FEDERAL TRADE COMMISSION

Granting of Request for Early Termination of the Waiting Period Under the Premerger Notification Rules

Section 7A of the Clayton Act, 15 U.S.C. 18a, as added by Title II of the Hart-Scott-Rodino Antitrust Improvements Act of 1976, requires

persons contemplating certain mergers or acquisitions to give the Federal Trade Commission and the Assistant Attorney General advance notice and to wait designated periods before consummation of such plans. Section 7A(b)(2) of the Act permits the agencies, in individual cases, to terminate this waiting period prior to its expiration and requires that notice of this action be published in the **Federal Register**.

The following transactions were granted early termination of the waiting period provided by law and the premerger notification rules. The grants were made by the Federal Trade Commission and the Assistant Attorney General for the Antitrust Division of the Department of Justice. Neither agency intends to take any action with respect to these proposed acquisitions during the applicable waiting period.

DEPARTMENT OF HEALTH AND HUMAN SERVICES
Centers for Disease Control and Prevention
[Program Announcement 02168]
Clinical Immunization Safety Assessment Centers (CISA); Notice of Availability of Funds for Fiscal Year 2002

A. Purpose
The Centers for Disease Control and Prevention (CDC) announces the availability of fiscal year (FY) 2002 funds for a cooperative agreement program for Clinical Immunization

Safety Assessment Centers (CISA). The term "Immunization Safety" encompasses safety aspects of the vaccine administration process as well as the vaccine itself. This program addresses the "Healthy People 2010" focus areas of Immunization and Infectious Diseases, Medical Product Safety, Public Health Infrastructure, Maternal, Infant and Child Health, Health Communication and Access to Quality Health Services.

The purpose of the program is to expand the national network of CISA Centers (hereforth called Centers) to improve the scientific understanding of immunization safety issues at the individual patient level. Clinically significant adverse events occur rarely. They are infrequently seen in clinical trials and individual clinicians see them too infrequently to be able to manage them in a standardized fashion. In collaboration with CDC, the Centers will fill this gap by creating a new medical specialty of immunization safety. The Centers will develop and disseminate standardized evaluation protocols to clinicians; they will provide referral and consultation services to health care providers on how to evaluate patients who may have had an adverse reaction

to vaccination, which will include how to manage the adverse reaction, as well as advise on continued immunization; and they will undertake outreach and educational interventions in the area of immunization safety. The first goal is to enhance our understanding of known serious or unusual vaccine reactions, including the pathophysiology and risk factors (including genetics) for such reactions. The second goal is to evaluate and gain an understanding of newly hypothesized syndromes or events identified from the routine and enhanced assessment of Vaccine Adverse Event Reporting System (VAERS) case reports, in order to clarify any potential relationship with immunization.

Measurable outcomes of the program will be in alignment with the following performance goal for the National Immunization Program: To improve vaccine safety surveillance.
