FOR FURTHER INFORMATION CONTACT:

Requests for additional information or copies of the proposed information requirements should be sent to Neil Blickman, Attorney, Division of Enforcement, Bureau of Consumer Protection, Federal Trade Commission, 600 Pennsylvania Ave., NW., Washington, DC 20580, (202) 326-3038.

SUPPLEMENTARY INFORMATION: On August 25, 2005, the FTC sought comment on the information collection requirements associated with the Fuel Rating Rule, 16 CFR Part 306 (OMB Control Number: 3084-0068). See 70 FR 49925. No comments were received. Pursuant to the OMB regulations that implement the PRA (5 CFR Part 1320), the FTC is providing this second opportunity for public comment while seeking OMB approval to extend the existing paperwork clearance for the Rule. All comments should be filed as prescribed in the **ADDRESSES** section above, and must be received on or before December 19, 2005.

The Fuel Rating Rule, 16 CFR Part 306 (OMB Control Number: 3084-0068), establishes standard procedures for determining, certifying, and disclosing the octane rating of automotive gasoline and the automotive fuel rating of alternative liquid automotive fuels, as required by the Petroleum Marketing Practices Act, 15 U.S.C. 2822(a)-(c). The Rule also requires refiners, producers, importers, distributors, and retailers to keep records showing how the ratings were determined, including delivery tickets or letters of certification.

*Estimated annual hours burden:*² 40,000 total burden hours (16,000 recordkeeping hours + 24,000 disclosure hours).

Recordkeeping: Based on industry sources, staff estimates that 195,000 fuel industry members each incur an average annual burden of approximately five minutes to ensure retention of relevant business records for the period required by the Rule, resulting in a total of 16,000 hours.

Disclosure: Staff estimates that affected industry members incur an average burden of approximately one hour to produce, distribute, and post octane rating labels. Because the labels are durable, only about one of every eight industry members (*i.e.*, approximately 24,000 of 195,000 industry members) incur this burden each year, resulting in a total annual burden of 24,000 hours.

² All numbers pertaining to hours and cost burden estimates have been rounded to the nearest thousand.

Estimated annual cost burden: \$804,000 (\$720,000 in labor costs and \$84,000 in non-labor costs).

Labor costs: Staff estimates that the work associated with the Rule's recordkeeping and disclosure requirements is performed by skilled information and record clerks at an average rate of \$18.00 per hour. Thus, the annual labor cost to respondents of complying with the recordkeeping and disclosure requirements of the Rule is estimated to be \$720,000 ((16,000 hours + 24,000 hours) × \$18.00 per hour).

Capital or other non-labor costs: \$84,000.

Staff believes that there are no current start-up costs associated with the Rule. Because the Rule has been effective since 1979 for gasoline, and since 1993 for liquid alternative automotive fuels, industry members already have in place the capital equipment and other means necessary to comply with the Rule. Retailers (approximately 170,000 industry members), however, do incur the cost of procuring (and replacing) fuel dispenser labels to comply with the Rule. According to industry input, the price per label is about fifty cents. Industry estimates of the useful life of dispenser labels range from 6 to 10 years. The estimate is based on the bottom of that range, *i.e.*, 6 years. Based on industry input, staff believes that the average retailer has six dispensers, all being obtained or replaced in the same year. Assuming that, in any given year, 1/6th of all retailers (28,000 retailers) will replace their dispenser labels, staff estimates total labeling cost to be \$84,000 (28,000 × 6 × .50).

William Blumenthal,

General Counsel.
