United States

I believe that this provision is absolutely necessary to ensure that consumers personal information doesn't get misused or handed out to whomever the credit bureaus desire. Right now this is exactly what's happening and the consumer has no recourse in stipulating how their personal information can and should be used. Please pass this FACT Act Affiliate Marketing Rule so that it forces the credit bureaus to allow the consumer to Opt-out, preventing their personal information from being abused as it is today. Thank You for your consideration in this matter.
