Donald Clark - Secretary
 Federal Trade Commission
 6th & Pennsylvania Ave. N.W.
 Washington, D.C. 10580

I have just read an article in reference to the product label "Made in the USA". IT refered to your proposal to permit foreign product to be labeled "Made in the USA" a proposal that would be cheating and lying to citizens of this great country. When I make a purchase and I see the label Made in the USA I knew my purchase was made in the US by US labor.

There must be some foreign interests working in your office, because I cannot comprehend a U.S. Citizen even thinking of such an anti U.S. citizenry proposal being offer by any citizen of our country. A proposal of this nature would be like thrusting a Bayonet through the heart of U.S. labor. Labor has worked for over One Hundred years to bring to the laboring force of this great country a honest, a fair and livable return for their labor.

I hope by this time you reconize the devastating effect this Anti U.S. citizen proposal will have and have erased any evidence of it.

Sincerely,

Harry F. Johnson
