

Dear Sir /Madam,

This is in response to new regulations proposed by FTC. Before I comment anything on the regulations, I would like to share my experience on opportunity provided by Quixtar. Me and my wife were introduced to this business opportunity by parents of my Son's friend, whom we didn't know much before Quixtar opportunity came along. Now they are our best friends. Opportunity provided by Quixtar Inc. is one of the best Business opportunity for people who don't have millions of dollars to invest to buy franchise. Starting a franchise is better than starting a conventional business, as because of training system Success is guaranteed. You are trained by experts in that field and hence chances of losing money is one in millions. Quixtar has harnessed same Success principles, provided a business opportunity which costs anyone almost nothing and if they work hard and follow the teachings provided in training, they are bound to succeed. The startup cost was 250\$ when we started this business and now it is \$300, which is mentioned to any new person is exploring this opportunity. When we started this business, we got almost samples of products as well as training material worth 200\$ back as a startup material. Over and above that we got unlimited access to people who have succeeded in this business and a website which is ours 24/7. If we had to launch our own website to start the business, it would have cost us a fortune. America is all about FREE ENTERPRISE. It shouldn't be that, only rich have a chance to own their own business. In fact, everyone who is ready to work hard should have opportunity to improve their lifestyle by starting their own business.

Quixtar, has helped us to improve our standard of living, while Britt world wide system has taught us the true values of life. This is the only business on the face of earth right now, which teaches not to lie, steal or cheat. In our couple of years of association with Quixtar as well as BWW, we have never lost a dime. All the products, come with 180 days money back guarantee. Even if you use the whole thing and return empty pack, client or business owner gets the money back, without any questions asked. Try returning empty can of coke to get your money back from Walmart after 4 months of purchase, and you will understand how much security Quixtar clients or business owners have. There is no way, any one can lose money or go bankrupt in this opportunity. Yes, people depending on their JOB's might need to file bankruptcy, as soon as their company merges with some other corporate giants and downsize them. This is the only opportunity which provides additional source of income, to a family and security in conditions like layoffs. Its like JOB insurance. Not only that, if a person signs the registration form and starts Quixtar Business, they can cancel their business ownership, within first 90 days and get full refund of their money, provided they return everything, which they got during registration. Try doing the same, after buying McDonalds franchise. The only way someone can lose money, is by starting this business and then not doing anything about it neither do they resign to get money back. But then too they don't lose enough money that they would be required to file bankruptcy. They just lose registration fees because for rest of the money out of startup cost, they have got products worth 175\$ which can last them for at least a month. But same is with collages, if anyone registers to some course, spends thousands of dollars as fees and study material but does nothing about it, they would not clear the exams. That doesn't mean collages doesn't work or collages are Scams. Will FTC pass any regulations for Collages. Do collages guarantee JOBS after completion of course and graduating? I have couple of friends, who have earned bachelors degrees or masters degrees from reputed university like Rutgers in NJ and are jobless right now working in burger king or Dunkin donuts. Why not a law for collages, that they have to tell, who so ever comes to register that after graduating and after spending thousands of dollars, you might have to work in McDonalds and remain in Debt for students loans which you would be paying till your 40s.

Quixtar is the opportunity, where we personally have experience that our income is directly proportional to our efforts. We control our income, which has on an average increased on yearly basis because of the mentorship program which is provided by successful independent business owners. When we register someone new, we meet them in person almost 4-5 times before they sign the registration form. We explain them whole marketing plan, introduce them to some independent business owners who can share their experience, provide them with written information pack which contains marketing plan, income breakup, list of brands associated with

us, registration cost. Also we sit with them and explain them, that to make it in this business you need to work. It is very important to understand that there is no FREE LUNCH in this world and four letter word WORK is required to succeed. If they have problem with this, we don't encourage them to start. Also we sit with them in person, provide them with all information, answer all their questions, brief them what it requires to succeed in this business, and once they are ready they get started. We were not mislead or given incomplete information or forced to register into this business. We got started with all the information without anyone's force and we do the same with others. Also anyone who is intelligent and who studies this opportunity, will understand that person, who introduced us to this business opportunity will not succeed , if they don't help us make money and succeed unlike corporate jobs or traditional businesses which makes this opportunity so special. Also if anyone studies this marketing plan of Quixtar Inc.will understand that everyone gets paid according to the effort they put in, not because of their position in this business. This makes Quixtar , a fair opportunity for everyone. There is no racism. No differentiation on color, sex or social as well as economic status in this opportunity.

Because of all this reason , and a lot more this regulations should not be enforced as they are unfair and do not do proper justice to Quixtar business opportunity as well as Independent business owners associated with Quixtar.
