Dear FTC,

As an ardent computer user, both personally and for business, I am appalled with the lack of legislation and enforcement concerning adware and spam proponents. The amount of resources wasted on the prevention and elimination of the above is obscene.

Adware and spam is a direct infringement on my right to privacy. It also has a negative effect on my ability to earn a living and ultimately affecting my earnings.

Put a muzzle on this semi illegal, and obnoxious industry and protect our ability to use computers in a private and productive way.

Respectfully,

Stan Rogers

MI
