No company should be allowed to place any type of spyware on someone's computer. They should not be allowed to do so as a condition of doing business, receiving freeware or shareware, or any other reason.

The same rules which apply to wiretaps should apply to spyware and all of its iterations. It should be used only in the gravest matters of National Security or pursuit of criminals under the supervision of the Judicial System.

Sincerely Yours,

Jorge Blanco, Jr.  
FL
