

Dear Sir

I and my wife are in business for about 5 years. We are not yet making a great deal of money from the opportunity. But we are 100% convinced about the following

- a) The reason for this is our own effort what we have been or not been able to put into this. Personal circumstances or choices have nothing to do with the potential of this opportunity. We are excited about where we are going. We will be qualified platinum's during the fiscal year 2007. We believe this is not one of the best opportunity, but we think this THE NO. 1 OPPORTUNITY for a common man with a dream to accomplish them all and attain a life style with abundant money, time, which helps us have Security and helps you a lead a healthy and happy life.
- b) When we were sponsored we were not only given enough information, we were given absolute freedom to make our own choice to make informed decisions. We were given with credible tools to evaluate research and the opportunity. I practice the same infact the corner stone of Quixtar and BWW is to really qualify people based on their own choice and ever not to impose this on anyone.
- c) I and wife spent around \$120 including product intro pack, with a money back guarantee for 180 days if we were to decide not to pursue this opportunity. This is unique, unheard off, speaks for the confidence level and strength of the opportunity for people who choose to build it right.
- d) Ever leader in the business and all of us are rained to explain to people the worked involved in it. It is just presented as a short cut to working for 40 years and never ever, ever never presented as a get rich quick scheme.
- e) All Quixtar IBO have money back guarantee on products and on business and the liabilities explained very clearly there is absolutely no need for 7 day wait period. This slows down the momentum and seriously affect the income to many families, thus to the nation. Any rule should streamline or facilitate and should not be a hindrance. We believe it serves no purpose than to create a road block.
- f) A prospect is qualified in three step process before he is registered. He is given an overview to check his needs and thought process match the requirement.
- g) He is shown the opportunity plan by professionals and get's to meet close to 200-300 people who share the experiences with facts and not through gossip.
- h) It is important to have given enough information to prospects, but not unwanted negativity and thus deprive people of legitimate income opportunity. Giving litigation list demotivates people and affects businesses who are striving to put their best efforts. and provides no additional.

- i) We are trained to be modest, and we use copies of checks of our leader's income, we give them the literature, we tell them where we are in general and that's all it matters. Providing income substantiation (as per FTC rules)

Trust this helps
