

Personal Experience:

I got into Quixtar business in the year 2002 and this is the best thing I have ever done in my life so far. This is helping me achieve my goals both financially, personally and mentally. This fits amazingly in my life style as I am proud to serve people and there by making my life productive and successful.

This has helped me have a positive attitude, learned lots of people skills, how to manage finances and value of paying the price for success.

I do absolutely provide all the necessary information when I talk to prospects. I am always bold because I don't want to waste either ones time in the opportunity. In our organization prospects have to spend around 300\$ to get registered which has worked amazingly for us and we are continuing to do that. They can get back all the money they spend as everything in our business is with money-back guarantee. We are not in a business of ripping off people. We only want to make money by helping others make money. It's amazing!!!

Issues:

References: People who come to look at the opportunity are always welcome to different kind of meeting and seminars we have where they can talk to the people they can relate to the most. So, I DON'T think there is a need in giving them references. They should be smart enough to make decisions.

Seven-day waiting period: As everything is with the money-back guarantee, why would people wait to get registered? They will loose a penny of their money. Most of the time prospects take enough time to review information before they get started.

Earnings disclosure: We always carry some sample checks to show it to people who don't believe. Our checks and uplines' checks which have huge amounts printed.

Finally:

I would say that the way we are build our business and Quixtar is operating is absolutely awesome. In fact, if there is any way you can control the negativity on the internet it would be very helpful to all the people. I think there should NO major changes in the way we are building it. Thank you so very much for trying hard to make it a better one for us.
