Dear Chairman Deborah Platt Majoras

I have been selling Mannatech products for 4 yrs. This has been a great financial help to my family. I have become a better person as a result of being active selling Mannatech products.

The proposed Business Opportunity Rule R 511993 casts a negative light on direct selling. The record keeping it would demand would most likely put me out of business. It will cause such delays.

The litigation is most unfair as it does not distinguish between winning and losing law suits.

It is totally impractical to find 10 nearest distributors not to mention the privacy issue due to theft and safety.

I understand that there are a lot of fraudulent groups out there, but the FTC's proposed rule would unfairly target legitimate direct selling businesses.

Sincerely
