable anywhere within ▮▮▮▮▮?
22 A. I know from hearsay only.
23 Q. What is that hearsay?
24 A. It's copied to a virtual machine.
25 Q. How did you hear that it was copied to a

1 virtual machine?
2 A. Brandon Bradley and Jeff Martin.
3 Q. To your knowledge, were there any LabMD
4 documents that weren't moved from the Powers Ferry
5 location to ▮▮▮▮▮ or the corporate condo?
6 A. Yes.
7 Q. What types of documents were those?
8 A. I believe documents that had been scanned
9 onto our network.
10 Q. Any other types of documents?
11 A. I don't believe so.
12 Q. Earlier this morning we talked about Trend
13 Micro. What types of devices was Trend Micro
14 installed on during your tenure at LabMD?
15 A. All servers and computers.
16 Q. Was it installed on laptop computers?
17 A. Yes.
18 Q. Did LabMD provide computers to any of its
19 clients?
20 A. Yes.
21 Q. Was Trend Micro installed on those
22 computers?
23 A. No.
24 Q. Was there any equipment on the LabMD
25 network that did not have Trend Micro installed on it?

1 A. Can you be more specific?
2 Q. Were there any computers on the LabMD
3 network that did not have Trend Micro installed on
4 them?
5 MS. HARRIS: Objection.
6 THE WITNESS: Yes.
7 Q. (By Ms. Lassack) What were those?
8 A. Two of the lab -- sorry. Searching for a
9 word -- interfaces would not run Trend Micro.
10 Q. Why not?
11 A. Not compatible.
12 Q. What were those two interfaces?
13 A. I believe LabCorp and Quest. They had
14 other antivirus systems on them, as did the
15 workstations outside of the network.
16 Q. What antivirus was on the interfaces that
17 didn't have Trend Micro?
18 A. AVG. And all had malware protection also,
19 additional malware protection.
20 Q. And what antivirus was on the -- I believe
21 you said there were machines in the physicians'
22 offices?
23 A. AVG.
24 Q. Was AVG centrally managed?
25 A. No. I don't believe that's possible.

CX0727
RX511

RX511

1   A.   On our mail server, you would see an
2 automated program of someone attempting to hack into
3 the Window's log-in.
4   Q.   When did you see that?
5   A.   Probably 2010 from my start date to 2012,
6 maybe even 2013. It was an automated process.
7   Q.   What did you do when you saw that process?
8   A.   Not really a whole lot that you can do.
9 You can block IP addresses, but the IP addresses are
10 not valid IP addresses.
11   Q.   Did you tell anyone else at LabMD about
12 it?
13   A.   Yes.
14   Q.   Who did you tell?
15   A.   The IT manager.
16   Q.   Was that Bob Hyer at the time?
17   A.   Bob Hyer and Jeff Martin. It's not an
18 uncommon thing.
19   Q.   Did you make any recommendations to them
20 with respect to the issue?
21   A.   We discussed blocking IP addresses, but
22 the IP addresses would change with each attempt.
23 That's how hackers work.
24   Q.   Did you have any concerns about the
25 adequacy of LabMD's security policies?

1   A.   No.
2   Q.   Did you have any concerns about the
3 adequacy of LabMD's security procedures?
4   A.   No.
5   Q.   Earlier this morning I believe you
6 mentioned that there were some paper documents at the
7 Powers Ferry location of LabMD that were scanned to
8 the network; is that correct?
9   A.   Can you ask me the question again?
10   Q.   Sure. I believe you said earlier this
11 morning that there were some paper documents from the
12 Powers Ferry location of LabMD that were not moved
13 when LabMD --
14   A.   Yes.
15   Q.   And I believe you said that those
16 documents had been scanned to the network?
17   A.   Yes.
18   Q.   Do you know why those documents have been
19 scanned to the network?
20   A.   Because it's more secure.
21   Q.   Do you know what type of documents were
22 scanned?
23   A.   Lab result related and billing related.
24   Q.   Do you know if they were scanned as part
25 of some sort of scanning project?

1   A.   It was an ongoing project.
2   Q.   Do you know when the project began?
3   A.   No.
4   Q.   Do you know how many documents have been
5 scanned?
6   A.   Lots.
7   Q.   Do you know what time period those
8 documents that were scanned covered?
9   A.   No.
10   Q.   Do you know how much data was on the
11 network from those scanned documents?
12   A.   No.
13   Q.   Do you have any sense of how many pages of
14 documents were scanned?
15   MS. HARRIS: Objection, asked and
16 answered.
17   THE WITNESS: No.
18   Q.   (By Ms. Lassack) Was it thousands?
19   A.   Yes, definitely.
20   Q.   Earlier this morning I also think you
21 referred to a file server at the ▓▓▓▓▓▓
22 location; is that correct?
23   A.   Yes.
24   Q.   What does the file server do?
25   A.   Serves files.

1   Q.   What types of files?
2   A.   Any kind of shared documents.
3   Q.   So am I correct in understanding then that
4 the file server is where the network shares that you
5 talked about earlier are housed?
6   A.   Yes.
7   Q.   Is anything else housed on the file
8 server?
9   A.   It also acts as a print server.
10   Q.   Any other functions housed on that server?
11   A.   No.
12   Q.   I also want to clarify something, so I
13 apologize if I'm being repetitive in any way. Earlier
14 this morning you also talked about the shares that
15 Mr. Daugherty had access to --
16   A.   Yes.
17   Q.   -- in ▓▓▓▓▓▓ and I believe those
18 were legal, executive, admin?
19   A.   Admin assistant.
20   Q.   What type of access did Mr. Daugherty have
21 to those shares?
22   A.   He would have had read, write, change, not
23 full. Full would be administrative.
24   Q.   So, sorry, read, write, change?
25   A.   Yes.
