In 5 little words... I HATE SPY AND ADWARE!

Why?... because they slow up this PC to such an extent that I have to re-boot every 1 to 2 hours. I also need to use 3 Spyware/Adware removal tools to rid this PC of them. And then go through the whole system to remove others they miss!

If these spy programs did no harm my PC would run smoothly... which it only does AFTER I've removed all the spyware!

One such program is currently running on this PC, and I can't find it to stop it hijacking me to their Test Page!... making it impossible to use search engines without using a back door to access them!

I can't think how to get rid of this without Formatting my hard drive... a 3 day task!

Thanks Spyware!...
