

I completely and totally support and encourage the passage of the proposed rule to have emails that contain sexually explicit materials be labeled as such.

Spam has become an epidemic. This rule would greatly aid in being able to regain some control over our email accounts. We would have the ability to filter such filth out with these key words attached to each email. Not only does it help an adult such as myself who chooses not to view pornographic material, but it helps us protect our youth and children.

Thank you for your efforts and work in this area.
