What ever happened to truth in labeling laws?

My Opinion!!!! Products <sup>acts 100%</sup> made in the U.S.A. Should be labeled 100% Made in the USA. <sup>IA All</sup> All other products should be labeled from the country they were produced, assembled, or the percentage of manufacture in the USA.

It seems to me that our government is using the frog in the boiling water format. That is, "If you put a frog in a pot of boiling water, it will immediately jump out". "If you put a frog in a pan of cold water and warm it to boiling, it will just sit there not knowing it was dying."

America is too great to screw around with---please do not start now!
