A website is not [#accessible](#) to people with disabilities by default. Millions of websites are out of reach for 20% of the population with disabilities who turn to the web for goods and services, education, entertainment, and more.

Here's how [#accessiBe](#) has harnessed the power of [#AI](#) and [#automation](#) to make thousands of websites immediately accessible >

The image shows a Facebook post. At the top is a photo of hands typing on a keyboard. Below the photo is the text 'WEBDESIGNERDEPOT.COM' and the title 'accessiBe Review 2020: Solving Web Accessibility with AI and Scalability'. A truncated description follows: 'accessiBe is a web accessibility solution for ADA and WCAG compliance. It enables websites...'. Below the text are engagement metrics: '6' likes and '1 share'. There are three buttons: 'Like', 'Comment', and 'Share'. At the bottom is a comment input field with a placeholder 'Write a comment...' and a 'Press Enter to post.' instruction. To the right of the input field are icons for emojis, photos, videos, and GIFs. A small 'i' icon is in the top right corner of the post area.
