Subject: Spyware Workshop - Comment, P044509

The ever-increasing invasion of spyware continues to degrade my PC's performance.

Frequently I'm interrupted while composing e-mails or simply browsing the net.

Some sites will no longer run unless you enable their pop-up ads?

To keep my PC operational I must run spyware-removal programs SEVERAL TIMES A DAY?

As the spyware becomes more & more sophisticated we must have protection!!

Cordially,

LJ Doub
