Subject: Comments

My wife and I have been in the Quixtar Business for about 1 ½ years and we are glad of being part of such a great business and for being able to take advantage of the benefits that this business can provide.

Benefits such as: Personal mentorship, Education, and obviously the ability of making money.

When we first looked at the business plan, our sponsors gave us lots of information. They made sure that we understood that there was no guarantee that we were going to be successful just by sign in up. They told us that it would require time and efforts from our part. They gave us some literature for us to review and website addresses so we could get the facts rather than the opinions from other people. We were invited to a business presentation where we got more information about this opportunity. On top of that, we had the chance to meet other Independent Business Owners who were part of the business already. And, that is exactly what we do when we present this business opportunity to other people. We make sure that they have the information they need to make a quality decision with facts.

We feel very thankful for the opportunity that has been presented to us. My wife and I had been part of other business opportunities and honestly we had never seen something like this in our life.

We understand that this business opportunity is not perfect. Therefore, we don't present it as such. We believe that the way this business model is set up should not be changed or affected in any way shape or form by adding extra rules or restrictions by the government or any other entity. We know that this business is not a "get rich quick" scam or anything closed to it. Thus, it should not be treated like one. In fact, it should be recognized and edified because it is a great example of what America is all about.

We thank Quixtar for the opportunity and for allowing us to give our opinions about this matter.

Sincerely,

Pedro & Marlene Mendoza
