RE: Business Opportunity Rule, R511993

To Whom It May Concern:

Today I write this letter on Independence Day, how ironic! I feel the proposed Business Opportunity Rule, R 511993 is taking away my independence to do business in this country.

What is being asked is ridiculous! I am a legitimate business woman working with a very ethical and legitimate company. One of the finest I have ever seen. If this "Rule" passes it hurts all of us. Yourselves included. You all have the same opportunity I have to have a very successful, legitimate business.

The limits that this "Rule" places on the Direct Selling Industry will severely limit the opportunity and what gives you the right to do so! This is not how America was founded and I believe it is in the best interest of all concerned that this bill die very quietly.

America was built as a land of opportunity and needs to remain so! We do not need to act from fear or punish the majority of really good, hardworking people because of some underhanded dealings by a few. Boy, if we do that with everything, the country will come to a dead stop!!

Let the opportunity flow, don't put limits on it. People are making wonderful incomes and able to enjoy their families again due to time freedom. Don't kill that with this "Rule". Please think again. Let us enjoy our freedom to the fullest.

Thank you.

Sincerely,
