Subject: Spyware Workshop - Comment, P044509

Greetings,

Can't believe some of the low handedness & downright anal methods some of these spyware/adware companies employ to "infect" innocent user's PC's. I'm pretty **xxxxxxx** as are the unsuspecting souls I work with that so much time & effort is wasted removing these unwanted, unapproved, unnecessary, annoying & brain draining intrusions on MY life. To allow this BS to continue would show a total lack of respect to us all but mostly to the souls fighting their way through the sometimes mind boggling PC101 or NEW USER syndrome. Worst part is, these attacks are mostly pointed at the uninitiated & children because the rest of us already know better.

Do the PC industry a real service, we already have enough SPAM BS to deal with, give these **xxxxxxxxx** the boot.
