RE: Business Opportunity Rule, R511993

To whom it may concern

I am writing this letter because I am concerned about the proposed Business Opportunity Rule R511993.

My wife started a business, several years ago, with a legitimate product. Her business did so well, she was able to give up her job and work from home, and has worked hard to build a credible business. She was able to stay home to raise our family, spend time with the family, because of this business.

This type of rule, and bill could destroy her business an that of many innocent people Please retract this bill.

The proposed rule would make it hard or impossible for her to sell my products as it would scare off the average person, cause them to look at our industry as tainted and totally shut down everyone's legitimate businesses.

This waiting period will give the public the idea that there's something wrong or scare them off. I also think this seven-day waiting period is unnecessary. It would also create massive paperwork for everyone.

Finally, the proposed rule requires the disclosure of a minimum of 10 prior purchasers nearest to the prospective purchaser. There is no one in their right mind that would want their name and email or phone numbers given out to total strangers. What if you required that also of people that shop at Sears, or Macy's. People would be very upset. With identity theft, and weirdos out there, this is totally unsafe and unfair.

Please stop this rule. My wife has been very upset ever since she heard of this, and it's causing great concern. It would totally harm good hardworking honest people, and create severe hardships among all.

PLEASE HELP STOP THIS BILL.

Sincerely
