Re Business Opportunity Rule, R511993

Please make sure this letter gets put in the stack (tally) as being strongly against the Business Opportunity Rule R511993 as currently drafted!

The seven day waiting period would cause unnecessary delays and record keeping for no good reason. This country was built on responsible people becoming entrepreneurs and everyone has equal opportunity. We do not need government holding our hands and spoon feeding us. There are ample resources available to the public to do background checks and litigation reporting as proposed does not distinguish between lawsuit outcomes.

I certainly understand the FTC's Goals, but do not appreciate the proposed methods. The proposed rule would unfairly target legitimate direct selling businesses without really protecting consumers and potential new business start-ups.

I have been in various direct selling businesses for the past 30 years. In most cases they represented supplemental income but in all cases it significantly helped our family enjoy a fuller life and better lifestyle than we were able to support with my full time career (education). We received compensation in direct relation to the effectiveness of our efforts. I did lose some money by not doing all my due diligence but that also occurred with a partnership in my chosen career field. Don't let bureaucrats, regulators, and legislators screw up the American Free Enterprise System. Urge the regulators to uphold and enforce the existing regulations to uncover and thwart the efforts of truly fraudulent groups.

Sincerely,

[REDACTED]
