accessibe_community accessiBe includes two different components that work simultaneously to achieve compliance.

First is our AI Application, which is responsible for handling 70% of the WCAG requirements and includes screen reader and keyboard navigation adjustments.

The second part of the solution is the accessibility interface, which is responsible for adjusting the user interface and the website design, which cover 30% of the WCAG requirements and include adjustments for readable fonts, sizing, spacing, color contrasts, and more.

Get in touch with us at [accessibe.com](https://www.accessibe.com) to learn more about our web accessibility solution!

[Alt text: picture of a website displaying headphones. Image split into half, one half showing the accessiBe interface and the other showing the back-end AI software]
