Dear FTC,

1. I am AGAINST adware and spyware in any form! Why is someone allowed to invade my computer without my permission??? Is a company allowed to place a tracking device on my car without my knowledge and track where I go? Why is my computer any different? Are TV broadcasters allowed to place a device in my TV that reports my channel useage to them?? You get my point...it's outrageous that this type of invasion of privacy is allowed under the guise of free speech, which is ridiculous. If someone opts in...not out...but in....then fine....let the adware people go wild. Otherwise, ban it entirely, and keep this scourge from causing more trouble than it already has...

Thank you.

Greg Sanders
