I would like to urge you to enact new laws to help control spyware/adware. Despite using various removal programs such as Spybot and Ad-Aware we have problems daily with these nasty little programs. My son does a lot of schoolwork online and these interfere with it quite frequently (at least 3 times a week, each taking an hour or two to eradicate finally). I feel that these programs forced onto our computers interfere with our right to communicate freely when we need to. Also, it mortifies me that my child's favorites folder and browser get loaded with adult links with no warning. Is this not illegal? It's so proliferant and obvious that I don't see how my government lets this continue. Thank you for your time.
