## What Web & Audio Conferencing Does For Your Business

Our Web & Audio Conferencing will change the way you conduct meetings between 2-25 people. It has the power to open up new business opportunities, bring teams together, and to give your business a competitive edge. Now you can be where you need to be, see who you need to see - without leaving your office!

**Our Web & Audio Conferencing gives you a wide range of powerful features like:**

### Web Conferencing

#### Application and Desktop Sharing

Share any application or document on your computer – even share your entire desktop – with everyone attending your conference – *even if they are not a member of WriteXchange<sup>SM</sup> or your organization.* Demonstrate products, train, and collaborate -- live, while interacting with your audience.

#### Presentation Tools

Present pre-loaded presentations, annotate charts, and interact with your audience using whiteboards, Q&A, chat and polling tools.

#### Conferencing Hub

Manage meeting content, upload presentations, schedule conferences and send invitations all from your web-based conferencing hub.

#### Reporting

Track the usage of individual subscribers within your company, the participation of attendees, and view registration and evaluation information. All in real-time.

### Audio Conferencing

#### Reservationless Conference Calling

Each authorized member gets to use our 800# and a custom passcode to allow them to easily set up and conduct conference calls at anytime - without having to reserve time.

#### Integrated Audio with Web Conferencing

Use audio and web conferencing together to make your meeting more dynamic and let you instantly interact with your audience.

#### Intuitive Audio Controls

Easily control your meeting audio using your telephone keypad or the web-based Control Panel. You can mute lines, lock conferences, take roll call, terminate the conference, and more.

#### Live Operator Support

Live operators are ready to help you at the push of a button - right during your conference.
