

FTC

The proposed Business Opportunity Rule would make it much harder for me to do business from my home part time. I have just started in the Vemma business and have been enjoying the freedom it has given me and my family. There are many legitimate network marketing businesses out there and this is one of them. By regulating this it could hurt my business. Most people when they try our product want it right away. Having to wait 7 days could really be harmful.

I personally believe that our county has gotten to where we have so many laws and our freedoms are being limited daily. What ever happened to common sense and people being able to think for themselves. Do we really need more rules to govern?

I understand that there are constant cons going on and people are being taken. I just feel that we should not punish the good with the bad. Let's educate people and get them to thinking for themselves. Education is the only way to freedom and protection.

Thanks for your consideration in this manner.
