RE: Business Opportunity Rule R511993

Gentlemen, Ladies,

I wish to complement the F.T.C. for proposing a rule to protect consumers from **bogus** business opportunities. The rules in this bill are so stringent it could put an end to the **fraudulent companies** that prey on the average American Citizen. **However**, this bill in its' present form, could also put and end to the numerous legitimate network marketing companies throughout the United States. Millions of hard working, tax paying network marketers could be put out of business. Granted, there are many people in the business **earning** a 6 figure income. However, there are multiple thousands, maybe millions more, who earn 2, 4, 6, or 8 hundred dollars extra a month, necessary to put bread on the table, pay the mortgage, pay for the sinful price of gasoline, and pay their taxes.

The Co-founders and leaders of our company, Freelif International, including the **'Worlds leading authority on nutrition, Dr. Earl Mindell**, are of impeccable character, have integrity to the fullest extent, and have compassion beyond reproach. This 11 year old Company has donated hundreds of thousands of dollars to needy youth organizations throughout the world with the **Goji Kids Foundation**.

My wife, Sally and I have been involved in Freelif for eight years. We have been in other network marketing companies, and believe me, there is no comparison. Sally is 71 years old, I am 77, we have been married 51 years. We have a large family, we have been hard workers all of our lives. I am a Navy Veteran of the Korean War. I have served my community for 22 years as a City Commissioner. I have been an active member of the Penna. And the National League of Cities. I have paid my ducs. Sally and I depend immensely on the income we make, serving peoples needs with FreeLife products. Please do not take this away from us, and the millions of network marketers like us.

Being an elected official for so long, a thought just came to my mind. If this bill were to become law. Would their not be protection for the companies already in the business under the "Grandfather clause?"

Sincerely,  
Pat and Sally White
