To whom it may concern:

I read with dismay the results of the recent workshop on spyware and adware and I am incensed to think that I am being labeled a consumer by companies that hijack my home page and flood my computer with garbage. I recently had to pay to have my computer cleaned up with a system restore and hijack this logs, among other things. It was in imminent danger of crashing, all due to hijacking from adware and spyware. Please do not allow these so called businesses to invade my privacy and crash my computer!
