

Made In USA Policy Comment
Office Of The Secretary
Federal Trade Commission
Room 159
Sixth St. & Pennsylvania Ave. N.W.
Washington, DC 20580

August 4, 1997

Dear Sir

/ strenuous/v object to any change in the regulations concerning "MADE IN USA" labels for manufactured products. When a label states that a product is "Made In USA" , then that product must be totally 100% made, assembled in the United States. That is the only way I can determine to buy products that are made by our own work force and is not foreign labor produced. This type label helps protect our own working people from the low pay, slave labor, child produced, anti-American countries that greedy people in our own country are using to flood our markets with these goods to the detriment of our own working people.

As a ~~retired~~ life long American worker, I cannot urge you more to help protect our people by not only keeping "Made In USA" the same as it is, but to further strengthen this statement to be 100% content and assembled within the United States of its territories.

Thank You,

Michael Coe
