FEDERAL TRADE COMMISSION

16 CFR Parts 801 and 803

RIN 3084–AB46

Premerger Notification; Reporting and Waiting Period Requirements

AGENCY: Federal Trade Commission.

ACTION: Final rule.

SUMMARY: The Federal Trade Commission (''FTC'' or ''Commission''), with the concurrence of the Assistant Attorney General, Antitrust Division, Department of Justice (''Assistant Attorney General'' or ''Antitrust Division'') (together the ''Agencies''), is issuing this final rule and Statement of Basis and Purpose (''SBP'') to amend the Premerger Notification Rules (the ''Rules'') that implement the Hart-Scott-Rodino Antitrust Improvement Act (''the HSR Act'' or ''HSR''), including the Premerger Notification and Report Form for Certain Mergers and Acquisitions (''Form'') and Instructions to the Notification and Report Form for Certain Mergers and Acquisitions (''Instructions''). The final rule requires parties to transactions that are reportable under the HSR Act to provide documentary material and information that are necessary and appropriate for the Agencies to efficiently and effectively conduct an initial assessment to determine whether the transaction may violate the antitrust laws and whether to issue a Request for Additional Information (''Second Request'') as provided by the HSR Act. In addition, the final rule implements certain requirements of the Merger Filing Fee Modernization Act of 2022 (''Merger Modernization Act'') and ministerial changes to the Rules as well as the necessary amendments to the Instructions to effect the final changes.

DATES: This rule is effective on February 10, 2025.

FOR FURTHER INFORMATION CONTACT: Robert Jones, Assistant Director, Premerger Notification Office, Bureau of Competition, Federal Trade Commission, 400 7th Street SW, Washington, DC 20024, or by telephone at (202) 326–3100.

SUPPLEMENTARY INFORMATION:

I. Executive Summary

The Commission is amending and reorganizing the documentary material and information requirements for premerger notification required by the HSR Act, 15 U.S.C. 18a, (''notification'' or ''HSR Filing'' or ''Filing'') to improve the efficiency and effectiveness of premerger review and to implement changes mandated by the Merger Modernization Act, 15 U.S.C. 18b. The Act and the Rules require parties to certain mergers and acquisitions to submit a notification to the Agencies and to wait a short period of time before consummating the reported transaction. The reporting and waiting period requirements of the HSR Act are intended to enable the Agencies to determine whether a proposed merger or acquisition may violate the antitrust laws, including section 7 of the Clayton Act, 15 U.S.C. 18, if consummated and, when appropriate, to take appropriate law enforcement action prior to consummation to prevent a violation of the antitrust laws.

To advance the Clayton Act's goal of preventing undue consolidation or stopping it in its incipiency,[1] Congress passed the HSR Act to require mandatory premerger notification of some acquisitions. In particular, it charged the Agencies with reviewing the details of those proposed transactions in advance of consummation. The Agencies rely on information submitted in an HSR Filing to conduct a premerger antitrust risk assessment and to identify those transactions that require additional investigation to determine if they may harm competition, and thus violate the antitrust laws if consummated. The HSR Act requires that the parties not consummate their planned transaction while the Agencies conduct this assessment until the expiration of the statutory waiting period, which for most transactions is 30 days (15 days in the case of a cash tender offer or certain bankruptcy sales). During that short period of time, referred to as the initial waiting period, the Agencies review the information submitted in the parties' HSR Filings to identify those transactions that require a closer look, including through the collection of additional information from the acquiring and acquired persons or from third parties. If either agency determines during the initial waiting period to conduct an in-depth investigation of the transaction, section 7A(e) of the Clayton Act, 15 U.S.C. 18a(e), authorizes the Agencies to request additional information or documents from each party, which is referred to as a Second Request.[2] Issuing Second Requests extends the waiting period under the HSR Act for another 30 days (ten days in the case of a cash tender offer or certain bankruptcy sales) after the parties have substantially complied with the Second Requests. During this second waiting period, if the reviewing agency believes that a proposed transaction may violate the antitrust laws, it may seek an injunction in Federal district court to prohibit consummation of the transaction.

The Commission has administered the HSR Act's premerger notification program for over forty-five years, issuing an initial set of HSR Rules that took effect on September 5, 1978.[3] Since then, it has regularly updated these rules, with the concurrence of the Assistant Attorney General, pursuant to its mandate under 15 U.S.C. 18a(d), to require a premerger notification for each reportable acquisition that contains documentary material and information necessary and appropriate to enable the Agencies to determine whether the transaction is one that may violate the antitrust laws and proceed to an in-depth investigation through the issuance of Second Requests. In this rulemaking, the Commission is responding to several factors that make today's economic reality more challenging for conducting a premerger assessment with the limited information required by the current rules. Simply put, the economy of 2024 is different than it was in 1978 or 2000 and, in the Agencies' experience, the HSR Form has not kept pace with the realities of how businesses compete today. There is a higher degree of interconnectivity of businesses along the supply chain as well as with other companies that provide ancillary services. The focus of competitive interaction is not as obvious when companies that supply goods or services also generate revenues from other sources, such as data sales, and when even businesses in traditional sectors such as manufacturing generate significant revenues from the sale of associated services. The changing nature of competition makes it more difficult for the Agencies to identify existing business relationships that might be affected by the acquisition, including through non-price effects such as innovation competition, and that are not

[1] *See, e.g., Brown Shoe Co.* v. *United States,* 370 U.S. 294, 318 n.32 (1962).

[2] The FTC and DOJ share responsibility to enforce the antitrust laws and have established a protocol to clear the investigation of a transaction to one agency to avoid confusion and conserve public resources. The agency that receives clearance conducts the investigation and determines whether to issue Second Requests.

[3] The Commission commenced notice-and-comment rulemaking soon after the passage of the HSR Act and made extensive revisions to its proposed rules before issuing a final rule nearly two years later. *See* 41 FR 55488 (Dec. 20, 1976), 42 FR 39040 (Aug. 1, 1977), 43 FR 33450 (July 31, 1978), 43 FR 34443 (Aug. 4, 1978), 43 FR 36053 (Aug. 15, 1978). *See* Fed. Trade Comm'n & U.S. Dep't of Justice, Second Hart-Scott-Rodino Annual Report (FY 1978).

apparent from simply focusing on sales in output markets. In addition, changes in mergers and acquisition (''M&A'') activity, corporate structures, and investment strategies have rendered the current Form's focus on traditional corporate structures outdated, and often the Agencies are unable to determine which entities or individuals will be making competitive decisions post-merger.

These profound changes that have occurred over time have created or exposed significant gaps in the information generated for premerger review under the current HSR Rules. These gaps curtail the Agencies' ability to efficiently and effectively detect transactions that may violate the antitrust laws. To fill in these gaps and to directly respond to the passage of the Merger Modernization Act, the Commission relied on its experience and expertise to identify specific information that is necessary and appropriate to conduct effective premerger screening.

To initiate this rulemaking, the Agencies conducted a comprehensive review of the premerger notification process, relied on their experience collecting and reviewing data and documents during antitrust investigations, and considered the cumulative effects of changes in deal structure, investment strategies, and the competitive dynamics of the modern economy explained in more detail below. From this review, the Commission identified several information deficiencies in the current HSR Filing that prevent the Agencies from efficiently and effectively conducting a premerger assessment of reportable transactions to identify which ones may violate the antitrust laws. The Agencies compared documentary material and information they have received over the years during in-depth merger investigations with the information collected in HSR Filings and assessed whether having certain types of documentary material and information at the beginning of an investigation would have changed the Agencies' decision whether and how to investigate reportable transactions. These specific categories of information and documents, which are readily available to the merging parties, are not required by the current Rules, but would be highly probative to the initial antitrust screening of a transaction during the initial waiting period and thus are necessary and appropriate for that review. The information identified and required by this final rule will enable the Agencies to detect transactions that may violate the law in light of modern commercial realities and in furtherance of the statutory mandate to arrest trends toward concentration in their incipiency. The final rule also will allow the Agencies to identify potentially unlawful transactions more quickly and with greater accuracy, narrowing the scope of their investigations in some cases, and in others, reducing the need to conduct a more burdensome in-depth investigation by issuing Second Requests.

In June 2023, the Commission proposed amendments to address the information deficiencies under the existing HSR Rules in a Notice of Proposed Rulemaking (''NPRM'').[4] The Commission received approximately 721 comments.[5] The majority of commenters were individuals who expressed general support for the rulemaking or for more vigorous antitrust enforcement more broadly. Others opposed certain aspects of the proposed rule and some questioned the Commission's authority to make any adjustments. After careful consideration of the comments and as discussed in more detail below, the Commission has substantially narrowed the information requirements proposed in the NPRM. In the final rule, the Commission is not adopting several proposed requirements outright, including those related to:

- a timeline of key dates for closing the proposed transaction;
- creating organization charts for the purpose of filing a notification;
- information about other interest holders;
- drafts of submitted documents;
- information about employees;
- information about board observers;
- geolocation information;
- prior acquisitions involving entities with less than $10 million in sales or revenues, or consummated more than 5 years prior to filing; and
- information about steps taken to preserve documents or use of messaging systems.

For other proposals, the Commission has substantially modified its proposals to minimize where possible the costs to filers and third parties, yet still provide the Agencies with information that is necessary and appropriate for effective and efficient premerger review. Overall, these modifications significantly reduce the effort required to comply with the final rule as compared to the proposed rule and include:

- Creating a new category of ''select 801.30 transactions'' for which the cost of complying with the information requirements has been limited because of the low risk that the transaction may violate the antitrust laws;
- Eliminating several document requirements to reduce costs;
- Limiting some requirements to materials that already exist;
- Excusing the seller[6] from certain information requests if it would be duplicative of information received from the buyer;
- Limiting some requirements to cover only recent information;
- Providing definitions or clarifications to reduce uncertainty and improve filer compliance;
- Creating *de minimis* exceptions to reduce the costs of generating information that has little economic impact; and
- Making the provision of certain information contingent on the identification of a significant business relationship between the filing persons that is critical to assessing whether the transaction may violate the antitrust laws.

As modified, the final rule introduces necessary and appropriate updates to HSR information requirements to allow the Agencies to understand the reported transaction and conduct an initial antitrust assessment within the statutory timeframe and does so in a manner that aligns the associated costs with the likelihood that the transaction is one that presents antitrust risk. With more complete information that is targeted to disclose existing business relationships between the parties, the Agencies can determine whether and how to deploy their resources to further investigate potentially anticompetitive acquisitions prior to consummation. The final rule will also provide transparency for those contemplating a reportable transaction by describing the information the

[4] On June 29, 2023, the Commission published a Notice of Proposed Rulemaking, Premerger Notification; Reporting and Waiting Period Requirements, 88 FR 42178 (June 29, 2023) (hereinafter NPRM). On August 10, 2023, the Commission extended the comment period to receive public comments through September 27, 2023. 88 FR 54256. The comments on the NPRM (Doc. No. FTC–2023–0040) are available at *https://www.regulations.gov/docket/FTC-2023-0040/comments*.

[5] The Commission does not rely on any particular individual comment submission for its findings, but rather provides here (and throughout this final rule) examples of comments that were illustrative of themes that spanned many comments. The Commission's findings are based on consideration of the totality of the evidence, including its review of the empirical literature, its review of the full comment record, and its expertise and experience in identifying mergers that violate the antitrust laws.

[6] References to ''seller'' throughout refer to the acquired person, as defined in 16 CFR 801.2, regardless of whether or not the acquired person is actually a party to the transaction.

Agencies rely on to conduct their initial assessment of whether a transaction may violate the antitrust laws. The amendments will also reduce the current burden on third parties (such as customers and competitors of the merging parties) on whom the Agencies often rely to fill in many of the information gaps during the initial review period because of inadequacies in the current Rules.

With this rulemaking the Commission has closely tailored the burden of complying with the HSR Act to align as much as practicable with the risks of a law violation presented by the particular transaction. This alignment is consistent with the statutory purpose of premerger review, which is for the Agencies to determine which reported transactions may violate the antitrust laws during the brief period provided by the Act for an initial antitrust assessment. As a result, the final rule achieves the benefits associated with mandatory premerger review with an overall burden that is reasonable and consistent with the legislative purpose of the HSR Act.

II. Background

A. Premerger Review and the Implications for Merger Enforcement

Section 7 of the Clayton Act is, by its terms, forward-looking and predictive, focused on acquisitions whose effect ''may be substantially to lessen competition, or to tend to create a monopoly.'' [7] To better effectuate the Clayton Act's goal of preventing undue consolidation or stopping it in its incipiency, Congress passed the HSR Act to require mandatory premerger notification of some acquisitions, and charged the Agencies with reviewing the details of those proposed transactions in advance of consummation to determine whether they may violate the antitrust laws. In doing so, Congress fundamentally changed the way the Agencies enforce the nation's antitrust laws to prevent harmful consolidation.[8]

Congress specifically charged that the Commission engage in rulemaking to require information in the HSR Filing that is necessary and appropriate to detect acquisitions that may violate the antitrust laws. Section 18a(d)(1) of the HSR Act states that the Commission, by rule and in accordance with the Administrative Procedures Act, shall require that the notification contain such documentary material and information to determine whether the acquisition may, if consummated, violate the antitrust laws.[9] Relying on this explicit rulemaking authority, the Commission has adjusted those requirements over time to carry out the purposes of the Act.

In passing the HSR Act, Congress imposed mandatory premerger review only for certain large transactions, in part to ''improve and modernize antitrust investigation and enforcement mechanisms,'' [10] ''ease burdens on the courts by forestalling interminable post-consummation divestiture trials . . . [, and] advance the legitimate interests of the business community in planning and predictability.'' [11] The robust legislative history of the HSR Act makes plain that premerger review should focus on the likelihood that a reported transaction may violate the antitrust laws and that the Commission shall collect information to make that determination prior to consummation.[12] Consistent with Congressional mandate, the Agencies rely on notifications under the HSR Act to target their enforcement efforts to their best use in preventing undue consolidation by seeking to prohibit the consummation of acquisitions that violate the antitrust laws.

To focus the Agencies' screening and potential enforcement efforts on the mergers that are most likely to harm competition and consumers, Congress required notice in advance for the largest mergers and tasked the Agencies with conducting an assessment of the risk that the proposed acquisition may violate the antitrust laws. To perform this task, the Agencies must review thousands of filings each year and identify which ones should be targeted for an intensive investigation of their potential to violate the antitrust laws. This is a fact-intensive endeavor that requires a deep understanding of precedent and economic analysis. The Agencies employ lawyers, economists, technologists, accountants, and support staff to conduct premerger analyses of reported transactions in order to perform this critical task on behalf of the American public.

Nonetheless, transactions reported under the HSR Act are a small fraction of the total number of mergers and acquisitions that occur each year in the United States. Relying on commercial data on M&A activity and data from the Agencies' annual HSR reports, Table 1 shows that during the five-year period of FY 2018 to 2022, HSR filings represented a small percentage of overall deal activity in the United States, on average 16.5 percent a year.[13]

[7] 15 U.S.C. 18. *See Brown Shoe* v. *United States,* 370 U.S. 294, 317–18 (1962) (Congress provided authority for arresting mergers at a time when the trend to a lessening of competition in a line of commerce was still in its incipiency and assure courts had the power to brake the process of concentration at its outset and before it gathered momentum).

[8] *See* Peter W. Rodino, Jr., Statement on the 25th Anniversary of Hart-Scott-Rodino (2001), *https://www.ftc.gov/enforcement/premerger-notification-program/hsr-resources/pno-news-archive/statement-peter-w-rodino* (''Hart-Scott-Rodino was intended to give the anti-trust agencies two things: critical information about a proposed merger and time to analyze that information and prepare a case, if necessary. From what I hear, the legislation absolutely has transformed merger enforcement. Competition, as well as the consumer, has benefitted.'').

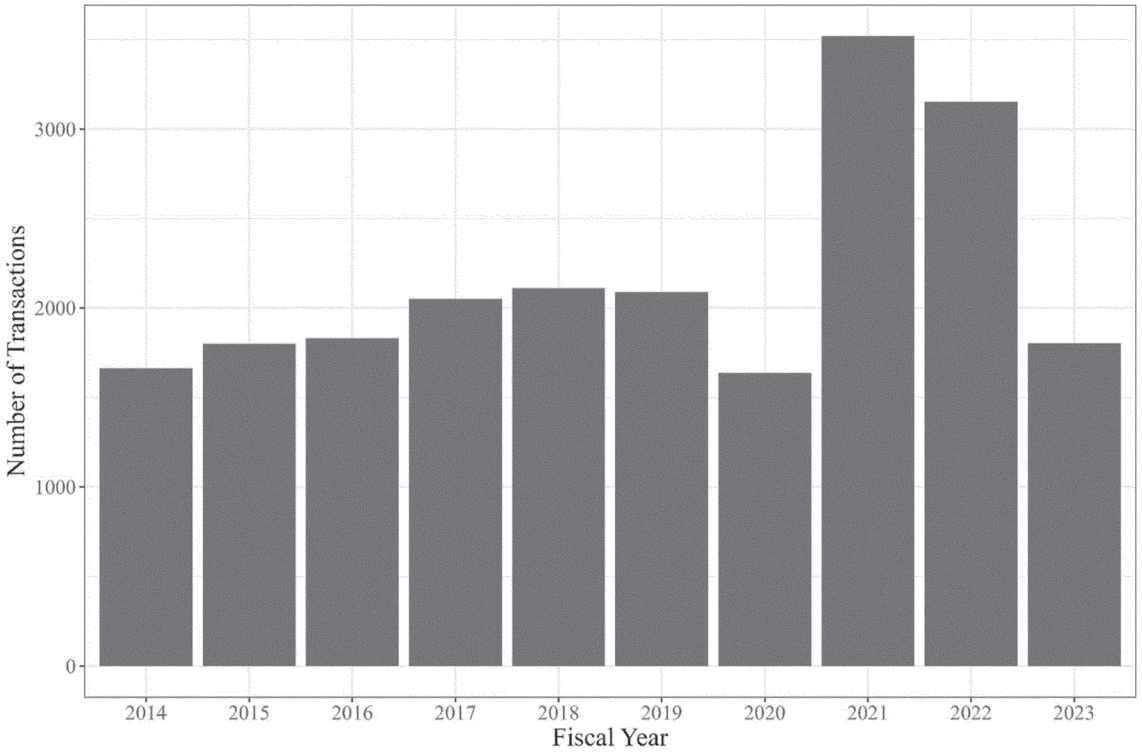
[b] Source: HSR Annual Reports for Fiscal Years 2018 - 2022, Figure 1.

While the Agencies investigate and ultimately seek to block only a small subset of reportable mergers each year, the challenges of administering mandatory premerger review have expanded and accelerated over time due to the changes in the nature of M&A activity discussed in detail below.

Figure 1: HSR Merger Transactions Reported Fiscal Years 2014 - 2023



As depicted in Figure 1, there was a recent spike in HSR-reportable transactions: in FY 2021, the Agencies reviewed HSR Filings for 3,520 transactions, over twice the number of the prior year's filings. In FY 2022, the Agencies reviewed 3,152 transactions. Although the pace of HSR Filings has recently moderated somewhat, the recent period of intense merger activity highlighted significant inefficiencies and deficiencies in current notification requirements that must be addressed so that the Agencies can direct their scarce resources to prevent those acquisitions most likely to cause widespread harm.[14]

The Commission is mindful of recent economic research that underscores the importance of adequate detection for effective merger enforcement. For instance, researchers posit that some firms appear to be employing strategies to avoid antitrust scrutiny of their anticompetitive deals, deliberately negotiating and structuring their deals to avoid premerger review (so-called

[14] Contrary to suggestions from some commenters, it is not practical for the Agencies to identify specific illegal transactions that they ''missed'' during their premerger review, nor is the Commission required to establish that as a predicate for invoking its statutory rulemaking authority under the HSR Act. *See Pharm. Rsch. & Mfrs. Am.* v. *FTC,* 790 F.3d 198, 199, 206 (D.C. Cir. 2015) (hereinafter *PhRMA*). Doing so would require a redirection of resources to investigate consummated mergers and away from resources devoted to premerger review. Instead, it is imperative that the Agencies ensure that they have the right information to address deficiencies that have emerged to undermine premerger review as an effective tool for detecting which transactions may violate the nation's antitrust laws.

stealth acquisitions),[15] or identifying acquisition targets at a nascent stage to buy them before they are valuable enough to require premerger review, sometimes solely for the purpose of preempting future competition (so-called ''killer acquisitions'').[16] One researcher concludes that merger enforcement falls by about 90 percent when transactions are not subject to premerger review.[17] Because most mergers are not subjected to premerger review, these strategies have contributed to a rise in aggregate concentration by stimulating mergers between competitors, with attendant negative effects on markups, private investment, and the share of output going toward profits.[18]

These studies support Congress' determination that premerger review is essential to effective enforcement of the antitrust laws and that without effective premerger review, there is inadequate detection of mergers that violate the law and cause harm.[19] While the Agencies can and do challenge acquisitions that are not reported under the HSR Act as well as consummated reported mergers that have caused harm, unwinding an illegal merger post-consummation still requires a significant investment of time and resources, and results in significant harm to market participants until unwound.[20] Even after the Agency succeeds in establishing a law violation, it may be difficult or impossible to restore the premerger state of competition, especially if the parties have commingled, sold, or closed assets, shared confidential information, or terminated key employees.[21] Moreover, the decision to pursue these time-consuming investigations involves opportunity costs, pitting the costs and benefits of challenging a consummated merger against devoting those enforcement resources to investigations into other potential antitrust violations, including investigations that may arise from HSR Filings.

To fulfill the Agencies' mandate to conduct quick yet effective premerger review of reported transactions, the Commission must make the best use of the tools Congress gave the Agencies to detect and prevent harmful acquisitions, including by requiring that the notification contain the documents and information that are necessary and appropriate for screening reportable mergers prior to consummation. Because premerger review is critically important to effective merger enforcement, the information contained in an HSR Filing must be fit for the purpose of determining whether a reported transaction may violate the antitrust laws in light of current market realities. Having the information necessary to make that assessment allows the Agencies to decide when and how to expend public resources to investigate and potentially challenge mergers. The final rule will enable the Agencies to engage in efficient and effective detection of illegal mergers that are subject to the HSR Act and thus is a reasonable exercise of the Commission's rulemaking authority under the HSR Act.

B. The Need for the Final Rule

The purpose of this rulemaking is to modernize the premerger review process in light of changing market dynamics, making adjustments that are necessary and appropriate to allow the Agencies to detect and prevent illegal mergers prior to consummation. The final rule also makes the process more efficient for filers, third parties, and the Agencies, shifting some of the burden of information collection and reporting to the merging parties (and away from third parties) and requiring the information needed for a preliminary antitrust assessment to be contained in the HSR Filing so that the Agencies have the full statutory review period to assess and confirm the information. Overall, the final rule addresses significant information gaps and asymmetries that have grown over time and undermined the Agencies' ability to conduct premerger review. In addition, this rulemaking implements requirements Congress imposed by passing the Merger Modernization Act, which broadened the scope of information the Agencies must collect as part of premerger review, including by requiring the collection of information about subsidies from foreign entities and governments of concern.

Due to changing commercial realities referenced above, the existing requirements for an HSR Filing leave significant gaps in the information available to the Agencies for conducting this assessment. Many of these gaps can be filled by information that the filing parties already have and often use in their own assessment of the transaction. Certain deficiencies in the existing reporting requirements prevent the Agencies from spotting problem areas that would justify a more in-depth investigation or, alternatively, from readily obtaining the facts needed to conclude that the transaction does not merit in-depth review prior to consummation. The rulemaking addresses these problems as well.

Based on the Agencies' extensive experience reviewing HSR Filings, transactions that present certain attributes are more likely to violate the antitrust laws and deserve further investigation. For instance, a merger of two firms that compete (or will soon compete) to provide goods or services to

Trade Comm'n Competition Matters blog (Dec. 18, 2013), *https://www.ftc.gov/enforcement/competition-matters/2013/12/un-consummated-merger.*

[21] Fed. Trade Comm'n, The FTC's Merger Remedies 2006–2012, 18–19 (2017) (report of the Bureaus of Competition and Economics) (less than one-quarter of consummated merger remedies successfully restored competition), *https://www.ftc.gov/system/files/documents/reports/ftcs-merger-remedies-2006-2012-report-bureaus-competition-economics/p143100_ftc_merger_remedies_2006-2012.pdf.*

the same set of customers, or a merger involving a manufacturer and its main distributor that also distributes the products of competing manufacturers, may warrant closer scrutiny. On the other hand, if the Agencies can determine from review of an HSR Filing that a transaction does not present such attributes, the Agencies can more quickly and confidently determine that the transaction does not require a more in-depth review and may proceed to consummation.[22] However, the Agencies cannot make these determinations with confidence in the initial 15- or 30-day waiting period when the HSR Filings lack sufficient information about relevant premerger competitive relationships between the parties. By requiring the submission of such information, the final rule enables effective Agency decision-making during the initial 15- or 30-day waiting period.[23] The intention of the final rule is to make it possible for the Agencies to identify the most concerning transactions for more in-depth review, including through the issuance of Second Requests, and also to more quickly and confidently complete the review of those transactions that do not merit additional investigation and can proceed to closing at the end of the statutory waiting period.

The consequences of inadequate detection are revealed in a recent analysis of hospital mergers that were reported to the Agencies for premerger review co-authored by two economists from the Commission's Bureau of Economics.[24] The paper examined a set of consummated hospital mergers and measured the effect of each merger on prices. The study concluded that mergers not reportable under the HSR Act did not result in larger price increases than reportable mergers. In contrast, the authors found different outcomes among mergers that were subject to premerger review based on how much review the transaction received. Of the mergers reported to the Agencies, the largest average percentage price increase occurred for those mergers that received early termination of the initial waiting period. This suggests that the HSR Filings failed to provide sufficient information to trigger additional investigations that could have blocked these harmful mergers before they were consummated; instead, the filings resulted in early termination of the waiting period. While the study was not designed to test the impact of this rulemaking, the study supports the Commission's belief that there are information deficiencies with the current HSR Rules that prevent the Agencies from identifying mergers that may violate the antitrust laws.[25]

Hundreds of individuals submitted public comments to describe their own experiences in the aftermath of mergers and urge the antitrust agencies to do more to prevent the harmful effects of consolidation, including collecting more information in the HSR Filing. Examples of supportive comments from these individuals include the following:

- I was an employee at a mobile gaming company. . . . We went through acquisition after acquisition, to finally end up in a subsidiary of a big gaming multinational company. . . . There was a hiring freeze, there were layoffs in another subsidiary we had been affiliated with and then a month ago they cancelled our project and laid off all California employees. . . . Before the final acquisition, our company had 2 profitable games and was developing a third. After the acquisition there were harsh [Key Performance Indicators] for the new game and investment was cut back. Had our company been able to resist the wave of subsequent acquisitions, it is likely we would still be employed in a profitable and vibrant company that was able to compete on the marketplace.[26]
- I am a General Partner at a small Venture Capital firm. I support this proposal as I believe it will lead to increased transparency which benefits us all. . . . We are facing an oligopoly/monopoly crisis in this country/the world and it's important we strive for real competition. I believe this proposal will provide the government more information with which it can make sure our industries thrive.[27]
- As a retired person, I have noticed prices going up much more where a small group of suppliers have most of the market share. I see companies using near-monopoly power to stop employees from having unions. The only way the antitrust laws can be adequately enforced, is to insist that anyone proposing a merger provide full accurate information on what they are doing.[28]
- I work as a cybersecurity engineer. Leaving aside the economic concerns of monopolies, I want to bring up the security concerns of allowing unchecked mergers. Haphazard, rushed mergers increase the security risk across companies, as the engineering teams must stitch together the environments for disparate organizations quickly. . . . I look forward to these reporting requirements and I hope they cause companies to slow down and think of the knock-on effects of the mergers beyond the influx of cash and increased market power.[29]
- As an investor and financial advisor, I approve of the changes requiring more disclosure about the nature of mergers. The impacts of industry consolidation are important. . . . A thorough understanding of the purpose of mergers should help ensure that deals are not anti-competitive.[30]
- As a retired CPA and former business professor, I support these proposed changes to the HSR form. The government needs the additional information and greater clarity in order to carry out its responsibility to oversee and evaluate proposed mergers and acquisitions with a view to protecting

[22] Until 2020, the Agencies routinely granted early termination of the initial waiting period for certain transactions that did not warrant further action pursuant to 15 U.S.C. 18a(b)(2). In March 2020, in order to transition filers to an e-filing system that permitted the Agencies to continue to process filings during the COVID–19 pandemic, the Agencies temporarily suspended the discretionary granting of early termination. In February 2021, the Agencies once again suspended the granting of early termination in response to an unprecedented volume of transactions. *See* Press Release, Fed. Trade Comm'n, ''FTC, DOJ Temporarily Suspend Discretionary Practice of Early Termination'' (Feb. 4, 2021), *https://www.ftc.gov/news-events/news/press-releases/2021/02/ftc-doj-temporarily-suspend-discretionary-practice-early-termination*.

[23] The HSR Act provides for a shortened 15-day initial waiting period for reportable acquisitions by means of a cash tender offer or acquisitions subject to certain Federal bankruptcy provisions. 15 U.S.C. 18a(b)(1)(B); 11 U.S.C. 363(b)(2), as amended (1994). For these transactions, the second waiting period is also shorter, 10 days (as compared to 30 days for most transactions) after appropriate certification of substantial compliance with the Second Request. 15 U.S.C. 18a(e)(2). For convenience, this rulemaking refers to the standard 30-day initial waiting period that applies to most transactions even though the Agencies have even less time to review information provided in the HSR Filing for cash tender or certain bankruptcy transactions.

[24] Keith Brand et al., ''In the Shadow of Antitrust Enforcement: Price Effects of Hospital Mergers from 2009–2016,'' 66 J. L. Econ. 639 (2023).

[25] One commenter suggests that this study proves the opposite and provides evidence that the current HSR Form provides Agency staff with sufficient information to identify potentially anticompetitive mergers. *See* Comment of U.S. Chamber of Com., Doc. No. FTC–2023–0040–0684 at 14 n.32. The Commission disagrees with this assessment of the results. Indeed, in their study, the authors suggested that their results should encourage further study of the process of granting early termination to better illuminate why mergers that receive truncated review had higher price effects than those that received a preliminary review but not a Second Request. *See* Brand et al., *supra* note 24, at 663–64.

the common good and promoting competition within and across industries.[31]

• Capitalism can only work with a robust system of competition, and we are lo[]sing that at an ever-increasing rate. I am in an agricultural business. There is virtually no competition for the dollars I spend, and an equal lack of competition for what I produce. This is stunningly true when looked at over the 40 years I have been in business.[32]

• Businesses certainly have a right to pursue mergers and acquisitions as a means of improving their market positions, but the public also has a right to know the ''five W's'' driving these decisions: Who is funding the HSR Action; What are the specifics of the proposed action; When are the HSR Actions taking place; Where are the affected communities/localities; and Why are the stakeholders pursuing the HSR Action (or, what is their business goal)? Another key piece of information that the public has a right to know, is WHO will be affected by the proposed merger or acquisition? The issues at stake here are National Security, fair market competition, supply chain disruptions, and negative impacts on labor markets. . . . I hope the FTC sticks to their plan and implements these common-sense and much needed reporting requirements.[33]

• I am a 25-year veteran in an industry (publishing) that has seen both jobs and innovation suffer due to unchecked consolidation by large players. It is very possible some of this consolidation might have been prevented, or at least steered in a direction that encouraged innovation and growth, if regulators had this kind of information available beforehand.[34]

• I am a private, sole-practitioner entrepreneur with a vested interest in a diversified economic ecology that supports and sustains vibrant, fair competition. . . . From my perspective, the requirements for getting approval for large mergers should include gathering enough information about the companies involved that the FTC can make a best and rational assessment of the effects of the maneuver on the industries, labor markets, consumer pricing, industry trends, trading markets, etc, that they (mergers) will potentially affect.[35]

On the other hand, several commenters stated that the Agencies have not provided any evidence that current information requirements are insufficient, or identified transactions they did not challenge due to shortcomings in the current premerger review process. One commenter suggested that if the Commission intends to expand the information requirements for the HSR Filing, it should lay a stronger legal and evidentiary foundation that would justify its need for the additional information. Another commenter urged the Commission to consider how best to balance the need to determine whether further investigation is warranted against the burden to filing parties.

In response to the comments and to explain further the need for this rulemaking, the Commission discusses below the gaps that exist in current HSR information requirements relating directly to potential violations of the antitrust laws, and identifies the new information requirements in the final rule that will provide a factual basis for the Agencies to determine whether to conduct a more searching review of a transaction based on these concerns. The gaps described below are intended to be illustrative and not exhaustive.

1. Disclosure of Entities and Individuals Within the Acquiring Person

In reviewing a transaction filed under the HSR Act, the Agencies must quickly understand the scope and nature of the buyer's business and business relationships to determine whether the acquisition may harm competition and thus violate the antitrust laws,[36] which include section 7 of the Clayton Act. The scope of section 7 is broad: it prohibits any acquisition whose effect may be substantially to lessen competition or to tend to create a monopoly, including those that result in a small ownership stake.[37] In many acquisitions, the buyer gains control of the acquired entities or assets and directs the decision-making at the combined firm post-merger. In addition, if the buyer has a complex corporate or governance structure, an acquisition can bring together individuals or investors within the buyer that control or influence decision-making at a competitively significant business, such as a competitor of the target[38] of the filed-for transaction.[39] Indeed, holdings of entities within the acquiring person that do not result in control under the HSR Rules nevertheless can result in the ability to influence competitively important decisions of the acquiring entity, and thus affect the analysis of whether the acquisition of the target may harm competition.[40]

The HSR Act states that, unless exempt, no person shall acquire, directly or indirectly, any voting securities or assets of any other person without first filing a notification with the Agencies and waiting for the statutory period to expire.[41] The HSR Rules require notification of the transaction from the entity that, pursuant to the Rules, controls the buyer (or seller), which the Commission has defined as the Ultimate Parent Entity or ''UPE.''[42] But to determine

Mar. 16, 2006) (complaint) (acquisition involving minority stake giving two private equity investors seats on the boards of competitors); *In re Dan L. Duncan,* No. C–4173 (F.T.C. Aug. 18, 2006) (complaint) (acquisition combined general partners of competing energy storage companies under common control). Competition concerns about partial stakes can arise between horizontal competitors; *United States* v. *Dairy Farmers of Am.,* 426 F.3d 850, 860 (6th Cir. 2005), or a supply relationship, *du Pont,* 353 U.S. at 602–604 (23% interest in General Motors, a key supplier, and a shared board member). Section 7 does not apply to buyers making an acquisition solely for the purpose of investment when the buyer does not intend to use its position to bring about or attempt to bring about a substantial lessening of competition. *United States* v. *Tracinda Inv. Corp.,* 477 F. Supp. 1093, 1100 (C.D. Cal. 1979).

[40] *See du Pont,* 353 U.S. at 607 n.36 (finding the influence of du Pont's 23% stock interest to be greater, due to diffusion of remaining shares); *Denver & Rio Grande W. R.R. Co.* v. *United States,* 387 U.S. 485, 504 (1967) (identifying section 7 concerns with a 20% investment). *See also Dairy Farmers of Am., Inc.,* 426 F.3d at 862 (no voting interest but leverage via its position as financier to control or influence competitor's decisions).

[41] 15 U.S.C. 18a(a). Congress rejected a proposal to limit covered acquisitions to those made by corporations, using the term ''person'' instead because the anticompetitive nature of a merger is not dependent upon the legal form of the acquiring entity. 122 Cong. Rec. 30876 (1976).

[42] One of the many initial challenges that the Commission faced in implementing the HSR Act was how to define ''control'' for the purposes of determining reportability of transactions. The Commission immediately understood that no set percentage of ownership dictated whether an individual or entity had functional control of or significant influence over a company, which is

whether the transaction may violate the antitrust laws, the Agencies need to understand the nature of the buyer's holdings pre- and post-merger, as well as the identities of others who have holdings in the buyer and thus may have influence, including possible veto power, over the buyer's decision-making, since that ability affects the evaluation of the competitive effects of the acquisition of the target. Increasingly, this includes individuals and entities with significant management rights that give them a ''seat at the table'' when the buyer is making competitively important decisions.

Today, the mechanisms of influence are not limited to equity stakes; the ability to influence corporate decision-making arises from a variety of interests beyond voting rights.[43] It may arise from sharing key decision-makers, such as executives or members of their respective boards of directors, or from a combination of a significant minority stake and rights to appoint or nominate members of the board.[44] The power of key decision-makers of one competitor to place members on the board of another competitor or veto financial decisions can result in substantial influence over the buyer, and thus the target after the transaction is consummated, rendering an acquisition of a related target potentially illegal under section 7.[45] A merger might also violate the law if it gives individuals and entities of one competitor access to officers, directors, or employees of another competitor.[46] Similarly, the existence of subsidies, among other means, may subject the buyer to additional pressures from individuals or entities not directly a party to the reportable transaction.[47] Beyond voting rights, these interest holders can have similar influence as holders of minority and non-corporate interests.

a. Trends in Private Investment

Understanding the operations of the buyer has become more challenging due to vast changes in M&A activity since the promulgation of the HSR Rules in 1978. One notable recent trend in M&A activity is that the role of private investors, including private equity, has become more pronounced.[48] In the Agencies' experience, these private investors often utilize complicated structures of ownership and managerial control. They also frequently take either majority or minority stakes in many different operating companies (which may have competitively significant relationships) and can exercise significant influence over management and strategic decision-making. In particular, the percentage of equity interest is often not a good indicator of the extent to which investors can direct the strategic decisions of the business.[49] Investors can participate in the management of companies by serving on the company's board, selecting or monitoring the management team, having veto rights, acting as sounding boards for CEOs, or stepping into management roles themselves.[50]

When these private investors take active positions in a wide variety of companies, such holdings can create direct links between competitors or other competitively relevant firms, such as critical suppliers or distributors. Economic research has shown that transactions that lead to cross-ownership of horizontal competitors or other firms in a competitively significant business relationship can create similar incentives and cause similar anticompetitive effects as a full merger.[51] But when these relationships are not well known or easy to identify, the risk that anticompetitive harm from an unlawful acquisition will go

critical to the analysis of the competitive effects of a transaction. In 1976, the Commission originally proposed that ''control'' would include not only ownership of 50% or more of the voting securities of an entity, but also the power to influence through a minority stake. 41 FR 55488, 55490 (Dec. 20, 1976). Commenters objected to such a subjective test for control. *See* 42 FR 39040, 39043 (Aug. 1, 1977). So, the Commission proposed to include the contractual power to designate a majority of the directors or trustees of an entity. *Id.* This proposal was also criticized for being overly broad and subjective. In the end, in setting up the premerger notification program, the Commission adopted the simple 50% or more threshold for control to give prospective filers certainty as to their reporting obligations. But in doing so, the Commission did not dismiss the significance of understanding who has actual or working control of the filing parties. 43 FR 33450, 33457–58 (July 31, 1978). This definition limited the number of transactions subject to the filing requirements of the HSR Act, but the Commission did not minimize the importance of examining who may have significant influence over the acquiring person while assessing antitrust risk arising from the transaction.

[43] Gabriel V. Rauterberg, ''The Separation of Voting and Control: The Role of Contract in Corporate Governance,'' 38 Yale J. Reg. 1124, 1148–54 (2021) (documenting trend of public companies being subject to stockholder agreements that provide various species of control rights to favored investors); Jill E. Fisch, ''Stealth Governance: Shareholder Agreements and Private Ordering,'' 99 Wash. U. L. Rev. 913, 930–33, 946–53 (2021) (discussing similar trend in private companies).

[44] *E.g., United States* v. *U.S. West, Inc.,* No. 96–002529, 1997 WL 269482 (D.D.C. Feb. 28, 1997) (acquired firm had 20% stake plus board seats in a competitor of acquiring firm).

[45] *E.g., United States* v. *Univision Commc'ns., Inc.,* No. 1:03–cv–00758, 2003 WL 23192527 (D.D.C. Dec. 22, 2003) (buyer held substantial equity stake plus ability to influence certain strategic decisions through issuance of equity or debt or veto of future acquisitions). *See also Dairy Farmers of Am.,* 426 F.3d at 862 (buyer had influence due to role as financier, so that acquired firm is ''locked in'' to a relationship with the buyer, which could lead to anticompetitive effects).

[46] *E.g., In re Time Warner Inc.,* No. C–3709 (F.T.C. Sept. 12, 1996) (analysis to aid public comment) (walling off two individuals and one entity to prevent them from influencing officer, directors, and employees of competitor and its day-to-day operations).

[47] As discussed elsewhere, Congress has directed the Commission to require the reporting of subsidies received from foreign countries or foreign entities of concern due to concerns that these entanglements can distort the competitive process by enabling the subsidized firm to submit a bid higher than other firms in the market, or otherwise change the incentives of the firm in ways that undermine competition following an acquisition. Merger Filing Fee Modernization Act of 2022, 15 U.S.C. 18b. Congress also enacted the Foreign Investment Risk Review Modernization Act of 2018 (FIRRMA) to expand the jurisdiction of the Committee on Foreign Investment in the United States (CFIUS) over certain non-controlling investments and real estate transactions involving foreign persons that may be a threat to national security. Public Law 115–232, 132 Stat. 2173, Title XVII, Subtitle A (2018). For certain foreign investments in U.S. businesses operating critical technologies or infrastructure, or that collect sensitive personal data of U.S. citizens, FIRRMA regulations require notification of non-controlling investments, direct or indirect, that afford the foreign investor (1) access to material non-public technical information; (2) membership or observer rights on the board directors (or similar) or the right to nominate an individual to that board; or (3) any involvement, other than through voting of shares, in substantive decision-making of the U.S. business. 31 CFR 800.211. Such relationships are deemed a non-controlling interest in a U.S. business that afford a foreign investor access to information or involvement in substantive decision-making. *See* 85 FR 3112 (Jan. 17, 2020).

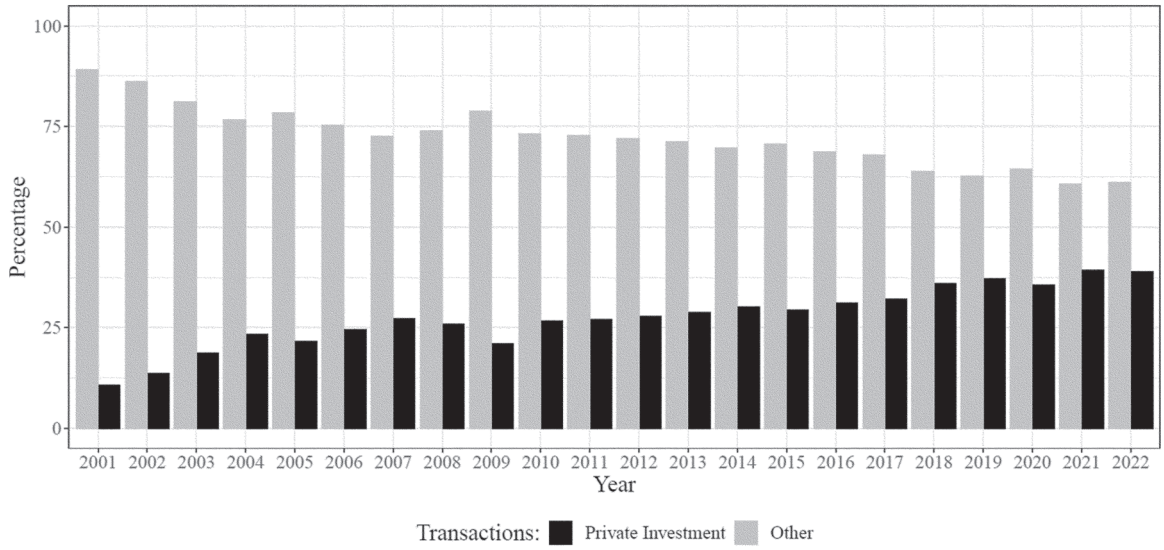
undetected is greatly increased.[52] This includes the risk of collusive [53] or coordinated behavior,[54] or the risk that cross-ownership of the combined firm will lead to foreclosure of rivals.[55]

The increasing role of private capital is reflected in the shifting mix of reportable transactions. Using data from the Agencies' Annual HSR Reports for the past 20 years, Figure 2 shows that the number of transactions for which the name of the Ultimate Parent Entity of the acquiring person included ''fund'' or some variation of ''L.P.'' has increased from approximately ten percent to nearly 40 percent of all reportable transactions.[56] The acquiring person for these transactions can be shell companies that have been created by an investment group in order to make a particular acquisition, or an entity that owns a variety of other operating entities (often referred to as ''portfolio companies''). In either scenario, the entity is part of the structure of a larger investment company or group.

Figure 2: Acquisitions Involving Funds and Limited Partnerships



Note: Private Investment refers to the percentage of HSR Reportable Transactions with "Fund" or variation of "L.P." in the name of the UPE of the acquiring person.

Since the beginning of the premerger program, the Commission has required filers to report certain entities that hold minority interests in the filing parties to alert the Agencies to situations in which the potential antitrust impact of the reported transaction does not result solely or directly from the acquisition, but may arise from direct or indirect shareholder relationships between the parties to the transaction.[57] As explained in the NPRM, reporting requirements regarding the identification of certain minority holders of the filing persons have been adjusted over time to reflect market realities, including changes in investment activity and the growing role of these intermediaries.[58] Nonetheless, changes in the investment landscape discussed above have created meaningful gaps in the reporting requirements for a growing number and type of minority holders that have the ability to influence competitive decision-making and to harm competition via acquisitions that violate the antitrust laws.

b. Corporate Structure Changes

Several commenters supported the need for additional information that would identify entities holding minority

[56] *See* Fed. Trade Comm'n & U.S. Dep't of Justice, Hart-Scott-Rodino Annual Report, Fiscal Year 2010 appendix A (FY 2010) (reporting Adjusted Transactions in which a Second Request could have been issued from years 2001–2010); Fed. Trade Comm'n & U.S. Dep't of Justice, Hart-Scott-Rodino Annual Report, Fiscal Year 2013 appendix A (FY 2013) (reporting Adjusted Transactions in which a Second Request could have been issued from years 2004–2013); Fed. Trade Comm'n & U.S. Dep't of Justice, Hart-Scott-Rodino Annual Report, Fiscal Year 2022 appendix A (FY 2022) (reporting Adjusted Transactions in which a Second Request could have been issued from years 2013–2022). *See also* Fed. Trade Comm'n Annual Reports to Congress Pursuant to the Hart-Scott-Rodino Antitrust Improvements Act of 1976, *https://www.ftc.gov/policy/reports/annual-competition-reports* (collecting reports). The Total Number of Adjusted Transactions omits from the total number of transactions reported all transactions for which the agencies were not authorized to request additional information. These include (1) incomplete transactions (only one party filed a complete notification); (2) transactions reported pursuant to the exemption provisions of sections 7A(c)(6) and 7A(c)(8) of the Act; (3) transactions which were found to be non-reportable; and (4) transactions withdrawn before the waiting period began. In addition, where a party filed more than one notification in the same year to acquire voting securities of the same corporation, *e.g.,* filing for one threshold and later filing for a higher threshold, only a single consolidated transaction has been counted because as a practical matter the agencies do not issue more than one Second Request in such a case. These statistics also omit from the total number of transactions reported secondary acquisitions filed pursuant to § 801.4 of the Premerger Notification rules. Secondary acquisitions have been deducted in order to be consistent with the statistics presented in most of the prior annual reports.

[57] 43 FR 33450, 33531 (July 31, 1978).

[58] NPRM at 42188.

positions. One commenter stated that investors have shifted strategies since the 1980s, when portfolios consisted of unrelated companies and investors mainly focused on optimizing capital structures and improving corporate governance.[59] Another commenter stated that without a full picture of the entire corporate structure of the merging parties, it can be difficult or impossible to untangle or understand the potential anticompetitive impacts of a transaction. Several commenters supported the need to adjust information requirements to have a broader view that reflects how firms are organized today. One commenter supported the collection of more comprehensive information related to the merging entities, arguing that a more holistic and systems-level approach would examine the networks of firms involved in a market, which could expose companies that can operate as bottlenecks or supply key resources to other market participants. A group of State antitrust enforcers supported the collection of more information related to corporate control or the degree of financial interest so the Agencies can quickly assess how the resulting ownership structure may change the parties' incentives to compete, enhance the acquirer's ability to influence decision-making through changes in voting interests or governance rights, or facilitate the sharing of competitively sensitive information between rivals.

Another development that has caused the Commission to reassess its rules is that the particular corporate structure of an entity is now less indicative of its market behavior, and thus distinctions made on that basis may no longer be sound. The decision to form as a corporation, limited liability company, or limited partnership is often influenced more by risk, liability, and tax considerations than by the entity's business operations. Now more than ever, distinctions made based on corporate form have little impact on an assessment of whether and how firms compete. Moreover, corporate governance literature highlights the changing nature of decision-making within even standard organizational structures, such as corporations. Corporate law provides sufficient flexibility to alter traditional roles, including the rights of shareholders and the scope of director liability, by contract[60] or through modification of bylaws or certificates of incorporation.[61] The rise of shareholder agreements—private contracts by and among shareholders—has affected who has the ability to direct decisions of the company, separating voting and control, especially for those given veto rights via contract.[62] These forms of 'stealth governance' have implications for how decisions are made within the firm, making it difficult for investors to know who is exercising control within the company.[63]

After careful consideration of these points and others raised by commenters, the Commission has determined that the requirements of the current Form and Instructions have not kept pace with market realities and the accompanying changes in ownership structures. In light of these shifts in corporate formation and governance, the current requirements do not provide the Agencies with sufficient information that allow them to understand how decisions are made at the respective companies, let alone whether the acquiring person may have competitively relevant premerger entanglements with the target's industry and minority holders that may have significant rights to direct the acquiring entity's actions.

To keep pace with prior changes in corporate form, the Commission has adjusted the disclosure requirements for minority investors over time and in light of its experience reviewing thousands of filings each year, balancing the need to surface competitively relevant relationships without burdening filers to provide information that would not change the Agencies' premerger screening decisions. Under the current rules, it has become increasingly difficult to screen transactions because deal structures often have minority investors with significant rights that are not disclosed. See Figures 4 through 8 below, section VI.D.1.d.ii. This includes situations where an investor group is, for practical purposes, making the acquisition (or otherwise significantly involved), but the HSR Filing does not alert the Agencies to their role in the acquisition. These relationships are not currently disclosed if the minority investment is not in the UPE or acquiring entity, but rather in an entity (often a shell entity) that sits between these two in the structure of the acquiring person. Even if the minority investment is made in the UPE, if the UPE is an LP, only the name of the general partner is disclosed. For situations where the current information on the HSR Filing is unrelated to the public-facing name of the entity that controls the acquiring person, the HSR Filing does not alert the Agencies to the premerger relationships that exist solely due to that investor's relationship with and role in the buyer.[64]

To close this information gap, the Commission has determined that the Agencies need additional information about entities in between the UPE and the acquiring entity. If any of these entities or individuals has a minority stake or other rights that give them the ability to influence decision-making post-merger, then they are functionally ''in the deal'' and their existing business relationships are relevant to a thorough premerger antitrust assessment of the transaction. As explained in more detail in section VI.D.1.d.ii.a., this information was required of all corporate entities within the acquiring person prior to a rule change in 2011 that limited the requirement in order to exclude entities not related to the transaction. However, as transaction structures have become more complex, application of the 2011 change has eliminated the requirement to provide information about minority entities that are related to the acquiring entity. The final rule addresses this gap in information so that the Agencies can identify existing relationships among individuals and entities that have interests in (1) the acquiring entity (and any entities it controls or are controlled by it) and (2) other entities within the UPE that have competitive relationships

[59] *See also* Aslihan Asil et al., ''Misaligned Measures of Control: Private Equity's Antitrust Loophole,'' 18 Va. L. & Bus. Rev. 51 (2023). Asil et al. argue that the complicated structure of ownership in the typical private equity acquisition may make some anticompetitive deals technically non-reportable under the HSR act, because the investment structure under-represents the proportion of control actually conferred by the transaction. *Id.* at 53.

Rev. 913, 947 (2021) (One investor's capacity to monitor may be limited by an agreement to support director candidates chosen by another investor, or an ownership structure that appears to involve shared power may be undermined by the contractual formation of a control group).

[64] For example, a fund that operates as Alpha Capital Partners could create an entity named 123ABC, LP to effectuate an acquisition. 123ABC, LP could be its own UPE because Alpha Fund I and Alpha Fund II each hold 49.9% of the 123ABC, LP, with the general partner, 123ABC GP, LP, holding 0.2%. Currently, the Form only requires 123ABC, LP to disclose that 123ABC GP, LP is its general partner. The issue is compounded if Alpha Capital Partners is co-investing with Beta Capital Partners and 123ABC, LP is held 49.9% by Alpha and 49.9% by Beta (or if Beta invests in an entity that is not the UPE or acquiring entity). Disclosure of these relationships are not currently required.

with the target. These minority holders are competitively relevant because they may have the ability to influence decision-making and operations of the target post-merger [65] but it is difficult for the Agencies to detect these relationships based on information available the current Form.

As discussed below in section VI.D.1.d. and VI.D.3.c., the final rule requires additional information for Minority Shareholders or Interest Holders as well as Officers and Directors from the acquiring person. Information about other individuals or entities holding a minority position or rights to serve or appoint members of the governing board will fill an existing gap that has created a blind spot for the Agencies that prevents a thorough premerger screening, especially for transactions involving complex corporate structures and investment vehicles. This information is most relevant from the entity that will be making decisions post-consummation, and so the final rule does not seek this information from the seller, other than the identification of minority interest holders that will ''roll over'' their investments post-consummation.[66] This information is necessary to identify additional areas of competitive concern created by minority stakeholders or other influential decision-makers (*i.e.,* officers and directors) that may have a relationship with entities related to the target of the acquisition.

However, in light of concerns raised by commenters about the burden and relevancy of providing this information with respect to limited partners, the Commission has modified these requirements to focus only on those limited partners that also have management rights, such as the right to appoint members to the board. Moreover, the final rule does not adopt certain proposed requirements to identify board observers, or creditors, holders of non-voting securities, or entities with management agreements. The Commission has determined not to require this information at this time but will continue to monitor market activity as it implements the final rule.

Similarly, new document requirements contained in the final rule are aimed at providing a more in-depth understanding of the motivation and purpose of the transaction, and how the combined company will be operated post-consummation. In particular, additional transaction-related documents will provide a more complete picture of the buyer's reason for pursuing the transaction, and for companies with complex investment structures, these documents may reveal whether there are other individuals or entities who will be participating in competitive decisions post-merger. The final rule also requires a small set of business plans and reports shared at the highest level of management that discuss market shares, competition, competitors, or markets of any product or service that is provided by both the acquiring person and acquired entity. Together, these documents may reveal whether there are significant investors in either party that also have investments in businesses that compete with the target or if there are any other planned investments in competitively relevant businesses, such as competitors or suppliers, that would impact the Agencies' assessment of whether the transaction may violate the antitrust laws.

2. Identifying Potential Labor Market Effects

The Clayton Act's prohibition on acquisitions that may substantially lessen competition or tend to create a monopoly applies to acquisitions that have these effects on competition to purchase inputs that firms use to produce goods and services just as it does to acquisitions that threaten competition in downstream markets for goods and services themselves,[67] and the antitrust laws protect competition in markets for labor services.[68] As evidence of decreasing competition for labor continues to mount,[69] the Agencies have increasingly recognized the importance of evaluating the effect of mergers and acquisitions on labor markets and have stepped up efforts to identify and investigate potential labor market effects arising from reportable transactions. The Agencies have challenged a few transactions that may result in labor market harms,[70] and consent agreements have included provisions that stop the use of certain non-compete clauses that limit the ability of potential market entrants to hire key employees.[71]

As stated in the NPRM, current notification requirements under the HSR Act do not require any specific information about employees. And yet virtually every firm competes for labor in at least one labor market and, more commonly, in multiple labor markets, and transactions that involve two firms

[65] *See United States* v. *Dairy Farmers of Am., Inc.,* 426 F.3d 850, 860 (6th Cir. 2005) (district court erred in focusing on control which ignored the possibility that there may be a mechanism that causes anticompetitive behavior other than control, such as leveraging position as financier).

[66] In many transactions, the acquired firm ceases to exist post-consummation. Even when some entity continues to generate revenues, possibly in competition with some aspects of the buyer's business, the Commission has determined to collect additional information about entities within the UPE only from the acquiring person at this time.

[67] *See United States* v. *Bertlesmann SE & Co.,* 646 F.Supp.3d 1 (D.D.C. 2022) (violation of section 7 where merger likely to substantially lessen competition in market for publishing rights to anticipated top-selling books due to harm to targeted sellers—authors of top-selling books); *Boardman* v. *Pac. Seafood Grp.,* 822 F.3d 1011, 1022 (9th Cir. 2016) (acquisition may violate section 7 by substantially lessening competition in multiple seafood input markets). *See also Mandeville Island Farms, Inc.,* v. *Am. that purchase labor from the same labor market(s) may substantially lessen competition between employers for labor services. Merging parties may compete in the same labor market even when they do not compete in the same product market.

The Commission received hundreds of comments from individuals, many of whom are in the entertainment industry, who supported the need for the Agencies to conduct a robust search for potential labor market effects before the acquisition is consummated. Several dozen recounted the effects that prior mergers have had on them. Examples of comments supportive of reviewing transactions for labor market effects include the following:

- I'm a working TV writer at the beginning of my career. I'm afraid for the future—the consolidation of the media companies in this town and their vertical integration has made things so much harder and less competitive, even in the time that I've been in LA and worked within the system. Now that there are so few ''shops'' in town, salaries are depressed and it's become incredibly difficult to not only demand fair pay, but treatment as well. They know that they don't have to negotiate or budge on whatever terms they set because there are increasingly few alternatives to them.[72]
- My background includes Strategy consulting for major transnational Mergers. I think the new rules are very good as they demand greater clarity from the firms before the transaction starts. I have seen a lot of waste and backtracking as executives struggle between their ego and the analytics that do not tell them the story that they want about why the transaction will succeed. And the new labor and financing provisions offer much needed transparency—layoffs are a knee jerk habit and are not really helpful for the firm or the industry.[73]
- Please collect data on labor markets. I've been affected by the monopolies in the entertainment industry and likely will lose my livelihood as well as that of my staff due to unchecked mergers within the next month. After starting a successful business 23 years ago, it's heartbreaking to lose it and will be costly to our economy as more and more of us lose our businesses due to these unchecked mergers and the power they wield to save them money.[74]
- I work in a small accounting firm and I have seen the effects of mergers on consumer satisfaction and worker wellbeing personally. . . . [M]any of the job-searching or hiring firms we'd contract with to seek additional workers are worried about raising the ire of the large firm in the region, as it comprises so much of their client base now[.] . . . As a result, we're forced to go with larger, national firms for hiring, and become part of the problem of sectoral concentration.[75]
- As a lifelong union member I also believe the requirement for detailing merger effects on workers and unions to be a vital necessity. Those of us outside the C suites, boardrooms and stockholder meetings are stakeholders too, and our livelihoods and well being should be considerations.[76]
- I personally know many folks in entertainment (writers, crew, actors, etc.) who have had such a difficult time surviving in Hollywood that they've simply had to quit or move home. And, frankly, folks who specifically represent cultures that are least visible in society are often the first to go—because they don't necessarily have the resources or didn't face as many obstacles as other artists. It's a terrible cycle, magnified greatly by vertical mergers.[77]

Numerous commenters, including State antitrust enforcers and members of Congress, expressed general support for an increasing focus on labor market competition in merger analysis and requiring additional labor market information in the Form to screen for such issues. Some commenters highlighted potential efficiencies in the merger review process from providing the Agencies with labor market information in the earlier stages of review, including a more uniform process that could result in the termination of more merger reviews within the 30-day waiting period and a more efficient use of Agency resources where no labor market issues exist.

The Commission disagrees with a commenter who stated that the analysis under the Clayton Act requires consideration of competition issues, but not labor. Antitrust law, including the Clayton Act, has always been concerned with workers and labor markets.[78] As noted by the State antitrust enforcers, in the congressional debates on the Clayton Act in 1914, legislators expressed concerns regarding the monopsonist's power to dictate to its labor the wage it will pay for the only commodity labor has to sell.[79] As recently as 2021, a unanimous Supreme Court in *NCAA* v. *Alston* affirmed that the antitrust laws are designed to prevent harm to competition in labor markets.[80] As noted in the concurring opinion: ''Price-fixing labor is price-fixing labor. And price-fixing labor is ordinarily a textbook antitrust problem because it extinguishes the free market in which individuals can otherwise obtain fair compensation for their work.'' [81] And there is bipartisan agreement among current Federal enforcers and their predecessors that the Agencies are empowered to enforce the Clayton Act to prevent competitive harms in labor markets caused by mergers.[82] Moreover, recent empirical work demonstrates the impact that mergers have on competition in labor markets.[83]

One commenter stated that requiring merging parties to provide labor and employment information is at odds with the consumer welfare standard. This is not correct. Judge Easterbrook, writing for the Seventh Circuit, recently rejected an employer's argument that restrictions on the movement of employees could be justified because it expanded the output of consumer products: ''One problem with this approach is that it treats benefits to consumers (increased output) as justifying detriments to workers (monopsony pricing). That's not right; it

is equivalent to saying that antitrust is unconcerned with competition in the markets for inputs, and *Alston* establishes otherwise.'' [84] There is a clear consensus that the consumer welfare standard is sufficiently flexible to encompass antitrust enforcement to prevent competitive harms to labor markets.[85] Because section 7 reaches these concerns, it is appropriate for the Agencies to collect information to determine if the transaction may violate the antitrust laws by substantially lessening competition in any market for labor. The fact that the Commission has not previously required this information to be reported in HSR filings does not mean that the information is not necessary and appropriate to enable the Agencies to determine whether an acquisition, if consummated, may violate the antitrust laws. While not every negative impact on workers reflects a harm to competition, growing evidence about the potential for mergers to cause harm in input markets for labor in violation of the antitrust laws shows that the Agencies have a sound basis to review transactions for potential competitive impacts on labor markets.

As discussed below in section VI.I.3., the final rule does not require filers to submit specific information about their employees as suggested in the proposed rule. Instead, the Agencies will rely on other information and documentary materials required in the final rule to conduct a preliminary assessment of whether the transaction may violate the antitrust laws with respect to any affected labor market. The Agencies have been gaining experience analyzing information about employees during ongoing merger reviews and other investigations of conduct that may harm competition for workers, and the Commission relies on this experience to determine which documents and information have been most useful in identifying those transactions that warrant an in-depth review of potential labor market effects through the issuance of Second Requests.

As discussed below in section VI.I.3., the Commission will rely on information contained in the new Overlap and Supply Relationships Descriptions, as well as additional documents required by the final rule to conduct a preliminary assessment of potential labor market effects. In the Agencies' experience, those transactions that are flagged for closer review due to concerns about effects in output markets may also require a closer look at potential impacts in input markets, including labor markets. Because the final rule will allow the Agencies to conduct a more robust screening for potential effects in output markets, it will also permit more robust screening for potential effects in input markets, including those related to labor services. In addition, the final rule requires the submission of certain plans and reports shared at the highest level of management that discuss market shares, competition, competitors, or markets of any product or service that is provided by both the acquiring person and acquired entity. These documents may also indicate whether the parties view themselves as employing similar categories of employees or competing for certain types of labor services. As a result, the final rule will enhance the Agencies' ability to conduct a premerger assessment to determine if the transaction may violate the antitrust laws with respect to competition for labor. Although the Commission has determined not to require specific information about workers or workplace safety information in the HSR Filing at this time, as the Agencies acquire more experience with conducting competition analyses of labor markets, the Commission may revisit the issue in future rulemakings.

3. Identifying Acquisitions That Create a Risk of Foreclosure

Mergers between firms that are not direct competitors can still violate the antitrust laws. As stated in the NPRM, an acquisition may violate the law if it creates opportunities for post-merger foreclosure of rivals arising from vertical or non-horizontal relationships.[86] The nature and scope of potential non-horizontal competitive concerns can often be complex and unique. To fully account for all the ways in which a proposed transaction may violate the antitrust laws, the Agencies need information to determine whether there are any existing or emerging business relationships between the merging parties that would allow the merged firm to limit access to products or services that its rivals use to compete, referred to as ''foreclosure.'' [87] Current information requirements in the Rules do not reveal these existing relationships, which are well known to the parties. Even more than in horizontal mergers, which require an assessment of whether the merger may eliminate existing competition between rivals whose products are viewed as substitutes, non-horizontal concerns arise from distinct facts and industry structure that are not readily available to the Agencies from other sources.

Various commenters, including members of Congress, supported new information requirements targeting non-horizontal competitive issues. A comment from State antitrust enforcers underscored the concern about foreclosure, noting that because mergers may change the firms' incentives or ability to disadvantage or eliminate rivals at one or more levels of their supply chains, one of the anticompetitive harms that may result from a merger—particularly non-horizontal mergers—is the risk of foreclosure. The comments from a farmer-led advocacy organization warned that dominant firms have expanded across product markets—primarily through product-extension and conglomerate mergers—to insulate against cross-industry competition or to develop product-tying and other capacities for entrenchment and exclusion.

Other commenters maintained that vertical merger challenges are uncommon and that antitrust precedent does not sufficiently support non-horizontal theories of competitive harm to warrant the new information requirements. For example, commenters stated that the Agencies challenge very few vertical transactions, and the courts generally have not been receptive to those challenges. One commenter stated that an assessment of potential future competitors goes well beyond what is typically relevant because non-horizontal theories of harm are rare under section 7. The same commenter reasoned that when challenging a vertical merger the antitrust agency must prove that one party has substantial market power and that information regarding the vendor-vendee relationship is not required to assess this threshold question. A tech industry trade association stated that

[87] *See Illumina, Inc.* v. *FTC,* 88 F.4th 1036, 1055 (5th Cir. 2023) (violation of section 7 where merger will result in the potential foreclosure of key input by the sole supplier). *See also Ford Motor Co.* v. *United States,* 405 U.S. 562 (1972).

most vertical mergers promote competition, so filers should not need to answer detailed questions about vertical relationships.

While in the past non-horizontal challenges were less common than those involving direct competitors, in recent years the Agencies have brought a significant number of non-horizontal merger enforcement actions that have resulted in merger abandonment and ordered divestitures,[88] and other mergers were abandoned or restructured prior to legal action.[89] The Commission also disagrees that potential harm from foreclosure is uncommon or does not warrant robust scrutiny. Empirical economic studies of vertical mergers find no basis to assume that they are either procompetitive or anticompetitive in general. Instead, each transaction must be examined on its facts and in the context of the markets served by the merging parties. A review of twenty-nine recent studies of vertical integration reports that fourteen studies found some evidence of competitive harm, while fourteen found some evidence of benefits.[90] The same review also evaluated two frequently cited surveys of vertical integration and found that the subjects and methods used limit any conclusions that can be drawn for antitrust policy purposes.[91]

The Agencies have an obligation to screen transactions for non-horizontal effects, including the risk of post-merger foreclosure, because the law clearly requires it. In 1950, Congress amended section 7 of the Clayton Act to expressly reach non-horizontal transactions to combat ''the rising tide of economic concentration . . . [providing] authority for arresting mergers at a time when the trend to a lessening of competition in a line of commerce was still in its incipiency.'' [92] The Supreme Court subsequently set forth frameworks for analyzing vertical [93] and other non-horizontal [94] mergers to address concerns about foreclosure.[95] Relying on these precedents, the Agencies bring enforcement actions against transactions that create a risk that the merger will create a firm that may limit access to products or services rivals use to compete.[96] Several of these enforcement actions resulted in the parties abandoning their merger plans in the face of litigation. Just recently, the U.S. Court of Appeals for the Fifth Circuit upheld the Commission's finding that Complaint Counsel carried their initial burden of showing that Illumina's acquisition of Grail was likely to substantially lessen competition in the U.S. market for research and development of multi-cancer early detection tests and that Illumina failed to establish cognizable efficiencies.[97] The decision is significant for its application of vertical theories of harm, as well as its inclusion of products in the relevant market based on precommercial activity.

In the Agencies' experience, it can be difficult to detect whether current or potential rivals of one merging party are dependent on the other merging party for a key product, service, or route to market necessary to compete. The Agencies currently do not receive sufficient information in the HSR Filing to identify candidate ''related products'' nor to assess the degree to which rivals may be dependent on the related product.[98] Accordingly, the Agencies are not well positioned to conduct a robust initial screen for this significant mechanism of competitive harm. Being able to quickly assess whether the transaction presents a risk of foreclosure would permit the Agencies to target their investigative resources most efficiently on those transactions that are most likely to raise this competitive concern.

As discussed in more detail below, the Commission has determined that information that reveals existing supply relationships between the merging parties or their rivals is necessary to fully account for the potential that the transaction may create a firm that could limit rivals' access to key products or services they need to compete in violation of the antitrust laws. The Commission previously required information about vendor-vendee relationships, but eliminated this requirement when the reported information did not provide a sufficient basis for that analysis such that the benefit to the Agencies did not outweigh the burden of providing it.[99] The Supply Relationships Description in the final rule requires information that is specifically targeted to identifying whether rivals may be dependent on the merged firm for key inputs post-merger. Thus, the information is more relevant to the Agencies' screening for such risks than prior vendor-vendee information.

Additionally, the final rule also contains new document requirements that are intended to reveal any existing or future non-horizontal business relationships that could give rise to risks from foreclosure of rivals. For example, the buyer must indicate whether it has existing contracts with the seller in broad categories that are relevant to an initial antitrust assessment, such as leases, licensing agreements, master service agreements, operating agreements or supply agreements, or

any noncompete or non-solicitation agreements that might be affecting current levels of competition. Filers with an existing business relationship also will submit one year's worth of plans and reports provided to a Chief Executive Officer or the Board of Directors that analyze markets and competition pertaining to any product or service both parties supply (including products or services in development). Based on the Agencies' experience, these types of high-level business documents can reveal whether and how the parties interact in the market today to understand how the merger may affect market conditions more broadly, including any risk of foreclosure that could harm other market participants as well as competition overall. Finally, the expanded set of transaction-related documents ensure that the Agencies receive key documents that have been collected for the purposes of the deal but have not yet been shared with the board of directors. In the Agencies' experience, when there is an existing non-horizontal business relationship between the parties, these documents often reference that relationship and how it might be affected by the transaction, including whether the parties believe that there are synergies or efficiencies that may be gained.

4. Identifying Potential Law Violations Involving Innovation Effects, Future Market Entry, or Nascent Competitive Threats

In markets where concentration is already great or trending in that direction, a merger may be illegal if it eliminates ongoing innovation efforts or the possibility that entry or expansion by one or both firms would have resulted in new or increased competition.[100] Relatedly, the acquisition of a firm that represents a nascent competitive threat—namely, a firm that could grow into a significant rival, facilitate other rivals' growth, or otherwise spur more robust competition in the future—may violate the antitrust laws.[101] Concerns that a transaction may violate the antitrust laws by reducing innovation efforts [102] or eliminating a future competitor [103] are core to section 7's purpose to arrest the anticompetitive effects of market power in their incipiency. Established incumbents may seek to acquire a potential entrant or a nascent competitive threat in order to eliminate beneficial future competition, especially at critical junctures when the acquired firm is poised to introduce a disruptive product.[104]

As noted in the NPRM, there has been tremendous growth in sectors of the economy that rely on technology, such as pharmaceutical, medical device, and digital markets. Given the dynamic nature of these markets and the importance of acquisition strategies to success as well as market growth and penetration, mergers and acquisitions in these markets present a unique challenge for the Agencies. In particular, the Agencies must closely examine mergers in these and other rapidly evolving markets to account for the possibility that the merger may violate the antitrust laws by eliminating a nascent competitor or potential entrant, including the acquisition's effects on ongoing innovation competition.[105]

Competition policy debates in Congress have increasingly focused on markets that lack sufficient competition, especially in critical technology sectors.[106] Concerns about the role of certain dominant companies have caused the Agencies to deploy additional resources to counter the economic power of these firms, including through costly and resource-intensive monopolization suits, some of which focus on the harmful effects of their prior acquisitions.[107] Both Agencies have hired technologists and other experts to build their in-house capacity to keep pace with developments in dynamic markets that are reliant on emerging technology.[108] The Agencies have also invested in better understanding how dominant firms can use strategic acquisitions as part of an interrelated course of monopolistic conduct. For example, the Agencies have brought challenges alleging that firms have engaged in ''buy-or-bury'' strategies against actual or potential rivals.[109] The Agencies have also alleged that firms have attempted to buy or exercise control of adjacent products or services that might be used to steer customers to their other products or exclude competing platforms.[110] These strategies can be very hard to detect because merger activity in these sectors increasingly involves firms in business lines that currently may not be related in a clearly horizontal or vertical way. Without information that identifies products in development and the firms' assessments of where potential competitive threats are likely to emerge in the future, the Agencies have no basis to identify whether a transaction may eliminate ongoing innovation competition, a potential entrant, or a nascent competitive threat.[111]

When transactions involve firms whose premerger relationship is not yet well established in the marketplace and is occurring outside the public eye through ongoing product development efforts, the Agencies cannot rely on the reporting of current overlapping revenues to spot transactions that may

eliminate areas of emerging or potential competition.[112] The Agencies need a reliable factual basis for identifying transactions that create this risk, which is not provided in the current Form. For instance, the Agencies need information about products in development that are not currently generating revenues, but that the filer expects will soon. Because legal precedent makes clear that a merger that substantially lessens competition for innovation or research and development violates the law,[113] the Agencies need information that will identify areas of pre-revenue investments and competition. The Agencies also need information that reveals the rationale for the transaction, including whether the acquired firm is considered a nascent competitive threat, and documents that reflect each firm's horizon-scanning for potential acquisition targets. This information is known only to the parties and is relevant to an initial assessment of whether the transaction may violate the antitrust laws by eliminating a potential entrant or nascent competitive threat.

Failure to account for the merger's potential impact on ongoing innovation competition can have meaningful implications. Consumers and businesses reap enormous benefits from the efficiency and convenience brought about by significant innovations. According to Nobel Prize winner Robert Solow: ''Technological progress, very broadly defined to include improvements in the human factor, was necessary to allow long-run growth in real wages and the standard of living.'' [114] Courts, academic literature and commenters confirm the importance of innovation to growth in the economy and as a source of dynamism that can shake loose entrenched incumbents.[115] Acquisitions of innovator firms may also deny the public the benefits of those investments in innovation, including any future competition those investments may have unleashed, if the acquirer does not make use of the discoveries [116] or is able to crowd out nascent competitors by foreclosing access to a key input.[117] The stakes are also high for innovators: startups may find fewer investors and lower acquisition prices in sectors where the expectation is that incumbents will ultimately identify and acquire any promising innovation.[118]

Comments from State antitrust enforcers supported proposals seeking materials and information regarding potential or nascent entrants. However, other commenters stated that the HSR Filing is not an appropriate vehicle for advancing novel legal theories such as nascent competition or research and development competition, and any related revisions should be postponed until those theories are better established in case law.

The Commission disagrees with commenters who suggested that concerns about innovation competition, potential entrants, and nascent threats are not well-grounded in existing law and economic learning. The importance of scrutinizing mergers for potential effects on innovation is well-documented.[119] Economic evidence supports current legal precedent. Research demonstrates a growing phenomenon of dominant firms—buoyed by acquisitions—taking over industries.[120] This is particularly true in the tech industry, where the markets in which digital platforms compete share several characteristics that tend toward a single dominant firm.[121] Sustained high economic profits suggest that dominant firms in these concentrated sectors possess substantial and durable market power.[122] In addition, insufficient competition and entry result in harms to investment and innovation.[123] For these reasons, economic research supports the current legal framework, and reflects the need to carefully scrutinize proposed transactions involving a dominant incumbent or monopolist seeking to acquire a nascent threat or adjacent complement that could someday challenge the incumbent's position.[124]

Going back many years, the Agencies have successfully challenged several mergers that would have eliminated a potential entrant or nascent competitive threat. These enforcement actions include the acquisition of a pipeline firm or product that, once launched, would compete directly with the incumbent merging party,[125] as well as the acquisition of a firm with products already on the market that, although small, was poised to add features or capabilities in the future that could render it a closer and more formidable competitor than it is today.[126] Other transactions challenged by the Agencies involved the acquisition of a firm whose current market share understated its future competitive significance because it did not account for new innovations, business strategies, or other factors.[127] Mergers that impact future competition between products or services that have not yet been developed can also violate the antitrust laws.[128]

Continued

A number of commenters opposed changes contained in the proposed rule over concerns that they would disproportionally impact small innovation companies and startups, which rely on venture capital and acquisitions to sustain their business model. One commenter stated that preventing such exit strategies would make it difficult for startups to obtain early-stage funding, reducing both the number and vitality of these innovative firms. Several cautioned the Commission to avoid increasing the burden and risk associated with the acquisition of startups, which they stated would damage the dynamic U.S. tech innovation system. Another stated that acquisitions that increase concentration can still be procompetitive and drive dynamic efficiency.

As the discussion above clearly demonstrates, acquisitions involving nascent or potential competitors as well as those that impact innovation competition may violate the antitrust laws. The Commission disagrees with commenters that contend that these types of acquisitions should be subjected to a more permissive standard or that the Agencies are singling them out for closer scrutiny. The Agencies routinely review acquisitions of and by innovative companies and apply the same legal standard to those mergers as any other acquisition. When the Agencies challenge these mergers, they are held to the same liability requirements necessary to establish a violation of section 7. However, as discussed above, there is a gap in the current information requirements that undermines the Agencies' ability to determine whether a transaction would eliminate nascent or future competition. To detect those types of acquisitions and to assess whether they violate the antitrust laws, the Agencies need information regarding these forms of ongoing or emerging competition, even if some commenters disagree with the law as applied by the courts in this area.

The Commission acknowledges that the sale of a business to an incumbent may represent a valuable exit strategy for startups. But when such exits are effectuated by a dominant firm to absorb a future or emerging competitor, the overall effect may be to reduce innovation and violate the law.[129] In fact, antitrust enforcement can drive innovation and growth by ensuring that market outcomes are determined through competition rather than left to the decisions of a dominant incumbent who can on its own determine the fate of innovative companies and the future of competition. The history of U.S. antitrust enforcement contains many examples of how government action was required to unleash the forces of competition and innovation, creating new opportunities for investments and startups.[130] Recent research suggests that existing firms may be acquiring innovative capacity not for the purpose of advancing those discoveries but rather to shelve those discoveries, leading to a reduction in innovative output and eliminating an independent source of future competition.[131] Two individual commenters shared their experiences with acquisitions that have had that effect:

- I work in the software industry and despite the constant talk of ''innovation,'' I have seen many mergers that eliminate new product development. Mergers/acquisitions often consist of a company acquiring a product and immediately discontinuing either the acquired product or their own competing product. Most engineers I know want to develop new products and many mergers stop this from happening.[132]
- I work in the tech industry for a large technology firm. It's disgusting that our philosophy is now to buy other companies and never grow organic products because it is too hard. There's no innovation anymore it is simply make enough money to buy out the actual innovators in an industry. Any new startup is now faced with a massive hill to climb as getting VC money is paramount, but then the moment you do well your VC's will just sell to the highest bidder. This is stagnating tech, and you won't see the effects for some years down the road when 5 tech companies are left in this country. We need tighter oversight on mergers . . . .[133]

In light of all these considerations, the Commission believes this rulemaking strikes the right balance that permits the Agencies to evaluate transactions for their potential effects on innovation while not standing in the way of acquisitions and other investments that do not present antitrust risks that need to be addressed prior to consummation. The critical task for the Agencies is to identify which transactions may substantially lessen competition or tend to create a monopoly, prior to consummation and before the possibility of future competition is snuffed out.[134] The Commission is not subjecting acquisitions of startups or innovative firms to heightened scrutiny, as some commenters suggest. Rather, the Agencies are modernizing premerger requirements in light of the changes in M&A activity for all transactions that must be reported under the HSR Act, including those involving innovative firms.[135] However, the final rule has been adjusted to lessen the burden on the targets of acquisitions generally. Moreover, many of the new requirements focus on increasing visibility into complex entities and therefore would not be applicable to the relatively straightforward structures of many startup companies.

The Commission notes that many acquisitions of startups and small innovator firms are not reportable and thus are not subject to antitrust scrutiny prior to consummation. In September 2021, the Commission released its findings from an inquiry into past acquisitions by the largest technology platforms that did not require reporting under the HSR Act.[136] Launched in

[136] *See* Press Release, Fed. Trade Comm'n, ''FTC Staff Presents Report on Nearly a Decade of Unreported Acquisitions by the Biggest Technology Companies'' (Sept. 15, 2021), *https://www.ftc.gov/*

February 2020, this inquiry analyzed the terms, scope, structure, and purpose of exempted transactions by five large technology companies: Alphabet, Inc., Amazon.com, Inc., Apple Inc., Facebook, Inc., and Microsoft Corp. The study covered ten years of acquisitions (from January 1, 2010 to December 31, 2019) and found that the companies collectively made 819 acquisitions that were not reported under the HSR Act.[137] None of these acquisitions was filed under HSR, although many of them were concentrated in just a few categories of technology, such as mobility, application software, and internet content and commerce.[138]

This study provided other insights into these companies' practices and acquisition strategies, including how they structured acquisitions and how these acquisitions fit into the companies' overall business strategies.[139] For instance, not only were many of the acquisitions ''small'' in deal value (*i.e.,* under the various HSR reporting thresholds), they were also ''young,'' with nearly 40 percent of the acquisitions involving target firms that were less than five years old.[140] Most of the acquisitions involved the buyer taking control of the acquired assets or entity, although there were also a significant number of investments that resulted in the large company holding a minority interest in the target firm.[141] Moreover, over three-quarters of the transactions included non-compete clauses for founders and key employees of the acquired entities, with relatively small variation in the percentage of transactions with non-compete clauses across the five respondents. [142] Together, these findings indicate that during the study period, these five companies acquired many small, nascent firms operating in related business lines and their founders and other key employees agreed to refrain from continuing their own efforts to innovate outside the company for some period of time. While the study focused on transactions that were not reportable under the HSR Act, the information collected from these tech companies provided the Commission with insight into information that is available to parties in all types of acquisitions but that is not required by the current Form and Instructions.

In light of the benefits to the public from preventing mergers that violate the antitrust laws by reducing innovation competition or eliminating a potential entrant or nascent threat, the Commission has determined that the Agencies need certain additional information with the HSR Filing to conduct an initial antitrust assessment prior to consummation. In the Agencies' experience, it is necessary to obtain this type of information directly from the filing parties because typically their plans regarding future products or business lines are not public.

Several new information requirements in the final rule are aimed at providing the Agencies with sufficient information to determine if the transaction is likely to raise concerns about potential, emerging, or nascent competition. For instance, the new Overlap Description and Supply Relationships Description directly address the scope of existing and emerging competition between the parties. In particular, the Overlap Description requires filers to identify their own products and services, including those that are pre-revenue, that compete with the products and services of the other party that are known to the filer.[143] This information will provide a basis for the Agencies to know that there are areas of emerging and direct competition beyond existing products or services, including important ongoing innovation competition. The Overlap Description also requires filers to produce measurement information for products or services not yet generating revenue, or those whose performance is not measured by revenue, such as projected revenue, estimated volume, or any other applicable performance metric. This change recognizes the importance of capturing the competitive significance of nascent or emerging products and services.

The final rule also requires the buyer to indicate whether there are any existing contracts between the parties, including non-compete, non-solicitation, or licensing agreements, which would alert the Agencies to any limits on future competition that are created by these agreements, especially when the buyer is not acquiring all of the acquired entity. The existence of non-compete or non-solicitation agreements can be especially useful in revealing that the parties consider themselves to be 'in competition' with one another, now or in the future, such that there is value in contracting away the ability to compete for or solicit business or workers. In addition, the Supply Relationships Description requires information for products, services, or assets (including data) that the other party or any other business uses or could use to compete. This forward-looking assessment, based on each filer's business experience, would reveal whether there are future uses of either party's products that could give rise to concerns about non-horizontal effects from the transaction. The inclusion of data as a potentially key asset is purposeful, given the competitive significance of data access for effective competition in so many modern markets.[144]

Similarly, new document requirements contained in the final rule are aimed at revealing each firm's assessment of market conditions and horizon-scanning for competitive threats. For instance, the final rule requires a broader search for documents that evaluate or analyze the transaction to include not only those provided to board members but also to the person who has primary responsibility for supervising the deal. These documents, along with certain ordinary course plans and reports shared at the highest level of management described above and in section VI.G.2., will reveal additional information about how each filer views the competitive landscape more broadly, including in ways that may impact current or future competition. Together, these documents may signal whether either party has identified emerging threats to competition—from the other party or from firms not involved in the transaction—that would impact the Agencies' assessment of whether the transaction may violate the antitrust laws.

As discussed above in section II.B.1., new information contained in the

[143] As explained in section VI.I., the parties should not exchange information for the purpose of responding to the Competition Descriptions.

[144] *See FTC* v. *IQVIA Holdings Inc.,* No. 1:23 Civ. 06188 (S.D.N.Y. Dec. 29, 2023) (order granting preliminary injunction on horizontal theories of harm without addressing FTC allegations that the acquisition would allow IQVIA to foreclose other industry participants from accessing its data as a key input for healthcare professional programmatic advertising).

Minority Shareholders or Interest Holders and Officers and Directors sections will provide a basis for the Agencies to identify any existing or potential management relationships between the acquiring person and target, including through entities or individuals who can influence decision-making of the acquiring person post-merger. These relationships can be especially concerning if used to gain access to non-public information about future plans or investments in products-in-development when those same individuals also have interests in competitively relevant businesses.

Finally, the final rule collects additional information about the acquisition rationale of the buyer to assist the Agencies in understanding the purpose of the transaction. For example, the final rule requires the buyer to describe any rationale for the transaction and to indicate any document submitted with the HSR Filing that confirms or discusses that rationale. These answers will provide context for the Agencies' initial antitrust assessment through a deeper understanding of what purpose the buyer has for engaging in a transaction that is large enough to require premerger review. In addition, the final rule for the first time requires the seller to report prior acquisitions in the same or related lines of business, which would provide a basis for the Agencies to better assess whether the transaction implicates emerging, nascent, or potential competition, especially through the combined effects of roll-up or serial acquisition strategies or ''killer'' acquisitions in which assets were purchased but not used as a means of eliminating a competitor.

5. Disclosing Roll-Up or Serial Acquisition Strategies

Another trend in M&A activity has been the rise of serial acquirers, firms that engage in strategic acquisitions in the same industry, often ''rolling up'' many small competitors in the same or adjacent markets to establish a large, sometimes dominant, position.[145] Serial acquisition strategies have been subject to antitrust scrutiny for over 100 years.[146] In the seminal merger case, *United States* v. *Philadelphia National Bank,* 374 U.S. 321 (1963), the Supreme Court noted that both the buyer and the seller had previously acquired many other independent banks,[147] driving a trend toward concentration that rendered their merger suspect.[148] Given the popularity and prevalence of these serial acquisition strategies in recent years, especially in healthcare and technology markets, this trend has attracted the attention of academics and policymakers alike.[149] A pattern or strategy of buying up smaller competitors or firms in the same or related lines of business can lead to harm of the same magnitude and type as mergers of larger or established firms, but serial acquisitions are less likely to attract the attention of enforcers until the strategy is identified. A series of small acquisitions can lead to consolidation within an industry, often without ever triggering the obligation to report these acquisitions under the HSR Act. This strategy has been particularly prevalent in healthcare markets involving private equity buyers.[150]

Often the Agencies are not able to detect these strategies until it is too late, after the serial acquirer has established a dominant position and is able to exercise market power to the detriment of market participants. For instance, in September 2023, the FTC charged U.S. Anesthesia Partners, a for-profit corporation, with a multi-year anticompetitive scheme to consolidate anesthesia practices in Texas.[151] This lawsuit, which is pending in Federal court in Texas, alleges that the company acquired over a dozen anesthesiology practices in Texas to eliminate competition and create a single dominant provider with the power to demand higher prices.

The Commission is aware of the impact of serial acquisitions based on its experience with the dialysis industry, which is an area in which economic research has documented adverse effects from serial acquisitions. Throughout the 2000s, the Commission reviewed a series of large acquisitions by DaVita, the largest U.S. provider of life-sustaining treatments for end stage renal disease patients. In 2006, in conjunction with DaVita's $3.1 billion acquisition of rival Gambro Healthcare, Inc., the Commission required DaVita to divest 69 dialysis clinics in 35 markets across the United States to resolve charges that the acquisition violated section 7. In 2011, DaVita sought to acquire rival DSI for $689 million, and the Commission required divestitures to preserve competition for dialysis services in 22 local markets. Then in 2017, the Commission ordered DaVita to divest seven clinics in New Jersey and Dallas to proceed with its $358 million acquisition of Renal Ventures. During roughly the same period, the Commission also reviewed a series of acquisitions by Fresenius, the other leading U.S. provider of dialysis services, and required significant divestitures to maintain competition.[152]

Notwithstanding these enforcement actions, the dialysis industry has experienced growing concentration, mostly as a result of acquisitions that were not reportable under the HSR Act. According to one 2020 study, there were more than 1,200 acquisitions of independent dialysis facilities over a 12-year period, resulting in DaVita and Fresenius operating more than 60 percent of all clinics nationwide.[153] The study concluded that these changes in

[153] Paul J. Eliason et al., ''How Acquisitions Affect Firm Behavior and Performance: Evidence from the Dialysis Industry,'' 135 Q. J. Econ. 221, 222 (2020) (from 1990 to 2020, the share of independent dialysis facilities fell from 86% to 21%).

ownership resulted in higher prices, lower levels of service, and worse outcomes for patients.[154] One commenter stated that, based on his research, merger enforcement against reportable acquisitions prevented illegal consolidation 95 percent of the time, while the many non-reportable acquisitions of dialysis clinics were blocked only 5 percent of the time. He contended that these 'stealth' acquisitions accounted for much of the increase in within-market concentration.[155]

In light of the failure of prior interventions to stem the adverse consequences of roll-up acquisitions in this industry, when DaVita in 2022 sought to buy 18 clinics in a non-HSR-reportable transaction, the Commission unanimously voted to require DaVita not only to divest three clinics but also to obtain prior Commission approval before buying any new ownership interest in dialysis clinics in Utah.[156] The Commission determined that imposing a prior approval obligation was appropriate in light of the company's history of attempting anticompetitive transactions that do not trigger a notification under the HSR Act.[157]

The Commission has also imposed prior notice or prior approval provisions on another serial acquirer, JAB Consumer Partners, a private equity firm that has made several significant acquisitions in the emergency and specialty veterinary services markets across the United States. JAB is the parent company of two large veterinary clinic chains, Compassion-First Pet Hospitals and National Veterinary Associates Inc., that have been built through a series of acquisitions. In 2020, Compassion-First bought NVA for $5 billion, and the Commission required JAB to divest clinics in three local markets.[158] In June 2022, Compassion-First/NVA acquired Sage Veterinary Partners for $1.1 billion, and the Commission required divestitures in three additional local markets.[159] The Commission also determined that, in light of JAB's ongoing acquisition strategy, it would require prior approval and prior notice requirements on JAB's future acquisitions of specialty and emergency veterinary clinics.[160] Later in 2022, when JAB also sought to acquire another veterinary chain with significant competitive overlap in four geographic markets, the Commission again required divestitures and prior approval requirements in the affected local markets for emergency and specialty veterinary services markets.[161]

But resorting to imposing prior approval obligations after an industry has already experienced significant concentration due to roll-up strategies is suboptimal. A central purpose of the HSR Act is to allow the Agencies to arrest trends toward concentration through effective premerger review. For any reportable transaction under the HSR Act, the Agencies have an obligation to determine whether the transaction is one of a series of acquisitions that could lead to harm in the affected markets. Information about each party's prior acquisitions will provide a basis for the Agencies to assess this risk to competition during their initial antitrust assessment for any reportable transaction.

Several commenters supported the need for more information related to prior acquisitions, including a group of State antitrust enforcers. One commenter noted that the private equity industry pioneered and perfected the serial 'roll-up' acquisitions that were too small to attract antitrust agency attention but nonetheless amassed considerable market power over time. The same commenter pointed out that private equity firms use these add-on buyout deals to purchase multiple competitors of an existing portfolio company or expand their geographic reach to create a much bigger player in an industry—and that this strategy can in aggregate substantially lessen competition or tend to create a monopoly. Another commenter raised similar concerns that the business strategy of making a series of small acquisitions—whether an intentional tactic to avoid regulatory scrutiny or not—has become concerningly common in recent decades and led to many consolidated industries. An individual commenter shared their experience with the broader impact of rollup acquisitions on local communities:

• As the wife of a small business owner and member of a community, I'm dismayed at seeing how many small local and regional businesses have disappeared after becoming the target of mergers and rollups. Those businesses—funeral homes, hospice care, newspapers, hardware stores, coffee shops, veterinarians—were [] an important part of the community. Now it is nearly impossible to start local businesses in those sectors and turn any sort of profit while competing with PE backed rollups.[162]

Other commenters stated that the proposed changes are unnecessary because they lack sufficient justification, are out of step with their view of case law and market realities, and do not seem to have a strong factual basis. One commenter stated that the proposal to expand the lookback period for prior acquisitions would invite the Agencies to scrutinize long-consummated deals, including those that the HSR Act were never intended to capture. Some raised concerns that the proposed changes will substantially increase the burden of reporting on prior acquisitions beyond what is currently required for the HSR Form. Another stated that the costs of the proposed changes regarding prior acquisitions far outweigh the potential benefit that information about immaterial prior transactions could provide to the evaluation of the transaction. One commenter stated that requiring disclosure of non-reported transactions will reduce investments in startups.

The Commission has determined that, to detect whether serial or roll-up acquisition strategies have changed the market dynamics such that the transaction under review could have widespread harmful effects that will be hard to undo, the Agencies need additional information about prior acquisitions, including from the acquired firm. Knowing each party's record of prior acquisitions in the same business lines will allow the Agencies to understand the long-term competitive strategy for the transaction at issue, including whether it is one in a series of prior or planned acquisitions in the same industry and whether the

[162] Comment of Nora Johnson, Doc. No. FTC–2023–0040–0618.

transaction is a merger of ''consolidators.'' The additional information would also permit the Agencies to better identify transactions whose effects should not be viewed in isolation but rather as a pattern of consolidation.[163]

The Commission has always required information about prior acquisitions in the HSR Filing to help identify strategies aimed at gaining market share through acquisitions rather than internal expansion or more vigorous competition, and the Commission disagrees that it is outside its rulemaking authority under the HSR Act to require filers (including the target) to report prior acquisitions in the same or related business lines even if they were not previously reported to the Agencies for premerger review. The final rule contains modest expansions of this long-standing requirement, to better account for the increased number of firms engaged in roll-up strategies. Nonetheless, the final rule does not contain certain expansions suggested in the proposed rule, such as eliminating the $10 million exception or expanding the lookback period from 5 to 10 years in response to comments that providing this level of information about prior acquisitions would be costly and burdensome. The modest expansion of this information requirement should provide the Agencies with a more complete record of consolidation in the relevant business lines that has been driven by the merging parties in order to identify when a reported transaction is the latest in a series of acquisitions, and thus one that may violate the antitrust laws.

As noted elsewhere, the Agencies remain committed to identifying consummated mergers that have resulted in harm and to take steps to unwind them as resources permit. But regardless of the legality or reportability of any particular prior acquisition, the fact that it occurred and involved the same business lines under review is directly relevant to whether the reported transaction may violate the antitrust laws, including through a series of mergers that ''convert an industry from one of intense competition among many enterprises to one in which three or four large concerns produce the entire supply.'' [164] For these reasons, the Commission has determined there is a need to collect information about prior acquisitions from the seller as well as the buyer. The cost of complying with this requirement should be minimal except in instances where the seller has made many acquisitions in the same or related business lines, in which case the information may prove highly relevant to Agency review.

Other new requirements in the final rule will also help the Agencies identify these roll-up strategies. In particular, the Overlap Description will provide an alternative basis for identifying product or service market overlaps for which prior acquisitions should be reported. Information about the buyer's acquisition rationale will reveal the purpose of the transaction, including whether is it part of a strategy of pursuing transactions in similar business lines. The new requirement to submit a small set of business plans and reports shared with the highest levels of management that discuss market shares, competition, competitors, or markets of any product or service that is provided by both the acquiring person and acquired entity may reveal whether there are other acquisition targets identified by either the acquiring or acquired person.

III. Statutory Authority and Economic Analysis

The HSR Act directs the Commission, with the concurrence of the Assistant Attorney General and consistent with the purposes of the Act, to issue rules requiring the submission of documentary material and information relevant to a proposed acquisition as is ''necessary and appropriate to enable [the Agencies] to determine whether such acquisition may, if consummated, violate the antitrust laws.'' [165] The HSR Act was enacted to assist the Agencies in enforcing other provisions of the Clayton Act, and to give the FTC and the Department of Justice a tool—premerger notification—to identify problematic mergers and acquisitions before they are consummated and a short period of time to complete their analysis.[166] The statute grants the Commission explicit authority to require the submission of documents and information the Agencies determine are necessary and appropriate to identify proposed acquisitions that may result in an antitrust violation.[167]

In the administrative law context, the Supreme Court has held that Congress' use of terms such as ''appropriate'' or ''reasonable'' in a statute authorizing agency rulemaking gives the agency ''flexibility'' to regulate.[168] As the Supreme Court has explained, ''[o]ne does not need to open up a dictionary in order to realize the capaciousness of this phrase. In particular, 'appropriate' is the classic broad and all-encompassing term that naturally and traditionally includes consideration of all the relevant factors.'' [169] The phrase ''leaves agencies with flexibility,'' although ''an agency may not entirely fail to consider an important aspect of the problem.'' [170] In at least some contexts, courts have held that ''necessary and appropriate'' requires consideration of a rule's costs and benefits.[171]

The Commission is not convinced that Congress intended the words ''necessary and appropriate'' to require a cost-benefit analysis in this context. Had Congress intended to require the Commission to consider costs and benefits, it could easily have done so.[172] Instead, it gave the Commission broad authority to establish requirements it deems necessary and appropriate for determining whether a proposed acquisition may violate the antitrust laws during premerger review, and even gave the Commission express authority to define statutory terms. Nonetheless, in the particular circumstances of this rule, the Commission has considered the reasonableness of requiring additional information in the HSR Filing in light of the statutory scheme established by Congress to more effectively prevent undue consolidation that violates the antitrust laws, including the costs and the benefits of the final rule. The Commission has evaluated, on the one hand, the benefits to the Agencies, the parties, third parties and the public in making premerger review more efficient and effective by obtaining information necessary to properly assess the competitive effects of proposed acquisitions; and on the other hand, the need to reduce unnecessary burden, costs, and delay on filers and the transactions they hope to pursue in a manner consistent with the

[172] *See Chamber of Com* v. *Sec. Exch. Comm'n.,* 412 F.3d 133, 142 (D.C. Cir. 2005) (statute requires SEC to consider whether rule will promote efficiency, competition, and capital formation which requires a consideration of the costs of the conditions imposed by the rule).

mandatory premerger notification regime of the HSR Act.

In determining what information is necessary and appropriate to determine whether a reported transaction merits the issuance of Second Requests, the Commission also draws on the Agencies' decades of experience reviewing filings and responding to informal requests for guidance.[173] This operational experience informs the Commission's assessment of the existing rules' shortcomings and supports its decision that it is necessary and appropriate—and consistent with the text and purpose of the HSR Act—for the Agencies to require the merging parties to provide sufficient information to enable the Agencies to conduct a preliminary assessment of the risk that the filed-for transaction may violate the antitrust laws, particularly where some information is available only from the parties.

After careful consideration of the public comments as well as the costs and benefits of the proposed changes, the Commission has determined to adopt a modified version of the information requirements proposed in the NPRM. As modified, the final rule will facilitate the provision of relevant documentary materials and information that allow the Agencies to assess whether a proposed acquisition may violate the law within the statutory period available for their initial review while minimizing the cost and burden of producing such materials as much as practicable.

The following analysis considers the potential economic effects that may result from the final rule consistent with the Commission's statutory power to obtain information necessary and appropriate to conduct an effective premerger review, including the benefits and costs to market participants. In conducting this assessment, the Commission has identified existing costs to filers, the Agencies, and third parties that could be avoided by adjusting the information requirements for HSR Filings. Avoiding such costs would generate benefits for filers, the Agencies, and third parties in addition to broader public benefits of effective premerger screening to identify potentially unlawful mergers prior to consummation.

The Commission believes that the final rule will improve the efficiency of the premerger review process and help the Agencies identify transactions that may violate the antitrust laws along all parameters of potential harm, but not all of these benefits can be quantified. Wherever possible, the Commission quantifies the likely economic effects of its final rule. However, some economic effects are inherently less conducive to sound quantification either due to the lack of reliable data or the lack of a well-established economic methodology that would provide estimates or ranges of costs. For example, producing quantitative estimates of certain costs and benefits would require numerous assumptions to generate a behavioral forecast of how parties contemplating an acquisition and other affected third parties would respond to the rule, and how those behavioral responses would in turn affect the overall cost of compliance and the merger review process. In addition, some factors determining certain economic effects of the rule are transaction-, firm- and industry-specific and thus inherently difficult to quantify. Even if it were possible to calculate a range of potential quantitative estimates for these effects, the range would be so wide as to not be informative about the magnitude of the associated benefits or costs. Where sound economic methodology is not available to measure particular benefits or costs, the Commission addresses those qualitatively.[174] In sum, to show the connection between the facts found and the agency's decision, the Commission provides, where feasible and appropriate, a quantified estimate of the economic effects of the final rule, and a qualitative description of the benefits and costs.

A. Statutory Authority and Congressional Intent

The HSR Act provides that the Commission ''shall require'' that premerger notifications be in such form and contain such documentary material and information relevant to a proposed acquisition as is necessary and appropriate to enable the Agencies to determine whether such acquisition may, if consummated, violate the antitrust laws.[175] Thus, the HSR Act explicitly requires the Commission, with the concurrence of the Assistant Attorney General, to determine what types of documents and information are required to conduct an initial assessment of antitrust risk. Mandatory premerger review strengthens merger enforcement by giving the Agencies a fair and reasonable opportunity to detect and investigate large mergers before consummation.[176] The ability to spot ''problem areas'' during the initial screen is the key feature of the HSR Act that converts merger enforcement from ineffective ex-post litigation to expeditious and effective premerger proceedings.[177]

To that end, Congress passed the HSR Act to provide the Agencies with advance notice of planned acquisitions and an opportunity to challenge such acquisitions as unlawful prior to consummation. The overall intent was to avoid lengthy, costly post-consummation enforcement that is ineffective at preventing undue concentration and permits an illegal acquisition to cause harm until unwound:

> The problem this bill cures is startlingly simple, but it goes to the very foundations of our merger law. Under present law, companies need not give advance notification of a planned merger to the Federal Trade Commission and the Department of Justice. But if the merger is later judged to be anticompetitive, and divestiture is ordered, that remedy is usually a costly exercise in futility—untangling the merged assets and management of the two firms is like trying to unscramble an omelet.[178]

[176] H.R. Rep. No. 94–1373, at 5 (1976).

[177] *Id.* at 10–11 (chief virtue of the Act is to help eliminate endless post-merger proceedings and replace them with far more expeditious and effective premerger review generating considerable savings; if the initial notification form reveals 'problem areas,' the government can request additional data during the initial 30-day period).

[178] 122 Cong. Rec. 25051 (1976) (remarks of Rep. Rodino). Premerger review was not the only tool given the Agencies to rectify the inadequacy of post-consummation merger enforcement. In 1973, Congress amended the FTC Act to authorize the Commission to seek injunctions in Federal court in recognition of the inadequacy of post-consummation divestitures. *See FTC* v. *H.J. Heinz Co.,* 246 F.3d 708, 726 (D.C. Cir. 2001) (Section 13(b) of the FTC Act reflects congressional recognition that divestiture is an inadequate and unsatisfactory remedy in a merger case, citing 119 Cong. Rec. 36612 (1973)). The inability of the

Continued

As noted by the Antitrust Modernization Commission (AMC)—a special body commissioned by Congress in 2002 to conduct a comprehensive review and make recommendations for revisions to U.S. antitrust laws—the HSR Act addressed the defects of post-consummation merger enforcement, which ''could neither fully compensate society for the interim loss of competition, nor fully restore a competitive market structure, particularly if the companies had already integrated their productive assets, or 'scrambled the eggs.' '' [179] Congress also intended to avoid deterring or impeding the consummation of the vast majority of acquisitions and therefore fashioned a regime that reflected ''a careful balancing of the need to detect and prevent illegal mergers and acquisitions prior to consummation without unduly burdening business with unnecessary paperwork or delays.'' [180]

The Agencies have administered the premerger notification program required by the HSR Act for more than 45 years, and the Commission has engaged in numerous rulemakings to change the information requirements for premerger notification in response to changes in market realities. Although many commenters object in whole or in part to the proposals contained in the NPRM, several conceded that some updates to the Rules are reasonable or justified by increasingly complex markets. Others commended the Commission for undertaking a periodic review of its rules. Even so, some argue that the Commission lacks the authority to make any changes to its current process that would increase the burden or delay HSR-reportable transactions, asserting that Congress intended to reduce costs and delay and to focus the Agencies' scrutiny on only the largest corporate transactions. The Commission disagrees with certain commenters that the Commission lacks the authority to adjust information requirements over time to make premerger review efficient and effective for the purpose of detecting potentially illegal mergers in light of changing market conditions.

Given the number of comments that assert that the proposed rule violated the intent of the HSR Act, the Commission responds first to these broad objections. The Commission also responds to assertions that it has failed to properly weigh the benefits and costs of changing the notification requirements in light of the statutory premerger scheme.

As an initial matter, the Commission disagrees that avoiding potential cost or delay to those involved in dealmaking is the primary focus of the HSR Act. The legislative history and plain text of the HSR Act make clear that the goal of establishing a premerger review regime was not to minimize the number of transactions that are reviewed by the Agencies or to reduce the delay for reported transactions below the statutory obligations.[181] In fact, it is clear that Congress explicitly contemplated that a mandatory premerger notification regime would impose burdens on merging parties. Prior to the passage of the HSR Act, parties were free to merge without providing any notification and without any delay, which led to concerns that the Agencies were practically unable to block or unwind illegal transactions.[182] Congress determined that new and meaningful requirements were necessary to achieve the overarching Congressional goal of promoting vigorous and effective enforcement of the antitrust laws:

> Amended Section 7 has failed to achieve its objectives—not because of its substantive standards, but because of the lack of an effective mechanism to detect and prevent illegal mergers prior to consummation. . . . The Committee believes that [premerger notification] represents a careful balancing of the need to detect and prevent illegal mergers and acquisitions prior to consummation without unduly burdening business with unnecessary paperwork or delays . . . Complex mergers or acquisitions of the kind encompassed within this subsection generally require a great deal of prior planning, and this provision will provide the Government appropriate opportunity to evaluate the legality of significant business behavior at the most propitious moment for all parties, with the least possible disaccommodation.[183]

When setting up the premerger notification program, the Commission rejected assertions that the term ''notification'' implies only a minimal burden for the initial HSR Filing. Some commenters at the time maintained that the initial notification should do little more than inform the Agencies of the participants to the transaction, the projected date of consummation, and other noncontroversial and generally uninformative data, leaving a fuller information demand to the Second Request. The Commission disagreed that the HSR Act should be read this way, stating that this position is contrary to the statutory text and fundamentally misconceives the amount of information necessary to make even a tentative determination whether a transaction may violate the antitrust laws.[184] The Commission explained that the HSR Filing should contain information necessary and appropriate for an effective premerger notification program.[185] The Commission reasoned that requiring perfunctory information in the HSR Filing would not fulfill the statutory provision and would result in more Second Requests that would extend the average waiting period under the HSR Act.[186] Then and now, to fulfill the purpose of premerger review, there must be sufficient information provided in an HSR Filing to determine whether to issue Second Requests and what information those requests would seek. Consistent with Congress' expectations that HSR Filings would consist of data and documents reasonably available to filing companies, such as the information and documents they relied

Commission to obtain injunctive relief sooner to prevent widespread harm from mergers was a widely acknowledged shortcoming of its agency design. *See, e.g., FTC* v. *Dean Foods Co.,* 384 U.S. 597, 606 n.5 (1966) (experience shows that the Commission's inability to unscramble merged assets frequently prevents entry of an effective order of divestiture).

[179] Antitrust Modernization Comm'n, Rep. & Recommendations 155 & n.21 (2007), *https://govinfo.library.unt.edu/amc/report_recommendation/toc.htm* (citing H.R. Rep. No. 94–1373 at 7–11) (hereinafter ''AMC Report''). The Antitrust Modernization Commission was created pursuant to the Antitrust Modernization Commission Act of 2002, Pub. L. 107–273, 116 Stat. 1856, Div. C., Title I, Subtitle D (2002). The AMC was charged with examining whether there was a need to modernize the antitrust laws and to identify and study related issues; to solicit views; and to evaluate proposals for change. The AMC provided its Report and Recommendations to Congress and the President on April 2, 2007, and was terminated on May 31, 2007, having completed its statutory duties.

[180] S. Rep. No. 94–803, at 65 (1976).

[181] Efforts to require premerger notification date back to 1908. Leading up to the passage of the HSR Act, the Commission regularly urged Congress to pass legislation that would require advance notice for acquisitions. For a short time, the Commission relied on its authority under section 6 of the FTC Act to require merging parties to file special reports 60 days prior to consummation in certain industries, such as food distribution and cement. None of these programs required the parties to stay their merger plans. After passage of the HSR Act, the Commission discontinued reliance on special reports for prior notice of pending mergers. *See* Kelly Signs, ''Milestones in FTC History: HSR Act launches effective premerger review,'' Fed. Trade Comm'n Competition Matters blog (Mar. 16, 2015), *https://www.ftc.gov/enforcement/competition-matters/2015/03/milestones-ftc-history-hsr-act-launches-effective-premerger-review.*

on when contemplating the deal,[187] the final rule seeks information that is readily available to the parties to fill information gaps that the Agencies have identified in the current HSR Form.

As discussed above, information reported in the current HSR Form is not sufficient due to differences in corporate structure and investment activity as well as profound changes in economic activity. In this rulemaking, the Commission is responding to these changes and how they have affected the Agencies' ability to conduct premerger screening in light of today's market realities. The Agencies need information to be able to spot all types of potential harm and the Commission has determined that the information requirements contained in the final rule are necessary and appropriate to conduct effective and efficient premerger screening and avoid even greater costs associated with collecting additional information through issuing more Second Requests. Without sufficient information available in the HSR Filing on the first day of the statutory review period, the Agencies cannot fulfill their mandate to identify and prevent illegal mergers or avoid potentially costly and protracted investigations.

Several commenters suggested that because Congress recently authorized the collection of additional information relating to foreign subsidies, that is the only information the Commission has the authority to collect.[188] The Commission disagrees that in passing this new requirement, Congress intended to repeal or in any way limit the Commission's statutory authority under 15 U.S.C. 18a(d) to impose other reporting requirements that are necessary and appropriate to determine whether the transaction may violate the antitrust laws. Indeed, the Commission is relying on its section 18a(d) authority to require the submission of information related to foreign subsidies in the final rule. The other changes contained in the final rule are a reasonable exercise of the Commission's rulemaking authority to require information that is necessary and appropriate for detecting problematic mergers during the initial waiting period of the HSR Act. The final rule updates the premerger notification regime based on the Agencies' experience in reviewing thousands of HSR Filings each year and in light of observable changes in market dynamics, contemporary investor behavior, investment arrangements, and acquisition strategies, as discussed in section II.B. above.

Some commenters suggested that the Commission lacks authority to make changes to the notification requirements because doing so increases the likelihood that the Agencies will subject more transactions to close scrutiny or seek to block them as illegal, and that this increased scrutiny will disincentivize dealmaking. This line of argument is contrary to the purpose of the HSR Act and the final rule.

Congress passed the HSR Act to create an effective mechanism to detect, deter, and prevent large transactions that violate the antitrust laws. The inadequacy of current notification requirements may encourage parties to enter into unlawful transactions due to the low risk of premerger detection.[189] One commenter supporting the need for change noted that the gaps created by the existing HSR Form and Instructions make it possible for anticompetitive mergers to go through unnoticed. Parties considering a merger are aware of this, so under the current system, parties are likely more willing to consider or attempt a merger that would be more obviously unlawful under a more rigorous disclosure regime. To the extent that one effect of the final rule would deter unlawful dealmaking, that effect is clearly consistent with Congress' intent that mandatory premerger review more effectively prevent illegal mergers.[190] Filing parties cannot claim an interest in inadequate detection or in avoiding an in-depth antitrust investigation that may lead to a court injunction blocking the merger because these concerns directly contravene U.S. law. Based on statutory text and clear Congressional intent, the Commission must ensure that HSR notification requirements enable the Agencies to detect the potential for harm before the harm occurs; that is the purpose of premerger review. When the Agencies' ability to detect the violation is compromised by inadequate disclosures in the HSR Filing, the Commission must use the authority expressly conferred by Congress to adjust the Agencies' detection tools to fulfill the purpose of premerger review.

Other commentors suggested that the Agencies' infrequent challenges to consummated mergers, including those reported but not challenged prior to consummation, are proof that the Agencies are not ''missing deals'' that cause harm. But given the significant effort required to unwind completed mergers, the frequent lack of information about the effects of consummated mergers, and the limited resources the Agencies have available to devote to all types of merger enforcement, in addition to their other statutory responsibilities,[191] the relatively low number of challenges to consummated mergers does not indicate that the current information requirements for premerger screening are sufficient to detect illegal deals. The Agencies must make difficult decisions about how to use their resources to address consummated mergers that may be causing real and ongoing harm while also working to fulfill their obligations to conduct a robust premerger screening of reported transactions. The critical task of screening reported transactions for antitrust risks can be especially challenging during times of peak M&A activity. See Figure 1.

According to one commenter whose members have been directly affected by consolidation in the retail food sector, third parties sometimes alert the Agencies to competitive issues, but that may not occur until after the waiting period has expired or the deal has been consummated. This commenter noted that these untimely scenarios are exactly the opposite of the HSR Act's legislative intent and force the Agencies and courts into a precarious position to preserve competition or obtain effective remedies. Congress certainly did not provide immunity for reported mergers that are not challenged prior to consummation (as most jurisdictions do) [192] so it is not a binary choice for the

[190] *See* S. Rep. No. 94–803, at 65 n.28 (the purposes underlying enactment of section 7 of the Clayton Act could have been accomplished if premerger notification had been enacted when originally proposed, and that if it had the economy would be less concentrated.).

[191] In addition to merger enforcement, both Agencies investigate and challenge anticompetitive conduct that may violate the antitrust laws. The Antitrust Division has sole responsibility to prosecute criminal violations of the antitrust laws, while the Commission has authority under section 5 of the FTC Act (15 U.S.C. 45) to challenge unfair methods of competition beyond the scope of the Sherman or Clayton Acts. In addition, the Commission's budget supports its consumer protection work, which is devoted to stopping unfair or deceptive acts or practices that violate the FTC Act as well as enforcement of more than 80 other statutes. *See generally* Fed. Agencies to ''act or stand down'' on a reported merger. But once a merger is consummated (whether reported in advance or not), the Agencies face decisions about the significant costs of mounting a merger challenge to unwind the deal as well as the opportunity costs of doing so. Given the limited resources the Agencies have to devote to merger enforcement, the Agencies will often focus on enforcement of reported mergers due to these opportunity costs.[193]

The legislative record leading to the HSR Act is replete with references to the costs, delays, and ineffectiveness of relying on post-consummation enforcement to interdict mergers that may cause harm in their incipiency.[194] In the Agencies' experience, unwinding illegal consummated mergers continues to be a costly exercise, and there remain significant delays in obtaining effective relief through unwinding. A merged firm has strong incentives to delay the outcome, and Commission orders requiring divestiture of acquired assets are often appealed, further deferring relief.[195] Moreover, smaller or seemingly inconsequential acquisitions can later be revealed as potentially illegal exclusionary conduct when they are used by firms with dominant market positions to maintain or extend a monopoly in violation of section 2.[196] There are enormous costs and delays associated with prosecuting section 2 cases involving the largest companies in the world to unwind harmful acquisitions.[197]

In mandating government review of acquisitions prior to consummation, Congress intended for the Agencies to avoid these types of protracted antitrust cases when possible. Instead, Congress envisioned that merger enforcement would occur mostly through a system of premerger review, even at the cost of requiring premerger review for many mergers that may not ultimately warrant an in-depth investigation let alone a challenge in court.[198] The Commission has determined that imposing some limited additional upfront costs on filers so that they submit sufficient information to allow the Agencies to conduct the mandatory initial antitrust review fulfills the Agencies' statutory responsibilities and should be weighed against the benefit of avoiding large expensive antitrust actions required to unwind illegal acquisitions that were not detected at the screening phase. Importantly, the final rule imposes fewer information requirements on transactions that are reportable but have low antitrust risk while seeking the most information from those transactions most likely to require in-depth review at the screening phase. Otherwise, the consequences of poor detection are improperly shifted to those harmed by illegal consummated mergers—which is plainly at odds with the purpose of the HSR Act.

The benefits of stopping an illegal merger before it happens can be significant, especially for those who would bear the consequences of harm induced by the merger. The chart below collects estimates of avoided harm due to likely price changes for affected products or services in cases litigated by the Agencies and accepted by Federal courts as a basis for enjoining illegal mergers in recent years.

[e] FTC v. Peabody Energy Corp. 492 F. Supp.3d 865, 906 (E.D. Mo. 2020).
[f] FTC v. Wilh. Wilhemsen Holding ASA, 341 F. Supp.3d 27, 65 (D.D.C. 2018).
[g] FTC v. Sanford Health, No. 1:17-cv-00133 at 28, 2017 WL 10810016 at *13 (D. N.D. Dec. 15, 2017) (Mem. Decision), aff'd, 926 F.3d 959, (8th Cir. 2019).

In addition to merger-induced price effects, which can vary widely due to differences in the economic size of the relevant markets affected by the merger, there can also be harm to customers from the loss of non-price competition. For example, the court found that JetBlue's anticipated reconfiguration of Spirit's aircraft would result in a decrease in the number of seats available on JetBlue flights of more than 6,100,000 per year.[199] These types of effects reduce output and result in a welfare loss due to the exercise of market power. In a vertical merger context, the Fifth Circuit affirmed the Commission's findings that Illumina's acquisition of Grail lessened competition via a different mechanism: the potential foreclosure of a key input by the sole supplier would lead to chilled investment by firms reliant on those inputs for their own competitive success.[200]

Moreover, merger retrospectives document merger-induced effects such as increased prices and decreased product quality or availability across a range of industries.[201] Given the significant economic costs imposed on market participants harmed by an illegal consummated merger, the Agencies will continue to challenge consummated mergers when practical and as resources permit. But relying on post-consummation merger enforcement to correct for information deficiencies in the HSR Form is contrary to Congressional intent that premerger review be used to stop illegal mergers before they occur.

1. Congress Determined Which Acquisitions Must Bear the Costs Associated With Premerger Review

Congress determined that the burden of premerger review should apply, regardless of antitrust risk, to a small subset of mergers where that burden would not be so great in comparison to the size of the deal and the size of the parties involved. Because the final rule does not require reporting for any additional transactions, it maintains the balance struck by Congress that only some mergers be subject to mandatory premerger review.

Congress incorporated several features in the HSR Act to lessen the burden on dealmaking, especially for small business and small transactions.[202] For instance, the HSR Act as first passed in 1976 contained three specific requirements that determined reportability for a planned transaction: the acquiring person is engaged in interstate commerce (the commerce test); one of the parties was worth at least $10 million and the other worth at

Rsch., Working Paper No. 31123, Apr. 2023, rev. June 2024), *https://www.nber.org/papers/w31123* (studying fifty mergers in the consumer-packaged goods industry and finding that, on average, these mergers raised prices by 1.5 percent and decreased quantities sold by 2.3 percent); Daniel Hosken et al., ''Do Retail Mergers Affect Competition? Evidence from Grocery Retailing,'' 27 J. Econ. & Mgmt. Strategy 3 (2018) (finding that the majority of grocery mergers in highly concentrated markets resulted in price increases of more than 2 percent); John E. Kwoka, Jr., Mergers, Merger Control, and Remedies: A Retrospective Analysis of U.S. Policy 110–11 (2014) (providing a meta-analysis of retrospective literature, finding that more than 80 percent of mergers resulted in price increases and the mean price increase was 5.88 percent across all studied transactions); Orley C. Ashenfelter et al., ''Did Robert Bork Understate the Competitive Impact of Mergers? Evidence from Consummated Mergers,'' 57 J. L. & Econ. S67 (2014) (reviewing prior retrospectives and concluding that mergers in oligopolistic markets can result in economically meaningful price increases, as 36 of 49 studies surveyed found evidence of merger-induced price increases); Leemore Dafny et al., ''Paying a Premium on Your Premium? Consolidation in the US Health Insurance Industry,'' 102 a.m. Econ. Rev. 1161 (2012) (examining healthcare mergers and finding the mean increase in local market HHI during the studied period raised premiums by roughly 7 percent); Orley Ashenfelter & Daniel Hosken, ''The Effect of Mergers on Consumer Prices: Evidence from Five Mergers on the Enforcement Margin,'' 53 J. L. & Econ. 417 (2010) (examining a set of mergers that were unchallenged by the government and finding that the majority resulted in a significant increase in consumer prices in the short run); Thomas Koch & Shawn W. Ulrick, ''Price Effects of a Merger: Evidence from a Physicians' Market,'' 59 Econ. Inquiry 790 (2021) (concluding that a merger of orthopedic physicians' practices increased prices to some payors by ten to twenty percent while prices in nearby areas not affected by the merger remained unchanged); Zack Cooper et al., ''The Price Ain't Right? Hospital Prices and Health Spending on the Privately Insured,'' 134 Q. J. Econ. 51 (2019) (examining 366 hospital mergers and finding that prices increased by over six percent when merging hospitals were geographically close); Prager & Schmitt, *supra* note 83 (examining hospital mergers and finding reduced wage growth when merger significantly increases concentration).

[202] The Senate version of the premerger notification bill would have given the Commission authority to require reporting from additional ''small'' mergers, but the House bill and the final law did not include this provision. 122 Cong. Rec. 30877 (1976).

least $100 million (the size-of-person test); and as a result of the transaction, the acquiring person would hold at least 15 percent or $15 million of the acquired entity (the size-of-transaction test). These thresholds were adopted in response to concerns that requiring reporting for all mergers would unduly affect capital markets.[203] The size-of-person test was seen as especially important to limit the impact of premerger reporting on small businesses:

> Approximately the largest 700 U.S. companies meet the $100 million jurisdictional requirement. Although $100 million companies account for roughly 40 percent of mergers and acquisitions, Title V's *dual* requirement of (i) a $100 million acquiring company, and (ii) a $10 million acquired company would have required such 30-day notification, over the past 5 years, in less than 100 acquisitions per annum. With this limitation, the Committee sought to include within the ambit of the premerger notification provision primarily those mergers or acquisitions that were most likely to have a substantial effect on competition. That is not to say that smaller mergers may not run afoul of the Clayton Act. To include the bulk of the approximately 3,000 mergers that would have occurred annually in the course of the past several years would, however, in the Committee's judgement, impose an undue and unnecessary burden on business.[204]

Together, these criteria were designed to focus mandatory premerger review on the largest transactions and limit the number of transactions that would have to be reported to the Agencies. See Table 1 (on average 16.5% of mergers reported during FY 2018 to FY 2022).

During the 1990s, several years of intense M&A activity drove merger filings ever higher, so that by FY 2000, the Agencies reviewed over 4,900 reported transactions.[205] This dramatic increase in HSR filings led to calls for Congress to amend the HSR Act to reduce its broad sweep, and to especially address its impact on small businesses. In response, Congress made several changes in 2000 to reduce the number of transactions subject to reporting: (1) increased the size-of-transaction threshold from $15 million to $50 million and required the Commission, starting in 2005, to adjust the thresholds in the HSR Act annually based on changes in the gross national product; (2) eliminated the 15 percent size-of-transaction threshold, making $50 million (as adjusted) an absolute floor; and (3) eliminated the size-of-person test for larger transactions, making transactions valued in excess of $200 million (as adjusted) reportable without regard to the size of the parties.[206] Today, as a result of these adjustments and with annual indexing, HSR filings are required for only a small fraction of overall merger activity in the United States. See Table 1.

Many commenters pointed out that the Congress that enacted the HSR Act envisioned the Agencies reviewing only 150 of the largest mergers.[207] In 1976 when the HSR Act was passed, 150 mergers represented approximately 12.8 percent of M&A deal volume, given that there were 1,171 completed acquisitions in 1976.[208] Overall, the burden imposed on M&A activity by the HSR Act is not that different today than in 1976. See Table 1 (HSR reportable mergers on average 16.5 percent of M&A from FY 2018 to 2022). At the same time, the size of the U.S. economy has grown exponentially: in 1976, the seasonally adjusted U.S. Gross Domestic Product was $1.934 trillion; today it is over $28 trillion.[209] From these figures, it appears that M&A activity, and the economy in general, has not been affected by the obligations imposed on those pursuing certain large acquisitions to submit to mandatory premerger review.

Moreover, Congress enacted several explicit statutory exemptions to reduce the burden of reporting,[210] and also authorized the Commission to issue rules exempting persons and acquisitions that it deemed at the time as posing little to no antitrust risk, which eliminated the burden of reporting for many additional transactions.[211] The Commission has also faithfully implemented Congress' mandate to annually index the HSR thresholds, which keeps premerger review limited to those acquisitions Congress wants the Agencies to review prior to consummation.[212]

Some commenters noted that the current process is inefficient because of the over-inclusiveness of HSR reporting standards. They pointed out that of all reported transactions, the Agencies issue Second Requests in only 2 to 3 percent per year, suggesting that this is a reason for the Commission to keep the status quo and not adopt any adjustments to current information requirements.

The Commission believes that the low percentage of transactions that have received Second Requests is not a reliable indicator that the Agencies have achieved the goals of mandatory premerger review or that the current

[211] *See* 15 U.S.C. 18a(d)(2)(B) and 16 CFR part 802. Several commenters urge the Commission to engage in rulemaking to exempt additional transactions from HSR filing obligations. These suggestions are outside the scope of this rulemaking. Due to deficiencies in the information currently collected in the Form, as explained elsewhere in this document, the Commission is not able to identify any additional types of transactions that could be exempted at this time. Until the Commission has sufficient information to provide a reasonable basis to exempt additional categories of transactions from HSR reporting requirements, the Commission is not in a position to reduce the total number of reported transactions. As discussed in section VI.A.1.f., the Commission is excusing certain types of transactions (select 801.30 transactions) from many requirements of the final rule and has modified the proposed rule in many places to apply only where certain conditions have been met.

[212] To the extent that commenters suggest that the NPRM expands reporting requirements for additional transactions, they are wrong. Nor would changing the information requirements of the HSR Filing affect the obligations of public companies to comply with disclosure requirements of the Securities and Exchange Commission (''SEC''). *See* Comment of Am. Sec. Ass'n, Doc. No. FTC–2023–0040–0682 at 2.

process is efficient in identifying problematic transactions and effective in deterring illegal mergers. As discussed above in section II.B., the Commission has identified significant deficiencies in the information provided in the HSR Filing that prevent the Agencies from assessing the potential harm presented by reportable transactions. In light of these deficiencies, the number of mergers investigated through the issuance of Second Requests is not instructive on whether the Agencies are fulfilling their duty to the American public to screen large mergers in advance of consummation. The Agencies must continue to review reportable transactions to determine which ones warrant the issuance of Second Requests regardless of, and despite, fluctuations in the overall number of filings.

2. Delays Associated With Premerger Review Depend on Antitrust Risk

Congress also determined how much delay would be associated with those transactions subject to mandatory premerger review, and this rulemaking attempts to adjust the information required for premerger screening in light of legislative intent to avoid delays for any deal other than those with the highest antitrust risk. The main statutory feature of the HSR Act is the suspensory waiting period, which requires that the parties not consummate the proposed acquisition until the prescribed waiting period has expired. For all transactions, the statute limits that delay by keeping the waiting period short: 30 days for most transactions and 15 days for those most at risk of not happening at all due to delay, such as cash tenders and acquisitions of assets out of bankruptcy. Congress determined to hold up cash tender offers and the purchase of assets in bankruptcy only briefly due to heightened concerns over timing. For cash tender offers, which do not require consent of the target and can sometimes be actively opposed by the target, Congress shortened the suspensory waiting period to 15 days to balance premerger notice with the intent of the securities laws, specifically the Williams Act, so as not to ''tip the balance'' in favor of the incumbent management of the target firm.[213] Similarly, for acquisitions of assets subject to bankruptcy proceedings, Congress understood that time is of the essence to prevent liquidation of productive assets and applied the shortened 15-day initial waiting period to these transactions as well. Congress thus recognized that a particular subset of transactions require especially speedy review.

At the same time, Congress provided that the Agencies can extend the waiting period for any type of reportable acquisition by requiring the submission of additional information or documentary material in response to a Second Request. The decision to issue Second Requests has significant consequences for the transaction because if that happens, the parties cannot consummate the transaction until 30 days after each party has substantially complied with the Second Requests.[214]

The Commission disagrees that the final rule entails any delay beyond that which was expressly contemplated in the HSR Act. First, the final rule does not extend the statutory waiting periods, which are established by Congress.[215] Second, Congress made clear that the initial waiting period will commence once the Agencies have received a completed Form, or a partially completed Form with a specific statement of the reasons for partial non-compliance.[216] Third, Congress directed the Commission to devise and maintain a mandatory notification program that would give the Agencies the information that is necessary and appropriate to conduct an initial antitrust assessment during the initial 15- or 30-day waiting period.

That said, the Commission does not question the need, when appropriate, to minimize delay for notified transactions, especially for non-problematic deals. In fact, the Commission believes that the final rule may shorten the overall waiting period for a significant number of transactions and perhaps even reduce the overall number of delayed transactions. As discussed above, Congress determined that 30 days was the appropriate delay for the majority of reportable transactions (other than cash tenders and acquisitions in bankruptcy), regardless of their size or economic impact. It is a feature of the HSR Act that an open market stock purchase by an individual can be subject to the same 30-day initial waiting period as a multi-billion-dollar merger of competitors operating in multiple local markets throughout the country. Yet these two transactions present very different antitrust risks.

In order to quickly dispense with those transactions that present low risk of a law violation so as to focus on those with moderate to high risk, the Agencies need more information in the HSR Filing. Any time and effort the Agencies must spend collecting necessary information that is not contained in the HSR Filing is time and effort taken away from quickly determining which deals do not warrant an in-depth investigation. Especially as it relates to cash tender acquisitions—which are among some of the largest deals reviewed by the Agencies over the years and yet are subject to a 15-day initial waiting period—the short time given for the initial antitrust assessment severely strains the Agencies' limited resources, especially during periods of intense M&A activity. See Figure 1. But the statutory time limit is absolute and if the Agencies do not issue Second Requests before the end of the initial waiting period, the parties are free to consummate the transaction.[217] This is as Congress intended, but Congress also gave the Commission the authority to determine the necessary and appropriate information that must be included in HSR Filings to make the

[213] 122 Cong. Rec. 30877 (1976) (listing a number of defensive actions the target could take to undermine the offer if it had enough time, effectively denying shareholders of the target firm the choice to accept the offer).

[214] The Agency that issued the Second Requests can grant early termination of the waiting period, permitting the parties to consummate their proposed acquisition, or a Federal court may extend the waiting period if the Agency applies for preliminary relief and the court finds that the party has not substantially complied with the information requirements of the HSR Act. 15 U.S.C. 18a(g)(2).

[215] As discussed in section V.D. below, if the parties have not executed a definitive agreement, the final rule requires that they submit a document with the HSR Filing that contains sufficient details of the transaction they intend to consummate. This may be the executed preliminary agreement, or the agreement may be supplemented by one additional dated document, such as a term sheet or the latest draft agreement. While this new requirement may cause some filers to delay notification compared to the current rules, the Commission believes this change is necessary and the delay is appropriate to avoid wasting the Agencies' time and attention on deals that may never occur or are too hypothetical or lacking material details to assess.

[216] 122 Cong. Rec. 30876 (1976). The Commission does not dispute that the HSR Act allows for substantial compliance with its requirements. In response to such arguments, the sponsors dropped the ''automatic stay'' provisions and adopted a requirement that filers ''substantially comply'' with the Second Request so that arguments that the parties had not fully complied could not hold up the deal. Under 15 U.S.C. 18a(g)(2), a district court may extend the statutory waiting periods of the HSR Act if filers fail to substantially comply with the requirements of the HSR Act.

[217] As part of the 2000 amendments to the HSR Act, Congress made plain that if the end of the waiting period falls on a Saturday, Sunday, or legal public holiday, then the waiting period is extended to the next day that is not one of those days. 15 U.S.C. 18a(k). This change was necessary to eliminate gamesmanship by parties who timed their compliance so that the waiting period ended on a weekend or holiday, effectively shortening the waiting period to the previous business day. 146 Cong. Rec. S11872 (daily ed. Dec. 15, 2000) (statement of Sen. Kohl).

statutory scheme work—not for the purpose of minimizing delay but for the purpose of enforcing the antitrust laws for the benefit of the public. That is the problem this rulemaking addresses: by adjusting the amount of information available to the Agencies on the first day of the waiting period, the final rule makes possible quick but thorough premerger review for all reportable transactions.

For many years, and mainly due to the lack of sufficient information contained in HSR Filings, many filers and practitioners have become accustomed to artificially lengthened waiting periods. In 2013, the Commission issued a rule that formalized a previously informal process that offers filers the option to withdraw and refile their filings without paying an additional filing fee. The option to withdraw-and-refile was intended to benefit both the parties and the Agencies by providing an additional 15- or 30-day waiting period for the Agencies to review the transaction without issuing Second Requests while seeking additional relevant information on a voluntary basis from the merging parties or from third parties.[218]

As shown in Table 3 below, the option to withdraw-and-refile has been used with some frequency by filers to give the Agencies more time to conduct an initial premerger assessment. Based on the Agencies' review of their HSR-related investigations during the five-year period of FY 2018 to 2022, parties withdrew their HSR filing and refiled in a total of 546 transactions. In the majority of these extended investigations, the Agencies determined not to issue a Second Request: nearly two-thirds of the time, opting to withdraw and refile resulted in the transaction closing at the end of the initial waiting period, thereby avoiding the cost and burden of a Second Request investigation. That is, once the filing parties submitted information beyond what was submitted with the HSR Form, the investigating Agency was able to determine that the transaction did not warrant Second Requests.

Table 3: Withdrawn & Refiled Transactions Fiscal Years 2018 – 2022

	5 Year Total
Transactions	546
Transactions Not Issued Second Request	365
Percentage Not Issued Second Request	67%

While the parties can rely on the option to withdraw and refile as an ad hoc tactic to avoid the issuance of Second Requests, the Agencies' experience illustrates in a very tangible way the inefficiencies associated with the current HSR Form. Over the five years sampled, an average of 73 transactions each year (546 in total) were delayed by an additional 30 days and filers were burdened by having to submit additional materials on a voluntary basis even though the investigation did not lead to the issuance of Second Requests. These delays impose costs on the parties and the Agencies, as well as third parties contacted during the extended initial review period.

Moreover, getting more time to review the transaction does not address the information deficiencies outlined above and addressed by the final rule. While serving as an existing work-around to give the Agencies more time to collect additional information not contained in the HSR Filing, the option to withdraw-and-refile is a poor substitute for having the necessary information submitted with the HSR Filing for several reasons. First, the current information requirements leave important gaps, as detailed above in section II.B., leading staff to flag filings for no-action when in fact they may warrant a closer review.[219] In practical terms, the HSR Filing must contain sufficient information from the filers to allow the Agencies to spot transactions that may warrant follow up. Merely adding time on the clock does not fill the information gaps identified above.

Second, withdraw-and-refile is optional for filers and thus is not a tool the Agencies can rely on to collect more information when needed. While parties may decide to delay their transaction to lower the chances of receiving a Second Request, in many instances the parties do not withdraw and refile precisely because they fully expect to receive Second Requests. When the parties do withdraw and refile, the Agencies spend considerable time waiting for answers to key questions; in any event, having more time is not the same as having the information needed to conduct an initial antitrust assessment. The Agencies' experience is that these voluntary submissions are often late or incomplete. When the information arrives near the end of the extended waiting period, there is often not enough time to review and verify the information. As a result, investigations that are extended through a withdrawal and refile are costly in time and effort for both Agency staff and the parties: extra time does not always translate to collecting the right information to make the initial determination whether the transaction should be fully investigated through the issuance of Second Requests.

Finally and most importantly, a filer's submission of any additional information beyond what is required for an HSR Filing is voluntary. Given that the Agencies have no ability to demand compliance with voluntary requests, there is an overwhelming incentive for filers to prioritize the collection and submission of information suggesting that there is no competitive problem, rather than supplying the necessary information in an objective and neutral manner. Thus, while the agency may receive additional relevant information on a voluntary basis, it remains extremely challenging for the Agencies to both review and verify this information in whatever short period of time is available to decide whether to issue Second Requests.

Expending so many resources on withdraw-and-refile investigations is

[218] 78 FR 10574, 10576 (Feb. 14, 2013).

[219] *See supra* note 24 (citing research finding that consummated hospital mergers that received early termination resulted in the largest average percentage price increase).

inefficient both for the parties and the Agencies and is a source of undue delays for many deals every year, because having more time is not a substitute for having sufficient and reliable information provided on a mandatory basis on the first day of the waiting period. The Commission believes that requiring more information in the HSR Filing through a final rule that is focused on surfacing competition problem areas will reduce the need for extended withdraw-and-refile investigations for a significant number of transactions that do not require Second Requests.

Expanding the information that filers are required to provide upfront has certain benefits for filers and gives full effect to the purpose of a very short initial waiting period: because the information will be available to the Agencies on the first day of the initial waiting period, this will reduce delays for deals that do not receive Second Requests but nonetheless are delayed because staff must collect information from third parties or public sources, including when the parties withdraw and refile their HSR Filing. In addition, having this information upfront may allow Agency staff to narrow the areas of focus to only those business lines that require further investigation.[220] Based on the Commission's experience, the additional information will allow the Agencies to significantly reduce burdens on filing parties in many circumstances.

Moreover, the additional information required by the final rule addresses the fundamental information asymmetry that currently exists between what the parties know about their business and what information they are required to reveal to the Agencies in the HSR Filing. Shifting the burden of information collection from the Agencies to the filing parties minimizes the burden on Agency staff to collect basic business information about the filers from other sources, such as their customers or other market participants, or from public sources, which may not surface key confidential business information known only to the parties. It also minimizes the burden on those third parties. This basic business information is relevant to the Agencies' antitrust assessment and often comes in late in the initial waiting period close to when the Agencies need to determine whether to issue Second Requests.

Moreover, certain information is most readily and reliably available from the parties to the transaction. Although Agency staff collect relevant information from other sources including third parties during the initial waiting period, the benefit of getting this information from the filing parties is that it is likely more accurate and up-to-date and therefore more reliable for the purpose of quickly conducting a premerger assessment of antitrust risk. Obtaining basic business information about the operations of the filing parties secondhand from third parties and public sources is no substitute for getting that information directly from the parties themselves. The parties will have the most reliable and relevant information necessary to conduct a preliminary assessment of the transaction during the initial waiting period.

Having reliable and accurate information directly from the entity most likely to have it reduces overall information-collection costs and delays. That is just good government, according to some members of Congress: ''Requiring transacting parties to provide regulators with the information necessary to examine a proposed merger is a commonsense way to save taxpayer dollars and enable antitrust enforcers to fulfill their congressional mandate and protect consumers, the economy, and national security.'' [221]

To further reduce delays for transactions that pose little or no antitrust risk based on information contained in the HSR Filing, the statute also provides the Agencies with the discretion to grant an early termination of the initial waiting period, reducing the statutory 15- or 30-day delay to something less.[222] For many years, the Agencies routinely granted early termination to those filers that requested it.[223] Contrary to the assertions of some commenters, the Commission reviews the information provided in *every* filing (typically two filings per transaction) [224] to ensure compliance with the requirements of the HSR Act and to conduct a preliminary assessment of antitrust risk. The decision to grant discretionary termination of the waiting period prior to the statutory deadline is the result of staff review of the information contained in the HSR Filing, a determination that takes time, knowledge of the HSR Rules, and often additional research from public sources to ensure that there is little to no risk that the transaction requires additional investigation prior to consummation. There is also the additional time spent coordinating both Agencies' conclusions as well as processing the granting of early termination through publication in the **Federal Register**.[225]

Prioritizing staff resources to reduce delays through early termination over the identification of problematic deals became impractical during the latest surge in HSR-reportable transactions, beginning in the fall of 2020 when the Agencies were faced with an unprecedented increase in merger filings.[226] As reflected in Figure 1 above, the number of HSR-reportable transactions spiked in FY 2021, resulting in more than twice the number of filings as compared to the prior year. Given the time and effort required to collect additional information during the initial waiting period—information that is not contained in the current Form but that bears directly on whether the Agencies should conduct a more in-depth investigation or grant early termination—the Agencies temporarily suspended the granting of early termination, first briefly in order to adjust to the challenges of processing premerger filings during the COVID–19 pandemic, and then again due to a surge in merger filings.[227]

As an additional measure, the Commission determined that it would

[220] As discussed elsewhere, the Commission did not consider any ''burden'' associated with better detection of illegal mergers. Identifying additional transactions for investigation and possible challenge is a benefit of effective and efficient premerger review.

[221] Comment of Sen. Elizabeth Warren et al., Doc. No. FTC–2023–0040–0711 at 5.

[222] 15 U.S.C. 18a(b)(2).

[223] Not all parties request early termination; whether to request early termination is solely at the discretion of the filing parties. Because the Agencies are required to make public grants of early termination through publication in the **Federal Register**, some filers may prefer not to have their acquisitions made public in this way.

[224] As reflected in appendix A of the Annual HSR Reports, the Agencies typically receive two filings for each transaction, one from the acquiring person and one from the acquired person. In FY 2022, the Agencies reviewed 6,288 filings for 3,152 reported transactions. Fed. Trade Comm'n & U.S. Dep't of Justice, Hart-Scott-Rodino Report, Fiscal Year 2022 appendix A (FY 2022).

[225] Commission staff take seriously the statutory obligation not to disclose information about an HSR Filing. Because the granting of early termination requires public notice in the **Federal Register** and is often the first indication that a proposed acquisition is in the works, staff must take great care to avoid mistakes when processing these requests.

[226] Fed. Trade Comm'n & U.S. Dep't of Justice, Hart-Scott-Rodino Annual Report, Fiscal Year 2021 appendix B (FY 2021) (reporting monthly HSR filings for FY 2012 to FY 2021). *See* Statement of Chair Lina M. [227] *See* Press Release, Fed. Trade Comm'n, ''FTC, DOJ Temporarily Suspend Discretionary Practice of Early Termination'' (Feb. 4, 2021), *https://www.ftc.gov/news-events/news/press-releases/2021/02/ftc-doj-temporarily-suspend-discretionary-practice-early-termination.*

provide notice to filers whose deals could not be adequately screened during the initial waiting period, warning them that although the waiting period had expired, the transaction remains subject to antitrust challenge under section 7.[228] In the Commission's view, these pre-consummation warning letters are consistent with the legislative intent that lack of agency action prior to the expiration of the initial 15- or 30-day waiting period does not bar the Agencies (or other enforcers of the Clayton Act such as States or private parties) from later challenging the notified transaction. That is, premerger review provides the Agencies with the opportunity to investigate and challenge suspect transactions as violative of section 7; it does not require nor allow the Agencies to determine that the merger does not or would never violate section 7.

These recent adjustments to the Agencies' premerger review process reflect the burdens on Agency staff to triage filings during the very limited statutory period allowed for the initial review, which underscores the need for additional information at the outset of the initial waiting period. Even for those transactions in which the parties give the Agencies additional time by withdrawing and refiling their notification, relying on voluntary submissions has not been sufficient to overcome the lack of relevant information needed to conduct a robust screening for a significant number of deals.

As several commentators noted, it is appropriate that the Agencies, who have the responsibility to identify which transactions should be challenged, address the significant information asymmetry between the parties and the Agencies by collecting more information from the parties upfront. The Commission agrees. The Commission has determined that the information deficiencies of the current reporting requirements are imposing undue delay on those transactions that the Agencies determine do not require intervention prior to consummation. The final rule addresses these inefficiencies by shifting more of the costs of information acquisition to the merging parties, both because they are the most reliable and ready sources for that information and to reduce the costs and delays associated with information acquisition from other sources, including third parties. The Commission believes that the final rule represents a reasonable adjustment to the information requirements for premerger notification that will reduce the number of transactions that are delayed beyond the initial review period.

3. The Purpose of the HSR Form Versus Second Requests

Several commenters asserted that if the Agencies need more information, they should issue more Second Requests as an alternative to issuing this final rule, because that is the mechanism Congress gave the agencies to collect more information. Commenters also compared the requirements of the proposed rule to those contained in a Second Request, asserting that this rulemaking would inappropriately convert the HSR Filing into the equivalent of a Second Request in terms of scope and burden. As discussed below, the Commission disagrees with these commenters. Congress gave the Agencies a mandate to collect information that is necessary and appropriate in the HSR Filing to determine whether the reported transaction may violate the antitrust laws, which would justify the burden (on both the parties and the Agency) associated with issuing Second Requests. The purpose of requiring an HSR Filing is to give the Agencies time and information to conduct mandatory premerger screening. The purpose of issuing Second Requests is to conduct an in-depth review of other information and documentary materials that would allow the Agency to determine whether to challenge the transaction prior to consummation. The Commission has concluded that the final rule more appropriately reflects the purpose of the statutory scheme, which requires the information from all filers that is necessary for premerger screening but requires extensive information in response to a Second Request (which today, often represents millions of documents and terabytes of data) only from those filers whose transactions warrant an in-depth antitrust investigation. Thus the final rule is a reasonable exercise of the Commission's rulemaking authority to address the information deficiencies identified in section II.B. rather than rely on the extraordinarily costly alternative of using Second Requests to address those deficiencies.

Commenters point to research that indicates there is a high probability that a transaction will be challenged if the Agencies issue Second Requests and suggest that this means that Second Requests are the most reliable tool for the Agencies to identify potentially harmful deals. But a close read of the study cited by commenters reveals that there are reasons to question the conclusions commenters have drawn from the low number or high through-rates of Second Requests. Billman and Salop examined the Agencies' enforcement record and calculated that for those transactions that receive a Second Request, 28 percent are cleared as proposed.[229] Billman and Salop also report that the percentage of Second Request investigations has fallen over time, from about 3.49 percent in 2001 to 2.92 percent in 2020. These figures are consistent with information reported by the Agencies in annual HSR Reports.[230] In their report, Billman and Salop contend that the reason behind the falling number of Second Requests is limited agency resources, not diminishing antitrust risk due to mergers:

> The agencies issue so few second requests because they have been budget constrained during this entire period. Under these circumstances, the agencies must engage in a type of triage process. Being limited in the number of second requests they can issue and cases that they can afford to litigate in court, the agencies target only the limited number of most problematical looking mergers for second requests. Not surprisingly, they generally discover evidence of potential anticompetitive effects. And not surprisingly, the firms generally consider the validity of the concerns, and most are then willing to accept a consent decree or abandon the transaction. Indeed about 26% (*i.e.,* 254/969) of the firms that receive second requests choose to abandon the transaction even *before* a complaint is issued.[231]

The Commission is well aware of the challenges of fulfilling its mission to prevent harmful mergers with existing resources. Fully resourcing the Commission's competition mission—especially merger review—has been an ongoing challenge. For instance, the Commission's headcount remains well below what is needed in light of the volume and complexity of proposed deals. Over the past ten years, the absolute number of HSR filings has nearly doubled, while the number of FTC employees assigned to competition work has remained nearly flat. As a result, the Commission has been forced to make difficult triage decisions and forgo potentially worthy investigations.[232] Moreover, funding

levels for the antitrust agencies has not kept pace with the impressive growth of the U.S. economy: according to one report, from 2010 to 2019, U.S. GDP increased 37 percent but appropriations for the Antitrust Division and the FTC increased only 3 percent.[233]

Commenters who supported expanded information requirements suggested that limited resources justify this rulemaking, while those opposed claimed that resource limitations are the real source of underenforcement of the antitrust laws, a problem that will not be solved by adding burdensome new information requirements. Whatever the funding levels, the Agencies must deploy their resources to be good stewards of public funds and make resource allocation decisions to pursue their mutual mission to enforce the antitrust laws for the benefit of the public. The Commission has concluded that regardless of resource levels, it is critical to the task of detecting illegal mergers that the HSR Filing contain sufficient information for an effective premerger antitrust assessment of the transaction rather than relying on issuing more Second Requests to compensate for information deficiencies in the HSR Filing.

The Commission has determined there are several reasons why issuing more Second Requests is not a reasonable alternative to address the information gaps discussed in section II.B. above. First, without the additional information required by the final rule, the Agencies would continue to struggle to uncover key facts necessary to determine whether to issue Second Requests for reported transactions that warrant in-depth review. The Agencies are currently making these assessments and relying on Second Requests when necessary, but they are doing so knowing that there are deficiencies in the information currently collected on the HSR Form, resulting in significant extra effort to generate sufficient information to make that determination prior to the expiration of the initial waiting period. In light of the deficiencies in the information currently collected that are discussed in section II.B., the Commission has determined that the status quo does not permit the Agencies to fulfill their statutory mandate to identify those transactions that warrant the issuance of Second Requests.

Second, issuing more Second Requests is an extremely costly alternative to the final rule. The costs, burdens, and delay associated with Second Requests—for both the parties and the Agencies—are well documented. In 2000, Congress amended the HSR Act to provide for an optional internal review process for Second Request recipients to object to the breadth and cost of complying with those requests [234] and requiring the Agencies to conduct ''an internal review and implement reforms of the merger review process in order to eliminate unnecessary burden, remove costly duplication, and eliminate undue delay, in order to achieve a more effective and more efficient merger review process.'' [235] Yet despite Agency reforms to reduce burdens and costs, [236] the AMC noted the widespread belief that complying with a Second Request imposed significant costs. The AMC cited a survey conducted by the Antitrust Section of the American Bar Association which reported that, on average, investigations during the second waiting period took seven months and resulted in median compliance costs of $3.3 million.[237] A more recent survey conducted in 2014 by the Mergers & Acquisitions Committee of the ABA reported that average cost of compliance with a Second Request was $4.3 million among respondents.[238] Another study shows that Second Requests impose significant delays and risks, even for deals that are ultimately not challenged by the Agencies, increasing the time required for premerger review from an average of 98 days (3.3 months) for acquisitions that do not receive a Second Requests to 237 days (7.9 months) from announcement to closing.[239]

The Commission has determined that the final rule is a better regulatory alternative than issuing more Second Requests because the final rule provides the Agencies with the information necessary for an efficient and effective premerger assessment and to determine which reportable transactions warrant the issuance of Second Requests. The Commission considers the costs that would be associated with issuing more Second Requests as an alternative to the final rule to be unnecessary and unjustified. By relying on only the information contained in current HSR requirements and issuing more Second Requests, the Agencies would be imposing these significant costs on deals that are even more ''on the margin'' than the ones that are currently identified for a Second Request investigation. Issuing more Second Requests without adjusting the information in the HSR Filing would most likely result in significant costs for additional transactions and undue delay for even more deals that are not ultimately challenged in court.

More importantly, without addressing the information deficiencies outlined in section II.B., the Agencies would miss certain transactions that warrant further review. For these transactions, which are currently not subject to Second Requests, the costs of complying with the additional information requests for the HSR Filing are justified by the enhanced ability of the Agencies to detect the potential for the transaction to violate the antitrust laws. In other words, the final rule makes it more likely that the transactions that present the most significant risk violating the antitrust laws, and therefore most clearly warrant the costs and delays associated with an in-depth investigation, are those that will receive Second Requests.

As an added benefit, the additional information contained in the HSR Filing will allow the Agencies to focus their investigation on those aspects of the transaction that create antitrust risk, and

minimize ''overly broad'' Second Requests, which can also impose unnecessary costs and delays. Specifically, the final rule provides the Agencies with the information that is necessary to make the critical decision whether and how to burden the filers and the Agencies with the costs and delays associated with an in-depth investigation of the reported transaction.

Indeed, one goal of this rulemaking is to reduce the number of Second Request investigations that do not lead to an enforcement action. Imposing substantial costs in addition to undue delay on transactions that are unlikely to face a court challenge is the wrong response to the information deficiencies outlined in section II.B. The Commission has determined that imposing minimal additional costs on all filers to properly conduct premerger screening will likely reduce the number of transactions that receive a Second Request but do not face a court challenge, a very significant benefit to filers. The Commission expects that, on balance, the final rule will reduce the number of unnecessary or overly broad Second Requests and that this outcome is consistent with the statutory scheme created by Congress.

Much of the increased cost of a Second Request investigation (for both the parties and the Agencies) is due to the increasing complexity of merger litigation, and including the costs associated with post-complaint discovery. Federal judges overseeing merger trials routinely remark on the scope and effort of proving and refuting the facts needed to assess whether a proposed transaction violates the antitrust laws.[240] The Agencies' costs in litigating these cases have also increased significantly in recent years, especially the cost of hiring outside experts to support the litigation.[241] To a large extent, the scope and burden of a Second Request is driven by the growing need for data and other evidence required to make an informed decision whether to devote scarce resources to a particular case in light of the likelihood that the agency can establish liability under section 7 of the Clayton Act.

Of the commenters objecting to the proposed rule, some argued that the final rule would collapse the distinction between the notification form and a Second Request. The Second Request is the Congressionally mandated tool for the collection of additional information to determine whether to challenge the transaction prior to consummation. The Commission states that it is not its intention in any way to require in the initial notification all the information that may be necessary to determine whether to file a complaint alleging an antitrust violation. Instead, the final rule ensures that the Agencies have the information necessary to identify those transactions that require the issuance of Second Requests, a decision that must be made prior to the expiration of the statutory waiting period. The Commission disagrees that the final rule requires anything near the amount of data and documents sought in Second Requests, which are tailored for each recipient. For example, the Commission's Model Second Request requires the submission of all documents related to pricing for any relevant product for the last three years[242] and the Department of Justice's Model Second Request requires the submission of each database or data set containing a range of information about the relevant product.[243] That level of detail and analysis is not required by the final rule and is not warranted in an HSR Filing. In the final rule, the Commission has identified the information that the Agencies need to conduct a preliminary screen for antitrust risks. A Second Request represents a whole different level of detail and analysis, one much more aligned with determining whether there are facts sufficient to establish to a court that the merger may substantially lessen competition or tend to create a monopoly.

As discussed in section III.A., the Commission believes that it is consistent with the statutory premerger regime to collect certain critical information directly from those involved in the transaction and to have that information available on the first day of the initial waiting period. The Commission believes that it is well within its statutory authority to require minimally sufficient information in the HSR Filing that is necessary and appropriate to screen each reported transaction for antitrust risk without resorting to issuing more Second Requests to require information that is not currently submitted with the HSR Form.

Moreover, the Commission believes that Second Requests should continue to be reserved for those transactions more likely to violate the antitrust laws and to result in measurable harm if not blocked prior to consummation. Issuing more Second Requests as a remedy for deficient HSR Filings imposes opportunity costs on the Agencies, diverting resources that could be used to address other potential violations of the antitrust laws. Moreover, as discussed above, one potential benefit of the final rule is that it may reduce the number of Second Requests or limit their scope. Issuing more Second Requests runs counter to that goal and would also impose significant additional costs on the Agencies, the filing parties, and third parties. In the words of one commenter: ''These proposed changes exemplify good government. They would save regulators valuable time and resources in evaluating merger proposals, making the agency's processes more efficient.'' [244]

In sum, in adopting this final rule, the Commission believes that it has identified the specific additional information that, in the Agencies' experience, is most relevant to determining whether to issue Second Requests or narrow their scope. Moreover, as detailed below in sections IV. through VI., the Commission has made significant modifications in the final rule to better balance the need for additional relevant information while avoiding undue delay and cost where the likely benefit to the Agencies is low, especially for those deals that they can quickly determine are not likely to violate the antitrust laws. The Commission believes that the final rule, as modified, would better address the information deficiencies outlined above as compared to other available regulatory options such as relying on more Second Requests.

The Commission has also considered whether to rely on the expanded use of voluntary supplemental submissions from the parties, including as part of a pull-and-refile investigation, as an alternative to the final rule. See section III.A.2. But this alternative does not address the information deficiencies that this rulemaking has identified with

the current information requirements. Without the collection of information related to the antitrust risks identified in section II.B., the Agencies lack a basis to identify the need for additional voluntary submissions from the parties. The Agencies are already relying on supplemental submissions from a large number of filers, often resulting in the parties withdrawing and refiling their notification. See Table 3. Routinely requiring voluntary submissions from even more filers as an alternative to obtaining needed information in the HSR Filing would impose unnecessary burden and delay on filings that are not currently flagged for follow up.

Based on the Agencies' experience of conducting premerger review for over four decades, the Commission identified the additional data and documents that, if submitted with the HSR Filing, would reduce delays and burdens associated with information-gathering during the initial waiting period and satisfy the Agencies' mandate to conduct a premerger assessment of each reported transaction. To that end, the final rule targets information that is likely already available to filers, such as documents related to the transaction, as well as historical data and documents about their business, including ordinary course business plans and reports. The final rule marries descriptive responses with documents submitted with the HSR Filing, providing the Agencies with a holistic view of the operations of each party, including any existing business relationships that would be affected by the transaction. Overall, the final rule aligns the information requirements of the HSR Filing with the Agencies' task of identifying transactions that may violate the antitrust laws. For many of the new requirements, parties only have to respond if they identify an existing business relationship (*e.g.,* one party is the other party's competitor or supplier). Based on the Agencies' experience, parties in most cases do their own assessment of the antitrust risk associated with the planned transaction before submitting an HSR Filing and will therefore already have relevant information about any existing business relationship. In short, the Commission has calibrated the HSR Filing's reporting requirements so that the filing contains sufficient information for the Agencies to determine whether the transaction is one that is likely to raise antitrust concerns. The Commission believes that the final rule is well within the authority given to it by Congress to implement a notification scheme that minimizes costs and delays associated with mandatory premerger review and yet generates the benefits of preventing illegal mergers prior to consummation.

B. Major Questions Doctrine

Two commenters suggested that the proposed rule implicates the major questions doctrine.[245] The Commission disagrees. According to the Supreme Court, the major questions doctrine is implicated in ''extraordinary cases . . . in which the history and the breadth of the authority that the agency has asserted, and the economic and political significance of that assertion, provide a reason to hesitate before concluding that Congress meant to confer such authority.'' [246]

This rulemaking does not involve a major question as the Supreme Court has used that term. The final rule merely updates the disclosure requirements for acquisitions that already are required to submit to mandatory premerger notification. As reflected in Table 1, transactions reported under the HSR Act constitute only a fraction of the total number of mergers and acquisitions that occur each year in the United States. Congress has determined that most acquisitions should not be subject to premerger review, and this rule does not impact them.

Considerations of history and breadth also demonstrate that the final rule does not involve a major question. The breadth of the Commission's authority here ''fits neatly within the language of the statute. . . .'' and is well established.[247] The Commission has clear congressional authorization to issue rules and a long history of exercising its authority to promulgate HSR Rules under section 18a(d). The Commission has made both substantive and ministerial amendments to the rules dozens of times to improve the program's effectiveness and to adjust the reporting requirements to keep pace with market realities.[248] Requiring

[245] One commenter also argues that the Commission's rule runs afoul of the non-delegation doctrine. The Commission disagrees. First, the Commission's rule has no bearing on the authority Congress delegated to the Commission when it passed the HSR Act. Second, Congress' delegation of rulemaking authority to the Commission does not run afoul of the non-delegation doctrine. The non-delegation doctrine is based on the Supreme Court's interpretation of Article I, Section 1 of the Constitution, which vests all legislative powers in Congress. The Court has interpreted this clause to mean that Congress cannot delegate its legislative power to another branch of government without supplying an intelligible principle. *See J.W. Hampton, Jr., & Co.* v. *United States,* 276 U.S. 394, 409 (1928); *Gundy* v. *United States,* 139 S. Ct. 2116, 2129 (2019). Congress provided several intelligible principles in the HSR Act to guide the Commission's exercise of authority. For instance, it directed the Commission to require notification in such form and contain such documentary material and information relevant to a proposed acquisition as is necessary and appropriate to enable the Agencies to determine whether the acquisition may, if consummated, violate the antitrust laws. Congress also stated that the Commission may define terms and exempt classes of persons, acquisitions, transfers, or transactions not likely to violate the antitrust laws from the reporting requirements.

Continued

information necessary and appropriate to determine whether a transaction, if consummated, may violate the antitrust laws is certainly a ''tool'' in the Commission's ''toolbox,'' given the Commission's history of taking action against anticompetitive mergers.[249] Since 1977, the Commission and the Antitrust Division of the Department of Justice have published an annual report outlining their efforts to protect competition by identifying and investigating mergers and acquisitions that may violate the antitrust laws.[250] These reports demonstrate that premerger notification and merger enforcement is an area that falls squarely within the Commission's ''wheelhouse.''[251]

Even if the final rule could be characterized as implicating a major question, the HSR Act provides ''clear congressional authorization'' for the rule.[252] Congress spoke clearly when it granted the Commission authority to determine the form and content of premerger notifications as necessary and appropriate to enable the Agencies to determine whether a proposed acquisition may, if consummated, violate the antitrust laws,[253] and the final rule falls squarely within that delegation of authority. The Commission is asking filers to provide information necessary to evaluate whether a transaction may violate the antitrust laws. This information is missing from the current filings, and it is appropriate that filers, who are in the best position to report basic information about their own businesses, provide that information. The rule updates are necessary and appropriate for the Commission to accomplish the goals Congress set out for it: effective premerger review as a tool to prevent illegal mergers prior to consummation and fully enforce the antitrust laws' proscription against undue concentration. And just recently, Congress increased the requirements of the premerger notification program by requiring the Commission to collect information about foreign subsidies in order to use this data as part of the Agencies' premerger review.[254] Congress has left it to the Commission to ''fill up the details'' based on the many clear principles articulated in the HSR Act [255] and in furtherance of sound and effective enforcement of the U.S. antitrust laws. Accordingly, even if the major questions doctrine applies, the Commission's authority to issue the final rule is clear.

C. Benefits and Costs of the Final Rule

The final rule is intended to address existing information deficiencies in the current HSR Rules so the Agencies can identify transactions that may violate the antitrust laws during the short period of mandatory premerger review provided in the HSR Act. The Commission has determined that the status quo is insufficient because it leaves information gaps that prevent the Agencies from efficient and effective premerger screening to identify which transactions require in-depth review. The final rule also addresses significant information asymmetries between the parties and the Agencies by shifting more of the costs of information acquisition to the parties, who are most familiar with their business operations and structure and who are pursuing the transaction under review. The Commission has considered alternatives to the final rule that would rely on other regulatory options, including the Short Form Alternative discussed in section III.E., and has determined that those alternatives offer different tradeoffs between benefits and costs. The Commission believes that the final rule has the best balance of benefits and costs within the statutory scheme of the HSR Act because it imposes less delay and is less costly than issuing more Second Requests, and it imposes less delay and provides more certainty regarding the completeness of the information than relying on more extensive voluntary submissions of information. Moreover, the final rule is superior to the short form alternative, an option suggested by commenters and discussed below in section III.E., because the Commission lacks a basis at this time to identify a set of transactions that should be eligible for short form treatment using the current information requirements. Most importantly, none of the other alternatives close the information gaps identified in section II.B. to permit the Agencies to effectively and appropriately identify a subset of filings for which Second Requests are warranted and to make critical resource decisions, preventing the Agencies from fulfilling their mandate to conduct a premerger antitrust assessment of reported transactions.

Given that the final rule is the best of the available alternatives, the Commission now addresses comments on whether it is a reasonable exercise of the Commission's statutory authority to adopt the final rule to enable the Agencies to determine whether an acquisition may, if consummated, violate the antitrust laws in fulfillment of their premerger review obligations under the HSR Act.

1. Benefits

The Commission has determined that, due to evolving commercial realities, the current information requirements for the HSR Form and Instructions are not delivering the benefits of mandatory premerger review as contemplated by Congress. As discussed in section II.B., changes in M&A activity, corporate structures, and investment strategies have exposed significant information gaps that undermine the Agencies' ability to efficiently and effectively identify transactions that may violate the antitrust laws during the initial 30-day waiting period based on information contained in the current HSR Form. As a result, the Agencies lack sufficient information about the parties and transaction to conduct an initial antitrust assessment for all types of potential harm that could occur due to the merger. Moreover, these changes have amplified information asymmetries between what the parties know about their business activities and how the Agencies collect the information necessary to decide whether to issue Second Requests. The Commission has determined that to realize the benefit of detecting illegal mergers prior to

additional filing fee); 78 FR 68705 (Nov. 15, 2013) (defining and applying the concepts of ''all commercially significant rights,'' ''limited manufacturing rights,'' and ''co-rights'' in determining whether the rights transferred with regard to a patent or a part of a patent in the pharmaceutical industry constitute a potentially reportable asset acquisition under the Act); 81 FR 60257 (Sept. 1, 2016) (allowing DVD submissions and clarifying the Instructions to the Form); 82 FR 3212 (July 12, 2017) (amending the Form); 83 FR 32768 (July 16, 2018) (amending rules for clarity, allowing use of email, and updating Instructions); 84 FR 30595 (June 27, 2019) (requiring use of 10-digit codes based upon the North American Product Classification System in place of the 10-digit codes based upon the North American Industry Classification System); 88 FR 5748 (Jan. 30, 2023) (amending the Rules to conform to the new filing fee tiers enacted by the Merger Filing Fee Modernization Act of 2022, 15 U.S.C. 18b); 89 FR 7609 (Feb. 5, 2024) (amending Parts 801 and 803 of the Rules to make ministerial changes required to reflect the annual adjustment of the filing fee thresholds and amounts required by 2022 Amendments).

consummation through mandatory premerger review, the Agencies need more information relevant to the antitrust risk of reportable acquisitions in the HSR Filing.

The Commission has considered the extent to which the final rule furthers the Congressional goal of preventing illegal mergers prior to consummation through mandatory premerger review. The benefit of having sufficient information in the HSR Filing to screen for all types of antitrust risks derives from several sources:

(1) the non-consummation of harmful mergers that otherwise would not have been caught during premerger screening, whose harm continues unless and until the merger is unwound and competition in the affected market is restored, if it can be restored at all;

(2) the reallocation of staff hours from attempting to collect additional necessary information from the parties on a voluntary basis and reduced uncertainty that delay and insufficiency create for resource allocation decisions;

(3) the reallocation of staff hours from collecting additional necessary information from third parties regarding the parties' business operations;

(4) the reduction in burden required for third parties to respond to the Agencies' outreach to provide information known to the filing parties, but not currently required by the Form;

(5) improvements in premerger screening through

(i) more accurate identification of transactions requiring in-depth review;

(ii) the reduction in the number of HSR Filings withdrawn and refiled for the purpose of allowing Agency staff to collect and review more information from the parties;

(iii) reduction in delays associated with HSR Filings, including those that are withdrawn and refiled but do not receive Second Requests;

(iv) the narrowing of issues required to properly focus any in-depth review, including through the issuance of more targeted and less burdensome Second Requests;

(v) the reduction in the number of Second Request investigations that do not ultimately result in enforcement or voluntary restructuring; and

(6) a more efficient allocation of resources devoted to merger enforcement, including by avoiding expensive and time-consuming litigation to unwind consummated mergers that cause harm but were not identified under the current rules.

Consistent with Congressional intent, all of these benefits accrue to the American public in the form of reductions in the harmful effects of illegal consummated mergers, including price increases or reductions in output, reductions in quality and innovative activity, lower wages, and other effects, and more effective use of public resources devoted to antitrust enforcement. Other market participants that would otherwise be harmed by an illegal merger also benefit from improved detection that leads to enforcement that prevents or neutralizes the harm from that merger.

Many of these benefits cannot be quantified, or quantification cannot be done with a high degree of reliability. Where the Commission is unable to estimate a benefit quantitively, it provides a qualitative description of the benefit using the best available methods,[256] and in light of the purpose of mandatory premerger review. Based on its experience gathered over decades of premerger review of transactions reported under the HSR Act, the Commission considered the following benefits that would derive from the final rule as compared to the status quo.

a. Detecting Additional Harmful Mergers

Section 7 of the Clayton Act prohibits an acquisition where the effect of such acquisition may be to substantially lessen competition or to tend to create a monopoly. Acquisitions that have these effects deprive the public of the benefits of competition, which include lower prices, improved wages and working conditions, higher quality and resiliency in the supply chain, and more innovation and choice, among other benefits. section 7 of the Clayton Act was designed to arrest anticompetitive tendencies in their incipiency,[257] and mandatory premerger review gives the Agencies time and information to assess whether a reported transaction may violate the antitrust laws and seek to block it in Federal court prior to consummation. While it is difficult to calculate with precision the likely ill effects of an acquisition before it happens, Table 2 above contains estimates of potential harm from mergers in cases that were litigated by the Agencies in recent years, representing a range of outcomes from mergers that were not consummated as a result of premerger review and a subsequent Agency enforcement action. For any particular illegal merger, the potential for harm may be small or large and depends on many factors, including the size of the companies involved, the geographic scope of their operations, the number of customers they serve, and the value of their products. Many of the benefits of competition that may be lost due to a merger are more difficult to quantify, such as the loss of innovation competition or degradation in the quality of products or services offered. Thus, the magnitude of the anticompetitive effect of any particular merger that would have occurred but for the Agencies' intervention is imprecise at best and does not capture the full impact of the loss of dynamic and beneficial competition now and in the future.

In connection with their enforcement and reporting mandates, the Agencies also provide public estimates of the average consumer savings resulting from antitrust enforcement, including mergers that the Agencies challenge in an enforcement action (which include negotiated settlements requiring divestitures or transactions that are restructured prior to consummation). These estimates are contained in each agency's budget justification submitted to Congress.[258] Table 4 below summarizes the Agencies' estimates of harms to consumers and other market participants that would have occurred in the affected markets but for the agency's antitrust enforcement action. These savings reflect all civil antitrust enforcement activities, which include merger enforcement.

Dec. 29, 2023).

[258] The Agencies provide annual budget justifications to Congress which contain these estimates. *See* Fed. Trade Comm'n, ''Budget, Performance, and Financial Reporting,'' *https://www.ftc.gov/about-ftc/budget-strategy/budget-performance-financial-reporting* (collecting reports) and U.S. Dep't of Justice, ''Budget and Performance,'' *https://www.justice.gov/doj/budget-and-performance* (collecting reports).

Table 4: Annual Estimated Consumer Savings from Antitrust Enforcement (Millions of Dollars)

Fiscal Year	FTC	DOJ	Total
2014	1,419	3,378	4,797
2015	3,400	3,387	6,787
2016	3,610	2,271	5,881
2017	3,710	1,408	5,118
2018	3,760	928	4,688
2019	4,860	3,939	8,799
2020	2,681	712	3,279
2021	2,840	1,567	4,407
2022	3,190	529	3,719
2023	3,290	1,822	5,112
		Average Annual Savings	**5,259**

The Agencies' estimates of consumer savings in Table 4 are calculated based on the relevant product and geographic markets that were alleged (or would have been alleged) in either a litigation or settlement complaint. However, sometimes litigation or settlements do not address the full scope of the Agencies' competitive concerns. Due to various reasons (resource constraints, investigative efficiency, litigation strategy, etc.), a complaint may, for example, exclude certain markets of concern or theories of harm. When such a merger is blocked or abandoned in its entirety, any expected harm is avoided in all implicated markets and for all theories of harm. In those cases, limiting the calculations to just those markets and theories that would have appeared in a filed complaint further understates the full scope of consumer benefit.[259] These calculations also do not include less quantifiable harms that are avoided through antitrust enforcement, such as reduced innovation or quality.

The Commission believes that the enhanced ability of the Agencies to detect illegal mergers under the final rule will result in similar benefits to additional consumers and other market participants that would have been affected by an illegal merger but for the enhanced detection made possible by the final rule. In addition to these benefits, the final rule permits the Agencies to fulfill their statutory mandate to conduct premerger review for the purpose of preventing illegal mergers prior to consummation, which is a key competition policy directive that undergirds our nation's reliance on open and competitive markets to drive innovation and economic growth.

b. Avoidable Costs and Delays Arising From Insufficient Information on the HSR Form

To understand the inefficiencies created by inadequate information in the current HSR Filing, the Agencies conducted a review of the effort required to collect additional information beyond what is contained in the HSR Filing for investigations that did not result in an enforcement action.[260] The Agencies examined all HSR Filings in FY 2021, when they received 7,002 HSR Filings for an associated 3,520 transactions.[261] The Agencies identified those transactions for which either Agency opened an investigation that did not result in (1) an action brought in Federal court to block the transaction, (2) a negotiated settlement with divestitures, or (3) the transaction being abandoned or restructured as a result of one agency's antitrust investigation.[262] On the basis of this review, the Agencies determined that they conducted 100 investigations in FY 2021 for which they collected information from non-public sources but that did not result in an enforcement action, referred to here as ''no-action investigations.'' [263] Investigational costs associated with these no-action investigations are one product of inefficiencies created by insufficient information in the HSR Filing because they create unnecessary burdens for the parties, the Agencies, and third parties that could be avoided if the HSR Filing contained sufficient information to determine that the transaction is not one that requires challenge via litigation prior to consummation. In addition to the benefits of improved detection outlined above, these benefits represent opportunity costs for Agency staff (who would spend their time on other tasks if not collecting necessary information for transactions that do not warrant enforcement action prior to

[259] Most calculations seek to use quantification tools that align theories of harm being pursued, but not all theories are associated with readily available tools. Thus, for some merger wins, the Agencies' estimates of consumer savings will not reflect the full scope of theories due to the challenges of quantification. This is most relevant for coordinated effects; when a merger raises both unilateral and coordinated effects concerns, the calculations put forward will often reflect only the unilateral concerns (due to the greater availability of unilateral merger simulation tools) but not a robust estimation of additional harm arising from the threat of increased coordination.

[260] The Agencies selected FY 2021 for this effort because of the large number of reportable transactions that year, 3,520, which provided for a robust data set. The Agencies have no basis to believe that the mergers that occurred in that year were different in any material way from the mergers that occurred in other years and so consider them to be representative of HSR-reportable merger activity in general.

[261] Fed. Trade Comm'n & U.S. Dep't of Justice, Hart-Scott-Rodino Annual Report, Fiscal Year 2021 appendix A (FY 2021). As appendix A n.1 notes, there are typically two filings for each transaction, one from the acquiring person and one from the acquired person.

[262] These criteria are the ones used by the Agencies to report publicly on their merger enforcement activities.

[263] In FY 2021, the Agencies took action against 32 transactions. *See* Fed. Trade Comm'n & U.S. Dep't of Justice, Hart-Scott-Rodino Annual Report, Fiscal Year 2021 appendix A (FY 2021) at 2. The Agencies provide data on HSR reportable mergers on a fiscal year basis, but enforcement decisions may occur in a fiscal year after the transaction was first reported. As a result, the number of enforcement actions reported in the annual HSR reports are not necessarily related to the transactions that are reported for that fiscal year. For this exercise, the Agencies tracked the outcomes of transactions that were reported to the Agencies in FY 2021 but decisions about those transactions may have occurred in the following fiscal year.

consummation), as well as burdens and costs for the parties and third parties who respond to staff inquiries designed to collect the information necessary to conduct a premerger assessment of a reported transaction.

In the 100 no-action investigations, staff contacted at least one third party, with an average number of 18 third-party interviews per investigation. Each of these interviews required significant time from these third parties to identify the knowledgeable personnel in the related business operations, and prepare for questions in advance of talking to Agency staff. While some third parties rely on in-house counsel to help prepare for these interviews, some retain outside legal counsel who have experience with antitrust investigations. The Commission lacks a reliable methodology to calculate or estimate the costs borne by third parties to provide necessary information relevant to the Agencies' initial antitrust assessment. The Commission believes that it is appropriate to shift some of this information-gathering burden to the merging parties and away from other market participants—including customers who may suffer harm if the merger is consummated—who currently absorb this burden due to deficiencies in the existing HSR Form. The final rule realigns the burden of providing necessary information toward the parties themselves and away from other third-party companies, including smaller entities who are saddled with unexpected compliance and legal costs solely because they operate in the same or adjacent business lines as the merging parties. As a result, the Commission anticipates a reduction in third parties' costs from adopting the final rule.

Moreover, given the effort that is required to obtain this information from third parties, there is often a delay in collecting critical business facts until late in the initial waiting period, near the time when a decision must be made about issuing Second Requests. As discussed above, additional information from the parties and third parties that is submitted on a voluntary basis often arrives late in the review period. These delays contribute to additional avoidable costs through the issuance of Second Requests that might have been avoided or that were not tailored to areas of competitive concern due to insufficient information in the HSR Filing.[264]

One source of delay is the parties' voluntary decision to withdraw and refile their HSR Filing. In 53 of the 100 no-action investigations, the parties voluntarily withdrew and refiled their HSR Filings, which restarted the initial waiting period and gave Agency staff additional time to conduct the review. As discussed above, the Commission believes that most of the investigations in which the parties withdraw and refile their HSR Filings are the result of the parties' concern that the Agency may issue Second Requests when they are not warranted or that the Agency will issue a Second Request that is too broad. As Table 3 shows, when the parties withdrew and refiled, they avoided Second Requests nearly 70 percent of the time in the period FY 2018 through FY 2022. For the remaining 30 percent, the additional time allowed the parties to engage in additional advocacy to avoid or potentially narrow any Second Requests. For withdraw and refile transactions that avoid Second Requests altogether, there is unnecessary delay and uncertainty that could be avoided if the information required to make a no-action decision was provided sooner, including with the HSR Filing.

But for transactions that receive Second Requests, the delay can be substantial; seventeen of the 100 no-action investigations referenced above involved a Second Request. The decision to issue Second Requests, which requires approval from Agency leaders,[265] has significant consequences. As discussed in section III.A.3., the costs and delays associated with Second Requests are substantial, and for any no-action Second Request investigation, those burdens may be avoided if sufficient information were available at an earlier time in the investigation, including in the HSR Filing. For the Agencies, there are significant consequences as well. A Second Request investigation requires a team of lawyers, economists, and support staff. The broader the scope of the investigation (*e.g.,* covering many different products or many different geographic areas), the more staff must be assigned. As a result, avoiding unnecessary or unfocused Second Requests would provide a benefit to the parties, the Agencies, and any third parties contacted during the investigation.

Based on this experience, the Commission believes that the final rule will provide a substantial benefit to the Agencies, the parties, and third parties by reducing the number of Second Requests issued or narrowing the scope of any Second Request. A more efficient process that better identifies transactions that do not require additional investigation benefits parties as well.

Many commenters asserted that the Commission failed to take into account the increased burden on staff of reviewing additional information in HSR Filings. Several stated that given the purportedly huge volume of materials generated by the new requirements, especially the expanded document demands, Agency staff would be overwhelmed, thereby undermining effective screening even for deals they could evaluate with current information requirements. One commenter estimates that the proposed rule would result in over 177,000 additional staff hours (100 full-time attorneys) needed to review the information contained in the revised HSR Filing. On the other hand, other commenters asserted that the proposed changes would modernize the premerger process to better account for the evolving complexities of today's mergers and address potential shortcomings of past merger review that have become clearer in retrospect.

Based on its own experience and in light of the significant reductions contained in the final rule as compared to the proposed rule, the Commission believes that the additional information required by the final rule would result in an overall reduction in the number of staff hours spent collecting additional information from all sources, including the parties, as well as a reduction in associated burdens of reviewing and processing that information. For example, while Agency staff may need to review the transaction documents and additional information submitted with an HSR Filing, they would spend less time on more costly and time-consuming tasks such as conducting independent research or outreach to third parties, preparing voluntary information requests, reviewing additional information submitted by the parties, drafting Second Requests, reviewing voluminous submissions from the parties in response to those requests, and preparing internal reports and memoranda for review by managers. The Commission also acknowledges that it may incur minimal additional administrative and support system costs associated with the revised HSR Form,

[264] For any investigation that results in Second Requests, staff spends a significant amount of time during the initial 30-day waiting period trying to identify the areas of a potential antitrust violation. Both Agencies make public their Model Second Requests. *See supra* notes 242–43. Starting from these models, staff customize each request by identifying areas of existing competition and modifying the terms to fit the particular industry dynamics, products and services, or geographic reach.

[265] For the Commission, the Chair issues the Second Requests; for the Antitrust Division, that determination is made by the Assistant Attorney General. 15 U.S.C. 18a(c)(1)(A).

such as technology costs to process and host additional documents and filings. Overall, however, the work of Agency staff will be more efficient and effective as they will be able to more readily and accurately identify those transactions that pose a risk that they may violate the antitrust laws.

In sum, under the existing HSR reporting requirements, inadequate information in the HSR Filing leads to significant time and effort for Agency staff, third parties, and merging parties even for transactions that do not warrant a legal challenge. These costs (and associated delays) represent an opportunity for the Agencies to realize benefits from the enhanced information requirements contained in the final rule by (1) streamlining the Agencies' internal processes and resources devoted to merger review; (2) reducing costly delays for certain parties whose deals are eventually consummated; and (3) reducing the burden on third parties to collect information for premerger screening. By requiring more of the information to be collected upfront from the parties as part of the HSR Filing, the final rule will reduce some of the costs and effort currently associated with premerger review for transactions that the Agencies ultimately determine do not require enforcement action.

The Commission acknowledges that for some filings, Agency staff will still engage in some of these activities to verify the information in the HSR Filing and reach out to stakeholders who may be affected by the transaction. However, the Agencies will not need to spend as much time and resources to acquire the basic business information about the parties and the transaction that is needed to evaluate the antitrust risk, because more of that basic information will now be contained in the HSR Filing. The reduction in those information-acquisition costs will allow resources to be redeployed to other critical tasks of the Agencies, such as investigating other mergers (including consummated mergers) or other antitrust violations. In addition, any reduction in the costs and burdens imposed on third parties during no-action investigations is a direct benefit of the final rule.

2. Costs

The Commission anticipates that the incremental costs attributable to the final rule will primarily fall on individuals and companies who must make HSR Filings because they are a party to a reportable transaction. The final rule may have effects on other individuals or companies who are considering a reportable transaction but do not eventually pursue one, although these costs will be indirect and hard to quantify. This indirect effect does not include those potential deal partners who decide not to pursue an unlawful transaction because the final rule decreases the likelihood that it will go undetected. That is, any improvement in the Agencies' ability to detect potentially illegal mergers is a benefit of the final rule and cannot reasonably be viewed as imposing unnecessary or unreasonable costs on parties contemplating a reportable transaction. The final rule may also impose additional costs on the Agencies to ensure compliance and review additional information contained in the HSR Filing, although these costs will be more than offset by other reductions in costs, as discussed above.

For those individuals and companies that must submit an HSR filing, the burden of complying with the final rule will primarily consist of the additional cost of completing and submitting an HSR Filing to the Agencies. This includes internal costs (for employees tasked with collecting and reviewing relevant information as well as in-house compliance attorneys and other non-legal support staff) and external costs (including outside experts hired to assist in preparing the HSR Filing such as counsel expert in HSR rules or other tasks that filers chose to outsource to a third-party service provider). The majority of filers hire experienced attorneys who are familiar with current HSR Rules. The Commission expects that filers will continue to do so and that those professionals (and other legal and technical support staff) will require some additional time to prepare filings.[266] Current requirements also require knowledgeable personnel from the filing entity to collect and prepare data and documents for the Filing, and the Commission expects that these individuals will expend some additional time and effort to comply with the final rule.

The Commission anticipates that the final rule will result in incrementally higher direct costs for all filers.[267] As discussed above, some of these information acquisition costs are currently borne by third parties and the Agencies and will now be borne directly by the filers themselves. Incremental direct costs associated with the final rule will be borne primarily by those UPEs (and the entities they control) that must submit an HSR Filing, though some portion of the costs may be borne by officers or directors of entities within the acquiring person that will have to provide information to the acquiring person related to other entities for which they serve as officers and directors to complete the HSR Filing.[268] Direct costs vary depending on a number of factors that are different for each reportable transaction: the type of interest being acquired; the complexity of the transaction; the complexity of the UPE and its related entities and investors; the scope and number of existing business relationships between the merging parties; whether the filer is the acquiring or the acquired person; and the size and scope of each filer's business operations. Generally, costs are lower for simple transactions (such as for open market purchases of stock or conversion of stock options), for acquisitions of non-controlling stakes, and for acquisitions of control where the merging parties do not have an existing business relationship. Costs are highest for strategic acquisitions of a competitor or of a key supplier or customer where the Agencies must engage in a thorough review and are more likely to engage in an in-depth investigation including through the issuance of Second Requests. The key variable that is likely to determine the monetary impact of the final rule on any particular filer is the level of the antitrust risk associated with the reported transaction. The Commission believes that this outcome is consistent with the legislative intent in imposing mandatory premerger review as a means of preventing illegal mergers prior to consummation.

The Commission expects that the incremental increase in costs associated with the final rule will be most significant for the first HSR Filing prepared by a given filer because there will be costs associated with becoming familiar with the new reporting Form and Instructions and to gather the required information about the filer's operations. In addition, the Commission believes that some filers (or their counsel) will find it efficient to

[266] The Agencies receive a small number of filings from companies or individuals who do not hire attorneys to prepare their HSR Form.

[267] As compared to the current rules, the proposed rule contained modifications that eliminated certain information requirements that the Commission has determined no longer provide a benefit for premerger screening. These reductions in burden are incorporated in the final rule and are reflected in the analysis of incremental costs associated with the final rule.

[268] Sometimes, the parties will allocate the costs associated with premerger review between them by contract. These provisions are typical for strategic acquisitions where the parties expect some level of antitrust scrutiny and often require the acquiring party to compensate the acquired party for costs related to the HSR Filing as part of the purchase price. In conducting its cost assessment, the Commission has assumed that each filer is responsible for its own costs.

automate some portion of the reporting process, which will increase the burden of the first filing. For any subsequent HSR filing related to another acquisition, these repeat filers will incur lower costs because some of this prior work will not be necessary to the extent that they made investments to put processes in place to maintain or automate the collection of relevant business information. In other words, any estimated incremental costs are expected to decline over time.

Nothing in this rulemaking affects the filing fees for making an HSR Filing, which are mandated by Congress and adjusted by the Commission annually.[269] While the final rule does not alter these HSR-related costs, recent congressional changes in these fees use an approach that takes into account the size of the reportable transaction and the size of the parties involved. Last year, Congress revised the schedule of HSR filing fees, creating a new fee structure with five tiers, which increased fees for some transactions while reducing them for others.[270] Specifically, the new fee structure lowered fees for some mergers valued under $500 million and increased fees for transactions valued at $1 billion and more. Prior to this law, HSR filing fees had a three-tier structure, with thresholds adjusted every year. The purpose of creating a new five-tier fee structure was two-fold: to provide the Agencies with additional resources to review mergers and enforce the antitrust laws, and to better reflect that reviews of larger mergers generally consume more Agency resources.[271] Effective February 28, 2023, the Commission implemented the new fee levels, and on March 6, 2024, the Commission published the adjusted fees for 2024.[272]

Table 5: HSR Filing Fees

HSR Fees Effective February 23, 2022		HSR Fees Effective March 6, 2024	
Size of Transaction	Fee	Size of Transaction	Fee
$101 million to $202 million	$45,000	$119.5 million to $173.3 million	$30,000
		$173.3 million to $536.5 million	$105,000
$202 million to $1.0098 billion	$125,000	$536.5 million to $1.073 billion	$260,000
		$1.073 billion to $2.146 billion	$415,000
$1.0098 billion or greater	$280,000	$2.146 billion to $5.365 billion	$830,000
		$5.365 billion or greater	$2,335,000

The Commission has identified significant deficiencies in existing information requirements, and those gaps are hindering the Agencies' ability to obtain key facts needed for an initial assessment of whether the transaction may violate the antitrust laws and to determine whether to issue a Second Request. See section II.B. Congress authorized the Commission to issue rules to collect information that is necessary and appropriate for the Agencies to conduct premerger review within the statutory time frame. The final rule requires filers to gather information relevant for screening the transaction and results in relatively higher costs for those reported transactions that are more likely to pose competition issues, including transactions with complex party or deal structures, or transactions involving two entities with many overlapping business operations or existing business relationships in the supply chain, or transactions in which the parties have a history of acquisitions in the same business lines. This is consistent with the HSR Act's focus on the largest transactions, which are often the most complex, and the overall intent to reduce cost and delay for reportable transactions other than those that may violate the antitrust laws.

As discussed in more detail in section V.D., the Commission believes that most filers will not experience delays because the final rule requires collection of business information that should be readily available or collected as part of each filer's due diligence efforts related to the transaction. Filers who would prefer to submit a letter of intent or other preliminary agreement that is no longer compliant with the final rule may need to come to an agreement on more details of the planned-for transaction. But the Commission has determined that this represents less than 10 percent of current filers, meaning that most parties are already coming to agreement on the key terms that are required by the final rule even if their transaction documents are referred to as a letter of intent.

a. Calculation of Direct Costs

To estimate the potential increase in direct costs for filers attributable to the changes in the final rule, the Commission calculated the average compliance burden by conducting a survey of experienced HSR attorneys who now work for the Agencies. See section VIII. That survey revealed a range of estimated costs for each new information requirement in the final rule. These estimates include the amount of additional time required from a variety of knowledgeable individuals, including, for example, HSR specialists at law firms hired to prepare the Filing as well as individuals associated with the UPE who collect and verify the business information and responsive documents, as well as costs associated with any outside vendors hired to complete the HSR Filing, such as data vendors.

As explained in section VIII., the Commission estimates that the amendments contained in the final rule would increase the time required for a filer to prepare an HSR Filing, on average, 68 hours, resulting in

[269] Each year, the thresholds that determine reportability under the HSR Act are adjusted based on changes in the gross national product, 15 U.S.C. 18a note, while filing fees are adjusted in line with the Consumer Price Index, Public Law 117–328, 136 Stat. 5967–68, Div. GG, Title I, sec. 101.

[270] Public Law 117–328, 136 Stat. 5967, Div. GG, Title I.

[271] H.R. Rep. No. 117–493 pt. 1, at 3–5 (2022).

[272] *See* Fed. Trade Comm'n, ''New HSR thresholds and filing fees for 2024,'' Fed. Trade Comm'n Competition Matters blog (Feb. 5, 2024), *https://www.ftc.gov/enforcement/competition-matters/2024/02/new-hsr-thresholds-filing-fees-2024*.

additional costs of approximately $39,644 per filing on average.[273] The Commission believes that this level of direct costs is small in relation to other merger costs. Indeed, these total costs are small in relation to the value of the deals that must be reported under the Act. The current minimum size for a reportable transaction is $119.5 million; as outlined in section VIII, for FY 2023, the Commission estimates that the total direct costs associated with the final rule would have been only slightly more than the value of a single reportable transaction. Moreover, the Commission believes that these direct costs may be overstated and should decline over time as parties and their lawyers become more familiar with the requirements of the final rule. Finally, these direct costs do not take account of the substantial benefits to the Agencies, the parties, and third parties generated from a more efficient premerger review process that shifts some of the burden of information collection and reporting away from third parties to merging parties and allows the Agencies to obtain critical business facts earlier in the initial waiting period, which in turn helps mitigate avoidable costs associated with Second Requests that might have been avoided or that were not tailored to areas of competitive concern due to insufficient information in the HSR Filing.

In addition, the costs associated with completing an HSR Filing are often minimal compared to other fees associated with mergers and acquisitions. Based on publicly available data, the 20 largest M&A transactions during 2021 and 2022 ranged in size from $1.44 billion to over $70 billion, with average deal size of $10.6 billion.[274] Using the current Congressionally mandated HSR filing fees associated with deals of this size, the average HSR filing fee for these transactions would be $1,198,500, ranging from $415,000 to $2,335,000. For 18 of these deals, the fees paid by the target to financial advisors are available from public sources. These fees varied considerably, ranging from $800,000 to $96 million. In 14 out of these 18 cases, the fees paid by the targets to just their financial advisors were more than ten times the estimate by one commenter of the average total cost per filing for completing the HSR Form ($437,314) [275] and in five cases, fees to financial advisors were more than 100 times of that estimate. In any of these cases, financial adviser fees are several multiples of the estimated average new costs associated with the final rule of $79,288 per transaction ($39,644 + $39,644) based on the Commission's estimates. See section VIII. These advisor fees are instructive in demonstrating that HSR filing fees and HSR-related transaction costs for most transactions do not comprise a significant share of total transaction costs and therefore would have minimal impact on costs of dealmaking across the economy.[276]

Another survey of middle-market investment bankers, brokers and other advisors reports that merger advisory fees for deals valued up to $150 million come in the form of retainers, monthly or hourly charges, or success fees, which are paid if the deal closes.[277] For deals in the $100 to $150 million range, namely those most likely to be reportable under the HSR Act, success fees paid to financial advisors represented 1 to 2 percent of deal value, or $1,500,000 to $3,000,000 for a $150 million deal. As with higher valued transactions, the other merger-related costs for transactions on the lower end of HSR reportability dwarf the costs associated with the final rule.

One commenter commissioned a report (''the Kothari Report'') that projected that the direct cost of the proposed changes may be nearly seven times greater than the Commission estimated for the proposed rule, after accounting for both direct monetary costs and further costs to the economy.[278] The Kothari Report critiqued the Commission's methodology of calculating direct costs in the NPRM's PRA analysis in several respects. The Commission considered these comments and those of other commenters and, as discussed in section VIII, made adjustments to its cost estimate methodology for the final rule.

As a result, the Commission disagrees that the final rule will impose the level of costs presented in the Kothari Report for several reasons. First, the Commission made significant modifications to all aspects of the proposed rule in response to concerns raised in this report and in other comments. As a result, the estimates contained in the Kothari Report reflect costs for a very different rule, one that the Commission has determined not to adopt. The Kothari Report relied on a survey of experienced practitioners and so did the Commission. The survey of practitioners relied on in the Kothari Report estimated that the proposed rule would require an additional 242 hours of time from outside counsel and internal personnel. While the Commission's estimate was much lower, that comparison is no longer relevant because the Commission is not adopting the rule it proposed. Instead, the Commission is adopting a rule that is substantially more modest in scope, one that aligns compliance costs as much as practicable with the risk that reported transaction is one that requires a closer look.

Moreover, even if the Commission's estimate of the economic impact of the proposed rule was flawed, the Commission made improvements to the methodology it used to estimate the additional effort that will be required of filers to comply with the final rule. As discussed in section VIII, the Commission has accounted for the same costs in its own estimates, such as the time required from outside counsel, in-house counsel, and business personnel as well as costs associated with other services such as data vendors. The Commission believes that its estimates of the economic impact of the final rule are reliable and sufficient for it to determine that the final rule is a reasonable exercise of its rulemaking authority even if it imposes modest costs on overall dealmaking and in light of the benefits of the final rule for efficient and effective detection of illegal mergers via mandatory premerger review.

Much of the difference between the Commission's estimate and the one contained in the Kothari Report is attributable to the higher hourly rate applied to the required hours, which the Kothari Report suggests is more likely

[273] As further described in section VIII, the Commission estimates the range at 10 to 121 additional hours, or approximately an additional $5,830 to $70,500 per filing, with the highest costs borne by the acquiring person in a transaction with overlapping products or supply relationships in the target's industry.

$936 per hour, and a category of ''other'' costs that is nearly one-third of the total projected costs. The Commission believes that its estimates of incremental costs associated with the final rule are more consistent with the range of filings and filers based on its experience receiving thousands of filings every year and the merger investigations conducted by the Agencies. See section VIII. The Commission has no basis to inflate the overall costs associated with the final rule beyond what was estimated by those with experience filling out HSR Forms for a variety of filers and transactions. As with prior rulemakings, if the Commission determines that certain requirements in the final rule are not generating a benefit to the Agencies' preliminary antitrust assessment in light of the associated costs, the Commission can consider adjusting those requirements in future rulemakings.

The Commission acknowledges that the incremental costs associated with this rulemaking are more material than its prior rulemakings, which frequently reduced the burdens associated with submitting an HSR Form. In fact, the current Form is very similar to the original 1978 version in its scope and content. But the cumulative effect of the economy-wide changes described in section I. have seriously undermined the Agencies' ability to engage in extensive fact-gathering to compensate for deficiencies in the HSR Form. The effort required by the Agencies to conduct premerger review in today's economy threatens to render the process ineffective for its specific purpose—detecting and preventing illegal mergers before they cause harm that cannot be undone. The status quo does not allow the Agencies to quickly identify which transactions may violate the antitrust laws, causing them to spend too much time on ones that likely do not while at the same time lacking sufficient information to identify ones that do. With this rulemaking, the Commission is updating the Agencies' tools for detecting illegal mergers during premerger review to match the size and complexity of reportable transactions, restoring rigor and efficiency to the task of premerger review.

The Commission disagrees with other assertions made in the Kothari Report or finds them unpersuasive and not entitled to significant weight. The report focuses on the small number of transactions that receive a Second Request and ignores the benefits to filers from the Agencies reviewing and dispensing with non-problematic transactions with greater efficiency and assurance than before. The Kothari Report also ignores the benefits to the public from the Agencies' ability to more effectively identify and investigate potentially problematic transactions based on the availability of better initial information about potential competitive harms. The Commission discusses these and other benefits of the final rule in section III.C.1.

b. Other Costs Not Attributable to the Final Rule

Commenters raised concerns that the proposed rule would lead to other costs for those seeking to engage in M&A activity. The Kothari Report predicted that the proposed rule would so increase the costs of M&A that it would reduce the number of mergers, including ones that would be beneficial for consumers, innovation, investors, and the economy. Other commenters similarly argued that the Commission's objective is to stop all mergers by making them too costly to pursue. The Commission disavows any intention to stop all mergers by imposing unreasonable costs on those that are subject to premerger review and disagrees that the final rule will have this effect. Moreover, the commenters provided only speculation that the proposed rule would deter or delay some deals merely by increasing the costs associated with making an HSR Filing as compared to other factors that more directly affect M&A activity, such as interest rates. In the absence of actual data from commenters, the Commission must make a predictive judgment based on the evidence available to it.[279] As noted in section III.C.1., the evidence available to the Commission indicates that the Agencies' antitrust enforcement saves consumers and other market participants billions of dollars a year, and in light of known information deficiencies outlined in section II.B., there are strong indications that closing known information gaps will allow the Agencies to better identify additional transactions that may also violate the antitrust laws if consummated. The final rule does not impose new incremental costs that could plausibly deter beneficial or competitively benign acquisitions, particularly after the additional revisions narrowing the requirements in the final rule are taken into account.

Relatedly, other commenters raised arguments about additional macro impacts of expanding information requirements for HSR Filings, such as concerns about the impact on institutional investors, including retail investors, by indirectly impacting the performance of investment portfolios. Some said they were concerned generally about the chilling effect on M&A. Others raised concerns that changing the status quo would create market uncertainty, citing increased market, labor, and operational volatility. Several of these commenters raised specific concerns that acquisitions in their particular sector were typically not challenged or even reviewed closely by the Agencies. Concerns about disproportionate impact for certain sectors or types of filers are addressed in section III.D. below.

The Kothari Report states that delays caused by the additional time that will be required to prepare a HSR filing could kill deals and lead parties to abandon transactions. It also stated that delay breeds uncertainty in product, labor, and capital markets, enabling competitors to raid customers and staff, and that delay would lead to lost economic efficiencies that are realized through mergers. For these propositions, the Kothari Report cites an advisory committee report by the U.S. Department of Justice issued in 2000. While that committee report explains how delays can influence pending mergers, the cited portion is discussing international jurisdictions that do not impose strict timelines or which have prolonged agency investigations into mergers [280]—this rule does not contemplate either. In addition, as discussed above, the final rule will allow the Agencies to reduce the number of Second Requests or narrow their scope, significantly reducing delays in many instances.

Moreover, the Commission disagrees that any delays and incremental costs associated with an HSR Filing could have a significant impact on overall M&A activity. Deal volumes fluctuate, often substantially, from year to year, and these fluctuations are reflected in the number of HSR Filings received by the Agencies. But these fluctuations are attributable to many economic factors,

[279] *See, e.g., Huawei Techs. U.S., Inc.* v. *FCC,* 2 F.4th 421, 454 (5th Cir. 2021) (''Huawei does not object to specific cost calculations such as these but to the agency's failure to consider additional, difficult-to-measure costs about which the FCC lacked hard data, such as 'the broader economic costs of depriving Americans of access to Huawei's market-leading technology.' The agency's decision to base its analysis instead on the replacement cost estimates before it does not render its analysis unreasonable.''); *FCC* v. *Prometheus Radio Project,* 592 U.S. 414, 427 (2021) (''The APA imposes no general obligation on agencies to conduct or commission their own empirical or statistical studies. . . . In the absence of additional data from commenters, the FCC made a reasonable predictive judgment based on the evidence it had.'').

[280] Int'l Competition Pol'y Advisory Comm., Final Report to the Attorney General and Assistant Attorney General for Antitrust Ch. 3 (2000), *https://www.justice.gov/atr/final-report.*

including the cost of capital. Research relied on by one commenter provides evidence that a major driver of uncertainty in M&A activity generally is stock market volatility.[281] This is consistent with the Agencies' experience. Figure 1 reflects the volatility of HSR-reportable transactions, and the Commission believes that much of this volatility is attributable to changes in interest rates and other macro factors that drive M&A activity generally, unrelated to premerger review or the specific information collected in an HSR Filing.

The Kothari Report also asserted that M&A activity is beneficial to the economy, and that any potential delay or chilling of acquisitions due to the final rule would lead to significant loss of value creation. But the evidence cited to support these concerns is inapposite. For instance, a paper cited for support that acquired plants become more productive points to credit spreads and aggregate market valuation as being major drivers for merger activity.[282] Similarly, another source relied on a stylized, theoretical model of mergers that does not provide any empirical evidence about the benefits of M&A, applying the theoretical model to a situation where there is no M&A at all to calculate the benefits of M&A.[283] There is no reason to believe that the final rule will significantly chill M&A activity. Furthermore, in the model, the author finds that preventing a small fraction of deals over $1 billion has little effect on aggregate efficiency, and that due to the inefficiencies in the M&A market, a policy of blocking a fixed number of deals regardless of antitrust concerns can improve aggregate outcomes. Thus, the paper actually demonstrates that preventing some deals can improve economic performance. The paper does not provide a basis for the Commission to conclude that changes of the magnitude contained in the final rule threaten economic efficiencies gained through M&A activity generally.

Another paper cited in the Kothari Report, which purports to support the proposition that any discouragement of pending mergers results in significant value loss, is not on point.[284] First, this final rule is not intended to and should not discourage mergers—the final rule merely requires companies who are already submitting HSR Filings to submit more information with their filings. In the paper's survey of past empirical assessments of mergers, it highlights evidence that mergers that create market power yield no better performance, and sometimes worse. That assessment is wholly consistent with the Commission's efforts in this final rule: to collect information that better allows Agency staff to identify potentially anticompetitive mergers. The Kothari Report mischaracterizes this study as supporting the value of all mergers. In fact, the author concludes that mergers are not universally accretive in value, stating: ''[T]he buyer in M&A transactions must prepare to be disappointed. It is also true that most transactions are associated with results that are hardly consistent with optimistic expectations. Synergies, efficiencies, and value-creating growth seem hard to obtain. It is in this sense that deal doers' reach exceeds their grasp.'' [285] Last, it should be noted the study is dated 2002, and the latest mergers it analyzes are from 1999, whereas the Commission crafted this final rule to address changes it has observed in more recent transactions that reflect current dealmaking dynamics discussed in section II.B.

Indeed, one goal of this rulemaking is to ensure that any benefits from M&A are realized as quickly as possible and that the costs of anticompetitive mergers do not materialize. The Commission acknowledges that there are benefits generated from M&A activity generally, and that those benefits flow broadly throughout the economy. But the Agencies are not tasked with determining whether an acquisition is ''beneficial'' in any sense. The challenge given to the Agencies by Congress is to distinguish which acquisitions, among the many thousands they review each year, may violate U.S. antitrust law. For this task, they need certain facts that would reveal potential antitrust risks. For instance, event studies may indicate that M&A can result in significant value creation, but these outcomes may be the result of genuine synergies or they can also occur due to the anticompetitive creation of market power.[286] This highlights the very purpose of mandatory premerger review: to subject a certain number of larger acquisitions to a quick and thorough antitrust review prior to consummation solely for the purpose of identifying the few that need in-depth investigations. Throughout the history of the HSR Act, the Agencies have investigated just a small fraction of deals through the issuance of Second Requests. The Commission believes that the final rule will render premerger review more effective and efficient in identifying those mergers that may lead to anticompetitive harm, and that the small incremental costs and delays associated with the final rule are necessary and appropriate and consistent with the scheme established by Congress.

Moreover, to the extent these concerns arise from a belief that disclosure of additional relevant information to the Agencies will mean that a reported transaction is more likely to be challenged or investigated, that outcome fulfills the purpose of premerger review. As discussed above, to the extent that the HSR Act itself requires reporting for a large number of transactions that may never violate the antitrust laws, that has always been a feature of HSR premerger notification. Congress recently reaffirmed that particular tradeoff by imposing new disclosure requirements for foreign subsidies on all filers while not adjusting existing filing obligations.

In light of these considerations, the Commission does not believe that the final rule will have an undue effect on dealmaking, including by discouraging transactions that have little or no antitrust risk. The expected costs of this final rule are very small relative to the overall value of reportable transactions, the level of M&A activity in the United States, and the size of the overall economy. The benefits of the final rule are expected to be proportional to reductions in the errors in detection of illegal mergers that this final rule addresses.

Each year, the Agencies review reported transactions with an aggregate dollar value of nearly $2 trillion, on average.[287] Yet this is just a fraction of the level of M&A activity in the United States: as reflected in Table 1, over 80 percent of mergers completed in the United States are not reported to the Agencies. The costs associated with the

final rule are very small in comparison to the U.S. economy, which was valued at nearly $28 trillion in 4Q 2023.[288] Any improvement in the Agencies' ability to detect illegal mergers prior to consummation will lead to benefits that will help reduce antitrust harm from illegal mergers and improve the efficiency and effectiveness of premerger review. The greater the improvement in detection and in avoiding the costs and burdens of acquiring information from sources other than the parties, the greater the benefits. The Commission expects that the costs from the final rule will be so small in relation to the total value of reported transactions, to the level of U.S. M&A activity in general, or to the U.S. economy that there will be negligible indirect effects, if any, on dealmaking, innovation, investments, and growth.

Nonetheless, the Commission has narrowed its proposals so that the final rule limits the incremental costs for filers as much as practicable while still generating additional information that is critical for the initial antitrust assessment in light of changes in market realities and information gaps outlined in section II.B. The need to modernize premerger review to adjust to market changes is compelling, and the Commission is acting within its statutory mandate to determine what information is required to conduct premerger screening that is appropriate in the modern economy.

The Kothari Report also commented that there is additional uncertainty for potential filers arising from the Agencies turning away from the decades of practice under the current rules. Any change brings with it some level of uncertainty and will require adjustment by all those involved. As with other adjustments to the HSR rules in the past, the Commission's PNO staff will be providing guidance and assistance to filers who have questions about the final rule. But the Commission believes that the uncertainty related to the new rule is a short-term issue that will be resolved after the final rule goes into effect. The commenters are overstating the effect of uncertainty on the economy. Not only are these concerns temporary; they ignore the greater benefits of a more efficient premerger review process that may result in a *faster* resolution of some deals, including by reducing the number of Second Requests and narrowing others. The goal of this rulemaking is to provide sufficient information so that the Agencies can quickly and confidently distinguish those transactions that present little or no risk that they may violate the antitrust laws, and identify those transactions that require a more searching investigation. As discussed above, the Commission believes that the final rule will reduce the delays that are attributable to information deficiencies.

Moreover, the Commission disagrees that the final rule will lead to greater uncertainty about the outcome of the Agencies' premerger review. This rulemaking does not (and cannot) affect the ultimate determination of whether a transaction violates the antitrust laws. A Federal court will make that determination for any transaction that the Agencies or others seek to block prior to consummation under prevailing legal standards.[289] Any ''uncertainty'' about the eventual outcome of premerger review is directly related to whether the merger violates the antitrust laws and whether the Agencies are able to detect that risk when conducting a premerger assessment. Premerger review is simply the tool Congress gave to the Agencies to detect those mergers that may violate the law so that the Agencies can take steps to prevent their consummation. On the margin, the Commission believes that the final rule will reduce uncertainty about the outcome by providing more transparency to the parties (and the public) about the information the Agencies rely on to make their assessment that a transaction may violate the antitrust laws. To the extent that the commenters are concerned that disclosing more information reveals a risk to competition that the current rules do not, that additional ''uncertainty'' is a benefit of the final rule as a result of improved detection and possibly greater deterrence achieved through more effective premerger review.

It is not feasible to design premerger review requirements to only apply to those mergers that will be found to violate the antitrust laws, because there are too many variables that weigh in that outcome. Establishing that a merger may substantially lessen competition or tend to create a monopoly is highly fact-dependent exercise. The final rule represents a reasonable reflection of the Congressional policy to screen those mergers in advance to discover the few that may cause lasting harm throughout the economy and that should be blocked prior to consummation. The Commission has determined that the current HSR reporting requirements are not sufficient for the critical task of premerger review in light of changes in the economy and in M&A activity.[290]

Some commenters argued that the proposed rule's expansion of reporting requirements would negatively impact investments in biotech innovation, or deny startups or other innovative companies an exit strategy. Others asserted that the acquisition of a small company by a larger one can create efficiencies by bringing together two entities that specialize in activities in which they have a comparative advantage or provide assistance necessary to bring discoveries to market. One study cited by a commenter estimates that it costs approximately $2.6 billion to develop and bring a new drug to market.[291] Another commenter noted that startups operate on tight budgets and that exits, most often facilitated by an acquisition, provide liquidity, enable capital flows through the startup ecosystem, and give startups incentives to innovate. The Commission recognizes these possible benefits and does not seek to deny them to small companies or others, nor does it believe that the HSR reporting requirements in this final rule will have any of these negative effects on the opportunities for small or startup companies to exit via lawful acquisitions. As noted in section II.B.4., many acquisitions of startups and small innovator firms are not reportable. For those acquisitions that Congress has determined are large enough to be reportable, the long-term benefits, both monetary and non-monetary, well outweigh the incremental costs associated with the final rule. Not surprisingly, acquisitions of this type (and others) declined in 2023 due to higher interest rates. Nonetheless, the Commission does not believe that small companies are so short-sighted that they will forgo benefits of a negotiated exit acquisition where the expected benefits dwarf HSR filing costs.

Moreover, the Commission cannot ignore that certain acquisitions may also reduce innovation and harm

[288] U.S. Bureau Econ. Analysis, Gross Domestic Product (updated Aug. 29, 2024) (Q2 2024 $28,652,337,000,000) (retrieved from FRED, Fed. Reserve Bank of St. Louis), *https://fred.stlouisfed.org/series/GDP*.

[289] In the Agencies' experience, when faced with an imminent or pending legal challenge to the legality of the transaction, many parties chose to abandon their merger plans rather than incur the additional legal costs associated with defending an injunction action in Federal court. This decision is solely in the discretion of the parties and reflects their assessment of litigation risks.

[290] As discussed in section III.E., other countries have adopted other procedures to review proposed and consummated mergers.

[291] Comment of Biotech. Innovation Org., Doc. No. FTC–2023–0040–0706 at 7 n.16 (citing Joanna Shepherd, ''Consolidation and Innovation in the Pharmaceutical Industry: The Role of Mergers and Acquisitions in the Current Innovation Ecosystem,'' 21 J. Health Care L. & Pol'y 1, 16 (2018)).

competition in violation of the antitrust laws, particularly when dominant firms use acquisitions to acquire nascent threats. One commenter acknowledged that an environment where a few large companies dominate is undesirable, and another noted that smaller companies have flexibility, the ability to pivot in response to new evidence, and a willingness to accept risk that is rare in larger firms. While acquisitions of small firms by large firms can be beneficial, when they substantially lessen competition or tend to create a monopoly, they can be detrimental to innovation and growth. For these reasons, and as discussed in section II.A., Congress tasked the Agencies with carrying out premerger review. The Agencies would be remiss if they did not fulfill that task by ensuring that the HSR reporting requirements are attuned to the risk that large firms are buying up smaller firms in order to eliminate nascent and potential threats. For any negotiated exit acquisition that must be reported under the HSR Act, the incremental costs imposed by the final rule are justified by the benefit to the Agencies and the public of assessing the risk that the acquisition may violate the antitrust laws.

To be clear, not all exit partners are denied to small firms due to antitrust scrutiny; it is only those whose acquisition would violate the antitrust laws. For instance, when a large incumbent seeks to acquire a smaller company that constitutes a nascent threat or an actual or potential competitor, the Agencies may challenge that merger. But in the Agencies' experience, a startup firm deemed valuable by a dominant incumbent also enjoys other exit options. For example, the Commission recently challenged the proposed acquisition of a license to an innovative, early-phase candidate drug treatment for Pompe disease by the company with the only FDA-approved treatments for the disease.[292] The parties abandoned the transaction after the Commission authorized a lawsuit to block the deal; within five months the innovator company had found an alternative partner, negotiated a new agreement, completed antitrust review, and closed the deal. Moreover, the terms of the new deal appear largely equivalent to what the innovator had negotiated with the incumbent.[293] In other words, if the acquisition of a startup by a dominant incumbent carries a risk that the Agencies may determine that the transaction is one that may violate the antitrust laws, it is likely that there are other buyers that do not create those risks and any of those buyers present a viable exit strategy via acquisition.

The Commission disagrees with the suggestion that incremental changes in the information requirements for HSR Filings could have a chilling effect in sectors that are especially acquisitive. One commenter stated that in 2022 alone, 16,464 U.S.-based VC-backed companies received $240.9 billion in funding, yet when these transactions were reportable they were rarely investigated. Unless the new information requirements in the final rule reveal that a reported transaction may violate the antitrust laws, the Commission expects M&A activity in these sectors to continue to be subject to other economic forces that will determine their viability or profitability.[294] Similarly, claims that an industry or sector is ''unconcentrated'' are unavailing. The Agencies must conduct a fact-specific, case-by-case assessment of market dynamics to determine whether any particular relevant market affected by the merger is concentrated, and that assessment is typically left to an in-depth investigation after the issuance of Second Requests. Although the Agencies routinely decline to investigate transactions where there are many remaining competitors post-merger, this is a decision made after assessing relevant facts about the transaction including those contained in the HSR Filing, and is not based on an advance determination that certain sectors are ''unconcentrated.''

The Commission has taken into account the additional costs imposed on small and innovative companies, as well as those that operate in sectors where the Agencies have historically not engaged in merger enforcement. As discussed in section II.B.5., the emergence of strategic buyers engaged in serial acquisition strategies raises the possibility that some sectors that were not concentrated in the past are becoming more concentrated, especially through transactions that are not subject to premerger review. Thus, the Agencies should not rely on assumptions about historical levels of concentration when conducting premerger review of a reportable transaction in those sectors. By requiring information about prior acquisitions of both the buyer and target, the Agencies are given better information about the current competitive landscape so that they can make more accurate assessments about the potential effect of the filed-for transaction.

To the extent possible, the Commission has imposed as few additional requirements as is practicable in light of the benefits derived from more effective premerger review. If, based on experience of collecting new information, the Commission finds that some requirements generate less-than-expected benefits to the Agencies, it can eliminate those requirements in future rulemakings. In many prior rulemakings, the Commission adjusted its rules to reduce the burden on filers after experience revealed that the information did not provide the hoped-for benefit to the Agencies sufficient to justify the costs to filers of providing the information.[295]

3. Adjustments Made to the Final Rule To Align Costs With Antitrust Risk

Since establishing a premerger notification program pursuant to the HSR Act, the Agencies have relied on information contained in HSR Filings to conduct their initial premerger review. However, in light of the information gaps identified in section II.B., the Commission has determined that the current requirements are not sufficient for that task and determined to reset the baseline requirements for all filers to fill these information gaps. As a result, the final rule eliminates some requirements that are contained in the current Form, and requires each filers to submit some

information that is not currently required or certify that the request does not apply to its operations.

After careful consideration of the comments that identified aspects of the proposed rule that would be a source of significant costs for filers if adopted, the Commission made significant modifications to the final rule as compared to the proposed rule. In several instances, the Commission determined that the costs of a particular proposed requirement outweighed the benefits and chose not to adopt those provisions as part of the final rule. For other proposals and where possible, the Commission has tailored each information request contained in the final rule to reduce the cost of compliance for filers yet generate the information that is necessary and appropriate for the Agencies to conduct a premerger assessment of the transaction. See sections IV to VI. Overall, the final rule balances the cost of collecting additional information in the HSR Filing in light of the benefits of obtaining additional information that is relevant to the Agencies' premerger antitrust risk assessment, and aligns those costs in proportion to the antitrust risk associated with the transaction under review. As a result, the final rule is a reasonable exercise of the Commission's authority to require information that is necessary and appropriate to determine whether an acquisition may, if consummated, violate the antitrust laws. The additional information required by the final rule will close information gaps described in section II.B. and address information asymmetries by shifting the burden of collecting necessary information about the transaction and the business of the filers from the Agencies and third parties to filers.

To make these modifications to align costs and benefits, the Commission relied on the following tools and approaches it has used when exercising its HSR rulemaking authority over the last forty-six years and consistent with the statutory scheme. In addition to the features of the HSR Act described in section III.A. above that treat different filers differently (*e.g.,* requiring notification from acquirers but not the acquired person for cash tender offers in order to start the waiting period and exempting certain types of acquisitions entirely), the Commission has administered HSR reporting requirements over the years in a flexible way to minimize the burden on each filer and each type of transaction as much as practicable. Thus, contrary to the assertions of several commenters, the reporting requirements of the HSR Act have never been a ''one-size-fits-all'' reporting scheme because different filers face different burdens for complying with applicable reporting requirements. Rather, the HSR Form and Instructions have relied and will continue to rely on an IF/THEN format that excuses certain filers from information requirements based on answers provided to other requirements. For instance, several current information requirements need only be answered if the filer reports that it generates revenues in the same NAICS [296] code as the other party to the transaction. The final rule expands the existing IF/THEN format as the primary means of mitigating the costs of reporting certain new information in a way that, as much as practicable, aligns the information with the antitrust risk associated with the transaction, resulting in higher costs for those transactions most likely to require close scrutiny by the Agencies to determine if they may violate the antitrust laws.

As summarized above in section I. and explained in further detail in section VI., the Commission has also eliminated several information and document requirements and reduced the scope of many others as compared to the proposed rule to align the cost of reporting to the antitrust risk associated with each transaction. First, the Commission has eliminated in toto the proposals that would have imposed significant costs as compared to the benefits, such as those requiring filers to provide employee information, geolocation information, the identity of other interest holders or board observers, or draft versions of submitted documents. Second, the Commission created a new category of filings, select 801.30 transactions, for which the costs of complying with the final rule will be minimal as compared to current requirements. Next, the final rule imposes relatively fewer new reporting requirements on acquired persons, reducing their costs as compared to the acquiring person, which is the party pursuing the transaction that requires HSR reporting, and will operate the acquired interests post-consummation. The Commission has also reduced the burden on filers by limiting the lookback periods for several categories of information and created de minimis exclusions where appropriate. Finally, the Commission will continue to allow filers to rely on good faith estimates or answer in the negative to confirm that certain information does not exist. For instance, for a transaction in which there are no existing overlaps or supply relationships responsive to the final rule, filers can indicate that there are no such overlaps or relationships, although there may be costs for the filer associated with verifying that response.

The Commission also relies on definitions and clarifications to reduce or eliminate filing obligations or to reduce uncertainty regarding compliance. For instance, the Act applies to a wide variety of acquisitions; as a result, the Commission has provided definitions and guidance over the years to maximize compliance. Sometimes this results in certain transactions not being reported or reducing reporting requirements for certain types of transactions. The final rule contains several new definitions that are intended to reduce uncertainty and costs, and improve compliance.

Select 801.30 Transactions

As part of the Commission's effort to reduce the cost of the final rule, the Commission has created a new category of transactions, defined as ''select 801.30 transactions,'' that will have minimal reporting requirements, including a few of the new information requirements required by the final rule. Where the Commission has not excused requirements, it believes that the burden of compliance will be low because parties to select 801.30 transactions generally have less complex internal structures, do not hold significant stakes in similar companies, and have not generated the types of documentation the Form and Instructions generally require. As a result, the Commission expects that responses to the remaining requirements for these types of transactions will generally be short, and may just confirm that the parties do not have responsive material. However, for those transactions in which select 801.30 filers incur additional costs from complying with the final rule, there will be a benefit to the Agencies in learning about potential competitive issues that are not revealed by the current information requirements, especially the new information related to other entities between the UPE and acquiring or acquired person.

For select 801.30 transactions, filers are excused from the following information requirements:

i. Transaction Rationale
ii. Transaction Diagram
iii. Plans and Reports
iv. Transaction Agreements
v. Overlap Description

[296] The North American Industry Classification System is the standard used by Federal statistical agencies in classifying business establishments for the purpose of collecting, analyzing, and publishing statistical data related to the U.S. business economy. *See* U.S. Census Bureau, North American Industry Classification System (rev. Sept. 10, 2024), *https://www.census.gov/naics/.*

vi. Supply Relationships Description
vii. Defense and Intelligence Contracts

Additionally, even where select 801.30 transactions are not expressly excused from responding, there are many items for which the Commission believes the response will be ''none'' because of the nature of the transaction or of the parties.

Less Information From the Acquired Person

The final rule also seeks to reduce costs by tailoring information requests to each party's role in the transaction. Because the buyer (the acquiring person) will have a larger stake in or control of the target (the acquired entity or assets), and often will be operating the assets or business acquired post-consummation, more information is needed from acquiring persons than acquired persons. The acquiring person is more likely to have certain types of information relevant to the Agencies' enforcement analysis, such as the transaction's structure, information about other minority holders who might have managerial control or influence, and overlapping officers and directors who could affect competitive decision-making after consummation. This approach reflects the more limited time the seller has had to consider the implications of the planned transaction, and to a lesser extent, the seller's less-honed strategic assessments of competitive opportunities. In addition, for certain information, such as a transaction diagram, the Agencies only need one response, and it is appropriate to place the cost of providing this information on the acquiring person and not require the acquired person to provide duplicative information.

Consistent with these considerations, the final rule excuses the acquired person from certain additional information requirements that apply to acquiring persons. In the final rule, acquired persons are excused from the following requirements:

i. Minority Shareholders, other than those that will roll over to the acquiring person
ii. Ownership Structure Description and Chart
iii. Reporting of Officers and Directors
iv. Identification of International Antitrust Notification
v. Transaction Diagram
vi. Identification of Other Agreements Between the Parties

Balanced against these reductions in burden, the final rule does require the acquired person to report prior acquisitions for the first time, for the reasons explained in sections II.B.5. and VI.J.4.

IF/THEN Format

Certain information requirements of the final rule are only applicable to filers who provide a positive response to other information requirements. That is, the final rule reflects an IF/THEN format by requiring some information only if filers have provided other information first. For example, many information requirements do not require a response if the filer indicates that there is no reported overlap or supply relationship between the merging parties. This is a main feature of the current HSR Form, and the Commission expands that approach in the final rule to closely align the information requirements with the risk of a law violation the transaction presents, resulting in an IF/THEN format that adjusts the cost of complying based on the existing competitive relationship of the parties to the transaction.

Importantly, information that is critical to identifying competitive overlaps or areas of premerger competition justifies a higher cost of collection and reporting.[297] Examples include reporting revenues for identified overlaps by geographic location so that the Agencies have some basis to screen overlapping products for local market impacts.[298] Even if there is some additional cost associated with collecting this information, a notification form that does not contain such information would be unreliable for detecting the risk that the transaction would cause harm to competition at the State or local level. Limiting the requirement to provide certain information only if both parties generate revenues in the same or similar business lines (as reflected in overlapping NAICS code reporting or the descriptive responses) or only if the parties operate in the same areas of the country is a powerful limitation aimed at generating information that bears directly on the question whether the transaction involves direct competitors. For any transaction that does not have these overlaps, there is no burden associated with answering questions that depend on the reporting of such overlaps other than certifying that such overlaps do not exist. In the final rule, the following information requirements are dependent on the identification of an existing overlap or a supply relationship:

i. Overlap Description
ii. Supply Relationships Description
iii. Officers and Directors (acquiring person only)
iv. Plans and Reports
v. Prior Acquisitions
vi. State and Street-Level Reporting of Geographic Market Information
vii. Author information for submitted documents
viii. Defense and Intelligence Contracts

Limited Lookback Periods

The Commission also relies on limited lookback periods to collect the most recent and reliable information and data related to the risk of a law violation. For example, filers are only required to submit the most recent annual reports and annual audit reports. This type of limitation is intended to focus on more recent economic activity and reduce the cost associated with collecting potentially less probative or out-of-date historical data. As discussed below in section VI., the Commission has reduced the lookback periods for some information requirements as compared to the proposed rule to reduce compliance costs and focus the information requirements on the most recent and probative data needed for premerger screening. In other places, the Commission has identified a fixed reporting period to limit the information filers must gather to prepare the HSR Filing and provide certainty for filers about what is required. For example, as compared to the proposed rule, the final rule contains shortened lookback periods for the following information:

i. Overlap Description
ii. Supply Relationships Description
iii. Officers and Directors
iv. Transaction Rationale
v. Minority Shareholders
vi. Prior Acquisitions

[297] In the initial rulemaking implementing the HSR premerger program, the Commission proposed to require the reporting of revenues by Standard Industry Classifications (SIC) codes. Many commenters complained about the costs associated with providing this information. But the Agencies needed to establish some system for reporting overlaps. This provides an early example of the Commission determining that, where the information is essential to enforcement of the antitrust laws, the costs associated with collecting and reporting that information is justified by the benefits in light of other available options.

[298] The Agencies rely on analytical tools to identify an area of effective competition, often by defining a relevant antitrust market. A relevant antitrust market comprises both product (or service) and geographic elements. *See* U.S. Dep't of Justice & Fed. Trade Comm'n, Merger Guidelines 4.3 (2023) (describing the information and analysis used by the Agencies to define markets for the purpose of antitrust analysis). For screening purposes, the Agencies may conclude that the parties to the transaction do not serve the same set(s) of local customers if there is reliable information in the HSR Filing that indicates that they generate revenues in different locales even if they supply the same product or service.

De Minimis Exclusions

The Commission also relies on de minimis exclusions to excuse the reporting of otherwise relevant information that might be costly to collect. De minimis exclusions can sometimes require extra effort by filers, because filers must evaluate whether the information is above or below the de minimis threshold. In the Commission's experience, it can sometimes take less time for filers to collect and report all responsive information than to report less information after conducting the assessment required to eliminate de minimis amounts. In deciding whether to add de minimis exclusions, the Commission carefully weighed the additional costs for filers to determine what information falls below the de minimis thresholds and can therefore be excluded, as compared to the costs of collecting all responsive information. The final rule contains new de minimis exclusions for certain information in the following requirements:

i. Supply Relationships Description
ii. Prior Acquisitions
iii. Defense and Intelligence Contracts

Voluntary Information

Finally, one new information request is not strictly required by the final rule, but filers may provide it on a voluntary basis. As part of the HSR Form, filers may agree to waive the confidentiality protections of the HSR Act to permit the Agencies to share HSR materials with other enforcers in order to facilitate cooperation during any investigation of the transaction. Such a waiver would be beneficial for the Agencies, and the filer may want to provide it as a way to limit the need to produce multiple or duplicative data sets and documents to other enforcers that are investigating the transaction, thereby reducing its overall regulatory compliance costs. Filers may view this as a benefit and therefore may grant a waiver even though their HSR Filing would be compliant with the final rule without it.

Non-Compliance Statement

In addition to these limits, the Act allows for incomplete answers with a statement of the reasons for non-compliance, and the Commission has the discretion to permit filers to rely on good faith estimates or no answer at all. If the filer is unable to answer any question fully, it must provide the information that is available and provide a statement of reasons for non-compliance as required by § 803.3, which is intended to reduce disagreements between filers and PNO staff.[299] Where exact answers cannot be given, filers are allowed to enter best estimates, while indicating the source or basis of the estimate, and marking the information with the notation ''est'' to any item where data are estimated. Finally, filers already routinely indicate under the current rules that certain required information is not applicable given the type of transaction being reported, and filers will continue to be able to do so under the final rule.

Summary of Requirements Based on Transaction Type

In the final rule, the Commission has employed all of these techniques to align the cost of complying with the final rule in light of the benefit to the Agencies, filers, and the public of the Agencies having the information on the first day of the statutory review period to conduct their preliminary antitrust assessment. The chart below summarizes the different information requirements of the final rule for the acquiring person and the acquired person for three distinct types of transactions: (1) select 801.30 transactions, (2) those transactions that will have no NAICS or described overlaps or supply relationships; and (3) transactions that report a NAICS or a described overlap, or a supply relationship, which includes transactions with significant pre-merger competitive interaction between the filers (for example a company acquiring one of its principal competitors or suppliers).[300] The chart indicates which type of filer will not provide this information because it is not required by the final rule. As depicted in this chart, the final rule creates different information requirements for different types of filers and different types of transactions, resulting in a range of costs associated with filing that are directly proportional to the complexity of the deal, corporate structure, and most importantly the risk of law violation.

[299] The submission of the statement of reasons for noncompliance is not intended to be a substitute for compliance with the notification obligation but it serves two salutary purposes: (1) reducing disagreement between the Agencies and the filer, and (2) providing a basis for any civil penalty proceeding that may be brought under 15 U.S.C. 18a(g)(1). *See* 122 Cong. Rec. 29342 (1976); *see also* 43 FR, 33450, 33508–09 (July 31, 1978).

[300] These three scenarios were used to calculate costs for the Paperwork Reduction Analysis, discussed below in section VIII.

D. Disproportionate Impact on Certain Sectors

Here the Commission addresses arguments that the final rule would have a disproportionate impact on certain sectors as part of its consideration of how the benefits and costs associated with the final rule are distributed among various groups.[301]

Small Businesses

Several commenters are concerned about the additional costs associated with the final rule for small businesses who are parties to a reportable transaction, stating that the proposed rule would disproportionally affect small businesses because they would be less equipped than larger businesses to cover the additional costs. Commenters said that these additional costs would not only deprive small businesses of funds that are needed for operations or innovation, they might also slow or deter dealmaking involving small businesses altogether. On the other hand, an individual commenter explained that the proposed rule would help small businesses who have been affected by mergers.

The Commission addresses concerns about undue costs throughout this final rule, making many adjustments to limit the costs of complying for those filers who do not have complex corporate structures or extensive business lines, including small businesses. In section IX., the Commission certifies that the final rule will not have a significant economic impact on a substantial number of small entities as that term is defined by the Small Business Administration (''SBA''). HSR reporting requirements apply to very few small businesses. Congress adjusted the statute in 2000 to require annual indexing of reporting thresholds so as to minimize the effect of inflation that would otherwise require more reporting for small businesses and small transactions, and nothing in the final rule changes which acquisitions are subject to premerger review. See section III.A.1.

In fact, the Commission believes that many small entities will benefit from the final rule. As noted by one commenter, the goal of antitrust enforcement is to strike the right balance: too little enforcement could allow some companies to gain an unfair advantage, while too much enforcement risks driving up compliance costs and undermining legitimate efforts to compete. The Supreme Court has explained that Congress designed section 7 of the Clayton Act to ''prevent economic concentration in the American economy by keeping a large number of small competitors in business,'' [302] and to retain '' 'local control' over industry and the protection of small businesses.'' [303] As a result, a merger of two small companies that allows the combined entity to compete more effectively with larger rivals may be unlikely to violate the antitrust laws. In contrast, the legislative history of the Clayton Act reveals Congress was very much concerned with, and sought to prevent, acquisitions involving large companies buying smaller or up-and-coming rivals that would otherwise cease to be independent businesses.[304] By making possible more effective and efficient premerger review of HSR-reportable transactions, the final rule will facilitate effective enforcement of the antitrust laws, which in turn will preserve opportunities for small businesses to thrive in markets that are not dominated by much larger competitors.

In passing the HSR Act, Congress made plain that it was not interested in burdening mergers between two small companies with premerger review, since small businesses generally do not present the same risks of anticompetitive effects as do larger businesses. To that end, the HSR Act specifically exempts certain smaller companies from its reach. But it is not possible to say that all transactions involving small businesses carry little or no antitrust risk, whether they are

[301] *See generally* Boardman et al, *supra* note 256, at 506; Executive Order 12866 directs agencies when designing regulation to ''consider incentives for innovation, consistency, predictability, the costs of enforcement and compliance (to the government, regulated entities, and the public), flexibility, distributive impacts, and equity.'' E.O. 12866 Sec. 1(b)(5) (1993).

[302] *United States* v. *Von's Grocery Co.,* 384 U.S. 270, 275–76 (1966) (also noting that undue concentration drives small businesses out of the market).

[303] *Brown Shoe Co.* v. *United States,* 370 U.S. 294, 316 (1962).

[304] *United States* v. *Aluminum Co. of America,* 377 U.S. 271, 281 (1964).

reported or not. When they are required to be reported, the Agencies are obligated to conduct a premerger assessment. Therefore, it is appropriate for the Agencies to receive information from even small businesses that are a party to a reportable transaction to determine whether those transactions may violate the antitrust laws.

Based on the Commission's experience, deals of any size can present significant antitrust risk. The American Antitrust Institute analyzed historical data about HSR filings from 1985 to 2020 and prepared a chart that reflects the percentage of Second Request investigations to transactions by deal value.[305] This data shows that while transactions valued at under $100 million rarely receive Second Requests, a not insignificant number of transactions in the $100 to $150 million range do. This confirms the Agencies' experience that although many deals that are subject to an in-depth investigation involve large companies, especially on the buyer side, it is not possible to ignore that some transactions that involve small businesses also violate the antitrust laws.[306] And of course, the Agencies are also attentive to small-value acquisitions that cause harm even if they were not subject to premerger review and seek to unwind them as resources and precedents allow.[307]

As modified, however, the final rule imposes lower costs on transactions involving independent small businesses, as they typically involve fewer business lines and less complex corporate structures. Typically, the larger the company, the more extensive and complex its business lines. Many of the changes in the final rule are designed to allow the Agencies to quickly understand complicated entities and the businesses that they have connections to. These changes generally will not impact small business. Further, where possible, the final rule imposes less burden on sellers (the acquired person), which tend to be smaller in size than buyers.[308] In effect, the final rule imposes costs on filers that are commensurate with the antitrust risk presented by the transaction: those with low risks (*e.g.,* simple corporate structures, few lines of business or no preexisting commercial relationship with the other party) have the lowest costs. Wherever practicable, the Commission took into account the burden across smaller businesses who may engage in competitively benign transactions and has adjusted the final rule in several significant ways to mitigate this burden. For example, the Commission has excluded select 801.30 transactions from certain requirements, eliminated other proposed requirements, and modified other proposed requirements as described throughout this final rule. The Commission believes that this approach, which is focused on antitrust risk and not necessarily business size, nonetheless minimizes the costs for small businesses involved in transactions subject to mandatory premerger review consistent with the statutory scheme.

Startups

A number of commenters expressed the view that the requirements of the proposed rule would deter innovation by denying startup firms an exit path; they observed that many startups plan for eventual acquisition, and this strategy drives investment that allows the firm to grow. Commenters stated that any change to the status quo will upset this balance. Others observed that acquisitions by large, established firms play a crucial role as an exit strategy for startups securing venture capital, which is an important source of funding in many sectors, including tech. Some of the same commenters, however, acknowledged the valuable role startups play by challenging established incumbents. Various commenters made nonspecific objections to increased burdens imposed upon startups by the proposals in the proposed rule.

Startup companies are not unique to particular industries but represent an important business model throughout the U.S. economy. For any transaction that does not present facts indicating it may violate the antitrust laws—including those involving startups—the minimal additional burden of disclosing more information is justified by the Agencies' need to conduct a thorough review in light of the information gaps discussed in section II.B. Where those facts are absent, there should be no additional delay or additional risk of detection for those transactions. Given the small incremental costs associated with the final rule relative to other M&A costs and the potential magnitude of returns from an exit sale of a successful startup, HSR compliance costs would not plausibly factor into the *ex ante* investment decision. To the extent that the final rule requires additional disclosures regarding the business lines of startups, that burden is not different from those imposed on established businesses in the same sector. Moreover, the Commission has no basis to excuse startup companies from complying with the final rule; it is not the case that they always or mostly present no antitrust risk. See sections II.B.4. and III.C.2.

Private Equity and Other Types of Investments

The Commission received several comments from groups representing investors raising concerns about the burden of gathering the information for the proposed rule as well as the burden of having to disclose the new information. One commenter asserted that certain proposed requirements would be particularly onerous for transactions involving private equity and venture capital, such as the expanded lookback period, information regarding limited partnerships, more information about prior acquisitions, the identities of past and present members of boards of directors, and disclosure of the buyer's prior acquisitions. Another commenter said that the burden of the information requirements would affect the efficiency of transactions and introduce more uncertainty and risk into the deal process, which would adversely impact returns for investors. Another noted that the burden of the proposed information requirements would, among other effects, make capital markets less efficient, resulting in a significant impact on its members and the thousands of pensioned workers, retirees, universities, and other investors who rely upon them. The Commission discusses these concerns elsewhere and has concluded that the incremental costs associated with the

[308] *See* Fed. Trade Comm'n & U.S. Dep't of Justice, Hart-Scott-Rodino Annual Report, Fiscal Year 2022, Tables VI through IX (FY 2022).

final rule are small relative to the value of the transaction and the costs of other merger-related fees. As noted throughout this final rule, the Commission has taken many steps to reduce the burden on all types of filers as compared to the proposed rule, including investors.

The same commenter who mentioned the effect on capital markets also noted that the HSR-reportable transactions in which its members engage often do not pose competitive risk. These are transactions in which the acquiring persons are investment groups, trusts, or other financial vehicles or are providing securities, commodities contracts, and other financial investments or related advice. According to this commenter, its members rarely, if ever, have horizontal or even vertical relationships with the issuers whose securities they acquire. Rather, the kinds of HSR-reportable transactions in which its members engage are not mergers or acquisitions but the acquisition of minority positions, for instance, when concentrated funds make large purchases due to sizeable investor inflows, when benchmark-relative funds make large purchases due to index rebalancing, or when managers shift portfolios into highly liquid names in anticipation of redemptions or in connection with wind-downs.

This and other comments generally reflect three different types of concerns: potential burdens for investors that must make HSR filings, potential burdens for minority investors in entities that have to make HSR filings (but have no HSR filing obligation themselves), and potential burdens related not to filing out the Form, but to potential enforcement actions to block the transaction that may arise from the Agencies having more complete information. The Commission addresses each below.

As a starting point, the Commission emphasizes that the final rule does not change who must file [309] and the HSR Act and Rules exempt passive investments of 10% or less,[310] or 15% or less for institutional investors.[311] The final rule does not alter the analysis regarding passive investments and therefore the final rule has no impact on investors who hold passive investments [312] unless these investors acquire more of a company than these significant ''investment only'' exemptions permit and are, as a result, required to report their investments for premerger review. As a result, many of the types of investors discussed in the comments will not have HSR filing obligations for their transactions, and thus would not be required to fill out the Form that is the subject of the final rule.

Some investors will have filing obligations either because they will hold a stake that provides them with the ability to direct or influence the management of the company in which they are investing (*i.e.,* above the 10% and 15% exemptions), or because they do not intend to be merely passive investors. In these instances, the Act treats them as any other acquiring person and the Agencies use the Form to screen for potential competitive effects. Until now, though, the Agencies have received less information about transactions where private equity and other types of investors are involved because the current Form does not require sufficient information to explain the often complex structures and relationships between different entities that are within the acquiring or acquired person. The final rule intends to close these information gaps and focuses on information that should be within the records of the acquiring or acquired person.

Further, the Commission acknowledges that investors can have different motivations in making acquisitions. Some do not seek to control or influence the companies in which they invest, but rather only seek a desired rate of return. In contrast, others seek positions with significant management rights or stakes that result in control of or influence in the target business. The Commission has sought to tailor the requirements of the final rule to illuminate those factors that could give rise to competitive concerns while minimizing additional costs for those investors that do not seek to participate in or influence decision-making of entities related to the acquiring entity or other entities within the buyer that are in the same industry as the target. As a result, the Commission has made significant changes as compared to the proposed rule, declining to adopt many of the proposed changes and significantly tailoring others. The Commission has also introduced the concept of select 801.30 transactions, which it anticipates will capture the transactions of many investors that do not seek to influence, direct, or manage the companies in which they invest. *See* section VI.A.1.f. The Commission has relieved such transactions from many of the new requirements, which it anticipates will mitigate the potential burden of providing information for many investors who do have to file.

As to investors that do not have HSR filing obligations but hold minority interests in entities that do, the final rule does require additional information about some minority investors if those investments are in entities controlled by the acquiring person that are either related to the transaction or operate in the same industry as the target. However, as described in section VI.D.2.a., the burden of providing this information rests on the acquiring person, not on those minority investors. Their presence as an investor should be known to the filer because the filer controls the entity, and when revealed in the HSR Filing, will provide information that will assist the Agencies in determining whether those investors also hold interests or have relationships with entities related to the target.

Additionally, the Commission modified the proposed rule to scale back requirements that would have broadly required disclosure of the limited partners of certain entities. As discussed below, the Commission has limited the final rule to require identification of only those limited partners that have certain rights related to the board of directors or a similar body. When required, this information is limited to providing the legal and business name of the minority investor, its address, and the percentage the investor holds in the entity controlled by the acquiring person. In most instances, the Commission believes this information should be available in the records of the acquiring person. When it is not, the Commission has explained that the acquiring person can note that the information is not available and why. The final rule does not create an obligation for the acquiring person to request this information from its minority investors. Therefore, the final rule imposes no burden on such minority investors in filling out the revised Form. Investors that do not have HSR Act filing obligations, but hold minority interests in entities that do, will not have any new obligations to either make filings or provide information for the filings of entities in which they have minority holdings.

Several commenters raised concerns that the additional information requirements for funds, especially those managed by activist investors, would

[309] One commenter suggests that the proposed rule would result in an increase in filings among investors. Comment of TIAA, Doc. No. FTC–2023–0040–0691 at 3. The Commission disagrees.

[310] 15 U.S.C. 18a(c)(9); 16 CFR 802.9.

[311] 15 U.S.C. 18a(c)(11); 16 CFR 802.64.

[312] Some commenters discussed shareholder engagement encouraged by the SEC. *See, e.g.,* Comment of Managed Funds Ass'n, Doc. No. FTC–2023–0040–0651 at 8. The Commission notes that the SEC is a different agency with a different law enforcement mission.

have a detrimental impact on these investors as a result of the disclosure of the information itself. They pointed to the disclosure of the interests and rights of limited partners as creating disincentives for shareholder engagement or as undue interference in the market for corporate control. Another commenter stated that disclosure requirements may deter investments in private equity firms, potentially reducing the flow of capital to small- and medium-sized businesses.

The final rule does not target information specific to any type of investor. But if an investor holds a small but significant stake (five percent or more) or plays a role in the acquiring person's decision-making, the Commission believes that disclosure of these interests is justified by the Agencies' need to know about such investments to conduct premerger screening. As discussed in section II.B.1. and section VI.D.1.d.ii, there have been significant changes in the number and breadth of investment companies managing portfolios that include investments in companies with competitively significant relationships. Due to these changes and others, the Commission has determined that the Agencies need more information about minority holders between the UPE and the acquiring person, as well as information about those who serve as officers and directors and who will be involved in decision-making after the transaction is consummated. Many commenters specifically objected to providing any information about limited partners, noting that the existence of significant management rights such as board seats or board approval rights, is ''atypical.'' The final rule has been modified to require disclosure only of these types of limited partner situations, which should mitigate these concerns.

Another commenter said that having to disclose the required information would deter investment in in certain types of investment vehicles because of the exposure of proprietary contractual information and Personally Identifiable Information (PII) about every facet of the M&A process. This commenter noted, for instance, that the requirement to provide a term sheet or draft agreement reflecting sufficient detail about the proposed transaction when filing on the basis of a Preliminary Agreement would expose details about transactions that could undermine competition in the industry and harm returns to LPs. In addition, this commenter stated that the requirement for PE firms to submit a narrative describing the justification for certain transactions would impinge on the proprietary information that PE firms exchange with target companies and their consultants.

As noted above and elsewhere, the Commission has made significant changes as compared to the proposed rule, and the changes in this final rule should address many of this commenter's concerns. That said, the Commission believes the commenter has overread the Commission's intent. The purpose of the final rule is to provide the Agencies with more information on those factors that could give rise to competitive concerns, not to expose every facet of the M&A process or investor strategy. The required information does not require social security numbers, addresses or other sensitive PII. Moreover, the final rule requires the disclosure of additional information to the Agencies, not to the public or third parties, and the confidentiality of the information provided to the Agencies as part of the HSR filings process is protected by statute, specifically 15 U.S.C. 18a(h).

Finally, as described in section VI, the final rule will provide the Agencies with more transparency into what the acquiring person holds and whether any person or entity that has influence over the acquiring person is also involved in the business of the target. Specifically, the Commission has not limited the information required about the acquiring person even in the case of select 801.30 transactions. As stated in the NPRM and throughout this final rule, the Commission believes this information is critical to the Agencies' initial review and the benefit for robust premerger screening justifies the burden of disclosing the information because it may identify an existing business relationship between the acquiring person and target (via common investors or shared managers) that are otherwise not revealed in the HSR Filing.

The Commission disagrees with comments that identify increased transparency about the filed-for transaction itself (and not the specific burden of collecting and providing the information) as a cognizable burden associated with the final rule. The purpose of the final rule is to require information that allows the Agencies to accomplish the task assigned to them by Congress: to determine whether the acquisition subject to the Act, if consummated, may violate the antitrust laws. Suggestions that increased transparency would endanger certain filed-for transactions implicitly indicate that the current Rules have led to under-enforcement of the antitrust laws. Any burden related to deal uncertainty that might arise from increased transparency is not a burden related to compliance with the HSR Act and the final rule, but rather is tied to whether the transaction itself may violate the antitrust laws.

Biopharmaceuticals

Two commenters from the biopharmaceutical sector suggested that several requirements of the proposed rule would disproportionately burden biopharmaceutical firms and transactions. They pointed to the burden of identifying information related to products in early stages of clinical development, and stated that, because the Commission's 2013 rule specific to pharmaceutical license agreements increased the universe of reportable transactions, any expansion of the Form disproportionately burdens the pharmaceutical sector. One additionally objected to providing information about employees, and the other asserted disproportionate impact from providing information regarding additional prior acquisitions because of the number of acquisitions in this sector, and from disclosing officers and directors due to biotech firms' dependence ''on a small cadre of qualified directors and officers.'' Both commenters claimed the changes to the HSR Form and Instructions will prolong the time required for HSR filing preparation and agency review, resulting in delayed transactions.

The final rule does not target any information that is unique to biopharmaceutical companies, and the Commission disagrees that the additional information that would be sought from these companies is not relevant. Where the final rule requires additional information from biopharmaceutical companies, the cost of supplying that information is justified by the benefit to the Agencies in having a more complete understanding of the companies' existing business operations and their business strategy, including prior acquisitions involving the same business lines. For instance, many biotech and pharmaceutical companies invest in extensive R&D pipelines, and the Agencies need information about products in development to determine if the companies are current competitors for innovation in a particular space to meet a particular need, or if one or both merging parties are potential competitors for any existing products.[313] As the commenters

[313] *See In re Sanofi Corp.,* No. 9422 (F.T.C. (f/k/a Questcor Pharms., Inc.),* No. 1:17–cv–120

Continued

acknowledged, mergers, acquisitions, and exclusive licenses are particularly prevalent in the pharmaceutical sector, where the business model for new drug development centers around such transactions. Similarly, the comparatively higher number of transactions occurring in this sector can be expected to trigger a higher number of HSR Filings and could require filers to disclose a greater number of prior acquisitions. Even if biopharmaceutical companies have to report more prior acquisitions, this disclosure is also justified because it is relevant to determining whether there is a pattern of serial acquisitions. The fact that sharing of officers and directors is more common among companies in this sector means there is a greater need for the Agencies to screen for related competitive problems.[314]

On the other hand, other information requirements have been modified to reduce the costs for all types of filers, including those in the biopharmaceutical sectors. For instance, the Commission declined to adopt new information requirements related to employees, which commenters asserted could impose significant costs on those in the biopharmaceutical as well as other sectors. Overall, the impact of the final rule is proportional to the number and characteristics of transactions that occur in any given sector of the economy (including biopharmaceuticals). To the extent that the revised Rules will result in delayed transaction closings, the potential impact of incremental delay is outweighed by the Agencies' statutory mandate to examine each transaction for the potential for that it may violate the antitrust laws. In other instances, the additional information may actually reduce delay by permitting the Agencies to avoid issuing a Second Request or issuing Second Requests that are more tailored to the potential for competitive harm than would have been issued under the existing reporting requirements.

In sum, the Commission has determined that the burden imposed on this sector by the final rule is proportionate to the market realities and complexities of these companies and the likelihood that any transaction may require more in-depth antitrust review.

Hospitals

A national organization representing hospitals and several State hospital associations stated that the proposed rule would have a negative and wholly unnecessary impact on hospitals and health systems. They asserted that the additional information required by the proposed rule would not generate actionable information with respect to hospital mergers. They objected to specific requirements, stating that reporting prior acquisitions has no relevance in the context of hospital mergers, or that it is inconceivable that a hospital-related merger could plausibly harm competition in any labor market without also presenting at least some competitive risk in a downstream market.

The Commission responds that the final rule does not target any information that is unique to hospitals and health systems, and disagrees that the additional information, when sought from hospitals, is not relevant. For example, the commenters' suggestion that the Agencies not screen for hospital labor competition issues is inconsistent with growing empirical evidence of competitive harm to labor markets from consolidation generally and from hospital mergers in particular.[315] Moreover, as discussed above, an empirical assessment of the price effects of consummated hospital mergers reveals that there are meaningful information gaps in the current requirements that led the Commission to grant early termination of the waiting period for hospital mergers that caused significant price increases.[316]

As discussed, the final rule will exclude non-profit entities organized for religious or political purposes from the specific requirement to produce information disclosing officers, directors, and members. This carve-out will likely encompass some healthcare organizations, including certain religious-affiliated hospitals or other provider groups. While these entities will not be required to provide such information as a matter of course in the HSR Filing, it can nonetheless be relevant in any in-depth investigation of the transaction and may be sought from the parties at a later date.

Given the Commission's significant expertise and interest in preventing hospital mergers that may violate the antitrust laws, the final rule is appropriately focused on transactions that are most likely to present antitrust risk. The Agencies have determined the information sought by the final rule will close the information gaps that now exist with regard to hospital and other healthcare acquisitions. Moreover, because many hospital mergers are not reportable under the HSR Act, several States have enacted premerger notification laws for certain healthcare acquisitions, including those involving hospitals, to prevent consolidation that may affect their citizens directly. In light of all this evidence of a need for robust screening in this critical sector, there is no basis to excuse hospitals or health systems from any of the new requirements of the final rule beyond the modifications that reduce costs on filers overall, including on hospitals.

E. Regulatory Alternatives Considered

In addition to considering the costs and benefits of the final rule as compared to the status quo, the Commission considered other alternatives suggested by commenters.[317] The first alternative is to not finalize any modification to the current HSR Form and Instructions and to issue more Second Requests when the HSR Filing is insufficient to determine whether the proposed acquisition may violate the antitrust laws. Relatedly, commenters suggested that the Commission maintain current reporting requirements and make more extensive use of voluntary submissions from the parties post-filing. These alternatives are discussed above in section III.A.3. Another alternative suggested by commenters is for the Commission to create two separate sets of information requirements, one for acquisitions that present a low risk of a law violation and therefore require less reporting (a ''short form'') that would continue to report the information required by current HSR rules and a second form for acquisitions that cannot be considered low risk and that would contain all of the new information requirements in the final

(D.D.C. Jan. 25, 2017) (complaint alleging Questcor's acquisition of rights to pipeline competing drug eliminated nascent threat and protected its monopoly ACTH drug H.P. [317] Executive Order 12866 requires an assessment of costs and benefits of potentially effective and reasonably feasible alternatives to the planned regulations and an explanation of why the planned regulatory action is preferable to the potential alternatives. E.O. 12866 sec. 6(a)(3)(C) (1993). As an independent agency, the Commission is not subject to the requirements of this executive order but nonetheless used the principles outlined there to explain why the Agencies' chosen regulatory action is preferable to potential alternatives.

rule. Here the Commission discusses the relative merits of adopting this alternative over the final rule.

Several commenters suggested that the Commission consider creating two separate sets of information requirements for notification, stating that this approach is used by other jurisdictions to alleviate some costs and delays associated with merger notification under their laws. They asserted that it would be suitable for effective and efficient premerger review under U.S. law.

As discussed above, the HSR Form is not ''one size fits all'' and the costs of making an HSR Filing are unique for each transaction. In this rulemaking, the Commission is publishing, for the first time, separate Forms for the acquiring person and the acquired person. The final rule has materially different requirements for each filing person, and providing separate Forms allows for clearer instructions (avoiding terminology in the proposed rule such as ''the acquired person or acquired entity (as applicable)''). The Commission expects that having two separate forms for each side of the transaction will improve compliance and reduce errors for filers.

Moreover, while not styled as a ''short'' or ''long'' form, the final rule reflects the Commission's consideration of each requirement and makes clear where there is a need for the information for each type of transaction. In particular, the IF/THEN structure of the information requirements results in some filers responding to only a few information requirements. As a result, in practice, there are ''shorter'' and ''longer'' versions of the forms depending on the type of filer and the type of transaction under review. The Commission determined that this approach better reflected the varying information requirements the Agencies need in order to effectively and efficiently analyze the broad spectrum of filers and transactions.

Most importantly, in its review of past filings, the Commission found no set of objective criteria that would appropriately sort transactions into one or more discrete categories for the development of a single short form. Rather, the final rule adopts new information requirements but imposes them differently to reflect each filer's role in the transaction (acquirer versus acquired) and the relative antitrust risk associated with the proposed transaction. Filers with the highest information and document requirements are acquirers pursuing the acquisition of a firm with whom they have extensive existing business relationships or offer products or services in the same industries that must be assessed prior to consummation.

For one category of transactions, select 801.30 transactions (described in section VI.A.1.f.), the Commission has determined that the Agencies need minimal additional information such that the final rule should impose fewer new requirements. The Commission believes that the few new information requirements for select 801.30 transaction are justified in order to ensure that the Agencies conduct a premerger assessment to determine that even these transactions do not present risk of a law violation. Similarly, the Commission determined that other characteristics justify a different and lighter burden, such as whether the filing person is the buyer or the seller in the transaction. Finally, many requirements are tied to the acquiring and acquired person operating in the same industry or having a business relationship. These questions would be inapplicable to many filers, particularly activist, institutional, and retail investors, which typically do not have controlling stakes in operating companies or do not focus on a particular industry. As a result, the costs of complying with the final rule are tailored to the risk of a law violation associated with each transaction in a way that is similar to, but more flexible than, the ''short form'' alternative. The size and complexity of each party to the transaction, as well as the size and scope of their respective business, vary widely across filings. As discussed in section II.B., there are specific risks to competition that the current information requirements do not disclose, making the final rule a better alternative to achieve robust premerger screening even for select 801.30 transactions as compared to a short form alternative.

In addition, the short form alternative is likely to create uncertainty for filers that do not qualify for short form treatment but whose deals would suddenly be viewed as ''not low risk.'' Having a bifurcated system that targets some transactions as ''low risk'' is not consistent with the statutory premerger scheme Congress created when it determined that reporting would be required based on deal value regardless of the risk of a law violation, with additional authority for the Commission to exempt transactions that it has determined to present little to no antitrust risk. At this time, the Commission does not have a basis to conclude that the existing requirements continue to be sufficient for any category of transactions.

The Commission believes that broadening the use of the HSR Form's existing IF/THEN format so that the final rule aligns the cost of complying with the associated antitrust risks of the transaction is the most appropriate way to implement the premerger notification scheme established by Congress. Congress has determined which transactions are subject to premerger review, relying on deal value to determine reportability. This criterion provides administrative clarity and predictability for businesses. Some jurisdictions use market share or revenue (''turnover'') thresholds to determine reporting or eligibility for short form treatment. But in doing so, these regimes also typically depend on the competition authorities to provide extensive guidance to business, often prior to formal notification, regarding the proper definition of markets. This may require an in-depth analysis of the potential markets at issue and can delay formal notification.[318] Congress has chosen to rely on an objective and administrable system of reportability based on deal value and revenues for filers. Adopting a different standard for determining eligibility for short form treatment would require the Commission to engage in a separate and challenging rulemaking to seek public comment on what types of thresholds should be adopted that would be consistent with the premerger scheme Congress adopted in the HSR Act. At this time, the Commission has determined that one category of filings, select 801.30 transactions, will have minimal additional information requirements as compared to the current HSR Form and has made other modifications in the final rule to reduce the costs for other types of filers and transactions as well.

Although the short form alternative would save some filers additional direct costs associated with making an HSR, the Commission chose to adopt the final rule with modifications designed to reduce the cost of filing as much as possible for all types of filings, including those transactions that might be eligible for short form treatment. The Commission believes that this approach reflects, to the extent practicable, the antitrust risks associated with a variety

[318] Relying on market share thresholds presents many challenges, and several jurisdictions have replaced them with thresholds that are easier to administer. In the early 2000s, approximately half of the jurisdictions with merger control had subjective notification thresholds such as market share but by 2010 more than forty percent of these jurisdictions had replaced their subjective thresholds with objective, sales- or assets-based thresholds.

of filings, not just ones that could be eligible for short form treatment. A final rule that reasonably balances the benefits to Agencies' premerger review with the costs imposed on filers and others is a reasonable exercise of the Commission's rulemaking authority under the HSR Act and is consistent with the overall mandatory premerger review scheme established by Congress. The Commission believes that the final rule, with its tailored modifications based on the Agencies' experience in reviewing thousands of transactions, will result in minimal additional costs for certain filers and is preferable to adopting and maintaining a short form.

Final Instructions and Changes From the Proposed Rule

IV. Part 801

A. Sections 801.1(d)(2): Ministerial Changes To Reflect Reorganization of Form and Instructions

While the Commission will continue to use the same mechanism for electronic filing, it has re-organized the Form and Instructions, as discussed below in section VI. As a result, several ministerial changes must be made to § 801.1(d)(2). This section, which defines ''Associate'' and provides examples, currently refers to item numbers used in the current Form and Instructions. The Commission adopts revisions that align with the Form and Instructions as adopted in this final rule.

Specifically, the definition of ''Associate'' and the related examples refer to Items 6(c)(i), 6(c)(2), and 7. This information is now required by the Minority-Held Entity Overlaps and Controlled Entity Geographic Overlaps sections, which replace the previous item numbers. The Commission, accordingly, modifies the Rule to reflect these changes.

B. Section 801.1(r): Definitions of ''Foreign Entity or Government of Concern'' and ''Subsidy''

On December 29, 2022, the President signed into law the Consolidated Appropriations Act, 2023, which included amendments to the HSR Act in the Merger Modernization Act. 15 U.S.C. 18b. The Merger Modernization Act required the Commission, with concurrence of the Assistant Attorney General, and in consultation with Chairperson of the Committee on Foreign Investment in the United States, the Secretary of Commerce, the Chair of the United States International Trade Commission, the United States Trade Representative, and heads of other appropriate agencies (''Relevant Agencies''), to promulgate a rule to require persons making an HSR Filing to disclose subsidies received from countries or entities that are strategic or economic threats to the United States.

After conducting its own internal diligence to draft a rule and in consultation with the Relevant Agencies on this topic, the Commission proposed amending § 801.1 to add proposed paragraphs (r)(1) and (2), which define ''foreign entity or government of concern'' and ''subsidy,'' respectively.

The Commission received no objections to the proposed definitions and received input that they appear to be a reasonable implementation of the Merger Modernization Act. As such, the Commission adopts these definitions as proposed.

V. Part 803

A. Sections 803.2, 803.5, and 803.10: Adoption of Electronic Filing

The Commission proposed amending §§ 803.2(e) and (f); 803.5(a)(1) [319] and (3) and (b); and 803.10(c)(1)(i) and (ii) to eliminate references to paper and DVD filings and delivery to physical offices. The Commission has been successfully accepting filings electronically since March 17, 2020, as a result of the COVID–19 pandemic and resulting closures of Federal office buildings during the COVID emergency. The Commission received only one comment on this proposed change: One commenter noted that electronic filing is generally preferable and less burdensome to filing by paper or DVD. The Commission received no negative comments on the elimination of paper and DVD filings. The Commission adopts this change as proposed, though, as explained below, § 803.2(e) and (f) have been redesignated as (d) and (e), respectively.

Separately, the Commission noted in the NPRM that the Agencies were developing a new e-filing platform that would eventually replace the current mechanism for electronic filing. The same commenter stated that before seeking to impose an e-filing requirement on all parties, the FTC should provide further details regarding the proposed user interface; the ability for users to collaborate on a single filing; the ability of users to save, review, and edit; and how filing persons will receive complete copies of filings as submitted. At this time, no change has been made to the method for accepting filings. While the Form and Instructions have been updated, filers will continue to use the platform that has been in use since March 2020. The Commission continues to develop a new interface for electronic filing and will, at the appropriate time, issue a rulemaking that provides instructions and access to the new e-filing platform in advance of its effective date.

B. Sections 803.2(b), (c), and (e); 803.9(c); and 803.12(c): Ministerial Changes To Reflect Reorganization of Form and Instructions and Clarification of Time Zone

As discussed above in section IV.B., several ministerial changes must be made to the Rules to reflect the new organization of the Form and Instructions. Existing §§ 803.2(b), (c), and (e), and 803.9(c) all currently refer to item numbers used in the current Form and Instructions. The Commission adopts revisions that align the references in the Rules with the headings in the Form and Instructions as adopted in this final rule.

Additionally, existing § 803.2(b) of the Rules currently explains what information needs to be provided by the acquiring and acquired person for Items 5–8 of the current Form. As described below, the Commission adopts separate instructions for the acquiring and acquired person, making existing § 803.2(b) unnecessary. For this reason, existing § 803.2(b) is being removed, and existing § 803.2(c)–(f) are being redesignated as § 803.2(b)–(e), respectively. Further, existing § 803.2(c) and (e) have references to the current Form numbering and are being updated.[320] Similar ministerial changes are being made to §§ 803.9(c) and 803.12(c). Finally the references to time in, redesignated § 803.2(d) have been updated to specify Eastern Time, consistent with other provisions of the Rules and with longstanding practice.

C. Section 803.2: Requiring Separate Forms for Acquiring and Acquired Persons

The Commission proposed amending § 803.2(a) and deleting § 803.2(b)(1)(v) so that filing persons that are both the acquiring and acquired person are

[319] In making this change, the Commission also takes the opportunity to correct the capitalization of ''act'' to lower case to be consistent with the definitions and other usage of the term in the Rules.

[320] For purposes of consistency and clarity, the Commission is also making a ministerial change to § 803.2 to explain that documents must be provided by 5 p.m. Eastern Time. Because electronic filing permits parties to submit documents from different time zones, they will need clarity as to which time zone the Commission is referencing in the rules. The Commission notes that § 803.10 already specifies that Eastern Time should be used when determining the expiration of the waiting period as well as the date of receipt of filings and it has long been the practice of the Commission to use Eastern Time in applying this rule.

required to submit separate Forms in each capacity. The Commission proposed this change because, in its experience, filers that opt to combine the information on a single Form often do not include everything that is required and would be reported if they filed on separate Forms. Such combined filings are also very confusing for the Agencies to review. In contrast, when filers choose to submit two separate Forms for such transactions, the filings provide all the required information and in a much clearer format that allows the Agencies to quickly understand how the transaction might change the operation of the acquiring person post-acquisition.

The Commission received only one comment on this proposal, which expressed support and noted that it will enhance the understanding of the entire transaction. The Commission adopts the change as proposed but replaces the word ''should'' with ''shall.''

D. Section 803.5(b): Requiring Detailed Letters of Intent, Draft Agreements, or Term Sheets

The Commission proposed amending § 803.5(b) to require filers who have not executed a definitive transaction agreement to submit a draft agreement or term sheet describing the transaction that is the subject of the HSR Filing with sufficient detail to permit accurate analysis.[321] The Commission received numerous comments on this proposal focused on the increased burden and delay for filing parties. The Commission has adopted the proposal in the final rule with modifications that respond to these concerns.

Although filers can currently file on the basis of preliminary agreements, such as an indication of interest, letter of intent, or agreement in principle (''Preliminary Agreements''), in the Commission's experience, a small but significant minority (approximately 10%) of filings made on the basis of Preliminary Agreements do not contain enough information to permit the Agencies to conduct an accurate determination of whether the contemplated acquisition may violate the antitrust laws if consummated.[322] In addition, such filings may be made prior to significant negotiations or due diligence and can be so lacking in specifics that they could force the Agencies to expend resources on transactions too uncertain to merit review.

As discussed below, the Commission has determined that it is necessary to assure that filings are not made prematurely—before the scope of the transaction has been sufficiently determined and before the parties have engaged in enough diligence such that consummation is not merely hypothetical—and in contravention to the purpose of requiring an affidavit stating that there is a good faith intent to consummate the transaction. However, the final rule will not specifically require term sheets or draft agreements for all transactions where a definitive agreement has not been executed. Rather, the Commission will continue to require filers to submit an executed agreement but, if that agreement does not describe with specificity the scope of the transaction that the parties intend to consummate, filers must also submit an additional dated document, such as a term sheet or draft definitive agreement, that does contain sufficient details about the transaction that the parties intend to consummate. This dated document can also take other forms; the title of the document is not determinative.

One commenter sought clarity on what level of information would constitute sufficient detail as required by the proposed rule, including what types of terms that may still be subject to negotiations would render a term sheet as an insufficient basis to submit an HSR filing. The Commission agrees that the additional clarity suggested by the commenter would be helpful in reducing uncertainty. The Commission revises the Instructions accordingly, as noted in section VI.H.1., to describe what would be sufficient. The Instructions state that the transaction agreement or supplemental document should contain some combination of the following terms: the identity of the parties; the structure of the transaction; the scope of what is being acquired; calculation of the purchase price; an estimated closing timeline; employee retention policies, including with respect to key personnel; post-closing governance; and transaction expenses or other material terms. The Commission notes that these examples are meant to be illustrative and not exhaustive. In contrast, indications of interest or other agreements that merely indicate that the parties will commence negotiations or begin diligence will not be sufficient.[323]

Using the criteria adopted in the final rule, the Commission analyzed all filings that contained Preliminary Agreements submitted in FY 2021 to determine how many transactions would be impacted by the final rule.[324] Of the transactions that were submitted on the basis of a letter of intent, term sheet, or similar document that was not a definitive agreement, less than 10% did not provide the Commission with a sufficient level of detail to assess the transaction. From this data, the Commission believes that filing parties typically reach agreement on key terms prior to filing, and there would be no additional cost to them to comply with the final rule. Of those that do not reach such agreement prior to filing, the Commission believes that antitrust review is not warranted until such time as the parties have resolved key aspects of the transaction, such as those described above, because the transaction may never be consummated, or key terms may change in ways that would affect the Agencies' initial review.

The Commission believes the transaction agreement requirements of the final rule represents a middle ground between a merely conceptual deal and a ''ready to close'' deal. The Agencies need to know the key terms of the transaction to determine whether it may violate the antitrust laws if consummated. Given the short period of time given to the Agencies to make that determination, it is necessary for the transaction to be one that is likely to close. The Commission acknowledges that even with this modification, the final rule may not permit some parties to make an HSR Filing as early in their deal process as is currently permitted. However, parties will be able to file after they have agreed to material terms of the transaction even if a final agreement has

[321] NPRM at 42182.

[322] Some commenters assert that documents such as letters of intent and preliminary agreements give the agencies enough information to identify those transactions that require further scrutiny. Based on its experience over forty-five years of reviewing merger filings that include these Preliminary Agreements, the Commission disagrees that they always provide sufficient information, especially when filings are made prematurely, prior to any significant due diligence.

[323] Here is an example of the type of terms contained in agreements that have been filed with an HSR Form and conformed to existing requirements, but will no longer be accepted without filing an additional document that provides the key terms of the agreement once the final rule is effective: This letter agreement confirms the good faith intention of Alpha (''Purchaser''), to consummate the acquisition of Target, a corporation, from Beta (''Seller''), for in excess of $119.5 million and less than $235 million, subject to the terms of a definitive agreement to be negotiated and executed by them with respect to such acquisition and the satisfaction of conditions to be set forth therein. This letter agreement is non-binding and subject to satisfactory completion of due diligence, mutually acceptable definitive documentation to be negotiated between Purchaser and Seller. Purchaser will pay all filing fees in connection with all filings under the Hart-Scott-Rodino Antitrust Improvements Act of 1976, as amended, and the rules and regulations thereunder.

[324] The Commission reviewed transactions filed during FY 2021 due to the large number of filings received by the Agencies during that fiscal year, which made for a robust data sample. *See supra* note 260.

not been executed. The Commission notes that for many filings that do not contain an executed agreement today, the parties continue to negotiate final terms. The Commission expects that after the final rule, parties that have come to an agreement on key terms but have not yet signed a definitive agreement will continue to work to an executed agreement while the Agencies are conducting their antitrust review.

The transaction agreement requirements of the final rule are necessary to address a real shortcoming of allowing notification on Preliminary Agreements. As noted above, currently, some parties submit a ''letter of intent'' that substantively only states that the two parties have the good faith intent to consummate a transaction. Some documents are labeled an ''expression of interest'' in a future transaction that is similarly not specific. In the Agencies' experience, such filings are often made prior to any significant due diligence has begun and do not demonstrate that the parties have considered or agreed to key terms that would be required for consummation. Such filings require staff to dedicate time to collect facts and make an initial determination of potential illegality for a transaction that may never occur or without a sufficient basis to know the full scope of what the parties may agree to in the future. As noted in the original Statement of Basis and Purpose from 1978, because of the time and resource constraints upon the agency staff, the Agencies should not expend resources to review transactions so lacking in specifics that they could be considered merely hypothetical.[325]

The Commission has considered the additional effort required to review transactions that are filed with Preliminary Agreements and has determined that permitting filings on barebones agreements lacking sufficient details about key terms is contrary to the overall intent of the HSR Act. When a filing is made, triggering the initial waiting period, staff must start their review of the transaction and decide whether to issue Second Requests within the applicable statutory waiting period (15 or 30 days). If key terms of the transaction have not yet been established, staff may not have sufficient information to determine the potential antitrust risks. Further, if the parties have not yet begun robust negotiations or due diligence, the filing will not contain documents that provide business assessments of the transaction because such assessments have not been made. If the parties have not yet analyzed the impact of the transaction, it is not appropriate for the Agencies to begin such an assessment. This is particularly true if such assessments or negotiations lead the parties to abandon the transaction. In those cases, the Agencies will have needlessly spent scarce resources and may have burdened third parties investigating the transaction. Even if the parties do not abandon their transaction and the reviewing agency issues Second Requests, these investigations are often unnecessarily slowed down by the uncertainty surrounding the deal terms. The Commission understands that filers are anxious to get their HSR review completed so that it does not delay consummation of the transaction. But putting the burden on the Agencies to conduct antitrust assessments prematurely based on Preliminary Agreements that lack specificity undermines the purposes of the HSR Act. In addition, allowing notifications on mere expressions of interest in a future transaction creates opportunities to file as early as possible knowing that early filings put the Agencies at a disadvantage in conducting a thorough review.

Commenters raised concerns that the delay associated with negotiating additional deal terms would cause filers not to pursue beneficial transactions. One commenter claimed that as time is often of the essence in mergers, the result would be a significant chill on mergers. Another commenter contended that the proposal would deter investment in private equity and would increase costs that would likely be passed down to limited partners. Another commenter claimed that the Agencies failed to consider additional costs resulting from the additional delays in the transaction timeline.

The Commission disagrees that requiring more detail about transactions filed on Preliminary Agreements will chill M&A activity generally or for any particular type of investment. First, based on the Commission's review of filings detailed above, most reported transactions already meet the requirements adopted in the final rule. For those that do not, the Commission has identified a specific need for more detail to ensure that the reported transaction is likely to occur so that it is ripe for antitrust review. In addition, Congress identified those transactions where time is of the essence—namely, those that will be accomplished through a cash tender offer—and provided for a very short 15-day initial waiting period. For these transactions, the acquiring person does not need to file any agreement; it merely attests that its intention to make the tender offer has been publicly announced.[326] For other transactions, the Agencies need some basis to know that the reported transaction is one that is likely to occur so that they do not begin an antitrust assessment before fully understanding how the transaction will likely change the premerger market dynamics. In the Commission's experience, when parties cannot reach agreement on a few key terms within their desired timeline to consummate the transaction, that is an indication that the deal is one that is not likely to close or is likely to close on terms that are very different from the ones in the Preliminary Agreements. Finally, while the parties have an interest in starting the 30-day review period as soon as possible so that it does not unnecessarily delay their deal, the Commission has an obligation to review the transaction to determine whether it may violate the antitrust laws, and cannot effectively do so prematurely. The Commission believes that any delay associated with filers complying with the transaction agreement requirements of the final rule is necessary and justified by the benefits to the Agencies and the public in avoiding premature review of reported transactions.

Separate from the concerns about delay, one commenter expressed concerns that, as drafted in the NPRM, the Instruction arguably requires the production of the most recent draft agreement, even if a term sheet was also provided. The final rule requires filers to analyze the executed agreement to determine whether it provides sufficient detail about the transaction. If that document does not, then filers must provide one additional dated document that does sufficiently describe the transaction. The same commenter also questioned the value to the Agencies of receiving the most recent draft agreement, which they state is often slanted to reflect the views of the most recent party to circulate a draft and thus is not necessarily representative of what the definitive agreement will ultimately become. If the most recent draft agreement does not reflect the key terms of the transaction, then some other document, such as a term sheet, should be submitted. Otherwise, as described above, the filing may be premature. Further, the Commission acknowledges that certain provisions of a draft agreement that are not strictly necessary to understanding the antitrust implications of a transaction may change, sometimes substantially, and that the final definitive agreement is the most probative. However, the Commission believes that not permitting

[325] 43 FR 33450, 33511 (July 31, 1978).

[326] 16 CFR 803.5(a)(2).

filing until a definitive agreement has been reached is not necessary and could impose too great a cost due to the associated delays. The Agencies have extensive experience with reviewing draft agreements and find that even they can be probative. So long as the draft agreement and the associated executed agreement comply with the transaction agreement requirements of the final rule, the Commission will accept a supplemental document that is in draft form.

The same commenter suggested revising proposed § 803.5 to change ''will be consummated'' to ''the parties intend to consummate.'' The Commission agrees that this change in wording better captures the requirement for the parties to attest to their good faith intention to proceed with the transaction based on the submitted document and will add the phrase ''the parties intend to consummate'' to § 803.5. The Commission notes, however, that in order to satisfy the Act, parties must file and observe the waiting period for the transaction that will be consummated. Therefore, if there are material changes to the transaction after filing, the parties must continue to notify the Agencies so that they can determine whether an amended or new filing may be required. The Commission thus adopts the proposed requirement to submit a draft agreement or term sheet with the clarifications noted above.

In sum, the Commission has determined that changes to § 803.5 contained in the final rule are necessary and appropriate to prevent the Agencies from reviewing transactions for which the merging parties have not yet reached agreement on key terms. For premerger review to be timely and effective, the Agencies need some assurance that the transaction is likely to occur and that the scope of the transaction is revealed in the transaction documents submitted with the HSR Filing. The Commission has modified the final rule as compared to the proposal for this requirement to reduce the cost and delay for filers as much as practicable.

E. Section 803.8: Translation of Documents

The Commission proposed amending § 803.8 to require submission of English-language translations for all foreign-language documents submitted with the notification. Under § 803.8(a), filers currently do not need to translate these materials for the initial filing, and English-language outlines, summaries, extracts, or verbatim translations need only be provided if they already exist. Section 803.8(b), in contrast, requires that all foreign-language documents responsive to a Second Request be provided with English translations. The Commission proposed combining § 803.8(a) and (b) so that proposed § 803.8 would therefore be one paragraph requiring that verbatim English translations be provided with all foreign-language materials submitted as part of an HSR Filing or in response to a Second Request. The Commission adopts this proposed change with a revision to reduce potential confusion.

As explained in the proposed rule, when the Agencies receive key documents, such as the transaction agreements, relevant financial analyses or transaction-related assessments required by Item 4(c) with no translation at all or with unhelpful English-language outlines, summaries, or extracts, the Agencies are at a significant disadvantage during the very short period provided for initial review. The Commission received several comments on this proposal, principally regarding the burden and overall need for the proposed translation requirement. One commenter supported the proposed change, noting that with the help of modern software the cost of producing English translations should not be burdensome. The Commission agrees. As stated in the proposed rule, the Commission believes that translation tools available to the parties have become more abundant and these tools provide many options for translation that should significantly reduce the cost of providing translations. Moreover, it is important that the parties themselves provide translations because they created the documents at issue. The parties should ensure that translations are faithful to the original documents, a task that the Agencies are unable to complete, as they do not have the context or background to the transaction or companies that would be necessary to identify material errors. The Commission wants to avoid disputes over translations of these complex business documents that the parties have not reviewed.

The Commission notes that not requiring English-language translations from all entities, including foreign entities, under the current rule puts the Agencies at a disadvantage when reviewing HSR Filings with only foreign-language documents. This also creates an advantage for non-U.S. firms (whose materials are most likely to be in a foreign language). If key documents are not translated, the Agencies cannot give the transaction the same level of rigorous review and scrutiny as they do for transactions where all of the documents can be reviewed starting on the first day of the waiting period. Translation requires time that should not be taken from the short period available to the Agencies for the initial review. Time spent translating documents reduces the time available for more critical tasks, such as assessing the antitrust risk of filed transactions.

To understand the potential costs associated with requiring submitted documents to be translated, the Commission examined all HSR filings submitted in FY 2021.[327] Of the 7,002 HSR Filings that year, only 40 contained documents submitted in a language other than English and did not provide a translation. This represents fewer than 0.6 percent of filings that year. While the cost of providing translations may increase the cost of making an HSR Filing for these particular filers, the overall impact of this requirement is limited.

Beyond the issue of increased cost, some comments questioned the need to include translations with HSR Filings, especially for transactions that do not raise competitive concerns. The Commission disagrees that translations of submitted documents are not necessary for the Agencies to complete their analysis or that they are useless to the Agencies. The foreign-language versions of the documents are required by the Rules because they are responsive to specific information requests. As stated in the NPRM, the Agencies receive HSR Filings that contain only foreign-language versions of key materials, such as the transaction agreements submitted in response to current Item 3(b) of the Form, the relevant financials submitted in response to current Item 4(b), and the documents submitted in response to current Items 4(c) and 4(d) of the Form. These are the very documents that allow the Agencies to conduct a preliminary review of HSR Filings for compliance with filing requirements and to determine whether the transaction may violate the antitrust laws. Other filers submit these same types of documents in a form that staff can quickly review. Not being able to review these key materials on the first day of the waiting period puts the Agencies at a material disadvantage during their initial review.

After carefully considering the objections in the comments, the Commission continues to believe requiring translations of foreign-

[327] As noted above in footnote 260, the Agencies selected FY 2021 for this effort because of the large number of reportable transactions that year, 3,520, which provided for a robust data set. For these transactions, there were 7,002 filings, roughly two per transaction. *See* Fed. Trade Comm'n & U.S. Dep't of Justice, Hart-Scott-Rodino Annual Report, Fiscal Year 2021 appendix B (FY 2021).

language documents with HSR Filings is necessary and appropriate for the Agencies' premerger assessment, and notes that such translations may be especially important for those transactions that report foreign subsidies.[328] Despite the cost to filing parties, translations permit staff to review transactions and determine whether they require further investigation on the basis of the materials contained in the HSR Filing. With this cost in mind, the Commission invited commenters to suggest other alternatives that might achieve the Commission's goal of being able to understand and assess foreign-language documents while lessening the cost for filing parties and received a range of potential modifications to the proposal. One commented suggested that the requirement to provide verbatim translations should be limited to only final documents, not draft versions. As noted in section VI.G.1.b., the Commission has not adopted the proposal to require drafts, so no translations will be required for such documents in connection with the submission of the Form.

Commenters also proposed requiring only general summaries in English in lieu of verbatim translations, or permitting a filing party to produce a better-quality translation within a reasonable time period if the Agencies request them. The Commission acknowledges these suggestions but does not believe either presents a viable alternative to the version of § 803.8 contained in the final rule. General summaries do not provide the Agencies with a complete, detailed picture of the transaction. The Agencies' preliminary analysis of transactions often relies upon a nuanced and thorough reading of documentary attachments, and general summaries may not include facts or descriptions that the Agencies find relevant. The ability to require a better-quality translation within a reasonable time period after the submission of the HSR Filing will mean the Agencies must depend on filing parties to respond; this would likely delay Agency review within the already time-constrained initial waiting period. The time saved by the parties in preparing a summary in lieu of a translation is outweighed by the benefit to the Agencies of having a version of the underlying document available at the beginning of the waiting period.

Given the importance of having translations of key documents, the Commission adopts the proposed changes to § 803.8 but deletes the reference to ''understandable.'' The Commission believes this word is superfluous when used in conjunction with ''accurate and complete'' and may introduce confusion. Section 803.8 does not require any particular method of translation but specifies that, whatever translation method the parties choose, all verbatim translations must be readily understood, materially accurate, and complete. One commenter suggested revising the instructions to state explicitly that the submission of machine translations is acceptable. The Commission declines to state this explicitly and notes that in complying with the requirement to provide translations, parties must certify that translations are materially accurate even if they do not identify how they were created.

In sum, the Commission has determined that the translation requirement contained in the final rule is necessary and appropriate to enable the Agencies to quickly review submitted documents with English translations that have been certified as accurate.

F. Section 803.10: Commencement of Waiting Periods

The Commission proposed amending § 803.10(c)(1)(i) to clarify that filings made electronically are to be credited as received by the Agencies on the date filed if: (i) the electronic submission is complete by 5 p.m. Eastern Time; and (ii) such date is not a Saturday, Sunday, legal public holiday (as defined in 5 U.S.C. 6103(a)), or the observed date of such legal public holiday. This change codifies the current policy, and no comments were received. The Commission adopts this change as proposed.

G. Section 803.12: Information To Be Updated With Refiling

The Commission proposed amending § 803.12(c) to specify what updates would be required to the acquiring person's filing if the acquiring person chose to withdraw its HSR Filing and refile it. This procedure for voluntary withdrawal and refiling permits the acquiring person to restart the initial waiting period, providing the Agencies an additional 15 or 30 days (depending on the transaction type) to review the transaction without issuing a Second Request, as long as certain conditions are met. Currently, the rules require updates to Items 4(a), 4(b), 4(c), and 4(d). The NPRM proposed changes to § 803.12(c) including: eliminating the requirement to provide updated financials, currently required by Items 4(a) and (b); requiring updated Transaction-Related Documents with the updated HSR Filing; requiring updated transaction agreements; and requiring updated information about subsidies from Foreign Entities of Concern. The Commission adopts the proposed change with modifications to reflect ministerial changes to the names of sections of the Form.

The Commission received one comment on this proposal that noted that the proposal would impose a significant additional burden on the merging parties by requiring them to conduct a new search for Transaction-Related Documents with an expanded set of custodians. According to this commenter, it would also discourage the parties' use of pulling and refiling, and divert agency resources away from the review of other reported transactions.

Parties who withdraw and refile under § 803.12(c) must already search for new documents responsive to current Items 4(c) and 4(d). The basic requirement to search for new Transaction-Related Documents remains largely the same with the addition of only a single new custodian (the supervisory deal team lead, as defined) and a clarification that versions sent to any member of the board of directors (or similar body for non-corporate entities) are responsive and should not be treated as draft documents. The search required is a limited one, reaching back at most to the 15 or 30 days since the original filing was made. The Commission notes that these newly created documents and updated agreements are material to the Agencies' evaluation of the transaction and the determination of whether to issue a Second Request. Additionally, a change in information about subsidies may also be material and, until the Agencies have more experience with receiving this information, as required by Congress, parties must also provide updates to this item. The Commission therefore adopts the proposal with changes made to the names of the sections in the Form and Instructions.

VI. Part 803 Appendix A and Appendix B

Below, the Commission describes the changes to the appendices to Part 803, the Form and the Instructions. As discussed in section V.A., the Commission will continue to use the same electronic filing mechanism that has been in place since March 2020. Therefore, the Commission now provides a Form which will be available on the FTC's website in Microsoft Word format to collect the information required by the Instructions. Additionally, as discussed in section V.B., separate forms will be required for

[328] NPRM at 42182–83.

parties that are filing both as acquiring and acquired persons for related transactions. As a result, and to aid parties in understanding which provisions are applicable to acquiring persons and which are applicable to acquired persons, the Commission has now provided separate Instructions and Forms for acquiring and acquired persons. This change has also allowed the Commission to simplify the language of some of the instructions, such as by defining ''target'' to include all acquired entities or assets and eliminating use of phrases such as ''acquiring person or acquired entity as appropriate'' that were included in the draft instructions. Other ministerial changes to aid readability of the Instructions are also noted below.

For ease of reference, the Commission includes the following materials regarding the adopted Instructions and Form:

- An outline of the organization of the Form and Instructions,
- A chart that identifies proposed new locations of the current Items of the Form and Instructions, including whether substantive changes are adopted, and
- A chart of the new categories of required information.

These materials appear immediately below.

BILLING CODE 6750–01–C

A. General Instructions and Information

The Commission proposed creating a General Instructions and Information section within the proposed Instructions that largely parallels the General section of the current Instructions but is significantly reorganized and includes a ministerial change to clarify what information is found on the PNO website. Within the proposed General Instructions and Information section, the Commission proposed substantive changes to the following sections: Definitions, Identification of the Filing Person, Responses, and Translations. As discussed below, the Commission adopts some of the changes as proposed, adopts others with modification, and does not adopt others. In addition, in order to effectuate separate, tailored Forms and Instructions for the acquiring and acquired person, and to enhance clarity, the Commission adopts certain ministerial changes discussed below.

1. Definitions and Explanation of Terms

a. Economic Research Service's Commuting Zones

The Commission proposed adding a definition for Economic Research Service's Commuting Zones to facilitate responses to proposed requirements related to labor markets. The Commission received several comments on the Economic Research Service's Commuting Zones, and all cited the burden of this proposal. Many noted that the U.S. Department of Agriculture

has not updated these metrics since 2012, which makes them unreliable as a basis for determining the geographic scope of labor markets. As the Commission is not adopting the information requirements for employees in the final rule (see section VI.I.3.), the Commission does not adopt this definition.

b. Fee Information

The Commission adopts a ministerial change related to this item. As a result of the new fee structure mandated by Congress in the Merger Modernization Act, the fee information description now refers to the adjusted fees and fee tiers.

c. North American Product Classification System Data

The Commission proposed eliminating the reporting of 10-digit North American Product Classification System (''NAPCS'') based codes, and, as a result, proposed deleting the NAPCS definition from the proposed Instructions. The Commission received one comment on the elimination of the NAPCS definition; the comment supported the proposed streamlining of manufacturing revenue reporting. The Commission adopts this change as proposed. See section VI.J.1. for further discussion on the elimination of NAPCS-based codes.

d. Notification Thresholds

The Commission adopts a ministerial change related to this item. Currently, the section entitled ''Thresholds'' discusses filing fee and notification thresholds as a single item. With the fee changes that were enacted in the Merger Modernization Act, these are now separate thresholds. As discussed in section VI.A.1.b., ''Fee Information'' discusses the fee tiers. The definition of ''Notification Thresholds'' now discusses only the notification thresholds that are defined in § 801.1(h).

e. Standard Occupational Classification

The Commission proposed adding a definition for Standard Occupational Classification (''SOC'') codes to facilitate responses to proposed requirements related to labor markets. As the Commission is not adopting information requirements for employees in the final rule that would require reporting on this basis (see section VI.I.3.), the Instructions do not contain a definition for SOC codes.

f. Select 801.30 Transactions

As discussed in section III.C., the Commission received many comments that objected to the burden of the new requirements as proposed. Among the objections were claims that the proposed requirements reached transactions that typically were not investigated by the Agencies, that the burden of the new requirements could slow the pace of some transactions and deter others, and that the burden would fall not just on acquiring persons but on target companies that did not initiate or consent to the transaction. One commenter urged the Commission to exempt from HSR reporting requirements certain transactions that the Agencies rarely challenge, including acquisitions of voting securities that do not transfer control of the target company. The Commission acknowledges these comments, and while it disagrees that there is any category of transaction for which all of the adopted proposals should not apply, it does agree that exempting certain transactions from some of the new requirements will not inhibit the Agencies' ability to understand the transaction and determine that it warrants further investigation. To that end, the Commission limits the amount of information required for the notification of certain transactions subject to § 801.30 that also meet specific conditions.

Section 801.30(a), first promulgated by the Commission in the original rules, defines certain types of transactions in which the consent of the acquired person may not be required.[329] These transactions include acquisitions made on the open market, via tender offers, through the exercise of warrants or options, or through the conversion of non-voting securities. The involvement of the acquired person varies across these transactions. In some instances, such as an investor acquiring voting securities on the open market, the acquired person does not have to agree to the transaction and may not even have knowledge of it. In others, the acquiring and acquired person both assent to the deal. For example, some transactions are effectuated by a tender offer or the acquisition of purchases on the open market or from third parties—making § 801.30 applicable—but are also subject to an agreement between the acquiring and acquired person.

When the agreement of the acquired person is not required in a transaction, the Commission believes that certain requirements of the final rule are unlikely to provide information necessary to determine whether that transaction may violate the antitrust laws. Several commenters agreed that in such transactions the target in particular would not be able to provide the new information required in the final rule in the short time they have to make their filing. Further, in such transactions, the acquired person may not know that it has a filing obligation until the acquiring person has filed and will have limited time to prepare its filing. For this select set of transactions, the Commission has determined that it is not necessary to collect certain information, particularly in light of the costs that would be imposed on these types of filings which often carry low antitrust risk. Therefore, the Commission, adapting suggestions from the comments, introduces and defines the term ''select 801.30 transactions.'' Select 801.30 transactions are those transactions that do not result in the acquisition of control to which § 801.30 applies and where there is no agreement or contemplated agreement between any entity within the acquiring and acquired person. An example of a select 801.30 transaction includes an acquisition of voting securities on the open market via a national exchange by an investor that has no other ties to the issuer and which acquisition does not result in the acquisition of control. Additionally, select 801.30 transactions include acquisitions resulting from a traditional executive compensation arrangement where the executive exercises contractual benefits pursuant to a compensation package to acquire voting securities and nothing more.

In addition to excluding transactions in which there is an agreement between the acquiring and acquired person, the definition of ''select 801.30 transactions'' excludes transactions that would result in the acquiring person obtaining control, as defined by the Rules, of the acquired entity or where the acquiring person has obtained or will obtain certain rights related to the board of directors, general partner, or management company of an entity within the acquired person. These excluded transactions are likely to require a more thorough review for potential antitrust risk, and therefore it is necessary and appropriate for the Agencies to receive some additional information related to them as contemplated in this rulemaking. The Commission uses the term ''select 801.30 transaction'' throughout the discussion below, and transactions that meet the definition will not be required to respond to certain items as part of the Commission's efforts to limit costs to filing parties in response to the comments. See Figure 3.

[329] 16 CFR 801.30(a); *see also* 43 FR 33450, 33483 (July 31, 1978).

g. Supervisory Deal Team Lead

As discussed in section VI.G.1, the Commission proposed that, in addition to requiring documents prepared by or for officers and directors in response to current Item 4(c), filing persons must also submit transaction-related documents prepared by or for supervisory deal team lead(s). This proposal targeted documents authored by or for the person who functionally led the deal team even if not an officer or director. In the Agencies' experience with Second Request responses, these documents often include information that would have been highly relevant to the Agencies' analysis of the transaction during the initial waiting period to determine whether Second Requests should issue and what additional information they should seek. The Commission adopts this definition to limit the proposal to a single individual and provide clarity regarding identification of the appropriate individual.

The proposed rule noted that the identification of any supervisory deal team lead would not be based upon title alone and that this addition would require the filing person to determine the individual or individuals who functionally lead or coordinate the day-to-day process for the transaction at issue. A supervisory deal team lead need not have ultimate decision-making authority but would have responsibility for preparing or supervising the assessment of the transaction and be involved in communicating with the individuals, such as officers or directors, who have the authority to authorize the transaction. In the proposal, any such individual(s) might be the leader(s) of an investment committee, tasked with heading the analysis of mergers and acquisitions, or otherwise given supervisory capacity over the flow of information and documents related to transaction.

The Commission received many comments on its proposal to require current 4(c) documents from the supervisory deal team lead(s). Several comments noted that the proposed Instructions do not offer a definition of supervisory deal team lead(s) and that the proposed rule's description of the term was vague, ambiguous, and subjective, leaving filers uncertain which individuals must be searched in addition to officers and directors. One comment stated that the term was neither defined nor self-explanatory, and the proposal's descriptions of what constitutes a supervisory deal team lead(s) offers two separate standards. Yet another comment noted that the description could potentially describe a company's entire corporate development team.

Concerns about the meaning of the term ''supervisory deal team lead'' led a number of commenters to propose a definition. One commenter suggested limiting supervisory deal team lead to the senior most member of the corporate development deal team responsible for driving the strategic vision and assessment of the deal, who would not otherwise qualify as an officer or director. Another commenter suggested it should be the most senior member of a filing party's deal team responsible for the company's strategic vision and who otherwise would not qualify as a director or officer. Also, another commenter offered that supervisory deal team lead(s) should be expressly defined to mean the individual with primary responsibility for supervising the assessment of the transaction, and that it should only be one person.

The Commission acknowledges that a definition of supervisory deal team lead in the Instructions would help filers accurately identify the appropriate individual to be searched for responsive materials. The Commission notes that many of the comments' proposed definitions provided useful contours to help define the term. As discussed above, certain commenters suggested a definition that the relevant individual have responsibility for business strategy associated with the transaction under review. The Commission agrees that centering the definition on the ''primary responsibility'' for the strategic assessment of the deal will help identify the correct individual.

The Commission also agrees that the definition should focus on one supervisory deal team lead to mitigate any confusion or uncertainty raised in the comments about having two or three supervisory deal team leads. As discussed in section VI.G.1., several commenters also raised concerns with the burden associated with collecting documents from additional custodians, particularly if multiple individuals fulfilled that role.

The Commission therefore adopts a new definition for ''supervisory deal team lead'' as the individual who has primary responsibility for supervising the strategic assessment of the deal, and who would not otherwise qualify as a director or officer. This definition focuses on the one person who oversees the strategic assessment of the transaction and it should mitigate the concerns of some commenters that the term is so vague that it might introduce uncertainty as to when the initial HSR waiting period begins. These commenters explained their concern that Agency staff may become aware of another employee who would better constitute a supervisory deal team lead than the individual selected by the filer and reject the filing. In response to comments that requiring filers to select a supervisory deal team lead will allow the Commission to reject filings, the Agencies will continue to rely on filers to certify to their good faith belief in completing and certifying to the accuracy of the filing, and the Agencies will continue to rely on that good faith. In the situation where the only individuals supervising the strategic assessment of the deal are already either an officer or director, filers can state that this is the case and identify an officer or director as the supervisory deal team lead.

h. Target

For additional clarity in the instructions, the Commission introduces and defines the term ''Target'' as a ministerial change. The target includes all entities and assets to be acquired by the acquiring person from the acquired person and eliminates the need to use the inadvertently confusing phrase ''the acquired entity(s) or assets'' throughout the Instructions. The Commission notes, however, that the Instructions do continue to use ''acquired entity(s)'' in certain instances where a question may not be relevant to the acquisition of assets.

i. Year

As part of the Commission's effort to add more clarity to the Instructions, the Commission makes a ministerial change to the definition of ''most recent year'' found in the definition of ''year'' to make clear that the ''most recent year'' is the most recently completed calendar or fiscal year. This is the current intent of the definition and consistent with the guidance that has been given informally and with how filing persons complete the form and provide information.

2. Filing as an Acquiring and Acquired Person

As discussed in section V.C., the Commission adopts the proposed changes to § 803.2 such that filing persons will be required to submit separate forms when filing as an acquiring and acquired person. Additionally, the Commission has created separate, tailored Forms and Instructions for the Acquiring and Acquired Person. Since filers will choose the appropriate Form for the filing, the Commission adopts the ministerial change to eliminate the question, currently Item 1(c), asking the

filing person to identify whether the filing is being made as an acquiring or acquired person.

3. Responses

In the new Responses section, the Commission proposed setting out the specifics of how filers would provide the information responsive to the proposed new questions. The revisions included eliminating instructions regarding filings made on paper or DVD, see above at section IV.A; the Commission adopts these changes as proposed. The proposed responses section also described the information that filing persons would need to provide in a log of responsive documents and descriptive responses to be submitted with an HSR Filing. This information would have generally been the same as the information currently required for documents submitted in response to Items 4(c) and 4(d) of the current Form, with two proposed expansions. The first would have required the filing person to identify the request(s) to which the document would be responsive. The second would have required the identification of the individual within the acquiring or acquired person who supervised the preparation of documents prepared by third parties, or for whom the document was prepared. The Commission adopts the proposal with modifications to reflect the layout of the Form and to reduce the burden for transactions that do not have either a NAICS overlap, see section VI.J., or overlap or supply relationship identified in the Competition Descriptions, see section VI. I.

The Commission received two comments regarding the new Responses section, both of which focused on the proposed requirement for filing persons to provide the name, title, and company of the individuals within the filing person who supervised the preparation of third-party documents or for whom the documents were prepared. One commenter expressed concern that the proposal could put certain fund employees at risk of violating their nondisclosure agreements with target companies. Another commenter noted that there is minimal if any value to the Agencies having this information for every single reportable transaction, but collecting and filing a comprehensive list of all the people who may have supervised the creation of these documents will require many hours of work.

The Commission acknowledges the cost but disagrees that this information is not valuable or informative. In the Agencies' experience, knowing the authors of documents assists in the evaluation of the documents as well as any subsequent investigation by providing context regarding who was involved in the preparation of the document. Currently, the Agencies do not receive this context for documents prepared by third parties. Therefore, for documents prepared by third parties, such as consultants or bankers, the Commission adopts the proposal for the filing person to identify the individual or individuals who supervised the production of such documents, or for whom the document was prepared. This information will not be required for documents that were provided to the parties without solicitation, or for documents provided to the acquiring or acquired person by the other party.

As part of the Commission's overall effort to reduce the burden on filing parties, the Commission has revised the proposal to only require authors (or the individuals that supervise the creation of documents) for filings in which there are NAICS overlaps, or overlaps or supply relationships identified in the Competition Descriptions. For those transactions where such an overlap or supply relationship has been identified, filers will be required to provide the same author information as is currently required for documents responsive to Items 4(c) and 4(d), as well as the individuals within the filing person who supervised the preparation of third-party documents or for whom the documents were prepared. The Commission notes that these third-party documents are already required. The additional information is related to the identification of the individuals within the acquiring or acquired person, so no new non-disclosure risks should result from the requirement. Finally, because the Form requires identification of the file name for each document submitted, the ''Responses'' section does not require a document log. A privilege log will still be required.

4. Translations

As noted in section V.E., the Commission amends § 803.8 to require the filing person to submit English translations of all foreign-language documents. The Instructions also reflect this change.

5. Non-Compliance

While the Commission does not make any changes to the explanation of ''non-compliance,'' it does emphasize that if the filer is unable to answer any question fully, it is required to provide the information that is available and provide a statement of reasons for non-compliance consistent with § 803.3 and as permitted by the HSR Act.[330] Further, where exact answers cannot be given, filers are allowed to enter best estimates, while indicating the source or basis of the estimate and marking the information with the notation ''est'' for any item where data are estimated. The Commission routinely accepts filings and commences waiting periods for filings that avail themselves of this procedure. For example, publicly traded filers are often unable to identify with certainty their minority shareholders, and instead provide information that has been filed with the SEC. The Commission did not propose any changes to this Instruction and does not change it now.

B. Fee Information

Although the Commission proposed moving the filing fee information to the Transaction Information section of the proposed Instructions, in the final Form and Instructions, filing fee information will instead be collected in its own section. The Form also includes new areas for filing persons to indicate whether the fee is being paid by more than one entity, and if so, how much each entity will pay. Additionally, the Commission adopts a ministerial change to eliminate the need to provide Taxpayer Identification or Social Security Numbers and the name of the institution, such as the bank, from which the fee will be paid. The Commission has determined that it no longer needs this information to identify filing fees, and parties therefore no longer need to provide it.

C. General Information

The General Information section of the Form and Instructions requires filing persons to indicate whether the transaction is a post-consummation filing, cash tender offer, or bankruptcy, and whether early termination of the transaction is requested—information that is currently collected on the first page of the Form. The Commission did not propose and does not adopt any material changes to these items.

D. Ultimate Parent Entity Information

1. UPE Details

The UPE Details section of the Form and Instructions requires information about the UPE of the acquiring or acquired person, including contact information, financial documents, and information about certain minority shareholders or interest holders. Much of this information is currently required by Items 1, 4(a) and (b), and 6(b). The Commission proposed (1) requiring

[330] 15 U.S.C. 18a(b)(1)(A)(ii).

contact information for the individual to whom Second Requests should be sent; (2) clarifying the instructions related to the provision of financial documents for natural person UPEs; (3) requiring filers to stipulate that the appropriate size of person threshold is met, if applicable; (4) identifying additional minority holders of entities within the acquiring person; and (5) reducing the types of minority holders of the acquired entity that must be reported. As discussed below, the Commission adopts some of these proposals without change and some with modification.

a. Contact Information

The Commission proposed that all filers, not just foreign filers, must identify the individual to whom Second Requests should be addressed. The Commission received no comments on this change and adopts it as proposed.

b. Annual Report and Audit Reports of the UPEs

This section requires information currently required by Items 4(a) and 4(b) as it pertains to the UPE of the acquiring or acquired person. Annual and audit reports of other entities within the acquiring and acquired person are required by the Acquiring and Acquired Person Structure section, as discussed in section VI.D.2.b. The Commission proposed clarifying the current instructions regarding which annual reports and audit reports are required from natural person UPEs. The Commission makes no change to the instruction that natural person UPEs should not produce any personal balance sheets or tax returns. Since natural persons should not provide personal financial information, no information should be provided in the UPE section. The Commission did not propose and does not make any change to the annual or audit reports required of the UPE of the acquiring or acquired person.

The Commission did propose clarifications regarding what other annual and audit reports entities within the same person as natural person UPEs must provide. This proposed clarification is discussed in section VI.D.2.b.

c. Size of Person Stipulation

The Commission proposed adding an item on the Form that would allow filers to stipulate that the size of person test is met (at the appropriate dollar amount) or indicate that the size of person test is not applicable. The Commission received no comments on this change and adopts it as proposed.

d. Minority Shareholders or Interest Holders

The Commission proposed a Minority Shareholders or Interest Holders section to require identification of minority interest holders of certain entities within the acquiring person and the acquired entities. Currently, Item 6(b) requires acquiring persons to identify minority holders of 5% or more but less than 50% of the acquiring entity and the UPE of the acquiring person (or, for natural person UPEs, the highest-level entities they control). Acquired persons are required to report such minority holders of the acquired entity. For UPEs of the acquiring person, acquiring entities, and acquired entities that are limited partnerships, only disclosure of the general partner is currently required.

The Commission proposed several changes to require additional information about the identity of minority holders, as well as identification of additional minority interest holders by the acquiring person, but potentially fewer by the acquired person. First, the Commission proposed requiring disclosure of the ''doing business as'' or ''street name'' of minority investors that are related to a master limited partnership, fund, investment group, or similar entity. Second, the Commission proposed to expand the entities for which the acquiring person must identify certain minority interest holders to include entities related to the acquiring entity. Third, the Commission proposed requiring the identification of certain minority holders of limited partnerships, rather than just the general partner. Finally, the Commission proposed limiting the minority interest holders that acquired persons would need to identify. The Commission adopts the first two proposals without change but modifies the limited partners that need to be identified, as discussed below.

(i) Provision of ''Doing Business As'' or ''Street Names''

First, the Commission proposed that the acquiring person provide the doing business as or ''street name'' of minority investors that are related to master limited partnerships, funds, or investment groups. The Commission did not receive comments on this specific proposal but did receive comments to similar proposed requirements in other areas of the Instructions. Objections in these other sections generally focused on the lookback period and the burden of searching for all names that were potentially used by a business. In this section, the Commission did not propose a lookback period, but instead proposed requiring only the current name of the related master limited partnership, fund, investment group, or similar entity.

The Commission continues to believe that this information should not be costly for filers. In many cases, communication between the acquiring person and the investor will include this information. For example, though the minority investor may be RANDOMNAME, LLC, the acquiring person regularly communicates with INVESTMENT GROUP and sends information related to the investment in care of that business. However, if this information is not known to the acquiring person, it can so note in a statement of non-compliance.

The task of screening transactions for potential competitive effects is stymied when filers provide only legal names, which are often unrelated to the name by which the public knows the business. Knowing the d/b/a or street name of the entities involved in the transaction allows staff to use public resources to gather additional information, for example through internet searches or look-ups using commercial services relied on by the Agencies to provide industry data. Because of the value to the screening process, the Commission adopts this requirement as proposed.

(ii) Identification of Additional Minority Investors in the Acquiring Person

The Commission next proposed two changes that could increase the number of minority investors the acquiring person would need to identify: First, it proposed that the acquiring person be required to report holders of 5% or more but less than 50% of (1) the acquiring entity, (2) any entity directly or indirectly controlled by the acquiring entity, (3) any entity that directly or indirectly controls the acquiring entity, and (4) any entity within the acquiring person that has been or will be created in contemplation of, or for the purposes of, effectuating the transaction. Second, it proposed that filing persons report holders of 5% or more but less than 50% of limited partnerships, in addition to the general partner.[331]

Comments on these two proposed changes were similar and often intertwined. One commenter urged the Agencies to collect the proposed new information and stated that the ownership structure resulting from the

[331] This change also relieved natural person UPEs from the obligation to identify minority shareholders of all top-level entities, instead only requiring identification for entities related to the transaction.

transaction may change the parties' incentives to compete, enhance the acquirer's ability to influence decision making through changes in voting interests or governance rights, or facilitate the sharing of competitively sensitive information between rivals. Two others also supported the proposal, with each noting the various potential anticompetitive impacts of minority interests. Specifically, one commenter stated that these new requirements would address complex corporate structures, which may obscure potentially significant relationships. The other commenter also supported providing more information about shareholders, particularly since the current Form and Instructions can treat portfolio companies of private equity funds as independent from each other and their management companies.

Broadly, critics of these proposed changes expressed concerns about the burden of collecting the requested information. Additional criticisms included objections to the five percent threshold for identification, with commenters stating that the interests of such minority investors may be wholly unrelated to the notified transaction, or less likely to result in a substantial lessening of competition. Concerns were also raised about confidentiality and disclosure, noting the Commission's prior consideration of the fact that the identity and investment level of limited partners is often highly confidential when it decided in 2011 not to require disclosure of limited partners. Commenters further speculated that requirements to disclose the identity of additional minority investors could create a chilling effect on fundraising and deals. Finally, commenters stated that such a decrease in fundraising and deal volume could affect smaller businesses, pension plans, endowments, charitable foundations, and activist investors, among others. Each of these objections is discussed below.

(a) Identification of Minority Holders of Additional Entities

Regarding the first proposal to expand the entities for which minority holders must be identified, the Commission notes that until 2011 acquiring persons were required to report minority holders of 5% or more for all corporate entities within the acquiring person that had assets of $10 million or greater. As part of the 2011 rulemaking, the Commission determined that this broad requirement, which could reach entities within the acquiring person that had no nexus to the reported transaction, was not essential to an initial review of the transaction.[332] Through this change, the Commission expanded the requirement to include identification of minority holders of non-corporate entities, but it limited the obligation for the acquiring person to the identification of minority holders of only the acquiring UPE and the acquiring entity. As a result, the Agencies receive information about what entities have a ''seat at the table'' in the case of very simple corporate structures where the acquiring person UPE directly controls the acquiring entity without any intermediary entities, or where intermediary entities are wholly owned by the acquiring person, without the acquiring person providing information about entities unrelated to the transaction.

Since 2011, however, the Commission has learned through experience that many acquiring persons have more complex structures that include many entities between the UPE and acquiring entity that are not wholly owned but that are related to the acquiring entity. For example, ''A'' plans to acquire a target and will bring in ''B'' as a co-investor. The UPE of ''A'' creates (or already has) a number of intermediary entities within its person to effectuate the transaction. ''B'' does not invest in either the UPE of ''A'' or the entity that will make the acquisition, but rather in one of these intermediary entities. Currently, as illustrated in Figures 4 and 5a, when ''A'' makes its filing, it is not required to disclose the co-investment of ''B'' so long as the investment is below 50%. The current focus on just the UPE and the acquiring entity deprives the Agencies of key information about individuals and entities that may have influence, or even management or operational oversight, over entities related to the transaction and could make or influence competitively important decisions post-acquisition.

[332] 75 FR 57110, 57118 (Sept. 17, 2010); 76 FR 42471, 42472 (July 19, 2011).

Figure 4: Current Rules Only Requires Disclosure of Minority Holders (or General Partner) of A

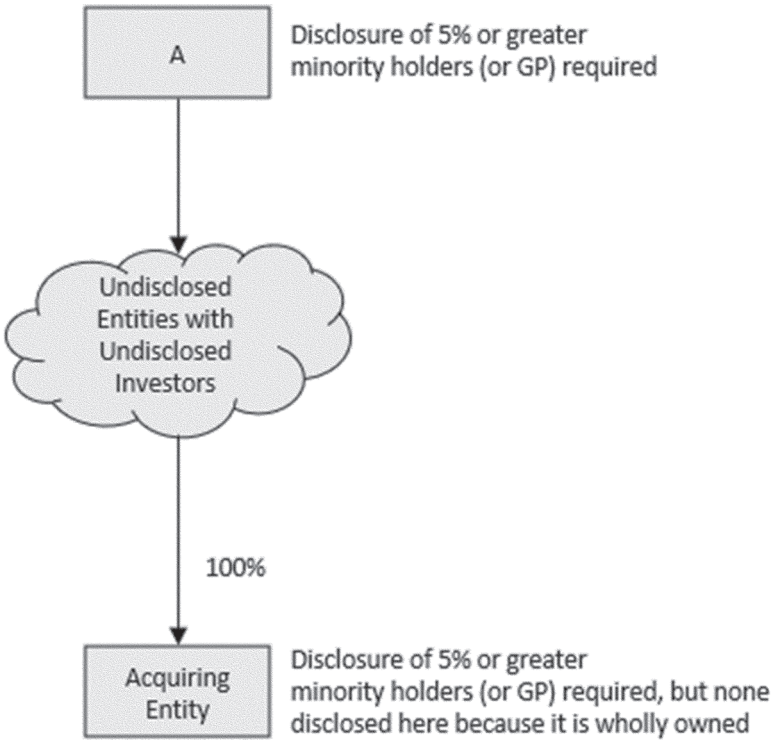

Figure 5a: Current Rules Do Not Require Disclosure of B Fund as a Co-Investor in the Acquisition; No Ability for Agencies to Know to Research B Fund's Other Holdings

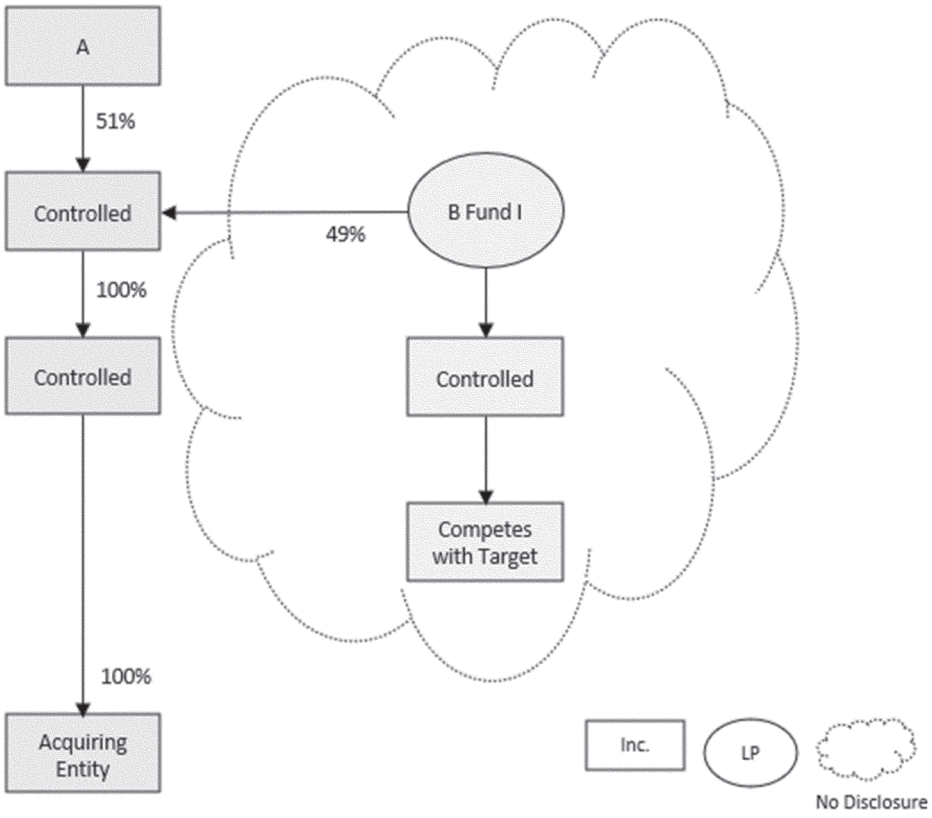
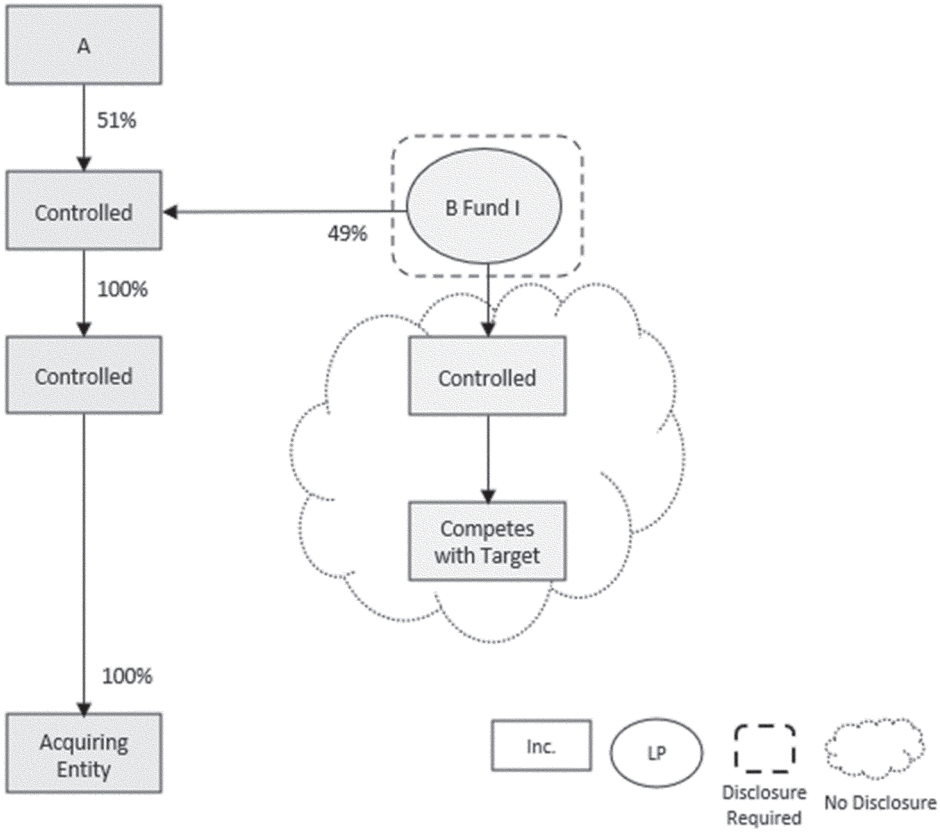


As discussed in section II.B.1., and illustrated in Figure 5a, individuals or entities that have significant rights or holdings in entities related to the acquiring entity may also take active positions in or exert control over competitively significant businesses, including competitors, and the disclosure of these relationships could surface antitrust risks that require the Agencies' attention during the initial antitrust review. Because information that reveals whether there are existing investment relationships between the acquiring person and the target is necessary and appropriate for the Agencies' initial antitrust review, the Commission adopts this change as proposed. As a result, as shown in Figure 5b, the Agencies will receive the information necessary to determine whether the acquisition of the target by the acquiring entity may violate the antitrust laws.

Figure 5b: Final Rules Require Disclosure of B Fund; Agencies Know to Research B Fund's Other Holdings



In objecting to these proposals, commenters stated that identification of these additional minority holders would be burdensome. The Commission notes that, rather than merely reviving an expansive requirement to disclose all the minority investors of entities within the acquiring person, it proposed a more tailored instruction to require disclosure only of the entities related to the transaction. Given this limitation and the information gaps caused by vast changes to the M&A landscape discussed in section II.B.1., the Commission believes that the identification of the minority holders of the entities that are related to the transaction is necessary and appropriate and should be contained in an HSR Filing. Further, if the acquiring person does not have knowledge of the identity of the minority investors, it can so indicate and explain, just as acquiring persons currently do when the minority investors of the UPE or acquiring entity are unknown.[333] For example, acquiring persons that have publicly traded UPEs routinely note that they do not have information about minority holders beyond what is reported to the SEC.

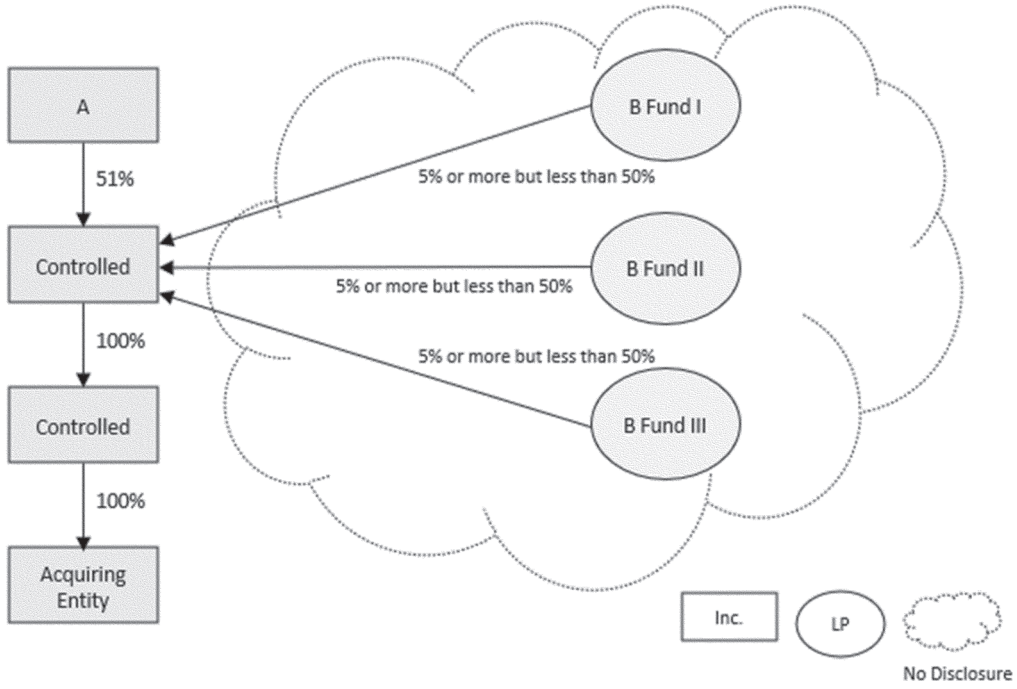
One commentor stated that the ''direct or indirect'' and ''control or controlled by'' language was broad and would require substantial time and resources to navigate. The Commission disagrees and notes that this requirement does not require a broad analysis of various theories of control but rather requires a determination of ''control'' as defined by § 801.1(b). The proposed instruction stated that the controlling relationship can be either direct or indirect to make clear that the requirement was not limited to entities just one level above or below the acquiring entity. For example, in a common scenario involving multiple shell entities, the acquiring UPE controls an intermediary entity that controls an intermediary entity that controls the acquiring entity, as shown in Figure 6a below. The Instructions contained in the final rule require disclosure of minority holders of five percent or more of each of those intermediary entities, subject to the limitations on disclosure of limited partners discussed below in section VI.D.1d.ii., as shown in Figure 6b. Control is a long-standing concept in the Rules, and the determination of control in this context is consistent with control determinations that filers need to make for a variety of items currently included in the Form and Instructions.

The Commission received suggestions to change the existing five percent threshold but declines to adopt this change. Because of the complexity of investment structures, minority investors with even low equity stakes can have formal rights to direct or influence the strategic decisions of the company, informal channels to exert influence, or the right to obtain sensitive business information about the entity in which they are invested. Further, as illustrated in Figures 6a and 6b, investment groups may be broken up

[333] See also the discussion of non-compliance in section VI.A.5.

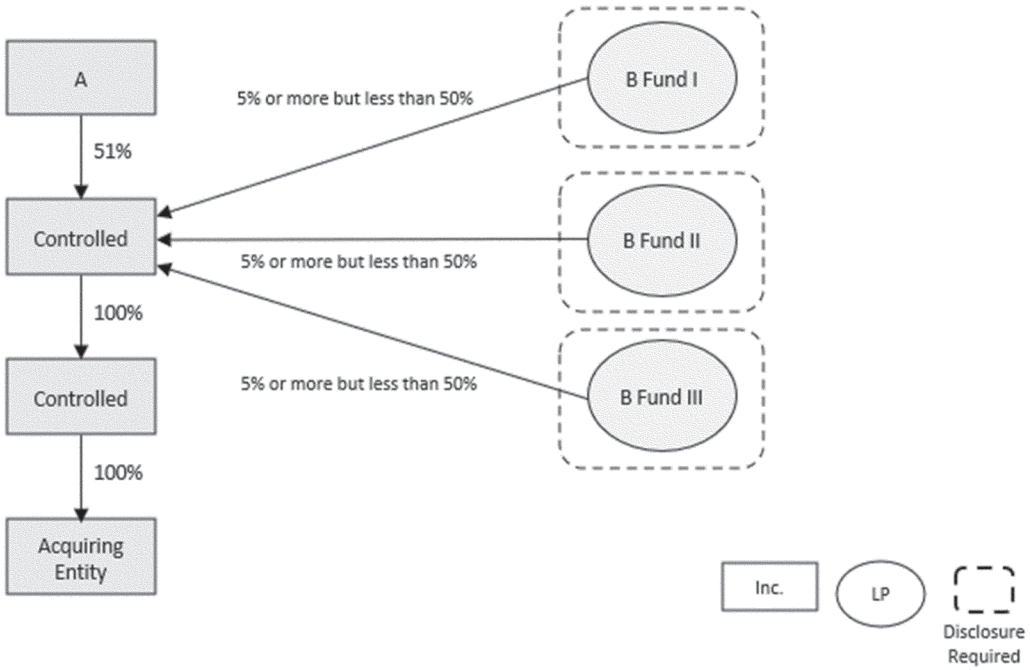
across multiple entities that are, for HSR purposes, separate persons.[334] These types of organizations can take active positions in multiple companies in the same or related industry, a trend that the Commission and commenters have observed. As a result, the Agencies need to know who these investors are in order to determine whether the acquiring person has connections to the target's business that could have competitive effects.

Figure 6a: A Single Investment Group May Divide Its Investment; Current Rules Do Not Require Disclosure if Investments Are Not Made in A or Acquiring Entity



[334] In 2020, the Commission proposed changing the HSR Rules to require aggregation of such interests when determining whether a filing must be made. 85 FR 77053 (Dec. 1, 2020). The Commission has not adopted any of those proposals. This more modest proposal to identify minority shareholders does not create any new obligations to file but does provide the Agencies with the identity of funds and other investors that hold, or will hold, interests in entities related to the acquiring entity through multiple HSR persons, allowing for further investigation as warranted.

Figure 6b: Final Rules Require Disclosure Regardless of the Entity In Which B Fund Invests



The Commission disagrees with the commenters' assertions that this information is not necessary to assess the competitive effects of the filed for transaction and is beyond the authority of the Commission. As discussed in section II.B.1., that analysis requires the Agencies to understand the scope of the acquiring person's involvement in the business of the target. Minority holders of entities within the acquiring person that are related to the acquiring entity may have the ability to influence decision-making of the acquiring entity and target post-acquisition. Therefore, they are functionally ''in the deal'' and their existing business relationships are relevant to a thorough antitrust analysis of the transaction. The increasing complexity of corporate structures and investment vehicles has increased the number of transactions with these types of minority interest holders, and the Commission has determined that the Agencies need to update the information requirements to keep pace with these changes.

The Commission finds the additional critiques of the proposal unpersuasive as well. The Commission addresses arguments about chilling deal volume and investment levels in section III.C.2. above. As to commenters opposing this particular change to the Instructions, the Commission is unaware of any evidence that fundraising or deal volume was negatively affected during the period prior to 2011 when HSR rules required broader disclosure of minority investors, nor that such activity increased when the requirement was dropped. Given the many other factors that influence the level of investment and M&A activity generally, the Commission believes it is unlikely that the disclosure of minority holdings in parties involved in reportable transactions has any measurable effect on dealmaking or investment levels.

Further, commenters objecting to the Agencies' need for identification of additional minority interest holders also offered contradictory critiques, with some stating that the Commission did not identify transactions where the minority interest holders were relevant to the competition analysis, and others stating the fact that the Commission offered two examples demonstrated that the current Form and Instructions provided the Agencies with sufficient information. First, cases cited in the NPRM provide examples of enforcement actions brought by the Agencies on various legal theories and fact patterns and do not necessarily reflect cases that were discovered through the HSR process. Second, the need for this information is obvious and its relevance plain: the Agencies need to know who will be making decisions for the combined entity post-acquisition. For example, the hypotheticals discussed above demonstrate that existing information gaps in the current Form leave the Agencies without enough information to even know to ask additional questions about additional individuals and entities within ''A.'' In the hypotheticals above, ''B'' could hold up to a 49.9% stake in an entity related to the transaction and functionally jointly control the acquiring entity along with ''A.'' Or ''B'' could hold only 5% but have ancillary rights or outsized influence over the operations of the acquiring entity (and thus the target after consummation). Or ''B'' could be its own person for HSR purposes, but one of several related entities that each has a minority interest that, when aggregated, account for a significant, or even majority, stake in the acquiring entity. In any of these scenarios, as well as many others, the identity of the minority interest holder would be critical to understanding the competitive implications of the transaction. Though the filing requirement falls on ''A,'' ''B'' has a seat at the table, and the Agencies must be able to investigate whether ''B'' has ties

to the business of the target. If the Agencies are not alerted to the existence of ''B'' on the Form, there is no ability to screen for potential issues that arise from ''B's'' involvement in both the acquiring entity and, upon consummation, the target.

Regarding concerns about privacy, the Commission notes that the contents of HSR filings are confidential.[335] Unlike requirements for disclosure made by private parties or government rules promulgated to require public disclosure, information included in HSR filings is protected by statute. Additionally, disclosure of minority investors, other than limited partners, which are discussed below, is already required by the current Form. The proposal to require identification of additional minority investors, including some limited partners, is an incremental expansion of what is currently required (and for corporate entities, less than what was required under the HSR Rules from 1978 to 2011). Additionally, the Agencies often require disclosure of an even broader group of minority investors, including limited partners, in response to a Second Request, as discussed in more detail below. The proposed requirements, therefore, did not introduce any new privacy concerns, and commenters did not offer any evidence that the current disclosure rules have created any substantive issues related to privacy.

The Commission further notes that the proposed requirements do not require the acquiring person to ask the minority investors for any information. Therefore, completion of the Form itself should impose no burden on the minority investors themselves. Only if the identity of the minority investor reveals a competitively relevant connection and an investigation is opened would the investor potentially have any cost. These costs are not imposed by the information requirements of Form and Instructions but rather by a potential investigation or enforcement action for a violation of the antitrust laws. Disclosure of an existing business or financial relationship in an entity that is engaging in an HSR-reportable transaction is not an improper burden and allows the Agencies to fulfill their statutory mandate to scrutinize every filing to determine whether it may violate the antitrust laws.

(b) Identification of Limited Partners

In addition to increasing the number of entities for which minority shareholders would need to be identified, the Commission also proposed requiring the identification of minority investors of limited partnerships that held 5% or more, in addition to the general partner. Filing persons are currently only required to identify the general partners of limited partnerships, but not limited partners, regardless of the percentage held. After considering the comments received regarding this proposal, the Commission adopts a modified requirement to identify only the general partner and limited partners that have certain rights related to the board of directors (or similar bodies) of entities related to the acquiring entity.

The current requirement to identify only the general partner of limited partnerships, and not its minority investors, was based on the understanding that limited partners had no control over the operations of the fund or portfolio companies.[336] As discussed above and in section II.B.1., the operations and investments of limited partnerships and limited partners cannot be easily generalized. Though some argue that limited partners may have limited influence over investment or operational decisions, this is not universally true. Limited partnerships often file for acquisition of control of entities. Investment groups, which utilize limited partnerships, often make investments in specific industries, leaving open the possibility that there is a competitive relationship between these investments and the target of the filed-for transaction.

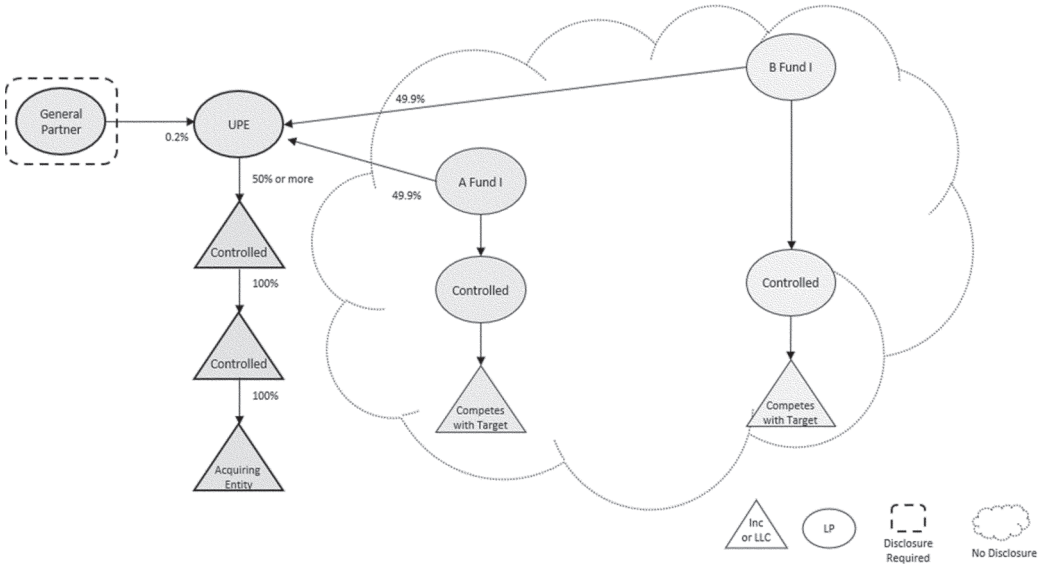
Further, the Commission has learned through its work that limited partnerships are not exclusively used as vehicles for diffuse groups of passive investors to invest their capital. Instead, some limited partnerships function as aggregation vehicles that allow private equity or other investor groups to direct the strategic business decisions of the portfolio companies in which they invest. The decision to organize as a limited partnership rather than an LLC or incorporated entity may be driven not by how the entity will function in the marketplace but by other factors, such as tax and liability.

The scenario in Figure 7a illustrates how the current Form and Instructions' lack of information about limited partnerships can affect a preliminary antitrust assessment. ''A'' and ''B'' form a new limited partnership that will be an acquiring person. ''A'' and ''B'' will each hold 49.9% of this entity and will have rights related to the board (or similar bodies) of entities related to the transaction. The remaining 0.2% will be held by the general partner. Pursuant to the current Instructions, this newly formed acquiring person would not be required to provide any information other than the name and address of its general partner when making a filing for a reportable transaction.

[335] 15 U.S.C. 18a(h).

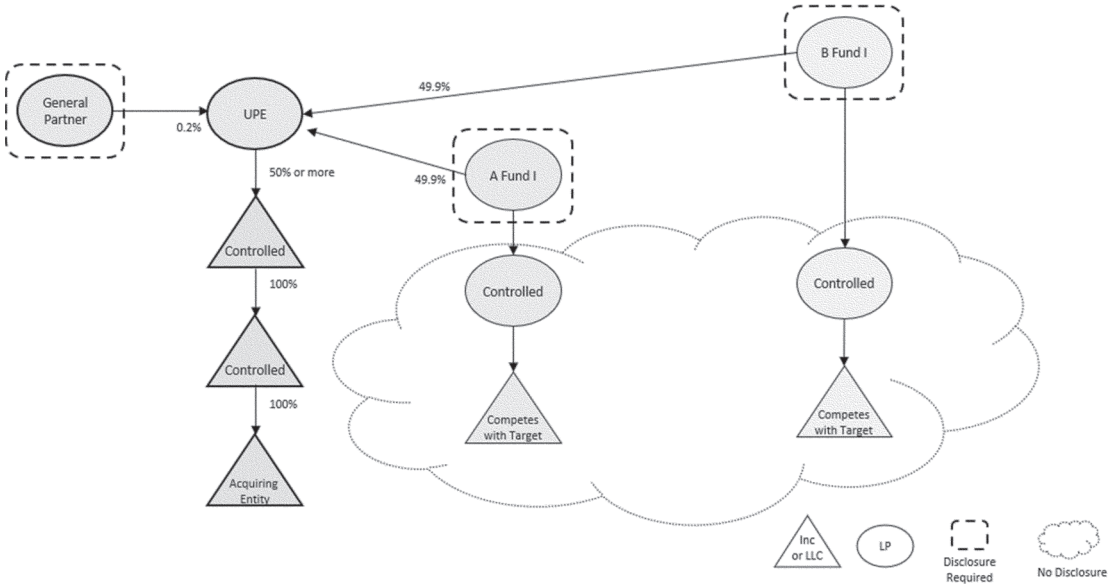
[336] 75 FR 57110, 57118 (Sept. 17, 2010) (proposed rule), *adopted* 76 FR 42471 (July 19, 2011).

Figure 7a: Current Rules Only Require UPE to Disclose Name and Address of Its General Partner; No Disclosure that A and B are Functional Buyers of Target



Compounding the difficulty in understanding the scope of the acquiring person's relationships, A Investment Group and B Investment Group may have used a code name for the transaction, such as ''Project Alpha,'' and also used that code name to name the newly created entity. In this scenario, the Agencies could receive a filing from Alpha Fund, L.P., that only discloses that it has a general partner, Alpha GP, L.P. There is no requirement that Alpha Fund, L.P. disclose that A Investment Group and B Investment Group each hold nearly 50% and will effectively co-own and manage the target after consummation. A Fund I or B Fund I could be head-to-head competitors of the target (or control competitors of the target) or have some other competitively significant relationship with the target. But the current Form would not make the Agencies aware of their significant stake in Alpha Fund, L.P. As shown in Figure 7b, the final rules address this by requiring the identification of A Fund I and B Fund I (and their affiliations with A Investment Group and B Investment Group, if known to UPE), allowing the Agencies to research whether the transaction may violate the antitrust laws.

Figure 7b: Final Rules Require UPE to Disclose Name and Address of Its General Partner and the Investment of A Fund I and B Fund I; Agencies Know to Research Holdings of A and B

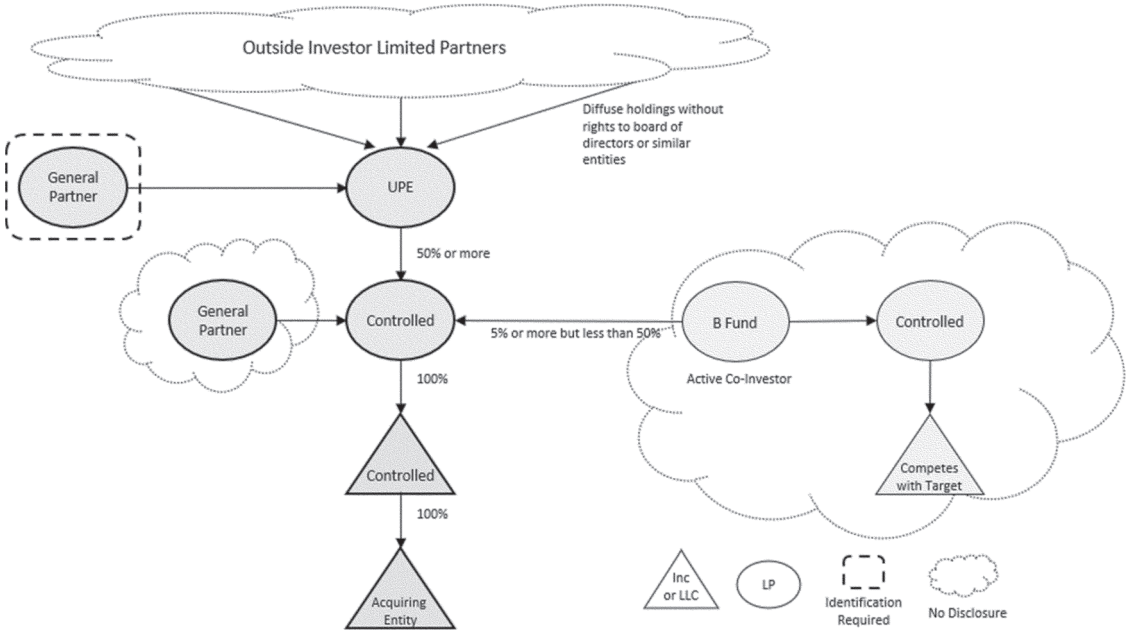


The Commission notes, as did one commenter, that in some instances the Agencies may receive some disclosure through the reporting of associate overlaps in current Items 6(c)(ii) or 7(b)(ii) and 7(d). However, many

investment groups are set up such that the associate definition, which focuses on entities, does not apply, even though the same individuals may be managing multiple funds. The Commission considered changing the definition of associates but determined that, at this time, it would be less complex and less burdensome on filers to merely require the identification of certain limited partners, which the Commission believes will allow the Agencies to use other sources to conduct a preliminary assessment of the competitive implication of these minority holders. If this proves to be insufficient, the Commission may revisit the requirements in future rulemakings.

Despite the need for identification of some limited partners, the Commission understands that there are still many limited partners who are essentially ''silent'' investors that do not participate in management decisions. They hold only financial interests for the purpose of earning a return on their investment and do not hold additional rights or participate in the governance or business operations of the limited partnership or the investments of the limited partnership. Therefore, the Commission adopts an incremental change for the identification of limited partners, implementing in part the suggestion of one commenter to require only limited partners that have certain rights related to the board of directors or similar bodies of entities related to the acquiring entity.[337] The hypothetical in Figure 8a shows a structure where the UPE of the acquiring person is a limited partnership in which its limited partners do not have any rights related to the board of directors or similar bodies of any of the UPE, Acquiring Entity, or either of the two Controlled entities between them. Additionally, UPE controls a limited partnership in which B Fund, an active co-investor for the transaction, has made its investment. Currently, UPE is only required to disclose its general partner.

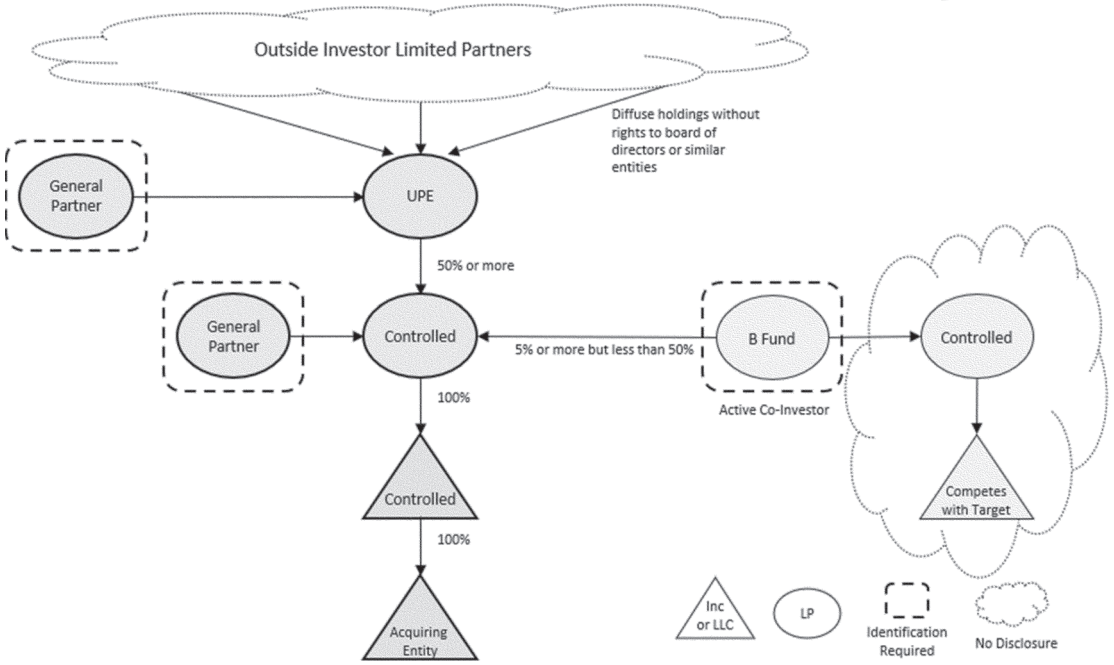
Figure 8a: Current Rules Only Require UPE to Disclose the Name and Address of Its General Partner



As shown in Figure 8b, the final rules would not require the disclosure of the ''Outside Investor Limited Partners'' because none has any rights to the board or similar body of an entity related to the acquiring entity. In contrast, UPE would need to disclose that B Fund is a limited partner of the Controlled entity as well as the general partners of UPE and Controlled LP.

[337] Comment of Dechert, Doc. No. FTC–2023–0040–0659 at 11 (commenting that it is not clear why a broad requirement to disclose all limited partners who hold interests of five percent or more is necessary to identify a potential competitive concern irrespective of such limited partners' ability or inability to participate in the management or control of the applicable fund, general partner, or acquired business).

Figure 8b: Final Rules Require UPE to Disclose General Partners and its Active Co-Investor (B Fund) But Not Passive Limited Partners or the Holdings of B Fund



In the Commission's experience, competitive concerns that arise from limited partners holding interests in the acquiring person most frequently stem from those limited partnerships that act as vehicles for investor groups to manage, direct, or influence the portfolio companies in which they invest. The Commission has determined that it is not necessary to know the names of limited partners that do not also have certain management rights and the final rule does not require disclosure of their minority interests.

The Commission expects that this modification will address concerns of commenters that disclosing limited partners would require investment firms to renegotiate agreements with limited partners. As discussed above, there is no restriction on the Agencies' ability to require disclosure of the identity of limited partners today during an in-depth investigation of the transaction. As a result, limited partners should be aware that their holdings may be relevant to an antitrust review of any transaction involving one of their investments. Indeed, the Commission has brought enforcement actions against acquisitions involving minority holdings of limited partners in competing businesses.[338] As the agencies charged with enforcing the antitrust laws, the Agencies have the authority to investigate the commercial dealings of limited partners for potential law violations regardless of any private agreements that promise non-disclosure. Therefore, any deficiency in agreements to permit disclosure to government agencies already exists. Further, if disclosure is the source of the Agencies' being made aware of a potential competitive concern with the transaction, any cost to the limited partner related to the completion and submission of the HSR Filing is justified because the information is necessary to determine whether the transaction may violate the antitrust laws. Nonetheless, the Commission has modified the requirement to reduce the type of limited partners that must be disclosed, focusing only on those with the ability to participate in management or control. On this basis, filers can exclude limited partners who serve as passive investors, who are essentially the customers of private investment firms, according to one commenter. To the extent that these limited partners do not participate in the management of the filing person, they need not be disclosed as a minority holder.

(iii) Limiting Requirements for Acquired Persons

Finally, the Commission proposed limiting the reporting requirements for the acquired person. Currently, the acquired person must identify the name and headquarters address of all holders of 5% or more but less than 50% of the acquired entity, along with the percentage held. If the acquired entity is a limited partnership, only identification of the general partner and its headquarters address is required. The Commission proposed limiting this requirement to minority holders of the acquired entity that would hold an interest after that consummation or would receive an interest in another entity within the acquiring person as a result of the transaction. However, the proposed requirements to identify certain limited partners also applied to the acquired person, if the minority investors will stay with the target post-acquisition. The Commission adopts this proposal with modification.

The proposed limitation to identify only minority interest holders of the target that will remain invested after consummation is intended to reduce the cost of complying with the final rule for the acquired person. The Commission has determined that the identity of any minority interest holder of the target that will cease to be involved with the target or acquiring person post consummation has limited relevance to understanding who could influence decision-making of the business post-

[338] *See, e.g., In re Red Ventures Holdco, LP,* No. C–4627 (F.T.C. Nov. 3, 2017) (overlapping limited partnership holdings violated section 7); *In re TC Group, L.L.C.,* No. C–4183 (F.T.C. Mar. 16, 2006) (acquisition involving minority stake giving two private equity investors seats on the boards of competitors).

acquisition. The Commission adopts this portion of the proposed rule. It modifies the proposed instruction to reflect the modification it adopts for the identification of limited partners, as described above. Thus, the final rule will require the acquired person to only identify minority holders of 5% or more if such holder will continue to be invested in the target or will acquire an interest in an entity within the acquiring person. If the target is a limited partnership, only limited partners (1) that hold 5% or more in the acquiring entity, (2) will continue to hold an interest in the acquired entity, or acquire an interest in the acquiring person, after the transaction is consummated, and (3) will have that have certain rights related to the board of directors or similar bodies of entities related to the acquiring entity will need to be identified. If the acquired person does not have this information, it can so note in an endnote.

The Commission also notes that one commenter focused on the requirement to identify roll-over investors, stating it would be a new burden that would discourage continued post-transaction investment. The Commission disagrees with this assessment. Currently, the acquired person already must identify all 5%–49.9% holders of the acquired entity, including roll-over investors. Further, the Commission once again notes that the amount of information required is limited; only the name of the minority interest holder (and the name of the master limited partnership, fund, or investment group, if applicable), its headquarters address, the name of the acquired entity it holds an interest in, and the percentage held must be disclosed.

2. Acquiring Person and Acquired Entity Structure

The Acquiring and Acquired Person Structure sections of the Form and Instructions require the reporting of information currently required by Items 1(f), 4(a) and (b), and Item 6(a). The Commission proposed that filing parties provide more information about the structure of the acquiring person and acquired entity, as well as the names under which they do business. The Commission also proposed a clarification regarding annual reports and audit reports of natural person UPEs. As discussed below, the Commission adopts some of these proposals without change and some with modification.

a. Entities Within the Acquiring Person and Acquired Entity

This section contains information currently required by Items 1(f) and 6(a) of the current Form. The Commission proposed requiring filing persons to organize the list of controlled entities by operating company or business, and, for each such operating company or business, the Commission proposed that filers identify the name(s) by which the company or business does business, as well as any name(s) by which it formerly did business within the three years prior to filing. The Commission adopts the proposal with modification.

The Commission received several comments opposed to this proposal. One commenter stated that the Agencies do not need to know the relationships between and among all related entities for its initial review of the HSR filing. The commenter asserted that the majority of covered entities will likely have no overlapping activities with the acquired company, and thus learning about them adds no value to the Agencies' initial screen. The Commission disagrees that the Agencies do not need this information and that it adds no value to the initial screen. This is the very information that allows the Agencies to understand what businesses are involved in the reported transaction.

The Commission does, however, make several modifications to these proposals that should reduce the cost of providing this information. The Commission adopts the proposal to require DBA names but does not adopt the proposal to adopt ''formerly known as'' (FKA) names. One commenter noted the difficulty of providing ''doing business as'' names for filing parties that do not maintain such records, but the Commission believes these DBA names will be of great value to the Agencies in the initial waiting period. Businesses create (or change) DBA names for a variety of reasons and may be required to register these names with State or local authorities. One commenter objected to the three-year period, and, as part of its overall efforts to reduce costs associated with an HSR Filing, the Commission eliminates this lookback so that filing parties must only provide this information as it stands at the time of filing.

Another commenter recommended that for executive compensation transactions the filing persons be permitted to dispense with the requirement to report ''doing business as'' names, assuming certain conditions are met. They stated that these transactions are unlikely to generate meaningful antitrust issues but that requiring prior business names will add materially to the burden on the acquired side without a corresponding benefit. The Commission agrees and as part of its overall effort to reduce cost, adopts the modification to allow both filing parties in select 801.30 transactions (which include those related to executive compensation) to provide this information as kept in the ordinary course without DBA names.

Finally, one commenter noted that the proposed rule appears to use the terms ''operating business,'' ''operating entity,'' and ''operating company'' interchangeably. The commenter requested clarification of the definitions or adoption of one term for consistency. The Commission agrees that using these three terms interchangeably is confusing and thus adopts ''operating business'' to capture entities that comprise distinct operations. Under this modification, filing parties need to organize their response by operating business(es) whether they are corporations, non-corporate entities, or assets that function as an operating business.

In sum, the Commission adopts modifications that require filing persons, except for those in select 801.30 transactions, to organize controlled entities at the time of filing by operating business and, for each such operating business, identify the name(s) by which the operating business does business. For example, a fund must organize its response by portfolio company(s), and a conglomerate must organize its response by business(es).

b. Annual Report and Audit Reports

Information for this section is currently required by Items 4(a) and (b). The Commission proposed clarifying the current instructions regarding which annual reports and audit reports are required from natural person UPEs. Currently, natural person UPEs, in lieu of personal financial documents, must produce financial documents for the highest-level entity(s) within their person. In addition, natural person UPEs must produce the same additional reports that non-natural person UPEs must produce: for acquiring persons, the reports of the acquiring entity(s) and any entity controlled by the acquiring person whose dollar revenues contribute to an NAICS overlap; and for acquired persons, the reports of the acquired entity(s). The Commission proposed new language to make this requirement clearer and the Commission adopts this change with modification.

The Commission received one comment that supported the proposal. Another commenter suggested two

revisions to the proposed Instructions. This commenter first suggested that for natural person UPEs who filed as acquired persons, the instructions should only require the most recent annual reports for the highest-level entity the Natural Person controls that includes the assets or entities being sold. Second, as a general matter, the commenter stated that persons filing notification should not be required to provide annual reports for entities that have less than $10 million in total assets, unless that entity's revenues contribute to a competitive overlap between the parties.

In considering the two suggested revisions in this comment, the Commission agrees that it is sufficient for the UPE of the acquired person to provide financial reports for only the highest-level entities that control the acquired entity, as appropriate, in lieu of providing personal financial documents. The Commission also has determined that this limitation is appropriate for acquiring persons with natural person UPEs as well. Therefore, the Commission adopts this suggestion, and natural persons, in lieu of providing personal financial statements, will need only provide financial reports for the highest-level entities that control the acquiring entity or acquired entity, as appropriate. The financial information for these highest-level entities should be provided in this section and not the UPE Details section, as discussed in section VI.D.1.

The Commission declines to adopt the suggestion that persons filing notification should not be required to provide annual reports for entities that have less than $10 million in total assets, unless that entity's revenues contribute to a NAICS overlap or any overlap identified in the Overlap Description. ''The person filing notification'' is a defined term for the purpose of the Instructions and is limited to the UPE. Therefore, other than for natural persons, the proposed Instructions only require reports from the UPE and, for the acquiring person, acquiring entity(s) and entities that contribute to a NAICS overlap, and for the acquired person, the acquired entity(s), which is consistent with the current requirement. The Commission finds these reports valuable, regardless of whether those entities have $10 million in assets.

3. Additional Acquiring Person Information

The Commission proposed requiring additional information about the acquiring and acquired person. These proposals included a description of the ownership structure of the acquiring person and acquiring entity as well as an organizational chart if the acquiring person UPE is a master limited partnership or fund, information about other types of interest holders that may exert influence over the acquiring person, and the identification of officers, directors, and board observers of the acquiring person and acquired entity. As discussed below, the Commission adopts some of the items as proposed, adopts some of the proposals as modified, and does not adopt others.

a. Ownership Structure

The Commission proposed that acquiring persons provide a description of the ownership structure of the acquiring entity and, for fund or master limited partnership UPEs, an organizational chart sufficient to identify and show the relationship of all the entities that are affiliates or associates. The Commission also proposed that acquired persons describe the ownership structure of the acquired entity.

The Commission did not receive any comments regarding the requirement to provide a description of the acquiring and acquired entities' ownership structure. The Commission believes that such descriptions will provide information and nuance about ownership structures that may not be clear from a simple list of minority holders. Moreover, descriptive responses allow filers to offer clarification about the structure, including whether the ownership structure is subject to change between filing and consummation of the transaction. As a result, the Commission adopts this item as proposed for the acquiring person. However, this information is less relevant from the acquired entity. As part of its efforts to reduce the cost related to filing where possible, the Commission does not adopt the proposal for the acquired person.

As for the proposed requirement for the acquiring person to provide organizational charts, commenters noted that organizational charts are not always kept in the ordinary course of business, and structures may be so complex that they cannot be synthesized into a chart. The Commission acknowledges that there may be some cost associated with creating organizational charts just for the purpose of making an HSR Filing and modifies this item to require charts that show the relationship of entities that are affiliates or associates if such charts exist, even if they were created for other purposes. The Commission declines to adopt the suggestion to limit this requirement to transactions where there is an identified NAICS or product or service overlap. These charts are necessary for staff to understand the totality of the transaction, including the role of key decision makers and their responsibilities relative to the business lines under review.

The complex structure of investment entities is not adequately captured by the current Form, and there is often no other source for Agencies to learn of these relationships. Information about the acquiring entity's ownership structure is therefore necessary and appropriate for the Agencies to evaluate the transaction at issue. The Commission has modified the proposal to limit the reporting costs by requiring only the acquiring person to provide a description of its ownership structure and to provide organizational charts only if they exist.

b. Other Types of Interest Holders That May Exert Influence

The Commission proposed an Other Types of Interest Holders that May Exert Influence section that would have required the acquiring person to identify certain individuals or entities, beyond those with the minority interests discussed above, that may have material influence on the acquiring entity and entities related to it. These included certain individuals or entities that (i) provide credit; (ii) hold non-voting securities, options, or warrants; (iii) are board members or board observers or have nomination rights for board members or board observers; or (iv) have agreements to manage entities related to the transaction. As discussed below, while understanding these relationships can be very important in assessing the competitive effects of certain transactions, the Commission has elected not to adopt proposals (i), (ii), and (iv) at this time. As discussed in section VI.D.3.c., the Commission adopts with modification the proposal to require identification of officers and directors, which incorporates some of proposal (iii).

The Commission received several comments in support of the proposed change to disclose other types of interest holders. One commenter stated that disclosure of these interest holders would be helpful to close a loophole when the filing parties may have influence or joint profit maximizing incentives with rivals. Another commenter noted that the information would also enable the Agencies to assess conflicts of interest or the potential for inappropriate sharing of competitively sensitive information. Other comments highlighted the

importance of identifying situations in which a single creditor to competing firms could have an incentive to facilitate their coordination or collusion as well as situations in which a private lender may assert control or an investor may have a dual role as private provider of leveraged loans to finance buyouts.

The Commission also received several comments opposed to these proposed changes. Critics noted that some of this information may not be available at the time of filing or would be burdensome to collect and report. Others questioned the utility of the information. Another commenter noted that it will not be readily apparent whether identified entities or individuals have overlaps, supply, or other relationships relevant to the target.

In regards to identifying certain creditors, commenters stated that in the vast majority of credit arrangements, the creditor's rights and financial incentives are distinctly different than those of equity holders and that many creditors are unable to control investment decisions. In addition, one commenter observed that these disclosure requirements could impede access to credit, which would seriously impact private equity as its deals frequently rely on third-party financing. Several commenters also expressed concern about the burden of identifying and describing complex credit arrangements, particularly for infrequent filers.

Regarding the proposed requirement related to non-voting securities, options, or warrants, one commenter questioned the necessity of the information to examine the anticompetitive effects of any proposed transaction, noting that, in exempting acquisitions of non-voting securities from filing, Congress must have concluded, based on the legislative history, that such acquisitions pose no anticompetitive threat. No specific comments were received with respect to the proposed requirement to identify individuals or entities that have agreements to manage entities related to the transaction.

The Commission disagrees with assertions that information about individuals or entities that can influence the acquiring person through mechanisms such as credit relationships, non-voting interests, or management contracts is not relevant to the assessment of the competitive effects of a reported transaction. Further, the Commission notes that the HSR Act specifically defines voting securities as securities which at present or upon conversion entitle the holder the right to vote for the board of directors.[339]

[339] 15 U.S.C. 18a(b)(3)(A).

Nevertheless, the Commission acknowledges that the mechanisms of influence or managerial control are often bespoke and vary from entity to entity. The proposed rule was intended to sweep broadly but in a manner that was straightforward and relatively uncomplicated for filers to navigate. The comments raised issues that warrant further consideration. Given the other proposals that the Commission does adopt, particularly identification of additional minority interest holders, information about officers and directors of entities related to the acquiring entity, and the collection of additional documents, the Commission has decided not to adopt the proposals related to credit relationships, non-voting securities, and management agreements at this time. If these additional requirements still leave significant gaps in information that impede the Agencies' ability to screen for transactions that warrant additional investigation, the Commission may revisit these proposals in future rulemakings.

c. Officers and Directors

The Commission proposed adding a section that would have required the identification of the officers, directors, or board observers (or in the case of unincorporated entities, individuals exercising similar functions) of all entities within the acquiring person and acquired entity. Further, the proposal required for those individuals, the identity of other entities for which those individuals currently serve, or within the two years prior to filing had served, as an officer, director, or board observer (or in the case of unincorporated entities, roles exercising similar functions). After consideration of the comments and in light of the varied roles that religious or political non-profit organizations can play, the Commission has determined to narrow this requirement to (1) eliminate reporting related to board observers; (2) limit reporting to certain entities within the acquiring person (including officers and directors of the acquired entity who will continue to hold one of these positions post-consummation, if the acquiring person has filed for the acquisition of control); (3) only require identification of officers or directors that serve in those roles at the target or entities that are in the same industry as the target; and (4) exempt any non-profit entity organized for a religious or political purpose, even if that entity carries on substantial commerce, as described below.

Several commenters wrote in support of the proposal, recognizing the value to the Agencies' understanding of the ownership and management structure of companies involved in the transaction. One commenter stated that common board members at intermediate levels of ownership can influence competition directly. Another commenter also noted that private equity minority investment interests can confer rights to appoint board members or allow board observers that create anticompetitive opportunities to exert coordinated market power. This comment further explained that some entities place the same person on several boards to coordinate business strategies across those entities even where they hold only minority positions. The Commission agrees that, due to the influential impact that officers and directors can have on competitive decision-making of entities within the acquiring person, this information is relevant to the Agencies' initial antitrust assessment of the acquiring person's acquisition of interests in the target. The same commenter recommended that the Commission require disclosure of board membership information for any prior acquisitions identified in the HSR Filing. Because this requirement has been designed to identify potential competitive concerns between acquiring person and target at the time of filing and going forward, the Commission declines to expand the final rule to require this historical information.

However, the majority of the comments related to this proposal suggested significant modifications, either by eliminating the requirement in its entirety or acknowledging the relevance of the information but urging revisions to more narrowly tailor the requirements to achieve the Agencies' objectives. Critics across both of these groups raised some common issues.

Some commenters questioned the Commission's authority to require information on common officers and directors in an HSR Filing to enforce section 8 of the Clayton Act, pointing to the absence of any reference to section 8 or interlocking directorates in the HSR Act or in the Commission's original Statement of Basis and Purpose issued with the final HSR rules in 1978. A law firm commenter stated that legislative statements support that Congress disavowed any intention that premerger notification be used to allow the accumulation of information on businesses for general enforcement purposes, and the commenter asserted that the HSR Act is concerned only with potential violations of section 7. Another commenter wrote that even if it was appropriate to enforce section 8 using the HSR Act process, the

proposed instructions went beyond the text of section 8 by requiring information about unincorporated entities as well as historical information.

Additionally, several commenters questioned the Commission's legal basis for the requirement to report officers and directors. For example, one commenter stated that this requirement had no bearing on the antitrust analysis of transactions under section 7 and that the NPRM does not provide evidence that the Agencies have missed anticompetitive interlocks due to lack of information in HSR Forms. One commenter stated that the NPRM does not identify any cases where a court stated that this information has relevance for review under section 7 of the Clayton Act.

The Commission disagrees that the identity of officers and directors is immaterial to an analysis of whether an acquisition may violate section 7. As described in sections II.B.1 and VI.D.1.d.ii, and elsewhere, the structures of entities have become more complex, allowing for the levers of influence and managerial control to be distributed through a variety of mechanisms beyond controlling equity stakes, or even minority equity stakes. The important role of board members in particular has been recognized in court cases and the focus of consent decrees to resolve competitive issues.[340]

Further, contrary to assertions that the HSR Act limits the Agencies to evaluating whether a notified transaction may violate ''Section 7,'' the HSR Act explicitly directs the Agencies to promulgate rules necessary and appropriate to determine whether a notified acquisition may, if consummated, violate the ''antitrust laws.'' [341] The HSR Act amended the Clayton Act, and the term ''antitrust laws'' is defined in the Clayton Act to include the Sherman Act and the Clayton Act, including section 8's prohibition on interlocking directorates.[342] As discussed in the NPRM, when the Agencies do become aware of existing or potential interlocks created by a reported transaction, they typically seek to remediate them consistent with the Agencies' enforcement authority and before consummation of the transaction. Counter to suggestions that the proposal sought to create a ''dossier'' on the filing parties for general enforcement purposes, this information is relevant to enforcing the antitrust laws with respect to the transaction under review.

Moreover, while a notified transaction could create a violation of section 8 as described in the NPRM, the same competitive concerns that underpin section 8 are also relevant to whether a transaction would violate section 7. In fact, as highlighted by some commenters, section 8 does not necessarily cover all officer and director relationships that may give rise to competition issues. But that does not mean that these relationships are benign or that they do not create the same opportunities or incentives to coordinate competitive decision-making, for example, if the CEO or director of the acquiring entity serves as a member of the board of a rival of the target. In this scenario, section 8's thresholds for strict liability may not capture this relationship, but it would be relevant to analysis under section 7, particularly in nascent markets where one of the entities involved does not meet the minimum sales trigger for application of section 8.[343] That risk alone is relevant to the Agencies' assessment of whether the transaction is likely to substantially lessen competition or tend to create a monopoly in violation of section 7, regardless of whether the interlock is of the type that violates section 8. It is in part because the Agencies cannot rely on section 8 compliance to capture all relationships that create interlocks between entities with competitive relationships that the Commission proposed the new section.[344]

Currently, the Agencies cannot screen for these relationships unless they are mentioned in the transaction documents submitted with the HSR Filing, and often they are not. This information is often not publicly available from any source other than the filers. As explained in the NPRM, information on the identity of officers and directors will help the Agencies identify potential anticompetitive harms that may arise from the proposed transaction.

Additionally, identification of these individuals will assist the Agencies in determining whether the filers have had an opportunity to improperly share confidential information or integrate their businesses before the HSR Act's waiting period expires. For the Agencies to conduct a thorough premerger review, the business operations of the two filing entities must maintain their premerger competitive status quo until the HSR waiting period expires. When the Agencies are aware that there are common officers and directors, they may investigate whether there are on-going communications or interactions affecting the premerger competitive status quo, for example, by interfering with the other filer's competitive decision-making or placing executives from one entity into management positions at the other.[345] The Commission believes that information about these relationships is relevant to ensuring that the parties are complying with the requirements of the HSR Act to hold their operations separate and continue to compete until the expiration of the waiting period. This is true regardless of the antitrust risk presented by the transaction or the possibility that these relationships are improper interlocks; parties must wait until the waiting period has expired to begin integrating operations. Violations of the

[340] *See, e.g., In re Red Ventures Holdco, LP,* No. C–4627 (F.T.C. Nov. 2, 2017) (complaint) (overlapping limited partnership holdings that provided board seats violated section 7); *In re TC Group, L.L.C.,* No. C–4183 (F.T.C. Mar. 16, 2006) (complaint) (acquisition involving minority stake giving two private equity investors seats on the boards of competitors); *In re Time Warner Inc.,* No. C–3709 (F.T.C. Sept. 12, 1996) (analysis to aid public comment) (walling off two individuals and one entity to prevent them from influencing officer, directors, and employees of competitor and its day-to-day operations). *See also* cases cited in section II.B.1.

[342] *See* 15 U.S.C. 12.

[343] Section 8 of the Clayton Act, 15 U.S.C. 19, prohibits, with certain exceptions, one person from serving as an officer or director of two competing corporations if two thresholds are met. Competitor corporations are covered by section 8 if each one has capital, surplus, and undivided profits aggregating more than $10,000,000 with the exception that no corporation is covered if the competitive sales of either corporation are less than $1,000,000. In accordance with section 8(a)(5), the Commission adjusts these thresholds annually based on changes in gross national product. The thresholds in effect for 2024 are $48,559,000 and $4,855,900 respectively. 89 FR 3926 (Jan. 22, 2024).

[344] Commenter International Bar Association notes that beginning in September 2023, the European Union requires merging parties to provide information on any current interlocking directorships, and that Brazil requires similar information for both fast-track and regular notifications. *See* Comment of Int'l Bar Ass'n, Doc. No. FTC–2023–0040–0687 at 16–17. While this is not a basis for the final rule, the Commission notes that this information is relevant to competition issues examined in other jurisdictions.

[345] The Agencies' concern about premature coordination between merging firms, referred to as ''gun jumping,'' dates back many decades, and they have brought enforcement actions for violations of the HSR Act, as well as other antitrust laws that prohibit competitors from acting jointly prior to consummation of any acquisition. *See also* Note by the United States to the OECD, Suspensory Effects of Merger Notifications and Gun Jumping (Nov. 27, 2018) (DAF/COMP/WD(2018)94), *https://www.ftc.gov/system/files/attachments/us-submissions-fjun-2010-present-other-international-competition-fora/gun-jumping_united_states.pdf.* For a discussion of cases prior to 1995, see Mary Lou Steptoe, Acting Dir., Bureau of Competition, Fed. Trade Comm'n, Prepared Remarks Before A.B.A. Sec. Antitrust L. Spring Meeting, 1994 WL 642386 (Apr. 7, 1994).

stay provisions of the HSR Act are subject to civil penalties.[346]

Two commenters objected to requiring board observer information as outside the scope of section 8 and not related to the Agencies' antitrust assessment of the transaction. The Commission is aware that board observers do not have the same rights and duties as officers or directors. Comments submitted in response to the Commission's December 2020 Advance Notice of Proposed Rulemaking stated that individuals serving as board observers typically receive the same information as the board of directors but there may be ways to exclude them from reviewing privileged or competitively sensitive information. Consequently, the Commission views the risks of sharing competitively sensitive information or changing competitive decision making via board observers to be lower than the risk present with officers and directors. As a result, the Commission agrees that the need for information about board observers is not as great at this time for the purpose of the Agencies' premerger risk assessment, and the final rule does not require filers to identify individuals who have these rights.

In addition to comments related to the authority [347] and purpose of the proposed rule, several commenters raised concerns about the burden of collecting this information, especially historical information about individuals no longer serving in one of these roles, noting that it has little relevance and would be burdensome to collect. One commenter suggested that the requested information on officers and directors be limited to any positions they currently serve or expect to serve in the future. Another comment agreed, noting that current and expected future overlaps are relevant for assessing interlocking directorships and coordinated effects, but that detailed and historic information across all entities of the company has minimal relevance to the antitrust assessment of a particular transaction. Citing practical concerns, another comment noted that there should be no requirement to collect post-departure information from former personnel.

Other commenters stated that the burden of collecting any information about officers and directors was not justified by the benefit to the Agencies' review of any reported transaction. Some cited the higher burden of this requirement for large companies. For instance, one commenter noted that, in some instances, the individuals that would be identified would not be relevant to the Agencies' premerger review because, for small subsidiaries within a large entity's corporate structure, an officer might be someone who merely drew up the paperwork forming the entity whose role would not be relevant to the Agencies' antitrust assessment. Another suggested limiting this requirement to certain revenue thresholds or entities with overlaps or other relationships.

Additional commenters objected to having to report information regarding any individual's board membership or other association. They raised concern that this requirement could sweep in memberships with religious, political, or other non-commercial groups. One commenter stated that some of these individuals do not want to share information about their membership in certain organizations. The Commission has no intention of forcing disclosure in the HSR Filing of any officers or members of the governing board of non-commercial entities, or other non-profit entities with a religious or political purpose. The Form and Instructions that are part of this final rule counsel filers not to report any individual's role as a director, officer, or member of a non-profit entity organized for a religious or political purpose, even if that entity carries on substantial commerce. Filers who would otherwise be required to report these affiliations are excused from such reporting.

In response to the comments and to better tailor this requirement to the purpose of premerger review, the Commission has further decided to limit this requirement in several ways. First, the Commission has eliminated the requirement to identify officers or directors of acquired entities; the requirements of the final rule related to reporting information for officers and directors will apply to the acquiring person only. Second, the Commission limits the entities within the acquiring person to entities that (1) have responsibility for the development, marketing, or sale of products or services that are reported overlaps identified in the Overlap Description or supply relationships identified in the Supply Relationships Description or (2) directly or indirectly control or are controlled by the acquiring entity. If any of these entities is a non-profit entity organized for a religious or political purpose, even if that entity carries on substantial commerce, no reporting is required for individuals serving as officers or directors. Third, the Commission has limited the lookback periods contained in the proposed rule. For entities in category (1), filers will report officers and directors serving within three months prior to the HSR Filing. For category (2), there is no requirement to lookback to any individual who is no longer serving as an officer or director at the time of the HSR Filing but filers must consider individuals who have not yet officially taken the relevant positions. Fourth, the acquiring person will only be required to report the names of officers and directors of these entities if those individuals also serve as an officer or director of an entity that derives revenue in the same NAICS code (or is in the same industry) as the target at the time of filing and the name of such other entities. This will result in a list of only those individuals with the relevant connection.

As noted elsewhere, the Commission has carefully evaluated each of the requirements of the proposed rule in light of the comments and adjusted the final rule to calibrate information requirements to antitrust risk, burden, and importance to the Agencies' ability to screen for transactions that may violate the antitrust laws. On balance, the Commission has determined that an analysis of the board of the target entities is less probative in analyzing the potential effects of the transaction than is an analysis of certain entities within the acquiring person. Many filings are for acquisitions of control, and therefore the officers or directors of the target often change upon consummation. For those transactions where control is not being acquired, the acquired person may not be a party to the transaction, making the burden of collecting the information in the period of time between when it receives the required notice letter and when its filing is required higher than that of the acquiring person, which generally controls the timing of its filing. As a result, the Commission has not adopted the proposal for the acquired person.

For the acquiring person, as discussed elsewhere, due to the competitive significance of entities with products or services in development that have not

Apr. 7, 2017); *United States* v. *Input/Output, Inc.,* No. 1:99–cv–00912 (D.D.C. May 13, 1999).

[347] Comment of A.B.A. Antitrust L. Sec., Doc. No. FTC–2020–0086–0015 at 10 (board observers generally receive the same information that a director would except when there are conflict-of-interest issues or when the information concerns competitively sensitive topics); Comment of Comput. & Commc'ns Indus. Ass'n, Doc. No. FTC–2020–0086–0002 at 11 (board observers are usually entitled to the same information as board directors although companies have more leeway to exclude observers from privileged or competitively sensitive information).

yet generated any revenue, the Commission declines to adopt a de minimis revenue requirement for this information but agrees that information related to officers and directors is most relevant to the antitrust assessment when the companies have an existing business relationship or are related to the entity making the acquisition. Thus, the Commission modifies this proposal to look only at those entities within the acquiring person that are responsible for the development, marketing, or sale of the products or services identified in the Overlap Description or the Supply Relationships Description, or directly or indirectly control or are controlled by the acquiring entity. This modification addresses commenters' concern about potentially needing to report information on many officers and directors, especially across larger or more diffuse organizations with many subsidiaries irrespective of antitrust risk. So modified, this requirement would focus the Agencies' inquiry on those entities that would be most likely to have a competitively important relationship with the target post-consummation.

The Commission believes that limiting this information requirement to those entities for which the acquiring person and the target have reported overlaps or supply relationships in the same sector as well as the entities that are related to the acquiring entity provides information the Agencies need for premerger screening. As modified, this requirement properly targets the information that reveals any antitrust risk that common officers and directors could act to undermine competition during the waiting period or post-consummation. The Commission acknowledges that there may be other such relationships involving the parties to the transaction that may be relevant to the competition assessment under section 7 or that present section 8 concerns but agrees that the Agencies can continue to collect this information only for those transactions that are flagged for closer review. While the final rule may impose a higher cost to large companies with many competitively relevant business lines, the Commission believes that the benefit to the Agencies is necessary and proportionate: it is more difficult for the Agencies to discover on their own all the individuals who serve in these key roles at different levels of larger companies when those companies have many business lines related to the target.

The Commission has also considered comments related to the proposed lookback period, and, in light of these concerns and to minimize the cost of collecting historical information about officers and directors, the Commission has modified this requirement to shorten the lookback period to three months before the filing date. The Commission believes providing information about individuals who served in one of these positions recently, but not at the time of the filing, is sufficient to identify those individuals who would have been in a position to share competitively sensitive information during a due diligence or negotiation phase for the transaction. It will also serve as a disincentive for these individuals to step down temporarily to avoid disclosure on the HSR Form.

Once the relevant entities and individuals have been identified (and excepting any non-profit entities organized for religious or political purposes), the acquiring person must determine whether those individuals also serve as an officer or director (or in the case of unincorporated entities, roles that serve similar functions) of another entity that derives revenue in the same NAICS codes as the target. If NAICS codes are unavailable, reporting should be based upon the industry overlaps, to the knowledge and belief of the acquiring person or the officer or director. Only if an individual serves in such capacity does the acquiring person need to provide the name of that individual, along with the name of the entity within the acquiring person they serve as an officer or director, their title at that entity, and the name of the other entity for which they serve as an officer or director (and excepting any non-profit entity organized for religious or political purposes). The Commission believes that these limitations will allow the Agencies to have information about key affiliations with other businesses in competitive overlap relationships while limiting the burden on filing parties and their officers and directors.

Finally, commenters representing the pharmaceutical industry voiced concerns about the applicability and effects of the proposed instruction on reportable transactions in the pharmaceutical and biomedical sectors. For example, one pointed out that biotech firms generally rely on a small cadre of qualified directors and officers who have the appropriate business background and stated that disclosure of these positions in an HSR Filing would discourage highly sought-after experts and specialists from accepting biotech leadership roles. Another explained that many pharmaceutical transactions that trigger HSR Filings involve only the acquisition of exclusive licenses, where the parties remain as independent firms post-transaction. This commenter also objected to reporting this information for acquisitions of companies with no sales.

The Commission is aware, from its own experience and from research done by others,[348] that there are individuals who serve on the boards of multiple life science companies. The final rule does not impose a disproportionate obligation for companies operating in this sector; these individuals are obligated to comply with the antitrust laws regarding interlocks as much as individuals serving in other sectors. The Commission does not agree that there is a unique risk that disclosure of recent, current, or future leadership positions will limit the number of talented and qualified individuals who are available to serve as officers or directors in the biopharma or life sciences sector beyond whatever limits the antitrust laws impose. Many sectors prefer knowledgeable professionals with distinct credentials and experience to serve as board members. Moreover, the cost of reporting these relationships is directly related to the number of reportable transactions that occur each year in this sector and the number of existing or potential relationships. The Commission does not believe that HSR reporting requirements will improperly deter qualified individuals from serving on the boards of these or any other companies.

The Commission believes that the modifications made to the final rule will ensure that the Agencies receive the information about recent, current, and future officers and directors that may create opportunities for anticompetitive harm under any antitrust law, including section 7 of the Clayton Act, section 1 of the Sherman Act, or the HSR Act itself. The Commission disagrees that the instruction will newly create a chilling effect on lawful and procompetitive activity or board membership. When individuals agree to serve as board members, they take on fiduciary responsibilities that statutory and common law require. Separate from any HSR requirements, these fiduciary duties require directors to, inter alia, act in the best interest of the organization and to ensure that the organization follows applicable laws.[349] Courts have found that directors may breach their duty of loyalty if they do not make a good faith effort to provide adequate

[348] *See* Lemley, *supra* note 316.

[349] Jeremy S. Piccini, ''Director Liability, the Duty of Oversight, and the Need to Investigate,'' Bus. L. Today 1 (Feb./Mar. 2011).

oversight and monitoring.[350] A merger or acquisition that requires reporting under the HSR Act is not an insignificant occurrence. When an organization to which an individual owes a fiduciary duty is involved in a reportable transaction, it is reasonable to expect those individuals to exercise their duties of care and loyalty by participating in compliance activities. Moreover, individuals who serve on boards must comply with the prohibitions in the antitrust laws that relate to interlocks and should be aware of how their role in a senior leadership position is relevant to the Agencies' assessment of proposed transactions. These risks exist without regard to the disclosure of their board position in an HSR Filing. Given the responsibilities that board members already carry, the Commission believes that the reporting requirement is reasonable and appropriate, particularly when balanced against the increased transparency and value it provides to the Agencies' premerger antitrust analysis.

In sum, the Commission has determined that the reporting requirements for UPEs contained in the final rule are necessary and appropriate to enable the Agencies to identify transactions that may violate the antitrust laws because the acquiring person and the target have existing business relationships, including through shared individuals or entities, that must be considered as part of that assessment, and that these requirements, as modified, have been tailored to reduce the cost of reporting as much as practicable.

E. Transaction Information

This section of the Form and Instructions reorganizes, clarifies, and expands the information required in the initial portion of the current Form as well as in Items 2, 3, and 5. The Commission proposed new sections to facilitate the reorganization, clarification, and expansion of these items and received comments on certain portions of the Transaction Information section. As discussed below, the Commission adopts some of these proposals without change and some with modifications.

1. Parties

This section requires the information currently mandated by Item 3(a). The Commission did not propose and does not adopt any material changes to the information required by this item.

2. Transaction Details

This section requires the information currently mandated by Items 2(b), 2(c) and 2(d). The Commission did not propose and does not adopt any material changes to the information required by these items. The Commission notes that the requirement to indicate the notification threshold in Item 2(c) is not applicable to the acquired person and is therefore excluded from the Form and Instructions for the acquired person. The Commission did not propose and does not adopt any material changes to the information required by this item.

3. Transaction Description

This section requires the information currently mandated by Items 2(a) and Item 3(a). The Commission did not propose and does not adopt any material changes to information required by these items. The Commission also proposed requiring the acquiring person to describe the business operations of all the entities within the acquiring person, which it adopts with modification, as discussed below.

a. Business of the Acquiring Person

The Commission proposed requiring the acquiring person to briefly describe the business operations of all entities within the acquiring person to provide a clear overview of all aspects of the acquiring person's pre-transaction business. The Commission adopts the proposal with modification.

The Commission received two comments expressing general support for the proposal, with one noting that the change is essential to ensuring that the Agencies can meet the statutory deadline. One law firm commenter was critical of the burden that the proposal would impose, stating that companies may have several dozen subsidiaries and written descriptions as to each of the respective business operations is not information readily maintained in the ordinary course of business and could be incredibly burdensome to collate.

The Commission adopts a clarified version of this requirement. The proposal was intended to require a short description of the operating businesses within the acquiring person, not an entity-by-entity description. The Commission understands that a single operating business may comprise multiple entities, such as shell entities or separate entities for each location of the business. Therefore, the Commission amends the requirement to remove ''of all entities within'' to make clear that the acquiring person does not need to describe its operations on an entity-by-entity basis.

Understanding the business of the acquiring person is necessary to understanding the potential competitive implications of the transaction. Investment groups often control multiple portfolio companies across many lines of business. Similarly, some corporations also have multiple and varied operations. These other operations may be related to the operations of the target, even if they do not directly overlap with it. Therefore, particularly for acquiring persons with complex structures or many businesses, knowing just the business of the acquiring entity is not sufficient for the Agencies to evaluate the impact of the acquiring person merging with or acquiring an interest in the target. The scope of the acquiring person's holdings is often not publicly available, necessitating the Agencies receiving the information from the acquiring person itself.

b. Business of the Target

This section requires the information currently required by Item 3(a). The Commission did not propose and does not adopt any material changes to the information required by this item.

c. Non-Reportable UPEs

This section requires the listing of non-reportable UPEs, which is currently required by Item 2(a). The Commission did not propose and does not adopt any material changes to the information required by this item.

d. Transaction Description

This section requires the information currently mandated by Item 3(a). The Commission did not propose and does not adopt any material changes to the information required by this item.

e. Related Transactions

This section requires filing persons to identify related transactions, and the Commission proposed a list of common circumstances in which multiple filings are required to guide filing parties in their responses. Although Item 3(a) of the current Form asks parties to indicate whether there are additional filings related to the transaction, filers sometimes overlook this requirement. The Commission received three comments in support of the proposed changes, with one of these commenters

[350] *See Marchand* v. *Barnhill,* 212 A.3d 805, 824 (Del. 2019) (reversing dismissal of stockholder's claims that directors breached their duty of loyalty by failing to establish a reasonable system of controls and reporting regarding food safety in connection with listeria outbreak); *In re Boeing Co. Derivative Litig.,* No. CV 2019–0907–MTZ, 2021 WL 4059934, at *33 (Del. Ch. Sept. 7, 2021) (finding that plaintiffs stated a claim that board breached its duty of oversight by failing to establish a reporting system for airplane safety).

noting that they appear to be reasonably designed to provide potentially helpful clarification. The Commission adopts this requirement as proposed.

f. Transactions Subject to International Antitrust Notification

The Commission proposed creating a Transactions Subject to International Antitrust Notification section that would require parties to identify the jurisdictions where each filing person has already filed or is preparing notifications to be filed as well as a list of the jurisdictions where it has a good faith belief it will file. The Commission adopts this requirement as proposed, but only for the acquiring person.

Although the Form currently asks filing parties to voluntarily identify other jurisdictions in which filings will be made, most filers do not disclose the information even though more and more transactions are subject to review in multiple jurisdictions around the world. As noted in the NPRM, in order to fully benefit from inter-agency consultations, the Agencies need to know as early as possible which foreign jurisdictions may also be evaluating a proposed transaction.

The Commission received two comments in opposition to this proposal. One commenter expressed concern about the effects of inter-agency consultations, and another recommended maintaining the status quo where filers voluntarily identify other jurisdictions where the transaction will trigger premerger notification under the laws of that jurisdiction. Both stated that the proposal would only impact international companies, which might be forced to speculate about potential foreign filings. The Commission acknowledges that the proposed requirement will have a greater impact on companies with operations outside the United States. But the Commission disagrees that it is asking parties to speculate about potential foreign filings; however, it has determined that it is sufficient for the information to be provided only by the acquiring person. As stated in the NPRM, the text of the proposed rule provides flexibility for parties who, at the time of the HSR Filing, may not have yet identified all the other jurisdictions where they will file. Indeed, the final rule specifies that filing parties can respond based on their good faith belief, which provides filing parties with the ability to respond based on their knowledge at the time of filing. Otherwise, the requirement asks for facts that are already known: the jurisdictions where the party has already filed and the ones for which it is preparing a filing. The Form also affords parties the option to voluntarily make certain waivers related to other jurisdictions, as discussed in section VI.K.3. Accordingly, knowing which other jurisdictions are reviewing the transaction can expedite the waiver process if the parties intend to provide a waiver after filing.

Given the importance of knowing which foreign jurisdictions may also be evaluating a proposed transaction and the benefits to the Agencies and the parties of early case-specific cooperation facilitated by waivers, the Commission adopts this necessary change as proposed for the acquiring person. However, because filing parties often coordinate their notification to other jurisdictions and in order to further reduce the burden on acquired persons, the Commission does not adopt the change for acquired persons because it is sufficient to obtain this information from only one filing party.

4. Additional Transaction Information

a. Transaction Rationale

The Commission proposed that the acquiring and acquired person be required to describe all strategic rationales for the transaction. These rationales would include those related to, for example, competition for current or known planned products or services that would or could compete with a current or known planned product or service of the other reporting person, expansion into new markets, hiring the sellers' employees (so-called acqui-hires), obtaining certain intellectual property, or integrating certain assets into new or existing products, services, or offerings. The Commission also proposed that the filing person identify which documents submitted with the HSR Filing support the rationale(s) described in the narrative. The Commission adopts the requirement as proposed but does not require the information from select 801.30 transactions.

The Commission received several comments supporting disclosure of transaction rationales. Individual commenters described the changes as common-sense requirements and noted the need to ensure each party in the transaction explains the reasoning from their perspective. One commenter stated that mergers may be beneficial to an acquiring company for anticompetitive reasons that might not be immediately apparent from a surface-level analysis of market shares and concentration in a particular market, and that requiring a firm to submit its justification for the strategic wisdom of a particular transaction would help diminish the role of guesswork in the Agencies' review of a proposed merger.

Commenters opposing disclosure of transaction rationales focused on the evolving nature of the information, which may very well differ across the various personalities and business roles that span an organization and which in some instances may be only discovered in the course of post-signing diligence. The Commission understands that there may be many goals for the transactions and that different perspectives within the filing person may be difficult to resolve. But that is precisely the problem that this requirement is intended to resolve. The Agencies are not in a position to understand which rationales are predominant nor choose among different rationales presented in the other materials submitted with the notification, such as transaction-related documents, without additional context. That is why the Commission believes that requiring filers to point to documents or other materials in the HSR Filing that support the stated rationale would help resolve any uncertainty about which rationale (or rationales) may predominate. The Commission also understands that rationales may change throughout the diligence process. The parties are not required to wait to file their notification until they have settled on a single or predominant rationale.

Others described the request as unfair because in the past the merging parties' strategic rationale for the transaction has only been revealed after the Agencies have sued to block a deal. The Commission disagrees that the parties lack rationales for the transaction until they are before a court defending a lawsuit, or that it is unfair to require them to state each strategic rationale for the transaction known at the time of making an HSR Filing. Indeed, each filer may have different reasons for entering into the transaction. Whatever the reasons for agreeing to the transaction, that is the information the Agencies seek. Knowing why each party sees the transaction as beneficial is highly relevant to the initial antitrust assessment and may cause the Agencies to determine, relying on the documentary support for that rationale, that the transaction does or does not warrant additional investigation.

In addition, commenters noted that a description of transaction rationales would be burdensome to generate and duplicative of other materials submitted in the HSR Filing, particularly documents responsive to current Item 4. The Commission acknowledges that there is some cost to filers to provide a description of strategic rationales but

disagrees that it is duplicative. There is no current requirement that the parties describe the rationale for the transaction, and for many transactions, there are no documents or other information submitted with the HSR Filing that reference a rationale. For these filings, the Agencies do not know what benefits either party hopes to achieve through the transaction. Alternatively, where there are many different rationales discussed in submitted materials, the Agencies lack the context to know which ones predominate or reflect the views of the organization. Requiring each filer to describe each strategic rationale for the transaction provides the Agencies with a starting place to understand the motivation behind the transaction without having to make judgments about which ones are still under consideration. Given the Agencies' experience with asking this question during the initial waiting period or reviewing other white papers that the parties voluntarily provide, the Commission believes that the cost of supplying a transaction rationale will be minimal and, in any event, is necessary for the Agencies to determine whether the transaction may violate the antitrust laws. Filers are invited (but not required) to copy and paste text or provide a summary from documents produced with the HSR Filing and reference the specific portions of those documents where the discussion of that rationale exists. However, if documents provide inconsistent rationales, filers should address these inconsistencies. The Commission believes that relying on statements contained in documents submitted with the HSR Filing will reduce the burden of preparing the filer's description of rationales for the transaction.

One commenter requested clarification as to whether the proposal contemplates a single consistent response submitted by all parties notifying the same transaction (in the context of a simple acquisition, buyer and seller) or whether it contemplates that each notifying party submits a separate narrative, noting that the motivations of buyers and sellers may diverge. The Instructions clarify that each filing party is required to submit a description of its strategic rationales because it is important to have such a description from both sides of a given transaction.

Another commenter suggested that to reduce burden the Commission should only require the acquiring person to submit its transaction rationale, reasoning that the acquiring person's strategy is the most competitively relevant and that the seller's rationale for a transaction is often no more than obtaining cash to distribute to investors or to use for unrelated business purposes. The same commenter suggested that the instruction be limited to requiring a brief description of the primary strategic rationale for the transaction. For the reasons outlined above, the Commission declines to adopt these suggestions but notes that a brief description of the transaction rationale is sufficient so long as it is accurate and does not conflict without explanation with stated rationales in documents submitted with the HSR Filing.

b. Transaction Diagram

The Commission proposed a new requirement that filing persons provide a diagram of the deal structure along with a corresponding chart that would explain the relevant entities and individuals involved in the transaction. The Commission adopts this proposal with modification.

The Commission received many comments in support of this proposal, all of which noted the value of such materials to the Agencies as they work quickly to assess the transaction. One commenter stated that without a diagram of all the entities and their relationships it can be hard to understand what's going on. Another highlighted that the proposed requirement would leverage documentation that often already exists. Noting that transaction diagrams can sometimes be incomplete or inaccurate, a law firm commenter suggested that this proposed instruction be modified to require the submission of the most recent diagram of the transaction, but only to the extent that such a diagram already exists and is not materially inaccurate. Finally, two commenters expressed general support for the proposal.

Three commenters opposed the proposal on the grounds that it would unnecessarily increase the burden on filing parties. One commenter stated that these materials are often not maintained in the ordinary course of business or created in the course of a deal negotiation. Another noted that deal structure may not be ''set in stone'' even after signing. In addition, another commenter pointed out that, besides burdening the parties, the proposal would increase the burden on Agency staff reviewing the information, adding that the additional information is not likely to be any more informative to the Agencies than the information already required under the current HSR Form.

Two commenters proposed modifications in light of the fact that many times these charts are drafted by outside tax advisors to show the pre-transaction reorganization needed to achieve the desired tax structure and benefits and that the charts sometimes include detailed tax advice that is protected by the attorney-client privilege or otherwise commercially sensitive. A law firm commenter suggested modifying the instructions to permit parties to redact, omit, or simplify any diagram, to exclude information that relates solely to tax considerations. Another commenter noted that where the details of the pre-transaction reorganization are irrelevant to the antitrust assessment of the transaction, such as where all or a majority of the outstanding equity of a target is being acquired, less detailed diagrams should provide the agencies with the desired information.

The Commission acknowledges the cost of having to create both a diagram along with a corresponding chart explaining the relevant entities and individuals involved in the transaction. Although such information would be materially useful to the Agencies, the Commission adjusts the proposal to require only the acquiring person in non-select 801.30 transactions to provide a diagram of the deal structure and only if one exists. That is, filers are not required to create a diagram or a chart solely for the purposes of submitting an HSR Filing. The Commission believes that such a diagram would be useful even if prepared for other purposes. With regard to privileged materials, HSR Rules already accommodate withholding certain material based on a claim of attorney-client privilege; if such a claim is made with respect to transaction diagrams, the filer can follow those requirements.

In sum, the Commission has determined that the transaction information requirements contained in the final rule are necessary and appropriate to enable the Agencies to fully understand the scope of the transaction being considered and to identify those that may violate the antitrust laws, and that the requirements, as modified, have been tailored to reduce the cost of reporting as much as practicable.

F. Joint Ventures

This section requires information currently mandated by Item 5(b) of the Form. As discussed in section VI.J.1.f, the Commission adopts the proposal to eliminate the use of 10-digit NAPCS codes, including in this section. The

Commission did not propose and does not adopt any other material changes to the information required by this item. The Commission notes that no acquired person filings are required for joint ventures, so this section is not included in the Form or Instructions for acquired persons.

G. Business Documents

The Commission proposed a Business Documents section that would require the submission of documents currently required by Items 4(c) and 4(d) of the Form as well as additional categories of documents. Specifically, the Commission proposed expanding the current requirement found in Item 4(c) to the ''supervisory deal team lead(s);'' altering the language of current Item 4(d)(ii); requiring the production of certain ordinary course documents; requiring drafts of Transaction Related Documents; and requiring an organizational chart of authors and recipients. As discussed below, the Commission adopts some of these requirements with modification and does not adopt others.

As noted in the proposed rule, the Agencies compared documents they have received over the years in response to Second Requests with those submitted in the HSR Filing and assessed whether having certain types of documents at the beginning of the waiting period would have changed the Agencies' determination of whether and how to move into an in-depth investigation of the transaction. As a result of this review, the Commission identified documents that are not required by the current Form but would have been highly probative to the initial antitrust assessment of the transaction during the initial waiting period.

1. Transaction-Related Documents

a. Competition Documents

In the proposed rule, the Commission proposed expanding the documents currently required by Item 4(c) of the Form, which are prepared by or for officers and directors for the purpose of evaluating or analyzing the transaction. Since the beginning of the premerger notification program, these transaction-related documents have been a key screening tool for the Agencies to determine whether the transaction may violate the antitrust laws because they discuss the acquisition with respect to market shares, competition, competitors, markets, potential for sales growth or expansion into product or geographic markets. The Commission proposed requiring the filing person to submit such documents prepared by or for supervisors of the team of individuals working to complete the transaction, which the Commission referred to as the supervisory deal team lead(s).

In response to comments that the proposal was not clear about whom the Commission intends for filers to search for responsive documents and information in addition to officers and directors, the Commission has introduced a definition of supervisory deal team lead and limited the term to just one person. As discussed in section VI.A.1.g., the Commission believes these changes will provide clarity for filing parties. The Commission now turns to comments that were not directed at the definition of supervisory deal team lead but concerning the requirement to submit documents prepared by or for someone other than officers and directors.

The Commission received one comment from State antitrust enforcers supporting the proposal, but other commenters expressed concerns about the costs associated with identifying, collecting, and producing documents from the supervisory deal team lead. Certain commenters stated that expanding 4(c) to include documents to and from supervisory deal team lead(s) would create a significant burden to filers that is not justified by any benefit to the Agencies. One commenter said that adding documents from these individuals would not likely generate material that would allow staff to better assess the need for Second Requests.

The Commission disagrees that adding documents prepared by or for the senior leader of the deal team would not likely generate additional key documents to help staff better assess whether to issue Second Requests. Since the beginning of the premerger notification program, 4(c) documents have been a principal source of information that allows the Agencies to identify those transactions that may violate the antitrust laws and that require a more in-depth review through the issuance of Second Requests. Based on documents submitted in response to Second Requests, it is the Agencies' experience that someone other than an officer or director is often in charge of the deal team and this person typically has additional documents that would be responsive to 4(c), but the documents have not been transmitted to an officer or director at the time of the HSR Filing. This is even more likely to be true when the HSR Filing occurs before due diligence is complete or a final agreement is executed. Requiring the submission of transaction-related documents prepared by or for the supervisory deal team lead would result in the Agencies receiving additional probative documents that speak directly to whether the transaction may or may not violate the antitrust laws even if the document has not been shared with an officer or director prior to filing the notification. Based on the Agencies' experience, the analysis of the transaction's competitive implications contained in these documents is extremely probative.

Certain commenters explained that the addition of the supervisory deal team lead to the existing officer and director custodians, combined with the other new document requirements, would require filers to submit a significantly larger volume of documents. One commenter estimated that adding documents from the supervisory deal team lead(s) as well as draft documents as proposed in the NPRM may increase the number of documents submitted with each filing by tenfold or greater. Another comment pointed out that adding supervisory deal team lead(s) to Item 4(c) could also add a burden related to internal document preservation and retention. The comments did not provide specific estimates of how many additional documents or pages of materials adding a supervisory deal team lead may generate, however.

As discussed throughout this final rule, the Commission has taken steps to lessen the costs identified by commenters. After careful consideration of the comments, the Commission has modified this proposal to reduce the cost associated with requiring 4(c) documents by limiting new custodians to be searched to a single individual, the supervisory deal team lead. This modest expansion of custodians by one individual is necessary because documents responsive to Item 4(c) are some of the most relevant material that staff receives, and based on the Agencies' experience there are also probative documents containing 4(c) content generated by and for the supervisory deal team lead that, if submitted with the HSR Filing, would allow staff to better gauge the competitive implications of the transaction—as understood by the filing person—and conduct a more informed, efficient screening analysis.

Another concern articulated by a small number of commenters was that documents created by or for the supervisory deal team lead may convey information that does not reflect the actual assessment of the proposed merger at senior levels. As one commenter explained, the Agencies may draw conclusions that do not actually

align with the documents provided to or sent by the personnel that can make final decisions for an entity, such as officers and directors. The Commission acknowledges this concern but believes that the exclusion of these documents from HSR Filings is often technical and simply a matter of timing. HSR Rules do not require filers to complete due diligence or sign an executed agreement before filing a notification. Even the modification discussed in section V.D. which requires filing parties to have agreed to key terms of the transaction still allows parties to file prior to the completion of all diligence and negotiation. In the Agencies' experience, staff often receives these 4(c)-type documents in response to a Second Request and finds that the reason they were not submitted with the filing was that they had not been shared with any officer or director at the time of the HSR Filing but were eventually shared with them. Even if such documents were never shared with an officer or director, any document that is responsive to 4(c) and was only shared with the supervisory deal team lead—the person who has primary responsibility for supervising the strategic assessment of the deal—is still highly probative of whether the transaction is likely to violate the antitrust laws.

The Commission believes that by limiting this requirement to the individual who has primary responsibility for supervising the strategic assessment of the deal, and who would not otherwise qualify as a director or officer, it has been tailored to provide a benefit to the Agencies with minimal cost to filers. In the situation where the only individuals supervising the strategic assessment of the deal are already either an officer or director, this requirement will not require searching for responsive documents from anyone new. As discussed above, to the extent that the supervisory deal team lead has responsive documents, it is just often a matter of timing that the document is not submitted with the HSR Filing. Rather than requiring parties to complete their due diligence and provide all responsive transaction assessments provided to key decision makers prior to filing, the Commission has determined that also requiring documents provided to the supervisory deal team lead is the most direct way to obtain these highly relevant assessments of the transaction with the HSR Filing. The cost associated with searching one additional individual for these documents is necessary and appropriate given their importance to the Agencies in quickly identifying those transactions that warrant a closer look. Thus, the Commission adopts this proposal as modified in the final rule.

b. Drafts

The Commission proposed requiring drafts of responsive transaction-related documents if that draft document was provided to an officer, director, or supervisory deal team lead(s). The Commission does not adopt the proposal at this time.

As explained in the NPRM, filers are currently required to submit draft versions of documents responsive to Items 4(c) or 4(d) only if there is no final version or if the draft was sent to the board of directors. Under this guidance, if a not-final version of a document is sent to the board of directors, it ceases to be a ''draft'' and must be submitted, even if a final version is also submitted. Based on the Agencies' experience with receiving other drafts of documents during a Second Request investigation, in some cases prior draft versions have been edited to remove candid assessments of factors relevant to competition prior to circulation to officers or directors.

The Commission received numerous comments on this proposal, raising four principal issues: (1) the burden of producing draft transaction-related documents is not justified by the benefit to the Agencies; (2) such drafts do not reflect sufficient deliberation to be probative of antitrust risk; (3) the term ''drafts'' is not defined in the NPRM and has no common meaning; and (4) requiring the production of drafts would chill internal discussions related to the strategic assessment of the transaction. These concerns are discussed in turn.

First, some commenters emphasized the burden of producing drafts, noting that filing parties will need assistance from counsel and may have to use e-discovery or forensic collection tools to capture all drafts. Requiring drafts, one commenter stated, would significantly increase the volume of documents produced; another commenter noted that it is not uncommon for the authors of these documents to prepare many discrete drafts as part of the drafting process. Some commenters underscored that Agency staff would also face the challenge of reviewing these additional documents. Another commenter pointed out that the proposal would disproportionately affect smaller businesses, which may not have staff lawyers or the ability to incur hundreds of thousands of dollars in legal fees.

In addition, some commenters expressed doubt regarding the probative value of drafts. Drafts may be duplicative, they noted, and often include boilerplate language that may not be accurate as well as incomplete thoughts, dummy slides, and placeholders. One commenter observed that the Agencies do not typically request drafts during the initial waiting period, and that it is exceedingly rare for Agency staff to use a draft document as a deposition exhibit or in any subsequent litigation.

Commenters also sought guidance from the Agencies regarding what constitutes a ''draft'' transaction-related document. In the context of a shared document platform, where several contributors may be working on a document simultaneously, one commenter asked if each saved iteration would be considered a draft that must be produced. Another commenter asked whether a document is considered to be ''submitted'' to an officer, director, or supervisory deal team lead if that individual simply has access to the document via a collaborative drafting tool. As a result of such vagueness, commenters noted, merging parties will face the enormous practical challenge of preserving all versions of documents, even at highly preliminary, incomplete stages. Moreover, such vagueness will lead to arbitrary and capricious enforcement of the requirement to submit drafts if Agency staff later discovers a draft document that they believe should have been submitted with the HSR Filing, according to one commenter.

Finally, some commenters raised concerns about the implications for internal deliberation during the drafting process. One commenter stated that the proposed requirement would chill open discussion ''for fear of creating documents that do not reflect the final thoughts of the company.'' Another commenter warned that it might cause some risk-averse businesses to remove officers, directors, and supervisory deal team leads from the document-drafting process.

Although several commenters recommended eliminating the proposed requirement entirely, the Commission did receive a few suggestions for ways to narrow the proposal. One suggestion was to limit drafts to specific types of documents identified by the Agencies as likely to contain probative information. Another commenter suggested requiring filers to submit the first draft, the last draft, and the final document. Alternatively, one commenter proposed that only the initial draft version submitted to an officer, director, or supervisory deal team lead be produced. None of the commenters supported the alternative proposed in the NPRM, which would require filing parties to

withhold drafts and submit them within 48 hours only if requested to do so by the Agencies.

Having carefully considered the comments, the Commission has decided not to adopt the proposed change to require draft documents at this time.

However, in light of concerns that the Agencies are receiving documents edited to remove candid assessments of the transaction and market competition, the Commission modifies its informal guidance regarding drafts that were shared with the board of directors or similar body. Currently, a document, even in draft form, that is shared with the board of directors (or similar) is responsive and no longer considered a ''draft.'' This distinction is based on the belief that if a document is shared with the board of directors, it is sufficiently reliable to be submitted with the HSR Filing. However, this guidance has sometimes been limited to require that the document be shared with the entire board. The Commission now clarifies that any Transaction Related Document (currently referred to as 4(c) and 4(d) documents) that was shared with any member of the board of directors (or similar body) is responsive and should not be considered a draft; rather, it should be treated as a final version and submitted with the HSR Filing as a Competition Document.

As explained in the NPRM, draft versions of responsive documents can contain highly relevant, probative, or candid statements about the transaction's competitive impact not reflected in the final version of the document, and in some cases, it appears that the final document has been edited to remove candid assessments of factors relevant to competition prior to circulation to officers or directors. The Agencies' experience is buttressed by multiple commenters, who similarly acknowledged that 'sanitizing' these documents in anticipation of antitrust investigation by the Agencies is a legitimate concern. The Commission believes that modifying its informal guidance, as well as obtaining additional documents and information as outlined in this final rule, including those shared with the supervisory deal team lead, will help ensure that the documents the Agencies review contain factual, accurate assessments of the strategic and competitive implications of the transaction.

c. Confidential Information Memoranda

This section requires information currently collected in by Item 4(d)(i) of the current Instructions. The Commission did not propose and does not adopt any material changes to the information required by this item.

d. Third-Party Studies, Surveys, Analyses, and Reports

This section requires information currently required by Item 4(d)(ii) of the current Instructions. The Commission did not propose and does not adopt any material changes to this item.

e. Synergies and Efficiencies

The Commission proposed a Synergies and Efficiencies section to collect the information currently required by Item 4(d)(iii) of the Instructions, with a proposed modification to clarify that forward-looking analyses are responsive. Although one comment expressed general support, some objected to the proposed modification, noting that it would expose firms' proprietary information. More generally, another commenter expressed concern that the burden of identifying the documents that relate to potential synergies or efficiencies would increase greatly if expanded to include supervisory deal team lead(s) and drafts, because synergy analyses in particular can generate a large number of drafts.

In light of the comments and to reduce the overall cost of the final rule as compared to the benefit this information would provide to the Agencies, the Commission does not adopt the proposed modification. However, the Commission declines to repeal the requirement to provide documents that reflect expected synergies and efficiencies, as the Agencies find these analyses to be relevant to understanding any such expected benefits of the transaction. Parties often provide more information about potential efficiencies than is strictly required by the Rules if they want the Agencies to consider such information during their initial review. Thus, the current language in the Instructions regarding synergies and efficiencies remains in effect as part of the final rule.

2. Plans and Reports

The Commission proposed requiring filers to submit two sets of plans and reports not created specifically for analyzing the filed-for transaction. First, it proposed requiring the submission of periodic plans and reports that discuss market shares, competition, competitors, or markets of any product or service that is provided by both the acquiring person and acquired entity, if those documents were shared with a chief executive officer of an entity involved in the transaction, or with certain individuals who report directly to such a CEO. Second, the Commission proposed requiring the submission of all plans and reports submitted to the board of directors (or, in the case of unincorporated entities, individuals exercising those functions) that discuss market shares, competition, competitors, or markets of any product or service that is provided by both the acquiring person and acquired entity. The NPRM called for all such plans and reports that went to the board, not merely those prepared on a periodic basis, because it is the Commission's experience that any report sent to the board reflects market intelligence that is important to the top decision-makers. As proposed, the Commission limited this document requirement to those materials prepared or modified within one year of the filing date of the notification. The Commission adopts the proposal with modifications explained below.

As explained in the NPRM, plans and reports prepared in the ordinary course often contain detailed assessments of core business segments, markets, competitors, other acquisition targets, and projections about future competitive dynamics—insights that have direct bearing on the Agencies' antitrust assessment of the transaction in the initial waiting period. Staff at the Agencies frequently request these documents voluntarily from filing parties early in their review to better understand and analyze the relevant markets at issue.

The Commission received several comments on these proposals. Some comments stated that the proposed requirement was overly broad and would create a significant burden for filers without commensurate benefit to the Agencies. In particular, for example, some comments said that this requirement would mean that filing company personnel must identify, collect, and produce responsive material from several individuals who are not currently searched for documents or materials submitted with an HSR Filing. These comments disagreed with the NPRM's statement that companies frequently collect these documents as part of the due diligence process for transactions. In addition, one commenter stated that, even if such documents were collected, the collection process would not occur in a systematic way to ensure compliance with HSR requirements. In order to effectively collect and produce responsive material, some comments contended that filers would need to use e-discovery and other forensic discovery tools, which are expensive and add

additional time. Certain comments explained it would be counterproductive and burdensome for the Agencies' staff to review and assess the significant volume of documents this new request will likely yield.

The Commission acknowledges that this proposal would have increased the costs for certain filers and has tailored the final rule to minimize these costs. For instance, commenters suggested that there would be additional costs to collect these types of documents, such as interviewing additional personnel, collecting additional documents for production, and having those documents reviewed by counsel, among other tasks. In response to these concerns, the Commission notes the revised requirement is very targeted: it applies only to documents that already exist and are dated within one year of filing, and that discuss overlapping products and services. But in response to concerns that a search for even this limited set of documents could require forensic document technology or other investments in discovery tools, the Commission modifies this requirement to limit the business executives whose files need be searched, dropping the need to collect and produce documents from any person who reports directly to the relevant CEO. As a result, this requirement will not require documents from any new custodians. With this modification, the Commission believes that the number of responsive documents will be reduced so that the burden on the parties to submit and the burden on staff to review these documents will be manageable.

The Commission believes that limiting responsive plans and reports to those shared with the CEOs and with the Boards of Directors of the entities involved in the transaction will still provide the Agencies with sufficient context necessary to determine whether the transaction is likely to violate the antitrust laws. Importantly, these individuals are often involved in preparing the HSR Filing and are the same individuals who are searched for other responsive documents, such as Competition Documents. From the Agencies' experience, those that report directly to the CEO typically collect and retain the types of reports that contain important and relevant business facts so that documents provided to the CEO contain important market analyses and facts that are highly relevant to the Agencies' initial antitrust assessment. They can be especially important for determining the scope of any investigation, potentially narrowing the areas of inquiry or identifying areas of emerging competition that are not otherwise discussed or described in documents generated in connection with evaluating the reported transaction.

The Commission has determined that at this time, requiring reports provided to lower-level executives who report to the CEO, as proposed in the NPRM, would add cost for filers, even those with known overlapping business lines who may expect that the Agencies will be taking a close look at the documents submitted with the HSR Filing.[351] The Commission is also mindful of the burden to the Agencies of receiving HSR Filings with many additional documents that must be reviewed during the initial waiting period. The Commission believes that getting ordinary course plans and reports from the Board of Directors and CEOs should be sufficient to provide staff with highly relevant information with important market context for other submitted documents and information, including the Overlap Description, without overwhelming the current level of staffing devoted to premerger review.

In addition to limiting the people who must provide plans and reports, the Commission has also determined that these documents are not required for select 801.30 transactions. As discussed above, select 801.30 transactions are those where the Commission believes that certain requirements of the final rule are unlikely to provide information necessary to determine whether that transaction may violate the antitrust laws. Not requiring plans and reports for HSR Filings of select 801.30 transactions is another way the Commission is lessening cost based on the lower likelihood that the transaction may violate the antitrust laws.

Other commenters mentioned that responsive plans and reports are unlikely to contain only information about the specific products or services offered by the other filers and this requirement would thus sweep in irrelevant information. One such comment noted that the material received would contain much irrelevant material that would lack sufficient probative value. The Commission disagrees that requiring the plans and reports at issue will generate irrelevant documents. Based on the Agencies' experience, plans and reports, taken as a whole, are highly relevant to staff's analysis of the nature and scope of product or service markets, geographic markets, competitors and competitive dynamics in the industry, new or potential entrants that could mitigate competition concerns, among other key considerations that could determine whether the transaction may violate the antitrust laws. Documents that were created in the ordinary course of business and not solely for the purpose of evaluating the transaction frequently contain important discussions about development efforts for non-commercial products or services or explain competitive dynamics in a broader way that would reveal ways that the transaction could impact non-horizontal competition. In addition, they may identify potential entrants or emerging threats, or discuss other potential acquisition targets. In the Agencies' experience, such plans and reports provide market facts and long-range assessments that bear directly on whether the transaction is one that may violate the antitrust laws in ways described in section II.B.4. Staff has routinely requested that filers provide these documents on a voluntary basis during preliminary-phase investigations, however, because of the voluntary nature of the request there is no requirement that filers produce all or even any of these materials.

Moreover, the modifications the Commission has made to the final rule ensure that the plans and reports are relevant to understanding the nature and extent of existing competition between the merging parties. The only filers who must provide these documents are those involved in transactions in which both parties provide the same types of products or services or that are known to be under development. The Commission acknowledges that these plans are also important to investigate competitive effects in transactions involving supply relationships but has limited this request in the interest of administrability, efficiency, and reducing cost. Transactions between two entities that currently compete (or have pre-revenue products in development that will result in direct

[351] In the final rule, the Commission adopts the suggestion of one commenter to limit plans and reports to those provided to the CEO but declines to seek another round of public comment before finalizing this requirement as modified. Another commenter suggested that the Commission only require these documents that were provided to the board and not to the CEOs. The Commission declines to adopt this suggestion because it believes that excluding CEOs would prevent the Agencies from having the type of relevant information that is routinely provided to senior leaders related to markets with overlapping products and services. Based on its cumulative experience in collecting these types of documents during merger investigations, the Commission has determined that it is necessary and appropriate to collect a limited set of plans and reports that were provided to the highest level of decision-makers, including the CEOs, because they contain important context for conducting the Agencies' initial antitrust assessment of the transaction.

competition soon) typically warrant a close look during the initial waiting period. For these transactions, filers need provide only the plans and reports that discuss market shares, competition, competitors, or markets for those overlapping lines of business created within a year of filing. This is exactly the kind of information the Agencies rely on to determine whether to investigate a transaction during the initial waiting period because it provides key information about the competitive landscape at issue in the transaction. While the Commission acknowledges there may be select portions of these responsive documents that do not contain relevant information, it is often the case that responsive documents contain non-responsive portions. Therefore, the Commission adopts this requirement with a clarification that the relevant products and services are those that both the acquiring person and target produce, sell, or are known to be developing.

One commenter explained that this requirement means filers must self-assess the products and services in which they overlap, and filers may disagree on the existence or degree of the overlap. The Commission agrees that this requirement requires a self-assessment by each party and does not expect that the products and services that are identified in the Overlap Description by each filer will always align, since the acquired person may not have complete information about all the products and services that the acquiring person offers or is developing. The Commission expects that the acquiring person, through its normal diligence of the target, will have a more fulsome understanding of the target's products and services, including those under development. However, as discussed in section VI.I.1., filers should not exchange information with each other when responding to the Overlap Description and each filer may refer to any submitted business document that supports the analysis of overlaps contained in the Overlap Description. In this way, the Commission expects that the analysis of markets reflected in the submitted plans and reports will be reflected in each party's assessment of overlaps contained in the Overlap Description. As is currently the case with a filer's identification of overlapping NAICS codes and for the new requirement to provide an Overlap Description, the Commission will rely on the good faith of the filer to provide accurate information.

Another commenter explained that ordinary course documents not prepared for the transaction are arguably outside the HSR statutory mandate because the Commission had previously declined to adopt a proposal to include such ordinary course documents. The Commission's 1976 proposal had contemplated filers providing, among other items, copies of studies, surveys, analyses, and/or reports prepared by or for the company in the three years before filing, which contain information regarding market shares, competition, competitors, markets and more in relation to any product or service currently made or sold by the other filing party. The Commission states that merely because it declined to require the submission of ordinary course documents with the HSR Filing in the past does not mean it lacks the authority to do so now. The Commission believed that it had the statutory authority to require ordinary course documents in 1976 when it first set up the premerger review program but determined that excluding these types of documents was unlikely to impede effective premerger review.

The Commission believes that it is now necessary and appropriate to require such documents to be submitted with the HSR Filing. As discussed in section II.B., many aspects of the economy, deal structure, and technology have changed dramatically since Congress passed the HSR Act. Based on their experience, the Agencies know that ordinary course documents often contain important horizon-scanning discussions, including market intelligence about other competitors in the market or emerging competitive threats, and that these high-level plans and reports provide important information about the competitive dynamics that may be affected by the transaction. Indeed, these documents often identify other competitors, including their strengths and weaknesses, and this information is highly probative of the competitive assessment of the transaction. Moreover, with the practical limitation to collect and submit only documents that were shared at the highest levels of management—those provided to the CEO or the Board of Directors—the Commission believes the final rule carefully balances the burden of this requirement (for the parties and the Agencies) in light of their clear relevance to the antitrust assessment of the transaction.

One comment noted that requiring plans and reports would be inconsistent with international jurisdictions' merger control regimes. However, the Commission does not find the issue of varying international jurisdictions' document requirements for government merger review dispositive. Each jurisdiction establishes, for itself, the information needed for the particulars of their laws, economies, and priorities. The Commission relies on its own experience in enforcing the U.S. antitrust laws, in light of binding precedent, to assess the most relevant and probative information to determine whether an acquisition may violate those laws. Based on its own experience and expertise in enforcing the U.S. antitrust laws, the Commission has determined that due to the changes in corporate structure and market dynamics described in section II.B., it is now necessary and appropriate to collect a limited set of plans and reports with the HSR Filing.

A smaller set of comments stated that the terms used in the new proposed requirements were vague and unclear. For example, one comment said that the proposed instructions do not provide a clear definition of ''semi-annual and quarterly'' or ''plans and reports,'' which creates uncertainty and compliance risks for filers. Another comment said that the expanded requirements will create uncertainty because they do not directly reference the transaction under review or documents shared during the due diligence process, which would lead filers to make subjective determinations as to which materials are responsive.

The Commission disagrees that there is uncertainty or ambiguity about what is responsive. As stated in the NPRM, regularly prepared plans and reports are high-level strategic business documents created not in contemplation of the transaction but in the ordinary course of business within one year of filing and that are prepared at regular intervals. Responsive plans and reports will discuss market shares, competition, competitors, or markets of any product or service that is provided by both the acquiring person and acquired entity, if those documents were shared with a CEO of an entity involved in the transaction, or of any entity it controls or is controlled by. Targeting documents that discuss market shares, competition, competitors, or markets tracks similar language in Item 4(c) of the current HSR Form, which in the Commission's experience is familiar to many filers and uses phrases that are known to businesspeople. The NPRM references to semi-annual and quarterly rely on standard terms that are routinely used in document requests sent to filers and third parties by the Agencies during their investigations. In the interest of clarity, however, the Commission notes that regularly prepared documents

include those that are produced at regular intervals, such as ''annual'' (once a year), ''semi-annually'' (two reports or plans each year), and ''quarterly'' (once every quarter or every three months). To help resolve any remaining uncertainty, the Commission clarifies that regularly prepared plans and reports are those that are prepared by the filers in the ordinary course and at regular intervals and does not include special reports prepared for a specific purpose. Filers should submit one year's worth of annual, semi-annual, or quarterly plans or reports provided to a CEO but do not need to submit plans or reports that are produced more frequently, such as monthly or weekly. The Commission clarifies that filers should submit all plans and reports provided to the Board of Directors and not only those that are regularly prepared. These documents, which were shared at the highest level of decision-making, may include special reports if they contain responsive material.

Yet other commenters were concerned that requiring plans and reports would raise confidentiality concerns, forcing filers to disclose potential transactions to employees before they are ready to do so. As modified, this requirement alone would not lead other personnel to become aware of the transaction prematurely. The Commission believes that plans and reports can be obtained from these CEOs and Board members in a way that does not necessitate divulging the transaction to other executives and businesspeople who do not otherwise know about the pending transaction. Finally, the Commission notes that plans and reports are also not required in filings for select 801.30 transactions.

Certain comments that opposed the requirement to submit plans and reports also offered suggested modifications. One of these comments recommended that the Commission tailor the requirements to clarify that it is limited only to the filing party's products and services in the United States and that filers need only produce documents, or portions thereof, that discuss specifically identified subject matter. Certain comments agreed that the Commission should allow filers to redact non-responsive materials from these documents. The Commission declines to adopt these suggestions because it finds that allowing filers to redact non-privileged information or information related solely to matters outside the United States on the basis of relevance would introduce too much uncertainty into the value of these documents, leaving Agency staff with incomplete, piecemeal material. Agency staff is experienced with reviewing documents that contain relevant as well as non-relevant content and the Commission believes it is important for documents be produced as they were shared with the relevant decision-makers, properly redacted for privilege only.

The Commission also considered alternatives proposed by commenters. One commenter explained that the Agencies could request filers to submit these documents on a voluntary basis, because those requests are narrowly tailored and have historically followed initial substantive discussions between filers and Agency staff. When used in combination with withdrawing and refiling, this process would provide the Agencies, the commenter said, with at least 30 days to review and analyze strategic plans before issuing Second Requests. The Commission disagrees that it is sufficient to continue to obtain plans and reports on a voluntary basis after staff has identified that they are needed because there is no obligation for filers to comply, substantially or minimally, with such a request for information prior to the expiration of the initial waiting period. In the Agencies' experience, even when parties are asked to provide these documents on a voluntary basis, they are often do not provide them prior to the end of the first review period (either 30 or 15 days) and often choose to pull and refile their notification in order to submit these and other materials that were requested on a voluntary basis. Moreover, in the Agencies' experience, these particular documents contain important information that is currently missing from the HSR Filing that would identify the transaction as one that requires a closer look.

Another comment suggested that Agencies could get these documents using Second Requests as they do now. While either Agency can obtain these documents through the issuance of Second Requests, the Commission believes that the probative value of these documents makes them necessary for staff's initial screening assessment, both because they can identify different areas of antitrust risk, including for areas of future competition, and because they may contain additional information about the business lines of interest that may alleviate the need to issue Second Requests or narrow their scope. As discussed above, because issuing Second Requests is time- and resource-intensive for both the parties and the investigating agency, is it not a substitute for having additional information in the HSR Filing that minimizes the need to issue Second Requests at all. Having additional relevant and targeted information on the front-end benefits both the Agencies and the parties because it allows the Agencies to focus on the most concerning transactions, and allows parties to avoid Second Requests when they are not warranted, and thereby avoid unnecessary expense and delay.

Finally, certain comments discussed earlier also suggested not adopting the proposed requirement at all. In light of the Agencies' experience with the probative value of high-level ordinary course documents and their belief that having them would provide necessary context to other material submitted with an HSR Filing, the Commission declines to dismiss the requirement altogether. The Commission believes this final rule, as modified, reflects a reasonable balancing of the importance of these documents to a premerger assessment and the burden of requiring them for any transaction where filers have overlapping business lines. The Commission has in considered the specific concerns raised by comments and tailored the requirement to preserve the important benefit to the Agencies while mitigating the cost to filers (and to the Agencies).

3. Organizational Chart of Authors

As the final part of its Business Documents section, the Commission proposed requiring an organizational chart(s) that would reflect the position(s) within the filing person's organization held by identified authors and, for privileged documents, recipients of each document submitted with the HSR Filing. The Commission also proposed requiring the filer to identify the individuals searched for responsive documents. The Commission does not adopt this proposal.

The Commission received several comments opposing this proposed instruction, with commenters noting that many companies do not maintain these types of organizational charts in the ordinary course of business, and to the extent they do, such charts are often incomplete or inaccurate. According to one commenter, such charts would need to be prepared solely for the purpose of the HSR Filing, which would be time-consuming. Other commenters pointed out that authors of certain documents may not even be employees of the filing entity, thereby complicating the certification of the filing.

In addition, multiple commenters questioned the Agencies' need for organizational charts to determine whether to issue a Second Request. As one commenter noted, it is unclear why organizational charts will assist staff in

assessing whether a particular transaction merits further review as opposed to their value for identifying potential custodians for a potential Second Request.

As to the proposed requirement to identify the individuals searched for responsive documents, one commenter stated that parties may claim privilege on information regarding whose files were searched. Another commenter observed that, for the majority of HSR filings, documents are identified through targeted self-collection, directed and overseen by legal counsel, rather than running Second Request-style searches through custodial files. The same commenter cautioned that the proposed disclosure requirement would disincentivize companies to err on the side of over-collection so as not to raise a red flag to the Agencies or suggest that the persons searched should be custodians in a Second Request.

Finally, as an alternative to providing an organizational chart, one commenter suggested requiring parties to identify the person who supervised the drafting and the person to whom that drafter directly reports.

After considering the comments and weighing the benefit to the Agencies during the initial waiting period in light of the cost of complying, the Commission does not adopt this proposal. As discussed in section VI.A.3., elsewhere the final rule requires filers to identify authors of documents if the filer has identified a NAICS overlap, product or service overlaps in the Overlap Description, or a supply relationship in the Supply Relationships Description. The Commission has determined that author information is not relevant for all filers and that limiting author information in this way provides sufficient benefit to the Agencies while reducing the cost for filings without such relationships.

In sum, the Commission has determined that the requirements to submit business documents contained in the final rule are necessary and appropriate to enable the Agencies to identify transactions that may violate the antitrust laws and to provide important information about each party's view of market realities and that these requirements, as modified, have been tailored to reduce the cost of submitting responsive documents as much as practicable.

H. Agreements

The Commission proposed an Agreements and Timeline section to require filing persons to provide a term sheet or draft agreement that reflects sufficient detail about the proposed transaction to demonstrate the transaction is more than hypothetical, if a definitive agreement has not been executed. In addition, the Commission proposed additional changes to require the submission of the entirety of all agreements related to the transaction and a new requirement to submit other agreements between the filing persons that are not related to the transaction, as well as a timetable for the transaction. As discussed below, the Commission adopts some proposals with modification and does not adopt the requirement to submit a timeline.

1. Transaction-Specific Agreements

The Commission proposed requiring filing persons to produce all documents that constitute the agreement between the acquiring person(s) and the person(s) whose assets, voting securities, or non-corporate interests are to be acquired, inclusive of schedules, exhibits, and the like, that relate to the transaction, regardless of whether both parties to the transaction are signatories. Further, consistent with the proposed changes to § 803.5, the Commission proposed requiring the most recent draft agreement or term sheet, if filers were not submitting a definitive agreement. The Commission adopts the requirements with modification.

Currently, only the production of certain schedules is required, although many filers do provide schedules regardless. As noted in the NPRM, in the Commission's experience, the structure of transactions has become increasingly complex, often comprising not only multiple agreements between the filing persons but also agreements with third parties. Understanding the entirety of the transaction, including but not limited to non-competition and non-solicitation agreements and other agreements negotiated with key employees, suppliers, or customers in conjunction with the transaction, is crucial to determining the totality of the transaction and assessing during the initial waiting period the transaction's potential competitive impact.

The Commission received one comment in support of this proposal. The State antitrust enforcers wrote in support of the request for non-competition agreements, noting that non-compete clauses that bind employees post-employment prevent new businesses from emerging and stifle entrepreneurship and innovation. One commenter opposed the proposal, noting that this requirement will significantly increase the burdens for filers and recommended requiring that notifying parties provide a descriptive index of such agreements from which investigating staffs could identify specific agreements that they require (with translations if needed). Another commenter expressed the concern that, as written, the proposed instruction would capture clean-team agreements, used by merging parties to reduce the antitrust risk associated with exchanging competitively sensitive information, as well as confidentiality agreements that include similar antitrust safeguards, and that in doing so this proposal might have unintended effects. The commenter cautioned that in response some parties might forgo using clean-team agreements entirely, on the thinking that including a clean-team agreement in the HSR filing would signal a larger competitive concern than actually exists.

The Commission finds that having the complete set of documents that will govern the transaction is necessary to understand the potential effects of ''the transaction.'' Therefore, it does not adopt suggestions to provide an index in lieu of the actual documents that constitute the agreement. In the Commission's experience, voluntary production of documents can delay the review of transactions within the initial waiting period. The Commission does limit the requirement to those agreements that will be in effect on and after closing, with the intention of excluding agreements such as clean team agreements. The Commission also adopts the clarification, discussed in section V.D., that the requirement relates to the transaction that the parties intend to consummate.

The Commission also proposed requiring that, if there is no definitive executed agreement, the filing parties provide a copy of the most recent draft agreement or term sheet that provides sufficient detail about the scope of the entire transaction that the parties intend to consummate. As discussed in section V.D., the Commission is modifying the proposed instructions in response to certain comments that requested clarification. One commenter sought clarity on what constitutes ''sufficient detail'' about the scope of the transaction, noting that certain transaction details are often not fully determined at the time of signing a definitive agreement or filing HSR, but also may not be necessary to determine whether to issue Second Requests. The same commenter cautioned that the proposed requirement will likely cause undue delays and risk unnecessarily increasing the overall timing to close a transaction especially in instances where parties intend to file on the basis of a letter of intent.

To address this concern, the Commission has revised the Instructions to describe what would be sufficient:

> some combination of the following terms: the identity of the parties; the structure of the transaction; the scope of what is being acquired; calculation of the purchase price; an estimated closing timeline; employee retention policies, including with respect to key personnel; post-closing governance; and transaction expenses or other material terms.

The Commission notes that these examples are meant to be illustrative and not exhaustive.

2. Other Agreements Between the Parties

The Commission proposed requiring filing persons to submit all agreements between any entity within the acquiring person and any entity within the acquired person in effect at the time of filing or within the year prior to the date of filing. The Commission adopts the proposal with a significant modification to reduce the burden that would have been associated with producing copies of these agreements with the HSR Filing.

As explained in the NPRM, understanding the scope of any existing contractual relationships between the filers, such as an existing customer-supplier relationship, would materially assist the Agencies' review by revealing any business interactions or relationships that exist prior to the transaction and that may be affecting premerger competition, which is material to assessing how the transaction may affect post-acquisition competition.

The Commission received two comments in support of the proposed requirement. The State antitrust enforcers noted that it would shed light on any licensing or supply agreements, as well as any non-compete agreements, between the parties. A union commenter also supported the request and suggested expanding it for certain non-compete and non-solicitation agreements. The commenter noted that the filing parties might have such agreements related to the products, but these agreements might be with third parties and not between the filing persons. In addition, the same commenter suggested requiring parties to submit copies of collective bargaining agreements, at least with any common unions.

Several commenters, however, objected to the burden the proposed requirement would impose, particularly in industries where companies rely heavily on agreements with other industry participants to do business. One commenter noted that broadband and telecommunications providers routinely have myriad agreements with each other, covering a wide range of aspects of the services they offer. The commenter stated that many, if not most, of these agreements have little potential to create competition concerns, and in fact many are pro-competitive. Another commenter stated that, in the wireless communications industry, some pairs of wireless carriers might have up to 1,000 agreements to which they are both parties.

A few commenters recommended modifications of the proposed instruction to reduce the burden. One commenter suggested relying on the Competition Descriptions or excluding de minimis agreements and only requiring ''Material Other Agreements,'' which would be defined as exceeding in value some percentage of entity revenues. Another commenter recommended only requiring the production of three categories of pre-existing contracts between the acquiring person and the acquired entity or assets: (i) noncompete agreements in effect within one year of filing, (ii) non-solicitation agreements in effect within one year of filing, and (iii) supply or license agreements that generated annual revenue of $10 million or more within one year of filing. The commenter also suggested clarifying that purchase orders do not need to be produced, nor do contracts that have expired or terminated before the filing date. A third commenter also recommended limiting the requirement to contracts that are material in terms of dollar value. In addition, the commenter proposed that notifying parties be permitted to exclude standard-form agreements that they use with numerous other counterparties.

In light of the comments, the Commission has made significant modifications to this proposal. First, the Commission has determined that only one party need provide this information; in accordance with its general approach, the Commission has determined to require only the acquiring person to indicate if there are existing agreements between the parties. Second, the acquiring person will not be required to provide the agreements, but rather only to answer whether any such contractual agreements exist and, if so, to indicate via checkbox which types. The Commission has identified specific types of agreements that reflect a significant business relationship that is relevant to the premerger assessment: agreements with non-compete or non-solicitation terms; leases, licensing agreements, master service agreements, operating agreements, or supply agreements. If the there are other types of agreements, the acquiring person should indicate ''other.'' The Commission clarifies that these are agreements that the parties have with one another and which may affect the antitrust assessment of the reported transaction.[352] Third, the Commission has limited the requirement to those agreements that are between the acquiring person and the target, rather than the acquired person. This is the specific relationship that is of interest to the Agencies for the premerger assessment and should limit the information to those agreements most relevant to that analysis. These limitations should provide the Agencies with sufficient information to screen for transactions that may require further review due to existing contractual obligations, while relieving much of the cost associated with the requirement.

3. Timeline

The Commission proposed that filing persons provide a narrative timeline of key dates and conditions for closing. After careful consideration of concerns raised by commenters, the Commission does not adopt this proposal.

In the NPRM, the Commission reasoned that, just as it is critical for the Agencies to understand the totality of the transaction during the initial waiting period, it is critical to understand the timing of key milestones and the conditions to closing, which are often complex and not easily understood from the transaction documents themselves. The Commission suggested that this basic information would help the Agencies understand key deal milestones and better manage the timing and focus of the investigation during the initial waiting period.

The Commission received a few comments expressing general support for the proposal; however, one commenter raised concerns regarding the burden, noting that the proposed

[352] For example, a non-compete or non-solicitation agreement between two otherwise independent companies is indicative that the parties may have a competitively significant relationship, and in certain situations, may violate the antitrust laws. *See, e.g., United States* v. *Brown,* 936 F.2d 1042 (9th Cir. 1991). In a merger context, non-compete restrictions can implicate post-merger competition in ways that violate the antitrust laws. *See, e.g., In re ARKO Corp.,* No. C–4773 (F.T.C. Aug. 9, 2022) (final decision and order); *In re DTE Energy Co.,* No. C–4691 (F.T.C. Nov. 24, 2021) (decision and final order). Other agreements between the parties, including those related to distribution or licensing, can limit competition post-merger in ways that may violate section 7, including by increasing the risk of foreclosure. *See, e.g., FTC* v. *Tempur Sealy Int'l, Inc.,* 4:24–cv–02508 (S.D. Tex. filed July 2, 2024) (complaint) (alleging that buyer attempted to use existing distribution relationship to exclude rival mattress brands premerger).

requirement is broader and more onerous than the interrogatory that staff routinely requires during in-depth investigations. The same commenter suggested that this instruction be limited to requiring a brief description of the timetable for the transaction and a brief description of any termination fees, break-up fees, ticking fees, or similar arrangements.

After considering the comments and weighing the benefit to the Agencies of requiring a deal timeline in light of the cost of compliance presented by commenters, the Commission is not adopting this proposal. Even though the Agencies would benefit from knowing the timeline for the transaction to help manage their time and investigative resources during the initial waiting period, the Commission does not adopt the proposed change to require one. In the Agencies' experience, these timelines can change throughout the course of an investigation, although not typically within the initial waiting period. The decision not to require a timeline is one of the ways in which the Commission aims to lessen cost on all filers of preparing an HSR Filing and staff can continue to ask for (or parties can choose to provide) this relevant information when warranted.

In sum, the Commission has determined that the requirements for the transaction agreement and information about other types of agreements between the parties contained in the final rule are necessary and appropriate to enable the Agencies to understand the scope of the transaction as well as any existing business relationship that might be affected by the transaction and that these requirements, as modified, have been tailored to reduce the cost of reporting as much as practicable.

I. Competition Descriptions

The Commission proposed a new Competition Analysis section in the Instructions to require filers to provide three categories of narrative responses: (1) an Overlap Narrative, (2) a Supply Relationships Narrative, and (3) Information related to Labor Markets. As proposed, filers would provide, among other things, a description of their basic business lines as well as product and service information for all related entities; identify current and potential future overlaps and supply relationships between the filing persons; and provide information about their employees and what services these employees provide in areas where both parties employ the same types of workers. As noted in the NPRM, this information would supply crucial information about existing and future competitive relationships between the filing parties, which is the starting point for any assessment of whether the transaction may violate the antitrust laws.

As discussed in detail below, in the final rule the Commission does not adopt requirements related to Labor Market Information, and adopts requirements to submit an Overlap Description and a Supply Relationships Description with significant modifications. On the Form, this section is now labeled Competition Descriptions.

The Commission received several comments that supported the introduction of narrative responses. One commenter strongly supported the collection of information in narrative form related to products, services, workers, supply and distribution relationships, licensing, and industry and geographic overlaps, believing that this information is necessary to help the Agencies evaluate the effects of an acquisition more thoroughly and efficiently, and identify potential threats to competition. Another commenter suggested that pre-acquisition disclosure of vertical linkages is necessary for antitrust agencies to effectively assess the potential anticompetitive impact of these non-horizontal acquisitions. Another noted that, while HSR rules have always required parties to identify downstream products and revenues by NAICS and NAPCS codes, they have never required the disclosure of any information at all about input markets, including those for labor. It stated that this lack of information leaves initial filing screeners at a loss to spot these competition issues and potential violations, and further noted that this omission forces investigatory staff scrambling to ask companies to volunteer such critical input market information. The same commenter stated that the proposed rule would help narrow this information asymmetry and empower the Agencies to clearly identify impact in both output and input markets.

The Commission also received several comments that objected to the collection of this information in narrative form. In general, comments asserted that expansive narrative requirements are arbitrary and capricious because they would change HSR notification from an objective task to a subjective task, creating delays, disputes, and uncertainty with no countervailing benefit especially for those deals where no antitrust issues are present. For a number of reasons discussed in detail below, the Commission disagrees, but has nonetheless modified these requirements as appropriate to tailor them to their relevance in determining whether the transaction may violate the antitrust laws and warrant a Second Request.

Experience With Narratives

The Agencies have extensive experience reviewing narrative responses to requests for voluntary submissions from the filing parties during the initial waiting period (and to other types of investigative demands where responses can be compelled) and are aware of the effort required to produce them. From this experience, the Commission knows that when the parties submit this information on a voluntary basis during the initial waiting period—and it is complete and timely—narratives that discuss existing business relationships between the parties are critically important to determining whether there is a need to issue a Second Request. In the Agencies' experience, voluntary narrative responses are especially helpful in focusing any potential Second Request on the areas of competition most in need of in-depth review but just as often can lead staff to conclude that no Second Request is necessary. As discussed above in section III.A.2., when the Agencies engage with the parties during a withdraw-and-refile investigation, which typically involves the submission of some narrative responses from the parties, the transaction is more likely to proceed without the need for a Second Request.

But voluntary narrative responses often come late in the initial waiting period and are frequently incomplete. More importantly, staff only asks for additional information on a voluntary basis when it has determined, on the basis of other information contained in the HSR Filing, that the transaction may alter existing competitive conditions in a way that may violate the antitrust laws but that more information is needed. As discussed in section II.B., the current information requirements do not surface the facts that would flag transactions for certain types of violations, and for those filings staff has no basis to know that additional information is needed. Where there are deficiencies in the initial information requirements, resorting to collecting information on a voluntary basis does not cure the deficiency because staff will not know that relevant facts exist to flag the transaction for follow up.

The Commission believes that requiring additional information with the HSR Filing that would reliably reveal any existing business relationships between the filers is

necessary and appropriate to enable the Agencies to determine whether an acquisition may, if consummated, violate the antitrust laws. Because the information called for in the Competition Descriptions is provided directly by the parties to the transaction and is reflective of each filer's business operations, it is highly probative and reliable for the purpose of conducting a quick and thorough premerger assessment of existing and future business relationships between them. The information collected on the current Form does not reveal these relationships, yet these are the relationships that are foundational to flagging whether the transaction is one that warrants a closer look. As discussed in sections II.B.3. and 4., the need is especially great for information related to potential non-horizontal concerns because there is currently no information that specifically identifies existing supply relationships. Information about existing supply relationships will fill critical information gap in the current Form and provide a factual basis for the Agencies to screen for potential non-horizontal impacts during the initial waiting period.

Nonetheless, to make clear that the Commission does not require the parties to submit an antitrust analysis akin to a ''white paper,'' or hire counsel or experts simply to create narratives for the purpose of an HSR Filing, the Commission eschews the use of the term ''narratives'' and instead adopts the term ''description'' to better reflect the type of answer that is required. Filers should rely on business personnel to describe the products and services they offer (or that are under development) using terms and language that is natural in the marketplace. Given the breadth and tone of the objections to the proposed narratives, the Commission believes that commenters misunderstood what is sought. The Commission intends to collect factual information about overlaps and supply relationships via a written answer (as opposed to documents or data) but is not seeking opinions or arguments about what those facts should imply. While in other contexts a narrative response may contain opinions, tell a story, or take a position, the final rule does not require any of that from filers. Instead, filers should collect and report the type of information it provides to customers, suppliers, investors, or the public for purposes other than an antitrust analysis—to simply describe the products or services it offers for sale. This is the type of basic business description required by the final rule, and the Commission adopts with terms Overlap Description and Supply Relationships Description to address concerns that the final rule requires something other than that. Moreover, the Instructions ask filers to provide a brief description in an attempt to discourage lengthy responses or unnecessary commentary beyond what is strictly required. [353]

The Overlap Description is a key reform and is motivated by the Commission's experience over time with relying on NAICS codes to identify areas of horizontal competition. Based on its experience reviewing narrative responses submitted on a voluntary basis during the initial waiting period, the Commission has identified problems with relying exclusively on NAICS code overlaps as the basis for screening whether the merging parties are current competitors. While NAICS codes are well suited for reporting in some sectors, the Commission agrees that NAICS codes can be both overinclusive and underinclusive in reflecting whether the parties offer competing products or services to any set of customers. As discussed in section II.B.4., when it comes to certain sectors of the economy that are undergoing technological change or growth, including through the introduction of novel products or services, NAICS codes are especially unhelpful, and have not been updated to reflect current market offerings.

The mismatch between existing NAICS codes and market realities can be most acute in new sectors of the economy, for which there are not many codes. For instance, NAICS code 518210 is for companies that provide computing infrastructure, data processing, web hosting, and related services, which covers businesses as diverse as those providing data entry services, cloud storage services and cryptocurrency mining.[354] Included in this six-digit NAICS code are a whole array of businesses offering complex and evolving products, some of which may compete for the same customers but some of which surely do not. Adding further complexity, the Census Bureau provides cross-references to fourteen other NAICS codes with related business lines. This single category is very broad, potentially reflecting ''competition'' between the parties that does not exist in the marketplace. As a result, each filer in a transaction may report revenues in 518210 reflecting an ''overlap'' in their respective business lines, when in reality they offer very different products or service.

These cross-references create a different but equally vexing problem. For instance, NAICS code 541511 is for companies that offer custom computer programming services to meet the needs of a particular customer while NAICS code 513210 is for companies primarily engaged in software publishing. Here, a company that provides both standard and custom solutions may report revenues only in 513210 even if some of the companies it competes with would only report revenues in 541511, reflecting its focus on custom products. Overall, companies select their own NAICS codes for revenue reporting, introducing discretion into the use of this ''objective'' system of classification, which was established for a purpose other than identifying companies that offer competing products or services. As a result, companies that may regularly compete against one another may not identify any overlapping NAICS codes.

Despite these shortcomings, the Commission will continue to rely on NAICS code reporting for revenues and the identification of overlaps to give filers some common system of reference and because the identification of horizontal overlaps is a key screening step in the Agencies' initial antitrust assessment. But new sectors have emerged over the years and NAICS codes have not been refined or updated. Accordingly, the Commission has determined that receiving overlap information in description provided by the filer is necessary and appropriate to enable the Agencies to determine whether an acquisition may, if consummated, violate the antitrust laws. The Agencies may also use the Overlap Description to conclude that the parties are not current or future rivals because the exercise provides filers with an opportunity to correct any ''false positives'' that result from inaccurate reporting of NAICS revenue overlaps. As a result, the Overlap Description may contain a factual basis for the Agencies to determine, solely on the basis of information contained in the HSR Filing, that the transaction is not likely

[353] A significant number of filers who report NAICS overlaps initiate contact with the Agencies to provide supplemental information (often in the form of white papers) that supplies context for how they view competition, regardless of NAICS reporting. In the Agencies' experience, these presentations often contain descriptions of the parties' respective business operations as well conclusions that the parties would like the Agencies to reach to dismiss concerns about the transaction. The former is now required by the final rule while the latter is not.

[354] *See* U.S. Census Bureau, North American Industry Classification System, 51280 Computing Infrastructure Providers, Data Processing, Web Hosting, and Related Services (rev. Sept. 10, 2024), *https://www.census.gov/naics/?input=518210&year=2022&details=518210*.

to violate the antitrust laws at that time. In the Overlap Description, a filer can make clear that further investigation is unnecessary. Allowing the agencies to reach these conclusions at the outset is more efficient than having the parties provide the information at a later stage or requiring the Agencies to discover this information indirectly through document requests.

As the Commission acknowledged in the NPRM, the cost to filers to create these descriptions could be significant, especially for transactions involving close competitors with multiple overlapping product or service lines or those who operate in the same supply chain. But identifying those transactions that present broad and complex competition issues is a critical first step for the Agencies, and information from these descriptions is highly relevant to flagging the transaction as one that may violate the antitrust laws. Thus, the cost of providing these descriptions is proportional to the likelihood that the transaction is one that warrants a close look: the more extensive the existing competitive relationship between the parties, the more relevant these relationships are in identifying the transaction as one that warrants further investigation. It is also possible that these descriptions will provide important context for other information contained in the HSR Filing that would allow the Agencies to narrow any potential investigation to those areas of important existing or future competitive interaction, or to conclude that the transaction is not one that is likely to violate the antitrust laws. Thus, the descriptions are necessary and appropriate for the Agencies to assess the potential for anticompetitive impacts, including some indication of their scope. This information will also permit the Agencies to manage their resources appropriately, increasing overall efficiency. For example, if the Overlap Description identifies hundreds of products or services, the Agencies can devote sufficient staff resources to reviewing those areas of overlap to determine whether any rise to the level of requiring a Second Request investigation. On the other hand, if the notification identifies no areas of overlap, the Agencies may be able to quickly determine whether there are other materials in the filing that would nonetheless raise concerns about the competitive impact of the transaction.

It is appropriate for the filers to bear the burden of providing basic business information that they possess. It is unreasonable and inefficient to require the Agencies, who do not possess basic information about the filers' businesses, to expend resources gathering the information from outside sources, or to require the Agencies to issue a separate request for this critical information which only delays the review process and in turn the filers' ability to consummate transactions. Yet the status quo requires the Agencies to obtain basic business facts that are needed to evaluate transactions through voluntary requests to the parties or Second Requests. As one commenter noted, the Federal Rules of Civil Procedure encourage Federal courts to order civil discovery based on the obvious principle that the person already in possession of the information is in the best position to provide it, and properly so.[355] This principle is apt here.

The Commission also believes that parties will be able to reduce the cost of creating descriptions by drafting them during the period of due diligence when the companies are learning more about their respective business operations. Discovering the extent of existing business operations is key to the diligence process, and companies often create descriptions of their operations as part of the process.[356]

The Commission has made every effort to calibrate its need for the requested information and the availability of that information from the parties or from others, including the cost to filers associated with collecting information and creating the descriptive responses. For this reason, as discussed below, the Commission has decided to significantly modify certain aspects of the proposed descriptions, for instance when the information is duplicative of other information in the notification or when the information is available from a source other than the parties. In taking this approach, the Commission rejects alternatives suggested by commenters to reduce the cost by excusing transactions below a certain value or without a NAICS overlap, because it has found no basis for doing so. In the Agencies' experience, deal value is not a reliable indicator of the potential for antitrust harm,[357] especially when the transaction involves multiple business lines or when competition occurs in local markets.[358] Instead, the Commission has determined to excuse select 801.30 transactions from the requirement to provide Competition Descriptions. As discussed in section VI.A.1.f., these transactions rarely involve entities with existing competitive relationships and do not confer control, and thus the Commission has determined not to require these filers to provide descriptions of any existing business relationships, should they exist.

The Commission now turns to a discussion of both the general and specific objections to the Competition Descriptions requirements.

General Objections to the Competition Descriptions

Several commenters questioned the general utility of these requirements. One commenter suggested that burdening all filers with these descriptive requirements is not particularly well targeted to identifying acquisition-related antitrust concerns. Another stated that the information called for is duplicative of documentary materials that are now also required. Two other commenters suggested that the Commission continue to ask for this information on a voluntary basis and only for deals that have been flagged for closer review.

The Commission disagrees that the information required by the Competition Descriptions would be of little use or contain repetitive information. Requiring filers to provide a description of their existing competitive relationships is a key reform of the final rule to make the premerger review process more effective and efficient. Such descriptions should contain a factual summary of the parties' existing business relationships, which is critical information for identifying those transactions that require a closer look. This is information that is known to filers and bears directly on whether the transaction may violate the antitrust laws. The Commission has determined

[355] Fed. R. Civ. P. 26(b)(1) advisory committee note (2015) (identifying information asymmetry as a justification for placing a heavier burden on the party who has the information).

[356] When establishing the premerger regime, the Commission acknowledged that requiring information in the notification may actually reduce the cost associated with compiling it. 42 FR 39040, 39043 (Aug. 1, 1977).

[357] *See, e.g., United States* v. *Neenah Enterprises, Inc.,* No. 1:21–cv–02701 (D.D.C. Oct. 14, 2021) (complaint) ($110 million asset purchase); *In re Global Partners LP,* No. C–4755 (F.T.C. Mar. 2, 2022) (decision and final order) ($151 million acquisition); *In re ANI Pharmaceuticals, Inc.,* No. C–4754 (F.T.C. Jan. 12, 2022) (decision and final order) ($210 million acquisition); *United States* v. *Grupo Verzatec S.A. de C.V.,* No. 1:22–cv–01401 (N.D. Ill. Mar. 17, 2022) (complaint) ($360 million acquisition). Note that the value of the transaction is considered by some filers to be confidential information and is not always disclosed in public filings. *See FTC* v. *IQVIA Holdings Inc.,* No. 1:23–civ–06188 (S.D.N.Y. Dec. 29, 2023); *In re Lifespan Corp.,* No. C–9406 (F.T.C. Feb. 17, 2022) (complaint).

[358] *See, e.g., In re The Golub Corp.,* No. C–4753 (F.T.C. Jan. 20, 2022) (decision and final order) (divestiture of 12 supermarkets); *United States* v. *B.S.A. S.A.,* No. 1:21–cv–02976 (D.D.C. Mar. 15, 2022) (divesture of two business lines).

that it is necessary to require this descriptive information from filers because other information in the HSR Filing is not sufficient to screen transactions for all types of potential harm, and, as discussed above, staff cannot rely solely on voluntary collection of this information to flag the transaction for a closer review.

Moreover, as discussed elsewhere, the Commission intends to rely on information in the Competition Descriptions as the basis for determining whether the filer also has to provide other information required by the final rule. The Commission has determined that, for many additional information requirements, these descriptions (in addition to the NAICS code overlap reporting) will determine the scope of most of the other information requirements in the HSR Filing. It is appropriate for the Commission to condition additional information requests on the identification of an existing business relationship as the most effective way to calibrate the cost of reporting the antitrust risk associated with each transaction. In order to reduce the cost for filers whose transactions raise little to no antitrust risk, it is necessary that all filers go through the exercise of determining whether they are in a horizontal or supply relationship with the other party. Those filers who do not have such relationships will so indicate by responding ''none'' and will be relieved of the obligation to respond to other questions that are conditional on an affirmative response. Relying on this conditional response format is a key feature of the final rule to ensure that filers who do not have an existing business relationship with the other party (*e.g.,* as a competitor or supplier) have a lower cost associated with submitting an HSR Filing.

One commenter stated that because these descriptions are not prepared in the ordinary course, they cannot be required to be submitted with the notification. Further, this commenter stated that Congress only intended the Commission to collect information and documentary materials reasonably available to the reporting companies, suggesting that anything not kept in the ordinary course of business runs afoul of Congressional intent. The Commission disagrees with the commenter's reading of both the statute and the legislative history. The rulemaking provision in 15 U.S.C. 18a(d) contains no ordinary course limitation. To the contrary, it states that HSR filings shall be in such form and contain such documentary material and information relevant to a proposed acquisition as is necessary and appropriate to enable the Agencies to determine whether an acquisition may, if consummated, violate the antitrust laws. The commenter quotes the Commission's 1977 Notice of Proposed Rulemaking for the premerger notification rules when making this assertion, but in that notice, the Commission did not state that information reasonably available was limited to ordinary course documents.[359] Further, the Competition Narratives as adopted do not require any information that is not kept in the ordinary course of business of the acquiring or acquired person. These descriptions require parties to gather and present this information in a format that will permit the Agencies to understand their lines of business, areas in which the parties offer similar products and services, and relationships in the relevant supply chains.

The Commission also disagrees that businesses do not develop an understanding of their business operations in comparison to those of the other merging party ''in the ordinary course.'' In the Agencies' experience, businesses routinely conduct competitive assessments in which they compare their operations to those of others. These internal assessments of other market participants are often done long before any specific assessment of a particular transaction and may be contained in documents such as plans and reports. In the specific context of a proposed transaction, parties (especially those that are publicly traded) conduct due diligence assessments of prospective targets. These comparative assessments may be done specifically for the purpose of analyzing the filed-for transaction, and the Commission considers those to be in the ordinary course of acquisition planning. The descriptions required by the final rule would summarize these types of assessments and reflect their underlying business facts. In the Commission's view, this is exactly the type of materials the House conferees intended would be submitted with the notification: ''the very data that is already available to the merging parties, and has already been assembled and analyzed by them. If the merging parties are prepared to rely on it, all of it should be available to the Government.''[360]

Compliance Concerns

Some comments expressed concern that the descriptions would create HSR Act compliance issues, noting that, because the descriptions require subjective judgments, the Agencies have no objective standards or precedent against which compliance or substantial compliance could be judged. One commenter suggested that each of the descriptions may generate disagreements between the Agencies and the merging parties regarding the accuracy or completeness of the information provided, leading the Agencies to retroactively declare a notification to be incomplete and restarting the initial waiting period. One commenter stated that the descriptive responses will require extensive iterative discussions with PNO to determine compliance, which will delay the start of the waiting period. Others asserted that the Commission could deem a descriptive answer to be incomplete simply because staff disagrees with the assessment, or that the Agencies may be tempted to second-guess or nitpick the parties' responses, leading to uncertainty about deal timelines.

As discussed above, the Agencies have decades of experience with reviewing descriptive responses, including those submitted on a voluntary basis during the initial waiting period and in response to Second Requests. In fact, staff routinely seeks this information as the first supplement to the information contained in the HSR Filing for any transaction that is identified as requiring a closer look. But the current practice of permitting parties to submit descriptive responses on a voluntary basis while the waiting period is underway has encouraged parties to submit incomplete responses or submit them at a time when staff is unable to verify the information before it must make a determination whether to issue Second Requests. Any deficiency in a voluntary descriptive response prevents staff from being able to quickly determine whether the Agency should issue a Second Request to require a more complete narrative answer.

The Commission believes that requiring Competition Descriptions to be submitted with the HSR Filing provides the proper incentive for filers to submit a complete and accurate response, one that is certified by the responsible executive who signs the notification and that is available at a time when the information can be reviewed and assessed by staff. The certification allows the Commission to accept filings containing descriptive responses and to start the waiting period. If, upon reviewing the notification, staff determines that the

[359] 42 FR 39040, 39043 (Aug. 1, 1977).

[360] 122 Cong. Rec. 30877 (1976) (remarks of Rep. Rodino).

descriptive responses are directly contradicted by other information submitted with the notification, staff may request supplementary information to explain the contradictions, which could require a restarting of the waiting period. If the notification contains no such materials that call into question the reliability of the descriptions, any supplementary submissions to clarify or correct them would likely not require a restarting of the waiting period under the Act.

Other comments raised compliance concerns related to who must help prepare the information. Some comments stated that the descriptive responses will require filers to hire expensive antitrust counsel, and possibly an expert economist, to draft the descriptions prior to filing. According to one commenter, filing parties will be forced to engage antitrust counsel, economists, and other professional class consultants on every deal, regardless of its impact on competition. Another commenter suggested that hiring consultants to draft narratives may be prohibitive for some parties that may be most in need of a merger or affiliation. One comment noted that, as a practical matter, the only people who are eligible to certify the notification often lack personal knowledge necessary to opine about things like the relevant product market definition or the competitive effects of a transaction. The Commission disagrees that filers need to hire outside personnel, who do not know the filer's business operations and would need to be given the very information that the Competition Descriptions call for in order to draft them. As noted in the NPRM, those who author the descriptive responses should be the individuals who best know the business of the filing person. The Commission reiterates that the Competition Descriptions should be based on a businessperson's understanding of the filer's business operations and consistent with other business documents and materials submitted with the HSR Filing.

Other comments raised a related point, stating that the type of detailed, competitively sensitive information necessary to draft these narratives is often deliberately kept away from the business executives, which would require certain filing parties to employ antitrust safeguards to collect information without sharing confidential business information with or about one another. Several commenters asserted that providing customer contact information, including identifying specific individuals for Agency outreach, would create significant uncertainty and further increase the risk that confidential acquisition plans would be known more widely, or increase the risk of insider trading.[361]

As discussed in the section below, the Commission agrees that it is important to reduce the need to share information about the transaction more broadly than is necessary to complete an HSR Filing, but rejects the idea that companies are unfamiliar with managing these risks or that the rule would significantly increase them. Also, complying with securities laws to prevent insider trading in public shares is an obligation of every publicly traded company, and the rule does not increase the risk that those with knowledge of the deal will violate those laws. Nonetheless, in response to these concerns, as discussed below, the Commission has determined to modify certain requirements for the Competition Descriptions in order to reduce the need for filers to share information outside of the company, for instance with customers or suppliers. The Commission agrees that the process required to collect information for the notification should not require information-sharing beyond what is absolutely necessary. Specifically, the Commission has added to the instruction a statement that the parties should not exchange information for the purpose of responding to the Overlap or Supply Relationships Descriptions. The acquiring and acquired persons should each respond on the basis of information known to them in the ordinary course of their business or through normal transaction diligence. The Commission understands that, unlike the NAICS overlap identification, the filings may not identify the same products and services in the Competition Descriptions. This may require those contemplating a transaction to plan for limits on the flow of information about the deal, including ''clean teams'' and data rooms with limited access, but the Commission believes filers have experience with managing these risks and employ protections to prevent the sharing of information or disclosing knowledge of the deal beyond these limits. The Commission has determined that the requirement to prepare descriptive responses does not increase the risk that those protections will be breached or that filers will be required to change their approach to comply with the final rule. To the extent that this process reveals existing business relationships of which either or both parties were not aware, this is an appropriate outcome of requiring this analysis to be done prior to filing.

Another group of comments raised compliance concerns related to taking an affirmative position on specific elements of an antitrust violation, such as the definition of relevant markets and any competitive effects, impermissibly shifting the burden of proving such elements of an antitrust violation to the parties. For instance, one commenter read the rule as not requiring filers to define a relevant market or provide market shares but nonetheless objected that filers lack the benefit of established competition law principles to guide the scope of their responses. Others suggested that the Commission adopt the practice of the European Union and other regimes and make available written decisions about market definitions.

As stated in the NPRM, the Commission does not intend for the Competition Descriptions to contain an assessment of relevant markets or reference any ''market.'' The Commission understands that the determination of a relevant antitrust market is a fact-bound process that is the result of extensive information gathering, including from third parties (who may be other participants in the ''market''). Information contained in the notification has never been, and never could be, sufficient to determine whether a relevant antitrust market exists in which the transaction could potentially cause harm. Rather, the Commission intends the identification of competing products or supply relationships to be a statement of business fact, not a conclusion that there is a relevant antitrust market that comprises an area of effective competition.[362] The Agencies recently

[361] Commenter American Securities Association states that certain aspects of the proposed rule would require public companies to announce and file details with the SEC about signed deals, ''creating additional hurdles that will test investor confidence.'' Comment of Am. Sec. Ass'n, Doc. No. FTC–2023–0040–0682 at 2. Because the final rule does not change who is required to file notification under the Act, there are no new obligations to disclose transactions nor to make statements to the SEC. To the extent that this comment is based on a concern that the Agencies may flag additional deals as requiring Second Requests because they may determine that a particular transaction may violate the antitrust laws, that is the intention of the final rule and well within the Commission's authority under the Act, regardless of filers' obligations to make statements required by the securities laws.

[362] A party responding to an interrogatory under Rule 33 of the Federal Rules of Civil Procedure ''must furnish information that is available to it and that can be given without undue labor and expense,'' and a party must ''provide relevant facts reasonably available to it but should not be required to enter upon independent research in order to

Continued

released updated Merger Guidelines that contain a detailed discussion of how and why the Agencies undertake the exercise of defining markets.[363] Thus, the Commission disagrees that filers are unable to understand how information about whether and to what extent the merging parties are direct competitors factors into the Agencies' initial antitrust assessment.

Comparison to Other Jurisdictions

Some comments suggested that the Commission is improperly attempting to model the U.S. premerger notification regimes on those in other jurisdictions. The Commission rejects this suggestion. The purpose of this rulemaking is to maintain a premerger notification regime that fulfills the Agencies' congressional mandate to vigorously enforce the U.S. antitrust laws and prevent undue concentration in its incipiency. As the Commission noted in the NPRM, many other jurisdictions rely on submissions from the parties that contain basic information about business lines or company operations, and several require the parties to self-report overlaps.[364] The Commission expects that the burden on filers (or their counsel) with experience drafting these submissions for other jurisdictions will be comparatively low because of their familiarity with such drafting. This does not mean that the Commission is relying on the experience of other jurisdictions in enforcing their laws. Rather, the Commission is simply noting that the prevalence of descriptive requirements among other competition enforcers supports its belief that, for some filers, preparing descriptive responses is not a new exercise or overly burdensome. The Commission further notes that other businesses might be familiar with preparing a business plan or conducting a market research and competitive analyses, which would contain much of the same information as is required by the narratives.[365]

One commenter stated that pharmaceutical transactions are not acquisitions of other companies but instead involve exclusive licenses, which are not reportable in other jurisdictions. As a result, according to this commenter, the descriptive requirements introduce an entirely new and significant burden that will fall disproportionately on parties to pharmaceutical transactions. The Commission disagrees that there will be a measurably different impact on pharmaceutical companies. As discussed above, the requirement to submit Competition Descriptions is not dependent on having prepared similar materials for other jurisdictions, and there are many kinds of transactions that are not reportable in other jurisdictions for which the parties will now be required to submit a descriptive response. In addition, the Commission has no reason to exempt pharmaceutical licensing deals from any requirements of the Act because these transactions, like other reportable transactions, can raise antitrust concerns.[366] As the D.C. Circuit found when it upheld the Commission's authority to require the reporting of pharmaceutical licensing transactions, the Act does not prevent the Commission from adopting rules of general applicability and the Commission can rely on its experience in reviewing HSR Filings to adjust the HSR rules.[367] Certain sectors have more reportable transactions, but the Commission is not imposing different requirements on any sector. Nor should it remove information reporting requirements for those sectors where there are more reportable transactions merely because more companies in those sectors are involved in reportable transactions. Moreover, the Commission believes that complying with the Competition Description requirements for transactions involving licensing agreements will be less costly than for other types of transactions because those transactions are fairly limited in purpose as they relate to uses for the licensed technology.

After careful consideration of the comments raising general objections to requiring descriptions of existing business operations of the merging parties, the Commission has determined to require Competition Descriptions in the final rule due to the benefit they would provide to the Agencies. These responses will provide the Agencies with key information that is necessary to determine whether an acquisition, if consummated, may violate the antitrust laws. It is appropriate for filers to provide this information because they are in the best position to do so. Competition Descriptions will allow the Agencies to conduct a fact-based assessment of the antitrust risks posed by each transaction, rather than expend time and resources issuing voluntary access letters and Second Requests for information that bears directly on the determination that further investigation is warranted. Nonetheless, in light of the concerns expressed by commenters, the Commission has made significant modifications to these requirements to better calibrate the information that would be most beneficial to the Agencies while reducing the cost as much as practical, including excusing select 801.30 transactions from these requirements.

1. Overlap Description

The Commission proposed a new Overlap Narrative section that would require each filing person to provide an overview of its principal categories of products or services (current and planned) as well as information on whether it currently competes with the other filing person. The Commission further proposed that each filing person would describe its current and planned principal categories of products and services in a way that those business lines are referred to in the company's day-to-day operations, and identify any documents submitted with the HSR Filing that support information contained in the narrative. For each identified overlapping product or service, the Commission proposed that the filing person would also provide sales, customer information (including contacts), a description of any licensing arrangements, and a description of any non-compete or non-solicitation agreements applicable to the employees or business units related to the product or service.[368]

The Commission received numerous comments on this requirement. As one commenter noted, the Commission's original proposal in 1977 would have required a filer to identify its top five most significant competitors for overlapping operations. The Commission did not adopt this proposal, as well as other proposals, not because they were improper, as suggested by this commenter, but because the Commission determined at the time that it was important to reduce

[368] NPRM at 42196.

the overall burden of complying with notification requirements,[369] which were unfamiliar to the M&A business community at that time. After forty-five years of experience with reviewing thousands of transactions each year, the Agencies are now well aware of the importance of understanding who the parties view as their competitors, especially if that group includes the other merging party, because it is relevant to whether the transaction may violate the antitrust laws.[370] The need for this self-identification of competitors has grown over time as NAICS codes and other information do not always provide a consistent and reliable benchmark for filers, resulting in over- or under-reporting of competitive overlaps. In this rule, filers are merely required to describe each of the principal categories of products and services they offer, and list and describe each product or service that they both provide to the market. The Commission believes that in light of the shortcomings of other more objective reference points, it is necessary to require filers to identify whether they offer products or service that compete with the other filing party.

Several comments pointed to the burden of providing an Overlap Description for all filings. For instance, one commenter stated that the proposal lacks a relevance test or de minimis threshold so that companies will be required to delve deep into complex corporate structures to identify individual products and services offered by their subsidiaries. Another raised concerns that providing a detailed analysis of competitive dynamics in each of these theoretical segments, particularly in transactions that are occurring in manifestly competitive environments, is wasteful and unduly burdensome.

As discussed above, in light of concerns about the cost this requirement places on all filers, the Commission has modified its proposal in several ways to reduce the cost on filer. First, it has decided to limit the requirement to report planned or future products to those referenced in another document submitted with the HSR Filing. The Commission has also eliminated the requirement to provide an estimate of how much of the product or service each customer category purchased or used monthly for the last fiscal year. And rather than require reporting for the two most recent fiscal years, the Commission has limited reporting to the most recent fiscal year. In addition, the Commission has decided not to require sales information in units—only dollars. It has also eliminated the requirement to provide individual contact information for customers. Additionally, the Commission has eliminated the requirement to describe licensing agreements and non-compete or non-solicitation agreements in this section. These changes are discussed in greater detail in the sections that follow. Finally, the Commission has decided not to require Overlap Descriptions for select 801.30 transactions. In the Commission's experience, these filings almost never report overlaps on the basis of NAICS codes and there is no reason to think that requiring this class of filers to provide a descriptive confirmation would provide a benefit to the Agencies that would enhance premerger screening of this particular set of transactions.

At this time, the Commission lacks a basis to excuse other categories of filings either on the basis of complexity of the filer's corporate structure or the general robustness of competition in the markets in which the filers compete. In fact, complex corporate structures can make it much harder for the Agencies to discover competing lines of business from any source other than the filers. When information in the HSR Filing is inconclusive, staff often must try to discover these existing relationships based on imperfect information from public sources, the parties' submitted documents, and other sources of market information, such as third parties. Requiring filers to provide a description of any overlap is a much more direct, efficient, and reliable way to get this critical information because it will be coming from the parties. If the parties are aware of other companies that also provide products or services that compete, they can (but are not required to) provide that information as part of their descriptive response. If this requirement creates a significant cost to filers, it is due to their significant pre-acquisition business relationships, meaning that the effort to provide the description is directly proportional to the risk that the transaction may violate the antitrust laws.

After careful consideration of the comments, the Commission has made significant modifications to the Overlap Description to reduce the cost to filers while also providing a factual basis for identifying whether the filing parties are actual or potential competitors. This information will improve Agency decision-making during the initial waiting period. Modifications reflected in the final rule are discussed below.

a. Identification of Current or Future Overlaps

The Commission proposed that each filing person provide a brief overview of its principal categories of products and services (current and planned) as well as information on whether it currently competes with the other filing person. As noted in the NPRM and discussed above, such information is core to the Agencies' substantive antitrust analysis during the initial waiting period and is not readily accessible from sources other than the filers themselves.[371] A comment from State antitrust enforcers supported the requirement for additional information about present and potential horizonal competitive overlaps, noting that State antitrust enforcers are particularly concerned with acquisitions of potential or nascent competitors and the protection of rivalrous innovation. As fellow enforcers of the Federal antitrust laws, they noted that most research and development (''R&D'') pipelines are known only to the companies and that disclosing current or known plans, including R&D efforts, up front would ensure effective deal reviews. They noted that, at times, deals that appear benign may mask significant anticompetitive effects lurking below the surface. Sophisticated incumbent companies have a greater incentive and more developed means to detect industry developments—and a correspondingly far-reaching ability to curb competition in ways that harm consumers.

As discussed in section II.B.4., the Agencies currently lack a sufficient basis from information in the notification to determine if the transaction is likely to violate the antitrust laws by eliminating on-going innovation competition, a potential competitor, or a nascent competitive threat that has yet to make sales. Without information that indicates there are known areas of competition based on expected revenues, this will continue to be a blind spot that results in less-than-optimal enforcement on this basis. Because these areas of potential or emerging competition are typically not well-known to others uninvolved in the transaction, the Agencies do not have a source for this information other than the filing parties.

The need for information related to planned products and services is especially important for transactions in which one (or both) filers already have

[371] NPRM at 42196.

a dominant position and the other party has planned products that could soon be introduced to the market to provide some level of competition to the dominant player. According to the State antitrust enforcers, acquisitions of potential or nascent entrants may empower already dominant incumbents to discontinue either the target firm's or its own innovation, thereby eliminating existing and future competition between the merging parties and information supplied by the Overlap Description is critical for the Agencies to analyze acquisitions affecting potential competition or present rivalrous innovation.

Other commenters object to the requirement to identify overlaps based on planned products or services under development by the other party. One pointed out that many companies have a pipeline of product ideas that may or may not result in an actual product sold to customers. Others indicated that in the pharmaceutical and biotechnical sectors, this information would be speculative at best for many ongoing R&D initiatives. The Commission acknowledges that the assessment of when a planned product or service will start generating revenues is likely imprecise, and that products in development often do not meet important deadlines for commercial release. But the Commission disagrees that companies with extensive R&D pipelines are unfamiliar with these drawbacks or that imprecision prevents them from having target launch dates based on their best information. In the Agencies' experience, companies with ongoing product development efforts routinely adjust expected timelines to commercialization based on new information. In particular, as part of preparing for the transaction, many of these companies prepare an assessment of the target's products, including products in development. Products in development can compete with other products in various stages of commercialization, forming the basis for antitrust liability in certain circumstances.[372]

Nonetheless, to provide an objective reference point that would determine whether a filer would need to include a product in development as part of its descriptive response, the Commission modifies this requirement to limit the reporting of current or known planned products or services to those that are reflected in documents submitted with the filing. This limitation should serve to reduce the cost and increase the certainty that the planned product or service is likely to be introduced. In particular, plans and reports provided to the CEOs and Boards of Directors and submitted with the HSR Filing would likely provide a solid reference point for filers to determine if the planned product is sufficiently likely to meet targets for commercial introduction because it is discussed in these high-level reports shared with key decision-makers.

In addition to the objections discussed above, several commenters objected to the specific requirements of identifying overlaps or customers based on sales information, which might include sales generated in markets outside the United States. One commenter stated that the requirement to provide historical information should be limited to sales and customers from U.S. operations and should be further limited to sales information based solely on sales by dollars, not additionally by units. The Commission declines to limit the Overlap Description to U.S. sales information. Many transactions every year involve industries whose companies compete on a global basis such that the relevant antitrust markets in which they compete are broader than the United States or involve facilities or customers that are located outside the United States.[373] Having this information is critical to the Agencies' assessment during the initial waiting period.

The Commission agrees with the other modification suggested by one commenter to limit this requirement by reporting revenues only based on sales by dollars and not also by units. As the commenter notes, in many service sectors such as healthcare or professional services, the concept of ''units'' is arbitrary and estimates would be both burdensome and unreliable. The Commission believes that it is less costly for filers to rely on only one measure of sales and that reporting by other measures in addition to sales often does not lead to different results. Thus, the Commission does not adopt the requirement to report sales based on units in addition to dollars and limits the reporting of sales and customer information only to dollar sales.

To further reduce the cost of collecting data to support the Overlap Description, the final rule requires the reporting of sales data only for the most recent fiscal year, down from the last two years as proposed. This limitation parallels other reporting requirements that are similarly limited to the most recent fiscal year.

The commenter also suggested that, in order to prevent the sharing of information between existing competitors that would inadvertently increase the risk of anticompetitive coordination, the information required by the Overlap Description be limited to information within the knowledge, information, or belief of the person filing. The Commission confirms that filers should prepare the Overlap Description based on the knowledge and belief of the filing person.

b. Customer Information

The Commission proposed that, for each principal category of products and services and each overlapping product or service, filers (a) describe all categories of customers, including an estimate of monthly sales or purchases in each category; (b) contact information (including the individual's names, title, phone, and email) for the top 10 customers (based on units and sales) for the last year, and the top 10 customers in each customer category.

Some individual commenters supported this proposal, urging the Agencies to take steps to better understand the impact of acquisitions on those most affected by them, including customers. Other comments raised concerns about the type and amount of information collected about customers, as well as the risks associated with identifying them in an HSR Filing, including providing individual contact information. One commenter asserted that the Agencies' stated intention to contact customers during the initial waiting period raises serious confidentiality concerns and places a transaction at considerable risk. Another commented that there may be legitimate business justifications for not disclosing a potential transaction internally or to commercial partners at the time of filing, and requiring specific contact information practically necessitates such disclosures to maintain employee and customer relations. According to another commenter, for the vast majority of transactions, customer information is not required to make an assessment that the transaction requires Second Requests, and thus the Agencies should

continue to ask for customer contact information on a voluntary basis only when it may be necessary.

After considering these comments and others, the Commission modifies the amount of information required in the Overlap Description related to customers but has determined that some information related to customers is important for the initial antitrust assessment of the transaction. The Agencies will continue to reach out to customers in order to get their input and reactions to reportable transactions as time and resources allow during the initial waiting period regardless of whether they are referenced in the notification. Contacting customers to learn about the business lines of the filing parties is often the very first thing staff does to begin the investigation of a potentially problematic transaction. As discussed in section III.C.1., the Agencies routinely contact many customers of the filing parties, often without the filing parties' knowledge, during the course of an investigation, especially if the initial waiting period is prolonged by a withdrawal and refile.

There is nothing improper about the Agencies' contacts with third parties to learn facts about the industry or the operations of the filing parties. The HSR Act contains strict limits on the disclosure of information submitted or collected during an investigation,[374] and unauthorized disclosure carries criminal penalties.[375] At all times during the investigation, Agency staff comply with these requirements. For example, when contacting customers or other market participants, Agency staff may disclose that the agency is conducting a nonpublic investigation of the proposed transaction, but Agency staff will not disclose any information contained in an HSR Filing without a waiver.

Although collecting more information from filers in the HSR Filing should reduce the Agencies' reliance on contacting third parties to learn basic business facts about the merging parties, conducting outreach with third parties is an essential task of premerger screening to ensure that the Agencies' antitrust assessment fully considers any potential impact of the transaction on other market participants.[376] Because transactions may not have been publicly disclosed, it is imperative that the Agencies initiate contact with third parties and not wait for them to reach out. The Agencies routinely conduct public research to learn about customers for potential outreach, regardless of whether the filing parties have provided their contact information. Moreover, customer information is typically in the agency's first request to filers to submit additional information on a voluntary basis during the initial waiting period. At times, filers have anticipated this voluntary request and provide this information quickly, sometimes the same day. However, this is not universally true and any delay in obtaining this information about top customers is inefficient and undermines the Agencies' ability to conduct third-party outreach. While the Agencies may be able, on their own, to identify some customers of the filing parties, it is important that such third-party outreach also include those customers most affected by the transaction, that is, those customers who are most reliant on the filing parties to conduct their own business.

Nonetheless, in light of concerns about identifying particular individuals as customer contacts, the Commission does not adopt that requirement as proposed. Instead, the Commission modifies the requirement so that filers must identify customers by company name without providing contact information for any individual employed by the company. The Commission believes that company contact information has value even without knowing the name or title of the individual at the customer business that is most knowledgeable about the existing business relationship with the filer. Moreover, knowing which companies are top customers provides important context to determining whether any particular customer may be affected by the elimination of competition between the parties and is additional information beyond knowing what the overlapping product or service is.

To further reduce the cost of providing information related to customers, the Commission has modified this requirement so that filers do not have to estimate monthly purchases or sales by customer category as proposed. Filers will be required to describe all categories of customers without providing specific sales or purchase estimates by category. Simply describing categories of customers will enable the Agencies to determine if there are unique end-uses for the product, possibly reflecting some degree of non-uniform demand that would indicate limits on substitutability across different customers. Qualitative descriptions of customer categories are sufficient for the Agencies to determine, at a preliminary stage, whether demand is segmented, a fact that is important for gauging potential competitive effects of the transaction. Relatedly, this additional information may help eliminate or reduce antitrust concerns if the parties serve very different customers or customer categories.

With these significant modifications, the Commission adopts the requirement that filers providing an Overlap Description also include some information about customers for those products or services.

c. Descriptions of Agreements With the Other Filing Party

The Commission proposed that as part of the Overlap Description, for each overlap product or service identified, filers would provide a description of certain competitively significant agreements between the filing parties, such as licensing arrangements and any non-compete or non-solicitation agreements applicable to employees or business units related to the product or service.[377]

One commenter supported the collection of information related to existing agreements between the filing parties because it may be relevant to an assessment of whether something short of a full merger may be sufficient to enable the parties to realize the potential procompetitive benefits of a transaction without potential competitive harm. No commenter specifically objected to this particular requirement of the Overlap Description. However, in light of objections to the overall cost of the final rule, the Commission does not adopt this proposal at this time. Instead, the Commission believes that the requirement, discussed in section VI.I.1, to indicate via check boxes whether certain types of agreements exist between the acquiring person and target will alert the Agencies to transactions that may require further investigation.

2. Supply Relationships Description

The Commission proposed to require each filing person to provide information about existing or potential purchase or supply relationships between the filing persons. This description would require filers to describe each product, service or asset (including data) that the filer sold, licensed or otherwise supplied, to the other party or to any other business that, to the filer's knowledge or belief, uses its product, service, or asset to compete with the other party's products or services, or as an input for a product or

[375] *See* 18 U.S.C. 1905, 15 U.S.C. 50.

[376] Some commenters believe that the Agencies have been insufficiently attentive in the past to those most affected by harmful consolidation.

[377] NPRM at 42196.

service that competes with the other party's products or services.[378] Similar information is required for purchases from the other party. According to the NPRM, this information would allow the Agencies to identify whether the transaction would create opportunities for post-acquisition foreclosure of rivals arising from vertical or diagonal relationships.[379] As discussed in section II.B.3., current information requirements do not provide a factual basis to alert the Agencies that there is an existing supply relationship that might require a closer look to determine whether the transaction is likely to violate the antitrust laws.

As noted in the NPRM, in the past the Commission had required filers to provide similar information about vertical vendor-vendee relationships, but the requirement was eliminated in 2001; since that time, filers have provided no specific information related to existing vertical or other supply relationships. Several commenters objected to including this information again, noting that vertical concerns will not be a feature of most transactions, and information related to these issues is more appropriate for a Second Request once the Agencies have determined that the transaction genuinely raises vertical foreclosure concerns. One commenter stated that information about sales to and purchases from non-transacting parties has limited, if any, relevance to the transaction and is thus outside the scope of the Act. Another noted that concerns about unwinding already-consummated transactions that motivated the Act are not present in non-horizontal transactions, and urged the Agencies to exempt purely non-horizontal transactions from the reporting requirements of the Act on that basis.

Other commenters supported the reintroduction of the requirement to report information related to key supply relationships, suggesting that descriptive responses should provide a more accurate and complete basis for screening transactions. One commenter commended the Commission for recognizing the need to request information about input markets and noted the historical lack of such information has resulted in an information asymmetry between the Agencies and filing parties. Others identified industry-specific concerns related to non-horizontal implications of acquisitions. One commenter cited the example of the seed industry, commenting that to understand market power in that industry the Agencies must have information regarding the unique supply, distribution, and licensing dynamics that are present. Another commenter discussed the proposal's impact on private equity firms, claiming it is common for firms to have portfolios that include upstream and downstream segments, a structure that can incentivize preferential treatment between portfolio companies in ways that disadvantage rivals.

State antitrust enforcers also supported the need to better understand any supply relationships, including through the collection of information regarding data assets. They explained that the merger of two firms' complementary data sets can create, augment, and maintain market power. As antitrust enforcers, they stated that they also seek to understand how the target's data can be combined with the buyer's, and whether the combined data can be used to leverage power into further applications. To fully account for the potential that the combination of the buyer's and seller's data could be leveraged into additional applications, the State antitrust enforcers recommended the Commission consider whether these requests should be expanded beyond the related purchases and related sales narrative.

After considering the concerns raised by commenters on both sides, the Commission has determined that the final rule will require, once again, the submission of information related to supply relationships. Contrary to assertions that the Agencies rarely challenge, and even more rarely prevail against, non-horizontal acquisitions, the Agencies have blocked several non-horizontal mergers since 2021 and have another challenge pending review.[380] The Commission specifically rejects the suggestion that the final rule exempt non-horizontal mergers from the reporting requirements of the Act. Such an exemption would abrogate the Agencies' direct Congressional mandate not to ignore mergers that do not involve horizontal competitors. With the 1950 amendments to the Clayton Act, Congress made clear that section 7 applies not only to mergers between actual competitors but also to vertical and conglomerate mergers.[381]

The Commission observes that mergers that create a risk of non-horizontal concerns are more varied in their effects, with the over-arching concern being the risk that the transaction provides the merged firm with the ability and incentive to foreclose rivals. According to controlling precedent, there are myriad ways in which the merged firm could engage in foreclosing behavior, such as by making late deliveries or subtly reducing the level of support services.[382] In light of that variety of potential mechanisms, it is important to have some basis to assess whether the transaction creates a risk that the merged firm may limit access to products or services that its rivals use to compete.[383]

Some commenters questioned whether, as a practical matter, filers will be able to gather the information required by the Supply Relationships Description. For instance, one commenter stated that providing this information would require filers to create a new tool for tracking related sales and purchases, while another noted that, especially for retailers who are often ''price takers,'' there may be no need internally for conducting this type of analysis, meaning it would be undertaken solely to comply with the Act for reporting transactions. Two other commenters stated that this narrative is duplicative of document requests and thus should be eliminated.

The Commission disagrees that the new Supply Relationships Description requires special reporting tools or is duplicative of document requests. In the Agencies' experience, documents submitted with the HSR Filing often do not contain references to key suppliers or purchasers, or the documents do not

provide sufficient context to understand whether the merged firm will have the ability to foreclose key inputs in violation of the antitrust laws. Nor does the Commission agree that companies are unaware that they are in an existing supply relationship or that there would be no records for a company to determine that it has purchases from or sales to another company. As with the Overlap Description, requiring filers to provide a brief description of any sales or purchase relationship is a much more direct, efficient, and reliable way to get this critical information because it will be coming from the parties and does not require staff to interpret references in documents to these types of relationships. Even given the expansion of document requirements in the final rule, this specific information that describes an existing business relationship in the same supply chain is unlikely to be revealed in transaction-specific documents or those generated in the ordinary course. This is especially true because the Supply Relationships Description requires each filer to identify whether it supplies not just the other party but a different company that competes with the other party.

Two commenters urged the Commission to narrow the scope of the required information by adopting a limitation for de minimis levels of related sales or related purchases, for example by restricting requirements to those related sales or purchases generating over $10 million in U.S. revenue in the past fiscal year. One commenter noted that the pre-2001 reporting for vendor-vendee information was limited to transactions between the parties and to purchases or sales over $1 million, and stressed the need for the Agencies to establish a similar objective criteria to guide filers and avoid reporting thousands of routine or competitively benign purchases. Another commenter questioned the need for the Commission to revive a request that it deemed insufficient as a screen for potential non-horizontal relationships.

After careful consideration of these comments, and in light of the Commission's intention to reduce cost wherever practical, the Commission has made several modifications to the Supply Relationships Description. As with the Overlap Description, the Commission declines to exclude information related to sales outside the United States. Here too, such an exclusion is not justified for the significant number of transactions for which sales occur outside the United States and yet the transaction has sufficient nexus to the United States to require reporting. Nonetheless, the Commission has determined that the rule should include a de minimis exclusion to reduce the cost of collecting information related to competitively insignificant sales or purchases. The final rule excludes reporting unless the product, service, or asset (including data) represented at least $10 million in revenue. In order to ensure that the de minimis exclusion does not cause filers to underrepresent their own production or capacity to supply the market, the de minimis amount is inclusive of internal transfers within the filing person. That means that when applying the de minimis exclusion, the filer should include the value of the product that it supplies to itself because that reflects the filer's ability to meet the demand for the product. For example, if the acquiring firm sells Product X to the target, when calculating the total revenue for Product X to determine whether Product X represents at least $10 million in revenue, the filer must include its own consumption of Product X and sales of Product X to anyone else. If all of the filer's sales (including internal sales) of Product X represent less than $10 million in revenue, the filer does not need to respond to the Supply Relationships Description for sales of Product X.

As with the Overlap Description, several commenters objected to the Supply Relationships Description on the grounds that it is subjective and burdensome and that it would require premature disclosure of the deal or improperly shift the burden of proving an antitrust violation from the Agencies to the filing parties. Accordingly, the Commission has determined to make similar modifications to the Supply Relationships Description as it did for the Overlap Description, in order to reduce the cost of reporting. Specifically, the final rule limits the reporting period to the most recent fiscal year and requires reporting for sales only in dollars, not also in units. It also eliminates the requirement for contact information for individuals at customers or suppliers, requiring only the identity of the company to limit the risk of inadvertent disclosure. With these modifications, the Supply Relationships Description will provide a factual basis to determine whether the transaction requires a closer look to assess the risk of foreclosure, while minimizing the cost as much as practicable.

3. Labor Markets Information

The Commission proposed creating a new Labor Markets Information section within the Instructions that would require each filing person to provide certain information about its workers in order to screen for potential labor market effects arising from the transaction. As noted in the NPRM, the Agencies have increasingly recognized the importance of evaluating the effect of mergers and acquisitions on labor markets.[384] Yet, as noted in section II.B.2., the Agencies' HSR Form does not collect information from filers about their employees or the type of work that their employees do that would allow the Agencies to identify the parties as competitors for certain labor services, raising challenges for the effective enforcement of section 7 to protect competition that benefits workers.[385]

Within the Labor Markets section, the Commission proposed requiring each filing person to (1) provide the aggregate number of employees for each of the five largest 6-digit Standard Occupational Classification (SOC) codes; (2) identify the top five largest 6-digit SOC codes in which both parties employ workers, and for each of these SOCs, list the overlapping ERS-defined commuting zones and the total number of employees within each commuting zone; and (3) identify any penalties or findings that were issued against the acquiring person or acquired entity by the DOL's Wage and Hour Division, NLRB, or OSHA during the five-year period before the filing.[386]

The Commission received many comments focused on the labor market proposals. Several commenters, including hundreds of individual commenters, supported the Agencies' attention to the potential for merger-induced harm in labor markets and the requirement that parties submit information about their employees for premerger screening. Supportive commenters stated that filers have sophisticated legal and accounting personnel and systems to minimize the burden on the companies of collecting and reporting employee information. Other commenters asserted that requesting labor market information in the earlier stages of merger review would lead to a more efficient and uniform process that could result in the Agencies' termination of the HSR waiting period prior to the end of the initial 15 or 30 days in a greater number of mergers where no labor market issues exist.

[384] NPRM at 42197.

[385] 15 U.S.C. 18.

[386] NPRM at 42197–42198.

Other commenters, including law firms, private equity and venture capital groups, and industry groups, raised broad objections to the Commission's proposal to collect labor market information in the HSR Form. These organizations argued that the effort required by the Labor Markets section would be significant and would greatly increase costs for companies wishing to engage in reportable transactions. Moreover, they argued that this increased burden was not justified by the utility of the employee information required by the proposed rule for antitrust screening. Some commenters stated that the increased burden of complying with these reporting requirements would have a chilling effect on transactions.

In light of the comments, as well as the Agencies' recent experience in identifying and investigating transactions that may harm competition for workers, the Commission has determined not to require specific information about employees at this time. After considering several options to collect worker information that would be specific enough to allow the Agencies to screen for potential labor market effects without unduly burdening filers, the Commission has determined that the Agencies will rely on other information required by the final rule to identify transactions that require an in-depth investigation for potential labor market effects. This includes the new Competition Descriptions, which together will provide the Agencies with a better understanding of the premerger competition between the merging parties. The Commission believes that this information is likely to reveal those transactions where the filers are likely to compete for workers that do the same or similar types of jobs because they supply similar or related products or services. In addition, the new document requirements, including plans and reports and additional transaction-related documents, should reveal whether the parties view themselves as competing for labor services. From these documents, as well as a description of the rationale for the transaction from the buyer, the HSR Filing should reveal whether the buyer anticipates any impact on workers or labor costs as a result of the transaction.

The Commission acknowledges the need to obtain detailed information about employees for some transactions during the merger review process and will continue to consider whether it is appropriate, on a case-by-case basis, to require the production of such information in a Second Request.

a. Worker and Workplace Safety Information

The Commission proposed to create a Worker and Workplace Safety Information section that would require filing persons to identify any penalties or findings that were issued against the acquiring person or acquired entity by the U.S. Department of Labor's Wage and Hour Division, the National Labor Relations Board, or the Occupational Safety and Health Administration during the five-year period before the filing. Several commenters supported the inclusion of the Worker and Workplace Safety Information, noting that the information could prove indicative of a concentrated labor market and market power. One commenter stated that it had previously alleged that repeated and widespread labor law violations constituted direct evidence of labor market dominance that could be relevant to merger analysis. Others noted that this information is often known to the filers and may be indicative of a concentrated labor market.

Some commenters urged the Commission not to require the submission information about past workplace violations due to the lack of a clear nexus between labor law violations and merger analysis. Other commenters stated that labor law violations may be tied to issues that are irrelevant to market power, such as the presence of an organized labor group that is more inclined to report potential violations, and the requirement should be limited to the industries where violations are more prevalent. Some stated that the existence of labor law violations was government data that was already available to the Agencies without placing the obligation on parties to report such violations.

The Commission acknowledges that information regarding some of these violations may be publicly available or otherwise available to the Agencies. The U.S. Department of Labor and the National Labor Relations Board maintain public accessible databases containing labor enforcement case information on their respective websites.[387] In addition, the Agencies have each established Memoranda of Understanding (MOUs) with the Department of Labor and the National Labor Relations Board that would allow for the Agencies to obtain relevant non-public information regarding labor law violations.[388] Accordingly, when the Agencies identify potential harms to labor market competition through information contained in the HSR Filing or through other means, they can seek information on labor violations from publicly available sources, from the Department of Labor and the National Labor Relations Board under their respective MOUs, and when appropriate, from the filers on a voluntary basis or in response to Second Requests. Because this information may be available to the Agencies through means that would not require filers to provide this information in the HSR Filing, the Commission does not adopt the requirement for filers to submit information on worker and workplace safety, and it is not required by the final rule.

b. Requests To Expand Requirements for Information Related to Labor Markets

Some commenters encouraged the Commission to request more information about employees, including the merging companies' histories of labor law violations dating back ten years rather than only five years; information about their remote, temporary, or contract workers; and the merging companies' union avoidance activities and expenditures. Certain commenters encouraged the Agencies to consider the role of unions and collective bargaining to accurately assess employer market or monopsony power. In particular, commenters suggested that the Agencies could collect the following information to animate such an analysis: (1) a list of unions at controlled entities, associates, and franchisee/cooperatives; (2) copies of collective bargaining agreements, at least with any common unions; and (3) a narrative describing any opposition to

efforts to unionize, including union avoidance activities and expenditures. The Commission acknowledges the utility of collecting this information for some transactions during the merger review process but does not believe that this information is necessary for all filings at the screening stage. As a result, the Commission has not included requirements for this information in the final rule but will continue to consider whether it is appropriate, on a case-by-case basis, to request such information during the investigation of the transaction.

In sum, the Commission has determined that the requirements of the final rule to provide descriptions of areas of competitive interaction between the parties are necessary and appropriate to enable the Agencies to identify transactions that may violate the antitrust laws and that the requirements, as modified, have been tailored to reduce the cost of reporting as much as practicable.

J. Revenues and Overlaps

The Commission proposed a Revenues and Overlaps section to collect information currently required by Items 5(a), 6(c), 7, and 8, subject to proposed modifications. The Commission proposed substantive changes to the reporting of revenue by NAICS code, how NAICS overlaps of controlled entities are reported, which minority-held entities must be reported, and which prior acquisitions must be reported. As discussed below, the Commission adopts some of the changes as proposed, adopts others with modifications, and does not adopt others.

1. NAICS Codes

In the NPRM, the Commission proposed several changes related to revenue reporting. One of the changes was ministerial in nature—adopting the 2022 version of the NAICS codes. This proposal received no comments, and the Commission adopts it as proposed.

The Commission proposed other, non-ministerial changes to revenue reporting that reflect a substantively different approach to revenue information by: (1) eliminating the requirement that filing persons provide the precise amount of revenue attributed to each NAICS code and instead report revenues within ranges; (2) reporting NAICS codes on a descriptive basis through engagement with individuals familiar with the business operations of each operating company and providing additional information if more than one code would be appropriate; (3) requiring acquiring persons and acquired entities with more than one operating company or unit to identify which entity(s) derives revenue in each code; (4) requiring acquiring and acquired persons to report NAICS codes for certain pipeline or pre-revenue products; (5) clarifying that the acquired person must report the NAICS codes relevant to the acquired entity(s) at the time of closing; and (6) eliminating the requirement for filing persons engaged in manufacturing to provide revenue by NAPCS-based codes. As discussed below the Commission adopts some of these changes, adopts a modified version of others, and does not adopt certain of these proposed changes.

a. Reporting Revenues in Ranges

The Commission received several comments in support of the proposal to eliminate the requirement that filing persons provide the precise amount of revenue attributed to each NAICS code and instead report revenues within one of five ranges. One commenter stated that the introduction of levels proposed in the NPRM will simplify compliance with the NAICS allocation requirement. Two other commenters expressed general support for the proposed set of reorganized revenue information. The Commission did not receive any comments opposed to this change and adopts it as proposed.

b. Reporting Revenues on a Descriptive Basis

Regarding the proposal to report NAICS codes on a descriptive basis through engagement with individuals familiar with the business operations of each operating company and provide additional information if more than one code would be appropriate, two commenters objected on the grounds that it would be overly burdensome. One commenter noted that many NAICS codes are broad and disconnected from the modern economy, making it difficult to determine whether a particular code applies. The other commenter objected to the proposal to list all the codes that describe the products or services offered, explaining that it would be extremely difficult to comply with when relying on personnel at various operating companies that have varying familiarity with the NAICS system. The same commenter noted that if the Agencies are concerned about missing potential overlaps, the Overlap Description is a more effective way to address that concern.

The Commission acknowledges the concerns about cost and adopts this proposal with modifications. As noted in the proposed rule, in the Commission's experience, reliance on financial records often results in under-reporting or reporting revenues in codes that may not actually be descriptive of the products or services provided. Having knowledgeable business personnel select the appropriate NAICS codes that best describe the filer's business lines is the best way to ensure that the NAICS code revenues contained in the HSR Filing reflect the full range of products and services offered from a business perspective. However, the Commission will not require a particular methodology to collect NAICS codes and notes that the intent of this change is to have filers report codes that descriptively represent their revenues, and not need to rely on how they are captured in financial systems.

c. Identifying Entities That Derive Revenues in Each Code

Two commenters objected to the proposed requirement to report NAICS information separately by operating entity. Each of the commenters asserted that this additional requirement would likely create significant new burdens, in particular for larger companies with numerous subsidiaries. While this type of reporting may be more difficult for those with numerous subsidiaries, these are exactly the filings for which the Agencies cannot determine which entities generate revenues that are related to those of the other party. When parties report revenues by entity, the Agencies can quickly home in on which business lines are competitively relevant. The Commission notes that some filers already provide revenues in this way and it is extremely useful to the Agencies when they do. Although the Commission acknowledges that this proposal may be more difficult for some filers, it is necessary for the Agencies to have at the outset a clear picture of how revenues are generated within the filing person. The Commission adopts this change as proposed.

d. Reporting Revenues for Pre-Revenue Products or Services

The Commission received several comments regarding the proposal to require acquiring and acquired persons to report NAICS codes for certain pipeline or pre-revenue products. A group of State antitrust enforcers supported the proposal, noting that they are particularly concerned with acquisitions of potential or nascent competitors and the protection of rivalrous innovation. Critics of the proposed requirement expressed concerns about compliance. One commenter pointed out that the Commission did not provide a clear standard for what ''under development''

means or what information the acquiring person must have to ''know'' about the target's product pipeline. Other commenters noted that classifying pre-revenue products or products under development is inherently speculative and that the NAICS classifications sometimes lag changes in technology and business.

The Commission acknowledges the potential challenges in complying with this change and believes it is sufficient for the Agencies to rely on the Competition Descriptions section for information related to pre-revenue products or services. In the Overlap Description, filers are required to list and briefly describe each current or known planned products or services that compete or could compete with those of the other party. As a result, similar information related to potential NAICS code revenues would be largely duplicative. Given the Commission's interest in reducing the cost of complying with the final rule where the additional information provides little benefit to the Agencies, the Commission does not adopt this proposal.

e. Overlap Reporting Revenues as of Time of Closing

Regarding the proposal to clarify that the acquired person must report the NAICS codes relevant to the acquired entity(s) at the time of closing, the Commission did not receive any comments. The Commission adopts this item as proposed.

f. Eliminating Reporting by NAPCS Codes

Regarding the proposal to eliminate the requirement for filing persons engaged in manufacturing to provide revenue by NAPCS-based code, the Commission did not receive any comments. The Commission adopts this item as proposed.

2. Controlled Entity Geographic Overlaps

Information about the geographic areas related to overlapping products and services is currently required by Item 7. The Commission proposed modifying these requirements to: (i) add a requirement to provide the name(s) by which entities have done business within the last three years, (ii) require the filing person to identify the overlapping entity within its own person, rather than the other filing person, (iii) update the NAICS codes that require geographic reporting at the street address level, (iv) require the identification of locations of franchisees for certain NAICS codes, and (v) add a requirement to provide geolocation data. As discussed below, the Commission adopts the some of the proposals as proposed, some with modification, and does not adopt others.

a. NAICS Overlaps of Controlled Entities

The Commission proposed several changes to the information concerning NAICS overlaps of controlled entities. First, the Commission proposed requiring the acquiring person to identify the entity(s) within its own person that has operations in the same NAICS code as the acquired entity(s), and the acquired person to identify the entity(s) within the acquired entity(s) that has operations in the same NAICS codes as the acquiring person. Second, it proposed requiring the identification of ''doing business as'' or ''formerly known as'' names used within the last three years by entities with U.S. operations in overlapping NAICS codes. Finally, the Commission proposed that filing persons be required to identify the entity(s) that have U.S. operations in the overlapping NAICS code(s).

Regarding the proposal to require the identification of ''doing business as'' or ''formerly known as'' names used within the last three years by entities with U.S. operations in overlapping NAICS codes, the Commission received two comments. One commenter expressed support for the proposal, noting that information regarding how private equity portfolio companies are commonly known in the marketplace is necessary for the Agencies to assess potential anticompetitive overlaps. Another commenter, however, stated that the new requirement may be difficult for filing parties to meet if they do not maintain such records, meaning they would need to recreate the information for the HSR filing. The same commenter questioned the value of the information for entities beyond those that either (i) generate revenue that results in a NAICS overlap or (ii) are parties to Material Other Agreements.

The Commission believes ''doing business as'' names will be of great value to the Agencies in the initial waiting period and thus adopts the proposal to require filing parties to identify names by which entities do business at the time of filing. However, as part of its overall efforts to lessen costs, the Commission does not adopt the proposal to require ''formerly known as'' names.

Regarding the proposal to have each filing person only report entities within its own person that derive revenue in the overlapping NAICS codes, the Commission did not receive any comments. The Commission adopts this change as proposed.

Finally, regarding the proposal to require filing persons to identify the entity(s) that have U.S. operations in the overlapping NAICS codes, the Commission did not receive any comments. The Commission adopts this change as proposed.

In addition, one commenter suggested that the Commission require identification of overlaps at the 3-digit, rather than 6-digit level, stating that 6-digit NAICS codes are too narrow. While the Commission agrees that some 6-digit NAICS codes are too narrow to identify products or services that effectively compete in the market, it also finds that other codes are overly broad. Further, identification of overlaps also triggers the reporting of additional information, including geographic information, identification of authors of documents, production of certain annual reports, information about certain officers and directors, identification of certain prior acquisitions, and certain defense and intelligence contracts. Thus, the Commission declines to adopt this suggestion but notes that this final rule includes a Competition Descriptions section, as discussed in section VI.I, to address the shortcomings of revenue reporting by NAICS codes.

b. Geographic Market Information

The Commission proposed two changes related to geographic markets. First, the Commission proposed updating the list of NAICS codes for which locations need only be identified at the State level and NAICS codes for which street-level information would be required. These adjustments reflect the Commission's periodic review of which NAICS codes need more granular street, city, and State address information, and which NAICS codes need only be reported at the State level. Information about where each filer generates revenues is important to determining whether the parties sell or supply products or services in the same local markets. Geographic market information often provides a factual basis for the Agencies to conclude that the merging parties do not sell the same products in the same local areas. Keeping this information up-to-date allows the Agencies to rely on geographic market information to conclude that the transaction does not warrant the issuance of Second Requests.

The Commission received two comments regarding this requirement, one in support of it and one opposed. The supportive comment emphasized the need for street-level information in

the agriculture industry, where the relevant markets for evaluating competition tend to be local and regional due to the perishable nature of agricultural products. The Commission agrees that street-level information is key in local and regional markets and articulated this as the basis for the expansion of the requirement in the NPRM.

The comment in opposition to the proposal stated that it would impose additional costs on filing parties given the wide range of industries for which street-level information would be required. The Commission acknowledges the cost, but for the reasons discussed above, believes that street-level geographic information is necessary to the Agencies' ability to conduct appropriate premerger screening of transactions that are most likely to affect competition at a local level. The Commission adopts this change as proposed.

The Commission also proposed requiring filers to list locations where franchisees of the acquiring or acquired person (as appropriate) generate revenue in overlapping NAICS codes that require street-level reporting. The Commission did not receive any comments on this change and adopts it as proposed.

c. Geolocation

The Commission also proposed requiring filers to report latitude and longitude information for street addresses. The Commission received comments both in support and in opposition to this requirement. The supportive comment stated that many companies already keep lists of latitude/longitude waypoints, while the comment opposed stated that exceedingly few businesses maintain geolocation data in the ordinary course of business.

As helpful as this information would be to the Agencies, especially during the initial waiting period when the Agencies need to determine whether there are any geographic markets in which the parties compete, in its overall effort to reduce costs to filing parties, the Commission does not adopt this proposal. Agency staff can continue to pursue sources for this information when necessary and as time permits during the initial waiting period.

3. Minority-Held Entity Overlaps

The Commission proposed creating a Minority-Held Overlaps section to collect information related to minority holdings that is currently required by Item 6(c). Item 6(c) requires the identification of holdings of the acquiring person and its associates or the acquired entity (as appropriate) of greater than 5% but less than 50% if such holdings derive revenue in any of the same 6-digit NAICS codes (or industries) as the other party. In the NPRM, the Commission proposed eliminating the option to list all the minority-held entities, rather than just those that are in overlapping NAICS codes or industries. The Commission also proposed requiring filers to provide the names by which the listed entities do business, if known. The Commission adopts these changes as proposed.

Regarding the proposal to eliminate the option to list all minority-held entities, the Commission received three comments, one comment in support of the proposed change and two comments opposed to it. The supporter of the proposal stated that it is critical to understand a company's minority holdings, which may allow it to exercise a level of competitive control in a market. One commenter questioned the probative value of information about minority interests generally but did not address this specific proposal. Another commenter expressed concern that the proposal could lead to greater scrutiny of ''growth equity'' firms that primarily take minority stakes in companies, and asserted that it could have a chilling effect on certain investments.

The Commission addresses concerns that increased transparency may lead to more enforcement actions in section III.C.1. and states that the identification of overlapping minority holdings is a key reform of the final rule because where these relationships exist, the Agencies should scrutinize them as part of their premerger review. The Commission also emphasizes that filers are currently required to identify overlapping minority holdings. However, the current Instructions allow filers to identify all minority holdings rather than only those that overlap. The Commission has found that lists not limited to the overlapping entities hinder efficient screening for transactions that may require further investigation, resulting in extra effort even when it would not be required if the overlaps were known as well as not surfacing transactions that do have such overlaps. In contrast, when filers submit a list of only those minority-held entities that derive revenue in the same NAICS code, or are in the same industry as the other party, the Agencies can quickly focus in on holdings that could create a competitive concern. Additionally, as minority interest holders, the filers are in a better position than the Agencies to identify which, if any, of their holdings operate in the same space as the other party. Given the importance of this information to the Agencies, the Commission adopts this change as proposed.

Regarding the proposal to require filers to provide the names by which the listed entities do business, if known, one commenter supported the proposal while another stated that it may be difficult for filing parties to comply with if they do not maintain such records. As discussed in sections VI.D.1.d.(i) and (iii) and VI.D.2.a., the legal names of entities are not always directly related to the name by which the entity is known to the marketplace. Knowing the public-facing names of entities facilitates efficient review of transactions by the Agencies because those names may be better known to other market participants. For investors of 5% or more, the Commission believes this information should be readily available to filers. However, if this information is not known, a statement of non-compliance can be submitted with the filing, as discussed in section VI.A.5. Accordingly, the Commission adopts this requirement as proposed.

In sum, the Commission has determined that the reporting requirements for revenues and overlaps contained in the final rule are necessary and appropriate to enable the Agencies to identify transactions that may violate the antitrust laws in any line of commerce or section of the country and that the requirement, as modified, has been tailored to reduce the cost of reporting as much as practicable.

4. Prior Acquisitions

The Commission proposed creating a Prior Acquisitions section within the Instructions to collect information required by Item 8 of the current Form, as well as additional information. First, the Commission proposed requiring both the acquiring person and the acquired entity to provide information about prior acquisitions, expanding the current requirement that is limited to the acquiring person. Second, the Commission proposed extending the time frame to report prior acquisitions from five years to ten years. Third, the Commission proposed eliminating the dollar threshold for listing prior acquisitions, which currently limits reporting to only acquisitions of entities with annual net sales or total assets greater than $10 million in the year prior to the acquisition. Fourth, the Commission proposed treating asset transactions involving the prior acquisition of substantially all of the assets of a business in the same manner as prior acquisitions of voting securities or non-corporate interests. The Commission also proposed requiring

filers to report whether all or substantially all of the acquired voting securities, non-corporate interests, or assets are still held at the time of filing. As discussed below the Commission declines to adopt several of these proposals and modifies others.

As noted in the NPRM, information about prior acquisitions has always been important for the Agencies, allowing them to identify strategies to gain market share through acquisitions rather than internal expansion or more vigorous competition. Filers have been required to provide information about prior acquisitions from the beginning of the premerger notification program. As discussed in section II.B.5., the Commission believes that additional information about prior acquisitions will reveal roll-up or serial acquisition strategies that have become increasingly prevalent in certain sectors as well as among certain investors and acquirors, and that have been an effective strategy for increasing concentration. A history of prior acquisitions in the same sector can provide an independent basis for the Agencies to take a closer look at the filed-for transaction to ensure that merger enforcement takes place at a time when it can be effective in preventing undue levels of market concentration.

Several comments provided general support for the Commission's efforts to expand this item. According to a group of State antitrust enforcers, details about a filing entity's prior acquisitions are vital for evaluating mergers and industry concentration trends. They contend that, in an era of so-called ''stealth acquisitions,'' premerger tools used by antitrust enforcers require sharpening. Another commenter also expressed this concern, observing a rise in serial acquisition strategies that are potentially aimed at sidestepping regulatory scrutiny.

Other commenters provided research supporting the proposed expansion of information about prior acquisitions. One commenter offered that his research supports claims made in the NPRM that prior acquisitions have important consequences for competition. He explained that even minor deals can produce major changes in market structure, firm behavior, and consumer welfare. Other commenters described their research or experience with roll-up acquisitions that have occurred in various sectors of the economy, explaining that more expansive disclosures of prior acquisitions will allow the Agencies to better identify serial acquisitions and their potentially anticompetitive effects.

But several comments raised broad objections to the Commission's proposal to collect additional information on prior acquisitions. Several comments broadly asserted that the burden of providing this additional information about prior acquisitions would be too high. One commenter asserted that expanding the information required would create a chilling effect that could discourage acquisitions of startups, as many potential acquirers of startups are likely to have made several small acquisitions in the technology sector. Similarly, some comments explained that the expansion of information related to prior acquisitions would have particular impact on specific industries or financial sectors, including pharmaceuticals, technology, agriculture, and private equity. Other commenters said that providing more complete information about prior acquisitions would reduce investments in startup companies. Finally, certain comments suggested that the proposed changes would adversely affect venture capital and funding acquisitions.

The Commission has addressed some of these general concerns in section III.C., as well as more detailed concerns about the cost to complete this requirement, below. It believes that many of these broad concerns are either not directly relevant to this rulemaking or otherwise in tension with historical reporting practice.[389] Nonetheless, the Commission has determined not to adopt most of the expansions contained in the proposed rule, including the extension of the lookback period from five to ten years or the elimination of the $10 million exception. Instead, the Commission adopts modest adjustments to the current requirements and extends the reporting requirement to prior acquisitions of the target. The adopted adjustments contained in the final rule include: (1) the elimination of the $1 million threshold for revenue when determining which overlapping NAICS codes are relevant; (2) the requirement to include prior acquisitions of assets or entities that also provide competing products or services listed in the filing person's Overlap Description; and (3) the proposal to treat prior acquisitions of substantially all of the assets of a business in the same manner as prior acquisitions of voting securities or non-corporate interests.

[389] The Commission previously required information about prior acquisitions for a full ten years. The Commission is not aware of any evidence, and commenters did not point to any, of any noticeable impact on the level of startup activity or venture capital funding during that period.

This information related to prior acquisitions will better reflect current market dynamics in the very lines of business that will be the focus of the Agencies' premerger assessment. The final rule does not require reporting on all prior acquisitions, only those in in business lines which the parties have identified as areas of overlapping current or future competition, either on the basis of NAICS code reporting or in the Overlap Description. This limitation focuses the required information on the specific antitrust risk that one or both parties have a pattern or strategy of rolling up competitors. It also alerts the agencies to potential changes in the competitive environment that may not be publicly available, which is valuable information in assessing whether or not the filed for transaction may violate the antitrust laws. In addition, parties are required to report only those acquisitions of U.S. entities or assets and foreign entities or assets with U.S. sales, thus targeting acquisitions that are likely to affect local markets within the United States. With these limitations, information collected about prior acquisitions is properly focused on the antitrust risk that the merging parties are pursuing a roll up strategy that is harming or could harm competition in the United States in violation of the antitrust laws.

As discussed in section II.B.5., the antitrust laws have always applied to anticompetitive serial acquisitions. In light of the increased use of these strategies and evidence of their harmful effects in certain sectors, there is a clear benefit to antitrust enforcement from disclosing prior acquisitions that may reveal a pattern or strategy of rolling up competitors in violation of the antitrust laws. This risk can be especially acute when the transaction involves a merger between 'consolidators,' with both firms having many prior acquisitions in the same lines of business. The final rule is properly tailored to focus on the risk that the transaction is part of such a strategy. Information about prior acquisitions need only be submitted for business lines that the parties have identified as areas of current or future competition. Moreover, any burden imposed by the additional reporting requirements would be limited. Based on the Agencies' experience, information about prior acquisitions is well-known to companies that are parties to an acquisition agreement, as this information is often collected as part of the due diligence process for the pending transaction. Other companies, even relatively small companies, routinely provide this information to the

Agencies in response to a Second Request.

The Commission acknowledges that this requirement imposes a new obligation on acquired companies but believes this information is necessary and appropriate for the Agencies to conduct their premerger review. Information about prior acquisitions is specifically targeted to uncover prior acquisitions where the parties have existing or emerging overlaps; if the acquired person completed many acquisitions over the past five years in these overlapping business lines, that information would be highly relevant to assessing the transaction's likely effect on future competition in those overlap sectors. Moreover, serial acquisition strategies may be going on simultaneously in a particular business line, and the acquired person's history would reveal whether the acquiring person is acquiring a firm that was also pursuing such a strategy.

The benefit to the Agencies from collecting this information from both parties is directly related to the number of prior acquisitions in the same business lines: the more acquisitions recorded during the prior five years, the more relevant is the information about them. Both the acquiring person and the acquired entity can and do make acquisitions that have an impact on the relevant competitive landscape. In addition, requiring this information from both filers may help deter acquisition strategies whereby a target buys several related companies that fall under the HSR thresholds and then the acquiring person purchases the target; the current rule does not reveal this history of prior acquisitions in the same business lines. Being able to clearly understand this history from the time a filing is made assists the Agencies in identifying a potential pattern of acquisitions in a particular industry that has contributed to a trend toward concentration or vertical integration that affects the competitive dynamics for the parties to the transaction, as well as the commercial realities of post-merger competition. One commenter suggested that parties report prior acquisitions only from the point in time when the current UPE acquired control of the acquiring or acquired entity, but this would limit the Agencies' ability to fully understand patterns and current competition. Thus, the Commission declines to further limit the requirement in this way.

The Commission also proposed expanding the time frame for reporting prior acquisitions from five to ten years to allow the Agencies to have a more complete understanding of how past acquisitions in the affected business lines affect the competitive landscape of the current transaction under review. Even though the Commission has required ten years of prior acquisition information on the HSR Form in the past, commenters questioned the expansion of the requirement now. Some comments focused on the added burden, noting that individuals who have institutional knowledge of past acquisitions may no longer be employed by the filing entity. Another comment pointed out that the Commission previously recognized that a ten-year lookback period was unduly burdensome when it reduced the information request from ten years to five years in 1987. The Commission acknowledges the cost associated with reporting many prior acquisitions, and after careful consideration of the comments, has determined not to require reporting for prior acquisitions occurring more than 5 years prior to filing.

But the Commission disagrees that concerns about roll-up strategies are not well-grounded in antitrust law. As discussed in section II.B.5., U.S. antitrust law clearly addresses concerns about the acquisition or maintenance of market power through serial acquisitions. As stated above, it is precisely this information that allows the Agencies to fairly measure the competitive landscape and on-going trends toward concentration in certain business lines, making the information relevant to the Agencies' initial antitrust assessment of the transaction. The Commission also disagrees that the HSR Act does not permit the Agencies to use section 7 of the Clayton Act to challenge serial acquisitions. Section 7 clearly prohibits acquisitions that were preceded by a series of acquisitions that rendered the market(s) under review concentrated,[390] and it is not improper for the Commission to require the reporting of prior acquisitions to better detect a pattern of acquisitions that may also violate other antitrust statutes, such as section 2 of the Sherman Act or section 5 of the FTC Act. Although the Commission agrees that the information submitted with the HSR Form must be used to examine the potential competitive impact of the filed-for transaction, it disagrees that the scope of section 7 is so limited as to prevent the Agencies (or other enforcers of the Federal antitrust laws) from alleging harm that derives from a cumulation of similar acquisitions in the same market.[391]

The Commission also proposed eliminating the $10 million threshold for identifying prior acquisitions and received several comments on this point. One comment urged the Commission to keep the existing limitation that requires reporting only those acquisitions of more than $10 million in total assets and annual net sales in the year prior to the acquisition as a way to eliminate the burden of reporting a large number of extremely small transactions that are competitively insignificant. One comment suggested maintaining the current $10 million threshold for prior acquisitions but exempting certain, specified NAICS codes related to emerging technology sectors from the threshold.

Yet another commenter suggested the Commission broaden its proposed rule to include prior acquisitions based on three-digit NAICS codes, rather than relying on six-digit NAICS code overlaps, which the commenter found to be often too narrow or imprecisely defined. The Commission acknowledges that three-digit NAICS codes would include more prior acquisitions and present a broader picture of the competitive landscape. But because prior acquisitions also include products or services described in the Overlap Description, which in some instances may encompass a broader set of acquisitions than reliance on NAICS codes alone, the Commission declines to use three-digit NAICS codes as the standard.

In sum, the Commission has determined that the reporting requirements for prior acquisitions contained in the final rule are necessary and appropriate to enable the Agencies to identify transactions in which the merging parties are engaged in a pattern or strategy of roll-up acquisitions and that the requirement, as modified, has been tailored to reduce the cost of reporting as much as practicable.

K. Additional Information

1. Subsidies From Foreign Entities or Governments of Concern

While the Commission did not receive any comments objecting to the proposed new defined terms ''foreign entity or

[390] *See United States* v. *Phila. Nat'l Bank,* 374 U.S. at 367. *See also Credit Bureau Reps., Inc.,* v. *Retail Credit Co.,* 358 F. Supp. 780, 794 (S.D. Tex. 1971), aff'd, 476 F.2d 989 (5th Cir. 1973).

[391] *See Brown Shoe Co.* v. *United States,* 370 U.S. 294, 334 (1962) (citing S. Rep. No. 81–1775, at 5 (1950) and H.R. Rep. No. 81–1191, at 8 (1949)). In particular, S. Rep. No. 81–1775, at 5 noted that where several large enterprises are extending their power by successive small acquisitions, the cumulative effect of their purchases may be to convert an industry from one of intense competition among many enterprises to one in which only a few large concerns supply the market.

government of concern'' and ''subsidy'' discussed in section IV.B., it did receive several comments about the reporting requirements included in the proposed Instructions. One commenter objected that the Committee on Foreign Investment in the US (''CFIUS'') already is tasked with the review of certain transactions involving foreign investment in the United States and that requiring information about foreign subsidiaries in the HSR form would add to the burden of notifying parties (and the Agencies) without providing concurrent value for the substantive antitrust analysis. In response to this comment, the Commission notes that it must defer to Congress in implementing the requirement to report information about foreign subsidies in the HSR Form.

Another commenter suggested introducing a de minimis threshold so that the reporting obligation is limited to only those subsidiaries from foreign governments and entities of sufficiently large amounts to potentially distort the competitive process in markets in the United States in which the merging parties compete. Citing the EU Foreign Subsidies Regulation as an example, this commenter claimed that such a threshold would save merging parties the burden of compiling small subsidy amounts that could not be expected to result in competition concerns. The Commission acknowledges that a de minimis requirement may indeed make sense as part of the information required, but Congress did not provide for a de minimis threshold, and the Commission does not yet have sufficient data to make that determination or establish an amount at this time. Once the Agencies have begun to receive information about foreign subsidies, the Commission can revisit this issue, if warranted.

Finally, a comment from a senator and a representative noted that information about the financing activities of merging parties would also be useful in addressing a host of national security challenges and encouraged the Agencies to share such information with other governmental bodies, including Congressional committees. The Commission agrees the Agencies should facilitate this kind of information sharing to the extent permitted by current law, regulations, guidelines, and practices governing information sharing within the Federal government.

2. Defense or Intelligence Contracts

The Commission proposed creating a Defense or Intelligence Contracts section that would require filing persons to report information related to certain contracts with defense or intelligence agencies to speed up outreach to those agencies related to the reported transaction. As proposed, both the acquiring and acquired person would have been required to identify whether they have existing or pending procurement contracts with the Department of Defense (''DoD'') or Intelligence Community (''IC''), as defined by 10 U.S.C. 101(a)(6) and 50 U.S.C. 3003(4), valued at $10 million or more, and provide identifying information about the award and relevant DoD or IC personnel. The Commission reasoned that for filings from companies that supply DoD or IC with products or services, this information would greatly enhance the Agencies' ability during the initial waiting period to identify and contact appropriate stakeholders within DoD or IC to seek their input as customers that might be impacted by the proposed transaction and to speak to knowledgeable experts about the products or services provided to the government by the parties. As discussed below and in response to concerns raised in public comments, the Commission adopts the proposal with modification.

The Commission received several comments on this proposal. One commenter stated that the Commission provides limited explanation of its authority or justification for this proposed requirement and that it does not explain its focus on these agencies. The Commission responds that it proposed special reporting requirements for the defense and intelligence agencies because they are often the only customer for products and services offered by defense companies, and a thorough review of these transactions is a priority for the Agencies. Products and services sold to DoD or the IC are often unique and not sold to any other customer. As noted in the NPRM, the Agencies regularly review filings from companies that supply the DoD or the IC with products or services, and it is important for them to be able to quickly contact DoD and IC staff to collect key insights and information to prevent mergers that may have an anticompetitive impact. A recent study by the General Accountability Office highlights the importance of DoD's input to the Agencies regarding potential competition risks to the defense industrial base and DoD programs.[392] The Agencies have relied on interactions with DoD personnel, and to a lesser extent IC personnel, to investigate and challenge defense mergers over the years. Without information about specific DoD or IC contracts or knowledge of which unit handles that contract, the Agencies often face difficulty and delay in identifying appropriate relevant personnel or stakeholders with knowledge of the contracts, programs, or products or services at issue.

Any delay in identifying the right DoD or IC personnel with deep knowledge of complex and highly sensitive programs hinders the Agencies' ability to identify and fully assess competition issues in the reported transaction that would impact DoD or IC programs or budget. The Commission has determined that to be fully proactive about these concerns, and to seek DoD or IC input at an early stage of the inquiry, parties with certain pending or current DoD or IC contracts need to provide that information with their notification. Although the Agencies are also attentive to any merger that may affect purchases by other parts of the government, these transactions involve products and services that are also sold to commercial customers and can be investigated using our standard approach.

Beyond this comment on the general focus of the requirement, commenters addressed three primary areas of concern: vagueness, confidentiality, and the burden of compliance. First, commenters expressed concern about the lack of clarity in the proposed rule, for instance pointing out that neither the NPRM nor the cited statutes define what constitutes a ''pending'' procurement contract. This commenter suggested that, to avoid this ambiguity, the new rule should apply only to active procurement contracts, not pending contracts. The Commission agrees there is a need to clarify which contracts should be reported and modifies the Final Rule to require reporting for (1) pending proposals submitted to the U.S. Department of Defense or any member of the U.S. intelligence community, as defined by 10 U.S.C. 101(a)(6) or 50 U.S.C. 3003(4), and (2) awarded procurement contracts with the U.S. Department of Defense or any member of the U.S. intelligence community, as defined by 10 U.S.C. 101(a)(6) or 50 U.S.C. 3003(4). The Commission declines to limit the reporting requirement to active contracts only. Submission of a proposal indicates that the filer is a competitor, regardless of

[392] *See* U.S. Gov't Accountability Office, Defense Industrial Base: DOD Needs Better Insight into Risks from Mergers and Acquisitions 28 (Oct. 2023) (GAO–24–106129).

whether it is ultimately awarded the contract. The Commission believes that these changes address some of the ambiguities raised by commenters.

According to one commenter, it is not clear what method of valuation should be used to determine if a contract is valued at $10 million or more, particularly for open-ended supply contracts. First, as discussed below, the Commission increases the threshold to $100 million. Second, the Commission clarifies that filers should use the maximum estimated quantity or value in their proposed or awarded prices to determine the estimated value of the contract. Otherwise, filers should use reasonable judgment in determining how to value their contracts and may explain the method of valuation used.

With respect to confidentiality concerns, one commenter stated that it is not clear how a company may provide this information without violating Federal laws and regulations restricting the dissemination of such sensitive information. Commenters proposed suggestions to avoid such conflicts. For instance, one suggested that the proposed instruction should be clarified to exclude any contracts that are classified or otherwise subject to a government-imposed duty of confidentiality. Another recommended that the Agencies consider the appropriateness and potential applicability of a national security exception to certain requirements within this proposed rule.

As an initial matter, the Commission notes that there is nothing in the HSR Act that overrides the protections due classified information, and the Commission specifically intends to not require the submission of classified information. To alleviate concerns about the sensitivity of the information related to these contracts, the Commission revises the Instructions to expressly state that parties should not include classified information but that they should note when responsive information is withheld on that basis. The Commission believes that this modification addresses the concerns raised in the comments and preserves protections for classified information. The Commission declines to adopt the proposal to exclude any contracts that are classified or otherwise subject to a government-imposed duty of confidentiality. The fact that the parties have submitted a proposal in response to a request from DoD or the IC or have an existing contract is not classified information. Such an exclusion is overbroad and would not allow the Agencies the benefit of reviewing non-classified information related to these pending proposals or active contracts. The Commission believes that the revision stating that parties should not include classified information in their submissions addresses this issue. For the same reason, the Commission declines to adopt the proposal to create a national security exception to the rule. The confidentiality provisions of the Act provide sufficient protection for any confidential but unclassified information about these documents. The Commission additionally notes that many of the products and services the Agencies investigate have similar national security implications even if they involve customers other than DoD or the IC.

As to the burden of complying with this requirement, one commenter noted that the requested information is often not maintained in the ordinary course of business, nor is it created in the course of a deal negotiation, and that due to confidentiality concerns, these data are often not centrally maintained and may not be known, even among senior leadership. To limit the burden, one commenter recommended that the requested information be limited to those DoD or IC contracts with a primary NAICS code for which the filing parties have identified NAICS overlaps or that the Agencies obtain this information from the Federal Procurement Data System.

To reduce the cost of complying with this request, and in light of the general concern that classified materials are not widely known or shared, the Commission makes two significant modifications to limit the scope of this requirement. In line with the proposal above, the Commission limits the set of responsive contracts to those involving a 6-digit NAICS industry code overlap or a product or service described in the Overlap Description or the Supply Relationships Description. The Agencies' need for information about pending or active DoD or IC contracts is directly related to the specific antitrust risks associated with the transaction, and limiting this information in this way targets the most relevant contracts, if they exist. In addition, in response to concerns that the $10 million de minimis level will require reporting for purchases by DoD or the IC of mundane products and services, rather than critical defense purchases, the Commission has determined to increase the de minimis threshold for these contracts from $10 million to $100 million. The Commission believes that this is the appropriate threshold for limiting this request to products that are uniquely sold to the DoD or the IC. The Commission declines to make any modification in response to the suggestion that the Agencies get this information from the Federal Procurement Data System. It is not feasible for the Agencies to rely on discovering critical DoD or IC proposals or contracts from this database for the purpose of identifying key personnel at those agencies and obtaining information about complex products and services during the initial waiting period. This information is known by the parties and easy to verify, especially with the limitation that the contracts be worth more than $100 million annually. Contracts or commitments of this size are likely subject to close monitoring.

In addition, to further reduce the burden of this requirement, the Commission excuses select 801.30 transactions from reporting information related to DoD or IC proposals or contracts. These transactions do not involve an agreement between the parties.

Finally, two commenters noted a typographical error in the proposed Instructions: the reference to 50 U.S.C. 3033(4) should refer to 50 U.S.C. 3003(4). The Commission revises the instructions to correct the typographical error noted by the commenters.

In sum, the Commission has determined that the reporting requirements for pending proposals and active contracts with DoD or the IC contained in the final rule are necessary to provide the Agencies with the ability to identify transactions in which the merging parties are providing critical products or services to the government and to quickly reach out to those agencies for their input. The requirement, as modified, has been appropriately tailored to reduce the cost of reporting as much as practicable.

3. Voluntary Waivers

The Commission proposed amending the Instructions to allow filing persons to waive the confidentiality provision contained in the Act, 15 U.S.C. 18a(h), for any non-U.S. competition authorities or State Attorneys General they identify. As stated in the NPRM, allowing filers to waive the confidentiality protections in the HSR Filing would provide an efficient mechanism for filers to consent to limited waivers of confidentiality at the outset of any agency review to facilitate early cooperation among competition enforcers. The proposed voluntary waivers would allow the Agencies to disclose the existence of an HSR Filing and the information contained in the HSR Filing, but only for those non-U.S. competition authorities or State Attorneys General identified by the filing person. The

Commission also proposed modifying the language that would inform filers about potential disclosures based on the waivers to track the language of the Act more closely. As discussed below, the Commission adopts this proposed change with modifications.

The Commission received three comments addressing this proposal. A group of State Attorneys General, who would be the recipients of HSR-related information if filers granted access on a voluntary basis, encouraged the Commission to consider three changes. First, they proposed requiring filing persons to identify the relevant States where the parties do business, regardless of whether they opt to provide waivers or check the box. Second, they encouraged the Agencies to, by default, disclose to the public the fact of filing and the expiration date of the waiting period. They argued that nothing in the HSR Act requires that the fact of filing and the waiting period be kept confidential and that this information should not be treated as such. The comment urged the Agencies to exercise their authority to disclose this information to the public or to the States. They recommended that to avoid disclosure, the parties should have to provide a basis for keeping the fact and timing of the filing confidential. If the Agencies adopted the second proposal, they also encouraged the Agencies to include a check box to allow parties to waive confidentiality of the information and documents filed with the notification so that these materials could be shared with affected States. Third, if the Agencies chose not to adopt the above recommendation regarding public disclosure, the State antitrust enforcers suggested disaggregating the check box into two separate boxes, one to allow disclosure of the fact of filing and the associated waiting period and another to allow sharing of the information and documents in the filing with affected State Attorneys General. They stated that disaggregating the check box increases the likelihood that States at least receive notification of the transaction.

The Agencies have historically not publicly disclosed or provided to the States or international enforcers information regarding HSR filings, including the fact that a filing was made and the waiting period, in the absence of a waiver from the parties. Without weighing on the merits of the States' legal arguments regarding the scope of the HSR Act's confidentiality protections, the Commission at this time believes it is appropriate to maintain its prior practice. The Commission does adopt the States' suggestion to disaggregate the waiver check boxes, which would allow for greater flexibility in providing the Agencies consent to disclose and provide filers with the option to disclose some information but not all information contained in the HSR Filing.[393] The waiver would apply only to those non-U.S. competition authorities or State Attorneys General selected by the filing person. The Commission declines to adopt the proposal by the State antitrust enforcers to require parties to identify the relevant States where they do business, regardless of whether they waive confidentiality. The Commission will likely receive much of this information through the new requirements contained in the final rule.

The Commission received two other comments on this proposal. One commenter expressed concern about confidential information becoming publicly known once it is shared more widely due to the increased risk of leaks. On this point, the Commission notes that these waivers are voluntary. The parties can decide not to waive confidentiality if they have concerns about confidentiality. Further, the Agencies take seriously the confidentiality requirements of the Act and require law enforcement colleagues to abide by these protections. In the many decades of case cooperation pursuant to voluntary waivers, these protections have worked to prevent improper disclosures. The Commission believes that concerns about an increased risk of leaking due to the option to waive confidentiality at the time of filing are unfounded.

Finally, according to one commenter, the proposed rule appears to contemplate a single check box that does not permit notifying parties to communicate their willingness to waive confidentiality as to some international competition authorities but not as to others. The Commission notes that this commenter misunderstands the requirement and clarifies that the voluntary waiver will only apply to those jurisdictions that the party affirmatively indicates in the HSR Filing. In addition, failure to check either box or indication of only a few jurisdictions for waivers does not prevent the parties from providing these waivers or adding jurisdictions later. The inclusion of these waiver options in the Form is simply meant to serve as an efficient mechanism for filers to provide their clear consent at the outset even if only on a limited basis.

The Commission did not receive any comments regarding the proposal to modify the language informing filers about potential disclosures based on the waivers to track the language of the Act more closely. Thus, the Commission adopts this change as proposed.

In sum, the Commission has determined that offering the option for parties to waive the confidentiality provisions of the Act to allow for the sharing of HSR materials with non-U.S. jurisdictions or State enforcers in the final rule will provide a benefit to the Agencies in facilitating case cooperation at an early stage in the Agencies' assessment of antitrust risk. The option, as modified, has been tailored to provide a clear choice for filers who wish to facilitate the sharing of information by providing a waiver.

4. Identification of Communications and Messaging Systems

In conjunction with the proposed requirement that filing persons certify they have taken steps to prevent destruction of relevant information, as discussed in section VI.L., the Commission also proposed that filers identify and list all communications systems or messaging applications on any device used by the filing person that could be used to store or transmit information or documents related to its business operations. The Commission does not adopt this proposal.

In the proposed rule, the Commission reasoned that, as companies have increasingly been relying on new forms of communication to do business and make key operational decisions, these communications systems have become an important part of the Agencies' investigations. In the Agencies' experience, these systems contain highly relevant information on the transaction itself, as well as on topics that are critical for the Agencies' assessment of the transaction such as competition, competitors, markets, customers, and industry characteristics. Nevertheless, many parties do not appear to fully understand or comply with document preservation obligations for these new modalities.

The Commission received several comments on this proposal, mainly regarding the burden of the request and its utility in screening for anticompetitive transactions during the initial waiting period. Multiple commenters expressed doubt about the Commission's assertion that this

[393] The Commission's implementation of this suggestion differs from the text proposed by the States. The Commission does not adopt the States' suggestion, with respect to the fact of filing and the waiting period, that, in order to prevent disclosure, the parties be required to affirmatively check a box and provide a basis for keeping the information confidential.

information is readily available to the filing person and that identifying these systems would impose minimal burden. One association of antitrust practitioners noted that because there is no limitation on the requirement, large or diffuse organizations may have hundreds of communications systems that would require identification but are unknown or unused by the filing person's employees who are involved in preparing the HSR filing. One commenter also flagged the inevitable complications caused by, for example, special IT systems, legacy IT systems, and individual employees who do not follow corporate IT policies. According to another, the process of gathering this information often requires the expertise of counsel and entails interviews of key employees as well as a careful review of company practices and policies. As a result, this commenter stated that the burdens associated with the additional requirements would fall more harshly on small companies that are not equipped to navigate the regulatory process. In addition, comments also objected that the information requested would not assist the Agencies in determining whether to issue a Second Request. They noted that the identification of these systems is best reserved for the transactions that are investigated as is the Commission's current practice when issuing Second Requests.

After carefully considering these comments, and as part of its overall effort to reduce burden on filing parties, the Commission does not adopt this proposal. The Commission notes, however, that the Agencies have taken steps to update their guidance related to obligations to preserve ephemeral messages and similar communications systems, and have provided language in the Model Second Request to reflect document production and retention obligations for these communication systems.[394] Based on this guidance, companies that take steps to preserve information related to these communications systems may reduce the likelihood that they will face consequences for non-compliance with a Second Request.

L. Certification

Each HSR Filing is accompanied by a notarized certification, signed by the person preparing or supervising the preparation of the filing. The person signing the certification attests to the veracity of the information submitted in the filing. The Commission proposed amending this certification to require filers to affirm that they have taken the steps necessary to prevent the destruction of documents and information relevant to the transaction. The Commission also proposed adding language to the Instructions to remind filers that criminal statutes prohibit practices that impede or frustrate functions of government agencies, such as submitting false information. This proposal would require most HSR filers to establish new document retention policies or revise existing policies prior to filing. As explained in the NPRM, the deletion of information or documents that could be called for in a Second Request could lead to a loss of information critical to the Agency's ability to conduct an in-depth investigation.

The Commission received approximately ten comments on this proposal. Some commenters noted that the proposed rule would expand document preservation beyond current law, which obligates parties to preserve documents and information related to an ongoing or anticipated government investigation [395] or if they have a reasonable anticipation of litigation.[396] Commenters noted that very few filers have an obligation to preserve information about the transaction since they are not yet under investigation and do not have a reasonable anticipation of litigation.

Commenters also described the burden, particularly the cost, associated with document preservation obligations. Several commenters explained that litigation holds are expensive and difficult to design and implement, especially concerning the breadth of documents and information that would be subject to a hold. One commenter noted that a document hold does not simply encompass the suspension of auto-delete policies, can be difficult and expensive to implement with precision, and typically extends to individuals, databases, communication systems, and materials beyond the scope of the transaction. Another pointed out that data is expensive to store and that filers would be required to retain documents that cover large components of their day-to-day operations. According to one commenter, at the time of filing, the notifying party may not know enough about what issues will be of interest to the Agencies to identify a set of custodians who are likely to have information related to the proposed transaction.

After carefully considering the comments, the Commission has determined not to adopt this proposal. The Commission notes that, under current law, when litigation is reasonably foreseeable, parties have an obligation to preserve documents relating to the proposed transaction. This obligation could arise before or after HSR filing. In addition, it is a Federal crime for any person to knowingly alter, destroy, mutilate, conceal, cover up, falsify, or make a false entry in any record, document, or tangible object with the intent to impede, obstruct, or influence an ongoing or anticipated Federal investigation.[397]

The Commission also received a few comments on the addition of language reminding the filer of potential criminal liability under other Federal statutes that prohibit various deceptive practices aimed at frustrating or impeding the legitimate functions of government departments or agencies. Commenters raised general concerns about how this language could alter how filers prepared their notification. One commenter stated that when read together with the requirement to preserve documents, the reminder of criminal penalties would prevent filers from instituting a tailored legal hold. Another stated that it seems to suggest that filers should fully expect a harsh and punitive response to filing errors. Commenters primarily noted that the added language merely restated existing law. Given that the proposed certification on criminal liability does not increase the burden or cost of filing and may have a benefit of putting some unaware filers on notice of possible criminal penalties, the Commission adopts this proposal as a simple restatement of existing penalties.

M. Affidavit

As discussed in section V.D., the Commission proposed requiring filings for transactions without definitive agreements to include a term sheet or draft agreement that describes with specificity the scope of the transaction that would be consummated. In conjunction with that proposal, the Commission also proposed that parties making such filings attest in their affidavit that a term sheet or draft agreement that describes with specificity the scope of the transaction that will be consummated has been submitted with the executed letter of intent or agreement in principle.

As described above, the Commission modified the proposal and has made a conforming change to this section of the Instructions as part of the final rule.

VII. Severability

In the NPRM, the Commission noted that § 803.90 contains a separability (or severability) provision such that, if any provision of the Rules (including the Form) or the application of any such provision to any person or circumstance is held invalid, the other provisions of the Rules and their application to other persons or circumstances shall be unaffected.

The Commission did not propose any changes to the severability provision in § 803.90 and does not adopt any changes. However, as it did in the NPRM, the Commission confirms its intent that, if a court were to invalidate any provision, any part of any provision, or any application of the final rule, the remainder of the final rule would remain in effect to the greatest extent possible. The Commission's general view is that each substantive requirement of the final rule is severable from each of the others. The Agencies need the information requested by the final rule for the reasons discussed above. Each requirement in the final rule serves an important, related, but distinct purpose and provides a distinct benefit separate from, and in addition to, the benefit provided by other requirements. However, if a court finds that certain provisions are invalid, the following analysis applies.

The Commission notes that some reporting requirements are contingent upon filers reporting overlapping products or services in (1) the Overlap Description; (2) the Supply Relationships Description; and (3) the same NAICS codes. The severability of these reporting requirements are as follows:

Officers and Directors

If product or service overlaps are identified in the Overlap Description or Supply Relationships Description, the final rule requires the acquiring person to list officers and directors (or in the case of unincorporated entities, individuals exercising similar functions), and those who have served in the position within the past three months for each entity within the acquiring person responsible for the development, marketing, or sale of products or services that are identified as overlaps and who have also served in these roles with the target. The Commission does not view this requirement as severable from the Overlap or Supply Relationships Descriptions. However, the Commission's view is that the two other reporting requirements regarding Officers and Directors are severable and would remain if the Overlap or Supply Relationships Descriptions are held invalid. These are the requirements to (1) list all individuals likely to serve as, nominate, or appoint an officer or director of the acquiring entity (and the accompanying requirements); and (2) for each officer and director identified, list all other entities operating in commercial activities in the same NAICS codes reported by the target for which the individual currently serves as an officer or director. The Agencies need the information in the first requirement for the reasons discussed above in sections II.B.1. and VI.D.3.c., and this first requirement would not be affected by invalidation of the Overlap or Supply Relationships Descriptions. With respect to the second requirement, the Commission has long required reporting of NAICS code information, and the reporting of NAICS code information stands independent of, and can operate separately from, the Overlap or Supply Relationships Descriptions. The changes the Commission has finalized here are modest and do not significantly alter the existing requirement to report certain NAICS code information. Accordingly, the Commission believes that the requirement to report certain officer and director information in any identified NAICS code overlap would stand even if either (1) the Overlap or Supply Relationships Descriptions were held invalid, or (2) any of the final rule's changes regarding NAICS code reporting were invalidated.

Prior Acquisitions

Filers (both acquired and acquiring persons) are required to report certain information regarding prior acquisitions that (1) derived revenue in an identified NAICS code overlap or (2) provided or produced an overlap product or service as described in the Overlap Description. If the Overlap Description is invalidated, the Commission does not view the second part of the Prior Acquisitions reporting requirement as severable from that reporting requirement. However, the first requirement regarding derived revenue in an identified NAICS code overlap would remain in place, for the same reasons discussed previously in connection with the severability of the Officers and Directors requirement.

Defense or Intelligence Contracts

Filers are required to identify (1) proposals submitted to the U.S. Department of Defense or any member of the U.S. intelligence community, and (2) awarded procurement contracts with the U.S. Department of Defense or any member of the U.S. intelligence community, valued at $100 million or more, that (A) are or will be the source of revenues in any identified NAICS code overlap or (B) involve or will involve an overlapping product or service identified in the Overlap Description or the Supply Relationships Description. If the Overlap or Supply Relationships Descriptions are invalidated, the Commission does not view the portion of the Defense or Intelligence Contracts reporting requirement referring to the Overlap or the Supply Relationships Descriptions as severable from those reporting requirements. However, the portion requiring the reporting of certain information in any identified NAICS code overlap would remain in place, for the same reasons discussed previously in connection with the severability of the Officers and Directors requirement.

Annual Reports and Audit Reports for Acquiring Entities

The final rule requires the acquiring entities whose revenues contribute to a NAICS code overlap or any overlap identified in the Overlap Description to provide the most recent annual report or audit report and CIK number if annual reports are filed with the SEC. If the Overlap Description is invalidated, the Commission does not view the portion of the Annual Reports and Audit Reports requirement referring to the Overlap Description as severable from the requirement to provide an Overlap Description. However, the portion requiring annual reports or audit reports relating to NAICS code overlap would stand, for the same reasons discussed previously in connection with the

severability of the Officers and Directors requirement.

Author Information for Business Documents

For Business Documents, if (1) a NAICS code overlap has been identified, (2) an overlap within the Overlap Description has been identified, or (3) a supply relationship within the Supply Relationships Description has been identified, filers must provide certain information about the author of the documents. If the Overlap or Supply Relationships Descriptions are invalidated, the Commission does not view the portions of the Author Information requirement referring to those descriptions as severable from the Overlap and Supply Relationships Descriptions requirements. However, the portion requiring the reporting of author information if a NAICS ode overlap has been identified would stand, for the same reasons discussed previously in connection with the severability of the Officers and Directors requirement.

The Commission views all remaining provisions, parts of provisions, and applications of the final rule not specifically identified as non-severable above to be severable. These reporting requirements would have been adopted individually regardless of whether the other reporting requirements were adopted and could function effectively without the other provisions. If a reviewing court were to stay or invalidate any reporting requirement (or part or application thereof) not identified as non-severable above, the Commission states its intent to have adopted the remainder of the final rule.

VIII. Paperwork Reduction Act

On June 29, 2023, the Commission published its intention to submit the proposed rule and the associated Supporting Statement to OMB for review under the Paperwork Reduction Act of 1995 (''PRA''), 44 U.S.C. 3501 *et seq.*[398] The Commission emphasized that some of the proposed changes were intended to reduce the burden of filing [399] and that other proposed changes offered clarifications to the current rules and were unlikely to change the burden on filers.[400] Further, the Commission highlighted proposed changes that would require a filer to collect and report information kept in the filer's ordinary course of business records, minimizing the burden of new collection requirements.[401] The Commission noted that many of the proposed changes would increase the burden on all filers; [402] the Commission also noted that some of the proposed changes would significantly increase the burden on only certain filers.[403]

In conducting the PRA analysis for the proposed rule, in order to estimate the projected change in burden due to the proposed changes and to provide a baseline for public comment, PNO staff consulted current Agency staff attorneys who had previously prepared HSR filings for clients while in private practice. These experienced attorneys provided estimates of how many hours the proposed changes would require, depending on the complexity of the filing at issue. To estimate an average number of additional hours, the Commission conservatively assumed that 45% of HSR filings would be highly complex and 55% would be less complex. The Commission next multiplied the average estimate of additional hours per filing (107 hours) by the 7,096 non-index HSR filings that the Commission projected it would receive in FY 2023.[404] Finally, the Commission multiplied the total hours by an estimate of the hourly rate for executive and attorney compensation ($460/hour).

The Commission received numerous public comments referencing the NPRM's PRA burden analysis. One commenter supported the analysis, noting that the increase in the estimated time required to prepare an HSR filing is ''inconsequential,'' even ''trivial'' considering that these reporting requirements only apply to transactions valued at more than the reporting threshold. This commenter further asserted that it is appropriate to shift costs from the Agencies to the merging parties.

Some commenters, however, criticized the Commission's analysis for significantly underestimating the extent of the burden, and many raised concerns about the methodology employed by the Commission to calculate such burden. For instance, they raised concerns that the estimates are not based on empirical data or discussions with current practitioners; and that the Commission's methodology is non-verifiable, and thus not subject to empirical validation. They also argued that Agency staff's prior experience in preparing HSR filings is not relevant given the wholly different and new information requested under the proposed rule. One commenter called the Commission's approach biased and inaccurate, stating that there is no indication that Agency staff relied on any data when trying to create an estimate based on memories from past private practice. Additionally, several commenters also criticized the Commission's explanation of its PRA analysis. With respect to the survey of Agency staff, one commenter stated that the Commission failed to provide basic information, such as the number of staff surveyed, who these staff are, their level of experience in preparing HSR filings, when they last prepared HSR filings, and the results of the survey. Another commenter stated that it had no context for what the median might be for filings to better understand whether the low and high ends are outliers or the anticipated typical experience.

The Commission carefully reviewed the comments asserting that its analysis underestimated the extent of the cost and delay that would be imposed if the Commission adopted the proposed rule. The Commission was persuaded by commenters who asserted that the PRA analysis in the NPRM underestimated the time and expense associated with the proposed rule. To address commenters' concerns and recognizing the changes from the proposal discussed above in section II, the estimates are revised as reflected below.

As outlined in section I and discussed more fully in sections IV to VI above, the Commission has not adopted certain requirements in the proposed rule in an effort to reduce compliance costs, and has also modified other proposed requirements in a manner that reduces the burden in certain respects. Specifically, the Commission is not adopting proposals that would have required a timeline of key dates for closing the proposed transaction; organization charts; certain information about other interest holders; drafts of

[398] 88 FR 42178, 42207–08 (June 29, 2023).

[403] *Id.* (*e.g.,* filers whose businesses have existing horizontal, non-horizontal, or labor market overlaps or relationships).

[404] In January 2023, the Commission requested a three-year extension of its PRA clearance for information collection requirements related to the existing HSR rules, which was approved by OMB on February 23, 2023, through February 28, 2026 (OMB Control Number 3084–0005). *See* 88 FR 3413, 3414 (Jan. 19, 2023). At that time, FTC staff projected an average of 7,096 non-index filings per year for fiscal years 2023–2025. This estimate of 7,096 non-index filings was based on the fact that the FTC received 6,518 non-index filings in fiscal year 2022 and had experienced an average annual increase in filings of 4.3% in the pre-COVID fiscal years 2017–2019. Actual non-index filings in FY 2023 totaled 3,515. *See* Fed. Trade Comm'n & Dep't Just., Hart-Scott-Rodino Annual Report, Fiscal Year 2023 appendix A (FY 2023).

submitted documents; information about employees; information about board observers; geolocation information; prior acquisitions involving entities with less than $10 million in sales or revenues or consummated more than 5 years prior to filing; and information about steps taken to preserve documents or use of messaging systems. These items were frequently cited by commenters as unduly burdensome. While this information is relevant to the Agencies' premerger assessment, the Commission has determined it can forgo requiring this information at this time. The Commission also has modified, in some instances substantially, many other proposed information requirements, which will reduce the burden on filers to collect and report this information. As a result, the information requirements contained in the final rule are significantly less burdensome than those reflected in the proposed rule, and the costs imposed on filers are thus reduced as compared to the proposed rule.

Before finalizing the changes adopted in the final rule, the Commission undertook a new survey of Agency staff that responds to comments critiquing the estimate in the NPRM and implemented several improvements to its methodology, as explained below. The Commission believes that in light of these improvements, the estimates of the incremental costs associated with the final rule are reliable and consistent with survey techniques used by others to calculate the burden of filling out a form.[405]

The new survey included 15 current FTC and DOJ attorneys who have recent experience preparing HSR filings in private practice. The Commission asked each survey participant to estimate, based on their own experience with preparing HSR Filings, the incremental change in hours that would be required to respond to each of the new and updated items in the final rule. They were also asked to estimate how much time would be saved by no longer having to provide information for current requirements that are not included in the final rule. The survey participants were provided with (1) the current HSR Form and Instructions; (2) the HSR Form and Instructions for both acquiring and acquired persons for the final rule; (3) a spreadsheet listing each of the new, updated, and eliminated items for three categories of transactions; and (4) instructions regarding how to input their responses.

The survey participants provided estimates for the amount of time required to collect and submit information responsive to each of the new and updated items in the final rule, separately for acquiring and acquired persons, and separately for three types of HSR-reportable transactions that reflect varying levels of complexity and antitrust risk: (1) the new category of select 801.30 transactions; (2) transactions with no reportable competitive overlaps (*e.g.,* where an investment fund is buying or selling a portfolio company with no NAICS or competitive overlap or supply relationship); and (3) transactions where the parties report at least one NAICS code overlap or have an existing overlap or supply relationship (referred to below as ''overlap'' filings). They were asked to estimate the incremental change in costs of complying with each new and adjusted information requirement contained in the final rule in each of the categories and for each type of filer. Also, for each item, the survey participants were asked to indicate what percentage of the additional time required would be time spent by company personnel as compared to a law firm hired to prepare the HSR Filing or any third parties that would need to be hired to complete the HSR Form (*e.g.,* data vendors).

In generating their estimates, the survey participants were asked to consider all time spent to complete the HSR Form,[406] including time spent reviewing the HSR Instructions; generating and compiling the materials necessary for collection; acquiring, installing, and utilizing any necessary technology or systems; and completing and reviewing the collected information, among other tasks. They were also asked to consider whether filers would need to incur additional costs not necessarily measured in hours, *e.g.,* the costs associated with new IT investments, long-lived facilities or equipment, related one-time expenditures, and other non-labor expenditures, such as attorney training or general HSR resources.

The Commission took several steps to increase the reliability of its survey. First, to reduce sampling bias as much as possible, the Commission relied on Agency staff who have not been involved in this rulemaking and thus have no more familiarity with the changes to the HSR Form and Instructions than an attorney in private practice would have. As exclusion criteria, the Commission did not survey any staff from the FTC's Premerger Notification Office, nor any staff at either Agency who were part of the core team responsible for drafting the final rule.

Second, the survey participants were asked to provide details about their experience preparing HSR filings in private practice, both in terms of how many years they were in private practice and the number and types of transactions involved. Collectively, the survey participants had experience with each of the three types of HSR-reportable transactions described above. Based on the information provided, the survey participants with the most experience tended to generate a lower estimated number of hours than the average.

The Commission believes that, with these controls, the individuals who provided estimates for the PRA burden assessment had sufficient experience with the current HSR reporting requirements and enough understanding of the HSR Rules and practice to make their estimates of incremental costs reliable.

Based on the survey responses, the Commission finds that the average number of additional hours required to prepare an HSR filing with the changes outlined in the final rule is 68 hours, with an average low of 10 hours for select 801.30 transaction filings by the acquired person and an average high of 121 hours for filings from acquiring person in a transaction with overlaps or supply relationships. As noted, however, the estimate varies significantly based the type of filings, with filings that are more likely to raise antitrust risk requiring higher hours.

To calculate the average number of additional hours, the averages of the estimates provided by respondents were calculated separately for each change for both the acquiring and acquired person within each category of transaction. These averages were then summed by category of transaction and then divided by two to provide category-specific estimated averages for an individual filer to comply with all changes. The overall average estimate for an

[405] This same survey technique, asking experienced HSR practitioners to estimate the time required to comply with the new information requirements in addition to other costs, was used in the Kothari Report, discussed below.

[406] The Commission notes that parties to acquisitions, whether HSR-reportable or not, may hire antitrust counsel to assess whether the transaction would violate any of the antitrust laws. This is a different task from evaluating whether a transaction requires notification pursuant to the HSR Act, and if so, how to comply with the Form and Instructions. The final rule does not require any information from attorneys or any other advisors to assess the antitrust risk of the transaction. As a result, any cost related to the assessment of the potential for a substantive antitrust risk, rather than compliance with the information requirements of the Form and Instructions, are not costs attributable to the final rule and are not included in this PRA analysis.

individual filer was calculated as a weighted average of these category-specific estimates for an average filer, using as weights the Agencies' estimate of the fraction of filings that fall into each of the three categories. Specifically, the Commission estimates that 8 percent of filings will meet the definition of a select 801.30 transaction,[407] 45 percent will have a NAICS code overlap or an overlap or supply relationship identified in the Competition Descriptions section, and 47 percent of filings will have no overlaps or supply relationship.

One commenter commissioned a report (the Kothari Report, referenced in section III.C.2.) to estimate the additional monetary costs of the proposed rule and relied on a survey of company and private counsel to estimate the time required to comply with the new requirements of the proposed rule as compared to the current rules.[408] From the responses to this survey, the Kothari Report estimated that the proposed rule as published in the NPRM would have added 101.6 hours of internal personnel time and 140.3 hours of outside counsel time above the current requirements for a total incremental increase of 241.9 hours. Although this estimate is substantially higher than the estimate based on the Commission's new survey, the Kothari Report estimated costs for the proposed rule, and may have included costs related to advocacy about whether a transaction violates an antitrust law, rather than only costs related to collection and submission of information required by the Form and Instruction, as indicated by its inclusion of costs of economic experts. In contrast, the Commission has estimated the additional time attributable to the less burdensome requirements of the final rule and has included in its estimates only that time that is required to complete an HSR Filing that is fully compliant with the Act and the Rules. Given the significant modifications from the proposed rule to the final rule that lessen the estimated burden, the Commission finds the results of its new survey to be generally consistent with the survey relied on in the Kothari Report.

Several commenters also questioned the hourly rate that the Commission relied on to calculate the estimated cost of compliance. One commenter stated that the Commission's estimate of $460 per hour may underestimate the blended hourly rate applicable to most HSR filings, particularly given attorney billing rates and that such filings often require senior executive participation. Another noted that the rate is below the nationwide average hourly rate for M&A attorneys. Others objected to the lack of support for the previously assumed hourly wage and description of how the Commission calculated the assumed hourly wage. One commenter suggested that a more realistic average rate for outside counsel is $936 per hour; however, no law firm that submitted comments specified a different hourly rate that should be applied.

The Commission has carefully reviewed and considered the comments submitted regarding the hourly rate and has determined to apply a blended hourly rate of $583. To reach this number, the Commission consulted additional resources regarding the rates for outside counsel and in-house personnel. In an effort to make as few assumptions as possible, the Commission used current data from reliable, publicly available sources. Although the actual rates charged by HSR practitioners (and attorneys generally) are not typically publicly available (and no commenter provided actual rates), the Commission reviewed public media and industry reports to determine a range of approximate values that would realistically reflect the costs to prepare an HSR filing.

The ELM Solutions 2023 Real Rate Report published by Wolters Kluwer reports data regarding the 2023 hourly rates charged by corporate M&A attorneys.[409] According to the report, at firms with more than 1,000 lawyers, the nationwide mean rate charged by partners in 2023 was $1,254 per hour and the nationwide mean rate charged by associates in 2023 was $781 per hour. At firms with 501 to 1,000 lawyers, the nationwide mean rate charged by partners was $1,213 per hour and for associates it was $801 per hour. At firms with 201 to 500 lawyers, the nationwide mean rates were $786 per hour for partners and $519 per hour for associates.

The Commission notes that HSR filings are not typically prepared exclusively by M&A law firm partners or exclusively by M&A associate attorneys. As a result, relying on one mean rate or the other would be inappropriate. The WK 2023 Real Rate Report indicates that with regard to corporate M&A matters from 2020–2023 that resulted in 40–100 total billed hours, approximately 45% of the hours billed were at the partner hourly rate, and approximately 49% of the hours billed were at the associate hourly rate.[410] The report further notes that approximately 7% of the hours billed were at a lower paralegal hourly rate.[411]

The Commission further notes that HSR filings are not prepared exclusively by the largest law firms, nor is it necessary for filers to engage such counsel. To account for filings prepared by small to mid-sized firms, the Commission calculated blended rates for both partners and associates by weighting the nationwide mean rates for firms with more than 1,000 lawyers (67%) and firms with 201 to 500 lawyers (33%). Applying the billing percentages in the WK 2023 Real Rate Report to those blended rates, the Commission calculated a blended rate for outside counsel of approximately $878 per hour.

To generate an overall blended rate, the Commission also accounted for the cost of client time spent preparing the filing, which could include a range of employees depending on the type of business and may include in-house counsel. The Commission has factored in an hourly rate for in-house personnel of approximately $140 per hour, which reflects current wage data reported by the Bureau of Labor Statistics.[412] Additionally, the Commission believes that 60% of the time required to prepare

[407] Estimated based upon a review of HSR Filings from fiscal years 2018 through 2022.

[408] Comment of U.S. Chamber of Com., Doc. No. FTC–2023–0040–0684. The Kothari Report reflects the results of a survey of antitrust practitioners conducted by the Chamber of Commerce seeking input on the proposed rule as well as the Agencies' draft merger guidelines. *See* U.S. Chamber of Com., ''U.S. Chamber HSR/Merger Guides Practitioner Survey'' (Sept. 19, 2023), *https://www.uschamber.com/finance/antitrust/antitrust-experts-reject-ftc-doj-changes-to-merger-process.* The Kothari Report was prepared by Professor S.J. Kothari and is appended to its comment at 54–85.

L. & Thomson Reuters Inst. 2024 Report on the State of the US Legal Market 11–12 (Jan. 8, 2024) (discussing rise in law firm worked rates over the past five years as well as the counterinfluence of billing realization practices); Andrew Maloney, ''Where Are Partner Billing Rates Surging the Most in Big Law?,'' Am. L. (May 24, 2023) (noting a 2023 median hourly rate for M&A partners of $955 per hour).

[410] Wolters Kluwer's ELM Solutions, *supra* note 410, at 214.

[411] Instead of separately estimating a paralegal hourly rate, the Commission conservatively estimated that the remaining 7% assigned to paralegals in the WK 2023 Real Rate Report would be work performed at the associate's hourly rate.

[412] This assumed hourly rate is based on the median wage for lawyers, which according to the Bureau of Labor Statistics was $70.08 in 2023. See *https://www.bls.gov/ooh/legal/lawyers.htm.* The Commission doubles this number to reflect the lost productivity of the worker. The Commission notes that a company's top executives may also participate in preparing or reviewing the filing; however, since the median wage for top executives was $49.92 in 2023, to be conservative the Commission values top executive time at the same rate as lawyer time. *See https://www.bls.gov/ooh/management/top-executives.htm.*

the HSR filing is time spent by outside counsel and 40% is time spent by the client. These percentages are supported by survey results from Agency staff and are also consistent with the survey results in the Kothari Report. By weighting the hourly rates for outside counsel and in-house personnel accordingly, the Commission calculates an overall blended rate of $583 per hour. This adjusted hourly rate generally reflects publicly available information; however, it does not reflect real-world factors that would likely drive down the overall cost of preparing an HSR filing under the final rule (*e.g.,* client-negotiated rates, discounts, write-offs, alternative fee agreements, and work shifted to paralegals and other support staff at substantially lower rates).

Multiple commenters cited to the Kothari Report as providing a better estimate of the additional costs of the proposed changes and concluding that the true cost of the proposed rule may be many times greater than the NPRM suggested. But the Commission has accounted for many of the same costs in its own estimates, such as the time required from outside counsel, in-house counsel, and business personnel. Much of the difference in estimates is attributable to the higher hourly rate applied to the required hours, which the Kothari Report suggests is more likely $936 per hour, and a category of ''other'' costs that is nearly one-third of the total projected costs.[413] These additional costs are attributable to ''other external costs'' that include economic consultants, investment bankers, and data vendors.

The Commission does not believe that there will be this level of additional costs outside of internal personnel and outside counsel. In particular, completing the new requirements contained in the final rule should not require the services of economic consultants or investment bankers. As described above, the Form and Instructions require information from the parties' own records. The Commission specifically is not seeking an analysis or post-hoc rationales developed by external parties. As for data vendors and similar services for the collection and production of the required information, in its new survey of Agency staff, the Commission asked the survey participants to indicate for each item the percentage of time that should be allocated to third parties that they did not otherwise attribute to time spent by outside counsel. Only a few of the survey participants indicated any need for third-party involvement—and even for those few, they estimated only a small percentage of time for a limited set of items (*e.g.,* for translations). As a result, there is no basis to further adjust the Commission's estimates to account for ''other'' external costs.

Commenters also objected that the Commission failed to consider the indirect costs to the economy that would result when parties are discouraged from pursuing clearly nonproblematic deals. The PRA does not require the Commission to consider potential indirect costs to the economy presented by the changes described in the proposed rule. Under the PRA, the term ''burden'' means time, effort, or financial resources expended by persons to generate, maintain, or provide information to or for a Federal agency, including the resources expended for (A) reviewing instructions; (B) acquiring, installing, and utilizing technology and systems; (C) adjusting the existing ways to comply with any previously applicable instructions and requirements; (D) searching data sources; (E) completing and reviewing the collection of information; and (F) transmitting, or otherwise disclosing the information.[414] Comments related to indirect costs attributable to the final rule are discussed in section III.C.

Despite these points of disagreement, the Commission notes that its estimate for the increase in the average number of hours required to prepare an HSR filing is generally consistent with the estimates put forth by commenters, including in the Kothari Report, which were based on the proposed rule but not the final rule. The Commission believes that the differences in projected total costs are mainly attributable to (1) the significant modifications that were made to the final rule as compared to the proposed rule; (2) the difference in the hourly rates ($583 versus $936); (3) a category of ''other'' costs that unduly increased total costs by one-third; and (4) use of projected filings for FY 2023 (7,096), which the Commission now replaces in its calculation with the actual number of filings for FY 2023 (3,515). The Commission's PRA assessment for the final rule addresses concerns raised by the commenters related to the methodology used in the NPRM.

Net Effect

The changes outlined in the final rule only affect non-index filings which, for FY 2023, totaled 3,515. As described above, the Commission estimates that the amendments to the HSR Rules and Notification and Report Form contained in the final rule could increase the time required to prepare responses for non-index filings, with an estimated average increase of 68 hours per filing. Thus, the annual estimated additional hours burden is 239,020 (3,515 non-index filings multiplied by 68 additional hours per filing). Applying the revised estimated hours, 239,020, to the updated hourly rate of $583 for executive and attorney compensation yields approximately $139.3 million in total additional annual costs for a year with that number of filings. The additional per filing cost is estimated at $39,644 (68 hours multiplied by $583 per hour). However, the Commission believes that this PRA cost estimate may overestimate the actual PRA burden. For a variety of reasons, costs for any particular transaction are likely to be different from these estimates. The final rule will result in higher costs for those transactions that present the most antitrust risk, and the PRA estimates do not take account of the substantial benefits to the Agencies, the parties, and third parties generated from a more efficient premerger review process that shifts some of the burden of information collection and reporting away from third parties to the merging parties and allows the Agencies to obtain critical business facts earlier in the initial waiting period, which in turn helps mitigate avoidable costs associated with Second Requests that might have been avoided or that were not tailored to areas of competitive concern due to insufficient information in the HSR Filing. In addition, the annual costs associated with the final rule will be directly related to the number of reportable transactions. See section III.C. Finally, any estimated additional hours burden is expected to decline over time as filers become more familiar with the HSR Form and Instructions.

The amendments are expected to impose either minimal or no additional capital or other non-labor costs, as businesses subject to the HSR Rules generally have or obtain necessary equipment for other business purposes.

[413] Comment of U.S. Chamber of Com., Doc. No. FTC–2023–0040–0684 at 74–75 (other costs estimated at $102,917, added to external costs of $234,259 for a total of $313,828, with other costs 33% of total).

[414] 44 U.S.C. 3502(2); *see also* 5 CFR 1320.3(b) (defining burden); U.S. General Services Administration & Office of Management and Budget, ''A Guide to the Paperwork Reduction Act: Estimating Burden,'' *https://pra.digital.gov/burden/* .

The Commission believes that the above requirements necessitate ongoing, regular training so that covered entities stay current and have a clear understanding of Federal mandates, but that this would be a small portion of and subsumed within the ordinary training that employees receive apart from that associated with the information collected under the HSR Rules and the corresponding Instructions.

Basis for OMB Assessment

Finally, one commenter stated that the proposed rule provides an insufficient basis for the Office of Management and Budget (OMB) to conduct the informed and accurate assessment required by the PRA. The OMB typically defers its substantive review until the final rule stage and did not provide substantive feedback on the NPRM. However, the Commission disagrees with the commenter and believes that it has provided a sufficient basis for OMB to conduct an informed and accurate PRA assessment. Based on comments it received, the Commission narrowed the information requirements in the final rule, conducted a new survey to estimate costs, and revised its PRA analysis accordingly. The Commission believes that its revised assessment provides a sufficient basis for OMB review under the PRA.

IX. Regulatory Flexibility Act Certification

The Regulatory Flexibility Act (RFA), 5 U.S.C. 601 through 612, requires that an agency conduct an initial and final regulatory analysis of the anticipated economic impact of the proposed amendments on ''small entities,'' unless the agency certifies that the regulatory action will not have a significant economic impact on a substantial number of small entities.[415] Pursuant to section 605(b) of the Regulatory Flexibility Act, 5 U.S.C. 605(b), the Commission certifies that the final rule will not have a significant economic impact on a substantial number of small entities.

The Commission finds that the final rule will not affect a substantial number of small entities, because small entities will be affected only when they are party to a transaction that exceeds the HSR Act thresholds, and less than 0.02% of the nation's small entities file premerger notifications in any given year. Furthermore, the economic impact on the very few small entities that are required to file is not significant, because smaller businesses generally have fewer employees, generate fewer documents related to a transaction, and are involved in less complex transactions, all of which will minimize their costs of complying with the final rule. Further, these costs will generally account for a small fraction (less than 0.5%) of the value of the transaction. This document serves as the required notice of this certification to the SBA's Chief Counsel for Advocacy.[416]

The Commission also certified in the NPRM that the changes in the proposed rule would not, if adopted, have a significant economic impact on a substantial number of small entities. Commenters objected to the Commission's reliance on this certification and stated that the Commission failed to use the proper definition of small business or to discuss the proposed rule's impact on them.[417] The Commission responds by providing an assessment of how many small businesses are subject to the reporting requirements of the HSR Act and therefore would be impacted by the final rule. The Commission also notes that the final rule does not change which entities (including which small entities) are required to submit HSR Filings.

Under the RFA, ''small entities'' are defined as small businesses, not-for-profit organizations that are independently owned and operated and not dominant in their fields, and governmental jurisdictions with populations of less than 50,000.[418] The term ''small business'' has the same meaning as the term ''small business concern'' under section 3 of the Small Business Act, meaning that it must be independently owned and operated and not dominant in its field of operation.[419] The Small Business Act permits the Small Business Administration (SBA) to specify size standards by which a business may be determined to be a ''small business concern.''[420] The SBA publishes these standards at 13 CFR 121.201.

To determine whether a regulatory action will impact a ''substantial number'' of small entities, SBA Guidance encourages agencies to examine the number of small businesses affected by a given rule relative to the total number of small businesses in the regulated industry. The regulated industry may include the ''entire universe of small businesses'' where a rule's reach is economy wide.[421] That is the case here, as the HSR Rules apply broadly to the entire economy, and all persons involved in reportable transactions are required to file an HSR Form, irrespective of industry.

The SBA estimates that, as of March 2023, there were approximately 33.2 million small businesses in the United States.[422] As explained below, due to the filing thresholds Congress established in the HSR Act, the small businesses that would have to report a transaction under the HSR Act represent a tiny fraction of this number. Even under the counterfactual and extreme assumption that all of 6,288 HSR filings received in FY2022 were made by small businesses,[423] less than 0.02% (6,288 divided by 33.2 million) of all small businesses would need to file an HSR Form. Such a de minimis number of small businesses does not qualify as a ''substantial number'' of small entities under the SBA's Guidance.[424] In an abundance of caution, however, as detailed below, the Commission analyzed a randomized sample of the filings received in FY2022 and further estimates that the final rule will apply to less than 0.0007% of small businesses. Therefore, the final rule will

[415] 5 U.S.C. 605(b).

[416] *Id.*

[417] One commentor suggested that the increased information requirements will, on the margin, lead to less investment by private equity in small businesses. Such indirect effects are not the proper subject of RFA analyses. *See, e.g., Cement Kiln Recycling Coalition* v. *EPA,* 255 F.3d 855, 868 (D.C. Cir. 2001) (rejecting the contention that the RFA applies to small businesses indirectly affected by the regulation of other entities).

[418] 5 U.S.C. 601.

[419] *See id.* at 601(3) (cross-referencing 15 U.S.C. 632).

[420] 15 U.S.C. 632(a)(2)(A). The Commission does not expect that the final rule will impact other types of ''small entities'' (not-for-profit organizations that are independently owned and operated and not dominant in their fields and governmental jurisdictions with populations of less than 50,000). In the Agencies' experience, governmental jurisdictions are typically not parties to transactions that would be subject to the HSR Act. As a result, the Commission has focused its analysis on small businesses as defined by the SBA.

[421] U.S. Small Bus. Admin., Office of Advocacy, ''How to Comply with the Regulatory Flexibility Act'' 21 (Aug. 31, 2017), *https://advocacy.sba.gov/2017/08/31/a-guide-for-government-agencies-how-to-comply-with-the-regulatory-flexibility-act/* (''Depending on the rule, the substantiality of the number of small businesses affected should be determined on an industry-specific basis and/or on the number of small businesses overall. For example, the Internal Revenue Service, when changing the tax deposit rules, would examine the entire universe of small businesses to see how many would be affected.'').

[422] U.S. Small Bus. Admin., Office of Advocacy, ''Frequently Asked Questions'' (Mar. 2023), *https://advocacy.sba.gov/wp-content/uploads/2023/03/Frequently-Asked-Questions-About-Small-Business-March-2023-508c.pdf.*

[423] Federal Trade Commission, Hart-Scott-Rodino Annual Report Fiscal Year 2022, appendix A.

[424] U.S. Small Bus. Admin., Office of Advocacy, *supra* note 424, at 21 (''The interpretation of the term 'substantial number' is not likely to be five small firms in an industry with more than 1,000 small firms.'').

not apply to a substantial number of small businesses.

The SBA regulations define ''small business'' primarily based on firm revenue or total number of employees, depending on the industry.[425] For industries where the SBA uses revenue to define ''small business,'' the revenue thresholds vary from $2.25 million to $47 million. In other industries, the SBA definition of small is based upon the number of employees. These thresholds range from 100 to 1,500 employees. Finally, certain finance-related industries are defined as small if they have less than $850 million in assets. Each NAICS code has a corresponding SBA threshold to determine whether a business generating revenue in that code is ''small.'' [426] In addition to these thresholds, businesses must also be independently owned and operated and not dominant in their fields on a national basis and satisfy additional criteria to be considered ''small.'' [427] The calculation of the size of a business must also give present effect to agreements to mergers and acquisitions, including agreements in principle.[428]

To estimate how many small entities so defined might be required to make an HSR filing, the Commission analyzed a randomly selected, statistically significant 10% sample of the filings submitted in FY 2022. Of that sample, the Commission first eliminated filings made by individuals in their individual capacity, and not as the ultimate parent entity of a business, such as for filings resulting from executive compensation. Second, the Commission used NAICS code information and financials reported by the acquiring or acquired person to determine if they qualified as a small business by revenue or assets, as applicable. For NAICS codes with thresholds based upon the number of employees, the Commission used public information or documents submitted by the filing parties to determine if they qualified as a small business based on the number of employees. For transactions in which the acquiring person filed for control of the acquired entities, the Commission analyzed the acquiring person and acquired entities after giving effect to the change of control.[429] Additionally, because a small business must be independently owned and operated, all filings where an investment group was the ultimate parent entity of the acquiring or acquired person were coded as not small businesses. The Commission does not have information sufficient to determine whether other filers are independently owned and operated, but where the Commission lacked sufficient information to exclude a business on this basis, they were counted as a small business even if they may not truly qualify as one. As a result, the estimates below are likely over-inclusive; that is, it is likely that fewer filers were small than were coded as small in the sample.

Table 6: Estimated Number of Small Business HSR Filers in Fiscal Year 2022

Estimated # of	FY 2022 (Sample x 10)	As % of Small Businesses*	As % of M&A Parties**	As % of # of HSR Filings***
Small Buyers that May Remain Small After Consummation of the Transaction	40	0.00012%	0.13%	0.64%
Small Targets that May Remain Small After Consummation of the Transaction	180	0.00054%	0.57%	2.86%
Total # of Filers That May Remain Small After Consummation of the Transaction	220	0.00066%	0.70%	3.50%

* Small Businesses in 2022 = 33,200,000

** M&A Parties in 2022 = 31,468 (15,734 x 2)

*** Number of Filings FY2022 = 6,288

As shown above in Table 6,[430] the Commission estimates that in FY 2022, it received up to 220 filings from businesses that meet the definition of small (22 found in the 10% sample). Of these, approximately 180 (18 found in the 10% sample) were the targets of the transaction, and 40 (4 found in the 10% sample) were the buyers. As a result, the Commission estimates than less than 0.0007% of small businesses will be affected by the final rule.[431]

This is consistent with the structure of the HSR Act, which focuses on larger mergers, as defined by dollar value.[432] The framework of the Act established three tests that together serve to limit the applicability of the Act for small businesses: (1) the Commerce Test; (2) the Size of the Transaction Test; and (3) the Size of the Person Test.[433]

[425] 13 CFR 121.201.

[426] *Id.*

[427] 15 U.S.C. 632.

[428] 13 CFR 121.103(d)(1).

[429] The Commission notes that filers must attest (1) to their good faith intent to consummate a transaction, and (2) in all transactions to which 16 CFR 801.30 does not apply, that a contract, agreement in principle or letter of intent to merge or acquire has been executed. *See* 16 CFR 803.5.

[430] *See* Table 1 (showing 15,734 acquisitions in 2022).

[431] Though the SBA regulations give effect to agreements, including agreements in principle, when determining size, the Commission also analyzed whether the sample of filers might meet the thresholds if agreements resulting in a change of control were not considered. Here too, the Commission finds that the final rule does not affect a substantial number of small entities. It estimates that in FY2022 approximately 850 filers may have met the definition of small if the effect of agreements is not considered, representing less than 0.003% of small businesses in the United States, approximately 2.70% of the estimated number of M&A parties, and 13.52% of FY 2022 HSR filers.

[432] The Commission now provides this information to give context about the reach of the Act and does not rely upon any of the HSR reporting thresholds in this certification, since it has conducted an analysis of the filing parties using the SBA's definitions of small, as described above. Therefore, the Commission does not address comments related to the RFA analysis provided in the NPRM that drew different conclusions from the statutory thresholds.

[433] 15 U.S.C. 18a(a).

Table 7: Current HSR Form Filing Thresholds

	Size of Transaction (SOT) (as adjusted, as of March 6, 2024)		
	SOT ≤ $119.5 M	$119.5 M > SOT ≤ $478 M	SOT > $478 M
HSR Filing required?	No	No, unless the Size of Person Test is met.	Yes

The Commerce Test is met if either party is engaged in commerce or any activity affecting commerce.

Under the Size of the Transaction Test, no filing is required if the transaction is valued at $119.5 million [434] or less. Transactions valued between $119.5 million and $478 million only must be reported if the acquiring and acquired person also meet the Size of the Person Test. Transactions valued at more than $478 million are reportable regardless of the Size of the Person Test.

Where the Size of the Person Test applies, premerger notification is required only if (1) the acquiring person has total assets or annual net sales of $23.9 million (2024 adjusted value) and the acquired person has total assets or annual net sales of $239 million (2024 adjusted value); or (2) the acquiring person has total assets or annual net sales of $239 million (2024 adjusted value) and the acquired person has total assets (or, if it is ''engaged in manufacturing,'' annual net sales) of $23.9 million (2024 adjusted value). If these size thresholds are not met, no filing is required. For example, in 2024, if the size of a transaction were $475 million and the acquiring person had $1 billion in assets and revenue, but the acquired person was not engaged in manufacturing and had $220 million in revenue but only $20 million in assets, no filing would be required.

The final rule also will not have a significant economic impact on small entities that are required to file. An HSR filing is not an ongoing cost for small businesses. Instead, the costs are incurred only when a small business is a party to a reportable transaction. Therefore, the Commission does not expect that the costs of complying with the final rule will cause a significant impact on affected small businesses.

For the less than 0.0007% of American businesses that will remain small after engaging in an HSR reportable transaction, the impact will be minimal. Even in a case of a complex transaction between two small businesses where the size of the transaction was at the threshold (currently $119.5 million), the Commission estimates that the additional cost imposed by the final rule would be approximately 0.12% of the value of the transaction.[435] For the majority of transactions involving small businesses, actual costs are likely much lower and would represent an even smaller percentage of the proceeds from the transaction. For example, based upon the Commission's review of the sample of FY 2022 transactions, in some transactions involving a presumptively small business, the size of transaction value exceeded $1 billion, resulting in the additional cost of the final rule representing less than 0.015% of the transaction value for even a complex transaction.[436]

Finally, the Commission has no reason to believe that the final rule will have a significant economic impact on any entity, let alone entities that have assets or revenues substantial enough to meet the HSR Act's reporting thresholds but that nevertheless qualify as small businesses. As detailed in the final rule, the Commission estimates that the changes would result in approximately 10 to 121 additional hours per filing, depending on the complexity of the filing at issue. In the Commission's experience, smaller businesses have fewer lines of business and fewer employees, generate fewer documents related to a transaction and maintain fewer ordinary course documents, and are involved in less complex transactions, all of which will minimize their costs of responding to the document requests contained within the final rule, to the extent their compliance is even triggered under the HSR Act's thresholds.

Accordingly, the Commission hereby certifies that the final rule will not have a significant impact on a substantial number of small entities.

X. Congressional Review Act

Pursuant to the Congressional Review Act (5 U.S.C. 801 *et seq.*), the Office of Information and Regulatory Affairs has designated this rule as a ''major rule,'' as defined by 5 U.S.C. 804(2).

List of Subjects

16 CFR Parts 801

Antitrust.

16 CFR Part 803

Antitrust, Fees, Reporting and recordkeeping requirements.

For the reasons stated in the preamble, the Federal Trade Commission amends 16 CFR parts 801 and 803 as set forth below:

PART 801—COVERAGE RULES

■ 1. The authority citation for part 801 is revised as follows:

Authority: 15 U.S.C. 18a(d); 15 U.S.C. 18b.

■ 2. Amend § 801.1 by revising examples 1, 4, 5, and 6 in paragraph (d)(2) and by adding paragraph (r) to read as follows:

§ 801.1 Definitions

* * * * *

(d) * * *

(2) * * *

Examples: 1. ABC Investment Group has organized a number of investment partnerships. Each of the partnerships is its own ultimate parent, but ABC makes the investment decisions for all of the partnerships. One of the partnerships intends to make a reportable acquisition. For purposes of the Notification and Report Form, each of the other investment partnerships, and

[434] When Congress passed the HSR Act, it created minimum dollar thresholds for mandatory premerger reporting. In 2000, Congress amended the HSR Act to require an annual adjustment of these thresholds based on the change in gross national product. As a result, reportability under the Act changes from year to year as the statutory thresholds adjust. The most recent adjustment became effective March 6, 2024.

[435] Estimated cost for acquiring and acquired persons combined in transactions with overlaps using highest average cost (242 hours × $583) divided by the $119,500,000 threshold.

[436] Estimated cost for acquiring and acquired persons combined in transactions with overlaps using highest average cost (242 hours × $583) divided by $1,000,000,000.

ABC Investment Group itself, are associates of the partnership that is the acquiring person. In the Minority-Held Entity Overlaps section of the Notification and Report Form, the acquiring person will disclose any of its 5 percent or greater minority holdings that generate revenues in any of the same NAICS codes as the acquired entity(s) in the reportable transaction. In this same section, the acquiring person would also report any 5 percent or greater minority holdings of its associates in the acquired entity(s) and in any entities that generate revenues in any of the same NAICS codes as the acquired entity(s). In the Controlled Entity Geographic Overlaps section of the Notification and Report Form, the acquiring person will indicate whether there are any NAICS code overlaps between the acquired entity(s) in the reportable transaction, on the one hand, and the acquiring person and all of its associates, on the other.

* * * * *

4. CORP1 controls GP1 and GP2, the sole general partners of private equity funds LP1 and LP2 respectively. LP1 controls GP3, the sole general partner of MLP1, a newly formed master limited partnership which is its own ultimate parent entity. LP2 controls GP4, the sole general partner of MLP2, another master limited partnership that is its own ultimate parent entity and which owns and operates a natural gas pipeline. In addition, GP4 holds 25 percent of the voting securities of CORP2, which also owns and operates a natural gas pipeline.

MLP1 is acquiring 100 percent of the membership interests of LLC1, also the owner and operator of a natural gas pipeline. MLP2, CORP2 and LLC1 all derive revenues in the same NAICS code (Pipeline Transportation of Natural Gas). All of the entities under common investment management of CORP1, including GP4 and MLP2, are associates of MLP1, the acquiring person.

In the Controlled Entity Geographic Overlaps section of the Notification and Report Form, MLP1 would identify MLP2 as an associate that has an overlap in pipeline transportation of natural gas with LLC1, the acquired person. Because GP4 does not control CORP2 it would not be listed in this section, however, GP4 would be listed in the Minority-Held Entity Overlaps section of the Notification and Report Form as an associate that holds 25 percent of the voting securities of CORP2. In this example, even though there is no direct overlap between the acquiring person (MLP1) and the acquired person (LLC1), there is an overlap reported for an associate (MLP2) of the acquiring person in the Controlled Entity Geographic Overlaps section of the Notification and Report Form.

5. LLC is the investment manager for and ultimate parent entity of general partnerships GP1 and GP2. GP1 is the general partner of LP1, a limited partnership that holds 30 percent of the voting securities of CORP1. GP2 is the general partner of LP2, which holds 55 percent of the voting securities of CORP1. GP2 also directly holds 2 percent of the voting securities of CORP1. LP1 is acquiring 100 percent of the voting securities of CORP2. CORP1 and CORP2 both derive revenues in the same NAICS code (Industrial Gas Manufacturing).

All the entities under common investment management of the managing entity LLC, including GP1, GP2, LP2 and CORP1 are associates of LP1. In Minority-Held Entity Overlaps section of the Notification and Report Form, LP1 would report its own holding of 30 percent of the voting securities of CORP1. It would not report the 55 percent holding of LP2 in Minority-Held Entity Overlaps section of the Notification and Report Form because it is greater than 50 percent. It also would not report GP2's 2 percent holding because it is less than 5 percent. In the Controlled Entity Geographic Overlaps section, LP1 would identify both LP2 and CORP1 as associates that derive revenues in the same NAICS code as CORP2.

6. LLC is the investment manager for GP1 and GP2 which are the general partners of limited partnerships LP1 and LP2, respectively. LLC holds no equity interests in either general partnership but manages their investments and the investments of the limited partnerships by contract. LP1 is newly formed and its own ultimate parent entity. It plans to acquire 100 percent of the voting securities of CORP1, which derives revenues in the NAICS code for Consumer Lending. LP2 controls CORP2, which derives revenues in the same NAICS code. All of the entities under the common management of LLC, including LP2 and CORP2, are associates of LP1. For purposes of the Controlled Entity Geographic Overlaps section of the Notification and Report Form, LP1 would report LP2 and CORP2 as associates that derive revenues in the NAICS code that overlaps with CORP1. Even though the investment manager (LLC) holds no equity interest in GP1 or GP2, the contractual arrangement with them makes them associates of LP1 through common management.

* * * * *

(r)(1) *Foreign entity or government of concern.* The term *foreign entity or government of concern* means:

(i) An entity that is a foreign entity of concern as that term is defined in section 40207 of the Infrastructure Investment and Jobs Act (42 U.S.C. 18741(a)(5)); or

(ii) A government, or an agency thereof, of a foreign country that is a covered nation as that term is defined in section 40207 of the Infrastructure Investment and Jobs Act (42 U.S.C. 18741(a)(5)(C)).

(2) *Subsidy.* The term *subsidy* has the meaning given to the term in part IV of title VII of the Tariff Act of 1930 (19 U.S.C. 1677(5)(B)).

PART 803—TRANSMITTAL RULES

■ 3. The authority citation for part 803 is revised to read as follows:

Authority: 15 U.S.C. 18a(d); 15 U.S.C. 18b.

■ 4. Amend § 803.2 by:
■ a. Revising paragraph (a);
■ b. Removing paragraph (b) and the undesignated example following paragraph (b);
■ c. Redesignating paragraphs (c), (d), (e), and (f) as paragraphs (b), (c), (d), and (e), respectively; and
■ d. Revising newly redesignated paragraphs (b), (d), and (e). The revisions read as follows:

§ 803.2 Instructions applicable to Notification and Report Form.

(a)(1) The notification required by the act shall be filed by the preacquisition ultimate parent entity, or by any entity included within the person authorized by such preacquisition ultimate parent entity to file notification on its behalf. In the case of a natural person required by the act to file notification, such notification may be filed by his or her legal representative: *Provided however,* That notwithstanding §§ 801.1(c)(2) and 801.2 of this chapter, only one notification shall be filed by or on behalf of a natural person, spouse and minor children with respect to an acquisition as a result of which more than one such natural person will hold voting securities of the same issuer.

Example 1 to paragraph (a)(1). Jane Doe, her husband, and minor child collectively hold more than 50 percent of the shares of family corporation F. Therefore, Jane Doe (or her husband or minor child) is the ''ultimate parent entity'' of a ''person'' composed to herself (or her husband or minor child) and F; see § 801.1(a)(3), (b), and (c)(2) of of this chapter. If corporation F is to

acquire corporation X, under this paragraph only one notification is to be filed by Jane Doe, her husband, and minor child collectively.

(2) Persons that are both acquiring and acquired persons shall submit separate forms, one as the acquiring person and one as the acquired person, following the appropriate instructions for each.

(b) In response to the Revenue and Overlaps section of the Notification and Report Form, information need not be supplied with respect to assets or voting securities to be acquired, the acquisition of which is exempt from the requirements of the act.

* * * * *

(d) For annual reports and audit reports required by the Notification and Report Form, a person filing the notification may, instead of submitting a document, provide a cite to an operative internet address directly linking to the document, if the linked document is complete and payment is not required to access the document. If an internet address becomes inoperative during the waiting period, or the document is otherwise rendered inaccessible or incomplete, upon notification by the Commission or Assistant Attorney General, the parties must make the document available to the agencies by either referencing an operative internet address where the complete document may be accessed or by providing electronic copies to the agencies as provided in § 803.10(c)(1) by 5 p.m. Eastern Time on the next regular business day. Failure to make the document available, by the internet or by providing electronic copies, by 5 p.m. Eastern Time on the next regular business day, will result in notice of a deficient filing pursuant to § 803.10(c)(2).

(e) Filings must comply with all format requirements set forth at the Premerger Notification Office pages at *https://www.ftc.gov*. The use of any format not specified as acceptable, or any other failure to comply with the applicable format requirements, shall render the entire filing deficient within the meaning of § 803.10(c)(2).

■ 5. Amend § 803.5 by redesignating the paragraph (a)(1) heading as the paragraph (a) heading and republishing it and revising paragraphs (a)(1) introductory text, (a)(3), and (b) to read as follows:

§ 803.5 Affidavits required.

(a) *Section 801.30 acquisitions.* (1) For acquisitions to which § 801.30 of this chapter applies, the notification required by the act from each acquiring person shall contain an affidavit attesting that the issuer or unincorporated entity whose voting securities or non-corporate interests are to be acquired has received written notice delivered to an officer (or a person exercising similar functions in the case of an entity without officers) by email, certified or registered mail, wire, or hand delivery, at its principal executive offices, of:

* * * * *

(3) The affidavit required by this paragraph must have attached to it a copy of the written notice received by the acquired person pursuant to paragraph (a)(1) of this section.

(b) *Non-section 801.30 acquisitions.* For acquisitions to which § 801.30 of this chapter does not apply, the notification required by the act shall contain an affidavit attesting that a contract, agreement in principle, or letter of intent to merge or acquire has been executed, and further attesting to the good faith intention of the person filing notification to complete the transaction. If the executed agreement is not the definitive agreement, the affidavit must attest that a dated document that provides sufficient detail about the scope of the entire transaction that the parties intend to consummate has also been submitted.

■ 6. Revise § 803.8 to read as follows:

§ 803.8 Foreign language documents.

Documentary materials or information in a foreign language required to be submitted at the time of filing a Notification and Report Form and in response to a request for additional information or documentary material must be submitted with verbatim English language translations. All verbatim translations must be accurate and complete.

■ 7. Amend § 803.9 by revising paragraph (c) to read as follows:

§ 803.9 Filing fee.

* * * * *

(c) For a reportable transaction in which the acquiring entity has two ultimate parent entities, both ultimate parent entities are acquiring persons; however, if the responses for both ultimate parent entities would be the same for the NAICS Codes section of the Notification and Report Form, only one filing fee is required in connection with the transaction.

* * * * *

■ 8. Amend § 803.10 by revising paragraphs (c)(1)(i) and (ii) and redesignating the example following paragraph (c)(1)(ii) as Example 1 to paragraph (c)(1).

The revisions read as follows:

§ 803.10 Running of time.

* * * * *

(c) * * *

(1) * * *

(i) The date of receipt shall be the date of electronic submission if such date is not a Saturday, Sunday, a legal public holiday (as defined in 5 U.S.C. 6103(a)), or a legal public holiday's observed date, and the submission is completed by 5 p.m. Eastern Time. In the event electronic submission is unavailable, the FTC and DOJ may designate procedures for the submission of the filing. Notification of the alternate delivery procedures will normally be made through a press release and, if possible, on the *https://www.ftc.gov* website.

(ii) Delivery effected after 5 p.m. Eastern Time on a business day, or at any time on any day other than a business day, shall be deemed effected on the next following business day. If submission of all required filings is not effected on the same date, the date of receipt shall be the latest of the dates on which submission is effected.

* * * * *

■ 9. Amend § 803.12 by revising paragraph (c)(1)(iii) to read as follows:

§ 803.12 Withdraw and refile notification.

* * * * *

(c) * * *

(1) * * *

(iii) The resubmitted notification is recertified, and the submission, as it relates to Transaction-Specific Agreements, Transaction-Related Documents, and Subsidies from Foreign Entities of Concern sections of the Notification and Report Form, is updated to the date of the resubmission;

* * * * *

■ 10. Revise appendices A and B to part 803 to read as follows:

Appendix A to Part 803—*Notification and Report Form for Certain Mergers and Acquisitions*

BILLING CODE 6750–01–P

16 C.F.R. Part 803 – Appendix

CERTIFICATION

PENALTIES FOR FALSE STATEMENTS

Federal law provides criminal penalties, including up to twenty years imprisonment, for any person who knowingly alters, destroys, mutilates, conceals, covers up, falsifies, or makes a false entry in any record, document, or tangible object with the intent to impede, obstruct, or influence an ongoing or anticipated federal investigation (see, e.g., Section 1519 of Title 18, United States Code.). It is also a criminal offense to knowingly make a false statement in a federal investigation, obstruct a federal investigation, or conspire to obstruct justice or obstruct or impede the lawful functioning of the government (see, e.g., Sections 371, 1001, and 1505 of Title 18, United States Code).

CERTIFICATION

This NOTIFICATION AND REPORT FORM, together with any and all appendices and attachments thereto, was prepared and assembled under my supervision in accordance with instructions issued by the Commission. Subject to the recognition that, where so indicated, reasonable estimates have been made because books and records do not provide the required data, the information is, to the best of my knowledge, true, correct, and complete in accordance with the statute and rules.

I acknowledge that the Commission or the Assistant Attorney General of the Antitrust Division of the Department of Justice may, prior to the expiration of the initial waiting period pursuant to 15 U.S.C. § 18a, require the submission of additional information or documentary material relevant to the proposed transaction.

My commission expires: _____

Name of Acquiring Person UPE:	Date:

16 C.F.R. Part 803 – Appendix NOTIFICATION AND REPORT FORM FOR CERTAIN MERGERS AND ACQUISITIONS	Approved by OMB 3084-0005

THE INFORMATION REQUIRED TO BE SUPPLIED ON THESE ANSWER SHEETS IS SPECIFIED IN THE INSTRUCTIONS

THIS FORM IS REQUIRED BY LAW and must be filed separately by each person that, by reason of a merger, consolidation, or acquisition, is subject to § 7A of the Clayton Act, 15 U.S.C. § 18a, and rules promulgated thereunder (hereinafter referred to as "the rules" or by section number). The rules may be found at 16 CFR Parts 801-03. Failure to file this **Notification and Report Form**, and to observe the required waiting period before consummating the acquisition in accordance with the applicable provisions of 15 U.S.C. § 18a and the rules, subjects any "person," as defined in the rules, or any individuals responsible for noncompliance, to liability for a penalty for each day during which such person is in violation of 15 U.S.C. § 18a. The maximum daily civil penalty amount is listed in 16 C.F.R. § 1.98(a).

Pursuant to the Hart-Scott-Rodino Act, information and documentary material filed in or with this Form is confidential. It is exempt from disclosure under the Freedom of Information Act and may be made public only in an administrative or judicial proceeding, or disclosed to Congress or to a duly authorized committee or subcommittee of Congress.

DISCLOSURE NOTICE - Public reporting burden for this report is estimated at 105 hours per response, including time for reviewing instructions, searching existing data sources, gathering, and maintaining the data needed, and completing and reviewing the collection of information. Send comments regarding the burden estimate or any other aspect of this report, including suggestions for reducing this burden to:

Premerger Notification Office
Federal Trade Commission
400 7th St. SW
Washington, DC 20024

and

Office of Information and Regulatory Affairs
Office of Management and Budget
Washington, DC 20503

Under the **Paperwork Reduction Act**, as amended, an agency may not conduct or sponsor, and a person is not required to respond to, a collection of information unless it displays a currently valid OMB control number. That number is 3084-0005, which also appears above.

Privacy Act Statement--Section 18a(a) of Title 15 of the U.S. Code authorizes the collection of this information. The primary use of information submitted on this Form is to determine whether the reported merger or acquisition may violate the antitrust laws. Taxpayer information is collected, used, and may be shared with other agencies and contractors for payment processing, debt collection and reporting purposes. Furnishing the information on the Form is voluntary. Consummation of an acquisition required to be reported by the statute cited above without having provided this information may, however, render a person liable to civil penalties up to the amount listed in 16 C.F.R. § 1.98(a) per day. We also may be unable to process the Form unless you provide all of the requested information.

This page may be omitted when submitting the Form.

CERTIFICATION

PENALTIES FOR FALSE STATEMENTS

Federal law provides criminal penalties, including up to twenty years imprisonment, for any person who knowingly alters, destroys, mutilates, conceals, covers up, falsifies, or makes a false entry in any record, document, or tangible object with the intent to impede, obstruct, or influence an ongoing or anticipated federal investigation (see, e.g., Section 1519 of Title 18, United States Code.). It is also a criminal offense to knowingly make a false statement in a federal investigation, obstruct a federal investigation, or conspire to obstruct justice or obstruct or impede the lawful functioning of the government (see, e.g., Sections 371, 1001, and 1505 of Title 18, United States Code).

CERTIFICATION

This NOTIFICATION AND REPORT FORM, together with any and all appendices and attachments thereto, was prepared and assembled under my supervision in accordance with instructions issued by the Commission. Subject to the recognition that, where so indicated, reasonable estimates have been made because books and records do not provide the required data, the information is, to the best of my knowledge, true, correct, and complete in accordance with the statute and rules.

I acknowledge that the Commission or the Assistant Attorney General of the Antitrust Division of the Department of Justice may, prior to the expiration of the initial waiting period pursuant to 15 U.S.C. § 18a, require the submission of additional information or documentary material relevant to the proposed transaction.

Name (Please Print or Type)	**Title**
Signature	**Date**

☐ **Sworn under penalty of perjury**

Pursuant to 28 U.S.C. § 1746, I declare under penalty of perjury under the laws of the United States of America that the foregoing is true and correct.

Signature	**Executed Date**

☐ **Notarized**

Subscribed and sworn to before me at the: Seal:

My commission expires: _____

Name of Acquired Person UPE:	**Date:**

16 C.F.R. Part 803 – Appendix **NOTIFICATION AND REPORT FORM FOR CERTAIN MERGERS AND ACQUISITIONS**	Approved by OMB 3084-0005

THE INFORMATION REQUIRED TO BE SUPPLIED ON THESE ANSWER SHEETS IS SPECIFIED IN THE INSTRUCTIONS

THIS FORM IS REQUIRED BY LAW and must be filed separately by each person that, by reason of a merger, consolidation, or acquisition, is subject to § 7A of the Clayton Act, 15 U.S.C. § 18a, and rules promulgated thereunder (hereinafter referred to as "the rules" or by section number). The rules may be found at 16 CFR Parts 801-03. Failure to file this **Notification and Report Form**, and to observe the required waiting period before consummating the acquisition in accordance with the applicable provisions of 15 U.S.C. § 18a and the rules, subjects any "person," as defined in the rules, or any individuals responsible for noncompliance, to liability for a penalty for each day during which such person is in violation of 15 U.S.C. § 18a. The maximum daily civil penalty amount is listed in 16 C.F.R. § 1.98(a).

Pursuant to the Hart-Scott-Rodino Act, information and documentary material filed in or with this Form is confidential. It is exempt from disclosure under the Freedom of Information Act and may be made public only in an administrative or judicial proceeding, or disclosed to Congress or to a duly authorized committee or subcommittee of Congress.

DISCLOSURE NOTICE - Public reporting burden for this report is estimated at 105 hours per response, including time for reviewing instructions, searching existing data sources, gathering, and maintaining the data needed, and completing and reviewing the collection of information. Send comments regarding the burden estimate or any other aspect of this report, including suggestions for reducing this burden to:

Premerger Notification Office
Federal Trade Commission
400 7th St. SW
Washington, DC 20024

and

Office of Information and Regulatory Affairs
Office of Management and Budget
Washington, DC 20503

Under the **Paperwork Reduction Act**, as amended, an agency may not conduct or sponsor, and a person is not required to respond to, a collection of information unless it displays a currently valid OMB control number. That number is 3084-0005, which also appears above.

Privacy Act Statement--Section 18a(a) of Title 15 of the U.S. Code authorizes the collection of this information. The primary use of information submitted on this Form is to determine whether the reported merger or acquisition may violate the antitrust laws. Taxpayer information is collected, used, and may be shared with other agencies and contractors for payment processing, debt collection and reporting purposes. Furnishing the information on the Form is voluntary. Consummation of an acquisition required to be reported by the statute cited above without having provided this information may, however, render a person liable to civil penalties up to the amount listed in 16 C.F.R. § 1.98(a) per day. We also may be unable to process the Form unless you provide all of the requested information.

This page may be omitted when submitting the Form.

Appendix B to Part 803—Instructions to the Notification and Report Form for Certain Mergers and Acquisitions

Antitrust Improvements Act
Notification for Certain Mergers and Acquisitions — **Acquiring Person Instructions**

GENERAL INSTRUCTIONS AND INFORMATION

These instructions specify the information that must be submitted pursuant to § 803.1(a) of the premerger notification rules, 16 CFR Parts 801-803 ("the Rules"). Submitted materials must be provided to the Federal Trade Commission ("FTC") and to the Antitrust Division of the Department of Justice ("DOJ") (together, "the Agencies").

► Information

The central office for information and assistance concerning the Rules is:

Premerger Notification Office
Federal Trade Commission
400 7th Street, S.W.
Washington, D.C. 20024
Phone: (202) 326-3100
E-mail: HSRhelp@ftc.gov for Rules questions
Premerger@ftc.gov for filing information

Copies of these Instructions, the Hart-Scott-Rodino Antitrust Improvements Act of 1976 ("the Act"), the Rules, FTC final rules (including their Statements of Basis and Purpose) published in the Federal Register, as well as information to assist in submitting the required information are available at the FTC's Premerger Notification Office ("PNO") website.

► Definitions and Explanation of Terms

Unless otherwise indicated, the definitions provided in the Rules apply to these Instructions.

Dollar Values
All financial information should be expressed in millions of dollars rounded to the nearest hundred thousand.

Fee Information
The filing fee is based on the aggregate total value of assets, voting securities, and controlling non-corporate interests to be held as a result of the acquisition. Filing fee tiers are adjusted annually pursuant to 15 U.S.C. § 18a note, based on the change in gross national product, in accordance with 15 U.S.C. § 19(a)(5). Filing fees increase annually by the percentage increase, if any, in the consumer price index ("CPI") over the CPI for the fiscal year ending September 30, 2022, pursuant to 15 U.S.C. § 18a note. For current fee information, see the PNO website.

North American Industry Classification System (NAICS) Data
When reporting information by 6-digit NAICS code, refer to the North American Industry Classification System - United States, 2022, published by the Executive Office of the President, Office of Management and Budget, available at https://www.census.gov/naics/. This website also provides guidance in choosing the proper code(s).

Notification Thresholds
Notification thresholds are adjusted annually based on the change in gross national product, in accordance with 15 U.S.C. § 19(a)(5). See § 801.1(h). The current threshold values can be found at Current Thresholds.

Person Filing and Filing Person
The terms "person filing" or "filing person" mean the ultimate parent entity ("UPE"). See § 801.1(a)(3). The terms are used herein interchangeably.

Select 801.30 Transaction
A transaction to which § 801.30 applies **and** where (1) the acquisition would not confer control, (2) there is no agreement (or contemplated agreement) between any entity within the acquiring person and any entity within the acquired person governing any aspect of the transaction, and (3) the acquiring person does not have, and will not obtain, the right to serve as, appoint, veto, or approve board members, or members of any similar body, of any entity within the acquired person or the general partner or management company of any entity within the acquired person. Executive compensation transactions also qualify as select 801.30 transactions.

Supervisory Deal Team Lead
The individual who has primary responsibility for supervising the strategic assessment of the deal, and who would not otherwise qualify as a director or officer.

Target
The target includes all entities and assets to be acquired by the acquiring person from the acquired person in the reported transaction.

Year
All references to "year" refer to calendar year. If data are not available on a calendar year basis, supply the requested data for the fiscal year reporting period that most nearly corresponds to the calendar year specified. References to "most recent year" mean the most recently completed calendar or fiscal year for which the requested information is available.

► Filing

If the UPE is both an acquiring and acquired person, separate filings must be submitted, one as the acquiring person and one as the acquired person, following the appropriate instructions for each. See § 803.2(a)(2).

Filings should be submitted electronically consistent with the instructions on the PNO website. If the electronic submission platform is unavailable, the Agencies may announce sites for delivery through the media and, if possible, at the PNO website.

► Responses

Documents, including the Form, should be produced as (1) a searchable PDF from which text can be copied or (2) an Excel file.

For Business Documents (see below), check the box to indicate whether any part of the document is privileged and then provide the document number, title, and estimated date. If the acquiring person has identified (1) a NAICS overlap, (2) an overlap within the Overlap Description, or (3) a supply relationship within the Supply Relationships Description, also provide the following:

1. Author(s) (and job title(s)) for documents created by the acquiring person; or
2. Recipient(s) or supervisor(s) (and job title(s)) of documents created by third parties as part of an engagement with the acquiring person.

If a group of people prepared the document, list all the authors and their titles, identifying the principal authors. Alternatively, it is acceptable to indicate that the document was prepared under the supervision of the lead author and to provide the name and title of that author. Similarly, if the acquiring person engaged a third party to prepare a document, provide the name of the third party, and the name, title, and company name for the individual within the acquiring person who supervised the creation of the document, or for whom the document was prepared. For materials received from a third party that was not engaged by the acquiring person, only the name of the third party is required.

If the acquiring person submits documents in addition to what is required, such documents should be identified as "Voluntary". See § 803.1(b).

Submit only one copy of identical responsive documents.

► Privilege

See § 803.3(d). For privileged documents, the filing person must also provide the following in a log:

1. The privilege type (redacted or withheld);
2. The privilege claim;
3. Addressee(s) and all recipients, with company name and title, of the original and any copies;
4. Subject matter;
5. Document's present location; and
6. Who has control over it.

If a privileged document was circulated to a group, such as the board or an investment committee, the name of the group is sufficient, but the filing person should be prepared to disclose the names and titles/positions of the individual group members, if requested.

If the claim of privilege is based on advice from inside and/or outside counsel, the name of the inside and/or outside counsel providing the advice (and the law firm, if applicable) must be provided. If several lawyers participated in providing advice, identifying lead counsel is sufficient. In identifying who controls a document, the name of the law firm is sufficient.

► Translations

Materials or information in a language other than English must be translated into English, with the English translation attached to the original version. See § 803.8.

► Non-Compliance

If unable to answer any item fully, provide such information as is available and a statement of reasons for non-compliance as required by § 803.3. If exact answers to any item cannot be given, enter best estimates and indicate the source or basis of such estimates. Add an endnote with the notation "est." to any item where data are estimated.

► Limited Response

Information need not be supplied regarding assets, voting securities, or non-corporate interests currently being acquired when their acquisition is exempt under the Act or Rules. See § 803.2(c).

FEE INFORMATION

Total Expected Filing Fee
Indicate the value of the total required fee for the transaction.

Parties Paying the Fee
Indicate which filing person(s) is paying the filing fee and, if applicable, whether the fee is being paid by multiple entities. For each entity within the acquiring person paying a portion of the fee, provide the name of the payer, the amount paid, the payment method, and the Electronic Wire Transfer (EWT) confirmation number or check number.

Note on Paying by EWT
In order for the FTC to track payment, the payer must provide information required by the Fedwire Instructions to the financial institution initiating the EWT. A template of the Fedwire Instructions is available at the PNO website on the Filing Fee Information page.

Note on Paying by Check
The FTC strongly discourages check payments because handling a physical check will create a delay in processing the Form. However, if an EWT cannot be arranged, the FTC will accept a check, sent to Financial Operations. Cashiers' or certified checks are preferred. Make the check payable to the Federal Trade Commission and deliver to:

Federal Trade Commission
Financial Operations Division
600 Pennsylvania Ave, Drop H-790
Washington, DC 20580

Please note that the waiting period may be delayed until the fee has been confirmed.

GENERAL INFORMATION

Special Filing Types
Indicate whether the filing is a post-consummation filing, or whether the transaction is a cash tender offer or bankruptcy that is subject to Section 363(b) of the Bankruptcy Code (11 U.S.C. § 363).

Early Termination
Indicate whether the acquiring person requests early termination of the waiting period. Notification of each grant of early termination will be published in the Federal Register, as required by 15 U.S.C. § 18a(b)(2), and on the PNO website. Note that if either person in any transaction requests early termination, it may be granted and published.

ULTIMATE PARENT ENTITY (UPE) INFORMATION

► **UPE Details**

Name
Provide the name, headquarters address, and website (if one exists) of the person filing notification. The name of the person filing is the name of the UPE of the acquiring person. See § 801.1(a)(3).

Entity Type
Specify whether the UPE is a corporation, unincorporated entity, natural person, or other entity type (specify). See § 801.1.

Filing Made on Behalf of the UPE
If the filing is being made on behalf of the UPE by another entity within the acquiring person authorized by the UPE to file the notification on its behalf pursuant to § 803.2(a) or filed pursuant to § 803.4 on behalf of a foreign person, provide the name and mailing address of the entity filing the notification on behalf of the UPE.

Contact Information
Provide the name, firm/company name, address, telephone number, and e-mail address of two individuals (primary and secondary) to contact regarding the filing. See § 803.20(b)(2)(ii).

Additionally, provide the name, firm/company name, address, telephone number, and e-mail address of an individual located in the United States designated for the limited purpose of receiving notice of the issuance of a request for additional information or documentary material. See § 803.20(b)(2).

UPE Annual Reports and Financial Information

- **Central Index Key**
  If the UPE of the acquiring person files annual reports (Form 10-K or Form 20-F) with the United States Securities and Exchange Commission (SEC), provide the Central Index Key (CIK) number.

- **Annual Reports and Audit Reports**
  Provide the most recent annual reports and/or annual audit reports (or, if audited is unavailable, unaudited) of the UPE of the acquiring person.

  Natural person UPEs should not provide personal balance sheets or tax returns. Natural person UPEs should leave this section blank and instead provide the most recent reports for the highest-level entity(ies) that controls the acquiring entity under "UPE Structure."

  The person filing notification may incorporate a document responsive to this item by reference to an internet address directly linking to the document. See § 803.2(e).

- **Date of Report(s)**
  Provide the date of the most recent annual report(s) and/or audit reports (or, if audited is unavailable, unaudited) of the UPE of the acquiring person.

- **Size of Person**
  If applicable, indicate whether the person filing notification stipulates that the acquiring person meets either the higher or lower size of person test. See 15 U.S.C. § 18a(a), § 801.11.

Minority Shareholders or Interest Holders
This section requires the acquiring person to report the name, headquarters mailing address, and approximate percentage held by certain minority holders of (1) the acquiring entity, (2) any entity directly or indirectly controlled by the acquiring entity, (3) any entity that directly or indirectly controls the acquiring entity, and (4) any entity within the acquiring person that has been or will be created in contemplation of, or for the purposes of, effectuating the transaction (each a "covered entity").

If a covered entity is not a limited partnership, provide the required information for each individual or entity that currently holds, or will hold as a result of the transaction, 5% or more but less than 50% of the voting securities or non-corporate interests of any covered entity, starting with the UPE.

If a covered entity is a limited partnership, provide the required information for its (a) general partner, regardless of the percentage it holds, and (b) limited partners that (i) currently hold, or will hold as a result of the transaction, 5% or more but less than 50% of the non-corporate interests of the covered entity, and (ii) have or will have the right to serve as, nominate, appoint, veto, or approve board members, or individuals with similar responsibilities, of any covered entity, or of the general partner or management company of a covered entity.

If a minority holder is related to a master limited partnership, fund, investment group, or similar entity that does business under a common name, the d/b/a or "street name" of such group should also be listed, if known to the acquiring person.

If the identity of minority investors or percentages to be held of a covered entity is not finalized at the time of filing, provide good faith estimates and explain in an endnote.

► Acquiring Person Structure

Entities Within the Acquiring Person
List the name, city, state, zip code, and country of all U.S. entities, and all foreign entities that have sales in or into the United States, that are included within the acquiring person. Entities with total assets of less than $10 million may be omitted. Alternatively, the acquiring person may report all entities within it. The acquiring person must also list all names under which the entities do business (e.g., d/b/a names).

The list of entities should be organized by operating company or operating business ("top-level entity"), if applicable. Filings for select 801.30 transactions need not include d/b/a names and the list of entities can be organized as kept in the ordinary course of business.

Annual Reports and Audit Reports
For the acquiring entity(ies) and any entity controlled by the acquiring person whose revenues contribute to a NAICS overlap or any overlap identified in the Overlap Description, provide the CIK number(s) if annual reports (Form 10-K or Form 20-F) are filed with the SEC, and the most recent annual or audit report(s).

Natural person UPEs must also provide the most recent annual report or audit report and CIK number for the highest-level entity that controls the acquiring entity.

► Additional Acquiring Person Information

Ownership Structure
Describe the ownership structure of the acquiring entity.

For transactions where a fund or master limited partnership is the UPE, provide any existing organizational chart that shows the relationship of any entities that are affiliates or associates. If such an organizational chart does not exist, there is no requirement to create one.

Officers and Directors
For all entities within the acquiring person responsible for the development, marketing, or sale of products or services that are identified as overlaps within the Overlap Description or as supply relationships within the Supply Relationships Description:

- List all current officers and directors (or in the case of unincorporated entities, individuals exercising similar functions) and those who have served in one of these positions within the three months before filing that also serve as an officer or director of another entity that derives revenue in the same NAICS codes reported by the target. For each, provide the name of all such entities. If NAICS codes are unavailable, list all such entities that have operations in the same industry, based on the knowledge or belief of the acquiring person or the identified individual.

For the acquiring entity, entities the acquiring entity directly or indirectly controls, entities that directly or indirectly control the acquiring entity, and entities within the acquiring person that have been or will be created as a result of or as contemplated by the transaction:

- List all current officers and directors (or in the case of unincorporated entities, individuals exercising similar functions) as well as those who are likely to serve in one of these positions that also serve as an officer or director of another entity that derives revenue in the same NAICS codes reported by the target. For each, provide the name of all such entities. If NAICS codes are unavailable, list all such entities that have operations in the same industry, based on the knowledge or belief of the acquiring person or the identified individual. If the identities of the prospective officers or directors are unknown, briefly describe in an endnote who will have the authority to select them.

No filer is required to disclose any individual's role as an officer, director, or member of any non-profit entity organized for a religious or political purpose, even if that entity carries on substantial commerce. Organize the response by entity and include entities that are not yet created but are expected to be created as a result of or as contemplated by the transaction.

TRANSACTION INFORMATION

► Parties

List the name and mailing address of each acquiring and acquired person and each acquiring and acquired entity. Do not list entities controlled by an acquired entity.

Acquiring UPE
Provide the name, headquarters address, and website of the acquiring person.

Acquiring Entity(ies)
If an entity other than the acquiring UPE is making the acquisition, provide the name, mailing address, and website of that entity.

Acquired UPE
Provide the name, headquarters address, and website of the acquired person.

Target(s)
If the assets, voting securities, or non-corporate interests of an entity other than the acquired UPE are being acquired, provide the name, mailing address, and website of that entity.

► Transaction Details

801.30 Transaction
Indicate whether the transaction is subject to § 801.30 and if so, what type(s), including select 801.30.

Transaction Type
Indicate whether the transaction is any of the following (select all that apply):

- Acquisition of voting securities;
- Acquisition of non-corporate interests;
- Acquisition of assets;
- Merger (see § 801.2);
- Consolidation (see § 801.2);
- Formation of a joint venture, other corporation, or unincorporated entity (see §§ 801.40 and 801.50);
- Acquisition subject to § 801.31;
- Secondary acquisition subject to § 801.4;
- Acquisition subject to § 801.2(e); or
- Other (specify)

Acquisition Details
Provide the requested information for the value and percentage of assets, voting securities, and non-corporate interests to be acquired. If a combination of assets, voting securities, and/or non-corporate interests is being acquired and allocation is not possible, note such information in an endnote.

For determining the percentage of voting securities, evaluate total voting power per § 801.12. For determining the percentage of non-corporate interests, evaluate the economic interests per § 801.1(b)(1)(ii).

To complete this item:

- State the percentage of voting securities already held by the acquiring person. See § 801.12.
- State the value of voting securities already held by the acquiring person. See § 801.10.
- State the total percentage of voting securities to be held by the acquiring person as a result of the acquisition. See § 801.12.
- State the total value of voting securities to be held by the acquiring person as a result of the acquisition. See § 801.10.
- State the percentage of non-corporate interests already held by the acquiring person. See § 801.1(b)(1)(ii).
- State the value of non-corporate interests already held by the acquiring person. See § 801.10.
- State the total percentage of non-corporate interests to be held by the acquiring person as a result of the acquisition. See §§ 801.10 and 801.1(b)(1)(ii).
- State the total value of non-corporate interests to be held by the acquiring person as a result of the acquisition. See § 801.10.
- State the total value of assets to be held by the acquiring person as a result of the acquisition. See § 801.10.
- State the aggregate total value of assets, voting securities, and non-corporate interests of the acquired person to be held by the acquiring person as a result of the acquisition. See §§ 801.10, 801.12, 801.13 and 801.14.

Notification Threshold
This item should only be completed when voting securities are being acquired. If more than voting securities are being acquired, respond to this item only regarding voting securities. Indicate the highest applicable threshold for which notification is being filed. See § 801.1(h).

- $50 million (as adjusted);
- $100 million (as adjusted);
- $500 million (as adjusted);
- 25% (if the value of voting securities to be held is greater than $1 billion, as adjusted);
- 50%; or
- N/A.

Note that the 50% notification threshold is the highest threshold and should be used for any acquisition of 50% or more of the voting securities of an issuer, regardless of the value of the voting securities. For instance, an acquisition of 100% of the voting securities of an issuer valued in excess of $500 million (as adjusted) would cross the 50% notification threshold, not the $500 million (as adjusted) threshold.

► Transaction Description

Business of the Acquiring Person
Describe the business operation(s) of the acquiring person.

Business of the Target
Describe the business operation(s) being acquired. If assets, describe the assets and whether they comprise an operating business.

Non-Reportable UPE(s)
Provide the names of any UPE that does not have a reporting obligation.

Transaction Description
Briefly describe the transaction, indicating whether assets, voting securities, or non-corporate interests (or some combination) are being acquired. Indicate what consideration will be received by each person and the scheduled consummation date of the transaction. Also identify any special circumstances that apply to the filing, such as whether part of the transaction is exempt under one of the exemptions found in Part 802.

If any attached transaction documents use code names to refer to the parties, provide an index identifying the code names.

Related Transactions
If the transaction that is the subject of this filing has related filings, indicate whether the related filing(s) (choose all that apply):

- Is a principal transaction that triggers one or more shareholder backside transactions;
- Is a shareholder backside transaction;
- Has more than one acquiring UPE;
- Has more than one acquired UPE;
- Has more than one reportable step;
- Is a joint venture;
- Is a consolidation;
- Is an exchange of assets;
- Has one or more filings in the alternative; or
- Has other circumstances that require more than one filing and if so, explain.

Provide all additional details regarding the related filings(s), including party names and transaction numbers, necessary to identify and connect all related filings.

► Transactions Subject to International Antitrust Notification

Indicate whether, to the knowledge or belief of the filing person at the time of filing, a non-U.S. antitrust or competition authority has been or will be notified of the transaction.

If yes, list the name of each such authority. Identify, to the knowledge or belief of the filing person at the time of filing, any jurisdiction where (1) a merger notification has been filed, (2) a merger notification is being prepared for filing, or (3) the parties have a good faith belief that a merger notification will be made, along with the dates of the filing or planned filing.

► Additional Transaction Information

Transaction Rationale

Except for select 801.30 transactions, identify and explain each strategic rationale for the transaction discussed or contemplated by the filing person or any of its officers, directors, or employees. If the rationale of acquiring entity is different from the UPE, submit an explanation for each. Identify each document produced in the filing that confirms or discusses the stated rationale(s). If documents produced in the filing are referenced, identify the specific page(s) that discusses the stated rationale(s).

Transaction Diagram

Except for select 801.30 transactions, submit a diagram of the transaction, if one exists. If such a diagram does not exist, there is no requirement to create one.

► Joint Ventures

Complete only if the acquisition is the formation of a joint venture corporation or unincorporated entity. See §§ 801.40 and 801.50.

Contributions

List the contributions that each person forming the joint venture corporation or unincorporated entity has agreed to make, specifying when each contribution is to be made and the value of the contribution as agreed by the contributors.

Consideration

Describe fully the consideration that each person forming the joint venture corporation or unincorporated entity will receive in exchange for its contribution(s).

Business Description

Describe generally the business in which the joint venture corporation or unincorporated entity will engage, including its principal types of products or activities, and the geographic areas in which it will do business.

NAICS Codes

Identify each 6-digit NAICS industry code in which the joint venture corporation or unincorporated entity will derive dollar revenues.

► Business Documents

Transaction-Related Documents

- **Competition Documents**
  Provide all studies, surveys, analyses, and reports prepared by or for any officer(s), director(s), or supervisory deal team lead for the purpose of evaluating or analyzing the acquisition with respect to market shares, competition, competitors, markets, potential for sales growth, or expansion into product or geographic markets. For unincorporated entities, provide such documents prepared by or for individuals exercising similar functions as officers and directors, as well as the supervisory deal team lead.

- **Confidential Information Memoranda**
  Provide all confidential information memoranda prepared by or for any officer(s) or director(s) (or, in the case of unincorporated entities, individuals exercising similar functions) of the UPE of the acquiring or of the acquiring entity(s) that specifically relate to the sale of the target. If no such confidential information memorandum exists, submit any document(s) given to any officer(s) or director(s) of the acquiring person meant to serve the function of a confidential information memorandum. This does not include ordinary course documents and/or financial data shared in the course of due diligence, except to the extent that such materials served the purpose of a confidential information memorandum when no such confidential information memorandum exists. Documents responsive to this item are limited to those produced within one year before the date of filing.

- **Third-Party Studies, Surveys, Analyses, and Reports**
  Provide all studies, surveys, analyses and reports prepared by investment bankers, consultants, or other third-party advisors ("third-party advisors") for any officer(s) or director(s) (or, in the case of unincorporated entities, individuals exercising similar functions) of the UPE of the acquiring person or of the acquiring entity(s) for the purpose of evaluating or analyzing market shares, competition, competitors, markets, potential for sales growth or expansion into product or geographic markets that specifically relate to the sale of the target. This item requires only materials developed by third party advisors during an engagement or for the purpose of seeking an engagement. Documents responsive to this item are limited to those produced within one year before the date of filing.

- **Synergies and Efficiencies**
  Provide all studies, surveys, analyses, and reports evaluating or analyzing synergies, and/or efficiencies prepared by or for any officer(s) or director(s) (or, in the case of unincorporated entities, individuals exercising similar functions) for the purpose of evaluating or analyzing the acquisition. Financial models without stated assumptions need not be provided.

Plans and Reports
Except for select 801.30 transactions, provide all regularly prepared plans and reports that were provided to the Chief Executive Officer (CEO) of the acquiring entity or any entity that it controls or is controlled by that analyze market shares, competition, competitors, or markets pertaining to any product or service of the acquiring person also produced, sold, or known to be under development by the target, as identified in the Overlap Description. Documents responsive to this item are limited to those prepared or modified within one year of the date of filing.

Except for select 801.30 transactions, provide all plans and reports that were provided to the Board of Directors of the acquiring entity or any entity that it controls or is controlled by that analyze market shares, competition, competitors, or markets pertaining to any product or service of the acquiring person also produced, sold, or known to be under development by the target, as identified in the Overlap Description. Documents responsive to this item are limited to those prepared or modified within one year of the date of filing.

► Agreements

Transaction-Specific Agreements
Furnish copies of all documents that constitute the agreement(s) related to the transaction, including, but not limited to, exhibits, schedules, side letters, agreements not to compete or solicit, and other agreements negotiated in conjunction with the transaction that the parties intend to consummate, and excluding clean team agreements.

Documents that constitute the agreement(s) (e.g., Agreement and Plan of Merger, Letter of Intent, Purchase and Sale Agreement, Asset Purchase Agreement, Stock/Securities Purchase Agreement) must be executed, while supporting agreements, such as employment agreements and agreements not to compete may be provided in draft form if that is the most recent version.

If the executed agreement is not the definitive agreement, submit a dated document that provides sufficient detail about the scope of the entire transaction that the parties intend to consummate, such as an agreement in principle, or term sheet, or the most recent draft agreement. See § 803.5. Such document should include information regarding some combination of the following terms: the identity of the parties; the structure of the transaction; the scope of what is being acquired; calculation of the purchase price; an estimated closing timeline; employee retention policies, including with respect to key personnel; post-closing governance; and transaction expenses or other material terms.

Note that transactions subject to § 801.30 and bankruptcies under 11 U.S.C. § 363(b) do not require an executed agreement. For bankruptcies, provide the order from the bankruptcy court.

Other Agreements Between the Acquiring Person and Target
Indicate whether the acquiring person has, or had within one year of filing, any contractual agreement(s) with the target. If so, indicate which type(s). If an agreement has terms that apply to more than one category, indicate each category that applies.

COMPETITION DESCRIPTIONS

This section is not applicable to select 801.30 transactions.

► Overlap Description

Briefly describe each of the principal categories of products and services (as reflected in documents created in the ordinary course of business) of the acquiring person.

In addition, list and briefly describe each of the current or known planned products or services of the acquiring person that competes with (or could compete with) a current or known planned product or service of the target, based on documents created in the ordinary course of business. Current or known planned products or services include those that the acquiring person or target researches, develops, manufactures, produces, sells, offers, provides, supplies, or distributes. Known planned products or services may be limited to those referenced in any submitted Business Document and should reflect the acquiring person's existing knowledge of the target's business. The acquiring and acquired person should not exchange information for the purpose of answering this item.

For each such product or service listed, provide:

1. The sales (in dollars) for the most recent year. For those products or services not generating revenue or whose performance is not measured by revenue in the ordinary course of business, provide projected revenue, estimates of the volume of products to be sold, time spent using the service, or any other metric by which the acquiring person measures performance (e.g., daily users, new signups).

2. A description of all categories of customers of the acquiring person that purchase or use the product or service (e.g., retailer, distributor, broker, government, military, educational, national account, local account, commercial, residential, or institutional). If no customers have yet used the product or service, provide the date that development of the product or service began; a description of the current stage in development, including any testing and regulatory approvals and any planned improvements or modifications; the date that development (including testing and regulatory approvals) was or will be completed; and the date that the product or service is expected to be sold or otherwise commercially launched.

3. The top 10 customers in the most recent year (as measured in dollars), and the top 10 customers for each customer category identified.

► Supply Relationships Description

Related Sales

List and briefly describe each product, service, or asset (including data) that the acquiring person has sold, licensed, or otherwise supplied, and which represented at least $10 million in revenue (including internal transfers) in the most recent year (1) to the target, or (2) to any other business that, to the acquiring person's knowledge or belief, uses the acquiring person's product, service, or asset to compete with the target's products or services, or as an input for a product or service that competes or is intended to compete with the target's products or services. Responses to this item should reflect the acquiring person's existing knowledge of the target's business; the acquiring and acquired person should not exchange information for the purpose of answering this item.

For each product, service, or asset listed, for the most recent year, provide:

1. The sales (in dollars) to (1) the target and (2) any other business that, to the acquiring person's knowledge or belief, uses the acquiring person's product, service, or asset to compete with the target's products or services, or as an input for a product or service that competes or is intended to compete with the target's products or services.

2. The top 10 customers (as measured in dollars) of the acquiring person that use the acquiring person's product, service, or asset to compete with the target's products or services, or as an input for a product or service that competes or is intended to compete with the target's products or services. For each such customer, describe the acquiring person's supply or licensing agreement (or other comparable terms of supply).

Related Purchases

List and briefly describe each product, service, or asset (including data) that the acquiring person incorporates as an input into any product or service and that the acquiring person has purchased, licensed, or otherwise obtained, and which represented at least $10 million in revenue (including internal transfers), in the most recent year (1) from the target or (2) from any other business that, to the acquiring person's knowledge or belief, competes with the target to provide a substantially similar product, service, or asset. Responses to this item should reflect the acquired person's existing knowledge of the acquiring person's business; the acquiring and acquired person should not exchange information for the purpose of answering this item.

For each product, service, or asset listed, for the most recent year, provide:

1. The purchased amount (in dollars) for (1) the target and (2) any other business that, to the acquiring person's knowledge or belief, competes with the target to provide a substantially similar product, service, or asset.

2. The top 10 suppliers (as measured in dollars) for the associated input product, service, or asset, and a description of the acquiring person's purchase or licensing agreement (or other comparable terms of purchase).

REVENUES AND OVERLAPS

► NAICS Codes

This item requests information regarding the industry categories for the acquiring person's products and services that derived revenue in the most recent year.

No Revenue
If there is no revenue to report, explain why.

NAICS Codes Describing U.S. Operations with Estimates of Revenue
Identify all 6-digit NAICS industry codes that describe the U.S. operations of the acquiring person, inclusive of all entities included within the acquiring person at the time the filing is made.

Responses must be organized by NAICS code in ascending order. For each code, provide the name of the operating business(es) that derive(s) revenue in that code and the estimated revenue range: less than $10 million; $10 million or more but less than $100 million; $100 million or more but less than $1 billion; or $1 billion or more.

Identify each 6-digit NAICS industry code in which both the acquiring person and target derive revenue by checking the overlap box.

For products and services that derived revenue in the most recent year in a non-manufacturing NAICS code, if the revenue is estimated at less than one million dollars, that code may be omitted so long as the code does not overlap with a code in which the target derived revenue from U.S. operations.

► Controlled Entity Geographic Overlaps

If, to the knowledge or belief of the person filing notification, the acquiring person, or any associate of the acquiring person (see § 801.1(d)(2)), derived any amount of dollar revenues in the most recent year from operations:

1. In industries within any 6-digit NAICS industry code in which the target also derived any amount of dollar revenues in the most recent year; or
2. In which a joint venture corporation or unincorporated entity will derive dollar revenues;

then for each such 6-digit NAICS industry code follow the instructions below for this section.

Note that if the target is a joint venture, the only overlaps that should be reported are those between the assets to be held by the joint venture and any assets of the acquiring person or its associates not contributed to the joint venture.

NAICS Overlaps of Controlled Entities
List each overlapping NAICS code and description. For each, list the name of each operating business within the acquiring person or associate of the acquiring person that has U.S. operations in the same NAICS code as the target and the name(s) under which the operating business does business, whether the listed entity is controlled by the acquiring person or an associate of the acquiring person, and provide the appropriate Geographic Market Information, based upon the NAICS code. Organize responses by NAICS code in ascending order.

Geographic Market Information
For each identified overlapping NAICS code, provide geographic information, as described below. Use the 2-digit postal codes for states and territories and provide the total number of states and territories at the end of the response.

Except in the case of those NAICS industries in the sectors, subsectors, and codes that require street-address level reporting, the person filing notification may respond with the word "national" if business is conducted in all 50 states.

- **State-Level Reporting**
  - Manufacturing Industries
    For each 6-digit NAICS code within the industry sector, subsector, or code listed below, list the states in which, to the knowledge or belief of the person filing the notification, the products in that 6-digit NAICS industry code produced by the acquiring person or associate of the acquiring person are sold without a significant change in their form (whether they are sold by the acquiring person or associate of the acquiring person or by others to whom such products have been sold or resold).

    31** through 33**** Manufacturing**, *except*:
    3115** Dairy Product Manufacturing
    311611 Animal (except Poultry) Slaughtering
    311613 Rendering and Meat Byproduct Processing
    311615 Poultry Processing
    31181* Bread and Bakery Product Manufacturing
    321*** Wood Product Manufacturing
    32221* Paperboard Container Manufacturing
    324*** Petroleum and Coal Products Manufacturing
    3251** Basic Chemical Manufacturing

325521 Plastics Materials and Resin Manufacturing
3271** Clay Product and Refractory Manufacturing
3272** Glass and Glass Product Manufacturing
3273** Cement and Concrete Product Manufacturing

- Wholesale Trade
For each 6-digit NAICS code within the industry sector, subsector, or code listed below, list the states or, if desired, portions thereof in which the customers of the acquiring person or associate of the acquiring person are located.

42** **Wholesale Trade**, *except*:
42331* Lumber, Plywood, Millwork, and Wood Panel Merchant Wholesalers
42333* Roofing, Siding, and Insulation Material Merchant Wholesalers
42344* Other Commercial Equipment Merchant Wholesalers
42345* Medical, Dental, and Hospital Equipment and Supplies Merchant Wholesalers
42346* Ophthalmic Goods Merchant Wholesalers
42349* Other Professional Equipment and Supplies Merchant Wholesalers
4239** Miscellaneous Durable Goods Merchant Wholesalers
4241** Paper and Paper Product Merchant Wholesalers
4242** Drug and Druggists' Sundries Merchant Wholesalers
42441* General Line Grocery Merchant Wholesalers
42442* Packaged Frozen Food Merchant Wholesalers
42451* Grain and Field Bean Merchant Wholesalers
42452* Livestock Merchant Wholesalers
4247** Petroleum and Petroleum Products Merchant Wholesalers
4248** Beer, Wine, and Distilled Alcoholic Beverage Merchant Wholesalers
42491* Farm Supplies Merchant Wholesalers
42495* Paint, Varnish, and Supplies Merchant Wholesalers

- Insurance Carriers
For the 6-digit NAICS code within the industry subsector listed below, list the state(s) in which the acquiring person or associate of the acquiring person is licensed to write insurance.

5241 Insurance Carriers**

- Other NAICS Sectors
For each 6-digit NAICS code within the industry sector, subsector, or code listed below, list the states or, if desired, portions thereof in which the acquiring person or associate of the acquiring person conducts such operations.

11** **Agriculture, Forestry, Fishing, and Hunting**, *except*:
113*** Forestry and Logging

21** **Mining, Quarrying, and Oil and Gas Extraction**, *except:*
2123** Nonmetallic Mineral Mining and Quarrying

2213 Water, Sewage, and Other Systems**

23** **Construction**

44912* Home Furnishing Retailers
4492 Electronics and Appliance Retailers**

48** and 49**** Transportation and Warehousing**, *except*:
493*** Warehousing and Storage

51** **Information**, *except*:
512*** Motion Picture and Sound Recording Industries

5222 Nondepository Credit Intermediation**
523* Securities, Commodity Contracts, and Other Financial Investments and Related Activities**
5242 Agencies, Brokerages, and Other Insurance Related Activities**
525* Funds, Trusts, and Other Financial Vehicles**

531* Real Estate**
533* Lessors of Nonfinancial Intangible Assets (Except Copyrighted Works)**

54** Professional, Scientific and Technical Services**, *except*:
54138* Testing Laboratories and Services
54194* Veterinary Services

55** Management of Companies and Enterprises**

561* Administrative and Support Services**

61** Educational Services**

71** Arts, Entertainment, and Recreation**, *except*:
7132** Gambling Industries
71394* Fitness and Recreational Sports Centers

7212 RV (Recreational Vehicle) Parks and Recreational Camps**
7213 Rooming and Boarding Houses, Dormitories, and Workers' Camps**
8114 Personal and Household Goods Repair and Maintenance**
813* Religious, Grantmaking, Civic, Professional, and Similar Organizations**
814* Private Households**

- **Street-Level Reporting**
  For each 6-digit NAICS code within the industry sector, subsector, or code listed below, provide the street address, arranged by state, zip code, county and city or town of each establishment from which dollar revenues were derived (either directly by the acquiring person or associate of the acquiring person or by a franchisee) in the most recent year.

113* Forestry and Logging**
2123 Nonmetallic Mineral Mining and Quarrying**

22** Utilities**, *except*:
2213** Water, Sewage and Other Systems

3115 Dairy Product Manufacturing**
311611 Animal (except Poultry) Slaughtering
311613 Rendering and Meat Byproduct Processing
311615 Poultry Processing
31181* Bread and Bakery Product Manufacturing
321* Wood Product Manufacturing**
32221* Paperboard Container Manufacturing
324* Petroleum and Coal Products Manufacturing**
3251 Basic Chemical Manufacturing**
325521 Plastics Materials and Resin Manufacturing
3271 Clay Product and Refractory Manufacturing**
3272 Glass and Glass Product Manufacturing**
3273 Cement and Concrete Product Manufacturing**
42331* Lumber, Plywood, Millwork, and Wood Panel Merchant Wholesalers
42333* Roofing, Siding, and Insulation Material Merchant Wholesalers
42344* Other Commercial Equipment Merchant Wholesalers
42345* Medical, Dental, and Hospital Equipment and Supplies Merchant Wholesalers
42346* Ophthalmic Goods Merchant Wholesalers
42349* Other Professional Equipment and Supplies Merchant Wholesalers
4239 Miscellaneous Durable Goods Merchant Wholesalers**
4241 Paper and Paper Product Merchant Wholesalers**
4242 Drug and Druggists' Sundries Merchant Wholesalers**
42441* General Line Grocery Merchant Wholesalers
42442* Packaged Frozen Food Merchant Wholesalers
42451* Grain and Field Bean Merchant Wholesalers
42452* Livestock Merchant Wholesalers

4247** **Petroleum and Petroleum Products Merchant Wholesalers**
4248** **Beer, Wine, and Distilled Alcoholic Beverage Merchant Wholesalers**
42491* **Farm Supplies Merchant Wholesalers**
42495* **Paint, Varnish, and Supplies Merchant Wholesalers**

44** and 45**** Retail Trade**, *except*:
44912* Home Furnishings Retailers
4492** Electronics and Appliance Retailers

493*** **Warehousing and Storage**
512*** **Motion Picture and Sound Recording Industries**
521*** **Monetary Authorities-Central Bank**

72**** **Accommodation and Food Services**, *except*:
7212** RV (Recreational Vehicle) Parks and Recreational Camps
7213** Rooming and Boarding Houses, Dormitories, and Workers' Camps

811*** **Repair and Maintenance**, except
8114** Personal and Household Goods Repair and Maintenance

812*** **Personal and Laundry Services**

► Minority-Held Entity Overlaps

This section requires the disclosure of holdings of the acquiring person and its associates (see § 801.1(d)(2)) of 5% or more but less than 50% of certain entities that derive dollar revenues in any 6-digit NAICS code reported by the target. If NAICS codes are unavailable, holdings in entities that have operations in the same industry as the target, based on the knowledge or belief of the filing person, should be listed. Holdings in those entities that have total assets of less than $10 million may be omitted.

Minority Holdings of Acquiring Person and Its Associates
If the acquiring person holds 5% or more but less than 50% of the voting securities of any issuer or non-corporate interests of any unincorporated entity that derived dollar revenues in the most recent year from operations in industries within any 6-digit NAICS code(s) reported by the target, list the name of such entity and d/b/a names (if known), the percentage held, the entity within the acquiring person that holds the minority interests, and the overlapping 6-digit NAICS code(s) or industry(ies).

Additionally, based on the knowledge or belief of the acquiring person, for each associate of the acquiring person holding:
1. 5% or more but less than 50% of the voting securities or non-corporate interests of an acquired entity; and/or
2. 5% or more but less than 50% of the voting securities of any issuer or non-corporate interests of any unincorporated entity that derived dollar revenues in the most recent year from operations in industries within any 6-digit NAICS industry code in which the target also derived dollar revenues in the most recent year,

list the name of such entity and d/b/a names (if known), percentage held, the associate of the acquiring person that holds the minority interests, and the overlapping 6-digit NAICS code(s) or industry(ies).

Responses should be organized alphabetically by the name of the entity in which minority interests are held.
The acquiring person may rely on its regularly prepared financials that list its investments, and those of its associates that list their investments, provided the financials are no more than three months old.

► Prior Acquisitions

This item pertains only to prior acquisitions of U.S. entities or assets and foreign entities or assets with sales in or into the U.S. by the acquiring person that in the most recent year (1) derived revenue in an identified 6-digit NAICS industry code overlap, **or** (2) provided or produced a competitive overlap product or service as described in the Overlap Description.

For each such overlap, list all acquisitions of entities or assets deriving dollar revenues in an overlapping 6-digit NAICS industry code or overlapping product or service made by the acquiring person in the five years prior to the date of the instant filing, even if the transaction was non-reportable. List only acquisitions of 50% or more of the voting securities of an issuer, 50% or more of non-corporate interests of an unincorporated entity, or all or substantially all the assets of an operating business if the entity or business had annual net sales or total assets greater than $10 million in the year prior to the acquisition and any acquisitions of assets that did not constitute all or substantially all of an operating business valued at or above the statutory size-of-transaction test at the time of their acquisition.

For each such acquisition, supply:

1. the overlapping 6-digit NAICS code(s) (by number and description) identified above in which the acquired entity or assets derived dollar revenues, or the competitive overlap product(s) or service(s) in the Overlap Description;
2. the name of the entity from which the assets, voting securities, or non-corporate interests were acquired;
3. the headquarters address of that entity prior to the acquisition;
4. whether assets, voting securities, or non-corporate interests were acquired; and
5. the consummation date of the acquisition.

ADDITIONAL INFORMATION

► Subsidies from Foreign Entities or Governments of Concern

Indicate whether, to the knowledge or belief of the filing person, within the two years prior to filing, the acquiring person has received any subsidy (or a commitment to provide a subsidy in the future) from any foreign entity or government of concern (see § 801.1(r)). If yes, list each entity or government from which such subsidy was received (or which has made the commitment) and provide a brief description of the subsidy.

Indicate whether, for products the acquiring person produced in whole or in part in a country that is a covered nation under 42 U.S.C. § 18741(a)(5)(C), any product is subject to countervailing duties imposed by any jurisdiction. If yes, list each product, the countervailing duty imposed, and the jurisdiction that imposed the duty.

Indicate whether, to the knowledge or belief of the filing person, for products the acquiring person produced in whole or in part in a country that is a covered nation under 42 U.S.C. § 18741(a)(5)(C), any product is the subject of a current investigation for countervailing duties in any jurisdiction. If yes, list each product and the jurisdiction conducting the investigation.

► Defense or Intelligence Contracts

Except for select 801.30 transactions, identify (1) pending requests for proposals from the U.S. Department of Defense or any member of the U.S. intelligence community, as defined by 10 U.S.C. § 101(a)(6) or 50 U.S.C. § 3003(4) for which the acquiring person has submitted a proposal and (2) awarded procurement contracts with the U.S. Department of Defense or any member of the U.S. intelligence community, as defined by 10 U.S.C. § 101(a)(6) or 50 U.S.C. § 3003(4) valued at $100 million or more if such pending requests for proposals or such awarded procurement contracts (a) are or will be the source of revenues in any identified 6-digit NAICS industry code overlap; or (b) involve or will involve an overlap product or service as described in the Overlap Description or the Supply Relationships Description. Limit the response to the acquiring entity and any entity within the acquiring person that directly or indirectly controls the acquiring entity. Include (1) the name of the entity within the filing person (2) the contracting office, as defined by 48 C.F.R. § 2.101(b); (3) the Contracting Office ID; (4) the Award ID; and (5) the NAICS code(s), if any, listed in the System for Award Management database. Do not include classified information but note that responsive information was withheld on that basis.

► Voluntary Waivers

- **HSR Confidentiality Waiver for International Competition Authorities (VOLUNTARY)**
  Indicate whether the acquiring person agrees to waive the disclosure exemption contained in the Act, 15 U.S.C. § 18a(h), to permit the DOJ and FTC to disclose to non-U.S. competition authority/authorities listed by the filing person (1) the fact that a notification was filed, (2) the waiting period associated with the notification, and (3) information and documents filed with the notification. This waiver will not cover materials provided in response to a request for additional information issued pursuant to 15 U.S.C. § 18a(e) and does not preclude the acquiring person from providing a full waiver as provided for under FTC and DOJ practice as reflected in the Model Waiver. The acquiring person should list the jurisdictions to which the waiver applies. This item is voluntary.

- **HSR Confidentiality Waiver for State Attorneys General (VOLUNTARY)**
  Indicate whether the acquiring person agrees to waive any part of the disclosure exemption contained in the Act, 15 U.S.C. § 18a(h). If yes, list the applicable State Attorneys General and whether the acquiring person permits the DOJ and FTC to disclose (1) the fact that a notification was filed and the waiting period associated with the notification, (2) information and documents filed with the notification, or (3) both (1) and (2). This waiver will not cover materials provided in response to a request for additional information

issued pursuant to 15 U.S.C. § 18a(e) and does not preclude the acquiring person from providing a full waiver as provided for under FTC and DOJ practice as reflected in the Model Waiver. The acquiring person should list the jurisdictions to which the waiver applies. This item is voluntary.

CERTIFICATION

See § 803.6 for requirements.

The certification must be notarized or use the language found in 28 U.S.C. § 1746 relating to unsworn declarations under penalty of perjury. The Form includes the following language:

Penalties for False Statements
Federal law provides criminal penalties, including up to twenty years imprisonment, for any person who knowingly alters, destroys, mutilates, conceals, covers up, falsifies, or makes a false entry in any record, document, or tangible object with the intent to impede, obstruct, or influence an ongoing or anticipated federal investigation (see, e.g., Section 1519 of Title 18, United States Code.). It is also a criminal offense to knowingly make a false statement in a federal investigation, obstruct a federal investigation, or conspire to obstruct justice or obstruct or impede the lawful functioning of the government (see, e.g., Sections 371, 1001, and 1505 of Title 18, United States Code).

CERTIFICATION
This NOTIFICATION AND REPORT FORM, together with any and all appendices and attachments thereto, was prepared and assembled under my supervision in accordance with instructions issued by the Commission. Subject to the recognition that, where so indicated, reasonable estimates have been made because books and records do not provide the required data, the information is, to the best of my knowledge, true, correct, and complete in accordance with the statute and rules.

I acknowledge that the Commission or the Assistant Attorney General of the Antitrust Division of the Department of Justice may, prior to the expiration of the initial waiting period pursuant to 15 U.S.C. § 18a, require the submission of additional information or documentary material relevant to the proposed transaction.

AFFIDAVITS

Affidavit(s) required by § 803.5 must be notarized or use the language found in 28 U.S.C. § 1746 relating to unsworn declarations under penalty of perjury. If an entity is filing on behalf of the acquiring person, the affidavit must still attest to the good faith intent of the UPE.

In non-§ 801.30 transactions, the affidavit(s) (submitted by both persons filing) must attest that an agreement to merge or acquire has been executed, and if the executed agreement is not the definitive agreement, that a dated document that provides sufficient detail about the scope of the entire transaction that the parties intend to consummate has been submitted. The affidavit(s) must further attest to the good faith intention of the person filing notification to complete the transaction. See § 803.5(b).

In § 801.30 transactions, the affidavit (submitted only by the acquiring person) must attest:
1. That the issuer whose voting securities or the unincorporated entity whose non-corporate interests are to be acquired has received notice, as described below, from the acquiring person;
2. In the case of a tender offer, that the intention to make the tender offer has been publicly announced; and
3. The good faith intention of the person filing notification to complete the transaction.

Acquiring persons in § 801.30 transactions are also required to submit a copy of the notice received by the acquired person pursuant to § 803.5(a)(3) along with the filing. This notice must include:
1. The identity of the acquiring person and the fact that the acquiring person intends to acquire voting securities of the issuer or non-corporate interests of the unincorporated entity;
2. The specific notification threshold that the acquiring person intends to meet or exceed in an acquisition of voting securities;
3. The fact that the acquisition may be subject to the Act, and that the acquiring person will file notification under the Act;
4. The anticipated date of receipt of such notification by the Agencies; and
5. The fact that the person within which the issuer or unincorporated entity is included may be required to file notification under the Act. See § 803.5(a).

PRIVACY ACT STATEMENT

Section 18a(a) of Title 15 of the U.S. Code authorizes the collection of this information. The primary use of information submitted on this Form is to determine whether the reported merger or acquisition may violate the antitrust laws. Taxpayer information is collected, used, and may be shared with other agencies and contractors for payment processing, debt collection and reporting purposes. Furnishing the information on the Form is voluntary. Consummation of an acquisition required to be reported by the statute cited above without having provided this information may, however, render a person liable to civil penalties up to the amount listed in 16 C.F.R. §1.98(a) per day.

We also may be unable to process the Form unless you provide all of the requested information.

DISCLOSURE NOTICE

Public reporting burden for this report is estimated to average 105 hours per response, including time for reviewing instructions, searching existing data sources, gathering, and maintaining the data needed, and completing and reviewing the collection of information. Send comments regarding the burden estimate or any other aspect of this report, including suggestions for reducing this burden to:

Premerger Notification Office

400 7th Street, S.W.
Washington, D.C. 20024

and

Office of Information and Regulatory Affairs
Office of Management and Budget
Washington, D.C. 20503

Under the Paperwork Reduction Act, as amended, an agency may not conduct or sponsor, and a person is not required to respond to, a collection of information unless it displays a currently valid OMB control number. The operative OMB control number, 3084-0005, appears within the Notification and Report Form and these Instructions.

Antitrust Improvements Act
Notification for Certain Mergers and Acquisitions

Acquired Person Instructions

GENERAL INSTRUCTIONS AND INFORMATION

These instructions specify the information that must be submitted pursuant to § 803.1(a) of the premerger notification rules, 16 CFR Parts 801-803 ("the Rules"). Submitted materials must be provided to the Federal Trade Commission ("FTC") and to the Antitrust Division of the Department of Justice ("DOJ") (together, "the Agencies").

► Information

The central office for information and assistance concerning the Rules is:

Premerger Notification Office
Federal Trade Commission
400 7th Street, S.W.
Washington, D.C. 20024
Phone: (202) 326-3100
E-mail: HSRhelp@ftc.gov for Rules questions
Premerger@ftc.gov for filing information

Copies of these Instructions, the Hart-Scott-Rodino Antitrust Improvements Act of 1976 ("the Act"), the Rules, FTC final rules (including their Statements of Basis and Purpose) published in the Federal Register, as well as information to assist in submitting the required information are available at the FTC's Premerger Notification Office ("PNO") website.

► Definitions and Explanation of Terms

Unless otherwise indicated, the definitions provided in the Rules apply to these Instructions.

Dollar Values
All financial information should be expressed in millions of dollars rounded to the nearest hundred thousand.

Fee Information
The filing fee is based on the aggregate total value of assets, voting securities, and controlling non-corporate interests to be held as a result of the acquisition. Filing fee tiers are adjusted annually pursuant to 15 U.S.C. § 18a note, based on the change in gross national product, in accordance with 15 U.S.C. § 19(a)(5). Filing fees increase annually by the percentage increase, if any, in the consumer price index ("CPI") over the CPI for the fiscal year ending September 30, 2022, pursuant to 15 U.S.C. § 18a note. For current fee information, see the PNO website.

North American Industry Classification System (NAICS) Data
When reporting information by 6-digit NAICS code, refer to the North American Industry Classification System - United States, 2022, published by the Executive Office of the President, Office of Management and Budget, available at https://www.census.gov/naics/. This website also provides guidance in choosing the proper code(s).

Notification Thresholds
Notification thresholds are adjusted annually based on the change in gross national product, in accordance with 15 U.S.C. § 19(a)(5). See § 801.1(h). The current threshold values can be found at Current Thresholds.

Person Filing and Filing Person
The terms "person filing" or "filing person" mean the ultimate parent entity ("UPE"). See § 801.1(a)(3). The terms are used herein interchangeably.

Select 801.30 Transaction
A transaction to which § 801.30 applies **and** where (1) the acquisition would not confer control, (2) there is no agreement (or contemplated agreement) between any entity within the acquiring person and any entity within the acquired person governing any aspect of the transaction, and (3) the acquiring person does not have, and will not obtain, the right to serve as, appoint, veto, or approve board members, or members of any similar body, of any entity within the acquired person or the general partner or management company of any entity within the acquired person. Executive compensation transactions also qualify as select 801.30 transactions.

Supervisory Deal Team Lead
The individual who has primary responsibility for supervising the strategic assessment of the deal, and who would not otherwise qualify as a director or officer.

Target
The target includes all entities and assets to be acquired by the acquiring person from the acquired person in the reported transaction.

Year
All references to "year" refer to calendar year. If data are not available on a calendar year basis, supply the requested data for the fiscal year reporting period that most nearly corresponds to the calendar year specified. References to "most recent year" mean the most recently completed calendar or fiscal year for which the requested information is available.

► Filing

If the UPE is both an acquiring and acquired person, separate filings must be submitted, one as the acquiring person and one as the acquired person, following the appropriate instructions for each. See § 803.2(a)(2).

Filings should be submitted electronically consistent with the instructions on the PNO website. If the electronic submission platform is unavailable, the Agencies may announce sites for delivery through the media and, if possible, at the PNO website.

► Responses

Documents, including the Form, should be produced as (1) a searchable PDF format from which text can be copied or (2) an Excel file.

For Business Documents (see below), check the box to indicate whether any part of the document is privileged and then provide the document number, title, and estimated date. If the acquired person has identified (1) a NAICS overlap, (2) an overlap within the Overlap Description, or (3) a supply relationship within the Supply Relationships Description, also provide the following:

1. Author(s) (and job title(s)) for documents created by the acquired person; or
2. Recipient(s) or supervisor(s) (and job title(s)) of documents created by third parties as part of an engagement with the acquired person.

If a group of people prepared the document, list all the authors and their titles, identifying the principal authors. Alternatively, it is acceptable to indicate that the document was prepared under the supervision of the lead author and to provide the name and title of that author. Similarly, if the acquired person engaged a third party to prepare a document, provide the name of the third party, and the name, title, and company name for the individual within the acquired person who supervised the creation of the document, or for whom the document was prepared. For materials received from a third party that was not engaged by the acquired person, only the name of the third party is required.

If the acquired person submits documents in addition to what is required, such documents should be identified as "Voluntary". See § 803.1(b).

Submit only one copy of identical responsive documents.

► Privilege

See § 803.3(d). For privileged documents, the filing person must also provide the following in a log:

1. The privilege type (redacted or withheld);
2. The privilege claim;
3. Addressee(s) and all recipients, with company name and title, of the original and any copies;
4. Subject matter;
5. Document's present location; and
6. Who has control over it.

If a privileged document was circulated to a group, such as the board or an investment committee, the name of the group is sufficient, but the filing person should be prepared to disclose the names and titles/positions of the individual group members, if requested.

If the claim of privilege is based on advice from inside and/or outside counsel, the name of the inside and/or outside counsel providing the advice (and the law firm, if applicable) must be provided. If several lawyers participated in providing advice, identifying lead counsel is sufficient. In identifying who controls a document, the name of the law firm is sufficient.

► Translations

Materials or information in a language other than English must be translated into English, with the English translation attached to the original version. See § 803.8.

► Non-Compliance

If unable to answer any item fully, provide such information as is available and a statement of reasons for non-compliance as required by § 803.3. If exact answers to any item cannot be given, enter best estimates and indicate the source or basis of such estimates. Add an endnote with the notation "est." to any item where data are estimated.

► Limited Response

Information need not be supplied regarding assets, voting securities, or non-corporate interests currently being acquired when their acquisition is exempt under the Act or Rules. See § 803.2(c).

FEE INFORMATION

Total Expected Filing Fee
Indicate the value of the total required fee for the transaction.

Parties Paying the Fee
Indicate which filing person(s) is paying the filing fee and, if applicable, whether the fee is being paid by multiple entities. For each entity within the acquired person paying a portion of the fee, provide the name of the payer, the amount paid, the payment method, and the Electronic Wire Transfer (EWT) confirmation number or check number.

Note on Paying by EWT
In order for the FTC to track payment, the payer must provide information required by the Fedwire Instructions to the financial institution initiating the EWT. A template of the Fedwire Instructions is available at the PNO website on the Filing Fee Information page.

Note on Paying by Check
The FTC strongly discourages check payments because handling a physical check will create a delay in processing the Form. However, if an EWT cannot be arranged, the FTC will accept a check, sent to Financial Operations. Cashiers' or certified checks are preferred. Make the check payable to the Federal Trade Commission and deliver to:

Federal Trade Commission
Financial Operations Division
600 Pennsylvania Ave, Drop H-790
Washington, DC 20580

Please note that the waiting period may be delayed until the fee has been confirmed.

GENERAL INFORMATION

Special Filing Types
Indicate whether the filing is a post-consummation filing, or whether the transaction is a cash tender offer or bankruptcy that is subject to Section 363(b) of the Bankruptcy Code (11 U.S.C. § 363).

Early Termination
Indicate whether the acquired person requests early termination of the waiting period. Notification of each grant of early termination will be published in the Federal Register, as required by 15 U.S.C. § 18a(b)(2), and on the PNO website. Note that if either person in any transaction requests early termination, it may be granted and published.

ULTIMATE PARENT ENTITY (UPE) INFORMATION

► UPE Details

Name
Provide the name, headquarters address, and website (if one exists) of the person filing notification. The name of the person filing is the name of the UPE of the acquired person. See § 801.1(a)(3).

Entity Type
Specify whether the UPE is a corporation, unincorporated entity, natural person, or other entity type (specify). See § 801.1.

Filing Made on Behalf of the UPE
If the filing is being made on behalf of the UPE by another entity within the acquired person authorized by the UPE to file the notification on its behalf pursuant to § 803.2(a) or filed pursuant to § 803.4 on behalf of a foreign person, provide the name and mailing address of the entity filing the notification on behalf of the UPE.

Contact Information
Provide the name, firm/company name, address, telephone number, and e-mail address of two individuals (primary and secondary) to contact regarding the filing. See § 803.20(b)(2)(ii).

Additionally, provide the name, firm/company name, address, telephone number, and e-mail address of an individual located in the United States designated for the limited purpose of receiving notice of the issuance of a request for additional information or documentary material. See § 803.20(b)(2).

UPE Annual Reports and Financial Information

- **Central Index Key**
  If the UPE of the acquired person files annual reports (Form 10-K or Form 20-F) with the United States Securities and Exchange Commission (SEC), provide the Central Index Key (CIK) number.

- **Annual Reports and Audit Reports**
  Provide the most recent annual reports and/or annual audit reports (or, if audited is unavailable, unaudited) of the UPE of the acquired person.

  Natural person UPEs should not provide personal balance sheets or tax returns. Natural person UPEs should leave this section blank and instead provide the most recent reports for the highest-level entity(ies) that controls the target under "UPE Structure."

  The person filing notification may incorporate a document responsive to this item by reference to an internet address directly linking to the document. See § 803.2(e).

- **Date of Report(s)**
  Provide the date of the most recent annual report(s) and/or audit reports (or, if audited is unavailable, unaudited) of the UPE of the acquired person.

- **Size of Person**
  If applicable, indicate whether the person filing notification stipulates that the acquired person meets either the higher or lower size of person test. See 15 U.S.C. § 18a(a), § 801.11.

Minority Shareholders or Interest Holders
This section requires the acquired person to report the name, headquarters mailing address, and approximate percentage held by certain minority holders of (1) the acquired entity and (2) any entity directly or indirectly controlled by the acquired entity, but only if such minority holder will continue to hold an interest (whether voting securities or non-corporate interests) in such entity(ies) or will acquire an interest in any entity within the acquiring person as a result of the transaction.

If the acquired entity or an entity directly or indirectly controlled by the acquired entity is not a limited partnership, provide the required information for each individual or entity that currently holds 5% or more but less than 50% of the voting securities or non-corporate interests of any such entity, starting with the acquired entity.

If the acquired entity or an entity directly or indirectly controlled by the acquired entity is a limited partnership, provide the required information for its (a) its general partner, regardless of the percentage it holds, and (b) its limited partners that (i) currently hold 5% or more

but less than 50% of the non-corporate interests of such limited partnership and (ii) have or will have the right to serve as, nominate, appoint, veto, or approve board members, or individuals with similar responsibilities, of (1) the acquiring entity, (2) any entity directly or indirectly controlled by the acquiring entity, (3) any entity that directly or indirectly controls the acquiring entity, and (4) any entity within the acquiring person that has been or will be created in contemplation of, or for the purposes of, effectuating the transaction (each a "covered entity"), or of the general partner or management company of a covered entity.

► Acquired Entity Structure

If the acquisition includes only assets that do not comprise substantially all the assets of an operating business, the acquired person should not complete the questions in this section. Otherwise, the acquired person must complete these questions for the portion of the transaction related to the voting securities, non-corporate interests, and assets that comprise substantially all the assets of an operating business.

Acquired Entity(ies)
List the name, city, state, zip code, and country of the acquired entity(ies) and all U.S. entities, and all foreign entities that have sales in or into the United States that are included within the acquired entity. Entities with total assets of less than $10 million may be omitted. Alternatively, the acquired entity may report all entities within it. Also list all names under which the entities do business (e.g., d/b/a names).

The list of entities should be organized by operating company or operating business ("top-level entity"), if applicable. Filings for select 801.30 transactions need not include d/b/a names and the list of entities can be organized as kept in the ordinary course of business.

Annual Reports and Audit Reports
Provide the CIK number(s), if the acquired entity(ies) file(s) annual reports (Form 10-K or Form 20-F) with the SEC, and the most recent annual or audit report(s) of the acquired entity(ies).

Natural person UPEs must also provide the most recent annual report or audit report and CIK number for the highest-level entity that controls the acquired entity.

TRANSACTION INFORMATION

► Parties

List the name and mailing address of each acquiring and acquired person and each acquiring and acquired entity. Do not list entities controlled by an acquired entity.

Acquiring UPE
Provide the name, headquarters address, and website of the acquiring person.

Acquiring Entity(ies)
If an entity other than the acquiring UPE is making the acquisition, provide the name, mailing address, and website of that entity.

Acquired UPE
Provide the name, headquarters address, and website of the acquired person.

Target(s)
If the assets, voting securities, or non-corporate interests of an entity other than the acquired UPE are being acquired, provide the name, mailing address, and website of that entity.

► Transaction Details

801.30 Transaction
Indicate whether the transaction is subject to § 801.30 and if so, what type(s), including select 801.30.

Transaction Type
Indicate whether the transaction is any of the following (select all that apply):

- Acquisition of voting securities;
- Acquisition of non-corporate interests;
- Acquisition of assets;
- Merger (see § 801.2);
- Consolidation (see § 801.2);

- Formation of a joint venture, other corporation, or unincorporated entity (see §§ 801.40 and 801.50);
- Acquisition subject to § 801.31;
- Secondary acquisition subject to § 801.4;
- Acquisition subject to § 801.2(e); or
- Other (specify)

Acquisition Details
Provide the requested information for the value and percentage of assets, voting securities, and non-corporate interests to be acquired. If a combination of assets, voting securities, and/or non-corporate interests is being acquired and allocation is not possible, note such information in an endnote.

For determining the percentage of voting securities, evaluate total voting power per § 801.12. For determining the percentage of non-corporate interests, evaluate the economic interests per § 801.1(b)(1)(ii).

To complete this item:
- State the percentage of voting securities already held by the acquiring person. See § 801.12.
- State the value of voting securities already held by the acquiring person. See § 801.10.
- State the total percentage of voting securities to be held by the acquiring person as a result of the acquisition. See § 801.12.
- State the total value of voting securities to be held by the acquiring person as a result of the acquisition. See § 801.10.
- State the percentage of non-corporate interests already held by the acquiring person. See § 801.1(b)(1)(ii).
- State the value of non-corporate interests already held by the acquiring person. See § 801.10.
- State the total percentage of non-corporate interests to be held by the acquiring person as a result of the acquisition. See §§ 801.10 and 801.1(b)(1)(ii).
- State the total value of non-corporate interests to be held by the acquiring person as a result of the acquisition. See § 801.10.
- State the total value of assets to be held by the acquiring person as a result of the acquisition. See § 801.10.
- State the aggregate total value of assets, voting securities, and non-corporate interests of the acquired person to be held by the acquiring person as a result of the acquisition. See §§ 801.10, 801.12, 801.13 and 801.14.

► Transaction Description

Business of the Target
Describe the business operation(s) being acquired. If assets, describe the assets and whether they comprise an operating business.

Non-Reportable UPE(s)
Provide the names of any UPE that does not have a reporting obligation.

Transaction Description
Briefly describe the transaction, indicating whether assets, voting securities, or non-corporate interests (or some combination) are being acquired. Indicate what consideration will be received by each person and the scheduled consummation date of the transaction. Also identify any special circumstances that apply to the filing, such as whether part of the transaction is exempt under one of the exemptions found in Part 802.

If any attached transaction documents use code names to refer to the parties, provide an index identifying the code names.

Related Transactions
If the transaction that is the subject of this filing has related filings, indicate whether the related filing(s) (choose all that apply):
- Is a principal transaction that triggers one or more shareholder backside transactions;
- Is a shareholder backside transaction;
- Has more than one acquiring UPE;
- Has more than one acquired UPE;
- Has more than one reportable step;
- Is a joint venture;
- Is a consolidation;
- Is an exchange of assets;
- Has one or more filings in the alternative; or
- Has other circumstances that require more than one filing and if so, explain.

Provide all additional details regarding the related filings(s), including party names and transaction numbers, necessary to identify and connect all related filings.

► Additional Transaction Information

Transaction Rationale

Except for select 801.30 transactions, identify and explain each strategic rationale for the transaction discussed or contemplated by the filing person or any of its officers, directors, or employees. If the rationale of the target is different from the UPE, submit an explanation for each. Identify each document produced in the filing that confirms or discusses the stated rationale(s). If documents produced in the filing are referenced, identify the specific page(s) that discusses the stated rationale(s).

► Business Documents

Transaction-Related Documents

- **Competition Documents**
  Provide all studies, surveys, analyses, and reports prepared by or for any officer(s), director(s), or supervisory deal team lead for the purpose of evaluating or analyzing the acquisition with respect to market shares, competition, competitors, markets, potential for sales growth, or expansion into product or geographic markets. For unincorporated entities, provide such documents prepared by or for individuals exercising similar functions as officers and directors, as well as the supervisory deal team lead.

- **Confidential Information Memoranda**
  Provide all confidential information memoranda prepared by or for any officer(s) or director(s) (or, in the case of unincorporated entities, individuals exercising similar functions) of the UPE of the acquired person or of the target that specifically relate to the sale of the target. If no such confidential information memorandum exists, submit any document(s) given to any officer(s) or director(s) of the acquiring person meant to serve the function of a confidential information memorandum. This does not include ordinary course documents and/or financial data shared in the course of due diligence, except to the extent that such materials served the purpose of a confidential information memorandum when no such confidential information memorandum exists.
  Documents responsive to this item are limited to those produced within one year before the date of filing.

- **Third-Party Studies, Surveys, Analyses, and Reports**
  Provide all studies, surveys, analyses and reports prepared by investment bankers, consultants, or other third-party advisors ("third-party advisors") for any officer(s) or director(s) (or, in the case of unincorporated entities, individuals exercising similar functions) of the UPE of the acquired person or of the target for the purpose of evaluating or analyzing market shares, competition, competitors, markets, potential for sales growth or expansion into product or geographic markets that specifically relate to the sale of the target. This item requires only materials developed by third party advisors during an engagement or for the purpose of seeking an engagement. Documents responsive to this item are limited to those produced within one year before the date of filing.

- **Synergies and Efficiencies**
  Provide all studies, surveys, analyses, and reports evaluating or analyzing synergies, and/or efficiencies prepared by or for any officer(s) or director(s) (or, in the case of unincorporated entities, individuals exercising similar functions) for the purpose of evaluating or analyzing the acquisition. Financial models without stated assumptions need not be provided.

Plans and Reports

Except for select 801.30 transactions, provide all regularly prepared plans and reports that were provided to the Chief Executive Officer (CEO) of the target or any entity that it controls or is controlled by that analyze market shares, competition, competitors, or markets pertaining to any product or service of the target also produced, sold, or known to be under development by the acquiring person, as identified in the Overlap Description. Documents responsive to this item are limited to those prepared or modified within one year of the date of filing.

Except for select 801.30 transactions, provide all plans and reports that were provided to the Board of Directors of the target or any entity that it controls or is controlled by that analyze market shares, competition, competitors, or markets pertaining to any product or service of the target also produced, sold, or known to be under development by the acquiring person, as identified in the Overlap Description. Documents responsive to this item are limited to those prepared or modified within one year of the date of filing.

► Agreements

Transaction-Specific Agreements

Furnish copies of all documents that constitute the agreement(s) related to the transaction, including, but not limited to, exhibits, schedules, side letters, agreements not to compete or solicit, and other agreements negotiated in conjunction with the transaction that the parties intend to consummate, and excluding clean team agreements.

Documents that constitute the agreement(s) (e.g., Agreement and Plan of Merger, Letter of Intent, Purchase and Sale Agreement, Asset Purchase Agreement, Stock/Securities Purchase Agreement) must be executed, while supporting agreements, such as employment agreements and agreements not to compete may be provided in draft form if that is the most recent version.

If the executed agreement is not the definitive agreement, submit a dated document that provides sufficient detail about the scope of the entire transaction that the parties intend to consummate, such as an agreement in principle, or term sheet, or the most recent draft agreement. See § 803.5. Such document should include information regarding some combination of the following terms: the identity of the parties; the structure of the transaction; the scope of what is being acquired; calculation of the purchase price; an estimated closing timeline; employee retention policies, including with respect to key personnel; post-closing governance; and transaction expenses or other material terms.

Note that transactions subject to § 801.30 and bankruptcies under 11 U.S.C. § 363(b) do not require an executed agreement. For bankruptcies, provide the order from the bankruptcy court.

COMPETITION DESCRIPTIONS

This section is not applicable to select 801.30 transactions.

► Overlap Description

Briefly describe each of the principal categories of products and services (as reflected in documents created in the ordinary course of business) of the target.

In addition, list and briefly describe each of the current or known planned products or services of the target that competes with (or could compete with) a current or known planned product or service of the acquiring person, based on documents created in the ordinary course of business. Current or known planned products or services include those that the acquiring person or target researches, develops, manufactures, produces, sells, offers, provides, supplies, or distributes. Known planned products or services may be limited to those referenced in any submitted Business Document and should reflect the acquired person's existing knowledge of the acquiring person's business. The acquiring and acquired person should not exchange information for the purpose of answering this item.

For each such product or service listed, provide:

1. The sales (in dollars) for the most recent year. For those products or services not generating revenue or whose performance is not measured by revenue in the ordinary course of business, provide projected revenue, estimates of the volume of products to be sold, time spent using the service, or any other metric by which the target measures performance (e.g., daily users, new signups).
2. A description of all categories of customers of the target that purchase or use the product or service (e.g., retailer, distributor, broker, government, military, educational, national account, local account, commercial, residential, or institutional). If no customers have yet used the product or service, provide the date that development of the product or service began; a description of the current stage in development, including any testing and regulatory approvals and any planned improvements or modifications; the date that development (including testing and regulatory approvals) was or will be completed; and the date that the product or service is expected to be sold or otherwise commercially launched.
3. The top 10 customers in the most recent year (as measured in dollars), and the top 10 customers for each customer category identified.

► Supply Relationships Description

Related Sales

List and briefly describe each product, service, or asset (including data) that the target has sold, licensed, or otherwise supplied, and which represented at least $10 million in revenue (including internal transfers) in the most recent year (1) to the acquiring person, or (2) to any other business that, to the acquired person's knowledge or belief, uses the target's product, service, or asset to compete with the acquiring person's products or services, or as an input for a product or service that competes or is intended to compete with the acquiring person's products or services. Responses to this item should reflect the acquired person's existing knowledge of the acquiring person's business; the acquiring and acquired person should not exchange information for the purpose of answering this item.

For each product, service, or asset listed, for the most recent year, provide:

1. The sales (in dollars) to (1) the acquiring person and (2) any other business that, to the acquired person's knowledge or belief, uses the target's product, service, or asset to compete with the acquiring person's products or services, or as an input for a product or service that competes or is intended to compete with the acquiring person's products or services.

2. The top 10 customers (as measured in dollars) of the target that use the target's product, service, or asset to compete with the acquiring person's products or services, or as an input for a product or service that competes or is intended to compete with the acquiring person's products or services. For each such customer, describe the target's supply or licensing agreement (or other comparable terms of supply).

Related Purchases
List and briefly describe each product, service, or asset (including data) that the target incorporates as an input into any product or service and that the target has purchased, licensed, or otherwise obtained and which represented at least $10 million in revenue (including internal transfers), in the most recent year (1) from the acquiring person or (2) from any other business that, to the acquired person's knowledge or belief, competes with acquiring person to provide a substantially similar product, service, or asset. Responses to this item should reflect the acquired person's existing knowledge of the acquiring person's business; the acquiring and acquired person should not exchange information for the purpose of answering this item.

For each product, service, or asset listed, for the most recent year, provide:

1. The purchased amount (in dollars) for (1) the acquiring person and (2) any other business that, to the acquired person's knowledge or belief, competes with the acquiring person to provide a substantially similar product, service, or asset.
2. The top 10 suppliers (as measured in dollars) for the associated input product, service, or asset, and a description of the target's purchase or licensing agreement (or other comparable terms of purchase).

REVENUES AND OVERLAPS

► NAICS Codes

This item requests information regarding the industry categories for the target's products and services that derived revenue in the most recent year.

No Revenue
If there is no revenue to report, explain why.

NAICS Codes Describing U.S. Operations with Estimates of Revenue
Identify all 6-digit NAICS industry codes that describe the U.S. operations of the target, inclusive of all entities and assets anticipated to be included within the target at the time the transaction will be consummated.

Responses must be organized by NAICS code in ascending order. For each code, provide the name of the operating business(es) that derive(s) revenue in that code and the estimated revenue range: less than $10 million; $10 million or more but less than $100 million; $100 million or more, but less than $1 billion; or $1 billion or more.

Identify each 6-digit NAICS industry code in which both the acquiring person and target derive revenue by checking the overlap box.

For products and services that derived revenue in the most recent year in a non-manufacturing NAICS code, if the revenue is estimated at less than one million dollars, that code may be omitted so long as the code does not overlap with a code in which the acquiring person derived revenue from U.S. operations.

► Controlled Entity Geographic Overlaps

If, to the knowledge or belief of the person filing notification, the target, derived any amount of dollar revenues in the most recent year from operations in industries within any 6-digit NAICS industry code in which the acquiring person also derived any amount of dollar revenues in the most recent year, then for each such 6-digit NAICS industry code follow the instructions below for this section.

NAICS Overlaps of Controlled Entities
List each overlapping NAICS code and description. For each, list the name of each operating business within the target that has U.S. operations in the same NAICS code as the acquiring person and the name(s) under which the operating business does business, and provide the appropriate Geographic Market Information, based upon the NAICS code. Organize responses by NAICS code in ascending order.

Geographic Market Information
For each identified overlapping NAICS code, provide geographic information, as described below. Use the 2-digit postal codes for states and territories and provide the total number of states and territories at the end of the response.

Except in the case of those NAICS industries in the sectors, subsectors, and codes that require street-address level reporting, the person filing notification may respond with the word "national" if business is conducted in all 50 states.

- **State-Level Reporting**
  - Manufacturing Industries
    For each 6-digit NAICS code within the industry sector, subsector, or code listed below, list the states in which, to the knowledge or belief of the person filing the notification, the products in that 6-digit NAICS industry code produced by the target are sold without a significant change in their form (whether they are sold by the target or by others to whom such products have been sold or resold).

    31** through 33**** Manufacturing**, *except*:
    3115** Dairy Product Manufacturing
    311611 Animal (except Poultry) Slaughtering
    311613 Rendering and Meat Byproduct Processing
    311615 Poultry Processing
    31181* Bread and Bakery Product Manufacturing
    321*** Wood Product Manufacturing
    32221* Paperboard Container Manufacturing
    324*** Petroleum and Coal Products Manufacturing
    3251** Basic Chemical Manufacturing
    325521 Plastics Materials and Resin Manufacturing
    3271** Clay Product and Refractory Manufacturing
    3272** Glass and Glass Product Manufacturing
    3273** Cement and Concrete Product Manufacturing

  - Wholesale Trade
    For each 6-digit NAICS code within the industry sector, subsector, or code listed below, list the states or, if desired, portions thereof in which the customers of target are located.

    42** Wholesale Trade**, *except*:
    42331* Lumber, Plywood, Millwork, and Wood Panel Merchant Wholesalers
    42333* Roofing, Siding, and Insulation Material Merchant Wholesalers
    42344* Other Commercial Equipment Merchant Wholesalers
    42345* Medical, Dental, and Hospital Equipment and Supplies Merchant Wholesalers
    42346* Ophthalmic Goods Merchant Wholesalers
    42349* Other Professional Equipment and Supplies Merchant Wholesalers
    4239** Miscellaneous Durable Goods Merchant Wholesalers
    4241** Paper and Paper Product Merchant Wholesalers
    4242** Drug and Druggists' Sundries Merchant Wholesalers
    42441* General Line Grocery Merchant Wholesalers
    42442* Packaged Frozen Food Merchant Wholesalers
    42451* Grain and Field Bean Merchant Wholesalers
    42452* Livestock Merchant Wholesalers
    4247** Petroleum and Petroleum Products Merchant Wholesalers
    4248** Beer, Wine, and Distilled Alcoholic Beverage Merchant Wholesalers

► Minority-Held Entity Overlaps

This section requires the disclosure of holdings of the target of 5% or more but less than 50% of certain entities that derive dollar revenues in any 6-digit NAICS code reported by the acquiring person. If NAICS codes are unavailable, holdings in entities that have operations in the same industry as the acquiring person, based on the knowledge or belief of the filing person, should be listed. Holdings in those entities that have total assets of less than $10 million may be omitted.

Minority Holdings of the Target
If the target holds 5% or more but less than 50% of the voting securities of any issuer or non-corporate interests of any unincorporated entity that derived dollar revenues in the most recent year from operations in industries within any 6-digit NAICS code(s) reported by the acquiring person, list the name of such entity and d/b/a names (if known), the percentage held, the entity within the target that holds the minority interests, and the overlapping 6-digit NAICS code(s) or industry(ies).

Responses should be organized alphabetically by the name of the entity in which minority interests are held.

► Prior Acquisitions

This item should be completed for the target and pertains only to prior acquisitions of U.S. entities or assets and foreign entities or assets with sales in or into the U.S. that in the most recent year (1) derived revenue in an identified 6-digit NAICS industry code overlap, or (2) provided or produced a competitive overlap product or service as described in the Overlap Description.

For each such overlap, list all acquisitions of entities or assets deriving dollar revenues in an overlapping 6-digit NAICS industry code or overlapping product or service made by the target in the five years prior to the date of the instant filing, even if the transaction was non-reportable. List only acquisitions of 50% or more of the voting securities of an issuer, 50% or more of non-corporate interests of an unincorporated entity, or all or substantially all the assets of an operating business if the entity or business had annual net sales or total assets greater than $10 million in the year prior to the acquisition and any acquisitions of assets that did not constitute all or substantially all of an operating business valued at or above the statutory size-of-transaction test at the time of their acquisition.

For each such acquisition, supply:
1. the overlapping 6-digit NAICS code(s) (by number and description) identified above in which the acquired entity or assets derived dollar revenues, or the competitive overlap product(s) or service(s) in the Overlap Description;
2. the name of the entity from which the assets, voting securities, or non-corporate interests were acquired;
3. the headquarters address of that entity prior to the acquisition;
4. whether assets, voting securities, or non-corporate interests were acquired; and
5. the consummation date of the acquisition.

ADDITIONAL INFORMATION

► Subsidies from Foreign Entities or Governments of Concern

Indicate whether, to the knowledge or belief of the filing person, within the two years prior to filing, the acquired person has received any subsidy (or a commitment to provide a subsidy in the future) from any foreign entity or government of concern (see § 801.1(r)). If yes, list each entity or government from which such subsidy was received (or which has made the commitment) and provide a brief description of the subsidy.

Indicate whether, for products the acquired person produced in whole or in part in a country that is a covered nation under 42 U.S.C. § 18741(a)(5)(C), any product is subject to countervailing duties imposed by any jurisdiction. If yes, list each product, the countervailing duty imposed, and the jurisdiction that imposed the duty.

Indicate whether, to the knowledge or belief of the filing person, for products the acquired person produced in whole or in part in a country that is a covered nation under 42 U.S.C. § 18741(a)(5)(C), any product is the subject of a current investigation for countervailing duties in any jurisdiction. If yes, list each product and the jurisdiction conducting the investigation.

► Defense or Intelligence Contracts

Except for select 801.30 transactions, identify (1) pending requests for proposals from the U.S. Department of Defense or any member of the U.S. intelligence community, as defined by 10 U.S.C. § 101(a)(6) or 50 U.S.C. § 3003(4) for which the target has submitted a proposal and (2) awarded procurement contracts with the U.S. Department of Defense or any member of the U.S. intelligence community, as defined by 10 U.S.C. § 101(a)(6) or 50 U.S.C. § 3003(4); valued at $100 million or more if such pending requests for proposals or such awarded procurement contracts (a) are or will be the source of revenues in any identified 6-digit NAICS industry code overlap; or (b) involve or will involve an overlap product or service as described in the Overlap Description or the Supply Relationships Description. Limit the response to the target. Include (1) the name of the entity within the filing person; (2) the contracting office, as defined by 48 C.F.R. § 2.101(b); (3) the Contracting Office ID; (4) the Award ID; and (5) the NAICS code(s), if any, listed in the System for Award Management database. Do not include classified information but note that responsive information was withheld on that basis.

► Voluntary Waivers

- **HSR Confidentiality Waiver for International Competition Authorities (VOLUNTARY)**
  Indicate whether the acquired person agrees to waive the disclosure exemption contained in the Act, 15 U.S.C. § 18a(h), to permit the DOJ and FTC to disclose to non-U.S. competition authority/authorities listed by the filing person (1) the fact that a notification was filed, (2) the waiting period associated with the notification, and (3) information and documents filed with the notification. This waiver will not cover materials provided in response to a request for additional information issued pursuant to 15 U.S.C. § 18a(e) and does not preclude the acquired person from providing a full waiver as provided for under FTC and DOJ practice as reflected in the Model Waiver. The acquired person should list the jurisdictions to which the waiver applies. This item is voluntary.

- **HSR Confidentiality Waiver for State Attorneys General (VOLUNTARY)**
  Indicate whether the acquired person agrees to waive any part of the disclosure exemption contained in the Act, 15 U.S.C. § 18a(h). If yes, list the applicable State Attorneys General and whether the acquired person permits the DOJ and FTC to disclose (1) the fact that a notification was filed and the waiting period associated with the notification, (2) information and documents filed with the notification, or (3) both (1) and (2). This waiver will not cover materials provided in response to a request for additional information issued pursuant to 15 U.S.C. § 18a(e) and does not preclude the acquired person from providing a full waiver as provided for under FTC and DOJ practice as reflected in the Model Waiver. The acquired person should list the jurisdictions to which the waiver applies. This item is voluntary.

CERTIFICATION

See § 803.6 for requirements.

The certification must be notarized or use the language found in 28 U.S.C. § 1746 relating to unsworn declarations under penalty of perjury. The Form includes the following language:

Penalties for False Statements
Federal law provides criminal penalties, including up to twenty years imprisonment, for any person who knowingly alters, destroys, mutilates, conceals, covers up, falsifies, or makes a false entry in any record, document, or tangible object with the intent to impede, obstruct, or influence an ongoing or anticipated federal investigation (see, e.g., Section 1519 of Title 18, United States Code.). It is also a criminal offense to knowingly make a false statement in a federal investigation, obstruct a federal investigation, or conspire to obstruct justice or obstruct or impede the lawful functioning of the government (see, e.g., Sections 371, 1001, and 1505 of Title 18, United States Code).

CERTIFICATION
This NOTIFICATION AND REPORT FORM, together with any and all appendices and attachments thereto, was prepared and assembled under my supervision in accordance with instructions issued by the Commission. Subject to the recognition that, where so indicated, reasonable estimates have been made because books and records do not provide the required data, the information is, to the best of my knowledge, true, correct, and complete in accordance with the statute and rules.

I acknowledge that the Commission or the Assistant Attorney General of the Antitrust Division of the Department of Justice may, prior to the expiration of the initial waiting period pursuant to 15 U.S.C. § 18a, require the submission of additional information or documentary material relevant to the proposed transaction.

AFFIDAVITS

Affidavit(s) required by § 803.5 must be notarized or use the language found in 28 U.S.C. § 1746 relating to unsworn declarations under penalty of perjury. If an entity is filing on behalf of the acquired person, the affidavit must still attest to the good faith intent of the UPE.

In non-§ 801.30 transactions, the affidavit(s) (submitted by both persons filing) must attest that an agreement to merge or acquire has been executed, and if the executed agreement is not the definitive agreement, that a dated document that provides sufficient detail about the scope of the entire transaction that the parties intend to consummate has been submitted. The affidavit(s) must further attest to the good faith intention of the person filing notification to complete the transaction. See § 803.5(b).

In § 801.30 transactions, the acquired person is not required to submit an affidavit.

PRIVACY ACT STATEMENT

Section 18a(a) of Title 15 of the U.S. Code authorizes the collection of this information. The primary use of information submitted on this Form is to determine whether the reported merger or acquisition may violate the antitrust laws. Taxpayer information is collected, used, and may be shared with other agencies and contractors for payment processing, debt collection and reporting purposes. Furnishing the information on the Form is voluntary. Consummation of an acquisition required to be reported by the statute cited above without having provided this information may, however, render a person liable to civil penalties up to the amount listed in 16 C.F.R. §1.98(a) per day.

We also may be unable to process the Form unless you provide all of the requested information.

DISCLOSURE NOTICE

Public reporting burden for this report is estimated to average 105 hours per response, including time for reviewing instructions, searching existing data sources, gathering, and maintaining the data needed, and completing and reviewing the collection of information. Send comments regarding the burden estimate or any other aspect of this report, including suggestions for reducing this burden to:

Under the Paperwork Reduction Act, as amended, an agency may not conduct or sponsor, and a person is not required to respond to, a collection of information unless it displays a currently valid OMB control number. The operative OMB control number, 3084-0005, appears within the Notification and Report Form and these Instructions.

BILLING CODE 6750–01–C

By the direction of the Commission.

April J. Tabor,

Secretary.

Note: The following statements will not appear in the Code of Federal Regulations.

Statement of Chair Lina M. Khan Joined by Commissioner Rebecca Kelly Slaughter and Commissioner Alvaro Bedoya

The Federal Trade Commission, with the collaboration and concurrence of the Assistant Attorney General of the Department of Justice's Antitrust Division, has voted unanimously to issue a Final Rule to amend the Hart-Scott-Rodino (''HSR'') Form and Instructions. This marks the first time in 46 years that the agencies have undertaken a top-to-bottom review of the form (''HSR Form'') that businesses must fill out when pursuing an acquisition that must be notified in accordance with the HSR Act.[1] Alongside this Final Rule, the

[1] Press Release, Fed. Trade Comm'n, FTC Finalizes Changes to Premerger Notification Form (Oct. 10, 2024), *https://www.ftc.gov/news-events/news/press-releases/2024/10/ftc-finalizes-changes-premerger-notification-form.*

Commission voted to submit to Congress its FY2023 Annual Report regarding the Federal Trade Commission and Department of Justice's administration of the HSR Act. This Annual Report highlights the agencies' work investigating and challenging illegal mergers.[2]

Much has changed in the 48 years since the HSR Act was passed. Changes in the economy, corporate structure, and investment strategies have reshaped how businesses compete in today's marketplace. The number of transactions reported to the agencies surged during fiscal years 2021 and 2022 and remains high.[3] And deal valuations have soared. In FY2019, only 13.3% of transactions reported to the agencies exceeded $1 billion.[4] Those high-value transactions now represent nearly a quarter (24%) of all transactions that come before the agencies.[5] Transactions have also become increasingly complex in both structure and potential competitive impact.[6]

The HSR Form, meanwhile, has largely stayed the same. Against the backdrop of vast changes in the structure of business associations and corporate transactions, the information currently collected by the HSR Form is insufficient for our teams to determine, in the initial 30 days provided by the HSR Act, whether a proposed deal may violate the antitrust laws and hence warrant an in-depth investigation. The antitrust agencies are put in the position of expending significant time and effort to develop even a basic understanding of key facts. They must often rely on information provided in third-party interviews that can be challenging to obtain in 30 days. Much of the key information, moreover, is known only to the firms proposing the merger, such as the breadth of their business operations, including any existing relationship with the other party, the deal rationale, and the structure of each relevant entity. Seeking this information on a voluntary basis can leave critical gaps that allow unlawful deals to go undetected.

By reflecting modern day commercial realities, the HSR Form updates in the Final Rule will provide the antitrust agencies with information that is more probative as to whether a proposed deal risks violating the antitrust laws. Several aspects of the Final Rule bear particular mention:

• *Shed light on complex and opaque entities, including private equity and minority holders.* The existing HSR Form did not require information about the entities between the ultimate parent entity and the acquiring entity. Nor did it allow the agencies to determine whether the acquiring person may have competitively relevant premerger entanglements with the target's industry or whether minority holders have significant rights to direct the acquiring entity's actions. To close this gap, the Final Rule requires parties to provide information about the entities and individuals involved in the deal that will have the ability to influence decision-making post-merger.

• *Report vertical and other non-horizontal relationships.* The existing HSR Form failed to provide agencies with meaningful information about non-horizontal relationships. After a decades-long focus primarily on mergers between direct competitors, the antitrust agencies in recent years have reinvigorated merger enforcement against non-horizontal deals that violate the antitrust laws. Since 2021, the FTC has brought six enforcement actions against mergers involving a vertical combination—more than the total number of vertical cases pursued in the last decade overall.[7] The FTC's efforts have already resulted in the government's first litigated victory against a vertical merger in over 50 years.[8] As we continue building on this work, ensuring that the agencies receive information on non-horizontal components of deals is vital. Accordingly, the Final Rule requires filers to report supply relationships to reveal whether the transaction may undermine competition, including through limiting rivals' access to key products or services they need to compete. The Final Rule also contains new document requirements that are intended to reveal any existing or future non-horizontal business relationships that could give rise to competitive risks.

• *Reveal areas of future competition and emerging rivals.* As section 7 instructs us to arrest anticompetitive tendencies in their incipiency, the agencies must scrutinize acquisitions that may eliminate emerging rivals or threaten competition in lines of products that are still in development.[9] The existing HSR form has been particularly ill-suited to this task, as it gives no insight into merging parties' ongoing product development efforts or pipeline projects that could implicate future areas of competition. The Final Rule fixes this problem by requesting key information about products and services under development that are not yet generating revenues. In recent years the FTC pursued an enforcement action involving a pipeline product still in early-stage development, as well as successfully litigated a case involving the market for research and development.[10] The new HSR Form will further bolster these efforts.

• *Identify a greater range of prior acquisitions.* Another notable trend has been the rise of serial acquirers, firms that engage in numerous strategic acquisitions in the same industry and sometimes ''roll up'' many small competitors in the same or adjacent

markets. This strategy can consolidate a market through a series of smaller deals that fly below the radar of antitrust enforcers. Private equity firms and other investors have deployed roll-up strategies across a range of industries, from healthcare to housing—with potentially major ramifications for the public.[11] Indeed, the FTC's lawsuit against U.S. Anesthesia Partners charges the entity with acquiring over a dozen anesthesiology providers across Texas in the span of eight years, a reduction in competition that cost consumers and businesses tens of millions of dollars.[12] The Commission's investigations into acquisitions of veterinary clinics have also revealed roll-up plays.[13] To understand whether a proposed transaction is part of an anticompetitive roll-up scheme, the agencies need insight into what prior acquisitions the entity has made within the same lines of business. While the existing Form required some reporting of these acquisitions, the Final Rule provides a more complete picture of the merging parties' overarching acquisition strategies by requiring that both entities provide information on certain prior acquisitions that closed within the previous five years.

The notice of proposed rulemaking included a requirement that would have aided the agencies' assessment of whether the proposed deal would risk threatening competition in labor markets. This proposal fit within a wider effort at the agencies to correct for antitrust enforcers' decades-long neglect of promoting fair competition in labor markets. As Commissioner Bedoya rightly notes, when antitrust enforcers did pay attention to workers, it usually involved weaponizing antitrust against them.[14] This disposition had no basis in the law—and, as Commissioner Bedoya notes, directly contravenes the goals Congress sought to advance in passing the antitrust laws. No antitrust law gives primacy to some market participants over others or states that some are entitled to greater protection from unlawful monopolization or mergers; to the contrary, the Clayton Act prohibits mergers that may substantially lessen competition ''in any line of commerce.'' [15] I am pleased that in recent years the FTC has reoriented towards a more faithful application of the law, including—for the first time in our 110-year history—through challenging a transaction on the grounds that it risks undermining competition in labor markets.[16]

While the Final Rule pares back some of the labor market requirements, I believe that the information required by other provisions of the Final Rule will position the agencies to identify transactions that threaten competition in labor markets. In particular, the newly-mandated information on overlap and supply relationship descriptions, as well as new high-level business and transaction-related documents, will enable the agencies to identify whether a proposed deal risks undermining competition for workers. And partnerships with the National Labor Relations Board and the Department of Labor will allow the FTC to continue deepening its expertise in how competition works in labor markets.[17]

The FTC also announced today that, following the Final Rule coming into effect, we will lift the categorical suspension on early termination of filings made under the HSR Act. When the antitrust agencies grant early termination, merging parties can consummate their deal without waiting for the full 30-day period ordinarily required under the law. The Commission initially suspended early termination due to a historic volume of filings amidst the COVID–19 pandemic.[18] But a revisiting of the FTC's early termination policy was overdue. Data reveal that permissively granting early termination led to the consummation of some deals that resulted in significant harm.[19] Moreover, the law makes clear that the granting of early termination is purely a discretionary function.[20] Merging

[18] Press Release, Fed. Trade Comm'n, FTC, DOJ Temporarily Suspend Discretionary Practice of Early Termination,'' Federal Trade Commission (Feb. 4, 2021), *https://www.ftc.gov/news-events/news/press-releases/2021/02/ftc-doj-temporarily-suspend-discretionary-practice-early-termination.*

[19] *See* Premerger Notification; Reporting and Waiting Period Requirements, 16 CFR parts 801, 803 (2024) at 17 (The consequences of inadequate detection are revealed in a recent analysis of hospital mergers that were reported to the Agencies for premerger review co-authored by two economists from the Commission's Bureau of Economics. Keith Brand et al., ''In the Shadow of Antitrust Enforcement: Price Effects of Hospital Mergers from 2009–2016,'' 66 J. L. Econ. 639 (2023). The paper examined a set of consummated hospital mergers and measured the effect of each merger on prices. The study concluded that mergers not reportable under the HSR Act did not result in larger price increases than reportable mergers. In contrast, the authors found different outcomes among mergers that were subject to premerger review based on how much review the transaction received. Of the mergers reported to the Agencies, the largest average percentage price increase occurred for those mergers that received early termination of the initial waiting period. This suggests that the HSR Filings failed to provide sufficient information to trigger additional investigations that could have blocked these harmful mergers before they were consummated; instead, the filings resulted in early termination of the waiting period. While the study was not designed to test the impact of this rulemaking, the study supports the Commission's belief that there are information deficiencies with the current HSR Rules that prevent the Agencies from identifying mergers that may violate the antitrust laws.'').

[20] Both the Clayton Act and the HSR Act provide for an exception to the waiting period by empowering the FTC and DOJ to grant early terminations ''in their discretion.''16 CFR 803.11(c) (HSR Act: ''The Federal Trade Commission and the Assistant Attorney General may, in their discretion, terminate a waiting period upon the written request of any person filing notification or . . . sua sponte.''); 15 U.S.C.A. 18a(2) (Clayton Act: ''The Federal Trade Commission and the Assistant Attorney General may, in individual cases, terminate the waiting period specified in paragraph (1) and allow any person to proceed with any acquisition subject to this section, and promptly shall cause to be published in the **Federal Register**

parties are not entitled to early termination, and I question the wisdom of using agency resources on a discretionary function while resource constraints impede our ability to fully execute on our mandatory functions. Because the Final Rule will provide the agencies with additional information necessary to probe the competitive risk that a transaction may pose, we will be better positioned to determine the right set of policies and procedures around early termination, including which subset of deals may receive it and under what circumstances.

The new HSR Form marks a generational upgrade that will sharpen the antitrust agencies' investigations and allow us to more effectively protect against mergers that may substantially lessen competition or tend to create a monopoly. But it is not the only part of the HSR regime that requires upgrading. As I've noted in past years, the HSR Act must be modernized for today's economy.[21] In particular, the statutory timelines laid out in the HSR Act have not kept pace with the surge in deal volume, the complexity of transactions, and the increased burden associated with proving in court a violation of section 7. The HSR Act gives the agencies 30 days to determine whether a deal warrants close investigation, and then another 30 days after parties certify they have ''substantially complied'' with the inquiry. These timelines were set in an era when document productions were measured in the number of boxes and not the number of terabytes—and when lawmakers expected the agencies would receive around 150 merger notifications per year, rather than 150 notifications per month (as the agencies now routinely receive).[22] While the new HSR Form will bolster the antitrust agencies' ability to adequately screen proposed deals during the initial waiting period, Congress should revisit HSR and appropriately extend these timelines to match today's realities.[23]

Faithfully discharging the Commission's statutory obligations also requires adequate funding. The HSR Annual Report summarizes the agencies' merger enforcement work over FY2023.[24] During that period the FTC's work resulted in challenges to 15 transactions that risked threatening competition.[25] Ten of these challenges resulted in parties abandoning the transactions, nearly double the average annual number of abandonments from the preceding 10 years. Our efforts to keep building on this efficacy, however, will run into major resource constraints. The FTC's enacted budget for fiscal year 2024 represented a one percent reduction from the previous year. Alongside a statutorily mandated five percent pay raise and higher non-pay costs resulting from inflation, the result of this reduction has been significantly fewer resources to support the FTC's mission. While our teams work diligently to faithfully enforce the antitrust laws, resource constraints have meant the FTC has been forced to make difficult triage decisions and forgo meritorious investigations—likely resulting in the public bearing the cost of illegal mergers. Additional resources would better equip the Commission to fully pursue its mandate and protect the public.

Finally, the FTC today is launching a new online portal so that members of the public can directly submit comments on mergers that may threaten competition.[26] This portal is part of the FTC's broader work to ensure we are opening our doors to hear from people across the country on issues of public concern.[27] Whether the antitrust agencies do or do not take action against a merger can be of enormous consequence—determining how much people pay for essential goods and services, how much workers earn on a job, whether independent businesses can keep serving their communities, whether an entrepreneur can bring a breakthrough innovation to market, and whether our supply chains are brittle or resilient. Ensuring the antitrust agencies are positioned to make these high-stakes decision with a full understanding of what may follow from a merger is vital. Well-resourced businesses know how best to inform the agencies' investigations, but one shouldn't need to hire a lawyer to provide public enforcers with relevant information on a merger. This new portal will allow the FTC to systematize the regular gathering of public input on mergers and continue broadening the types of expertise and experience that inform our work.

The Final Rule, HSR Report, and new merger portal reflect tremendous work by teams across the FTC, in particular from the Premerger Notification Office, the Office of Policy and Coordination, and the Office of Policy Planning, as well as from throughout the Bureau of

a notice that neither intends to take any action within such period with respect to such acquisition.'').

[21] Statement of Chair Lina M. Khan Joined by Commissioner Rebecca Kelly Slaughter and Commissioner Alvaro M. Bedoya Regarding the FY2022 HSR Annual Report to Congress (Dec. 21, 2023), *https://www.ftc.gov/legal-library/browse/cases-proceedings/public-statements/statement-chair-lina-m-khan-joined-commissioner-rebecca-kelly-slaughter-commissioner-alvaro-m-bedoya-5*.

[22] *See id.*

[23] Presently, FTC staff are routinely at the mercy of merging parties granting extensions of the statutory deadline so that staff has the necessary time to review the transaction. But it should not be merging parties that get to determine the amount of time FTC staff has to review mergers and do the work required by law.

[24] Commissioners Holyoak and Ferguson dissent from the issuance of the HSR Annual Report. In particular, Commissioner Holyoak disagrees with the longstanding practice to count abandonments and deals where parties were not required to make an HSR filing. Dissenting Statement of Commissioner Melissa Holyoak, Hart-Scott-Rodino Annual Report, Fiscal Year 2023 (Oct. 10, 2024) at 2. For over a decade, the Report has been clear that it includes certain non-HSR reportable matters. FY23 Report at n.28 (''The cases listed in this section were not necessarily reportable under the premerger notification program. Given the confidentiality of information obtained pursuant to the Act, it would be inappropriate to identify the cases initiated under the program except in those instances in which that information has already been disclosed.''); *see also Fed. Trade Comm'n, FY 2010 Hart Scott Rodino Annual Report* (2011) at n.18. A proposed merger may be anticompetitive even if it falls below the threshold that would require an HSR filing. As a result, FTC staff may raise concerns regarding certain transactions even where such a filing has not been made. Those matters are part of the FTC's merger enforcement work and including them faithfully represents the Commission's work to Congress. The HSR Annual Report also states plainly that it references certain deals where ''the transaction was abandoned or restructured as a result of antitrust concerns raised during the investigation,'' *id.* at 2, and Commissioner Holyoak does not identify any inconsistency or explain any insufficiency in how the numbers are tabulated here versus how the Commission has historically done so. Commissioner Ferguson notes in his dissent that the precise timing of HSR reports is not mandated by Congress and has varied in past years, but neglects to mention that timing under prior administrations also varied significantly. Dissenting Statement of Commissioner Andrew N. Ferguson Regarding the FY2023 HSR Annual Report to Congress (Oct. 10, 2024) at 1–2. *See, e.g.,* Fed. Trade Comm'n, Annual Competition Reports (last visited Oct. 9. 2024), *https://www.ftc.gov/policy/reports/annual-competition-reports* (for example, the FY19 Annual HSR Report was released in July of 2020, the FY18 Annual HSR Report was released Sept 2019, the FY17 Annual HSR Report was released Apr. 11, 2018, the FY16 Annual HSR Report was released Oct. 4, 2017. Strangely, Commissioner Ferguson also suggests that the decision to issue this year's report in October is part of some political scheme related to giving the Democratic ticket an advantage in the forthcoming presidential election. I am unaware of any reports, research, or evidence suggesting that the HSR Report has any bearing on voting patterns or electoral outcomes.

[25] One transaction challenged in FY2023 remains in litigation.

[26] *See* Press Release, Fed. Trade Comm'n, FTC Finalizes Changes to Premerger Notification Form (Oct. 10, 2024), *https://www.ftc.gov/news-events/news/press-releases/2024/10/ftc-finalizes-changes-premerger-notification-form*.

[27] When the FTC in recent years has invited public input, we have received thousands—and sometimes tens of thousands—of comments, including on issues relating to merger enforcement. *See, e.g.,* Public Docket FTC–2023–0043, Draft Merger Guidelines for Public Comment, *Regulations.gov* (Jul. 19, 2023); Public Docket FTC–2024–0028, FTC and DOJ Seek Info on Serial Acquisitions, Roll-Up Strategies Across U.S. Economy, *Regulations.gov* (May 23, 2024).

Competition, the Office of General Counsel, and the Bureau of Economics. I am grateful to this team for their diligent efforts, as well as to the FTC's partners at DOJ for their collaboration, and to my fellow Commissioners for their thoughtful engagement.

Statement of Commissioner Alvaro M. Bedoya Joined by Chair Lina M. Khan and Commissioner Rebecca Kelly Slaughter

My colleagues Commissioners Ferguson and Holyoak write at some length in support of the Commission's decision not to adopt, at this time, a set of proposed requests for employment information (''the labor screen'') that was included in the original notice of proposed rulemaking.[1] Rather than litigating the merits of the labor screen, I write to respond to one of the ideas underlying my colleagues' arguments against it.

The Sherman Act was passed in 1890; the Clayton Act and the Federal Trade Commission Acts were passed in 1914, creating this Commission and empowering it to enforce this newly expanded set of antitrust laws.[2] Yet it was only in 2021 that a Federal antitrust enforcer first stopped a merger because of its impact on competition in the labor market.[3]

My colleagues cite the absence of such merger challenges as a key reason for dropping the labor screen. Both stress the extensive efforts the antitrust agencies have expended to identify such mergers.[4] They argue that, if enforcers have been working for years to identify mergers that harm competition in labor markets and have not brought more challenges, how can we justify requesting additional data to identify those mergers? In fact, Commissioner Holyoak seems to imply that labor monopsony is rare, going so far as to say that the labor screen ''was a solution in search of a nonexistent problem.'' [5]

History tells a different story. While my colleagues suggest that the absence of labor-based merger challenges exists ''not for a lack of trying,'' [6] a review of the first hundred years of that history finds dreadfully little trying. Indeed, most of the history of antitrust enforcement has been marked by a clear aversion to protecting labor market competition. This arguably has only been reversed in the last decade.

The historical record reveals several reasons for the lack of labor-based merger challenges, none of which suggest that labor monopsony is rare. The first would be early antitrust enforcers' overt hostility to labor organizing specifically and labor organizations more generally—a position that put them in sharp opposition to the legislators who created American antitrust law.

From the first Senate debates over passage of the law that would come to bear his name, Senator John Sherman made clear he was concerned with combinations of companies that could unilaterally set the price of labor. In denouncing the ''trust,'' he explained that:

> ''The sole object of such a combination is to make competition impossible. It can control the market, raise or lower prices, as will best promote its selfish interests. . . It dictates the terms to transportation companies, it commands the price of labor without fear of strikes, for in its field it allows no competitors. Such a combination is more dangerous than any heretofore invented. . .'' [7]

He wasn't the only legislator who was concerned with labor. The debates in 1890 as well as 1914 were defined by an overriding concern that the laws being considered would be misused to stop labor organizing. Thus, the Sherman Act was amended not once but twice to avoid such a result, ultimately being rewritten nearly in its entirety; sections 6 and 20 of the Clayton Act were enacted for the same reason 24 years later.[8]

Early antitrust enforcers ignored this legislative intent, as did the courts hearing challenges brought under the laws. Prosecutors instead turned the Sherman Act into what Professor Hovenkamp termed a ''savage weapon'' against labor, [9] using it to break the strikes of longshoremen in New Orleans and hungry Pullman Palace Car workers in Illinois.[10] The labor protections in the Clayton Act arguably fared worse. Despite the law's clear prohibition against the use of antitrust laws against labor organizing, courts in the 1920s used it to stop 2,100 strikes.[11]

In short, for the first four decades of their existence, the antitrust laws were used as a cudgel against organized labor, not a tool to detect and block mergers that risked harming labor markets. While the law was there to allow for a challenge to a merger based on its impact on labor market competition,[12] the idea that the DOJ or FTC of that era would try to block such mergers finds no basis in reality.

In his treatise exploring the absence of antitrust enforcement targeted at labor markets, Professor Posner presents two other reasons for the lack of labor-based merger challenges, both of which post-date the heyday of the labor injunction in the first half of the 20th century.[13] He argues that, starting in the 1960s, legal scholars began to prevail upon law enforcers to target antitrust enforcement on conduct and combinations that raised the prices on products and services sold to the public—that is, ''consumer welfare.'' More interestingly, he explains that until very recently, most economists assumed labor markets were more or less competitive, and labor market power—the power of employers to set wages below a competitive level—was thus not an important problem for society.[14]

[14] *See id* at 4. Professor Posner cites a popular economics textbook from 2005 which declared that ''[m]ost labor economists believe there are few monopsonized labor markets in the United States.'' *Id. citing* Dennis W. Carlton & Jeffrey M. Perloff, *Modern Industrial Organization* 108 (2005). *See also* David Card, *Who Set Your Wage?* American Economic Review at 1075 (2022) (''the time has come to recognize that many—or even most—firms have some wage-setting power. Such a shift was made with respect to firm's price-setting power many decades ago[. . .] In the past few years we may have reached a tipping point for a similar transition in labor economics, driven by the combination of new (or at least post-1930) theoretical perspectives, newly available data sources, and accumulating evidence on several

That understanding of labor markets has begun to unravel. New research suggests that the fewer companies in a community competing for workers, the lower the wages.[15] Research also suggests that mergers, specifically, help companies keep wages low.[16] This appears to be a common problem in American society. Professor Posner found it plausible that in many labor markets, workers receive thousands of dollars less than the competitive rate.[17] Two years ago, the Treasury Department estimated that as a result of current employer market concentration as well as how time consuming it is to find, interview for, and accept a job, Americans likely lose out on the equivalent of eight weeks of pay every year. In other words, in a perfectly competitive labor market—in a world where we can easily switch jobs to one of any number of firms, most of us would be about two to four paychecks richer.[18] Few people may know about ''labor monopsony,'' but anyone on a budget knows what they'd do with that money.

In short, my colleagues seem to say that labor monopsony is not a problem even though we've only just started to look for that problem. Then, they wave away tools to help find that problem because we haven't found it yet.[19]

All of this said, a key barrier to any merger challenge, including labor-based challenges, is a lack of time. The changes voted out today will help FTC staff quickly find and focus on the mergers that hurt competition in any market, including labor markets. For this and many other reasons, I am proud to support them.

different fronts.''); *id.* at 1086 (''By insisting that 'markets set wages,' labor economists ceded the field, and had very little to say about questions like the design of online labor markets, or the effects of no-solicitation or no-poaching agreements—other than that they should not matter[. . .] One of the most exciting developments in the field today is the evidence of labor economists taking questions about wage setting seriously[. . .] I also expect this work to lead to some rethinking on policies such as minimum wages, the regulation of trade unions, and anti-Trust'').

[15] See, *e.g.,* Efraim Benmelech, et al., *Strong Employers and Weak Employees: How Does Employer Concentration Affect Wages,* 57. J. of Hum. Res. S200, S203 (Supplement) (2022).

[16] See Elena Prager & Matt Schmitt, *Employer Consolidation and Wages: Evidence from Hospitals,* 111 Am. Econ. Rev. 397, 397 (2021); Benmelech, supra note 3, at S200 (''instrumenting concentration with merger activity shows that increased concentration decreases wages''); David Arnold, *Mergers and Acquisitions, Local Labor Market Concentration, and Worker Outcomes* (unpublished) (Oct. 29, 2021) (''M&As that increase local labor market concentration have negative impacts on worker earnings with the largest impacts in already concentrated markets.''), *available at https://sites.google.com/site/davidhallarnold/research.*

[17] *See* Posner, *supra* note 13, at 28.

[18] The report's review of academic studies ''places the decrease in wages at roughly 20 percent relative to the level in a fully competitive market.'' This is a middle estimate from an estimated range of $0.15 to $0.25 cents of lost wages on every dollar. The ''eight weeks of pay'' figure applies the lower bound of that estimate ($0.15, or 15%) to 52 weeks of pay. *See* U.S. Dep't of Treasury, *The State of Labor Market Competition,* at ii (2022) (''20 percent''); *id.* at 24–25 (''15–25 cents on the dollar'').

[19] Commissioner Holyoak states that ''[t]he agencies have never made a standalone labor challenge to an acquisition,'' and Commissioner Ferguson states that the agencies have never made a challenge ''based on labor market theories that could have been identified by the proposed requirements.'' Statement of Commissioner Melissa Holyoak, *Final Premerger Notification Form and the Hart-Scott-Rodino Rules,* at 9–10; Concurring Statement of Commissioner Andrew N. Ferguson, *In the Matter of Amendments to the Premerger Notification and Report Form and Instructions and the Hart-Scott-Rodino Rule,* at 11. I evaluate this new era quite differently. In 2021, our colleagues at the Antitrust Division successfully blocked a proposed merger between two of the nation's largest book publishers based on a labor theory that the elimination of competition between the merging publishers likely would have negatively impacted the advances paid to authors for their work. *See United States* v. *Bertelsmann SE & Co. KGaA,* 646 F. Supp. 3d 1 (D.D.C. 2022). What's more, in addition to Commission staff's challenge of the Kroger/Albertson's merger in part on a labor theory, FTC staff just last month submitted a comment urging the Indiana Department of Health to deny an application that seeks to combine Union Hospital and Terre Haute Regional Hospital, in part because, in staff's view, the proposed merger would likely depress wage growth for hospital employees and exacerbate challenges with recruiting and retaining healthcare professionals. *See* Complaint, *FTC* v. *Kroger Co., and Albertsons Co.,* (D. Or. Feb. 26, 2024); Federal Trade Commission Staff Submission to Indiana Health Department Regarding the Certificate of Public Advantage Application of Union Health and Terra Haute Regional Hospital at 54–63 (Sept. 5, 2024). The Commission unanimously authorized staff to file the comment. Press Release, Fed. Trade Comm'n, *FTC Staff Opposes Proposed Indiana Hospital Merger* (Sept. 5, 2024), *https://www.ftc.gov/news-events/news/press-releases/2024/09/ftc-staff-opposes-proposed-indiana-hospital-merger.* Additionally, in 2018, under Republican leadership, the Commission alleged that Grifols S.A.'s proposed acquisition of Biotest U.S. Corporation would likely have enabled the combined firm to decrease fees paid to blood plasma donors and required Grifols to divest certain assets as a condition of the acquisition. *See* Complaint, *In the Matter of Grifols S.A. and Grifols Shared Services North America, Inc.* (Aug. 1, 2018). Finally, I note that prior to my arrival at the Commission, Chair Khan and Commissioner Slaughter sounded the alarm on labor concerns in the abandoned merger between Lifespan Corporation and Care New England Health System stating that, in addition to allegations contained in staff's complaint, they would have also supported an allegation on labor grounds. See Concurring Statement of Comm'r Rebecca Kelly Slaughter and Chair Lina M. Khan Regarding *FTC and State of Rhode Island* v. *Lifespan Corporation and Care New England Health System*, Fed. Trade Comm'n (Feb. 17, 2022), *https://www.ftc.gov/system/files/ftc_gov/pdf/public_statement_of_commr_slaughter_chair_khan_re_lifespancne_redacted.pdf.*

Statement of Commissioner Melissa Holyoak

I. Introduction

The Commission issued its notice of proposed rulemaking for the Premerger Notification, Reporting and Waiting Period Requirements which implements the Hart-Scott-Rodino Antitrust Improvements Act (''NPRM'') on June 29, 2023.[1] The contents of the NPRM were harrowing and generated (justifiably) substantial outcry from many commentors. Many of the contemplated filing requirements, if implemented, would have been beyond the Commission's legal authority, arbitrary and capricious, unjustifiably burdensome, and just plain bad policy.[2]

The Commission worked together on the monumental task of modifying the NPRM into the Final Rule,[3] ensuring the Final Rule does not suffer from the many legitimate criticisms raised by the commentors. The Final Rule modifies many provisions in the NPRM while taking great care to avoid unduly burdening merging parties or chilling the many procompetitive transactions that happen each year. To be clear, this Final Rule does not align exactly with my preferences. But I have worked to curb the excesses of the NPRM in meaningful ways that would not have happened absent my support. These significant modifications resulted in a Final Rule that is not only consistent with the agencies' statutory grant of authority but will also close certain informational gaps that affect the agencies' ability to conduct effective premerger screening.

Commissioner Ferguson, in section III of his statement, describes in detail the

[1] Premerger Notification; Reporting and Waiting Period Requirements, 88 FR 42178 (proposed Jun. 29, 2023) (to be codified at 16 CFR parts 801 and 803) (hereinafter NPRM).

[2] Out of the gate, the NPRM made broad assertions about increasing concentration as a justification for the unprecedented and wide-sweeping proposed changes. NPRM, *supra* note 1, at 42179. The concentration literature upon which it relied, *id.* at 42179 n.7, however, has been heavily criticized and debunked. *See, e.g.,* Chad Syverson, *Macroeconomics and Market Power: Context, Implications, and Open Questions,* 33 J. Econ. Perspectives 23 (2019); Carl Shapiro, *Antitrust in a Time of Populism,* 61 Int'l J. Indus. Org. 714 (2018); Gregory J. Werden & Luke M. Froeb, *Don't Panic: A Guide to Claims of Increasing Concentration*, Antitrust Magazine, Fall 2018. Most notably, the literature cited by the NPRM does not use well-defined antitrust markets in its assessment or conclusions. Further, even if increasing concentration had been a reality, it only has a limited role in analyzing competitive effects. *See infra* note 57.

[3] Fed. Trade Comm'n, Premerger Notification; Reporting and Waiting Period Requirements, Final Rule (Oct. 3, 2024), *https://www.ftc.gov/system/files/ftc_gov/pdf/p110014hsrfinalrule.pdf* (hereinafter Final Rule).

benefits of certain provisions that the Commission included in the Final Rule. These provisions that he describes fill information gaps in the agencies' current ability to fulfill their missions under the HSR Act. I agree with Commissioner's Fergusson's assessments and applaud the Commission's efforts to include these new requests in the Final Rule.

Simultaneous with today's issuance of the Final Rule, the Commission has also announced that it will lift its suspension of early termination when the Final Rule takes full effect. The suspension itself has been in place for more than three-and-a-half years, even though the suspension was supposed to be ''temporary'' and ''brief.'' [4] I have been baffled by this unjustified delay and disappointed that it took the promulgation of this Final Rule to lift the suspension of early termination. One of the virtues of the Final Rule is that certain provisions will allow staff to more quickly identify which mergers should receive early termination, a significant benefit to both staff and merging parties. So I guess late is better than never.

For the remainder of my statement, I write to demonstrate the dramatic differences between this Final Rule and the proposed rule set forth in the NPRM, and also to elaborate on some of the changes, in addition to lifting the early termination suspension, that drove my decision to vote in favor of the Final Rule. My overview of the Final Rule is not a substitute to the text of the Final Rule or the analysis in the Statement of Basis and Purpose (''SBP''),[5] both of which should be consulted by all filers.

Of the twenty-nine primary proposals in the NPRM, ten were rejected entirely, including, among others, the request for labor information, the obligation to produce draft transaction documents, and the requirements to create organizational charts. Of the remaining nineteen proposals, the Final Rule includes just two without modification; we have made meaningful changes to the other seventeen requirements.

TABLE 1—REJECTED PROPOSALS

NPRM provision	Results in final rule
Labor Market/Employee Information	Proposal rejected.
Drafts of Transaction-Related Documents	Proposal rejected.
Organizational Chart of Authors and Recipients	Proposal rejected.
Other Types of Interest Holders that May Exert Influence	Proposal rejected.
Expand Current 4(d)(iii) to Include Financial Projections to Synergies and Efficiencies	Proposal rejected.
Deal Timeline	Proposal rejected.
Provision of Geolocation Information	Proposal rejected.
Identification of Messaging Systems	Proposal rejected.
Litigation Hold Certification Language	Proposal rejected.
Identification of F/K/A Names	Proposal rejected.

For example, the prior acquisition proposal that called for ten years of prior acquisitions without any size threshold was reversed in the Final Rule to request only five years of acquisitions, and reinstated the $10 million threshold—returning to the time period adopted in 1987 [6] and dollar threshold that had existed since the original rules in 1978.[7] The NPRM proposal that would have required the filers to identify and produce all agreements between the merging parties has been modified significantly in the Final Rule to simply require the filers to check boxes to indicate whether they have a few types of agreements between them—nothing has to be produced or described. The Final Rule similarly modifies the NPRM's overlap and supply ''narratives'' to require only ''brief'' descriptions instead. And, among other revisions, the Final Rule's overlap and supply descriptions requirement makes clear that antitrust analysis is not required.

Further, many of the modifications exempt ''Select 801.30 Transactions'' from having to report certain information required by the Final Rule. Select 801.30 Transactions are acquisitions of third parties' voting securities where the acquirer does not gain control, no agreements between the acquiring and acquired person govern the transaction, and the acquiror does not have the ability to appoint or serve on a board.[8] The Final Rule likewise exempts transactions where there is no horizontal overlap or supply relationship from certain information requirements, and sets a *de minimis* threshold to exclude the requirement to describe supply relationships where the sale or purchase of the product, service, or asset represents less than $10 million in revenue in the most recent year. Table 2 highlights some of the main modifications that have been made in the Final Rule (again, this list is not exhaustive and does not substitute for the text of the Final Rule).

[5] Fed. Trade Comm'n, 16 CFR parts 801 and 803, Premerger Notification; Reporting and Waiting Period Requirements, Statement of Basis and Purpose (Oct. 3, 2024) (hereinafter SBP).

[6] 52 FR 7066 at 7078 (Mar. 6, 1987) (''[The Commission] believes that this change can be made without harming the agencies' ability to conduct a thorough antitrust review since an account of the acquiring person's acquisitions over the past five years will give adequate notice of possible trends toward concentration.'').

[7] 43 FR 33450 at 33534 (July 31, 1978) (''The item permits the omission of prior transactions that did not involve the acquisition of more than 50 percent of the voting securities or assets of a person with preacquisition sales or assets of $10 million, since smaller acquisitions are likely to be less significant from an antitrust standpoint.''). Unlike prior iterations of the rules, the Final Rule does require the acquired entity to also identify prior acquisitions and clarified that an acquisition of ''all or substantially all'' of the assets of a business must be reported.

[8] The Final Rule defines Select 801.30 Transactions as ''[a] transaction to which § 801.30 applies and where (1) the acquisition would not confer control, (2) there is no agreement (or contemplated agreement) between any entity within the acquiring person and any entity within the acquired person governing any aspect of the transaction, and (3) the acquiring person does not have, and will not obtain, the right to serve as, appoint, veto, or approve board members, or members of any similar body, of any entity within the acquired person or the general partner or management company of any entity within the acquired person. Executive compensation transactions also qualify as select 801.30 transactions.'' 16 CFR part 803, appendix B at 1.

TABLE 2—SELECT MODIFIED NPRM PROPOSALS

NPRM provision	Select modification in final rule
Prior Acquisitions [9]	Among others, retain the five-year lookback and $10 million sales/assets threshold that existed in prior iterations of the HSR rules.
Other Agreements Between the Parties [10]	Among others, filers are not required to produce or describe agreements between the parties; instead, they must only, via checkbox, identify types of agreements between them, if any.
Officers, Directors, and Board Observers [11]	Among others, (1) exclude reporting on board observers; (2) limit to acquiring person only; (4) limit to officers/directors of entities in overlap industries as described by the text of the Final Rule.
4(c) Documents by/for Supervisory Deal Team Lead(s) [12]	Limit to only apply to *one* individual (*not* the plural ''leads'' like in the NPRM) supervisory deal team lead, as defined in the text of the Final Rule.
Supply Relationships [13]	Among others, (1) require only ''brief'' descriptions rather than a narrative; (2) exclude ''Select 801.30 Transactions''; (3) impose a *de minimis* threshold and (4) limit descriptions to a business assessment rather than an antitrust analysis (*see* SBP).
Overlap Products and Services [14]	Among others, (1) require only ''brief'' descriptions rather than a narrative; (2) exclude ''Select 801.30 Transactions''; and (3) limit description to a business assessment rather than an antitrust analysis (*see* SBP).
Ordinary Course Documents (Periodic Plans and Reports) [15]	Among others, limit to exclude ''Select 801.30 Transactions'' and limited to only require documents provided to Chief Executive Officers.
Identification of Limited Partners [16]	Among others, limit disclosure requirements for limited partners who do not have management rights.
Description of Entity Structures and Organizational Chart for Funds and MLPs [17].	Among others, eliminate requirement to create an organizational chart.
Transaction Diagram [18]	Among others, exclude ''Select 801.30 Transactions'' and only necessary if diagrams previously existed (*i.e.,* no need to create diagrams).
Mandatory Identification of Foreign Jurisdiction Reporting by Both Parties [19].	Limit to acquiring person.
Requiring a draft agreement or term sheet and transaction specific agreements for filings on non-definitive agreements [20].	Clarify scope and provide more details about the information required.
Transaction Rationale [21]	Among others, exclude ''Select 801.30 Transactions.''
Voluntary Waivers for State AGs and International Enforcers [22]	Allow filers to voluntarily check two separate boxes that would permit certain disclosures.
Defense or Intelligence Contracts [23]	Among others, limit to contracts generating $100 million or more of revenue and only if there is an Overlap or Supply Relationship.
Document Log Requirements [24]	Among others, limit requirement to identify authors to certain and limited circumstances.
Adjustments to NAICS revenue reporting [25]	Modified to limit scope.

Notably, only two of the main proposals in the NPRM were adopted without modification: the requirements to translate foreign-language documents and to report subsidies from foreign entities of concern, which was mandated by the Merger Filing Fee Modernization Act of 2022.[26] All other proposals were rejected or significantly modified. Taken together, the dramatic revisions to the proposed rule set forth in the NPRM result in a Final Rule that I can support. The decisions made to scale back the proposed requirements in the NPRM will limit burden, aligns the Final Rule with the Commission's legal authority under the HSR Act, and is tailored to address information gaps that have hampered the agencies' premerger review.[27]

Sections II through IV of my statement explain why three proposals in the NPRM were especially problematic to me, and why their elimination or substantial revision was critical to my vote on this Final Rule: (II) Labor Market/Employee Information, (III) Drafts of Transaction-Related Documents, and (IV) Ten Years of Prior Acquisitions Without any Size Thresholds. To be clear, by focusing on these three proposals I do not mean to diminish the importance of the other changes reflected in the Final Rule. Each of the many revisions that scaled back the proposed requirements in the NPRM contributed to my vote to issue the Final Rule. Finally, I discuss in section V some additional considerations that led me to support the Final Rule, including important limitations in the Final Rule that ensure

[26] *See* 15 U.S.C. 18b (requiring the Commission to promulgate a rule requiring HSR filings to include information on subsidies received from certain foreign governments or entities that are identified as foreign entities of concern); Consolidated Appropriations Act, 2023, Public Law 117–328 (2023) (reflecting the appropriations bill that included the Merger Filing Fee Modernization Act of 2022).

[27] The incremental burden estimated in the NPRM decreased from 107 hours to only 68 hours in the Final Rule, a result that was critical to my decision. NPRM, *supra* note 1, at 42208 (reporting 107 incremental hours); SBP, *supra* note 3, at section VIII, 386 of 406 (reporting 68 incremental hours).

the Final Rule will not result in fishing expeditions.

Before proceeding, I want to discuss the Commission's authority to issue today's Final Rule, an issue that is critical to me as a Commissioner.[28] The HSR Act obligates the Commission, ''with the concurrence of the Assistant Attorney General,'' to issue rules that require information to be submitted in HSR filings that will ''be in such form and contain such documentary material and information relevant to a proposed acquisition as is necessary and appropriate to enable the Federal Trade Commission and the Assistant Attorney General to determine whether such acquisition may, if consummated, violate the antitrust laws.'' [29] While this mandate affords some discretion to the Commission, this discretion is not unbounded. Critically, Congress did not give the Commission authority to promulgate rules to gather information generally, or to merely heap burden upon merging parties in an effort to dissuade acquisitions. Rather, the Act explains that the purpose of HSR filings, and the rules determining the content of filings, is for the agencies ''to determine whether such acquisition may, if consummated, violate the antitrust laws.'' [30] Many proposals in the NPRM—including the three discussed below—have been rejected or substantially modified to ensure the Final Rule includes only new requirements that are consistent with the text and structure of the HSR Act.

II. Labor Market Information

The NPRM contained many problematic proposals. Chief among them was its proposal to collect information from filers about labor markets.[31] As proposed, filers would report three different types of information related to labor:

- ''Largest Employee Classifications[:] Provide the aggregate number of employees . . . for each of the five largest occupational categories'' based upon 6-digit SOC classifications; [32]
- ''Geographic Market Information for Each Overlapping Employee Classification[:] Indicate the five largest 6-digit SOC codes in which both parties . . . employ workers [and also provide] each ERS commuting zone in which both parties employ workers with the 6-digit classification and provide the aggregate number of classified employees in each ERS commuting zone; and'' [33]
- ''Worker and Workplace Safety Information[:] Identify any penalties or findings issued against the filing person by the U.S. Department of Labor's Wage and Hour Division (WHD), the National Labor Relations Board (NLRB), or the Occupational Safety and Health Administration (OSHA) in the last five years and/or any pending WHD, NLRB, or OSHA matters.'' [34]

All three of these requirements (''Labor Proposal'') were completely rejected in the Final Rule. Chair Khan asserts in her statement that ''the Final Rule pares back some of the labor market requirements.'' [35] Despite this confusing statement, the text of the Final Rule makes clear that all (not ''some'') of the labor requirements have been fully removed (not ''pare[d] back''). And for good reason. Despite repeated and extensive efforts to make harm in labor markets a standard component of merger enforcement, no evidence exists to justify including the Labor Proposal in the Final Rule. Accordingly, the Labor Proposal was rightfully excluded from the Final Rule and, absent new evidence, has no place in any future rulemaking that the Commission may contemplate.

To be sure, a merger may theoretically create anticompetitive effects in a relevant labor market.[36] A post-merger entity might, for example, be able to lower wages for workers when the merger eliminates a critical employment option for workers. Such a scenario is more likely when the merger involves specialized workers who may have fewer comparable alternatives than less skilled workers.[37] Theory aside, the Labor Proposal would have asked for information generally unhelpful for determining whether an acquisition violates the antitrust laws.

First, the ''worker and workplace safety information'' would have provided no measurable benefit to the agency in its initial determination of whether the proposed merger violates the antitrust laws. To support burdening all filers with providing this information, the NPRM asserted that ''[i]f a firm has a history of labor law violations, it may be indicative of a concentrated labor market where workers do not have the ability to easily find another job.'' [38] No evidence, empirical or otherwise, was presented to support this assertion. And I am not aware of any supportive literature and have never seen a court opinion that suggests such evidence indicates competitive harm from a merger under section 7 of the Clayton Act (or any other antitrust violation under the Sherman Act or otherwise). Instead, this proposal seems like an overt way to harass firms with any workplace failure under the guise of an antitrust investigation. As the Supreme Court observed, ''[e]ven an act of pure malice by one business competitor against another does not, without more, state a claim under the [F]ederal antitrust laws; those laws do not create a [F]ederal law of unfair competition or 'purport to afford remedies for all torts committed by or against persons engaged in interstate commerce.' '' [39] We simply do not have authority under the HSR Act to require filers to submit information about workplace safety.

Second, the proposed request for Standard Occupational Classification (''SOC'') codes would have been of—at most—limited value because SOC codes by themselves are not sufficient to define a relevant labor market for antitrust purposes.[40] Phrased differently, they are not tethered to the hypothetical monopolist test which has been applied by the agencies and courts in various iterations of the merger guidelines for decades.[41] Depending on the merger, SOC codes may be too broad

'Even an act of pure malice by one business competitor against another does not, without more, state a claim under the [F]ederal antitrust laws,' without proof of 'a dangerous probability that [the defendant] would monopolize a particular market.' '' (alteration in original) (quoting *Brooke Grp.,* 509 U.S. at 225)).

[40] *See Comment of U.S. Chamber of Com.,* Doc. No. FTC–2023–0040–0684 at 34 (hereinafter *U.S. Chamber Comment*) (''The data sought by the proposed rules defines labor markets imprecisely at best.'').

[41] *See Fed. Trade Comm'n* v. *Advoc. Health Care Network,* 841 F.3d 460, 468–70 (7th Cir. 2016) (using the hypothetical monopolist test to inform market definition); *Fed. Trade Comm'n* v. *Hackensack Meridian Health, Inc.,* 30 F.4th 160, 167 (3d Cir. 2022) (similar).

to accurately assess labor competition,[42] limiting their predictive value for assessing competitive harm. The NPRM itself appeared to acknowledge the limited value of SOC codes: ''[t]he use of [SOC] codes as a screening tool is not intended to endorse their use for any other purpose, such as defining a relevant labor market.'' [43] In fact, just a few examples demonstrate the limited value SOC codes would provide to the Commission:

Attorneys working across diverse areas of expertise are broken down into attorneys (23–1011 Lawyers) and . . . well, attorneys, although there is a separate category for Judges, Magistrate Judges, and Magistrates (23–1023), who are likely lawyers, too. To paraphrase Shakespeare (or a character in ''Henry VI, Part 2''), let's kill all the widgets.

To the best of my recollection, the agencies tend to slice the professional salami a little thinner than that when hiring staff.

Physicians fare a little better, although 10 categories of specialist physicians, plus ''family medicine physicians'' and ''physicians, all other'' leave out some specialties (like, say, surgery and ophthalmology) and make no room for subspecialties, which might be of interest if you're hiring a cardiothoracic surgeon to do a quad bypass or an orthopedic surgeon to do a hip replacement (or both, but you care which surgeon does which procedure).[44]

Third, the agencies have not relied upon the Economic Research Service (''ERS'') commuting zones to allege a relevant labor market,[45] and based upon this limited experience, they cannot be considered sufficiently applicable to require all filers to provide the ERS data proposed by the NPRM. Further, the NPRM proposal on ERS commuting zones relied upon data from 2000—yes, 24-year-old data—even though more recent iterations are available.[46] And newer data confirm that the older data fail to reflect current market realities, including the widespread transition to telework.[47] Given that there is no evidence that forcing all filers to provide the proposed labor market information would assist the agencies in determining whether the filed-for acquisition violates the antitrust laws, the Commission lacks authority to request the information under the HSR Act.

Even if one were to assume that the agencies had the authority to request the proposed labor market information, it was nonetheless properly excluded from the Final Rule because it was a solution in search of a nonexistent problem. The agencies have never brought a standalone labor challenge to an acquisition.[48] And this is not for lack of trying. Officials at the Commission,[49] Department of Justice,[50] and State enforcers [51] have stated their desire to focus on harms to the labor market, especially in mergers, since at least 2018, but the expended resources so far have been to no avail.

Granted, the Commission has included tagalong labor claims in addition to traditional theories of harm.[52] And, in a press release, the Commission has taken credit for protecting against harms in the labor market even though the actual complaint being announced by the press release did not allege harm in a labor market.[53] But these few and obscure outliers do not justify the widespread proposal to include labor market information in the Final Rule, especially information (*e.g.,* SOC codes) that has never been used in any of the agencies' filings (litigated or otherwise).

Moreover, the NPRM did not identify any economics literature that justified the request for labor information.[54] As explained by Albrecht *et al.:*

[D]espite growing interest in the use of antitrust law to address labor monopsony, such efforts are not supported by empirical and theoretical foundations sufficient to bear the weight of these galvanized efforts . . . .

Empirical data concerning the magnitude and impact of labor monopsonies is

[42] *E.g.,* Jose Azar et al., *Concentration in US Labor Markets: Evidence from Online Vacancy Data,* 66 Labor Econ. 101886, 5 (2020). (''[T]he 6-digit SOC is too broad of a market according to the [small significant non-transitory reduction in wage test].'').

[43] NPRM, *supra* note 1, at 42197; *see Comment of International Center for Law & Economics,* Doc. No. FTC–2023–0040–698 at 15 (''Given the systematic misfit between the proposed 'Labor Markets' section and any actual labor markets, given the agencies lack of experience in analyzing the local labor-market effects of proposed mergers, and given the hard questions of when or under what conditions such labor-market effects might be both material and unlikely to covary with product-market effects, we suggest that the screening utility of the new information remains unclear.'').

[44] Daniel J. Gilman, *Antitrust at the Agencies Roundup: Kill all the Widgets Edition,* Truth on the Market (Aug. 4, 2023), *https://truthonthemarket.com/2023/08/04/antitrust-at-the-agencies-roundup-kill-all-the-widgets-edition/* (ellipses in original).

[45] The Commission did not use SOC codes or ERS commuting zones in their complaint allegations that reference concerns in labor markets in its recent litigations. *See* Compl., *In re Tapestry, Inc., & Capri Holdings Ltd.,* No. 9429 (F.T.C. Apr. 22, 2024); *see* Compl., *In re The Kroger Co. & Albertsons Cos., Inc.,* No. D–9428 (F.T.C. Feb. 26, 2024). And the DOJ did not rely upon ERS commuting zones in *United States* v. *Bertelsmann SE & Co. KGaA See* Compl., *United States* v. *Bertelsmann SE & Co. KGaA,* 646 F. Supp. 3d 1 (D.D.C. 2022); see also *infra* note 48 (explaining why *Bertelsmann* is not properly considered a case about harm in a labor market, but rather a monopsony input case).

[46] *Comment of Wachtell, Lipton, Rosen & Katz,* Doc. No. FTC–2023–0040–0670 at 8.

[47] *Id.*

[48] Some have considered *United States* v. *Bertelsmann SE & Co. KGaA,* 646 F. Supp. 3d 1, 1 (D.D.C. 2022) to be a labor-market case. I disagree. On balance, this was more of a traditional monopsony input case. *Id.* The primary concern was whether there would be sufficient outlets for best-selling books. *Id.* I am also unaware of merger challenges by private parties where the plaintiffs alleged harm in a labor market. *See* Suresh Naidu et al., *Antitrust Remedies for Labor Market Power,* 132 Harv. L. Rev. 536, 571 (2018) (''[W]e [have not] found a reported case in which a court found that a merger resulted in illegal labor market concentration.''). The Commission, as reflected in the SBP, also classifies *Bertelsmann* as an input monopsony case. SBP, *supra* note 5, at section II.B.2, 32 of 406.

Apr. 22, 2024) (discussing labor issues but not alleging violations of the law based upon harm in labor markets).

[54] *See* NPRM, *supra* note 1, at 42197–98.

inconsistent. Evidence on the extent of labor-market power is mixed, with studies reaching divergent conclusions depending on the data, methodology, and markets analyzed.[55]

The NPRM also asserted that alleged increases in concentration justified its proposals, including its proposal for labor information.[56] While concentration levels may have a role in antitrust enforcement (*e.g.,* merger presumptions), general and imprecise observations of increased concentration are a slender reed upon which to base such a significant expansion of HSR authority.[57] These limitations also apply in the labor context. ''Many factors other than concentration can affect wages, such as differences in firm productivity, local labor-market conditions (*e.g.,* urban vs. rural), and institutional factors like unionization rates.'' [58] Further, as explained by Berry *et al.:*

> A main difficulty in [the monopsony power literature] is that most of the existing studies of monopsony and wages follow the structure-conduct-performance paradigm; that is, they argue that greater concentration of employers can be applied to labor markets and then proceed to estimate regressions of wages on measures of concentration. [S]tudies like this may provide some interesting descriptions of concentration and wages but are not ultimately informative about whether monopsony power has grown and is depressing wages.[59]

In short, the economic literature does not provide any conclusive evidence on the viability or likelihood of merger harms in labor markets that would justify the NPRM's proposals regarding labor information.

Finally, the Commission's HSR rulemaking authority does not extend to heaping burdens upon merging parties as a fishing expedition in the hopes of developing new merger enforcement theories. Instead, if labor market concerns exist, then the Commission should conduct merger retrospectives or utilize its 6(b) authority to investigate the issue. The Commission has done neither, and it cannot rely on the need for general information gathering as a basis for demanding that all merging parties provide this information.

And no doubt, the NPRM's proposal would have come with a substantial and unjustifiable burden upon filers and also the agencies. First, firms do not typically maintain SOC codes in the ordinary course of business.[60] Investing in the expertise to generate and report the codes would have required substantial resources.[61] And smaller businesses who make filings infrequently will be particularly disadvantaged compared to frequent filers. Second, the agencies' staff would have borne the burden of this additional information. Staff have limited experience working with SOC codes, and utilizing the data would have required aid from already extremely overtaxed economist staffers. But shifting resources has an opportunity cost, particularly when Congress has flatlined our budget, significantly limiting staff's capacity to take on new work.[62] Thus it is unclear how the Commission would have found resources to utilize the information. This substantial, unjustified burden to filers and the agencies made it impossible for me to support any rule that included the Labor Proposal.

As a final comment on the Labor Proposal, I recognize that excising it from the Final Rule may not have been the desired outcome for some of my colleagues on the Commission.[63] I

---

[55] Brian C. Albrecht et al., Labor Monopsony and Antitrust Enforcement: A Cautionary Tale, ICLE White Paper No. 2024–05–01 at 1 (2024); *see also* Suresh Naidu et al., *Antitrust Remedies for Labor Market Power,* 132 Harv. L. Rev. 536 (2018) (''[W]e have not found a reported case in which a court found that a merger resulted in illegal labor market concentration.''). I also note that a variety of articles sometimes cited to support increased antitrust scrutiny in labor markets fail to justify imposing a request for labor information in HSR filings—nor does the literature necessarily support broader enforcement of antitrust laws in labor markets. *See* Anna Stansbury & Lawrence H. Summers, ''The Declining Worker Power Hypothesis: An Explanation for the Recent Evolution of the American Economy'' at 1 (Nat'l Bureau of Econ. Rsch., Working Paper No. 27193, 2020), *https://www.nber.org/papers/w27193* (identifying decreased ability to unionize, *not* monopsony power, as the source of declining labor share of income); David Berger et al., *Labor Market Power,* 112 Am. Econ. Rev. 1147 (2022) (at 1 in SSRN version) (''[We] conclude that changes in labor market concentration are unlikely to have contributed to the declining labor share in the United States.''); Chen Yeh at al., *Monopsony in the US Labor Market,* 112 Am. Econ. Rev. 2099, 2099 (2022) (''[T]he growing gap between worker pay and productivity might be more about technological change than about employers' bargaining power—a very different issue than the monopsony problem that antitrust law could (potentially) address.''); *id.* (''[T]he correlation between markdowns and employment concentration is quite modest, both cross-sectionally (across local labor markets) and in the aggregate over time.''); *id.* at 2125 (''[A]t least within manufacturing—cross-sectional and temporal variation in local employment concentration may not necessarily reflect variation in employer market power as measured by markdowns.''); David Arnold, *Mergers and Acquisitions, Local Labor Market Concentration, and Worker Outcomes* at 2 (Oct. 29, 2021) (''The evidence . . . does not support the conclusion that lack of antitrust scrutiny for labor markets has been a major contributor to labor market trends such as the falling labor share or stagnant wage growth. Most mergers do not generate large shifts in concentration and I find no evidence that the number of anticompetitive mergers in labor markets has been increasing over time.''); Elena Prager & Matt Schmitt, *Employer Consolidation and Wages: Evidence from Hospitals,* 111 Am. nonetheless commend them for agreeing to this unanimous outcome, and I am equally pleased that the Chair rescinded the most recent Memorandum of Understanding Related to Antitrust Review of Labor Issues in Merger Investigations.[64] These efforts reflect an evolution in thinking by the Commission toward evidence over rhetoric.[65]

III. Drafts of Transaction-Related Documents

Historically, filers have not been required to provide drafts of transaction-related documents with their filings.[66] The production and review of drafts typically occurs during a full-phase investigation, usually after the reviewing agency issues a second request.[67] The NPRM proposed abandoning this practice and requiring that drafts of responsive documents be produced as well.[68] The NPRM explained that requiring the production of drafts would allow staff to have ''documents that reflect pre-transaction assessments of business realities, as opposed to 'sanitized' versions.'' [69] Many commentors on the NPRM opposed this requirement.[70] The Commission ultimately rejected this proposal, which was critical to my vote.

Simply put, the likely burden of producing drafts would have outweighed any perceived benefit. Depending upon the practice of the individuals drafting the documents, and how many people are involved in preparing different sections of the documents, there may be ''dozens or even hundreds of iterative drafts.'' [71] No question, filings would be much larger under the proposal.[72] Forensic collections, that is a full collection of an individual's emails or documents, are incredibly burdensome. They not only require resources from a technical team to collect the materials; they also require time from the individual businesspeople and then, in most cases, counsel, to review the collected materials, identify responsive documents, conduct privilege reviews, prepare more expansive privilege logs, and prepare the documents for production. The status quo for HSR filings, where generally only final versions are produced, typically does not require a forensic collection. But if all drafts became a requirement for all transactions, then forensic collections, with all their costs, would become standard practice for almost all HSR filings.[73] The use of online collaborative workspaces further complicates the issue—and adds burden—because when multiple parties simultaneously revise the same document, it becomes difficult to know which versions constitute drafts.[74]

To defend the proposal, the NPRM argued drafts are more likely to contain a ''smoking gun.'' [75] As evidence to support this claim, the NPRM observed the drafts produced during a second request have more salacious content.[76] But receiving all drafts amounts to building a haystack around a needle. Even if some drafts contain some interesting content, that content does not support the NPRM's proposed expansive production obligations for two reasons. First, earlier drafts of transaction documents sometimes contain information that may not have been finalized, may occasionally reflect incorrect assumptions, and in some situations may be based on iterations of the transaction that were not part of the final, executed agreement.[77] Not every change to a draft document is nefarious. Many of the drafts, compared to the final version, would consist of minor or inconsequential edits, excessive repetition, or incomplete thoughts that will require much effort for staff to review.[78] The dramatic increase in the number of documents associated with each filing would have been sufficiently onerous that staff would be simply unable to scrutinize the differences among drafts as they triage dozens of filings each week.

Second, for each of the alleged ''smoking gun'' drafts identified in a second request by staff, other information contained in the HSR filings already prompted the staff to issue a second request. Phrased differently, the agencies already had enough information, without the drafts, to decide to issue a second request in each of those cases. And beyond bald assertions, the NPRM did not provide any evidence demonstrating the drafts would have made a difference in the decision whether to issue a second request.

In summary, the extensive burden resulting from the production and review by staff of drafts would have outweighed any benefits of the requirement. I struggle to imagine any circumstance in which all draft documents would become a ''necessary and appropriate'' input for the agencies' initial review of proposed mergers, and therefore believe the inclusion of this requirement in any future revision would exceed the Commission's rulemaking authority. I would not have supported a Final Rule that required drafts and am heartened by the removal of this provision.

IV. Prior Acquisitions

The NPRM proposed radical changes to the prior acquisition request in the 2011 Rule. The proposed changes included: (1) expanding the lookback period for reporting prior acquisitions from five years to ten years; (2) eliminating the prior *de minimis* exception that required reporting only for prior acquisitions that ''had annual net sales or total assets greater than $10 million''; (3) requiring the acquired entity to also report prior acquisitions; and (4) requiring that acquisitions of substantially all of the assets of a business be treated the same as acquisitions of securities or non-corporate interests.[79] My vote was conditioned on the Commission eliminating the first two of these proposed changes. I write to explain why I believe it was proper to remove those requirements from the Final Rule

Regarding Amendments to the Hart-Scott-Rodino Rules and Premerger Notification Form and Instructions (Oct. 10, 2024).

[64] Press Release, Fed. Trade Comm'n, FTC, DOJ Partner with Labor Agencies to Enhance Antitrust Review of Labor Issues in Merger Investigations (Aug. 28, 2024), *https://www.ftc.gov/news-events/news/press-releases/2024/08/ftc-doj-partner-labor-agencies-enhance-antitrust-review-labor-issues-merger-investigations* (discussing Chair Khan's unilateral decision to enter a memorandum of understanding with the Department of Labor, National Labor Relations Board, and the Department of Justice); Press Release, Fed. Trade Comm'n, Statement on Memorandum of Understanding Related to Antitrust Review of Labor Issues in Merger Investigations (Sep. 27, 2024), *https://www.ftc.gov/news-events/news/press-releases/2024/09/statement-memorandum-understanding-related-antitrust-review-labor-issues-merger-investigations* (rescinding the same memorandum of understanding).

[65] Chair Khan and Commissioner Bedoya each write to express continued support for the now jettisoned Labor Proposal. I respect their enthusiasm for the idea. But between the decision to reject the Labor Proposal and rescind the memorandum of understanding, the public should rely more on revealed versus expressed preferences.

and why the Commission should not revisit these proposals in future revisions to the HSR rules.

Prior acquisitions may, in limited circumstances, be relevant to analyzing the filed-for transaction, but consideration of these prior transactions comes with risk of government overreach. A prior acquisition may be relevant to analyzing a filed-for transaction when the competitive effects of the prior acquisition have not yet manifested. For example, if a firm acquired a rival and integration was ongoing or existing contractual terms prevent the effects of the merger from being fully realized, a prior acquisition may help the agencies better understand the dynamics and competitive effects of the filed-for transaction. Once firms have completed integration, realized efficiencies, and implemented any strategies they plan to orchestrate, prior acquisitions provide almost no value [80] to the agencies as they assess the competitive conditions surrounding the filed-for transaction because at that juncture, the condition of the current market will reflect the effects of past transactions.[81]

For the last thirty-seven years, the Commission has determined that five years of prior acquisitions, with a threshold based upon the sales and assets of the entity that was acquired, was justifiable.[82] I do not seek to relitigate thirty-seven years of precedent. The question is whether the rulemaking record contained sufficient evidence to justify the request to reach ten years of prior acquisitions without any size threshold. I conclude that it did not.

The HSR Act limits the information that can be required under the Commission's HSR Rules to ''documentary material and information relevant to a proposed acquisition as is necessary and appropriate to enable the Federal Trade Commission and the Assistant Attorney General to determine whether such acquisition may, if consummated, violate the antitrust laws.'' [83] Based upon this text, HSR Rules can seek only the information the agencies need to screen for potential violations of the antitrust laws arising from consummation of the filed-for transaction.[84]

Since 1987, the Commission has required only five years of prior acquisitions.[85] Despite the Commission making no efforts to change this rule for thirty-seven years, the NPRM contended that it needed the additional five years of prior acquisitions ''because the current five-year requirement for prior acquisitions is often insufficient to meaningfully identify patterns of serial acquisitions or a trend toward concentration or vertical integration.'' [86] Further, the NPRM alleged that ''changes to the economy and the varied acquisition strategies of filing parties'' justified ''a more detailed consideration of how numerous past acquisitions, including those in related sectors, affect the competitive landscape of the current transaction under review.'' [87] The Supreme Court has explained that when an agency ''depart[s] from a prior policy,'' ''the agency must show that there are good reasons for the new policy.'' [88] And ''a more detailed justification'' is required when an agency's ''new policy rests upon factual findings that contradict those which underlay its prior policy.'' [89] Beyond bald and conclusory assertions, however, neither the NPRM nor the rulemaking record presented ''good reasons'' that justified the production of ten years of prior acquisitions, let alone ''a more detailed justification'' that is required in this circumstance.[90]

Insofar as the NPRM's proposal required the production of information in order to investigate past transactions—*i.e.,* not the filed-for transaction—under theories of serial acquisitions or otherwise,[91] the Commission lacks the authority to gather that information via an HSR filing. Because neither the NPRM nor the rulemaking record provided evidence that ten years would be relevant to analyzing the effects of the filed-for transaction, the NPRM's proposal did nothing more than attempt an end-run around the HSR Act's reportability requirements.[92] Congress already specified which transactions must be reported to the agencies, and the Commission cannot gather information that does not help the agencies analyze the filed-for transaction.[93] Sensibly, the Final Rule does not adopt the proposed changes to the lookback period. In the SBP for the Final Rule, the Commission explains that the information required for prior acquisitions is limited to what the agencies need to analyze the anticompetitive effects of the filed-for transaction.[94]

The proposed removal of the $10 million threshold also suffered deficiencies. The $10 million threshold has been the threshold for prior acquisitions since the original HSR

[80] As one exception, the agencies have considered the ability to realize efficiencies in past transactions as evidence of the likelihood of achieving efficiencies in the current transaction. But even that information becomes stale and loses probative value at some point.

[81] Dan O'Brien, *The 2023 Merger Guidelines: A Giant Leap in the Wrong Direction,* Consumer Technology Association (Jun. 2024) (''[T]he acquisition history is irrelevant to the current merger except to the extent it provides information about the current merger's likely competitive effects.''); *see also Brown Shoe Co.* v. *United States,* 370 U.S. 294, 332 (1962) (''[T]he statute prohibits a given merger only if the effect of that merger may be substantially to lessen competition.'').

[82] NPRM, *supra* note 1, at 42203.

[84] *Id.*

[85] Premerger Notification; Reporting and Waiting Period Requirements, 50 FR 38742, 38769 (Sep. 24, 1985) (to be codified at 16 CFR parts 801, 802, and 803).

[86] NPRM, *supra* note 1, at 42203.

[87] *Id.*

[88] *FCC* v. *Fox Television Stations, Inc.,* 556 U.S. 502, 515 (2009) (Scalia, J.).

[89] *Id.; see also id.* at 537 (Kennedy, J., concurring) (''Where there is a policy change the record may be much more developed because the agency based its prior policy on factual findings. In that instance, an agency's decision to change course may be arbitrary and capricious if the agency ignores or countermands its earlier factual findings without reasoned explanation for doing so. An agency cannot simply disregard contrary or inconvenient factual determinations that it made in the past, any more than it can ignore inconvenient facts when it writes on a blank slate.'').

[90] *Id.* at 515. In 1987, when the Commission adopted the rule that required filers to report five years of prior acquisitions, it explained that ''[t]he Commission believes that this change can be made without adversely affecting the agencies' ability to conduct a thorough antitrust review. The Commission believes than an accurate account of the acquiring person's acquisitions over the past five years will adequately put it on notice of possible trends toward concentration in the affected industry.'' Premerger Notification; Reporting and Waiting Period Requirements, 50 FR 38742, 38769 (Sep. 24, 1985) (to be codified at 16 CFR parts 801, 802, and 803). The simple conclusory statements in the NPRM do not qualify as ''a more detailed justification,'' which is necessary here because the Commission now contradicts its previous factual finding that five years was adequate for review.

[91] *See* NPRM, *supra* note 1, at 42203.

[92] The HSR Act identifies which transactions must be reported—*i.e.,* filed—based upon three tests: the commerce test, size of transaction test, and the size of person test. 15 U.S.C. 18a(a); *see also* Fed. Trade Comm'n, *Steps for Determining Whether an HSR Filing is Required* (last visited Oct. 4, 2024), *https://www.ftc.gov/enforcement/premerger-notification-program/hsr-resources/steps-determining-whether-hsr-filing.*

''[N]o matter how important, conspicuous, and controversial the issue, . . . an administrative agency's power to regulate in the public interest must always be grounded in a valid grant of authority from Congress.'' *FDA* v. *Brown & Williamson Tobacco Corp.,* 529 U.S. 120, 161 (2000).

[94] *See* SBP, *supra* note 5, at section II.B.5, 61 of 406 (explaining focus is on reportable transaction).

Rules in 1978.[95] But the NPRM disregarded this forty-six-year history where the threshold, despite inflation, has been the same. To justify abandoning the threshold, the NPRM pointed to ''the Commission's technology acquisition study [that] revealed that between 39.3% and 47.9% of transactions were for target entities that were less than five years old at the time of their acquisition.'' [96] It then stated, without citation, ''[g]iven the relative nascency of these acquired companies, the Commission believes that excluding prior acquisitions of firms that have not yet had the chance to achieve $10 million in net sales or assets does not provide a comprehensive picture of each filer's acquisition strategy.'' [97] Nothing cited by the NPRM suggests that just because an acquisition target is less than five years old, that its sales will be below $10 million. Moreover, nothing in the NPRM explained why the age of targets in ''technology acquisitions'' would be relevant to the whole economy, and yet the proposed rule would have applied universally. Indeed, neither the NPRM nor the rulemaking record presented evidence to justify this dramatic expansion, and without evidence, there is no justification to impose such a requirement on filers.

The NPRM's proposal to double the time period and to remove the $10 million threshold would have added substantial burden to filing parties. The NPRM appeared content with the burden because it provided an expanded ability to analyze non-reportable prior acquisitions, including under theories of serial acquisitions.[98] But as explained, this benefit contravenes the Commission's rulemaking authority. Because the Final Rule must be limited to the Commission's authority, the focus must also be limited to how it assists the agencies' assessment of the filed-for transaction during the initial waiting period. As explained above, the NPRM's prior acquisition expansion would have provided almost nothing that would help the agencies to assess filed-for transactions.

V. Additional Considerations

The changes implemented by the Final Rule request information to analyze only the filed-for transaction. The changes are not to authorize the agencies to engage in general fishing expeditions to analyze non-reportable transactions or other allegedly problematic conduct divorced from the effects of the filed-for transaction. The same could not be said for some of the proposals in the NPRM, and those concerns have been rectified in the Final Rule. I understand potential filers may be skeptical that the information gathered in HSR filings may be collected with an eye toward other purposes. In the Final Rule, each of these provisions is now modified to collect only information that is necessary and appropriate to analyze the filed-for transaction.[99]

The Final Rule requires filers to produce new information about officers and directors within the ''stack'' of companies. The ultimate rule differs substantially from the NPRM's proposal.[100] Among the key changes, the request only applies to acquiring persons; filers no longer have to provide information about board observers; and the request is limited to only those entities who generate revenue in the same NAICS codes as the target. This information, like all the information requested by the Final Rule, is designed to help staff better analyze the filed-for transaction. The SBP provides a detailed description of why this requested information helps obtain that goal.[101] The purpose of this revision is not a general fishing expedition; it is to illuminate complicated and overlapping management structures that may impact the competitive effects of the filed-for transaction.

The additional information about minority shareholders and limited partners has also raised concern. The Final Rule again reflects key changes to the proposals in the NPRM. In particular, the final version eliminates the requirement to create an organization chart and eliminates the requirement to disclose limited partners that do not also have management rights. The complicated nature of this request, especially as included in the NPRM, raised confusion and concern of the Commission's purpose for this request. The SBP goes to great lengths to describe—and illustrate via helpful diagrams—why this information will be important to analyzing the filed-for transactions. The purpose is not to pursue or launch general investigations into theories of harm based upon fringe concepts such as common ownership.[102] Nor do I believe it would be possible to construct such theories based upon the information required by the Final Rule. My vote in support of the Final Rule reflects my understanding and belief this information will help the agencies to more quickly understand the competitive dynamics of a filed-for transaction, and nothing more.

VI. Conclusion

The Final Rule has been scaled back dramatically from the NPRM. And rightly so. I voted in favor of the Final Rule because of the revisions and outright removal of certain proposals in the NPRM. As modified, I believe the Final Rule is consistent with that statutory grant of authority and will help staff analyze the filed-for transaction and protect consumers without unduly burdening the filing parties.

On a going forward basis, the Commission can and should carefully scrutinize the effect of the Final Rule on our enforcement efforts and on the burden it imposes upon filing parties and the agencies' staff. A thoughtful retrospective will allow the Commission to modify the Final Rule, if necessary, in a principled and evidence-based fashion.

Concurring Statement of Commissioner Andrew N. Ferguson

Today, the Commission updates the Hart-Scott-Rodino Act (''HSR'' or ''the Act'')[1] notification form requirements. It concurrently announces that, after an over three-and-a-half-year wait, it will lift its categorical ''temporary suspension'' of early terminations once the Final Rule goes into effect.[2] Unlike

[95] Premerger Notification; Reporting and Waiting Period Requirements, 43 FR 33450 at 33534 (July 31, 1978).

Continued

the Commission's recent, doomed effort to ban noncompete agreements,[3] Congress undoubtedly gave us authority to promulgate rules governing HSR notification requirements.[4]

The notice of proposed rulemaking (''NPRM'') that launched today's rulemaking would have abused that authority by imposing onerous, unlawful requirements that could not have survived judicial review.[5] But the NPRM also proposed some important, lawful updates to the HSR instructions. Mergers have become increasingly complex since we first adopted an HSR rule nearly five decades ago. The current HSR instructions do not adequately address forms of business association that were rare in 1978. And long experience implementing HSR has taught the Commission which information is most important to fulfilling Congress's mandate to conduct premerger review. The current HSR instructions did not always ensure that the Commission and the Antitrust Division (together, the ''Antitrust Agencies'') had the information they needed to fulfill Congress's intention.

The NPRM, however, was a nonstarter. My colleagues and I engaged in intense negotiations to separate the lawful wheat from the lawless chaff. Today's Final Rule,[6] and the lifting of the early-termination ban, are the culmination of those negotiations. Were I the lone decision maker, the rule I would have written would be different from today's Final Rule. But it is a lawful improvement over the status quo. And although not required for the Final Rule's lawfulness, the Commission wisely accompanies the Final Rule with a lifting of the ban on early termination. I therefore concur in its promulgation.

I. Congress passed HSR in 1976, adding section 7A to the Clayton Antitrust Act of 1914.[7] It requires merging firms to notify the Antitrust Agencies before consummating large mergers, and forbids them from consummating the merger until some period after notifying the Antitrust Agencies. The purpose of this premerger notify-and-wait requirement was to give the Antitrust Agencies the opportunity to investigate mergers and sue to block them. Premerger review dispenses with ''interminable post-consummation divestiture trials . . . [and] advance[s] the legitimate interests of the business community in planning and predictability, by making it more likely that Clayton Act cases will be resolved in a timely and effective fashion.'' [8]

Obviously, the Antitrust Agencies need information about the proposed transactions to review them. Congress therefore provided that firms seeking to merge must ''file notification pursuant to rules under subsection (d)(1)'' of the Act.[9] Subsection (d), titled ''Commission rules,'' in turn commands the Commission to, ''by rule,'' ''require that [a merging party's] notification . . . contain such documentary material and information relevant to a proposed acquisition as is necessary and appropriate to enable the [Antitrust Agencies] to determine whether such acquisition may, if consummated, violate the antitrust laws.'' [10] The Commission may also ''prescribe such other rules as may be necessary and appropriate to carry out the purposes of this section.'' [11] ''Taken together, these statutory provisions give the FTC . . . great discretion . . . to promulgate rules to facilitate Government identification of mergers and acquisitions likely to violate [F]ederal antitrust laws before the mergers and acquisitions are consummated.'' [12]

The Commission has regularly deployed the rulemaking power Congress conferred on it in the Act. The Commission published its first final HSR rule two years after Congress passed the Act.[13] In the intervening decades, the Commission has made dozens of changes to the HSR form and instructions.[14] Some changes expanded the scope of information requested.[15] Others narrowed it.[16] Only one faced judicial review. In 2013, an industry association challenged a Commission rulemaking that required parties to file HSR notifications when they transferred most, but not all, of their pharmaceutical patent rights. The D.C. Circuit held that the rule was a proper exercise of the Commission's rulemaking authority and reflected reasoned decision-making.[17] The revised HSR rule survived and took effect, as have many HSR form changes beforehand and afterwards.

II. The Administrative Procedure Act (''APA'')[18] governs our HSR rulemakings.[19] ''The APA 'sets forth the procedures by which [F]ederal agencies are accountable to the public and their actions are reviewed by courts.' '' [20] First, the Rule must be promulgated in ''observance of procedure required by law.'' [21] For a rule like the Final Rule, section 4 of the APA[22] is the ''procedure required by law,'' and it ''prescribes a three-step procedure.'' [23] ''First, the agency must issue a 'general notice of proposed rulemaking,' ordinarily by publication in the **Federal Register**.'' [24] We published the NPRM for the Final Rule on June 29, 2023.[25] ''Second, if 'notice is required,' the agency must give 'interested persons an opportunity to participate in the rule making through submission of written data, views, or arguments.' '' [26] We received approximately 721 comments during the 90-day comment period.[27] ''Third, when

the agency promulgates the final rule, it must include in the rule's text a 'concise general statement of its basis and purpose.' '' [28] With today's Final Rule the Commission includes a statement of basis and purpose that thoroughly explains its reasoning for each of the changes contained in the Final Rule. The Commission has therefore satisfied the APA's procedural requirements.[29]

APA section 10's standard of judicial review also imposes substantive limits on the exercise of our authority under HSR. The APA requires courts to ''hold unlawful and set aside agency action'' that is ''arbitrary, capricious, an abuse of discretion, or otherwise not in accordance with law''; ''contrary to constitutional right, power, privilege, or immunity''; or ''in excess of statutory jurisdiction, authority, or limitations, or short of statutory right.'' [30] The APA standard generally requires an agency to show two things. First, that it has a lawful grant of authority from Congress to issue the rule [31]—that is, that Congress enacted a statute conferring on the agency power to issue the rule,[32] and that the statute is consistent with the Constitution.[33] Second, that the agency has exercised that grant of authority in a lawful way.[34]

To be sure, the Commission recently has been all too happy to issue rules without valid grants of authority from Congress.[35] But today's Final Rule is plainly authorized by a valid grant of authority from Congress. HSR commands the Commission to issue rules governing the form and contents of premerger-notification filings as it determines are ''necessary and appropriate to enable [the Antitrust Agencies] to determine whether'' mergers ''may, if consummated, violate the antitrust laws.'' [36] Congress further authorized us to ''prescribe such other rules as may be necessary and appropriate to carry out the purposes of'' the Act.[37] The text of HSR therefore unambiguously commands the agency to issue rules of the type we today issue.[38] And I am not aware of any serious arguments that this grant of discretion to prescribe the procedures by which firms notify the Commission of a pending merger—distinct from the power to adjudicate merger challenges[39]—violates the Constitution. We therefore have statutory and constitutional authority to issue the Final Rule.[40]

The question, then, is whether the Commission has lawfully exercised the power Congress unambiguously conferred on it. As a general matter, an agency lawfully exercises power conferred on it by ''engag[ing] in reasoned decisionmaking,'' which requires that the ''agency['s] action . . . rest[ ] 'on a consideration of the relevant factors.' '' [41] We must ''examine the relevant data and articulate a satisfactory explanation for [our] action including a 'rational connection between the facts found and the choice made.' '' [42] This ''standard is deferential'' to the agency's policy choices, so long as ''the agency has acted within a zone of reasonableness and . . . reasonably considered the relevant issues and reasonably explained the decision.'' [43]

Importantly, this standard does not change because we are amending an existing rule. The APA does not require that ''agency action representing a policy change must be justified by reasons more substantial than those required to adopt a policy in the first instance.'' [44] ''The statute makes no distinction . . . between initial agency action and subsequent agency action undoing or revising that action.'' [45] When an agency revises an existing regulation, reasoned decision-making ''would ordinarily demand that it display awareness that it *is* changing its position,'' and it must show ''that there

[35] See *Ryan LLC* v. *FTC,* No. 3:24–CV–00986–E, 2024 WL 3879954 (N.D. Tex. Aug. 20, 2024) (vacating the Commission's Non-Compete Rule).

[36] 15 U.S.C. 18a(d)(1).

[37] *Id.* section 18a(d)(2)(C).

[38] *PhRMA,* 790 F.3d at 208 (''There is no doubt that the Commission's action was taken pursuant to express delegations of authority.'').

[39] See, *e.g.,* Compl. ¶¶ 45, 55–59, 72–76, *The Kroger Co.* v. *FTC,* No. 1:24–cv–438 (S.D. Ohio Aug. 19, 2024), ECF No. 1 (challenging constitutionality of FTC administrative proceedings as a violation of Article III of the Constitution).

[40] When the judiciary last reviewed one of our HSR rules, it deferred to our interpretation of various undefined terms of the Act under the doctrine announced in *Chevron U.S.A. Inc.* v. *Nat. Res. Def. Council, Inc.,* 467 U.S. 837 (1983). See *PhRMA,* 790 F.3d at 204 (''[W]e apply the familiar *Chevron* framework . . .''). The Supreme Court has since overruled *Chevron,* correctly interpreting the APA to require the judiciary to resolve statutory ambiguities without deferring to administrative agencies' views on how to resolve those ambiguities. See *Loper Bright Enter.* v. *Raimondo,* 144 S. Ct. 2244, 2261 (2024) (''On the contrary, by directing courts to 'interpret constitutional and statutory provisions' without differentiating between the two, [the APA] makes clear that agency interpretations of statutes—like agency interpretations of the Constitution—are *not* entitled to deference. Under the APA, it thus remains the responsibility of the court to decide whether the law means what the agency says.'' (cleaned up)). The Court in *Loper Bright* held, however, that ''[i]n a case involving an agency, . . . the statute's meaning may well be that the agency is authorized to exercise a degree of discretion.'' *Id.* at 2263. The Court gave as examples statutes that delegate ''to an agency the authority to give meaning to a particular statutory term,'' and ''[o]thers'' that ''empower an agency to 'fill up the details' of a statutory scheme, or to regulate subject to the limits imposed by a particular term or phrase that 'leave the agencies with flexibility,' such as 'appropriate' or 'reasonable.' '' *Ibid.* (quoting *Wayman* v. *Southard,* 23 U.S. (10 Wheat.) 1, 43 (1825), and *Michigan* v. *EPA,* 576 U.S. 743, 752 (2015)). HSR expressly authorizes the Commission to promulgate rules ''defin[ing] the terms used in'' the Act, and to issue all rules that are ''necessary and appropriate to carry[ing] out the purposes of'' the Act. 15 U.S.C. 18a(d)(2)(A), (C); see also *id.* 18a(d)(1) (authorizing the Commission to issue rules that are ''necessary and appropriate to enable the [Antitrust Agencies] to determine whether such acquisition may, if consummated, violate the antitrust laws''). HSR thus appears to be the sort of discretion-conferring statute that the *Loper Bright* Court suggested may require some modicum of judicial deference to agency decision making. My vote in favor of the Final Rule, however, does not depend on the Commission receiving any judicial deference. I conclude that the Final Rule properly interprets and implements HSR.

are good reasons for the new policy.'' [46] But the APA does not require that the agency show that ''the reasons for the new policy are *better* than the reasons for the old one; it suffices that the new policy is permissible under the statute, that there are good reasons for it, and that the agency *believes* it to be better, which the conscious change of course adequately indicates.'' [47]

The Final Rule is not perfect, nor is it the rule I would have written if the decision were mine alone. But I believe that it addresses important shortcomings in the current HSR rule, and that it is ''necessary and appropriate'' to enable the Antitrust Agencies to determine whether proposed mergers may violate the antitrust laws.[48]

III. I turn now to the specific provisions of the Final Rule to address whether they are ''necessary and appropriate'' to executing the premerger-review provisions of HSR.[49]

A. The Final Rule requires the disclosure of some information not currently required by the old HSR rule. That information is ''necessary and appropriate'' to the execution of our premerger-review mandate under the Act, and the burdens the disclosure requirements impose on merging firms are justified by the requirements of effective premerger review.

Mergers and acquisitions have become increasingly complex since 1978. The Antitrust Agencies review a large number of deals involving corporate structures that were rare when we adopted our first HSR rule. For example, twenty years ago, only ten percent of acquiring firms were funds or limited partnerships; now, that figure is close to forty percent.[50] Such firms may be shell companies that disclose little public information about their holdings or operations, and, in many cases, have no other assets. But these deals can still present competitive problems through the acquiring person's relationships with other entities. Minority investors, including limited partners, might pull the strings for the acquiring person. And those minority investors might also control entities that compete with the transaction target, creating potential antitrust concerns.[51] The current rule does not require disclosure of investors in entities between the parent company and the acquiring person, nor does it require disclosure of any limited partners, even if they have management rights for the acquiring person. The Final Rule addresses this shortcoming. It requires disclosure of investors that own at least a five percent share in certain entities related to the acquiring person; if those entities are limited partnerships, filers must disclose limited partners that have certain management rights, such as a board seat. But unlike the NPRM, the Final Rule sensibly does not require disclosure of limited partner investors without any management rights.[52] The Final Rule's minority investor disclosures are a reasonable way to address what the Antitrust Agencies fairly determined was a shortcoming of the previous rule, and are necessary and appropriate to determining the competitive effects of a transaction involving limited partnerships or complex corporate structures.[53]

The Final Rule also requires merging firms to disclose information about their potential vertical relationships—that is, whether the two merging firms currently interact with each other at different levels of the supply chain.[54] HSR rules long required disclosure of information about vertical relationships, but a 2001 amendment to the HSR rules removed that requirement.[55] Since 2001, however, the Antitrust Agencies under the leadership of both parties have increased their scrutiny of, and rate of enforcement actions against, vertical mergers. During the Trump Administration, the Antitrust Division litigated the first vertical merger challenge in decades.[56] The Antitrust Agencies released the 2020 Vertical Merger Guidelines, the first major revision to agency guidance on vertical mergers since 1984.[57] The Commission released its 2020 Commentary on Vertical Merger Enforcement, which demonstrated the breadth of Commission investigations and consent agreements involving vertical transactions.[58] And the Commission investigated Illumina's proposed acquisition of Grail, which ultimately led to a successful 2023 Fifth Circuit opinion that effectively blocked the vertical transaction.[59] These efforts continue today. I recently joined a unanimous Commission vote authorizing a complaint to challenge a vertical merger between America's leading mattress supplier and its leading mattress retailer.[60]

Since 2001, however, the Antitrust Agencies have had to rely on limited acquisition-related documents and publicly available information to identify potential vertical-competition concerns. Not every competitive issue shows up in transaction documents or is apparent to Commission staff without experience in the industry. As a result, some anticompetitive transactions have likely slipped through the cracks. The Final Rule will also provide the Antitrust Agencies with other information that they can use to quickly identify (or rule out) potential vertical-competition problems. The new Supply Relationships Description requires filers to identify whether they supply, or are supplied by, the other merging party or its competitors.[61] The buyer must also now indicate whether it has certain types of existing contracts with the seller.[62] This information is ''necessary and appropriate'' to carrying out Congress's command that the Antitrust Agencies review mergers—including vertical mergers—to determine whether they violate the antitrust laws.[63]

The Final Rule requires the disclosure of additional information that will facilitate effective premerger review. Filers must now provide some regularly prepared plans and reports that analyze market shares or competition.[64] Such information, particularly market-share

data, often is not available publicly, nor does it always appear in transaction documents. But market-share data are critical to antitrust enforcement. The Supreme Court many decades ago concluded that mergers of competitors constituting thirty percent or more of the relevant market presumptively violate the Clayton Act.[65] And one of the leading metrics for assessing the competitive effects of a transaction is the Herfindahl-Hirschman Index (HHI),[66] which uses market shares to assess the level of concentration in the relevant market, and the change in concentration that the merger would create.[67] Market-share data therefore are not only ''necessary and appropriate to . . . determin[ing] whether [an] acquisition may, if consummated, violate the antitrust laws.'' [68] They are vital to our enforcement mandate. Requiring the provision of these data also promotes efficiency. If the market shares of the two firms are small, the Antitrust Agencies may swiftly conclude that little further investigation is needed—and, thanks to the concurrent lifting of the unfortunate ban on early termination, may also facilitate the grant of early termination in appropriate cases once the Final Rule becomes effective. And the cost of compliance is modest; parties must collect only documents provided, within the past year, to individuals already subject to other document requests.

In addition, the Overlap Description will require filers to identify whether they compete with the other merging party.[69] Under the current form, parties identify overlaps only through Census Bureau NAICS revenue codes.[70] These codes can be painfully vague or overinclusive, particularly for new sectors. For example, NAICS code 518210 covers ''companies that provide computing infrastructure, data processing, web hosting, and related services'' such as ''data entry services, cloud storage services and cryptocurrency mining.'' [71] Despite a NAICS overlap, many firms within this broad category undoubtedly do not compete. Many other NAICS codes present similar concerns, flagging overlaps where none truly exist. Misleading or overbroad NAICS code overlaps may lead to unnecessary investigations. The Overlap Description will mitigate this problem by permitting filers to explain misleading NAICS code overlaps up front.[72]

Improving the type of information the Commission receives in an HSR notification is likely to improve the merger-review process for many merging parties. If Commission staff believes that a proposed merger merits investigation beyond the initial HSR filing and publicly available information, it must formally open an investigation and obtain clearance for that investigation from the Antitrust Division. Most such investigations show that the transaction poses little risk of competitive harm and are closed without a second request for additional information.[73] Once the investigation is begun, however, the Antitrust Agencies can fall victim to bureaucratic inertia. We, like all law-enforcement agencies, have limited resources. Commencing an investigation and obtaining clearance eats up some of those resources. Commission leadership may therefore resist recommendations to close an investigation quickly even if the early stages of the investigation demonstrate that the merger presents no competitive concerns. Additionally, even investigations that do not lead to a second request can still involve significant cost and delay for merging parties.[74] The information required by the Final Rule will mitigate the risk of false positives. It can reveal that a merger presents no competitive threat at all, and the Commission can avoid crawling down rabbit holes in unnecessary investigations.

Third parties will benefit, too. Commission staff regularly requests voluntary interviews with the merging parties' customers, suppliers, and competitors following an HSR filing. These third parties often cooperate, at the cost of their senior executives' time and legal fees paid to outside lawyers. As these third parties explain the industry and competitive landscape, the lack of any competitive issues can quickly become apparent. By providing the Antitrust Agencies with greater information upfront, the Final Rule can remove the need to burden third parties with such fruitless engagement.

B. The Final Rule must be considered in light of another decision the Commission announces today: the lifting of the suspension on early termination. ''Early termination'' describes the Commission practice of informing merging parties that the Commission is terminating its investigation into the merger before the conclusion of the statutory waiting period, thereby freeing them to consummate the merger immediately. The benefits of early termination are obvious. It reduces financing costs associated with the delay inherent in premerger review, and it allows companies and consumers to realize the benefits of procompetitive mergers more quickly.

Until 2021, Commission staff routinely granted early termination of the initial HSR review period for acquisitions that obviously presented no competitive issues.[75] In February 2021, however, the then-Acting Chairwoman announced a ''temporary suspension'' of early termination due to ''the confluence of an historically unprecedented volume of filings during a leadership transition amid a pandemic.'' [76] The Antitrust Agencies announced that they ''anticipate[d] the suspension [to] be brief.'' [77]

The ''confluence'' has been over for some time. The pandemic long ago subsided. We have had a permanent Chair since June 2021. And merger filings have slowed to about half the

[73] In Fiscal Year 2023, the Commission received clearance to investigate 124 transactions but only issued second requests for additional information for 26 transactions. See FTC and DOJ, HSR Annual Report Fiscal Year 2023, at Exhibit A, Table 1, *https://www.ftc.gov/policy/reports/annual-competition-reports.*

[74] *See* SBP at 89 (''[A]n average of 73 transactions each year . . . were delayed by an additional 30 days and filers were burdened by having to submit additional materials on a voluntary basis even though the investigation did not lead to the issuance of Second Requests. These delays impose costs on the parties and the Agencies, as well as third parties contacted during the extended initial review period.'').

[75] *See id.* at 16, n.22, 95; *see also* Statement of Comm'r Noah J. Phillips and Comm'r Christine S. Wilson Regarding the Commission's Indefinite Suspension of Early Terminations, at 2 (Feb. 4, 2021), *https://www.ftc.gov/legal-library/browse/cases-proceedings/public-statements/statement-commissioners-noah-joshua-phillips-christine-s-wilson-regarding-commissions-indefinite.*

[76] Press Release, FTC, FTC, DOJ Temporarily Suspend Discretionary Practice of Early Termination (Feb. 4, 2021), *https://www.ftc.gov/news-events/news/press-releases/2021/02/ftc-doj-temporarily-suspend-discretionary-practice-early-termination.*

[77] *Ibid.*

number we saw in 2021 and 2022.[78] Nevertheless, the ''temporary suspension'' persisted. The Final Rule recognizes that this persistence is no longer tenable: ''if the Agencies can determine from review of an HSR Filing that a transaction does not present [competitive concerns], the Agencies can more quickly and confidently determine that the transaction does not require a more in-depth review and may proceed to consummation.'' [79]

Indeed, maintaining the ban would have been absurd in light of the Final Rule's explicit recognition that many transactions pose no competitive risks. Specifically, the Final Rule takes a tailored approach to identify and reduce compliance costs for transactions with lower risks of harm. The Final Rule creates a new category—''select 801.30 transactions''—for acquisitions that almost never present competitive concerns, such as executive compensation agreements. For these deals, filers are excused from many new requirements, including descriptions and some document requests.[80] The Final Rule also recognizes when enough is enough. It tailors the burdens of acquiring and acquired persons, rather than requiring both sides of a transaction to provide the same information. Accordingly, it significantly pares back the requests for acquired persons.[81] Finally, the Final Rule also employs a conditional-request format—a series of if/then queries—to omit certain requirements for acquisitions that do not involve an overlap or vertical relationship.[82] Again, the burden is reduced commensurate with the lower risk of harm.

I am pleased that today the Commission announces that it will lift the categorical ban on early termination and restore this important feature of the merger-review process once the Final Rule becomes effective. It should have happened earlier. I have objected before to the majority's tendency to use our HSR authority to accomplish political objectives.[83] An indefinite ban on early termination was just more of the same. Maintaining the ban after the Final Rule's effective date would have undermined the efficiencies that justify the new information that the Final Rule requires. I am glad it is gone.

IV. The Final Rule must stand on its own feet. An arbitrary-and-capricious rule is not lawful merely because it is better than a bad NPRM. And the NPRM with which the Commission launched today's Final Rule was about as bad as it gets. It was indefensible bureaucratic overreach and could not have survived judicial review. It drew no distinctions between merger filings that presented little risk of competitive harm—such as executive compensation agreements—and those that raised potentially serious concerns. Instead, the NPRM applied the same blunderbuss approach to every filing. To make matters worse, the NPRM proposed a deluge of new onerous requirements the benefits of which could never have justified the burdens imposed on merging parties. In fact, several would have added little or no value to the Antitrust Agencies at all during their brief window to identify transactions that warrant further investigation. Had today's Final Rule been identical to the NPRM, I would not have voted for it.

Although today's Final Rule is a logical outgrowth of the NPRM,[84] it dramatically curtails the NPRM's wild overreach. That curtailment unsurprisingly followed the arrival of Republican Commissioners. A Final Rule identical to the NPRM would have been little more than a procedural auxiliary to the majority's general suspicion of mergers and acquisitions.[85] I would not have voted for it. The changes adopted after the arrival of Republicans to the Commission, however, rescued the Final Rule from the NPRM's lawlessness. The Final Rule, unlike the NPRM, is a reasoned decision about what is ''necessary and appropriate'' to carrying out Congress's premerger-review mandate. It also reasonably addresses shortcomings in the old HSR rule. It therefore satisfies the requirements of both the HSR and APA. None of this was true about the NPRM.

Although the Final Rule's lawfulness does not turn on how much better it is than the NPRM, the changes from the unlawful NPRM demonstrate that the Final Rule is in fact the product of reasoned decision-making, which required us to respond to valid objections about the NPRM's many problems.[86] The most important climbdown from the NPRM is the abandonment of the proposed Labor Markets section.[87] This section would have forced merging parties to classify their employees by job category codes from the U.S. Bureau of Labor Statistics,[88] even though few companies use such codes in the ordinary course of business. And it would have required filers to classify their employees by the U.S. Department of Agriculture's ERS commuting zones, even though companies do not use them in the ordinary course of business and these zones have not been updated since 2000 and are unreliable. The new burden would have been massive, and commenters understandably objected vociferously.[89]

Beyond the major burden and methodological problems, the NPRM's

Indeed, the requirement that agency action not be arbitrary or capricious includes a requirement that the agency adequately explain its result and respond to relevant and significant public comments. In sum, an agency's response to public comments must be sufficient to enable the courts to see what major issues of policy were ventilated and why the agency reacted to them as it did.'' (cleaned up)).

[87] For a fulsome accounting of the economic and legal errors that infected the Labor Markets instruction, see Statement of Comm'r Melissa Holyoak, Final Premerger Notification Form and the Hart-Scott-Rodino Rules, File No. P239300, at 7–13 (Oct. 10, 2024).

[88] NPRM, 88 FR at 42197.

[89] *See, e.g.,* Comment of A.B.A. Antitrust L. Sec., Doc. No. FTC–2023–0040–0723 at 10–12; Comment of Wachtell, Lipton, Rosen & Katz, Doc. No. FTC–2023–0040–0670 at 6–10; Comment of Dechert LLP, FTC–2023–0040–0659 at 3–5.

Labor Markets instructions were a clear abuse of Congress's mandate that the Commission require only information ''necessary and appropriate'' to identify transactions that ''violate the antitrust laws.'' [90] In the nearly half century since Congress passed HSR, the Antitrust Agencies have never successfully challenged any transactions based on labor market theories that could have been identified by the proposed requirements.[91] Until recently, the Antitrust Agencies had never even tried.[92] It is not for a lack of effort. For years, the Commission and Antitrust Division looked for viable labor market theories when investigating transactions that present other competition concerns. The lack of any success lays bare that the Commission never could have justified the immense cost of requiring every single filer to provide extensive labor-related information. Fortunately, my colleagues on the Commission agreed to jettison the Labor Markets section that likely would have doomed the Final Rule.[93]

The Final Rule also eliminates the NPRM's requirement that merging parties provide all drafts of transaction-related ''document[s] that were sent to an officer, director, or supervisory deal team lead(s).'' [94] Commenters rightly pointed out that this requirement would have imposed an undue burden on merging parties,[95] with the American Bar Association noting that this provision could have forced filers to use e-discovery tools to capture every draft.[96] The cost of this information demand is high. But the value to the Antitrust Agencies would have been low. Commission staff would have struggled to comb through a dozen versions of the same document. And insofar as the goal was to catch merging parties giving honest appraisals about the anticompetitive effects of mergers, I doubt demanding drafts would have succeeded. Knowing that such drafts would have to be produced, parties would just create methods to avoid exposing their honest thoughts in documents that are guaranteed to wind up in the hands of enforcers. Demanding drafts of documents in every transaction would have likely increased the expense of merging—of great benefit to antitrust lawyers—without giving the Antitrust Agencies the sort of ''hot docs'' for which they were hoping. The Final Rule appropriately eliminated this requirement for every transaction. The Commission can obtain drafts under the only circumstances it would ever need them—when it opens investigations into those few mergers that the HSR filings reveal present a genuine risk of anticompetitive effects.

Similarly, the Final Rule curtailed several of the NPRM's other burdensome requirements for merging parties to produce documents. It revises the definition of ''supervisory deal team lead'' to limit it to a single individual, eliminating the need to review multiple employees' files to fulfill this request for transaction-related documents.[97] The Final Rule also removes the NPRM's demand for ordinary course plans and reports that were shared with senior executives but not the CEO. Commenters rightfully noted that this would have forced filers to search the files of additional custodians, greatly increasing the burden on merging parties.[98] Instead, the Final Rule limits the request to certain plans and reports directly provided to the CEO or board of directors.[99] Lastly, the Final Rule no longer forces merging parties to produce all agreements between them. The NPRM's requirement to produce every single agreement between the parties would have been burdensome and expensive, but likely would have shed little light on the potential competitive effects of the merger. Some agreements between merging parties might shed light on competitive effects, but the vast majority would tell us nothing. The Final Rule acknowledges this mismatch of costs and benefits, and instead requires parties to note only whether they have particular types of agreements.[100]

The Final Rule makes many additional changes to the abusive NPRM. It makes clear that filers do not need to disclose any individual's role in a ''non-profit entity organized for a religious or political purpose.'' [101] This exception is important. Requiring a Catholic hospital, for example, to disclose its membership rolls merely because it wishes to make a reportable acquisition, without regard to the competitive effects of that acquisition, would raise serious First Amendment concerns.[102] The Final Rule also creates

[90] 15 U.S.C. 18a(d)(1).

[91] The NPRM identified two successful merger challenges with purported labor theories. See NPRM, 88 FR at 42197, n.47. The first, the Antitrust Division's challenge to Penguin Random House's acquisition of Simon & Schuster, did not involve harm to employees of the merging firms. Instead, the alleged harm was in the market for ''publishing rights to anticipated top-selling books.'' *United States* v. *Bertelsmann SE & Co. KGaA,* 646 F. Supp. 3d 1, 12 (D.D.C. 2022). The second, the Commission's challenge to Lifespan Corporation's acquisition of Care New England, did not include a labor market count in the complaint. See Compl., *In the Matter of Lifespan Corp. and Care New England Health Sys.,* FTC Matter No. 2110031 (Feb. 17, 2022). Commissioner Bedoya identifies another purported merger challenge based on a labor theory, specifically ''decrease[d] fees paid to blood plasma donors.'' Statement of Comm'r Alvaro M. Bedoya, In the Matter of Amendments to the Premerger Notification and Report Form and Instructions and the Hart-Scott-Rodino Rule, File No. P239300, at n.20 (Oct. 10, 2024) (''Statement of Comm'r Bedoya''). But, like the Antitrust Division's *Bertelsmann* challenge, the complaint did not allege harm to the merging parties' employees and therefore could not have been identified by the NPRM's proposed demands for employee information. See Compl., *In the Matter of Grifols S.A. and Grifols Shared Services North America, Inc.,* FTC Matter No. 1810081 (Aug. 1, 2018).

[92] Given the pendency of litigation within the Commission's administrative tribunal, I withhold comment on the strength of the Commission's labor market theory in its challenge to The Kroger Company's acquisition of Albertsons Companies, Inc.

[93] Commissioner Bedoya defends the NPRM's Labor Markets section, reasoning that because the antitrust laws apply to the labor markets, the Commission should screen every single merger subject to HSR for potential labor-competition problems. Statement of Comm'r Bedoya, *supra* n.89, at 2, 4. I do not disagree that the antitrust laws apply to labor markets. But that fact would not have made lawful a rule that was identical to the NPRM. Under ordinary principles of administrative law, the Commission would have to ''examine the relevant data and articulate a satisfactory explanation for its action, including a rational connection between the facts found and the choices made.'' *State Farm,* 463 U.S. at 43 (cleaned up). That means the Commission would need enough evidence of labor-competition problems in mergers to establish that the labor-markets instruction's onerous costs were reasonable. The evidence marshalled by Commissioner Bedoya—a couple papers and a book—comes nowhere near to clearing that bar. Statement of Comm'r Bedoya at 3. The majority made the same mistake in the Noncompete Rule by relying on sparse social-science research to justify massive regulatory burdens. See Dissenting Statement of Comm'r Andrew N. Ferguson, Joined by Comm'r Melissa Holyoak, In the Matter of the Non-Compete Clause Rule, Matter No. P201200, at 37–45 (June 28, 2024), *https://www.ftc.gov/system/files/ftc_gov/pdf/ferguson-noncompete-dissent.pdf* (''The handful of academic papers cited in the Final Rule cannot justify its incredible reach and relying on them to prohibit noncompete agreements categorically is a clear error of judgment.'' (cleaned up)); *Ryan LLC* v. *FTC,* No. 3:24–CV–00986–E, 2024 WL 3879954, at *13–14 (N.D. Tex. Aug. 20, 2024) (finding the Noncompete Rule arbitrary and capricious because ''[t]he record does not support the Rule.''). Making that mistake here would have been a ''clear error of judgment'' requiring vacatur under the APA. *Huawei Technologies USA, Inc.* v. *FCC,* 2 F.4th 421, 434 (5th Cir. 2021) (cleaned up).

Protected association furthers 'a wide variety of political, social, economic, educational, religious, and cultural ends,' and 'is especially important in preserving political and cultural diversity and in shielding dissident expression from suppression by

Continued

de minimis exclusions, which remove the need for filers to note tiny prior acquisitions, supply relationships, and defense contracts that could not plausibly move the competitive needle.[103] The Final Rule shortens lookback periods for many requests, including prior acquisitions, which limits the burdens associated with digging through dated company records.[104] It removes demands for filers to create some new documents, such as deal timelines and organization charts.[105] And the Final Rule includes other important, burden-reducing changes from the indefensible NPRM, all of which help tailor the Final Rule to only those things that are necessary and appropriate to carry out the requirements of HSR.[106]

I still would prefer a deeper cut. For example, I would not have included the transaction rationale requirement.[107] Our requests for transaction-related documents already cover the same ground, in the parties' own words. I expect most transaction rationales will be heavily lawyered essays designed to ensure that the rationale matches these transaction documents. Indeed, I cannot imagine any lawyer worth his or her salt ever permitting the rationale to depart meaningfully from other parts of the notification. I therefore doubt that the rationales will provide any valuable information that we could not glean elsewhere. Perhaps in some cases parties may use the transaction rationale to explain why a merger that appears suspect at first blush presents no competitive problems. But on the whole, I doubt the transaction rationale will benefit the Antitrust Agencies in the mine run of cases, and I would not impose the burden on every filer.

This example highlights an important consideration the Commission must bear in mind for the future. If post-promulgation experience teaches us that some parts of the rule are not working well, we can and should get rid of them in subsequent rulemakings. We have done that in the past.[108] If, for example, my prediction about the value of the transaction rationale proves correct, we can and should jettison it. The same is true of all provisions of the Final Rule. Although we have satisfied the APA's requirement that the Final Rule be the product of reasoned decision making about what is necessary and appropriate to carry the Act into execution, experience almost certainly will reveal that the Final Rule can be improved. The Commission should abandon whatever parts of the Final Rule do not work.

Considered as a whole, however, the additional information sought in the Final Rule is ''necessary and appropriate'' for the Antitrust Agencies to identify transactions that may violate the antitrust laws.[109] Its benefits are many, and, by comparison, the added burdens are reasonable.

Because the Final Rule represents the Commission's reasoned decision about what is necessary and appropriate to carry into execution the requirements of HSR, and because I believe it lawfully addresses shortcomings in the current HSR rule, I concur in its promulgation.

FEDERAL TRADE COMMISSION

16 CFR Parts 801, 802 and 803

RIN 3084–AB46

Premerger Notification; Reporting and Waiting Period Requirements

AGENCY: Federal Trade Commission.

ACTION: Advance notice of proposed rulemaking.

SUMMARY: The Federal Trade Commission (''FTC'' or ''Commission'') is issuing this advance notice of proposed rulemaking (''ANPRM'') to gather information, related to seven topics, that will help to determine the path for future amendments to the premerger notification rules (''the Rules'') under the Hart-Scott-Rodino Antitrust Improvements Act (''the Act'' or ''HSR'').

DATES: Comments must be received on or before February 1, 2021.

ADDRESSES: Interested parties may file a comment online or on paper, by following the instructions in the Invitation to Comment part of the **SUPPLEMENTARY INFORMATION** section below. Write ''16 CFR parts 801–803: Hart-Scott-Rodino Rules ANPRM, Project No. P110014'' on your comment. File your comment online at *https://www.regulations.gov* by following the instructions on the web-based form. If you prefer to file your comment on paper, mail your comment to the following address: Federal Trade Commission, Office of the Secretary, 600 Pennsylvania Avenue NW, Suite CC–5610, (Annex J), Washington, DC 20580, or deliver your comment to the following address: Federal Trade Commission, Office of the Secretary, Constitution Center, 400 7th Street SW, 5th Floor, Suite 5610 (Annex J), Washington, DC 20024.

FOR FURTHER INFORMATION CONTACT: Robert Jones (202–326–3100), Assistant Director, Premerger Notification Office, Bureau of Competition, Federal Trade Commission, 400 7th Street SW, Room CC–5301, Washington, DC 20024.

SUPPLEMENTARY INFORMATION:

Invitation to Comment

You can file a comment online or on paper. For the Commission to consider your comment, we must receive it on or before February 1, 2021. Write ''16 CFR parts 801–803: Hart-Scott-Rodino Rules ANPRM, Project No. P110014'' on your comment. Your comment—including your name and your state—will be placed on the public record of this proceeding, including, to the extent practicable, on the *https://www.regulations.gov* website.

Because of the public health emergency in response to the COVID–19 outbreak and the agency's heightened security screening, postal mail addressed to the Commission will be subject to delay. We strongly encourage you to submit your comment online through the *https://www.regulations.gov* website. To ensure the Commission considers your online comment, please follow the instructions on the web-based form.

If you file your comment on paper, write ''16 CFR parts 801–803: Hart-Scott-Rodino Rules ANPRM, Project No. P110014'' on your comment and on the envelope, and mail your comment to the following address: Federal Trade Commission, Office of the Secretary, 600 Pennsylvania Avenue NW, Suite CC–5610, (Annex J), Washington, DC 20580, or deliver your comment to the following address: Federal Trade Commission, Office of the Secretary, Constitution Center, 400 7th Street SW, 5th Floor, Suite 5610 (Annex J), Washington, DC 20024. If possible, please submit your paper comment to the Commission by courier or overnight service.

Because your comment will be placed on the publicly accessible website, *https://www.regulations.gov,* you are solely responsible for making sure your comment does not include any sensitive or confidential information. In particular, your comment should not include sensitive personal information, such as your or anyone else's Social Security number; date of birth; driver's license number or other state identification number, or foreign country equivalent; passport number; financial account number; or credit or debit card number. You are also solely responsible for making sure your comment does not include any sensitive health information, such as medical records or other individually identifiable health information. In addition, your comment should not include any ''trade secret or any commercial or financial information which . . . is privileged or confidential,''—as provided by Section 6(f) of the FTC Act, 15 U.S.C. 46(f), and FTC Rule 4.10(a)(2), 16 CFR 4.10(a)(2)—including in particular competitively sensitive information such as costs, sales statistics, inventories, formulas, patterns, devices, manufacturing processes, or customer names.

Comments containing material for which confidential treatment is requested must be filed in paper form, must be clearly labeled ''Confidential,'' and must comply with FTC Rule 4.9(c). In particular, the written request for confidential treatment that accompanies

the comment must include the factual and legal basis for the request, and must identify the specific portions of the comment to be withheld from the public record. *See* FTC Rule 4.9(c). Your comment will be kept confidential only if the FTC General Counsel grants your request in accordance with the law and the public interest. Once your comment has been posted publicly at *www.regulations.gov*—as legally required by FTC Rule 4.9(b)—we cannot redact or remove your comment, unless you submit a confidentiality request that meets the requirements for such treatment under FTC Rule 4.9(c), and the General Counsel grants that request.

Visit the FTC website to read this document and the news release describing it. The FTC Act and other laws that the Commission administers permit the collection of public comments to consider and use in this proceeding as appropriate. The Commission will consider all timely and responsive public comments it receives on or before February 1, 2021. For information on the Commission's privacy policy, including routine uses permitted by the Privacy Act, *see https://www.ftc.gov/site-information/privacy-policy.*

Overview

The Act and Rules require the parties to certain mergers and acquisitions to file notifications with the Commission and the Assistant Attorney General in charge of the Antitrust Division of the Department of Justice (''the Assistant Attorney General'') (collectively, ''the Agencies'') and to wait a specified period of time before consummating such transactions. The reporting and waiting period requirements are intended to enable the Agencies to determine whether proposed mergers or acquisitions may violate the antitrust laws if consummated and, when appropriate, to seek injunctions in federal court to prohibit anticompetitive transactions prior to consummation.

Section 7A(d)(1) of the Clayton Act, 15 U.S.C. 18a(d)(1), directs the Commission, with the concurrence of the Assistant Attorney General, in accordance with the Administrative Procedure Act, 5 U.S.C. 553, to require that premerger notification be in such form and contain such information and documentary material as may be necessary and appropriate to determine whether the proposed transaction may, if consummated, violate the antitrust laws. In addition, Section 7A(d)(2) of the Clayton Act, 15 U.S.C. 18a(d)(2), grants the Commission, with the concurrence of the Assistant Attorney General, in accordance with 5 U.S.C. 553, the authority to define the terms used in the Act, exempt classes of transactions that are not likely to violate the antitrust laws, and prescribe such other rules as may be necessary and appropriate to carry out the purposes of Section 7A.

Since the enactment of the Act, the Commission has updated and refined the Rules many times. Indeed, the Agencies have a strong interest in making sure the Rules are as current and relevant as possible. Certain rules interpreting and implementing the Act, some of which have not been changed since they were first promulgated in 1978, may need additional updating. In this ANPRM, the Commission proposes to gather information on seven topics to help determine the path for potential future amendments to numerous provisions of Parts 801, 802, and 803 of the Rules under the Act.

Background

Although it regularly reviews the Rules and revises them on a rolling basis, the Commission is issuing this ANPRM to solicit information to support review of the Rules on a more unified basis as part of its systematic review of all FTC rules and guides. The Commission is aware that market and business practices are constantly evolving, and that these changes make it especially important to evaluate whether the Rules are still serving their intended purpose or if they need to be amended, eliminated, or supplemented.

To accomplish this, the Commission is publishing in this ANPRM a number of questions related to seven different topics about which questions frequently arise in discussions of the Rules: Size of Transaction, Real Estate Investment Trusts, Non-Corporate Entities, Acquisitions of Small Amounts of Voting Securities, Influence outside the Scope of Voting Securities, Devices for Avoidance, and Filing Issues. Answers to questions on these topics will provide information that may facilitate drafting of new or revised rules.

The Commission welcomes comments on all of these topics, or on any sub-topic within them. The Commission, however, does not expect that every commenter will address all seven topics, or even every question relating to each topic. The Commission notes that comments it receives in response to this ANPRM may also inform the Notice of Proposed Rulemaking regarding the proposed change in the § 801.1(a)(1) definition of ''person'' and proposed exemption § 802.15 published in the **Federal Register** at the same time as this ANPRM.

I. Size of Transaction

Section 7A(a)(2) of the Clayton Act mandates an HSR filing when a transaction meets the Size of Transaction (''SOT'') test, subject to other provisions of the Rules, including exemptions.[1] To determine whether a transaction meets the SOT test, filing parties must look to Acquisition Price (''Acquisition Price'') under 16 CFR 801.10 or, in some cases, Fair Market Value (''FMV'') under 16 CFR 801.10(c)(3). As it is the filing parties' responsibility to conduct these calculations, the Commission would benefit from additional information on how filing parties engage in the calculation for both Acquisition Price and FMV.

A. Acquisition Price (16 CFR 801.10)

Under 16 CFR 801.10(c)(2), the Acquisition Price ''shall include the value of all consideration for such voting securities, non-corporate interests, or assets to be acquired.'' [2] The FTC's Premerger Notification Office (''the PNO'') has long taken the position that, when a transaction has a determined Acquisition Price, debt may be excluded from the Acquisition Price in certain circumstances. For example, if a buyer pays off a target's debt as part of the transaction, the buyer may deduct the amount of the retired debt from the Acquisition Price. This position dates from the earliest days of interpreting the HSR Rules in the late 1970s and early 1980s and is based, in part, on the analysis of a target's balance sheet liabilities in the context of an acquisition of voting securities.

The PNO has also allowed the deduction of certain expenses when calculating the Acquisition Price. For example, where the purchase price in the parties' transaction agreement includes funds earmarked to pay off the seller's transaction expenses, the PNO has permitted the parties to deduct that amount when calculating the Acquisition Price based on the view that such payments do not reflect consideration for the target.

The Commission is aware that these informal PNO staff positions can have a significant impact on the calculation of the Acquisition Price and, in turn, on whether a transaction is reportable under the Act. Given the potential for these positions to affect the structure of a transaction, the Commission believes

[1] *Steps for Determining Whether an HSR Filing is Required,* FTC.GOV, *https://www.ftc.gov/enforcement/premerger-notification-program/hsr-resources/steps-determining-whether-hsr-filing* (last visited July 07, 2020).

[2] 16 CFR 801.10(c)(2).

these informal PNO staff positions may need revision. As a result, the Commission aims to understand the decision-making involved in the deduction of retired debt or other amounts or categories of expenses from the Acquisition Price through responses to the following questions:

1. When negotiating a transaction, does a buyer ever offer to pay off or retire debt as part of the deal? Under what circumstances? How have these circumstances evolved since the late 1970s/early 1980s?

a. Why might a buyer offer to pay off or retire debt as part of the deal now as opposed to in the late 1970s/early 1980s? Have the competitive implications of the deal ever been a factor in this decision?

b. Why might a buyer decline to pay off or retire debt as part of the deal now as opposed to in the late 1970s/early 1980s? Have the competitive implications of the deal ever been a factor in this decision?

c. Does a seller prefer a buyer that is willing to pay off or retire debt as part of the deal? Why or why not? Are seller preferences different now than in the late 1970s/early 1980s?

d. In a multiple bid situation, is a buyer's willingness to pay off or retire debt as part of the deal ever a factor in the seller's selection of the winning bid? Was it a factor in the late 1970s/early 1980s? And if it is evaluated differently today versus the 1970s/early 1980s, why is it evaluated differently?

e. Do sellers ever reject a buyer's offer to pay off or retire debt as part of the deal? Under what circumstances? How have these circumstances evolved since the late 1970s/early 1980s? Have the competitive implications of the deal ever been a factor in this decision?

f. Are there any limitations (legal or otherwise) on a buyer's ability to pay off or retire debt as part of the deal? If so, what are they? How do these limitations differ from limitations in place in the late 1970s/early 1980s?

g. Are buyers more or less likely to pay off or retire debt as part of the deal now than they were in the late 1970s/early 1980s? Why or why not?

2. When negotiating a transaction, does a buyer ever offer to pay other expenses of or within the seller (*e.g.,* legal or banking fees, change of control payments, etc.) as part of the deal? Under what circumstances? How have these circumstances evolved since the late 1970s/early 1980s?

a. Why might a buyer offer to pay such expenses as part of the deal now as opposed to in the late 1970s/early 1980s? Have the competitive implications of the deal ever been a factor in this decision?

b. Why might a buyer decline to pay such expenses as part of the deal now as opposed to in the late 1970s/early 1980s? Have the competitive implications of the deal ever been a factor in this decision?

c. Does a seller prefer a buyer that is willing to pay such expenses as part of the deal? Why or why not? Are seller preferences different now than in the late 1970s/early 1980s?

d. In a multiple bid situation, is a buyer's willingness to pay such expenses as part of the deal ever a factor in the seller's selection of the winning bid? Was it a factor in the late 1970s/early 1980s? If it is evaluated differently today versus the 1970s/early 1980s, why is it evaluated differently?

e. Do sellers ever reject a buyer's offer to pay such expenses as part of the deal? Under what circumstances? How have these circumstances evolved since the late 1970s/early 1980s? Have the competitive implications of the deal ever been a factor in this decision?

f. Are there any limitations (legal or otherwise) on a buyer's ability to pay such expenses as part of the deal? If so, what are they? Do these limitations differ from limitations in place in the late 1970s/early 1980s? If they differ, how do they differ?

g. Are buyers more or less likely to pay such expenses as part of the deal now than they were in the late 1970s/early 1980s? Why or why not?

3. How do parties currently calculate the Acquisition Price? How has the calculation changed since the late 1970s/early 1980s?

a. Under what conditions is the Acquisition Price different from the purchase price or consideration identified in the transaction agreement? Have these conditions changed since the late 1970s/early 1980s? If they have changed, how have they changed?

b. Do transaction agreements ever lack a firm or certain purchase price? Under what conditions? Have these conditions changed since the late 1970s/early 1980s? If they have changed, how have they changed?

i. Why would parties negotiate a deal without a firm or certain purchase price? What factors have affected such a decision or deal structure? Have these factors evolved since the late 1970s/early 1980s? If they have changed, how have they changed? Have the competitive implications of the deal ever been a factor in this negotiating a deal without a firm or certain purchase price?

ii. What are the limits on the scope of the undetermined payments or deductions? Have these limits changed since the late 1970s/early 1980s? If they have changed, how have they changed?

c. Can an Acquisition Price be subject to undeterminable deductions or deductions of undeterminable value? Under what conditions? Have these conditions evolved since the late 1970s/early 1980s? If they have changed, how have they changed? What are some examples of each kind of deduction and how have they changed since the late 1970s/early 1980s?

d. Are there certain categories of consideration that are commonly deducted or added when calculating the Acquisition Price? Have these categories changed since the late 1970s/early 1980s? If they have changed, how have they changed?

e. Is the ultimate recipient of a payment ever a factor in whether such payment is included when calculating the Acquisition Price? Why or why not? In what circumstances? Has this determination changed since the late 1970s/early 1980s? If it has changed, how has it changed?

f. Is employee compensation (*e.g.,* bonus payments, retention payments, payments for contingent employee compensation) ever included when calculating the Acquisition Price? Why or why not? In what circumstances? Has this determination changed since the late 1970s/early 1980s? If it has changed, how has it changed?

g. Does the form of employee compensation affect whether it is included in the Acquisition Price? Under what circumstances? Has this determination changed since the late 1970s/early 1980s? If it has changed, how has it changed?

h. Is the value of employee compensation ever deducted from the Acquisition Price? Why or why not? Under what circumstances? Has this determination changed since the late 1970s/early 1980s? If it has changed, how has it changed?

i. Is there a ''control premium'' associated with the acquisition of control? How does an Acquiring Person determine that ''control premium''? Has this determination changed since the late 1970s/early 1980s? If it has changed, how has it changed?

4. When calculating the Acquisition Price, do parties include all consideration paid for the target? How has this approach changed since the late 1970s/early 1980s?

a. How do parties define ''consideration?'' Has this changed since the late 1970s/early 1980s? If it has changed, how has it changed?

b. Do parties rely on a standard legal definition for ''consideration?'' If so,

what is it and from what is it derived? Has this changed since the late 1970s/early 1980s? If it has changed, how has it changed?

c. Is consideration defined any differently for the purposes of calculating Acquisition Price than it is for non-HSR purposes? Why or why not? Has this changed since the late 1970s/early 1980s? If it has changed, how has it changed?

d. Are any categories of payments excluded from the above definition of ''consideration?'' Why or why not? Has this changed since the late 1970s/early 1980s? If it has changed, how has it changed?

e. Is the ultimate recipient of the payment ever a factor in whether such payment is included as consideration? Why or why not? Has this changed since the late 1970s/early 1980s? If it has changed, how has it changed?

5. When calculating the Acquisition Price, how does debt affect the calculation? How has this approach changed since the late 1970s/early 1980s?

a. Does the debt reported on the target's balance sheet affect the calculation of the Acquisition Price? Why or why not? In what circumstances? Should it? Why or why not? Has this changed since the late 1970s/early 1980s? If it has changed, how has it changed?

b. Does the buyer's pay off or retirement of debt affect the calculation of the Acquisition Price? Why or why not? In what circumstances? Should it? Why or why not? Has this changed since the late 1970s/early 1980s? If it has changed, how has it changed?

c. Does the treatment of debt (either reported on a balance sheet or being paid off or retired by the buyer) differ based on whether the acquisition is of (1) voting securities, (2) non-corporate interests, or (3) assets? Why or why not? Should it? Why or why not? Has this changed since the late 1970s/early 1980s? If it has changed, how has it changed?

d. Should the calculation of Acquisition Price focus on the total amount paid by the Acquiring Person (including debt that is paid off or retired) or the net amount received by the Acquired Person (excluding debt that is paid off or retired)? Why? Has this changed since the late 1970s and early 1980s? If it has changed, how has it changed?

6. Where an acquisition is of voting and non-voting securities, how is the Acquisition Price allocated between the voting securities and the non-voting securities? How has this approach changed since the late 1970s/early 1980s?

a. Are the voting securities and non-voting securities separately valued? Why or why not? Has this changed since the late 1970s/early 1980s? If it has changed, how has it changed?

b. Are each of the voting securities and the non-voting securities valued? Why or why not? Has this changed since the late 1970s and early 1980s? If it has changed, how has it changed?

B. Fair Market Value (16 CFR 801.10(c)(3))

Sometimes a transaction does not have a determined Acquisition Price. This is often due to the fluctuation in stock prices or the inability to calculate the exact amount of contingent future payments. As a result, the Fair Market Value (''FMV'') of the transaction becomes critical to determining reportability under the Act.

Per § 801.10(c)(3), FMV ''shall be determined in good faith by the board of directors of the ultimate parent entity included within the Acquiring Person, or, if unincorporated, by officials exercising similar functions; or by an entity delegated that function by such board or officials.'' Once the Acquiring Person, or its delegate, has determined the FMV, there is no requirement to share with the Agencies the details of how that FMV was determined. The Commission would like to understand better the determination of FMV through responses to the following questions:

1. When an Acquiring Person is evaluating the potential acquisition of voting securities, non-corporate interests, or assets, what methodologies does that Acquiring Person use to support valuation in the ordinary course of due diligence and negotiation of the acquisition? How have these methodologies changed since the late 1970s/early 1980s?

a. If an acquisition involves the acquisition of non-voting securities, what methodologies does the Acquiring Person use to value the non-voting securities? Have these methodologies changed since the late 1970s/early 1980s? If they have changed, how have they changed?

b. In an acquisition of both voting securities and non-voting securities, does the Acquiring Person ever use one methodology to value the voting securities and a different methodology to value the non-voting securities? Why or why not? Have these methodologies changed since the late 1970s/early 1980s? If they have changed, how have they changed?

c. Where the Acquiring Person receives board appointment or board designation rights (or their non-corporate equivalent) in conjunction with the acquisition of voting (or non-voting) securities, do those rights affect the FMV of the voting (or non-voting) securities acquired? Has this changed since the late 1970s/early 1980s? If this has changed, how has it changed?

2. How does the determination of FMV under 16 CFR 801.10(c)(3) differ from the Acquiring Person's determination of value in the ordinary course of due diligence and negotiation of an acquisition? How has this determination changed since the late 1970s/early 1980s?

a. What factors go into determining FMV? Do these factors vary by industry, type of acquisition (asset, non-corporate interest, intellectual property), size of the target, or for other reasons? Describe each of the ways these factors vary and how each one varies. How have these factors changed since the late 1970s/early 1980s? Are there difficulties involved in performing FMV analyses? If so, what are those difficulties? Have these difficulties changed since the late 1970s/early 1980s? If they have changed, how have they changed? What additional guidance, if any, might the Commission provide to eliminate these difficulties?

b. How often and for what purposes do boards of directors rely on third-party bankers and other appraisers to provide FMV analysis? Do boards of directors evaluate the accuracy of those results compared to their own calculations? If so, how does the board of directors evaluate the accuracy of those results? Has this process changed since the late 1970s/early 1980s? If it has changed, how has it changed?

c. Should the Commission require an independent FMV analysis for some transactions to ensure consistency with standard valuation practices? If so, for what type of transactions should the Commission require independent FMV analysis? If the Commission requires an independent analysis, who should conduct the FMV analysis?

3. When calculating the FMV because the Acquisition Price is not determined as a result of future or uncertain payments, what financial or valuation concepts are used to determine the value of those future or uncertain payments? Have these concepts changed since the late 1970s/early 1980s? If they have changed, how have they changed?

4. How does an Acquiring Person determine the present FMV of assets that are not yet commercialized? For example, how does an Acquiring Person determine the present FMV of

intellectual property surrounding a product that currently is under development? Has this determination changed since the late 1970s/early 1980s? If it has changed, how has it changed?

5. In determining the FMV, how does the Acquiring Person account for the value of any assumed liabilities (or liabilities of the Acquired Entity)? What impact do such liabilities have on the FMV? Has this determination changed since the late 1970s/early 1980s? If it has changed, how has it changed?

6. Should the Commission require the Acquiring Person to provide the basis for its FMV determination? If so, why? If not, why not?

II. Real Estate Investment Trusts (Section 7A(c)(1) of the Clayton Act)

Congress created real estate investment trusts (''REITs'') in 1960 to allow for the pooling of funds from many small investors to invest in real estate, and gave REITs preferential tax treatment. The legislative history indicates that REIT status was meant to be limited to ''clearly passive income from real estate investments, as contrasted to income from the active operation of businesses involving real estate,'' and those real estate trusts engaging in active business operations would not be afforded REIT tax status.[3]

As a result, the PNO has long taken the informal staff position that when a REIT acquires real property (and assets incidental to the real property), the acquisition is exempt from HSR reporting under section 7A(c)(1) of the Clayton Act, the statutory ordinary course of business exemption. This position is based on the presumption that REITs are solely buying, owning, leasing, and selling real property, and therefore any acquisition of real property is exempt because it is done in the ordinary course of the REIT's business and is unlikely to violate the antitrust laws.

The Commission is aware that the Internal Revenue Service (''IRS'') subsequently made changes in tax law to remove restrictions on REITs and expand the beneficial tax treatment. As a result, many REITs are no longer solely buying, owning, leasing, and selling real property.[4] In fact, many REITs are now engaged in the active operation of businesses. For instance, REITs operate assisted living and other healthcare businesses, as well as companies that own cell towers and billboards, located on REIT-owned real property. Due to these changes, the Commission believes it is possible that a REIT's acquisition of real property may no longer be suitable for the blanket exemption offered under section 7A(c)(1) of the Act. The Commission would like to understand in more detail the current structure and operation of REITs through responses to the following questions:

1. Have REITs evolved from entities that own only real property to entities that can hold operating companies?

a. If so, what has led to the evolution of REITs becoming entities that can hold operating companies?

b. How have changes in tax laws or regulations influenced this evolution?

2. How does an operating company convert to a REIT?

a. Do REIT structures involve one Ultimate Parent Entity (''UPE'')? Two UPEs? How often is each type used? Why?

b. If a REIT has more than one UPE, what is the relationship between those UPEs?

c. If a REIT has more than one UPE, is there an entity above the UPEs that makes decisions for both of them?

3. Is there a way to distinguish REITs that own only real property from those that hold operating companies? If yes, what are the ways to distinguish REITs that own only real property and those that hold operating companies? For instance, are there differences in how they are structured? How else are they different?

4. Assume the PNO's informal staff position exempting REITs did not exist and REITs had to rely solely on the real property exemptions, §§ 802.2 and 802.5.

a. Are there situations in which REIT transactions would no longer be exempt? If so, what kinds of situations?

b. How often would the §§ 802.2 and 802.5 exemptions come into play?

c. Would it be easy for REITs to apply §§ 802.2 and 802.5 to transactions? If so, why? If not, why not?

III. Non Corporate Entities (16 CFR 801.1f(1)(ii))

The Act applies to acquisitions of voting securities or assets. The rise of non-corporate entities, such as partnerships and limited liability companies, has presented challenges under the Act because the PNO had long taken the position that interests in unincorporated entities were neither voting securities nor assets. Thus, any acquisition of interests in such entities had not been a reportable event unless 100% of the interests was acquired, in which case the acquisition was deemed to be that of all of the underlying assets of the partnership or other unincorporated entity.'' [5]

At first, this approach did not present significant issues, because non-corporate entities were created as acquisition vehicles and used to effectuate transactions, not to separately hold operating businesses.[6] But the role of non-corporate entities evolved. As the Commission noted in its 2004 Notice of Proposed Rulemaking, ''[t]he use of unincorporated entities is expanding, and such entities are increasingly engaging in acquiring interests in other corporate and unincorporated entities. For example, the number of corporate income tax filings increased from 4,630,000 to 5,711,000 (23%) between 1994 and 2002, while the number of partnership returns, including LLCs taxed as partnerships, increased from 1,550,000 to 2,236,000 (44%) during the same period. In addition, a number of states have amended their statutes in recent years to allow limited liability companies to merge with other types of legal entities.'' [7] As a result, the Commission determined in its 2005 Final Rule that the acquisition of control, 50% or more of the non-corporate interests (''NCIs'') in a non-corporate entity (''NCE''), would henceforth be reportable.[8]

The Commission is aware that NCEs have continued to evolve. For instance, acquisitions of NCIs are often captured in Securities Purchase Agreements, which imply that NCIs are now deemed to be more like voting securities. Thus, the Commission believes that it is appropriate to re-evaluate the nature of NCEs and NCIs to determine whether NCEs are the equivalent of corporate entities and NCIs function more as voting securities. To that end, the Commission would like to understand in more detail the evolution of NCEs and NCIs since its 2005 Final Rule,[9] through responses to the following questions:

1. Have NCEs evolved in form and substance since 2005? If they have evolved, what significant changes have occurred to shape the evolution of NCEs between 2005 and now?

a. Have the distinctions between NCEs and corporate entities evolved since 2005? If they have evolved, what significant changes have occurred to make NCEs and corporate entities more or less distinct between 2005 and now?

[3] H.R. Rep. No. 86–2020, pt. 2, at 3–4 (1960).

[4] Proposed Rulemaking, 79 FR 27508 (May 14, 2014); Correction to Proposed Rulemaking, 79 FR 38809 (July 9, 2014); Final Regulations, 81 FR 59849 (Aug. 31, 2016).

[7] 69 FR at 18688.

[8] 70 FR 11502, 11504 (Mar. 8, 2005).

[9] 70 FR 11502 (Mar. 8, 2005).

b. Have the distinctions between NCIs and voting securities evolved since 2005? If they have evolved, what significant changes have occurred to make NCIs and voting securities more or less distinct between 2005 and now?

c. Are NCIs currently the same as voting securities? If so, how? If not, how are they different? Is this different from 2005? If so, how? What has changed between 2005 and now?

d. Does any category of NCIs currently carry a right equivalent to the right to vote for the election of the board of directors of a corporate entity? Is this different from 2005? If so, how? What has changed between 2005 and now?

e. Should the reporting obligations for the acquisition of an interest in a corporate entity and non-corporate entity differ? Is this different from 2005? If so, how? What has changed between 2005 and now?

2. Have the benefits and drawbacks of becoming an NCE evolved since 2005? If they have evolved, have the incentives to become an NCE changed since 2005? If so, how? If not, why not? What has changed between 2005 and now?

IV. Acquisitions of Small Amounts of Voting Securities (16 CFR 801.1, 802.9, 802.64)

Since the implementation of the HSR program, there has been a significant expansion of the holdings of investment entities, including investment funds and institutional investors, as well as expanded interest and ability of such shareholders to participate in corporate governance.[10] In addition, changes in investment behavior have resulted in some investment entities holding small stakes in a large number of firms, including competitors. This has caused some to raise concerns about the competitive effects of common ownership—that is, the competitive effect of an investor holding small minority positions in issuers that operate competing lines of business.[11]

In light of these developments, the Commission is using this ANPRM to take a fresh look at the rules that apply to acquisitions of voting securities by investment entities to determine whether updates may be necessary. The Commission seeks information on the following rules:

A. Definition of ''Solely for the Purpose of Investment'' (16 CFR 801.1, 802.9)

Section (c)(9) of the HSR Act exempts from the requirements of the Act ''acquisitions, solely for the purpose of investment, of voting securities, if, as a result of such acquisition, the securities acquired or held do not exceed 10 per centum of the outstanding voting securities of the issuer.'' To implement this statutory limitation, 16 CFR 802.9 exempts from the requirements of the Act an acquisition of voting securities if made solely for the purpose of investment and if, as a result of the acquisition, the Acquiring Person would hold 10% or less of the outstanding voting securities of the issuer, regardless of the dollar value of the voting securities so acquired or held. Under 16 CFR 801.1(i)(1), ''[v]oting securities are held or acquired 'solely for the purpose of investment' if the person holding or acquiring such voting securities has no intention of participating in the formulation, determination, or direction of the basic business decisions of the issuer.'' [12]

In light of changing investor engagement with issuers, the Commission is interested in knowing if it is appropriate to rethink the definition of ''solely for the purpose of investment'' in 16 CFR 801.1(i)(1) and the exemption in 16 CFR 802.9. To that end, the Commission seeks to understand the incentives involved in applying the exemption in 16 CFR 802.9 through responses to the following questions:

1. The ability to rely on 16 CFR 802.9 depends on whether a potential filing person ''has no intention of participating in the formulation, determination, or direction of basic business decisions of the issuer.'' [13]

a. Are there benefits to this approach? If so, what are the benefits?

b. Are there drawbacks to this approach? If so, what are the drawbacks?

c. How could this approach be changed? How would such a change impact investors and issuers?

d. What are the ''basic business decisions'' of the issuer?

i. Is it clear what decisions comprise the ''basic business decisions'' of the issuer?

ii. Are there activities that clearly do not relate to the basic business decisions?

iii. Are there activities that clearly do relate to the basic business decisions?

iv. Is there uncertainty about whether an activity relates to the basic business decisions? If so, why is there uncertainty? To what extent is there uncertainty about whether an activity relates to the basic business decisions?

e. Should the Commission define the ''basic business decisions of the issuer'' as used in the existing Rule?

i. What should the definition include?

ii. Should specific items be excluded from the definition? Which items?

iii. What are the benefits of providing a definition?

iv. What are the risks of providing a definition?

f. Is it clear what is meant by ''no intention of participating'' in the formulation, determination, or direction of the basic business decisions?

i. What type of activity related to determining whether to participate in business decisions currently takes one out of the exemption, or at what point in the process of deciding whether to participate in business decisions is one no longer within the exemption?

ii. What type of activity related to determining whether to participate in business decisions should result in the exemption no longer applying, or at what point in the process of deciding whether to participate in business decisions should one no longer be within the exemption?

iii. Should the language be changed to allow reliance on the exemption until the Acquiring Person has made an affirmative decision to participate in the basic business decisions? If so, what would constitute an affirmative decision to participate in the basic business decisions?

2. In general, for HSR purposes, what differentiates the activities of investors who invest solely for the purpose of investment and investors who do not invest solely for the purpose of investment? Have these activities changed since 1978? If so, how?

a. In what activities do investors who invest solely for the purpose of investment engage? Have these activities changed since 1978? If so, how?

b. What categories of interaction with management indicate an investor's intention is not to hold voting securities solely for the purpose of investment? For example, would those categories include things like discussions of governance issues, discussions of

[10] *See, e.g.,* Edward Rock, *Adapting to the New Shareholder-Centric Reality,* 161 U. Pa. L. Rev. 1907 (2013).

executive compensation, or casting proxy votes? Have these categories changed since 1978? If so, how?

c. Does the market capitalization of the issuer affect the determination of whether an investment is solely for the purpose of investment or not solely for the purpose of investment? Has this changed since 1978? If so, how?

3. How does the Commission's interpretation of ''solely for the purpose of investment'' compare to the Securities and Exchange Commission's (''SEC'') approach to ''passive'' investors? [14]

a. Assuming no change in the SEC approach, could the Commission adopt the SEC approach? If yes, why? If no, why not?

b. What would be the benefits of adopting the SEC approach? Why?

c. What would be the drawbacks of adopting the SEC approach? Why?

d. Does the different role of each agency justify different approaches for investors who hold positions solely for the purpose of investment? If yes, why? If no, why not?

4. How does the Commission's interpretation of ''solely for the purpose of investment'' compare to the elements that must be disclosed in Item 4 of Schedule 13D filed with the SEC? [15]

a. Assuming no change to the SEC rule, could the Commission adopt the SEC elements? If yes, why? If no, why not?

b. What would be the benefits of adopting the SEC elements?

c. What would be the drawbacks of adopting the SEC elements?

d. Does the different role of each agency justify different approaches for investors who hold positions solely for the purpose of investment?

5. How do the activities of investment firms differ from those of operating companies?

a. Should the Commission treat different types of acquirers differently for the purpose of the exemption? If yes, why? If no, why not?

b. Should the Commission treat different types of investment companies differently for the purpose of the exemption (for example, mutual fund companies versus hedge fund companies)? If yes, why? If no, why not?

6. Should the Commission preclude parties from using the exemption only if they have taken certain specified actions? If yes, why? If no, why not?

a. What actions should disqualify an Acquiring Person from being able to use the exemption?

i. Should the actions be limited to actions that facilitate or encourage coordination among competitors?

ii. Should actions that affect competition, even if aimed only at a single competitor, preclude the use of the exemption? If yes, why? If no, why not?

iii. Should actions that change the incentives to compete, even if aimed only at a single competitor, preclude the use of the exemption? If yes, why? If no, why not?

iv. What other actions should preclude utilizing the exemption?

b. Would allowing the Acquiring Person to acquire 9.9% of the voting securities of the Issuer prior to taking the specified action undercut the ability to obtain filings early enough to ascertain potential competitive harm before a transaction is consummated? If yes, why? If no, why not?

c. Would such a conditioning of the loss of the exemption be consistent with the wording of the statute, including ''solely'' and the ''purpose'' of the acquisition? If yes, why? If no, why not?

i. Is the acquisition *solely* for investment if the Acquiring Person is considering taking action inconsistent with the exemption, but has not yet taken the action?

ii. Is the acquisition for the *purpose* of investment if the Acquiring Person has determined to take action inconsistent with the exemption, but has not yet taken the action?

d. Should the Commission require an HSR filing for past acquisitions once the specified actions have been taken? If yes, why? If no, why not?

i. Would this be consistent with the HSR Act's requirement to make the filing prior to the acquisition? If yes, why? If no, why not?

ii. Would this be consistent with the requirement that the Acquiring Person certify that it has a good faith intent to make an acquisition requiring notification? If yes, why? If no, why not?

B. Definition of Institutional Investors (16 CFR 802.64)

Under § 802.64, institutional investors are exempt from HSR reporting when making acquisitions of 15% or less of voting securities in the ordinary course of business and solely for purpose of investment. During the initial HSR rulemaking in 1978, entities were identified as institutional investors because they were viewed as constrained by law (*e.g.,* non-profits) or fiduciary duty (*e.g.,* pension trusts, insurance companies, etc.), or generally uninterested in ''affecting management of the companies whose stock they buy'' (*e.g.,* broker-dealers).[16] The list identifying what type of entity is considered an institutional investor has never been updated.

It is unclear to the Commission whether this exemption should be maintained and implemented in the same manner in which it was first promulgated in 1978. In light of changes in the investor landscape since that time, the Commission may need to update the list of institutional investors that are presumed to engage in acquisitions solely for the purpose of investment. Thus, the Commission aims to understand the current institutional investor landscape in order to make that determination through responses to the following questions:

1. Given that 16 CFR 802.64 has not changed since 1978, does it need to be updated?

a. Does 16 CFR 802.64 accurately reflect the universe of entities that make investments in the ordinary course of business solely for the purpose of investment? Are there entities currently listed in the exemption that should be removed? If so, why?

b. Are there entities not currently listed that should be treated as institutional investors? If so, why and what are they? Explain the justification for treating the entity as an institutional investor: Does it fit within the paradigm identified by the Commission in first promulgating 16 CFR 802.64 (*i.e.,* (i) constrained by law; (ii) constrained by fiduciary duty; or (iii) uninterested in affecting management of the companies whose stock they buy)? Are there other reasons the entity should be treated as an institutional investor?

[14] Under SEC Rule 13d–1(c), certain beneficial owners may file a short form statement on Schedule 13G in lieu of a 13D statement if that person ''has not acquired the securities with any purpose, or with the effect, of changing or influencing the control of the issuer, or in connection with or as a participant in any transaction having that purpose or effect, including any transaction subject to 17 CFR 240.13d–3(b), other than activities solely in connection with a nomination under 17 CFR 240.14a–11.'' 17 CFR 240.13d–1(c). The SEC relies on a ''control purpose'' test to identify ''passive'' investments; that is, beneficial owners that acquired shares ''not with the purpose nor with the effect of changing or influencing the control of the issuer.'' The SEC has a broad view of the types of activities that could show such a ''control purpose,'' and that determination is assessed based on a totality of the circumstances. For instance, a shareholder that fails to qualify as an investor solely for the purpose of investment under the HSR Act may nonetheless be eligible to use Schedule 13G depending on various factors, such as the subject matter of the shareholder's discussions with the issuer's management. *See* Exchange Act Sections 13(d) and 13(g) and Regulation 13D–G Beneficial Ownership Reporting, Compliance and Disclosure Interpretations (''C&DIs''), Question 103.11 (July 14, 2016) *https://www.sec.gov/divisions/corpfin/guidance/reg13d-interp.htm#103.11.*

[15] Item 4 of Schedule 13D requires filers to state the purpose or purposes of the acquisition of securities of the issuer and to describe any plans or proposals which they might have. 17 CFR 240.13d–10117 CFR 240.13d–101.

[16] 43 FR 33450, 33503 (July 31, 1978).

c. Should the Commission provide a list of indicia that an investor must meet to qualify as an institutional investor for purposes of the HSR Act, instead of a list of entities considered to be institutional investors? If yes, why and what should these indicia be? If no, why not?

d. Is the 15% level for the Commission's exemption still consistent with the purpose of the HSR Act? What evidence is there that the level should be higher or lower?

The SEC has also promulgated a definition of ''institutional investors'' as part of its beneficial ownership disclosure requirements. When a person or group of persons acquires beneficial ownership of more than five percent of a voting class of a company's equity securities registered under the Securities Exchange Act, they are required to file a Schedule 13D with the SEC.[17] Depending upon the facts and circumstances, the person or group of persons may be eligible to file the more abbreviated Schedule 13G in lieu of Schedule 13D.[18] One of the exemptions relates to acquisitions of securities in the ordinary course of business by a ''qualified institutional investor'' under Rule 13d–1(b).[19]

2. How does the Commission's definition of institutional investor compare to the definition used by the SEC in identifying a person able to file a Schedule 13G?

a. Assuming no change in the SEC rule, should the Commission adopt the SEC definition of a person who acquires voting securities in the ordinary course of business and not with the purpose nor with the effect of changing or influencing the control of the issuer? If yes, why? If no, why not?

b. What would be the benefits of adopting the SEC definition?

c. What would be the drawbacks of adopting the SEC definition?

d. Does the different role of each agency justify different definitions for institutional investors?

3. What are the activities of institutional investors and how have they changed since 1978?

a. What activities do institutional investors engage in with the issuers whose shares they hold? Have these activities changed since 1978? If so, how have these activities changed?

i. What is the scope of ''shareholder engagement'' that institutional investors undertake? Has this changed since 1978? If so, how has it changed?

ii. What topics or issues are the subject of such engagement? Have these topics or issues changed since 1978? If so, how have they changed?

iii. How often does such engagement occur? Has this changed since 1978? If so, how has this changed?

iv. Does the amount, degree, or type of issue discussed vary by issuer, or are there consistent themes of discussion and engagement? Has this changed since 1978? If so, how has this changed?

v. When do institutional investors participate in the formulation, determination, or direction of the basic business decisions of issuers? Has this changed since 1978? If so, how has it changed?

b. How do index funds fit within the portfolios of institutional investors? Have index funds evolved since 1978? If so, how have they evolved?

i. Why do intuitional investors choose to create an index fund, exchange-traded fund, or the like? What are the benefits and drawbacks of creating such a fund?

ii. How does the acquisition of voting securities held by an index fund, exchange-traded fund, or the like occur? Do acquirors use an algorithm or some other automated mechanism to facilitate acquisitions?

iii. Who oversees an index fund, exchange-traded fund, or the like? Is there one person or entity within an investment organization tasked with overseeing such a fund? More than one? How often is it one versus more than one?

4. How do institutional investors manage holdings in the same issuer? How has this changed since 1978?

a. Do institutional investors jointly manage holdings in the same issuer? Do they separately manage holdings in the same issuer? Both? Has this changed since 1978? If so, how has it changed?

b. How do institutional investors make the decision to jointly or separately manage holdings in the same issuer? Has this changed since 1978? If so, how has this changed?

c. Do answers to any of the above questions depend on the type of issuer or the type of institutional investor or other factors? If so, what factors are relevant? How does each factor influence the actions of institutional investors? Have the factors changed since 1978? If so, how have they changed?

5. How do institutional investors apply the concept of solely for the purpose of investment? Has this changed since 1978? If so, how has it changed?

a. Do the entities listed in 16 CFR 802.64 currently hold the voting securities of issuers solely for the purpose of investment? How does this differ from institutional investor behavior in 1978? What significant changes in institutional investor behavior have occurred between 1978 and 2020?

b. What kinds of entities not listed in 16 CFR 802.64 currently hold the voting securities of issuers solely for the purpose of investment? How does the current behavior of these entities differ from their behavior in 1978?

c. If institutional investors make certain acquisitions solely for the purpose of investment and other acquisitions not solely for the purpose of investment, is it appropriate to provide a status exemption for all of their activities? If yes, why? If no, why not?

d. Do institutional investors rely on 16 CFR 802.64 to exempt acquisitions in or by index funds, exchange-traded funds or the like? If so, how?

V. Influence Outside the Scope of Voting Securities (16 CFR 801.1, 802.31)

The HSR Act applies to the acquisition of assets and voting securities. ''The term voting securities means any securities which at present or upon conversion entitle the owner or holder thereof to vote for the election of directors of the issuer, or of an entity included within the same person as the issuer.'' [20] The acquisition of a voting security carries with it the right to influence the business of a company through the ability to vote for the directors of that company, among other things.

The Commission is aware, however, that there are ways to gain influence over a company without the acquisition of the right to vote for the election of directors inherent in voting securities. For instance, the acquisition of convertible voting securities or the use of board observers could each result in the ability to influence a company's business decisions. Currently, neither the acquisition of convertible voting securities nor rights to be a board observer are reportable events under the Act. The Commission, therefore, needs to ascertain whether the acquisition and exercise of these rights provide opportunities to influence an issuer's business decisions, and thus should be reportable events.

[17] Securities Exchange Act of 1934, 15 U.S.C. 78a *et seq.,* and 17 CFR 240.13d–101.

[18] Section 13(g) was added to the Exchange Act as part of the Domestic and Foreign Investment Improvement Disclosure Act of 1977. Public Law 95–214, sec. 203, 91. Stat. 1494.

[19] Under SEC Rule 13d–1(b)(1)(i)–(ii)(A)–(K), certain beneficial owners may file a short form statement on Schedule 13G in lieu of a 13D statement under certain conditions.

[20] 16 CFR 801.1(f)(1)(i).

A. Convertible Voting Securities (16 CFR 802.31)

The acquisition of convertible debentures (convertible into common stock), options, warrants, or preferred shares, even with no present right to vote for directors, may result in the ability to influence the business of a company. The Rules capture these kinds of stakes in the concept of a convertible voting security. ''The term convertible voting security means a voting security which presently does not entitle its owner or holder to vote for directors of any entity.'' [21] Section 802.31 exempts the acquisition of convertible voting securities.

The PNO has taken the informal position that the acquisition of convertible voting securities, when accompanied by the right to designate or appoint individuals to the board of directors of the issuer equal to the percentage of voting securities that would be held upon conversion, is reportable under the Act. The Commission is considering revising § 802.31 to explicitly require compliance with the HSR Act's reporting requirements when the acquisition of convertible voting securities is coincident with the Acquiring Person having or obtaining the right to designate or appoint any individuals to the board of the issuer. The Commission aims to understand the potential benefits and burdens of such a change through responses to the following questions:

1. Is the acquisition of convertible voting securities, when accompanied with the right of appointment or designation of individuals to the issuer's board of directors, equivalent to the acquisition of voting securities with the present right to vote for election of the issuer's board of directors? In what ways are they the same and in what ways are they different? What provisions could accompany the right to appoint that would make the acquisition the most like an acquisition of voting securities? What provisions make them different for competition purposes? Have these provisions changed since 1978? If so, how have they changed?

2. Why would an Acquiring Person choose one alternative over the other? Have the benefits of one alternative over another changed since 1978?

a. Is there a benefit of acquiring convertible voting securities while holding or obtaining the right to appoint or designate individuals to an issuer's board of directors, as compared to the acquisition of securities that have the present right to vote? If so, what is the benefit? Has the benefit changed since 1978? If so, how has it changed?

b. Under what situations does such a benefit arise? Have these situations changed since 1978? If so, how have they changed?

3. What are the reasons the Commission should or should not require a filing whenever the acquirer of convertible non-voting securities receives a right to designate one or more directors prior to conversion?

a. Should issuers that have cumulative voting be subject to the same requirements as issuers that do not have cumulative voting? Why should they be subject to different requirements? Is there a difference in how much influence an acquirer would have based on whether the issuer has cumulative voting? Why? How would the Commission be able to distinguish when it is a problem and when it is not?

4. What would be the burden associated with this possible change?

a. Would the burden fall most on an identifiable class of transactions? How would such a change affect how an identifiable class of transactions is structured?

b. Would such a change introduce significant inefficiencies into the market for corporate control? What would be the effect of that change in the market?

B. Board Observers

Another potential way to gain influence over a company, beyond the scope of acquiring voting securities, is through board observers. The Commission understands that it is becoming increasingly common for issuers and NCEs to include board observers as part of their governance structure. Issuers and NCEs often grant rights to select and appoint board observers to investors with significant equity, in addition to or in lieu of providing investors with board seats. Even though board observers lack the ability to vote on matters that come before the issuer's board, they may nevertheless have significant influence over the outcome of matters submitted to the board for approval.[22] At the very least, board observers gain insight into an issuer's strategic decision-making, which is not only useful to the investor sponsoring the board observer, but may also be useful to competitors in the market, especially when those board observers also serve as officers or directors of a competitor.[23] Companies likely benefit from interacting with board observers because company management can obtain additional investor insight without having to alter the composition or voting balance on the board.

Given the opportunities that board observers have to interact with corporate officers, directors, and other managers, and to gain access to confidential information related to strategic and operational decisions, the Commission would like to better understand the role of board observers. In particular, the Commission would like to know how investors might use board observers' rights to influence competitive decision-making of issuers and NCEs to ascertain whether the acquisition of rights that provide opportunities to wield this kind of influence should be reportable under the Act. To that end, the Commission seeks responses to the following questions:

1. What types of information are available to an issuer/NCE board observer?

a. With what frequency is a board observer invited to all meetings? Is a board observer always entitled to all info provided to board members? Is a board observer permitted to request additional information beyond what is presented at a board meeting? If so, with what frequency?

b. Are board observers subject to any restrictions on how they can use the information they obtain in their capacity as board observers? Are these restrictions based on contract, bylaws or regulations?

c. Do issuers/NCEs create formal review processes for information scheduled to be sent to a board observer? If so, with what frequency? Are outside counsel involved in monitoring compliance? If so, with what frequency?

d. Is the information scheduled to be sent to a board observer subject to a non-disclosure agreement that limits its dissemination to others, including officers and directors of competitors or investors in competitors?

e. Do issuers/NCEs draft formal guidance for their boards as to what topics should not be discussed in the presence of board observers? If so, with what frequency? Are outside counsel involved in monitoring compliance? If so, with what frequency?

2. What means does an issuer/NCE board observer have to influence board policies or the strategic or operational direction of the firm?

[21] 16 CFR 801.1(f)(2).

[22] *Obasi Investment Ltd. et al.* v. *Tibet Pharmaceuticals, Inc. et al.,* 931 F.3d 179, 183 (3d Cir. 2019).

[23] *See* Complaint, *In re Altria Group/JUUL Labs,* Dkt. 9383, ¶ 9, at *https://www.ftc.gov/system/files/documents/cases/d09393_administrative_part_iii_complaint-public_version.pdf.*

a. Does a board observer ever enjoy any special right of notice or consultation regarding major capital expenditures or strategic decisions?

b. Does a board observer have access, outside of board meetings, to managers in the corporation, to investment committee members in an NCE, or to persons with similar decision-making roles regarding the operations of the business? If so, with what frequency?

c. Do board observers have the ability to request a meeting of the issuer's/NCE's board? If so, with what frequency?

d. Do issuers/NCEs impose restrictions on a board observer's speaking role during board meetings? If so, with what frequency? How common are ''silent'' board observers?

e. How frequently do board observers move into senior executive roles at issuers/NCEs?

3. What are the parameters of the board observer role?

a. Is a board observer's relationship with the issuer/NCE always explicitly defined in a written agreement between the issuer and the investor? How common are informal board observer arrangements?

b. Are board observers (or those who sponsor their observation of board matters) covered by conflict of interest rules or black-out periods such as those that limit investments by board members?

4. Are there any protocols on selection/approval of board observers and/or processes in place to ensure that observers are not in a position to facilitate sharing of competitively sensitive information among competitors?

5. For all of the questions above, do rules or practices regarding board observer rights to obtain confidential information differ substantially between issuers and NCEs? What factors account for any such differences?

VI. Transactions or Devices for Avoidance (16 CFR 801.90)

16 CFR 801.90 provides that the Commission must disregard the structure of transactions or devices used by the parties for the purpose of avoiding the HSR Act requirements and review the substance of the transaction as a whole to determine whether an HSR filing is required. The PNO often receives questions about whether specific scenarios would be violations under § 801.90, and the PNO has occasionally offered informal staff positions on § 801.90. For instance, the PNO has an informal staff position that says if a target makes a payout prior to its acquisition in the form of an extraordinary dividend, such a payment would not trigger 16 CFR 801.90 if, as a result of the dividend, the target no longer meets the size of person test.[24] The PNO's informal staff position is based on the idea that if an extraordinary dividend reduces the target's cash on hand, it is unlikely to present a 16 CFR 801.90 issue.

But there are situations where the purpose of such a payout may be more complicated. For instance, if the payout involves more than the distribution of cash on hand, this could present an issue under 16 CFR 801.90. Each issuance of an extraordinary dividend or like payment must be carefully analyzed to make sure that it is not a device for avoidance under § 801.90. The Commission has questions about whether filing parties are engaging in this analysis or, instead, assuming that every extraordinary dividend is not a device for avoidance under § 801.90. In order to determine which are and are not devices for avoidance, the Commission would therefore like to understand the mechanisms by which targets engage in these and other kinds of practices through responses to the following questions:

1. What mechanisms do targets use to pay out extraordinary dividends and what are the reasons for such dividends?

a. Is the focus on the reduction of cash on hand or are there other motivations for issuing such dividends? If so, what are the other motivations?

b. Are there other ways of structuring extraordinary dividends? If so, what are they? If not, why not?

c. How often do targets issue extraordinary dividends in advance of being acquired? What are the reasons that targets issue such dividends?

d. Is the buyer ever involved in the target's decision to issue an extraordinary dividend in advance of an acquisition? Why or why not?

2. Do targets use mechanisms other than extraordinary dividends to reduce cash on hand?

a. If so, what are they and how are they structured? If not, why not?

b. Is the buyer involved? If yes, why and with what frequency? If not, why not?

3. What other actions should the Commission scrutinize as possible devices for avoidance?

VII. Filing Issues (16 CFR 802.21, 16 CFR Part 803 Appendix A and B)

The Commission has a strong interest in an HSR filing process and an HSR Form that garners competitively significant information to assist the Agencies in their review of transactions. To that end, the Commission intends to explore amending (a) the 16 CFR 802.21 five-year period during which a party may acquire additional voting securities without refiling, and (b) the requirement in Item 8 of the HSR Form to disclose certain prior acquisitions.

A. Acquisitions of Voting Securities That Do Not Cross the Next Threshold (16 CFR 802.21)

Under 16 CFR 802.21, filing parties have five years from the end of the waiting period to acquire additional voting securities without making another filing, as long as the additional acquisitions do not exceed the next threshold. For instance, Party A files to cross the $100 million threshold (as adjusted) on January 1 and receives early termination on January 20, which ends the waiting period. Party A then has five years from January 20 to continue to acquire voting securities of the same issuer up to the next threshold, in this case $500 million (as adjusted), as long as it crosses the $100 million threshold (as adjusted) within one year.

The time period in proposed § 802.21 was 180 days, but numerous comments persuaded the Commission this time period was too short.[25] In the final rules, the Commission chose a period of five years, both as a result of these comments and because it made sense to correlate the timing of the exemption with the timing of the Census and resulting updated data.[26] Given the changes in worldwide economic activity since 1978, Commission is now concerned that the § 802.21 five-year period may be too long. At the time of the initial filing, the transaction may not present competition concerns, but such concerns could develop as a result of changes in the lines of business of the Acquiring Person and Acquired Person during the five-year period, but those changes would not require a new filing. As a result, the Commission seeks to understand the impact of shortening the § 802.21 five-year period through responses to the following questions:

1. Have there been changes in economic activity significant enough to raise concerns that the Commission may miss important competitive effects if it does not shorten the five-year term?

2. If there are reasons to believe that the § 802.21 five-year period is too long, what period would address concerns that additional acquisitions of the Acquired Entity present competitive

[24] Am. Bar Ass'n., Premerger Notification Practice Manual, Interpretation 96 (5th ed.).

[25] 43 FR 33450, 33493 (July 31, 1978).

[26] *Id.*

concerns because the lines of business of the Acquiring Person and/or Acquired Person have changed? Why would another period be more appropriate?

3. Is there is a class of Acquiring Persons for whom the decrease in the exemption period would cause significant burden? If not, why not? If so, how?

B. Prior Acquisitions

When the Acquiring Person and the Acquired Person report in the same or ''overlapping'' NAICS revenue code in Item 5 of the HSR Form, the Acquiring Person must report certain prior acquisitions in Item 8: (1) The acquisition of 50% or more of the voting securities of an issuer or 50% or more of non-corporate interests of an unincorporated entity (subject to $10 million limitation) and (2) any acquisition of assets valued at or above the statutory size-of-transaction test at the time of their acquisition. Item 8 limits the Acquiring Person's disclosure to those acquisitions within the overlapping NAICS code over the last five years.

The Commission is concerned that Item 8 does not capture all competitively significant acquisitions. There are several reasons why this might be the case. For instance, the Acquiring Person does not have to disclose prior acquisitions when it and the Acquired Person report revenue in different NAICS codes. Nevertheless, overlapping NAICS codes are imperfect predictors of whether the acquisition presents competitive concerns that need review. For instance, an Acquiring Person is not subject to the disclosure requirement if a prior acquisition involved a potential competitor with no revenue in an overlapping NAICS code at the time of the acquisition. Similarly, an Acquiring Person need not disclose a prior acquisition that involved a vertical relationship when companies at different levels of the distribution chain report in different NAICS codes. As a result, the Commission is considering eliminating the overlapping NAICS code limitation in Item 8 so that the Acquiring Person would have to list all its acquisitions of 50% or more of the voting securities of an issuer or 50% or more of non-corporate interests of an unincorporated entity (subject to the $10 million limitation) and any acquisition of assets valued at or above the statutory size-of-transaction test at the time of their acquisition in the five years prior to filing. The Commission seeks comment on this potential change through responses to the following questions:

1. What would be the benefit or burden associated with this possible change? Are there any classes of transactions for which the benefit or burden would be greater? If there are classes of transactions for which the benefit is greater, why is the benefit greater? If there are classes of transactions for which the burden is greater, why is the burden greater?

2. Is there any way to distinguish prior acquisitions that might have competitive significance from those that do not, such that the Commission would not need to require a list of all prior acquisitions?

In addition to the topics outlined above, commenters are welcome to provide input on any other HSR Rule. As part of that input, identify the changes in investor behavior or competitive dynamics that would justify a change in the Commission's current approach.

By direction of the Commission.

April Tabor,

Acting Secretary.

Statement of Commissioner Rohit Chopra

September 21, 2020.

Summary

- Premerger notification is a critical data source, but the Commission faces enormous information gaps when seeking to detect and halt anticompetitive transactions.
- While the proposed rule closes a loophole when it comes to investment manager holdings, the proposed approach to exempt a wide swath of minority stakes is concerning and adds to existing information gaps.
- The Commission needs to update the treatment of certain debt transactions when determining deal size for the purpose of premerger notification. The current approach allows dealmakers to structure anticompetitive transactions in ways that can go unreported.

In September 1976, Congress gave the Federal Trade Commission an important tool enabling it to block harmful mergers. The Hart-Scott-Rodino Antitrust Improvements Act of 1976 (''HSR Act'') requires prior notification to the antitrust agencies in advance of closing certain mergers and acquisitions.[1]

Prior to the HSR Act's enactment, companies could quickly ''scramble the eggs'' of assets and operations, or even shut down functions. This made it extremely difficult for the antitrust agencies to remedy competitive harms through divestitures of assets. Years of protracted litigation to stop further damage and distortions were often the result.[2]

The HSR Act fundamentally changed the process of merger review by giving the antitrust agencies time to halt anticompetitive transactions before these deals closed. Today, the FTC focuses a substantial portion of its competition mission on investigating and challenging mergers reported under the HSR Act. Importantly, only a small set of transactions—the ones with the highest valuations—are subject to premerger notification. The HSR Act specifies the valuation threshold, currently set at $94 million, which is typically adjusted upward each year. Since there are many ways to determine a deal's valuation, Congress gave the FTC broad authority to implement rules so that buyers know if they need to report their transactions and what they are required to submit with their filing. The Commission can also exempt classes of transactions and tailor filing requirements.

While premerger notification filings provide the Commission with certain nonpublic information,[3] gathering and analyzing market intelligence on transaction activity and competitive dynamics is a major challenge. We need to continuously assess how we can enhance our market monitoring techniques and evolve our analytical approaches.

Today, the Commission is soliciting comment on two rulemakings regarding our policies to implement the HSR Act's premerger notification protocols. The first publication, a Notice of Proposed Rulemaking, proposes specific rules and exemptions. While some of the proposals are helpful improvements, I respectfully disagree with our approach to exempting a broad swath of transactions from reporting. The second publication, an Advance Notice of Proposed Rulemaking, requests comment on a broad range of topics to set the stage for modernizing the premerger notification program to align with market realities. I support soliciting input to rethink our approach. I discuss each of these rulemakings below.

Notice of Proposed Rulemaking

The Notice of Proposed Rulemaking outlines specific amendments that the Commission is proposing to the HSR rules. The aggregation and exemption provisions are particularly noteworthy. The aggregation provisions are worthwhile, since they close a loophole and align with market realities. However, I am concerned about the exemption provisions, since we will completely lose visibility into a large set of transactions involving non-controlling stakes.

Aggregation Provisions

The financial services industry is well known for using an alphabet soup of small entities, like shell companies, partnerships, and other investment vehicles, to structure deals. Even though they may be under common management by the same person or group, like a private equity fund or a hedge fund, these smaller legal entities are all treated separately under the existing rules.

The proposed aggregation provisions will help to prevent acquirers from splitting up

[1] Clayton Act section 7A, 15 U.S.C. 18a.

[2] For example, in *United States* v. *El Paso Natural Gas Co.,* 376 U.S. 651 (1964), it took seventeen years of litigation before a divestiture finally took place.

[3] I agree with Commissioner Slaughter that current filing requirements, including for minority stakes, can have the beneficial effect of deterring certain anticompetitive transactions.

transactions into small slices across multiple investment vehicles under their control to avoid reporting. The proposal would require investors and other buyers to add together their stakes across commonly managed funds to determine whether they need to report a transaction.

Exemption Provisions

By creating a reporting threshold based on the value of a transaction, the law already exempts most transactions from agency review. Because of this, it is difficult to systematically track these transactions, and even harder to detect and deter those that are anticompetitive.

Now, the FTC is proposing to widen that information gap by creating a new exemption for minority stakes of 10% or less, subject to certain conditions. Importantly, the proposal is not exempting specific aspects of the reporting requirements—it is a total exemption, so the agency will receive no information whatsoever from the buyer or the seller that the transaction even occurred. This adds to the burdens and information asymmetries that the agency already faces when it comes to detecting potentially harmful transactions.[4]

Companies and investors purchase minority, non-controlling stakes in a firm for a number of reasons. Sometimes, buyers might start with a minority stake, with the goal—or even with a contractual option—of an outright takeover as they learn more about the company's operations. Even though they might have a small stake, they can exert outsized control. In other cases, buyers might look for minority stakes in multiple, competing firms within a sector or industry, and some or all of these acquisitions may fall below the reporting thresholds. Of course, if they are able to obtain seats on boards of directors of competing companies, this can be illegal.

Investors and buyers can only use the proposed exemption if they do not currently own stakes in firms that compete or do business with the company they plan to acquire. Since many investors might not know about the specific business dealings across companies, this may be difficult to enforce and puts more burden on the agency.

Even if one believes that transactions involving a minority stake are less likely to be illegal, there are many potential alternatives to outright elimination of reporting. Unfortunately, the rulemaking does not outline alternative approaches (such as tailored, simplified filing requirements or shortened waiting periods) for minority stakes.

Advance Notice of Proposed Rulemaking

As markets evolve, it is important that the HSR Act and its implementing rules reflect those developments. The Advance Notice of Proposed Rulemaking seeks input on a wide array of market-based issues that may affect the Commission's merger oversight. One topic of particular interest is whether to include debt as part of the valuation of a transaction. Since the HSR Act's passage, corporate debt markets have grown in importance for companies competing in developed economies. Many major deals involve vast sums of borrowed money.

However, the Commission has not formally codified a view on the treatment of certain debt transactions. Instead, existing staff guidance excludes many debt transactions from the deal's overall value. This is worrisome, since it means that many potentially anticompetitive transactions can go unreported, since they may fall below the size threshold. In addition, this view has been provided informally, communicated through unofficial interpretations outside of formal rules or guidance. It will be important to take steps to collect input and codify the Commission's policies on valuation, particularly with respect to the treatment of debt, since formal guidance or rules will offer clarity and will be easier to enforce.

The Advance Notice of Proposed Rulemaking also seeks information that will lay groundwork for broader reforms to our premerger notification program. I look forward to the data and written submissions to this document.

Conclusion

Adequate premerger reporting is a helpful tool used to halt anticompetitive transactions before too much damage is done. However, the usefulness of the HSR Act only goes so far. This is because many deals can quietly close without any notification and reporting, since only transactions above a certain size are reportable.[5] The FTC ends up missing a large number of anticompetitive mergers every year. In addition, since amendments to the HSR Act in 2000 raised the size thresholds on an annual basis, the number of HSR-reportable transactions has *decreased.*

I want to commend agency staff for their work in identifying potential blind spots in the premerger reporting regime. I also want to thank state legislatures and state attorneys general for enacting and implementing their own premerger notification laws to fill in some of these gaps. For example, a new law in State of Washington has taken effect, which requires advance notice of any transactions in the health care sector, where many problematic mergers fall below the radar.[6]

As we conduct this examination of the HSR Act, we should identify areas where laws may need to be changed or updated, especially when we cannot fill those gaps through amendments to our rules. For example, we may need to pursue reforms to ensure that ''roll ups'' are reported, where a buyer might acquire a large number of small companies that may not be individually reportable. We may also need to look carefully at the length of the waiting period, to determine if it is long enough to conduct a thorough investigation. I look forward to reviewing the input to these two rulemakings, so that our approach reflects market realities.

BILLING CODE 6750–01–P

[4] The FTC may not be able to rely on other sources of robust data required by other agencies. For example, the Securities and Exchange Commission has proposed eliminating reporting for thousands of registered investment funds that previously detailed their holdings to the public. See Statement of SEC Comm'r Allison Herren Lee Regarding Proposal to Substantially Reduce 13F Reporting (July 10, 2020), *https://www.sec.gov/news/public-statement/lee-13f-reporting-2020-07-10.*

[5] Small transactions can be just as harmful to competition as large transactions notified under the HSR Act. For example, ''catch and kill'' acquisitions of an upstart competitor in fast-moving markets can be particularly destructive. In addition, ''roll-ups,'' an acquisition strategy involving a series of acquisitions of small players to combine into a larger one, can have very significant negative effects on competition. *See* Statement of Fed. Trade Comm'r Rohit Chopra Regarding Private Equity Roll-ups and the Hart-Scott Rodino Annual Report to Congress, Comm'n File No. P110014 (July 8, 2020), *https://www.ftc.gov/system/files/documents/public_statements/1577783/p110014hsrannualreportchoprastatement.pdf.*

FEDERAL TRADE COMMISSION

16 CFR Parts 801, 802 and 803

RIN 3084–AB46

Premerger Notification; Reporting and Waiting Period Requirements

AGENCY: Federal Trade Commission.

ACTION: Notice of proposed rulemaking.

SUMMARY: The Federal Trade Commission (''FTC'' or ''Commission'') is proposing amendments to the premerger notification rules (''the Rules'') that implement the Hart-Scott-Rodino Antitrust Improvements Act (''the Act'' or ''HSR'') to change the definition of ''person'' and create a new exemption. The Commission also proposes explanatory and ministerial changes to the Rules, as well as necessary amendments to the HSR Form and Instructions to effect the proposed changes.

DATES: Comments must be received on or before February 1, 2021.

ADDRESSES: Interested parties may file a comment online or on paper by following the instructions in the Invitation to Comment part of the **SUPPLEMENTARY INFORMATION** section below. Write ''16 CFR parts 801–803: Hart-Scott-Rodino Coverage, Exemption, and Transmittal Rules; Project No. P110014'' on your comment. File your comment online at *https://www.regulations.gov* by following the instructions on the web-based form. If you prefer to file your comment on paper, mail your comment to the following address: Federal Trade Commission, Office of the Secretary, 600 Pennsylvania Avenue NW, Suite CC–5610 (Annex J), Washington, DC 20580, or deliver your comment to the

FEDERAL REGISTER

Vol. 88 Thursday,
No. 124 June 29, 2023

Pages 42015–42226

OFFICE OF THE FEDERAL REGISTER

The **FEDERAL REGISTER** (ISSN 0097–6326) is published daily, Monday through Friday, except official holidays, by the Office of the Federal Register, National Archives and Records Administration, under the Federal Register Act (44 U.S.C. Ch. 15) and the regulations of the Administrative Committee of the Federal Register (1 CFR Ch. I). The Superintendent of Documents, U.S. Government Publishing Office, is the exclusive distributor of the official edition. Periodicals postage is paid at Washington, DC.

The **FEDERAL REGISTER** provides a uniform system for making available to the public regulations and legal notices issued by Federal agencies. These include Presidential proclamations and Executive Orders, Federal agency documents having general applicability and legal effect, documents required to be published by act of Congress, and other Federal agency documents of public interest.

Documents are on file for public inspection in the Office of the Federal Register the day before they are published, unless the issuing agency requests earlier filing. For a list of documents currently on file for public inspection, see *www.federalregister.gov.*

The seal of the National Archives and Records Administration authenticates the Federal Register as the official serial publication established under the Federal Register Act. Under 44 U.S.C. 1507, the contents of the **Federal Register** shall be judicially noticed.

The **Federal Register** is published in paper and on 24x microfiche. It is also available online at no charge at *www.govinfo.gov*, a service of the U.S. Government Publishing Office.

The online edition of the **Federal Register** is issued under the authority of the Administrative Committee of the Federal Register as the official legal equivalent of the paper and microfiche editions (44 U.S.C. 4101 and 1 CFR 5.10). It is updated by 6:00 a.m. each day the **Federal Register** is published and includes both text and graphics from Volume 1, 1 (March 14, 1936) forward. For more information, contact the GPO Customer Contact Center, U.S. Government Publishing Office. Phone 202-512-1800 or 866-512-1800 (toll free). E-mail, *gpocusthelp.com.*

The annual subscription price for the **Federal Register** paper edition is $860 plus postage, or $929, for a combined **Federal Register, Federal Register** Index and List of CFR Sections Affected (LSA) subscription; the microfiche edition of the **Federal Register** including the **Federal Register** Index and LSA is $330, plus postage. Six month subscriptions are available for one-half the annual rate. The prevailing postal rates will be applied to orders according to the delivery method requested. The price of a single copy of the daily **Federal Register,** including postage, is based on the number of pages: $11 for an issue containing less than 200 pages; $22 for an issue containing 200 to 400 pages; and $33 for an issue containing more than 400 pages. Single issues of the microfiche edition may be purchased for $3 per copy, including postage. Remit check or money order, made payable to the Superintendent of Documents, or charge to your GPO Deposit Account, VISA, MasterCard, American Express, or Discover. Mail to: U.S. Government Publishing Office—New Orders, P.O. Box 979050, St. Louis, MO 63197-9000; or call toll free 1-866-512-1800, DC area 202-512-1800; or go to the U.S. Government Online Bookstore site, see *bookstore.gpo.gov.*

There are no restrictions on the republication of material appearing in the **Federal Register.**

How To Cite This Publication: Use the volume number and the page number. Example: 88 FR 12345.

Postmaster: Send address changes to the Superintendent of Documents, Federal Register, U.S. Government Publishing Office, Washington, DC 20402, along with the entire mailing label from the last issue received.

Rules and Regulations

Federal Register
Vol. 88, No. 124
Thursday, June 29, 2023

This section of the FEDERAL REGISTER contains regulatory documents having general applicability and legal effect, most of which are keyed to and codified in the Code of Federal Regulations, which is published under 50 titles pursuant to 44 U.S.C. 1510.

The Code of Federal Regulations is sold by the Superintendent of Documents.

DEPARTMENT OF AGRICULTURE

Federal Crop Insurance Corporation

7 CFR Parts 400, 407, and 457

[Docket ID FCIC–23–0004]

RIN 0563–AC83

Actual Production History (APH) and Other Crop Insurance Transparency

AGENCY: Federal Crop Insurance Corporation, U.S. Department of Agriculture (USDA).

ACTION: Final rule with request for comments.

SUMMARY: The Federal Crop Insurance Corporation (FCIC) is amending its regulations to incorporate existing actual production history (APH) requirements into the policy to enhance and improve accessibility, clarity, and transparency for the producer. FCIC is also incorporating existing same year production reporting (SYPR) rules into the policy, clarifying prevented planting rules, incorporating the High-Risk Alternate Coverage Endorsement (HR–ACE) into the policy, clarifying double cropping requirements when another plan of insurance does not require records of acreage and production, and updating organic provisions. In this rule, FCIC is authorizing the availability of enterprise units (EU) and whole farm units (WFU) to be designated in the actuarial documents. The changes to the crop insurance policies resulting from the amendments in this rule are applicable for the 2024 and succeeding crop years for crops with a contract change date on or after June 30, 2023. For all other crops, the changes to the policies made in this rule are applicable for the 2025 and succeeding crop years.

DATES:

Effective date: This final rule is effective June 30, 2023.

Comment date: We will consider comments that we receive by the close of business August 28, 2023. FCIC may consider the comments received and may conduct additional rulemaking based on the comments.

ADDRESSES: We invite you to submit comments on this rule. You may submit comments by going through the Federal eRulemaking Portal as follows:

- *Federal eRulemaking Portal:* Go to *https://www.regulations.gov* and search for Docket ID FCIC–23–0004. Follow the instructions for submitting comments.

All comments will be posted without change and will be publicly available on *www.regulations.gov*.

FOR FURTHER INFORMATION CONTACT: Francie Tolle; telephone (816) 926–7829; or email *francie.tolle@usda.gov.* Persons with disabilities who require alternative means for communication should contact the USDA Target Center at (202) 720–2600 (voice) or (844) 433–2774 (toll-free nationwide).

SUPPLEMENTARY INFORMATION:

Background

FCIC serves America's agricultural producers through effective, market-based risk management tools to strengthen the economic stability of agricultural producers and rural communities. FCIC is committed to increasing the availability and effectiveness of Federal crop insurance as a risk management tool. Approved Insurance Providers (AIPs) sell and service Federal crop insurance policies in every state through a public-private partnership. FCIC reinsures the AIPs who share the risks associated with catastrophic losses due to major weather events. FCIC's vision is to secure the future of agriculture by providing world class risk management tools to rural America.

Federal crop insurance policies typically consist of the Basic Provisions, the Crop Provisions, the Special Provisions, the Commodity Exchange Price Provisions, if applicable, other applicable endorsements or options, the actuarial documents for the insured agricultural commodity, the Catastrophic Risk Protection Endorsement, if applicable, and the applicable regulations published in 7 CFR chapter IV. Throughout this rule, the terms ''Crop Provisions,'' ''Special Provisions,'' and ''policy'' are used as defined in the Common Crop Insurance Policy (CCIP) Basic Provisions in 7 CFR 457.8. Additional information and definitions related to Federal crop insurance policies are in 7 CFR 457.8.

In this rule, FCIC amends the Area Risk Protection Insurance (ARPI) Basic Provisions (7 CFR part 407), CCIP Basic Provisions (7 CFR 457.8), and the General Administrative Regulations in subpart G of part 400 (Actual Production History) (7 CFR 400.51 through 400.56). The changes made in this rule are applicable for the 2024 and succeeding crop years for crops with a contract change date on or after June 30, 2023. For all other crops, the changes to the policy made in this rule are applicable for the 2025 and succeeding crop years.

Actual Production History (APH)

FCIC will add guidelines for establishing a producer's approved yield to section 5 of the CCIP Basic Provisions. The approved yield is the basis for establishing liability, premium, guarantee, and indemnity for yield-based crop insurance plans. The intended effect of this action is to incorporate existing regulatory language, located at 7 CFR part 400 (subpart G) and procedural language, located in the FCIC–18010 Crop Insurance Handbook (CIH), regarding the APH requirements, into the policy to enhance and improve accessibility, clarity, and transparency for the producer. Subpart G is revised to indicate its applicability expires as this rule becomes effective in the CCIP Basic Provisions. Specifically, as each crop's contract change date passes, the APH rules in subpart G expire at the same time the APH rules in the CCIP Basic Provisions become effective. Subpart G will be removed and reserved at a future date, once all applicable contract change dates have lapsed, and the language is obsolete.

FCIC is adding several new definitions to section 1 of the CCIP Basic Provisions that were previously defined in subpart G or the CIH related to APH rules: ''annual yield,'' ''APH base period,'' ''APH crop year,'' ''APH database,'' ''applicable T-Yield,'' ''appraised production,'' ''approved yield,'' ''assigned yield,'' ''average yield,'' ''continuous production reports,'' ''determined yield,'' ''insurable acres,'' ''master yield,'' ''new insured,'' ''new producer,'' ''production reporting date,'' ''temporary yield,''

''transitional yield (T-Yield),'' and ''variable T-Yield.''

FCIC is inserting the APH provisions into section 5 of the CCIP Basic Provisions and renamed the section ''APH Database and Approved Yield Calculation.'' This section had previously been reserved without a heading.

The new definitions in section 1 and new provisions in section 5 are intended to ensure clarity with the APH rules and do not change any APH calculations or determinations in the policy.

FCIC is incorporating changes into section 5(b)(1)(ii) of the CCIP Basic Provisions, previously incorporated in 2017 through procedures, to exclude acreage and the actual production from acreage that is damaged by an unavoidable uninsured fire and/or a third party when calculating the approved APH yield and production guarantee that does not penalize a producer's future insurance coverage due to a loss through no fault of their own. FCIC is adding a definition for ''unavoidable uninsured fire'' to section 1 of the CCIP Basic Provisions that was previously contained in procedures.

Prevented Planting

FCIC is revising the prevented planting provisions in section 17 of the CCIP Basic Provisions. Prevented planting is a feature of many crop insurance plans that provides a partial payment to cover certain pre-plant costs for a crop that was prevented from being planted due to an insurable cause of loss.

FCIC is clarifying that the added land ratio for prevented planting in section 17(e)(1)(i)(B), uses cropland acres available for planting only. The number of prevented planting eligible acres for a crop may be increased by multiplying that number by the ratio of the total cropland acres available for planting that the producer is farming in the current crop year (if greater) to the total cropland acres available for planting that the producer farmed in the previous year. Previously, the policy did not specify, as originally intended, that only cropland acres available for planting are included in the calculation to create the added land ratio. For example, if a producer had 500 acres of cropland available for planting in 2021, then added 200 acres in 2022, but only 100 of those were available for planting, then only 100 could be used in the calculation for the added land ratio in 2022 (added land ratio = 600 ÷ 500 = 1.2).

FCIC is clarifying the eligible criteria for prevented planting coverage in sections 17(d)(1), 17(d)(1)(ii)(B), and 17(d)(2) to include destruction of a producer's irrigation system from an insured cause of loss. Previously, prevented planting coverage was only available when an insured cause of loss occurred resulting in failure or breakdown of a producer's irrigation system. There have been cases where a naturally occurring weather event caused the irrigation system to be destroyed rather than failed or broken down. Adding ''destruction'' clarifies the intent of the provision so that producers do not lose valuable prevented planting coverage.

FCIC is incorporating Final Agency Determinations (FAD), FAD–244, FAD–248, and FAD–309, and Manager's Bulletin MGR–20–003 into section 17(f)(12) of the CCIP Basic Provisions. These FADs and Manager's Bulletin collectively clarified the intent of the policy, with respect to the factors AIPs may consider when determining whether a cause of loss that may prevent planting existed at the time the insured took possession of the added land. Incorporating the FADs and Manager's Bulletin will ensure transparency and consistent administration of the prevented planting rules by AIPs. The revisions do not change any prevented planting requirements in the policy.

Same Year Production Reporting (SYPR)

FCIC is incorporating existing production reporting guidelines in sections 3(f) and 3(g) of the CCIP Basic Provisions to reflect same year production reporting guidelines that were previously spread across Special Provisions statements, applicable Crop Provisions language, and procedural language, located in the FCIC–18010 CIH. This change will enhance and improve accessibility, clarity, and transparency for the producer.

FCIC is adding several new definitions to section 1 of the CCIP Basic Provisions that were previously defined in the Special Provisions, Crop Provisions, or procedures regarding production reporting: ''insured's production reporting date,'' and ''lag year.'' FCIC is also clarifying the definition of ''production report'' in the CCIP Basic Provisions to refer to reporting rules in section 3 and add consistency with the new definitions and provisions added for same year production reporting. Consistent with these changes, FCIC is also adding a new definition of ''actual production'' and clarifying the definition of ''production report'' in section 1 of the ARPI Basic Provisions.

The new and revised definitions in section 1 and added provisions in section 3(f) are intended to ensure clarity and transparency on production reporting and do not change any production reporting requirements in the policy.

Double Cropping

FCIC is clarifying the double cropping requirements in section 15(h) of the CCIP Basic Provisions and section 13(c) of the ARPI Basic Provisions when another plan of insurance (*i.e.,* under a different Basic Provisions) does not require records of acreage and production to determine if a producer can receive a full indemnity on both crops. This change incorporates FAD–301 which explains if a producer double cropped acreage for which one of the crops double cropped is insured under a different plan of insurance and the Crop Provisions do not require double crop history that includes records of acreage and production, the less restrictive requirements may be followed to satisfy double cropping requirements for both crops. For example, a producer has 20 acres of annual forage wheat for grazing. On the same acreage the producer plants and insures cotton, the annual forage double cropping requirements must be met. If those Crop Provisions are met, the producer is eligible for a full indemnity payment on both the annual forage wheat and the cotton.

Incorporating FAD–301 will ensure transparency and consistent administration of double cropping rules by AIPs. The revisions do not change double cropping rules in the policy.

High-Risk Alternate Coverage

FCIC is incorporating the HR–ACE into section 3(b) of the CCIP Basic Provisions. On May 19, 2022, the FCIC Board of Directors approved converting HR–ACE from pilot to permanent status. To streamline the policy the producer receives, HR–ACE, and all other high-risk coverage options, will be consolidated and incorporated into section 3(b)(2)(ii) of the CCIP Basic Provisions. The HR–ACE document will be obsoleted from the Risk Management Agency's (RMA's) website upon publication of this rule. References to high-risk options will be revised throughout the CCIP Basic Provisions to refer to section 3(b)(2)(ii).

Enterprise Units and Whole Farm Units

FCIC is authorizing enterprise units (EU) and whole farm units (WFU) to be expanded to other crops through the actuarial documents, in section 34(a) of the CCIP Basic Provisions. Previously,

EUs and WFUs were allowed for the revenue protection plan of insurance or authorized through the Special Provisions. FCIC is allowing the actuarial documents to authorize the availability of EUs and WFUs for administrative efficiency, eliminating the need to add a Special Provision statement every time EUs or WFUs are added to a new crop not under a revenue protection plan of insurance. FCIC is simplifying section 34(a) by removing paragraphs that previously referred to revenue protection, renumbering subsequent paragraphs, and updating internal citations corresponding to the new paragraph numbers.

Organic and Transitioning to Organic

The Agriculture Marketing Service (AMS) National Organic Program (NOP) published a final rule on January 19, 2023, National Organic Program (NOP); Strengthening Organic Enforcement (88 FR 3548), announcing certain changes to the Organic Integrity Database. In accordance with those changes, FCIC is updating corresponding provisions in section 37(c) of the CCIP Basic Provisions and section 14(d) of the ARPI Basic Provisions. For example, in this rule, operations listed in the Organic Integrity Database as transitioning to organic will be eligible for organic transitional crop insurance programs. The database is operated by the NOP and is a registry of certified organic operations that holds data provided by USDA-accredited organic certifiers. The NOP is modifying the system to allow certifiers to upload listings of operations that are transitioning to organic (or transitional operations) if they meet certain criteria. FCIC is enhancing organic crop insurance programs by adding ease of program administration for AIPs to verify if an operation is transitioning to organic based on the NOP database.

FCIC is also revising the term ''organic plan'' to ''organic system plan'' throughout the CCIP Basic Provisions to match the AMS NOP regulation.

Clarifications and Corrections

In addition to the changes above, the rule will:

- Add ''Space Force'' to the definition of ''Veteran farmer and rancher'' in the ARPI Basic Provisions and CCIP Basic Provisions;
- Make the term ''attorney's fees'' possessive when applicable in the ARPI Basic Provisions and CCIP Basic Provisions;
- Correct the term ''entity'' to the defined term ''person'' when applicable in the ARPI Basic Provisions and CCIP Basic Provisions;
- Correct the reference to 4 CFR part 102 in section 24(c)(4) of the CCIP Basic Provisions (FCIC Policies) and section 22(c)(4) of the ARPI Basic Provisions (FCIC Policies) to refer to 31 CFR part 901;
- Correct the term ''Actuarial Tables'' to the defined term ''actuarial documents'' in subpart G;
- Correct the location of certain dates from the ''actuarial documents'' to the ''Special Provisions'' where applicable, throughout the ARPI Basic Provisions; and
- Incorporate editorial changes. For example, change all instances of the term ''database'' (where applicable) to ''APH database'' for consistency and remove unnecessary words from parenthetical phrases *e.g.,* remove ''the'' from (see the definition of ''second crop'').

Effective Date, Notice and Comment, and Exemptions

The Administrative Procedure Act (APA, 5 U.S.C. 553) provides that the notice and comment and 30-day delay in the effective date provisions do not apply when the rule involves specified actions, including matters relating to contracts. This rule governs contracts for crop insurance policies and therefore falls within that exemption. Although not required by APA or any other law, FCIC has chosen to request comments on this rule.

This rule is exempt from the regulatory analysis requirements of the Regulatory Flexibility Act (5 U.S.C. 601–612), as amended by the Small Business Regulatory Enforcement Fairness Act of 1996.

For major rules, the Congressional Review Act requires a delay of the effective date of 60 days after publication to allow for Congressional review. This rule is not a major rule under the Congressional Review Act, as defined by 5 U.S.C. 804(2). Therefore, this final rule is effective on June 30, 2023.

Executive Orders 12866 and 13563

Executive Order 12866, ''Regulatory Planning and Review,'' and Executive Order 13563, ''Improving Regulation and Regulatory Review,'' direct agencies to assess all costs and benefits of available regulatory alternatives and, if regulation is necessary, to select regulatory approaches that maximize net benefits (including potential economic, environmental, public health and safety effects, distributive impacts, and equity). Executive Order 13563 emphasizes the importance of quantifying both costs and benefits, of reducing costs, of harmonizing rules, and of promoting flexibility. The requirements in Executive Orders 12866 and 13563 for the analysis of costs and benefits apply to rules that are determined to be significant or economically significant.

The Office of Management and Budget (OMB) has designated this rule as not significant under Executive Order 12866. Therefore, OMB has not reviewed this rule and analysis of the costs and benefits is not required under either Executive Order 12866 or Executive Order 13563.

Clarity of the Regulation

Executive Order 12866, as supplemented by Executive Order 13563, requires each agency to write all rules in plain language. In addition to your substantive comments on this rule, we invite your comments on how to make the rule easier to understand. For example:

- Are the requirements in the rule clearly stated? Are the scope and intent of the rule clear?
- Does the rule contain technical language or jargon that is not clear?
- Is the material logically organized?
- Would changing the grouping or order of sections or adding headings make the rule easier to understand?
- Could we improve clarity by adding tables, lists, or diagrams?
- Would more, but shorter, sections be better? Are there specific sections that are too long or confusing?
- What else could we do to make the rule easier to understand?

Environmental Review

In general, the environmental impacts of rules are to be considered in a manner consistent with the provisions of the National Environmental Policy Act (NEPA, 42 U.S.C. 4321–4347) and the regulations of the Council on Environmental Quality (40 CFR parts 1500 through 1508). FCIC conducts programs and activities that have been determined to have no individual or cumulative effect on the human environment. As specified in 7 CFR 1b.4, FCIC is categorically excluded from the preparation of an Environmental Analysis or Environmental Impact Statement unless the FCIC Manager (agency head) determines that an action may have a significant environmental effect. The FCIC Manager has determined this rule will not have a significant environmental effect. Therefore, FCIC will not prepare an environmental assessment or environmental impact statement for this action and this rule

serves as documentation of the programmatic environmental compliance decision.

Executive Order 12988

This rule has been reviewed under Executive Order 12988, ''Civil Justice Reform.'' This rule will not preempt State or local laws, regulations, or policies unless they represent an irreconcilable conflict with this rule. Before any judicial actions may be brought regarding the provisions of this rule, the administrative appeal provisions of 7 CFR part 11 are to be exhausted.

Executive Order 13175

This rule has been reviewed in accordance with the requirements of Executive Order 13175, ''Consultation and Coordination with Indian Tribal Governments.'' Executive Order 13175 requires Federal agencies to consult and coordinate with Tribes on a government-to-government basis on policies that have Tribal implications, including regulations, legislative comments or proposed legislation, and other policy statements or actions that have substantial direct effects on one or more Indian Tribes, on the relationship between the Federal Government and Indian Tribes or on the distribution of power and responsibilities between the Federal Government and Indian Tribes.

RMA has assessed the impact of this rule on Indian Tribes and determined that this rule does not, to our knowledge, have Tribal implications that require Tribal consultation under E.O. 13175. The regulation changes do not have Tribal implications that preempt Tribal law and are not expected have a substantial direct effect on one or more Indian Tribes. If a Tribe requests consultation, RMA will work with the USDA Office of Tribal Relations to ensure meaningful consultation is provided where changes, additions and modifications identified in this rule are not expressly mandated by Congress.

The Unfunded Mandates Reform Act of 1995

Title II of the Unfunded Mandates Reform Act of 1995 (UMRA, Pub. L. 104–4) requires Federal agencies to assess the effects of their regulatory actions of State, local, and Tribal governments, or the private sector. Agencies generally must prepare a written statement, including cost benefits analysis, for proposed and final rules with Federal mandates that may result in expenditures of $100 million or more in any 1 year for State, local, or Tribal governments, in the aggregate, or to the private sector. UMRA generally requires agencies to consider alternatives and adopt the more cost effective or least burdensome alternative that achieves the objectives of the rule. This rule contains no Federal mandates, as defined in Title II of UMRA, for State, local, and Tribal governments, or the private sector. Therefore, this rule is not subject to the requirements of sections 202 and 205 of UMRA.

Federal Assistance Program

The title and number of the Assistance Listing,[1] to which this rule applies is No. 10.450—Crop Insurance.

Paperwork Reduction Act of 1995

The purpose of the Paperwork Reduction Act of 1995 (44 U.S.C. chapter 35, subchapter I), among other things, are to minimize the paperwork burden on individuals, and to require Federal agencies to request and receive approval from the Office of Management and Budget (OMB) prior to collecting information from ten or more persons. This rule does not change the information collection approved by OMB under control numbers 0563–0053.

USDA Non-Discrimination Policy

In accordance with Federal civil rights law and USDA civil rights regulations and policies, USDA, its Agencies, offices, and employees, and institutions participating in or administering USDA programs are prohibited from discriminating based on race, color, national origin, religion, sex, gender identity (including gender expression), sexual orientation, disability, age, marital status, family or parental status, income derived from a public assistance program, political beliefs, or reprisal or retaliation for prior civil rights activity, in any program or activity conducted or funded by USDA (not all bases apply to all programs). Remedies and complaint filing deadlines vary by program or incident.

Individuals who require alternative means of communication for program information (for example, braille, large print, audiotape, American Sign Language, etc.) should contact the responsible Agency or USDA TARGET Center at (202) 720–2600 (voice and text telephone (TTY)) or dial 711 for Telecommunications Relay Service (both voice and text telephone users can initiate this call from any telephone). Additionally, program information may be made available in languages other than English.

To file a program discrimination complaint, complete the USDA Program Discrimination Complaint Form, AD–3027, found online at *https://www.usda.gov/oascr/how-to-file-a-program-discrimination-complaint* and at any USDA office or write a letter addressed to USDA and provide in the letter all the information requested in the form. To request a copy of the complaint form, call (866) 632–9992. Submit your completed form or letter to USDA by mail to: U.S. Department of Agriculture, Office of the Assistant Secretary for Civil Rights, 1400 Independence Avenue SW, Washington, DC 20250–9410 or email: *OAC@usda.gov*.

USDA is an equal opportunity provider, employer, and lender.

List of Subjects

7 CFR Part 400

Acreage allotments, Administrative practice and procedure, Claims, Crop insurance, Drug traffic control, Fraud, Government employees, Income taxes, Intergovernmental relations, Penalties, Reporting and recordkeeping requirements, Wages.

7 CFR Part 407

Acreage allotments, Administrative practice and procedure, Barley, Corn, Cotton, Crop insurance, Peanuts, Reporting and recordkeeping requirements, Sorghum, Soybeans, Wheat.

7 CFR Part 457

Acreage allotments, Crop insurance, Reporting and recordkeeping requirements.

Final Rule

For the reasons discussed in the **SUPPLEMENTARY INFORMATION**, FCIC amends 7 CFR parts 400, 407, and 457, effective for the 2024 and succeeding crop years for crops with a contract change date on or after June 30, 2023, and for the 2025 and succeeding crop years for all other crops, as follows:

PART 400—GENERAL ADMINISTRATIVE REGULATIONS

Subpart G—Actual Production History

■ 1. The authority citation for part 400, subpart G, continues to read as follows:

Authority: 7 U.S.C. 1506, 1516.

■ 2. Revise § 400.51 to read as follows:

§ 400.51 Availability of Actual Production History program.

(a) This subpart is obsolete for the 2024 and succeeding crop years for crops with a contract change date on or after June 30, 2023, and for the 2025 and succeeding crop years for all crops with

[1] See *https://sam.gov/content/assistance-listings.*

a contract change date prior to June 30, 2023.

(b) An Actual Production History (APH) Coverage Program is offered under the provisions contained in 7 CFR part 457 and all Special Provisions (as defined in 7 CFR 457.8) thereto unless specifically excluded by the Special Provisions.

(c) The APH program operates within limits prescribed by, and in accordance with, the provisions of the Federal Crop Insurance Act, as amended (7 U.S.C. 1501 *et seq.*), only on those crops identified in this section in those areas where the actuarial documents provide coverage. Except when in conflict with this subpart, all provisions of the applicable crop insurance contract for these crops apply.

PART 407—AREA RISK PROTECTION INSURANCE REGULATIONS

■ 3. The authority citation for part 407 continues to read as follows:

Authority: 7 U.S.C. 1506(l) and 1506(o).

■ 4. Amend § 407.9 by:
■ a. In section 1:
■ i. Add a definition of ''Actual production'' in alphabetical order;
■ ii. In the definition of ''Application'', remove the words ''will commence'' and add ''commences'' in their place;
■ iii. In the definition of ''Buffer zone'', remove the words ''organic plan'' and add ''organic system plan'' in their place;
■ iv. Revise the definition of ''Contract'';
■ v. In the definition of ''Cover crop'', remove the words ''see the definition'' and add ''see definition'' in their place;
■ vi. In the definition of ''Final planting date'', remove the words ''actuarial documents'' and add ''Special Provisions'' in their place;
■ vii. Revise the definition of ''Liability'';
■ viii. Remove the definition of ''Organic plan'';
■ ix. Add a definition of ''Organic system plan'' in alphabetical order;
■ x. In the definition of ''Premium billing date'', remove the words ''actuarial documents'' and add ''Special Provisions'' in their place;
■ xi. Revise the definition of ''Production report'';
■ xii. In the definition of ''Sales closing date'', remove the words ''actuarial documents'' and add ''Special Provisions'' in their place;
■ xiii. In the definition of ''Tenant'', remove the text ''(see the definition of ''share'' above)'' and add ''(see definition of ''share'')'' in its place; and
■ xiv. Revise the definition of ''Veteran farmer or rancher'';
■ b. In section 2:
■ i. In paragraphs (c)(1)(ii)(A) and (c)(2)(ii)(B), remove the word ''Simply'' and add ''simply'' in its place;
■ ii. In paragraphs (k)(2)(i)(A) and (B), remove the text ''owed)'' and add ''owed.)'' in its place;
■ iii. In paragraph (k)(2)(iii)(C)(*1*)(*ii*), remove the words ''For example'' and add ''for example'' in their place;
■ iv. In paragraph (l)(2)(i), remove the word ''entity'' and add ''person'' in its place wherever it appears; and
■ v. In paragraphs (l)(4) introductory text and (5), remove the word ''entity'' and add ''person'' in its place;
■ c. In section 4, in paragraph (b)(5), remove the words ''For example'' and add ''for example'' in their place;
■ d. In section 5, in paragraph (b), remove the words ''actuarial documents'' and add ''Special Provisions'' in their place;
■ e. In section 7:
■ i. In paragraph (d)(2), remove the words ''This is'' and add ''this is'' in their place;
■ ii. In paragraph (e), remove the words ''actuarial documents'' and add ''Special Provisions'' in their place;
■ iii. In paragraph (f), remove the words ''No premium'' and add ''no premium'' in their place;
■ iv. In paragraph (i)(2)(i)(A), remove the word ''entity'' and add ''person'' in its place; and
■ v. In paragraphs (i)(2)(ii)(A) and (B), remove the words ''of this section'';
■ f. In section 8:
■ i. In paragraph (a), remove the words ''actuarial documents'' and add ''Special Provisions'' in their place;
■ ii. In paragraph (c)(1), remove the words ''Acreage initially'' and add ''acreage initially'' in their place;
■ iii. In paragraph (j)(3), remove the words ''If the'' and add ''if the'' in their place; and
■ iv. In paragraph (n)(1), remove the words ''production reporting date'' and add ''applicable production reporting date'' in their place;
■ g. In section 9, in paragraph (b)(1)(ii), remove the word ''Children'' and add ''children'' in its place;
■ h. In section 10, in paragraph (a), remove the words ''For the purposes'' and add ''for the purposes'' in their place;
■ i. In section 13:
■ i. In paragraph (c)(5), remove the text ''section 13(h)(4)'' and add ''section 13(c)(4)'' in its place;
■ ii. Revise paragraph (c)(6); and
■ iii. In paragraph (d)(1), add a comma after the words ''for example'';
■ j. In section 14:
■ i. In paragraph (c)(2), remove the words ''organic plan'' and add ''organic system plan'' in their place; and
■ ii. Revise paragraphs (d)(1) and (2);
■ k. In section 18, in paragraph (c) introductory text, remove the words ''For example'' and add ''for example'' in their place;
■ l. In the first instance of section 22:
■ i. In paragraph (b), remove the words ''actuarial documents'' and add ''Special Provisions'' in their place;
■ ii. In paragraph (c)(4), remove the text ''4 CFR part 102'' and add ''31 CFR part 901'' in its place; and
■ iii. In paragraph (d), remove the word ''federal'' and add ''Federal'' in its place;
■ m. In the second instance of section 22:
■ i. In paragraph (a)(1), remove the words ''actuarial documents'' and add ''Special Provisions'' in their place; and
■ ii. In paragraph (c), remove the text ''(see subsection (d) of this section)'' and add ''(see section 22(d))'' in its place;
■ n. In the first instance of section 23, in paragraph (e):
■ i. Remove the word ''attorney'' and add ''attorney's'' in its place; and
■ ii. Add a comma after the word ''appeal'';
■ o. In the second instance of section 23, in paragraph (g), remove the word ''attorney'' and add ''attorney's'' in its place;
■ p. In sections 26, introductory text, and 27, remove the word ''federal'' and add ''Federal'' in its place; and
■ q. In section 28:
■ i. In paragraph (d), remove the words ''of this section'' and add ''of section 28'' in their place; and
■ ii. In paragraph (e)(2)(viii), remove the word ''federal'' and add ''Federal'' in its place.

The revisions and additions read as follows:

§ 407.9 Area risk protection insurance policy.

* * * * *

1. Definitions

* * * * *

Actual production. The harvested and/or appraised amount of an agricultural commodity in number of pounds, bushels, tons, cartons, or other units of measure as provided in the applicable Crop Provisions.

* * * * *

Contract. (See definition of ''policy.'')

* * * * *

Liability. (See definition of ''policy protection.'')

* * * * *

Organic system plan. A written plan, in accordance with the National Organic Program published in 7 CFR part 205, that describes the organic farming

practices that you and a certifying agent agree upon annually or at such other times as prescribed by the certifying agent.

* * * * *

Production report. A written report provided by you in accordance with section 8 showing your annual production. The report contains yield information for the current year, including planted acreage and production. This report must be supported by acceptable production records.

* * * * *

Veteran farmer or rancher.

(1) An individual who has served active duty in the United States Armed Forces, including the Air Force, Army, Coast Guard, Marine Corps, Navy, or Space Force, and their reserve components; was discharged or released under conditions other than dishonorable; and:

(i) Has not operated a farm or ranch;

(ii) Has operated a farm or ranch for not more than 5 years; or

(iii) First obtained status as a veteran during the most recent 5-year period.

(2) A person, other than an individual, may be eligible for veteran farmer or rancher benefits if all substantial beneficial interest holders qualify individually as a veteran farmer or rancher in accordance with paragraph (1) of this definition; except in cases in which there is only a married couple, then a veteran and non-veteran spouse are considered a veteran farmer or rancher.

* * * * *

13. Indemnity and Premium Limitations

* * * * *

(c) * * *

(6) With respect to double cropped acreage, if the two crops you have double cropped are insured under policies with different double crop history records requirements (*e.g.,* records of acreage and production), the less restrictive requirements may be followed to satisfy double cropping requirements for both crops. For example, you have 20 acres of annual forage wheat for grazing. On the same acreage you plant and insure cotton. The annual forage double cropping provisions do not include double cropping record history requirements. If the annual forage double cropping provisions are met, you are eligible for a full indemnity payment on both the annual forage wheat and the cotton.

* * * * *

14. Organic Farming Practices

* * * * *

(d) * * *

(1) For certified organic acreage, a written certification in effect directly from a certifying agent indicating the name of the person certified, effective date of certification, certificate number, types of commodities certified, and name and address of the certifying agent (a certificate issued to a tenant may be used to qualify a landlord or other similar arrangement). A certificate issued from the National Organic Program's Organic Integrity Database (or successor certificate reporting tool) is acceptable;

(2) For transitional acreage, an organic system plan documenting the use of practices that would result in certified organic status that includes the record information as described in section 14(d)(1), or written documentation from a certifying agent indicating an organic system plan is in effect for the acreage; and

* * * * *

PART 457—COMMON CROP INSURANCE REGULATIONS

■ 5. The authority citation for part 457 continues to read as follows:

Authority: 7 U.S.C. 1506(l), 1506(o).

■ 6. Amend § 457.8, in the Common Crop Insurance Policy, by:

■ a. Removing the words ''the database'' and adding ''the APH database'' in their place wherever they appear;

■ b. Under the headings ''FCIC Policies'' and ''Reinsured Policies'', in the first paragraph, remove the words ''including the adjustment of'' and add ''including establishing your approved yield and the adjustment of'' in their place;

■ c. In section 1:

■ i. Add a definition of ''Actual production'' in alphabetical order;

■ ii. Revise the definitions of ''Actual Production History (APH)'' and ''Actual yield'';

■ iii. Add definitions for ''Annual yield'', ''APH base period'', ''APH crop year'', ''APH database'', and ''Applicable T-Yield'' in alphabetical order;

■ iv. In the definition of ''Application'', remove the words ''will commence'' and add ''commences'' in their place;

■ v. Add a definition of ''Appraised production'' in alphabetical order;

■ vi. Revise the definition of ''Approved yield'';

■ vii. Add a definition of ''Assigned yield'' in alphabetical order;

■ viii. Revise the definition of ''Average yield'';

■ ix. In the definition of ''Buffer zone'', remove the words ''organic plan'' and add ''organic system plan'' in their place;

■ x. Add a definition of ''Continuous production reports'' in alphabetical order;

■ xi. Revise the definition of ''Contract'';

■ xii. In the definition of ''Cover crop'', remove the words ''see the definition'' and add ''see definition'' in their place;

■ xiii. Add a definition of ''Determined yield'' in alphabetical order;

■ xiv. In the definition of ''Direct marketing'', remove the words ''the policyholder'' and add ''you'' in their place;

■ xv. Add definitions of ''Insurable acres'', ''Insured's production reporting date'', ''Lag year'', ''Master yield'', ''New insured'', and ''New producer'' in alphabetical order;

■ xvi. Remove the definition of ''Organic plan'';

■ xvii. Add the definition of ''Organic system plan'' in alphabetical order;

■ xviii. Revise the definition of ''Production report'';

■ xix. Add definitions of ''Production reporting date'' and ''Temporary yield'' in alphabetical order;

■ xx. In the definition of ''Tenant'', remove the text ''(see the definition of ''share'' above)'' and add ''(see definition of ''share'')'' in its place;

■ xxi. Add definitions of ''Transitional yield (T-Yield)'', ''Unavoidable uninsured fire'', and ''Variable T-Yield'' in alphabetical order; and

■ xxii. Revise the definition of ''Veteran farmer or rancher'';

■ d. In section 2:

■ i. In paragraphs (b)(5)(ii)(A) and (b)(6)(ii)(B), remove the word ''Simply'' and add ''simply'' in its place;

■ ii. In paragraphs (f)(2)(i)(A) and (B), remove the text ''owed)'' and add ''owed.)'' in its place;

■ iii. In paragraph (f)(2)(iii)(C)(*1*)(*ii*), remove the words ''For example'' and add ''for example'' in their place;

■ iv. In paragraph (f)(4), remove the words ''Since applications'' and add ''since applications'' in their place;

■ v. In paragraph (g)(2)(i), remove the word ''entity'' and add ''person'' in its place wherever it appears; and

■ vi. In paragraph (g)(4) introductory text, remove the word ''entity'' and add ''person'' in its place;

■ e. In section 3:

■ i. Revise paragraphs (b)(2)(ii) and (f);

■ ii. In paragraph (g)(2)(i), remove the words ''production reporting date'' and add ''applicable production reporting date'' in their place;

■ iii. In paragraph (g)(2)(ii), remove the word ''Simply'' and add ''simply'' in its place;

■ iv. Redesignate paragraphs (g)(3) and (4) as paragraphs (g)(9) and (10);

■ v. Add new paragraphs (g)(3) and (4) and paragraphs (g)(5) through (8);

■ vi. Revise newly redesignated paragraphs (g)(9) and (g)(10)(iii) and paragraphs (h)(1), (h)(2) introductory text, and (h)(2)(i); and
■ vii. In paragraph (i) introductory text, remove the words ''Not applicable'' and add ''not applicable'' in their place;
■ f. Add section 5;
■ g. In section 6:
■ i. In paragraphs (c)(1)(ii) and (d)(3)(ii)(A)(*2*), remove the words ''If you fail'' and add ''if you fail'' in their place; and
■ ii. In paragraph (g)(1)(i), remove the words ''In the event'' and add ''in the event'' in their place;
■ h. In section 7:
■ i. In paragraph (h)(2)(i)(A), remove the word ''entity'' and add ''person'' in its place; and
■ ii. In paragraphs (h)(2)(ii)(A) and (B), remove the words ''of this section'';
■ i. In section 8, in paragraphs (b)(1) and (4), remove the words ''For example'' and add ''for example'' in their place;
■ j. In section 9, revise paragraph (c);
■ k. In section 10, in paragraph (b)(1)(ii), remove the word ''Children'' and add ''children'' in its place;
■ l. In section 11, in paragraph (a)(1), remove the words ''For the purposes'' and add ''for the purposes'' in their place;
■ m. In section 12, in paragraph (c), remove the text ''insurable cause of loss)'' and add ''insurable cause of loss.)'' in its place;
■ n. In section 14:
■ i. In paragraph (e)(1)(i) and paragraph (e)(1)(ii) introductory text, remove the words ''Extensions will'' and add ''extensions will'' in their place;
■ ii. In paragraph (e)(3)(i), remove the text ''60 days after September 30)'' and add ''60 days after September 30.)'' in its place; and
■ iii. In paragraph (f)(3), remove the words ''If any evidence'' and add ''if any evidence'' in their place;
■ o. In section 15:
■ i. In paragraph (b)(1), remove the words ''If you fail'' and add ''if you fail'' in their place; and
■ ii. Revise paragraph (h)(7) introductory text;
■ p. In section 17:
■ i. Revise paragraphs (d)(1) introductory text, (d)(1)(ii)(B), (d)(2), and (e)(1)(i)(B) introductory text;
■ ii. In paragraph (f)(1) introductory text, remove the words ''If the crop'' and add ''if the crop'' in their place;
■ iii. In paragraph (f)(1)(ii), remove the words ''There can'' and add ''there can'' in their place;
■ iv. In paragraph (f)(3), remove the words ''The number'' and add ''the number'' in their place;
■ v. In paragraph (f)(11)(i), remove the words ''Crops for which'' and add ''crops for which'' in their place; and
■ vi. Revise paragraphs (f)(12), (g), and (h) introductory text;
■ q. In section 18:
■ i. In paragraph (d)(1), remove the words ''If conditions'' and add ''if conditions'' in their place;
■ ii. In paragraph (e)(2)(ii), remove the words ''If the'' and add ''if the'' in their place;
■ iii. In paragraph (g)(2), remove the words ''The request'' and add ''the request'' in their place; and
■ iv. In paragraph (n), remove the words ''If the'' and add ''if the'' in their place;
■ r. In the first instance of section 20, in paragraph (f), remove the word ''attorney'' and add ''attorney's'' in its place;
■ s. In the second instance of section 20:
■ i. In paragraph (e)(3), remove the word ''attorney'' and add ''attorney's'' in its place; and
■ ii. In paragraph (i), remove the word ''attorneys'' and add ''attorney's'' in its place;
■ t. In section 21, in paragraph (b)(1), remove the words ''This requirement'' and add ''this requirement'' in their place;
■ u. In section 23, remove the word ''federal'' and add ''Federal'' in its place;
■ v. In the first instance of section 24:
■ i. In paragraph (c)(4), remove the text ''4 CFR part 102'' and add ''31 CFR part 901'' in its place;
■ ii. Revise paragraph (d); and
■ iii. Designate the undesignated paragraph following paragraph (d) as paragraph (e);
■ w. In the second instance of section 24, in paragraph (c), remove the text ''(see subsection (d) of this section)'' and add ''(see section 24(d))'' in its place;
■ x. In section 25, remove the period at the end of the section heading;
■ y. In section 27, in paragraph (e)(2)(viii), remove the word ''federal'' and add ''Federal'' in its place;
■ z. In section 31, remove the word ''federal'' and add ''Federal'' in its place;
■ aa. In section 34:
■ i. Revise paragraph (a) introductory text;
■ ii. Remove paragraphs (a)(1) and (2);
■ iii. Redesignate paragraphs (a)(3) through (5) as paragraphs (a)(1) through (3);
■ iv. In newly redesignated paragraph (a)(2)(ii), remove the text ''section 34(a)(4)(i)(A)'' and add ''section 34(a)(2)(i)(A)'' in its place wherever it appears;
■ v. In newly redesignated paragraph (a)(2)(vi), remove the text ''section 34(a)(4)(i)'' and add ''section 34(a)(2)(i)'' in its place;
■ vi. In newly redesignated paragraphs (a)(2)(viii)(B), (a)(2)(viii)(C)(*1*)(*i*) and (*ii*), and (a)(2)(viii)(C)(*2*), remove the text ''section 34(a)(4)'' and add ''section 34(a)(2)'' in its place;
■ vii. In newly redesignated paragraphs (a)(3)(i)(A)(*1*), (*2*), and (*3*), remove the text ''section 34(a)(5)(v)'' and add ''section 34(a)(3)(v)'' in its place;
■ viii. Revise paragraph (a)(3)(i)(C);
■ ix. In newly redesignated paragraph (a)(3)(v)(A) introductory text, remove the text ''section 34(a)(5)(i)'' and add ''section 34(a)(3)(i)'' in its place;
■ x. In paragraph (b)(2), remove the text ''for any reason)'' and add ''for any reason.)'' in its place;
■ xi. In paragraph (b)(3), remove the words ''You may'' and add ''you may'' in their place; and
■ xii. Revise paragraph (c)(3);
■ bb. In section 35, in paragraph (b)(2)(ii)(A), remove the words ''If you'' and add ''if you'' in their place;
■ cc. In section 36:
■ i. In paragraph (a) introductory text, remove the words ''within a database'' and add ''within an APH database'' in their place;
■ ii. In paragraph (a)(1)(i), remove the text ''your database'' and add ''your APH database'' in its place; and
■ iii. In paragraph (a)(1)(ii), remove the text ''will be used).'' and add ''will be used.)'' in its place; and
■ dd. In section 37:
■ i. Revise the section heading;
■ ii. In paragraph (b)(2), remove the words ''organic plan'' and add ''organic system plan'';
■ iii. Revise paragraphs (c)(1)(i) and (ii);
■ iv. In paragraph (c)(2) introductory text, remove the words ''organic plan'' and add ''organic system plan'' in their place;
■ v. In paragraph (c)(2)(i), remove the words ''or plan'' and add ''or organic system plan'' in their place;
■ vi. In paragraph (f), add a comma after the word ''transitional''; and
■ vii. In paragraph (h), remove the words ''organic plan'' and add ''organic system plan''.

The revisions and additions read as follows:

§ 457.8 The application and policy.

* * * * *

Common Crop Insurance Policy

* * * * *

1. Definitions

* * * * *

Actual production. The harvested and/or appraised amount of an agricultural commodity in number of

pounds, bushels, tons, cartons, or other units of measure as provided in the applicable Crop Provisions.

Actual Production History (APH). A determination of the production guarantee using your historical actual production for the crop, as applicable.

Actual yield. The yield per acre based on actual production from the planted or grown acreage, in accordance with section 5(b).

* * * * *

Annual yield. A yield per acre for a crop year, used to complete the APH base period in an APH database. An annual yield may be any of the following: actual yield, assigned yield, transitional yield (T-Yield), or other yield calculated according to FCIC approved procedures.

APH base period. A minimum of four, up to a maximum of ten, most recent consecutive APH crop years for which continuous production reports are available, or as otherwise specified in the Crop Provisions or Special Provisions. The APH base period includes the most recent APH crop year's annual yield unless a lag year(s) applies to the crop, in which case, the most recent annual yield will be the crop year prior to the current crop year as specified in FCIC approved procedures.

APH crop year. The year the crop was planted or grown, and insurable in accordance with the applicable Crop Provisions, whether insured or not, and identified by the year it is normally intended to be harvested.

APH database. A series of consecutive, annual yields that include the respective acreage and actual production, when applicable, used to determine each annual yield, for each APH crop year in the APH base period.

Applicable T-Yield. The T-Yield in effect, as specified in FCIC approved procedures, for an APH database.

* * * * *

Appraised production. Unharvested potential crop production determined by us, or any other person authorized by FCIC, that includes both total production and any adjustments as provided in the applicable Crop Provisions or FCIC approved procedures used in calculating actual yields.

Approved yield. The yield calculated by us, or any other person authorized by FCIC, based on annual yields contained in the APH database to establish the production guarantee calculated in accordance with section 5(c).

* * * * *

Assigned yield. An annual yield assigned according to FCIC approved procedures for an APH crop year when you do not file an acceptable production report, or upon request by us, or any other person authorized by FCIC, you do not provide acceptable evidence of acreage and production records to support your production report. The assigned yield will not be more than 75 percent of the prior year's approved yield or 65 percent of the applicable T-Yield if a prior year's approved yield is not available.

* * * * *

Average yield. The average of the annual yields for all APH crop years within the APH database calculated by us, or any other person authorized by FCIC, in accordance with section 5(c).

* * * * *

Continuous production reports. Each APH crop year within an APH database must be consecutive starting from the most recent APH crop year for any production report submitted by you and determined to be acceptable by us, or any other person authorized by FCIC. Continuity is not considered to be interrupted for any crop year the crop was not planted, was prevented from being planted, was not insurable in accordance with the Crop Provisions, or was not produced in compliance with any other applicable USDA program. If production report(s) are not provided for such consecutive history, continuity will be considered to have been broken unless you can provide documentation that the conditions listed herein existed for any crop year.

Contract. (See definition of ''policy.'')

* * * * *

Determined yield. An annual yield designated by FCIC, or calculated and assigned by us, in specific situations authorized by FCIC approved procedures.

* * * * *

Insurable acres. Acreage that meets all policy insurability requirements, whether insured or not.

* * * * *

Insured's production reporting date. The date, provided in the actuarial documents, by which you are required to submit a production report for the current crop year, unless otherwise specified in the policy or FCIC approved procedures.

* * * * *

Lag year. A delay of reporting of a crop year(s) in the APH base period, authorized by FCIC approved procedures when production records are generally not available for the crop by the production reporting date.

* * * * *

Master yield. An optional approved yield calculation you may elect for certain crops and counties, as designated by FCIC approved procedures.

* * * * *

New insured. A person who was not insured the previous crop year without respect to an insurance provider or plan of insurance.

New producer. A person, including anyone with a substantial beneficial interest in the person, who has not produced the insured crop in the county, whether or not such crop was insured, for more than two APH crop years prior to the current crop year.

* * * * *

Organic system plan. A written plan, in accordance with the National Organic Program published in 7 CFR part 205, that describes the organic farming practices that you and a certifying agent agree upon annually or at such other times as prescribed by the certifying agent.

* * * * *

Production report. A written report provided by you in accordance with section 3 showing your annual production that will be used by us to determine your approved yield for insurance purposes. The report contains yield information for the current and previous APH crop year(s), when applicable, including planted acreage and production. This report must be supported by acceptable production records.

Production reporting date. The date, provided in the actuarial documents, by which you are required to provide a production report at the beginning of a crop year if you meet the requirements in sections 3(f)(1)(i) through (iv).

* * * * *

Temporary yield. An annual yield used in place of an actual yield when you are unable to finish harvest due to an insurable cause of loss, a delayed claim for indemnity, or your production records are unavailable from the processor, marketing outlet, or similar point of crop distribution by the production reporting date.

* * * * *

Transitional yield (T-Yield). An annual yield established within the county, or homogeneous area of land, for a crop, type, practice, map area, or other actuarial basis, as provided in the actuarial documents or calculated in accordance with FCIC approved procedures.

Unavoidable uninsured fire. Fire caused by an uninsured and unavoidable cause of loss resulting from actions outside the control of the insured. For example, fire caused by a passing train which sparks a fire that

spreads to and destroys a grain crop is clearly caused by a third party and is unavoidable; fire caused by you setting a fire to burn brush that spreads and burns your crop is within your control.

* * * * *

Variable T-Yield. The applicable T-Yield multiplied by a percentage factor and used as an annual yield in the APH database according to FCIC approved procedures, or as otherwise provided in the policy. The percent of the applicable T-Yield is determined by the number of years of acceptable actual, assigned, or temporary yields available for the crop in the county.

* * * * *

Veteran farmer or rancher. (1) An individual who has served active duty in the United States Armed Forces, including the Air Force, Army, Coast Guard, Marine Corps, Navy, or Space Force, and their reserve components; was discharged or released under conditions other than dishonorable; and:

(i) Has not operated a farm or ranch;

(ii) Has operated a farm or ranch for not more than 5 years; or

(iii) First obtained status as a veteran during the most recent 5-year period.

(2) A person, other than an individual, may be eligible for veteran farmer or rancher benefits if all substantial beneficial interest holders qualify individually as a veteran farmer or rancher in accordance with paragraph (1) of this definition; except in cases in which there is only a married couple, then a veteran and non-veteran spouse are considered a veteran farmer or rancher.

* * * * *

3. Insurance Guarantees, Coverage Levels, and Prices

* * * * *

(b) * * *

(2) * * *

(ii) You have additional coverage for the crop in the county with acreage designated as high-risk by FCIC and you execute a High-Risk Land Exclusion Option on or before the applicable sales closing date with the same insurance provider from which your additional coverage was obtained. The High-Risk Land Exclusion Option allows you the following choices for your high-risk land:

(A) You may exclude coverage for high-risk land under the additional coverage policy and not insure it;

(B) You may insure high-risk land under a separate Catastrophic Risk Protection Endorsement; or

(C) If available in the actuarial documents, you may insure high-risk land on a separate additional coverage policy with coverage greater than provided by the Catastrophic Risk Protection Endorsement but less than the coverage elected on the additional coverage policy insuring your non-high-risk land.

* * * * *

(f) A production report(s) is required for all crops with a yield-based plan of insurance, and the information contained within the production report is used to establish your approved yield(s).

(1) You must report your current year's crop production on the same basis used to establish your approved yield(s), by the insured's production reporting date contained in the actuarial documents, or as otherwise specified in the Special Provisions. This production report will be used to establish approved yield(s) for the following APH crop year. Failure to timely provide this production report will result in assigned yields being used to determine your approved yield(s) for the following APH crop year. In addition to this production report, you may have to provide an additional production report at the beginning of the crop year by the production reporting date contained in the actuarial documents, as follows:

(i) If you are a new insured who grew the crop the year prior to the current crop year, you may report actual production for that crop year and include additional crop years, if continuous production reports are provided. Failure to provide this production report will result in variable T-Yields being used to determine your approved yield(s) for the current crop year.

(ii) If you are an insured who transferred your policy to us for the current crop year, you may provide us with a copy of the completed and signed production report you submitted to your previous insurance provider for the prior APH crop year. This production report will be used to establish your approved yield(s) for the current crop year.

(iii) If we cannot establish your approved yield for any APH database for the current crop year as required by FCIC approved procedures, you must provide us a new production report containing the prior year's production on the basis of the current crop year's unit structure and by type, practice, map area, and other characteristics, if applicable, you are requesting.

(iv) You may certify actual production for any prior APH crop year if your certification meets the requirements of section 3(f)(3) to be used in an APH database(s) for the current crop year when:

(A) Reporting actual production for an APH crop year not previously certified;

(B) Replacing a yield determined in accordance with section 5(b); or

(C) Making a change or revision as authorized in FCIC approved procedures.

(2) Production must be reported by county, crop, type, practice, map area, other characteristics, unit structure elected (or level lower than unit structure elected), and land location in accordance with FCIC approved procedures. To be acceptable for an APH crop year, a production report must:

(i) Be provided annually by you;

(ii) Be certified as accurate by you;

(iii) Be submitted by the applicable production reporting date; and

(iv) Be supported by production records meeting the requirements in section 3(g)(3). Production records must substantiate all information provided on the production report.

(3) Your production report must contain all actual production of the insured crop, from all acreage of the insured crop, which includes insurable, uninsurable and uninsured acreage, for the APH crop year being reported and certified identifying:

(i) Gross and net actual production, with net actual production being gross actual production adjusted for standard deductions that apply under the terms of the policy including test weight, moisture, foreign material, or any other specified deduction, when such deductions are available in the production records;

(ii) Type of acceptable production records;

(iii) Disposition of the crop, *e.g.,* harvested or unharvested; and

(iv) Any other information required on the production report form in accordance with FCIC approved procedures.

(4) If you do not file an acceptable production report by the applicable production reporting date, the annual yield for the applicable APH crop year will be the assigned yield. The assigned yield will be used to calculate your approved yield for the purpose of determining your coverage for the current or following crop year, as applicable. Optional units will not be available the following crop year unless the reason for not filing an acceptable production report is one of the following:

(i) You are a new insured;

(ii) You are unable to provide an acceptable production report by the production reporting date due to the

inability to finish harvest because of an insurable cause of loss; or

(iii) Production records are not yet available from a processor, marketing outlet, or similar point of crop distribution or production records are not yet available due to a delayed claim for indemnity.

(5) In the event certified acreage or actual production from two or more persons sharing in the crop on the same acreage for the same APH crop year is different, we or any other person authorized by FCIC shall, at our discretion, determine the acreage and actual production to be used to determine the approved yield. Upon determining the correct acreage and actual production, we will correct your, and any other insured's, production report and APH database, and notify any other insurance provider who may have an insured with a share in the crop for the same acreage. If the correct acreage and actual production cannot be determined, the production report will be considered unacceptable, and you will receive an assigned yield in accordance with section 3(f)(4).

(6) If you have filed a claim for any crop year, the documents signed by you which state the amount of production used to complete the claim for indemnity will be the production report for that year unless otherwise specified by FCIC.

(7) Appraisals obtained from only a portion of the acreage in a field that remains unharvested after the remainder of the crop within the field has been destroyed or put to another use will not be used to establish your actual yield unless representative samples are required to be left by you in accordance with the Crop Provisions.

(8) If no insurable acreage of the insured crop is planted for a year, a production report indicating zero planted acreage will maintain the continuity of production reports for APH record purposes and that calendar year will not be included in the approved yield calculations.

* * * * *

(g) * * *

(3) Records must be available to substantiate production reports, within the tolerances provided in FCIC approved procedures, that document and verify the actual production between types, practices, map areas, unit structures and land locations as certified on the production report.

(4) Acceptable production record requirements for a crop are provided in FCIC approved procedures and identify crops requiring verifiable records or farm management records. These requirements must be met for production records to be acceptable.

(i) Verifiable records include, but are not limited to:

(A) Records of production commercially sold to, or stored by, a disinterested third party;

(B) Claim for indemnity determinations made by an insurance provider, or any other person authorized by FCIC, as applicable;

(C) Documents with actual production verified by another USDA agency;

(D) Appraisal of unharvested acreage performed by an insurance provider or any other person authorized by FCIC;

(E) Measurement of farm-stored production performed by an insurance provider, another USDA agency, or any other person authorized by FCIC;

(F) Pick records identifying the amount of actual production harvested daily by individuals;

(G) Contemporaneous daily sales records; and

(H) Records from recognized or approved precision farming technology systems.

(ii) Farm management records include, but are not limited to:

(A) Measurement of farm stored production performed by you;

(B) Automated yield monitoring systems;

(C) Contemporaneous livestock feeding records;

(D) Field harvest records; and

(E) Seed records.

(5) Acceptable production records must be adjusted for standard deductions that apply under the terms of the policy, including test weight, moisture, foreign material, and any other deductions in accordance with the applicable Crop Provisions or FCIC approved procedures when such deductions are available in the production records.

(6) Acceptable production records must be maintained for the record retention period as provided in section 21(b)(2).

(7) You are not required to maintain production records beyond the record retention period specified in section 21(b)(2); however, we or any other person authorized by FCIC may review any production records that are available from you, or any other sources who may have records of actual production applicable to an APH database, at any time.

(8) You must provide acceptable production records, as specified in section 3(g)(3) through (5):

(i) Upon request by us or any other person authorized by FCIC during the completion of a claim for indemnity; or

(ii) During any audit, review, or when otherwise requested by us or any other person authorized by FCIC to verify acreage, actual production, and all other information certified on the production report.

(9) If you do not have acceptable production records to support the information you certified on your production report you will receive an assigned yield in accordance with section 3(f)(4), for the applicable units, for any APH crop year that does not have such production records in accordance with FCIC approved procedures. If the conditions of section 34(b)(3) are not met, you will receive an assigned yield for the applicable basic unit.

(10) * * *

(iii) Any overpaid indemnity must be repaid or any additional premium we determine to be owed must be paid; and

* * * * *

(h) * * *

(1) By including an assigned yield determined in accordance with section 3(f)(4), if the actual yield reported in the APH database is excessive for any crop year, as determined by FCIC under its approved procedures, and you do not provide verifiable records to support the yield in the APH database. If there are verifiable records for the yield in your APH database, but the yield is significantly different from other yields in the county or your other yields for the crop and you cannot prove there is a valid agronomic basis to support the differences in the yields, the yield will be the average of the yields for the crop or the applicable county transitional yield if you have no other yields for the crop;

(2) By reducing it to an amount consistent with the average of the approved yields for other APH databases for your farming operation with the same crop, type, and practice or the county transitional yield, as applicable, if:

(i) The approved APH yield is greater than 115 percent of the average of the approved yields of all applicable APH databases for your farming operation that have actual yields in them or it is greater than 115 percent of the county transitional yield if no applicable APH databases exist for comparison;

* * * * *

5. APH Database and Approved Yield Calculation

(a) With respect to your APH database:

(1) An APH database must be established to determine the approved yield and the average yield, established on the basis of:

(i) Crop;

(ii) Type;
(iii) Practice;
(iv) T-Yield map area;
(v) Unit, as applicable; and
(vi) Other requirements as specified by FCIC approved procedures.

(2) The APH database is established using consecutive annual yields, as determined in section 5(b), for each APH crop year in the APH database.

(b) Annual yields are determined by us, or any other person authorized by FCIC, in accordance with FCIC approved procedures. Annual yields are used in establishment of the APH database, and include the following types of yields:

(1) An actual yield, calculated by dividing the actual production by insurable acres from acceptable production reports, except as follows:

(i) For perennial crop acreage that was previously uninsurable due to underage requirements specified in the Crop Provisions, the actual yield may be calculated using production from the acreage prior to it becoming insurable, in accordance with FCIC approved procedures, when elected by you and you provide acceptable production reports;

(ii) For crop acreage that is damaged by unavoidable uninsured fire or a third party, insurable acreage and actual production from such acreage will not be included in the calculation of the actual yield when elected by you, and approved by us or any person authorized by FCIC, in accordance with FCIC approved procedures; and

(iii) For uninsurable crop acreage, acres and actual production from such acreage may be included in the calculation of the actual yield when actual production from such acreage is commingled with harvested production from insurable acreage;

(2) A temporary yield that is equal to the prior year's approved yield. In subsequent crop years, the temporary yield is replaced by an actual yield from an acceptable production report submitted by you or, in the absence of an acceptable production report, an assigned yield;

(3) An assigned yield if you:

(i) Did not provide an acceptable production report for the previous APH crop year in the APH database; or

(ii) Do not provide acceptable production records for any APH crop year within the record retention period specified in section 21(b)(2) to support, within tolerances established by FCIC approved procedures, information provided on the production report, when requested by us or any other person authorized by FCIC;

(4) A determined yield, designated by FCIC, or calculated and assigned by us, or any other person authorized by FCIC, in situations when the available actual production information and the approved yield is not reflective of the expected actual production for the area, in accordance with section 5(c) and FCIC approved procedures; or

(5) A T-Yield for any APH crop year when there is not a minimum of four years of annual yields in the APH database as outlined in section 5(b)(1) through (4).

(i) A variable percentage will apply to the T-Yield published in the actuarial documents, based on the number of years of actual yields provided for the crop, as follows:

(A) For three years or more, use 100 percent of the applicable T-Yield;

(B) For two years, use 90 percent of the applicable T-Yield;

(C) For one year, use 80 percent of the applicable T-Yield;

(D) For no years, use 65 percent of the applicable T-Yield; or

(E) For qualifying new producers, use 100 percent of the T-Yield published in the actuarial documents.

(ii) A T-Yield may be calculated in accordance with FCIC approved procedures when you add land or new types and practices to your farming operations.

(c) The average yield and approved yield are used to establish the insurance guarantee.

(1) Calculate the average yield and approved yield as follows:

(i) Establish the APH database using annual yields by APH crop year in accordance with section 5(b), prior to any adjustments authorized for annual yields from section 36(a);

(ii) Sum all the annual yields from section 5(c)(1)(i);

(iii) Divide the sum of section 5(c)(1)(ii) by the number of annual yields in the APH database. The result is the average yield;

(iv) Using the annual yields determined from section 5(c)(1)(i), apply any applicable adjustments authorized from section 36(a);

(v) Sum all the annual yields from section 5(c)(1)(iv); and

(vi) Divide the sum of section 5(c)(1)(v) by the number of annual yields in the APH database and apply any applicable adjustments from section 5(c)(2) or (3), section 9(e), or section 36(b). The result is the approved yield.

(2) Adjustment to the approved yield by us or any other person authorized by FCIC, in accordance with FCIC approved procedures, may be made in limited situations when the approved yield is not reflective of the expected actual production for the current crop year.

(3) Master yields may be established whenever crop rotation requirements and land leasing practices limit the yield history available. FCIC will establish crops and locations for which master yields are available. To qualify, you must have at least four most recent continuous crop years' annual production reports of the insured crop. Master yields are based on acreage and production history from all acreage of the insured crop in the county in which you have/had a share in the crop's production on the same basis as your approved yield. When applicable, your master yield will be your approved yield as authorized by approved FCIC procedures.

(4) For perennial crops, excluding forage, an approved yield may be adjusted if:

(i) A significant upward or downward yield trend over consecutive APH crop years is evident;

(ii) Tree or vine damage, or cultural practices performed will reduce the expected actual production for the current crop year from previous crop years' actual production; or

(iii) Other situations are determined to exist, in accordance with FCIC approved procedures, when the approved yield is not reflective of the expected actual production for the current crop year.

(5) An approved yield may be adjusted to reflect the degree of success of a systematic area-wide effort to detect, eradicate, suppress, control, or at a minimum prevent or retard, the spread of plant disease or plant pests, and which increases the yield of the insured crop on your farm when allowed under the terms of the policy.

* * * * *

9. Insurable Acreage

* * * * *

(c) Notwithstanding the provisions in section 8(b)(2), if acreage is irrigated and a premium rate is not provided for an irrigated practice, you may either report and insure the irrigated acreage as ''non-irrigated,'' or report the irrigated acreage as not insured. (If you elect to insure such acreage under a non-irrigated practice, your irrigated yield will only be used to determine your approved yield if you continue to use a good irrigation practice. If you do not use a good irrigation practice, you will receive a yield determined in accordance with section 3(h)(3).)

* * * * *

15. Production Included in Determining an Indemnity and Payment Reductions

* * * * *

(h) * * *

(7) With respect to double cropped acreage, if the two crops you have double cropped are insured under policies with different double crop history records requirements (*e.g.,* records of acreage and production), the less restrictive requirements may be followed to satisfy double cropping requirements for both crops. For example, you have 20 acres of annual forage wheat for grazing. On the same acreage you plant and insure cotton. The annual forage double cropping provisions do not include double cropping record history requirements. If the annual forage double cropping provisions are met, you are eligible for a full indemnity payment on both the annual forage wheat and the cotton.

* * * * *

17. Prevented Planting

* * * * *

(d) * * *

(1) Drought, failure of the irrigation water supply; failure, breakdown, or destruction of irrigation equipment or facilities; or the inability to prepare the land for irrigation using your established irrigation method, due to an insured cause of loss only if, on the final planting date (or within the late planting period if you elect to try to plant the crop), you provide documentation acceptable to us to establish:

* * * * *

(ii) * * *

(B) The irrigation equipment or facilities have failed, broken down, or been destroyed if such failure, breakdown, or destruction is due to an insured cause of loss specified in section 12(d).

(2) Causes other than drought; failure of the irrigation water supply; failure, breakdown, or destruction of the irrigation equipment or facilities; or your inability to prepare the land for irrigation using your established irrigation method, provided the cause of loss is specified in the Crop Provisions. However, if it is possible for you to plant on or prior to the final planting date when other producers in the area are planting and you fail to plant, no prevented planting payment will be made.

(e) * * *

(1) * * *

(i) * * *

(B) If you acquire additional land for the current crop year, the number of eligible acres determined in section 17(e)(1)(i)(A) for a crop may be increased by multiplying it by the ratio of the total cropland acres available for planting that you are farming this year (if greater) to the total cropland acres available for planting that you farmed in the previous year, provided that:

* * * * *

(f) * * *

(12) If after considerations of historical weather patterns, timing of the final planting date, your planting history, and other factors, we determine a cause of loss has occurred that may prevent planting at the time:

(i) You take possession of the leased acreage (except acreage you leased the previous crop year and continue to lease in the current crop year);

(ii) You take possession of the purchased acreage;

(iii) The acreage is released from a USDA program which prohibits harvest of a crop;

(iv) You request a written agreement to insure the acreage; or

(v) You acquire the acreage through means other than lease or purchase (such as inherited or gifted acreage).

(g) If you purchased an additional coverage policy for a crop, and you executed a High-Risk Land Exclusion Option and separately insured acreage which has been designated as high-risk land by FCIC in accordance with section 3(b)(2)(ii)(B) and (C), the maximum number of acres eligible for a prevented planting payment will be limited for each policy as specified in section 17(e) and (f).

(h) If you are prevented from planting a crop for which you do not have an adequate base of eligible prevented planting acreage, as determined in accordance with section 17(e)(1), we will use acreage from another crop insured by us for the current crop year for which you have remaining eligible prevented planting acreage.

* * * * *

[For FCIC policies]

24. Amounts Due Us

* * * * *

(d) Interest on any amount due us found to have been received by you because of fraud, misrepresentation or presentation by you of a false claim will start on the date you received the amount with the additional 6 percent penalty beginning on the 31st day after the notice of amount due is issued to you. This interest is in addition to any other amount found to be due under any other Federal criminal or civil statute.

* * * * *

34. Units

(a) You may elect an enterprise unit or whole-farm unit as allowed by the actuarial documents.

* * * * *

(3) * * *

(i) * * *

(C) At least two of the insured crops must each have planted acreage that constitutes 10 percent or more of the total planted acreage liability of all insured crops in the whole-farm unit (for crops for which revenue protection is available, liability will be based on the applicable projected price only for the purpose of section 34(a)(3)(i)(C));

* * * * *

(c) * * *

(3) In addition to, or instead of, establishing optional units by section, section equivalent or FSA farm number, or irrigated and non-irrigated acreage, separate optional units may be established for acreage of the insured crop grown and insured under an organic farming practice. Certified organic, transitional, and buffer zone acreages do not individually qualify as separate units. (See section 37 for additional provisions regarding acreage insured under an organic farming practice.)

* * * * *

37. Organic Farming Practices

* * * * *

(c) * * *

(1) * * *

(i) For certified organic acreage, a written certification in effect directly from a certifying agent indicating the name of the person certified, effective date of certification, certificate number, types of commodities certified, and name and address of the certifying agent (a certificate issued to a tenant may be used to qualify a landlord or other similar arrangement). A certificate issued from the National Organic Program's Organic Integrity Database (or successor certificate reporting tool) is acceptable.

(ii) For transitional acreage, an organic system plan documenting the use of practices that would result in certified organic status that includes the record information as described in section 37(c)(1)(i), or written documentation from a certifying agent indicating an organic system plan is in effect for the acreage.

* * * * *

BILLING CODE 3410–08–P

DEPARTMENT OF HOMELAND SECURITY

Coast Guard

33 CFR Part 165

[Docket No. USCG–2023–0458]

Safety Zone; Military Ocean Terminal Concord Safety Zone, Suisun Bay, Military Ocean Terminal Concord, CA

AGENCY: Coast Guard, DHS.

ACTION: Notification of enforcement of regulation.

SUMMARY: The Coast Guard will enforce the safety zone in the navigable waters of Suisun Bay, off Concord, CA, in support of explosive on-loading to Military Ocean Terminal Concord (MOTCO) from June 26, 2023, through June 30, 2023. This safety zone is necessary to protect personnel, vessels, and the marine environment from potential explosion within the explosive arc. The safety zone is open to all persons and vessels for transitory use, but vessel operators desiring to anchor or otherwise loiter within the safety zone must obtain the permission of the Captain of the Port San Francisco or a designated representative. All persons and vessels operating within the safety zone must comply with all directions given to them by the Captain of the Port San Francisco or a designated representative.

DATES: The regulations in 33 CFR 165.1198 will be enforced from 12:01 a.m. on June 26, 2023, until 11:59 p.m. on June 30, 2023.

FOR FURTHER INFORMATION CONTACT: If you have questions about this notification of enforcement, call, or email Lieutenant William K. Harris, U.S. Coast Guard Sector San Francisco, Waterways Management Division, at 415–399–7443, *SFWaterways@uscg.mil.*

SUPPLEMENTARY INFORMATION: The Coast Guard will enforce the safety zone in 33 CFR 165.1198 for the Military Ocean Terminal Concord, CA (MOTCO) regulated area from 12:01 a.m. on June 26, 2023, until 11:59 p.m. on June 30, 2023, or as announced via marine local broadcasts. This safety zone is necessary to protect personnel, vessels, and the marine environment from potential explosion within the explosive arc. The regulation for this safety zone, § 165.1198, specifies the location of the safety zone which encompasses the navigable waters in the area between 500 yards of MOTCO Pier 2 in position 38°03′30″ N, 122°01′14″ W and 3,000 yards of the pier. During the enforcement periods, as reflected in § 165.1198(d), if you are the operator of a vessel in the regulated area you must comply with the instructions of the COTP or the designated on-scene patrol personnel. Vessel operators desiring to anchor or otherwise loiter within the safety zone must contact Sector San Francisco Vessel Traffic Service at 415–556–2760 or VHF Channel 14 to obtain permission.

In addition to this notification of enforcement in the **Federal Register,** the Coast Guard plans to provide notification of this enforcement period via marine information broadcasts.

Dated: June 21, 2023.

Jordan M. Baldueza,

Captain, U.S. Coast Guard, Alternate Captain of the Port San Francisco.

[FR Doc. 2023–13824 Filed 6–28–23; 8:45 am]

BILLING CODE 9110–04–P

DEPARTMENT OF HOMELAND SECURITY

Coast Guard

33 CFR Part 165

[Docket No. USCG–2023–0527]

Safety Zone; San Francisco Giants Fireworks, San Francisco Bay, San Francisco, CA

AGENCY: Coast Guard, DHS.

ACTION: Notification of enforcement of regulation.

SUMMARY: The Coast Guard will enforce the safety zone for the San Francisco Giants Fireworks in the Captain of the Port, San Francisco area of responsibility during the dates and times noted below. This action is necessary to protect personnel, vessels, and the marine environment from the hazards associated with the fireworks display. During the enforcement period, unauthorized persons and vessels are prohibited from entering into, transiting through, or remaining in the safety zone, unless authorized by the Patrol Commander (PATCOM), any Official Patrol defined as other Federal, State, or local law enforcement agencies on scene to assist the Coast Guard in enforcing the regulated area.

DATES: The regulations in 33 CFR 165.1191 will be enforced for the location identified in Table 1 to § 165.1191, Item number 1, from 10 a.m. until 10:40 p.m. on July 3, 2023.

FOR FURTHER INFORMATION CONTACT: If you have questions about this notification of enforcement, call or email LT William Harris, Waterways Management Division, U.S. Coast Guard Sector San Francisco; telephone (415) 399–7443, email *SFWaterways@uscg.mil.*

SUPPLEMENTARY INFORMATION: The Coast Guard will enforce the safety zone in 33 CFR 165.1191 Table 1, Item number 1 for the San Francisco Giants Fireworks from 10 a.m. until 10:40 p.m. on July 3, 2023. The safety zone will extend to all navigable waters of the San Francisco Bay, from surface to bottom, within a circle formed by connecting all points 100 feet outwards of the fireworks barge during the loading, transit, and arrival of the fireworks barge from the loading location to the display location and until the start of the fireworks display. From 10 a.m. until 9 p.m. on July 3, 2023, the fireworks barge will be loading pyrotechnics from Pier 50 in San Francisco, CA. The fireworks barge will remain at the loading location until its transit to the display location. From 9 p.m. to 9:15 p.m. on July 3, 2023, the loaded fireworks barge will transit from Pier 50 to the launch site near Pier 48 in approximate position 37°46′36″ N, 122°22′56″ W (NAD 83) where it will remain until the conclusion of the fireworks display. Upon the commencement of the 10-minute fireworks display, scheduled to begin at the conclusion of the baseball game, between 9:30 p.m. and 10 p.m. on July 3, 2023, the safety zone will increase in size and encompass all navigable waters of the San Francisco Bay, from surface to bottom, within a circle formed by connecting all points 700 feet out from the fireworks barge near Pier 48 in approximate position 37°46′36″ N, 122°22′56″ W (NAD 83). This safety will be enforced from 10 a.m. until 10:40 p.m. on July 3, 2023, or announced via Marine Information Broadcast.

Under the provisions of 33 CFR 165.1191, unauthorized persons or vessels are prohibited from entering into, transiting through, or anchoring in the safety zone during all applicable effective dates and times, unless authorized to do so by the PATCOM or other Official Patrol, defined as a Federal, State, or local law enforcement agency on scene to assist the Coast Guard in enforcing the safety zone. During the enforcement period, if you are the operator of a vessel in one of the safety zones you must comply with the directions from the Patrol Commander or other Official Patrol. The PATCOM or Official Patrol may, upon request allow the transit of commercial vessels through regulated areas when it is safe to do so.

In addition to this enforcement in the **Federal Register**, the Coast Guard plans to provide notification of this

enforcement period via the Local Notice to Mariners.

If the Captain of the Port determines that the regulated area need not be enforced for the full duration stated in this notice, a Marine Information Bulletin may be used to grant general permission to enter the regulated area.

Dated: June 21, 2023.

Jordan M. Baldueza,

Captain, U.S. Coast Guard, Alternate Captain of the Port San Francisco.

[FR Doc. 2023–13715 Filed 6–28–23; 8:45 am]

BILLING CODE 9110–04–P

DEPARTMENT OF HOMELAND SECURITY

Coast Guard

33 CFR Part 165

[Docket Number USCG–2023–0483]

RIN 1625–AA00

Safety Zone; Redwood City Fourth of July Fireworks; Redwood Creek, Redwood City, CA

AGENCY: Coast Guard, DHS.

ACTION: Temporary final rule.

SUMMARY: The Coast Guard is establishing a temporary safety zone on the navigable waters of the Redwood Creek in Redwood City, CA in support of a fireworks display on July 4, 2023. The safety zone is necessary to protect personnel, vessels, and the marine environment from potential hazards created by pyrotechnics. Unauthorized persons or vessels are prohibited from entering into, transiting through, or remaining in the safety zone without the permission of the Captain of the Port San Francisco or a designated representative.

DATES: This rule is effective from 9 a.m. July 3, 2023, until 10:20 p.m. July 4, 2023.

ADDRESSES: To view documents mentioned in this preamble as being available in the docket, go to *https://www.regulations.gov,* type USCG–2023–0483 in the search box and click ''Search.'' Next, in the Document Type column, select ''Supporting & Related Material.''

FOR FURTHER INFORMATION CONTACT: If you have questions on this rule, call or email Petty Officer First Class Shannon Curtaz-Milian, U.S. Coast Guard, Sector San Francisco, at 415–399–7440, *SFWaterways@uscg.mil.*

SUPPLEMENTARY INFORMATION:

I. Table of Abbreviations

CFR Code of Federal Regulations
DHS Department of Homeland Security
FR Federal Register
NPRM Notice of proposed rulemaking
§ Section
U.S.C. United States Code

II. Background Information and Regulatory History

The Coast Guard is issuing this temporary rule without prior notice and opportunity to comment pursuant to authority under section 4(a) of the Administrative Procedure Act (APA) (5 U.S.C. 553(b)). This provision authorizes an agency to issue a rule without prior notice and opportunity to comment when the agency for good cause finds that those procedures are ''impracticable, unnecessary, or contrary to the public interest.'' Under 5 U.S.C. 553(b)(B), the Coast Guard finds that good cause exists for not publishing a notice of proposed rulemaking (NPRM) with respect to this rule because it is impracticable. The Coast Guard did not receive final details for this event until June 12, 2023. It is impracticable to go through the full notice and comment rule making process because the Coast Guard must establish this safety zone by July 3, 2023, and lacks sufficient time to provide a reasonable comment period and to consider those comments before issuing the rule.

Under 5 U.S.C. 553(d)(3), the Coast Guard finds that good cause exists for making this rule effective less than 30 days after publication in the **Federal Register**. Delaying the effective date of this rule would be impracticable and contrary to public interest because action is necessary to protect personnel, vessels, and the marine environment from the potential safety hazards associated with the fireworks display on Redwood Creek in Redwood City, CA on July 4, 2023.

III. Legal Authority and Need for Rule

The Coast Guard is issuing this rule under authority 46 U.S.C. 70034 (previously 33 U.S.C. 1231). The Captain of the Port San Francisco has determined that potential hazards associated with the Redwood City Fourth of July Fireworks will be a safety concern for anyone within a 100-foot radius of the fireworks vessel during loading and staging on July 3, 2023, and anyone within a 850-foot radius of the fireworks vessel starting 30 minutes before the fireworks display is scheduled to commence and ending 30 minutes after the conclusion of the fireworks display on July 4, 2023. For this reason, this temporary safety zone is needed to protect personnel, vessels, and the marine environment in the navigable waters around the fireworks vessel and during the fireworks display.

IV. Discussion of the Rule

This rule establishes a temporary safety zone from 9 a.m. on July 3, 2023, until 10:20 p.m. on July 4, 2023, during the loading, staging, and transit of the fireworks vessel in San Francisco Bay from Pier 50 to Redwood Creek, Redwood City, CA, and until 30 minutes after completion of the fireworks display. During the loading, staging, and transit of the fireworks vessel, scheduled to take place between 9 a.m. on July 3, 2023, until 9 p.m. on July 4, 2023, until 30 minutes prior to the start of the fireworks display, the safety zone will encompass the navigable waters around and under the fireworks vessel, from surface to bottom, within a circle formed by connection of all points 100 feet out from the fireworks vessel. The fireworks display is scheduled to start from 9:30 p.m. and end at approximately 9:50 p.m. on July 4, 2023, on Redwood Creek in Redwood City, CA.

The fireworks vessel will remain at Pier 50 until the start of its transit to the display location. Movement of the vessel from Pier 50 to the display location is scheduled to take place from 3 p.m. to 7 p.m. on July 4, 2023, where it will remain until the conclusion of the fireworks display.

At 9 p.m. on July 4, 2023, 30 minutes prior to the commencement of the 20-minute fireworks display, the safety zone will increase in size and encompass the navigable waters around and under the fireworks vessel, from surface to bottom, within a circle formed by all connecting points 850 feet from the circle center at approximate position 37°30′28.48″ N, 122°12′51.53″ W (NAD 83). The safety zone will terminate at 10:20 p.m. on July 4, 2023, or as announced via Broadcast Notice to Mariners.

This regulation is necessary to keep persons and vessels away from the immediate vicinity of the fireworks loading, staging, transit, and display site. Except for persons or vessels authorized by the COTP or the COTP's designated representative, no person or vessel may enter or remain in the restricted area. A ''designated representative'' means a Coast Guard Patrol Commander, including a Coast Guard coxswain, petty officer, or other officer operating a Coast Guard vessel, or a Federal, State, or local officer designated by or assisting the Captain of the Port San Francisco (COTP) in the enforcement of the safety zone. This regulation is necessary to ensure the

safety of participants, spectators, and transiting vessels.

V. Regulatory Analyses

We developed this rule after considering numerous statutes and Executive orders related to rulemaking. Below we summarize our analyses based on a number of these statutes and Executive orders, and we discuss First Amendment rights of protestors.

A. Regulatory Planning and Review

Executive Orders 12866 and 13563 direct agencies to assess the costs and benefits of available regulatory alternatives and, if regulation is necessary, to select regulatory approaches that maximize net benefits. This rule has not been designated a ''significant regulatory action,'' under Executive Order 12866. Accordingly, this rule has not been reviewed by the Office of Management and Budget (OMB).

This regulatory action determination is based on the limited duration and narrowly tailored geographic area of the safety zone. Although this rule restricts access to the waters encompassed by the safety zone, the effect of this rule will not be significant because the local waterways users will be notified to ensure the safety zone will result in minimum impact. The vessels desiring to transit through or around the temporary safety zone may do so upon express permission from the COTP or the COTP's designated representative.

B. Impact on Small Entities

The Regulatory Flexibility Act of 1980, 5 U.S.C. 601–612, as amended, requires Federal agencies to consider the potential impact of regulations on small entities during rulemaking. The term ''small entities'' comprises small businesses, not-for-profit organizations that are independently owned and operated and are not dominant in their fields, and governmental jurisdictions with populations of less than 50,000. The Coast Guard certifies under 5 U.S.C. 605(b) that this rule will not have a significant economic impact on a substantial number of small entities.

While some owners or operators of vessels intending to transit the safety zone may be small entities, for the reasons stated in section V.A above, this rule will not have a significant economic impact on any vessel owner or operator.

Under section 213(a) of the Small Business Regulatory Enforcement Fairness Act of 1996 (Pub. L. 104–121), we want to assist small entities in understanding this rule. If the rule would affect your small business, organization, or governmental jurisdiction and you have questions concerning its provisions or options for compliance, please call or email the person listed in the **FOR FURTHER INFORMATION CONTACT** section.

Small businesses may send comments on the actions of Federal employees who enforce, or otherwise determine compliance with, Federal regulations to the Small Business and Agriculture Regulatory Enforcement Ombudsman and the Regional Small Business Regulatory Fairness Boards. The Ombudsman evaluates these actions annually and rates each agency's responsiveness to small business. If you wish to comment on actions by employees of the Coast Guard, call 1–888–REG–FAIR (1–888–734–3247). The Coast Guard will not retaliate against small entities that question or complain about this rule or any policy or action of the Coast Guard.

C. Collection of Information

This rule will not call for a new collection of information under the Paperwork Reduction Act of 1995 (44 U.S.C. 3501–3520).

D. Federalism and Indian Tribal Governments

A rule has implications for federalism under Executive Order 13132, Federalism, if it has a substantial direct effect on the States, on the relationship between the National Government and the States, or on the distribution of power and responsibilities among the various levels of government. We have analyzed this rule under that Order and have determined that it is consistent with the fundamental federalism principles and preemption requirements described in Executive Order 13132.

Also, this rule does not have tribal implications under Executive Order 13175, Consultation and Coordination with Indian Tribal Governments, because it does not have a substantial direct effect on one or more Indian tribes, on the relationship between the Federal Government and Indian tribes, or on the distribution of power and responsibilities between the Federal Government and Indian tribes.

E. Unfunded Mandates Reform Act

The Unfunded Mandates Reform Act of 1995 (2 U.S.C. 1531–1538) requires Federal agencies to assess the effects of their discretionary regulatory actions. In particular, the Act addresses actions that may result in the expenditure by a State, local, or tribal government, in the aggregate, or by the private sector of $100,000,000 (adjusted for inflation) or more in any one year. Though this rule will not result in such an expenditure, we do discuss the effects of this rule elsewhere in this preamble.

F. Environment

We have analyzed this rule under Department of Homeland Security Directive 023–01, Rev. 1, associated implementing instructions, and Environmental Planning COMDTINST 5090.1 (series), which guide the Coast Guard in complying with the National Environmental Policy Act of 1969 (42 U.S.C. 4321–4370f), and have determined that this action is one of a category of actions that do not individually or cumulatively have a significant effect on the human environment. This rule involves a temporary safety zone in the navigable waters around the loading, staging, transit, and display of fireworks near Pier 50 in San Francisco Bay and on Redwood Creek in Redwood City. It is categorically excluded from further review under paragraph L60(a) of Appendix A, Table 1 of DHS Instruction Manual 023–01–001–01, Rev. 1. A Record of Environmental Consideration supporting this determination is available in the docket. For instructions on locating the docket, see the **ADDRESSES** section of this preamble.

G. Protest Activities

The Coast Guard respects the First Amendment rights of protesters. Protesters are asked to call or email the person listed in the **FOR FURTHER INFORMATION CONTACT** section to coordinate protest activities so that your message can be received without jeopardizing the safety or security of people, places, or vessels.

List of Subjects in 33 CFR Part 165

Harbors, Marine safety, Navigation (water), Reporting and recordkeeping requirements, Security measures, Waterways.

For the reasons discussed in the preamble, the Coast Guard amends 33 CFR part 165 as follows:

PART 165—REGULATED NAVIGATION AREAS AND LIMITED ACCESS AREAS

■ 1. The authority citation for part 165 continues to read as follows:

Authority: 46 U.S.C. 70034, 70051, 70124; 33 CFR 1.05–1, 6.04–1. 6.04–6, and 160.5; Department of Homeland Security Delegation No. 00170.1, Revision No. 01.3.

■ 2. Add § 165.T11–132 to read as follows:

§ 165.T11–132 Safety Zone; Redwood City Fourth of July Fireworks; Redwood Creek, Redwood City, CA.

(a) *Location.* The following area is a safety zone: all navigable waters of San Francisco Bay, from surface to bottom, within a circle formed by connecting all points 100 feet out from the fireworks vessel during loading and staging at Pier 50 in San Francisco, CA as well as transit and arrival to Redwood Creek, Redwood City, CA. Between 9 p.m. and 10:20 p.m. on July 4, 2023, the safety zone will expand to all navigable waters, from surface to bottom, within a circle formed by connecting all points 850 feet out from the fireworks vessel in approximate position 37°30′28.48″ N 122°12′51.53″ W (NAD 83) or as announced via Broadcast Notice to Mariners.

(b) *Definitions.* As used in this section, ''designated representative'' means a Coast Guard Patrol Commander, including a Coast Guard coxswain, petty officer, or other officer operating a Coast Guard vessel, or a Federal, State, or Local officer designated by or assisting the Captain of the Port San Francisco (COTP) in the enforcement of the safety zone.

(c) *Regulations.* (1) Under the general safety zone regulations in subpart C of this part, you may not enter the safety zone described in paragraph (a) of this section unless authorized by the COTP or the COTP's designated representative.

(2) The safety zone is closed to all vessel traffic, except as may be permitted by the COTP or the COTP's designated representative.

(3) Vessel operators desiring to enter or operate within the safety zone must contact the COTP or the COTP's designated representative to obtain permission to do so. Vessel operators given permission to enter or operate in the safety zone must comply with all lawful orders or directions given to them by the COTP or the COTP's designated representative. Persons and vessels may request permission to enter the safety zone on VHF–23A or through the 24-hour Command Center at telephone (415) 399–3547.

(d) *Enforcement period.* This section will be enforced from 9 a.m. on July 3, 2023, until 10:20 p.m. on July 4, 2023.

(e) *Information broadcasts.* The COTP or the COTP's designated representative will notify the maritime community of periods during which this zone will be enforced, in accordance with 33 CFR 165.7.

Dated: June 21, 2023.

Jordan M. Baldueza,

Captain, U.S. Coast Guard, Alternate Captain of the Port, San Francisco.

[FR Doc. 2023–13825 Filed 6–28–23; 8:45 am]

BILLING CODE 9110–04–P

DEPARTMENT OF HOMELAND SECURITY

Coast Guard

33 CFR Part 165

[Docket No. USCG–2023–0478]

Safety Zones; Recurring Events in Captain of the Port Duluth—LaPointe Fireworks

AGENCY: Coast Guard, DHS.

ACTION: Notice of enforcement of regulation.

SUMMARY: The Coast Guard will enforce the safety zone for the LaPointe Fireworks in LaPointe, WI from 9:30 p.m. through 10:30 p.m. This action is necessary to protect participants and spectators during the LaPointe Fireworks taking place in the North Channel off LaPointe. During the enforcement period, entry into, transiting, or anchoring within the safety zone is prohibited unless authorized by the Captain of the Port Duluth or designated on-scene representative.

DATES: The regulations in 33 CFR 165.943(b) will be enforced from 9:30 p.m. through 10:30 p.m. on July 04, 2023, for the LaPointe Fireworks safety zone, § 165.943 Table 1(6).

FOR FURTHER INFORMATION CONTACT: If you have questions on this document, call or email LT Joe McGinnis, telephone (218) 725–3818, email *DuluthWWM@uscg.mil.*

SUPPLEMENTARY INFORMATION: The Coast Guard will enforce the safety zone for the annual LaPointe Fireworks in 33 CFR 165.94 Table 1(6) from 9:30 p.m. through 10:30 p.m. on July 04, 2023, on all waters of Lake Superior bounded by the arc of a circle with a 1,120-foot radius from the fireworks launch site with its center in position 46°46′40″ N, 090°47′22″ W.

Entry into, transiting, or anchoring within the safety zone is prohibited unless authorized by the Captain of the Port Duluth or their designated on-scene representative. The Captain of the Port's designated on-scene representative may be contacted via VHF Channel 16.

This document is issued under authority of 33 CFR 165.943 and 5 U.S.C. 552 (a). In addition to this publication in the **Federal Register**, the Coast Guard will provide the maritime community with advance notification of the enforcement of this safety zone via Broadcast Notice to Mariners.

Dated: June 23, 2023.

J.M. DeWitz,

Commander, U.S. Coast Guard, Captain of the Port Duluth.

BILLING CODE 9110–04–P

ENVIRONMENTAL PROTECTION AGENCY

40 CFR Part 52

[EPA–R07–OAR–2023–0214; FRL–10875–02–R7]

Air Plan Approval; State of Missouri; Confidential Information

AGENCY: Environmental Protection Agency (EPA).

ACTION: Final rule.

SUMMARY: The Environmental Protection Agency (EPA) is taking final action to approve a revision to the State Implementation Plan (SIP) for the State of Missouri. This final action will amend the SIP to approve a revision submitted by the State of Missouri on September 20, 2022, to the existing state rule, ''Confidential Information.'' These revisions include structural, formatting and other text changes that are administrative in nature and do not impact the stringency of the SIP or air quality. The EPA's approval of this rule revision is in accordance with the requirements of the Clean Air Act (CAA).

DATES: This final rule is effective on July 31, 2023.

ADDRESSES: The EPA has established a docket for this action under Docket ID No. EPA–R07–OAR–2023–0214. All documents in the docket are listed on the *www.regulations.gov* website. Although listed in the index, some information is not publicly available, *i.e.,* CBI or other information whose disclosure is restricted by statute. Certain other material, such as copyrighted material, is not placed on the internet and will be publicly available only in hard copy form. Publicly available docket materials are available through *www.regulations.gov* or please contact the person identified in the **FOR FURTHER INFORMATION CONTACT** section for additional information.

FOR FURTHER INFORMATION CONTACT: Steven Brown, Environmental

Protection Agency, Region 7 Office, Air Quality Planning Branch, 11201 Renner Boulevard, Lenexa, Kansas 66219; telephone number: (913) 551–7718; email address: *brown.steven@epa.gov.*

SUPPLEMENTARY INFORMATION: Throughout this document ''we,'' ''us,'' and ''our'' refer to EPA.

Table of Contents

I. What is being addressed in this document?

The EPA is approving a SIP revision submitted by the State of Missouri on September 20, 2022. Missouri requested the EPA approve revisions to 10 Code of State Regulations (CSR) 10–6.210 in the Missouri SIP. The state has revised the rule and made structural, formatting, and text changes to correct typographical errors. After review and analysis of the revisions, the EPA concluded that these changes do not have adverse effects on air quality. The full text of these changes can be found in the State's submission, which is included in the docket for this action. The EPA's analysis of the revisions can be found in the technical support document (TSD), also included in the docket.

II. Have the requirements for approval of a SIP revision been met?

The State submission has met the public notice requirements for SIP submissions in accordance with 40 CFR 51.102. The submission also satisfied the completeness criteria of 40 CFR part 51, appendix V. The State provided public notice on this SIP revision from 02/15/2022 to 4/07/2022 and received one comment from a Missouri staff member pertaining to a definition change. The EPA's Notice of Proposed Rulemaking (NPRM) and supporting information contained in the docket were made available for public comment from May 8, 2023, to June 7, 2023 (88 FR 29596). The EPA received one comment in support of approval, which is included in the docket.

In addition, as explained above and in more detail in the TSD, which is part of this docket, the revision meets the substantive SIP requirements of the CAA, including section 110 and implementing regulations.

III. What action is the EPA taking?

The EPA is taking final action to amend the Missouri SIP by approving the State's revisions to rule 10 CSR 10–6.210 ''Confidential Information.'' Approval of these revisions will ensure consistency between State and federally approved rules. As described in the NPRM (88 FR 29596), and the TSD, the EPA has determined that these changes meet the requirements of the Clean Air Act and will not adversely impact air quality or the stringency of the SIP.

IV. Incorporation by Reference

In this document, the EPA is finalizing regulatory text that includes incorporation by reference. In accordance with requirements of 1 CFR 51.5, and as described and set forth below in the amendments to 40 CFR part 52, the EPA is finalizing the incorporation by reference of the Missouri rule 10 CSR 10–6.210—*Confidential Information,* with a local effective date of September 30, 2022, which provides procedures and conditions for handling confidential Information. The EPA has made, and will continue to make, these materials generally available through *www.regulations.gov* and at the EPA Region 7 Office (please contact the person identified in the **FOR FURTHER INFORMATION CONTACT** section of this preamble for more information).

Therefore, these materials have been approved by the EPA for inclusion in the State Implementation Plan, have been incorporated by reference by EPA into that plan, are fully federally enforceable under sections 110 and 113 of the CAA as of the effective date of the final rulemaking of the EPA's approval, and will be incorporated by reference in the next update to the SIP compilation.[1]

V. Statutory and Executive Order Reviews

Under the Clean Air Act, the Administrator is required to approve a SIP submission that complies with the provisions of the Clean Air Act and applicable Federal regulations. 42 U.S.C. 7410(k); 40 CFR 52.02(a). Thus, in reviewing SIP submissions, EPA's role is to approve state choices, provided that they meet the criteria of the Clean Air Act. Accordingly, this action merely approves state law as meeting Federal requirements and does not impose additional requirements beyond those imposed by state law. For that reason, this action:

- Is not a significant regulatory action subject to review by the Office of Management and Budget under Executive Orders 12866 (58 FR 51735, October 4, 1993) and 14094 (88 FR 21879, April 11, 2023);
- Does not impose an information collection burden under the provisions of the Paperwork Reduction Act (44 U.S.C. 3501 *et seq.*);
- Is certified as not having a significant economic impact on a substantial number of small entities under the Regulatory Flexibility Act (5 U.S.C. 601 *et seq.*);
- Does not contain any unfunded mandate or significantly or uniquely affect small governments, as described in the Unfunded Mandates Reform Act of 1995 (Pub. L. 104–4);
- Does not have federalism implications as specified in Executive Order 13132 (64 FR 43255, August 10, 1999);
- Is not subject to Executive Order 13045 (62 FR 19885, April 23, 1997) because it approves a state program;
- Is not a significant regulatory action subject to Executive Order 13211 (66 FR 28355, May 22, 2001); and
- Is not subject to requirements of section 12(d) of the National Technology Transfer and Advancement Act of 1995 (15 U.S.C. 272 note) because application of those requirements would be inconsistent with the Clean Air Act.

In addition, the SIP is not approved to apply on any Indian reservation land or in any other area where EPA or an Indian tribe has demonstrated that a tribe has jurisdiction. In those areas of Indian country, the rule does not have tribal implications and will not impose substantial direct costs on tribal governments or preempt tribal law as specified by Executive Order 13175 (65 FR 67249, November 9, 2000).

Executive Order 12898 (Federal Actions To Address Environmental Justice in Minority Populations and Low-Income Populations, 59 FR 7629, Feb. 16, 1994) directs Federal agencies to identify and address ''disproportionately high and adverse human health or environmental effects'' of their actions on minority populations and low-income populations to the greatest extent practicable and permitted by law. EPA defines environmental justice (EJ) as ''the fair treatment and meaningful involvement of all people regardless of race, color, national origin, or income with respect to the development, implementation, and enforcement of environmental laws, regulations, and policies.'' EPA further defines the term fair treatment to mean that ''no group of people should bear a disproportionate burden of environmental harms and risks, including those resulting from the negative environmental consequences of industrial, governmental, and commercial operations or programs and policies.''

[1] 62 FR 27968, May 22, 1997.

Missouri did not evaluate environmental justice considerations as part of its SIP submittal; the CAA and applicable implementing regulations neither prohibit nor require such an evaluation. EPA did not perform an EJ analysis and did not consider EJ in this action. Consideration of EJ is not required as part of this action, and there is no information in the record inconsistent with the stated goal of E.O. 12898 of achieving environmental justice for people of color, low-income populations, and Indigenous peoples.

This action is subject to the Congressional Review Act, and EPA will submit a rule report to each House of the Congress and to the Comptroller General of the United States. This action is not a ''major rule'' as defined by 5 U.S.C. 804(2).

Under section 307(b)(1) of the Clean Air Act, petitions for judicial review of this action must be filed in the United States Court of Appeals for the appropriate circuit by August 28, 2023. Filing a petition for reconsideration by the Administrator of this final rule does not affect the finality of this action for the purposes of judicial review nor does it extend the time within which a petition for judicial review may be filed and shall not postpone the effectiveness of such rule or action. This action may not be challenged later in proceedings to enforce its requirements (see section 307(b)(2)).

List of Subjects in 40 CFR Part 52

Environmental protection, Air pollution control, Incorporation by reference, Particulate matter.

Dated: June 21 2023.

Meghan A. McCollister,

Regional Administrator, Region 7.

For the reasons stated in the preamble, the EPA amends 40 CFR part 52 as set forth below:

BILLING CODE 6560–50–P

DEPARTMENT OF COMMERCE

National Oceanic and Atmospheric Administration

50 CFR Part 679

[Docket No. 230306–0065; RTID 0648–XD117]

Fisheries of the Exclusive Economic Zone Off Alaska; Sablefish in the Bering Sea Subarea of the Bering Sea and Aleutian Islands Management Area

AGENCY: National Marine Fisheries Service (NMFS), National Oceanic and Atmospheric Administration (NOAA), Commerce.

ACTION: Temporary rule; closure.

SUMMARY: NMFS is prohibiting directed fishing for non-Community Development Quota (CDQ) sablefish by vessels using trawl gear in the Bering Sea subarea of the Bering Sea and Aleutian Islands management area (BSAI). This action is necessary to prevent exceeding the 2023 non-CDQ sablefish initial total allowable catch (ITAC) by vessels using trawl gear in the Bering Sea subarea of the BSAI.

DATES: Effective 1200 hours, Alaska local time (A.l.t.), June 27, 2023, through 2400 hours, A.l.t., December 31, 2023.

FOR FURTHER INFORMATION CONTACT: Steve Whitney, 907–586–7228.

SUPPLEMENTARY INFORMATION: NMFS manages the groundfish fishery in the BSAI according to the Fishery Management Plan for Groundfish of the Bering Sea and Aleutian Islands Management Area (FMP) prepared by the North Pacific Fishery Management Council under authority of the Magnuson-Stevens Fishery Conservation and Management Act. Regulations governing fishing by U.S. vessels in accordance with the FMP appear at subpart H of 50 CFR part 600 and 50 CFR part 679.

The 2023 non-CDQ sablefish ITAC by vessels using trawl gear in the Bering Sea subarea of the BSAI is 3,398 metric tons (mt) as established by the final 2023 and 2024 harvest specifications for groundfish in the BSAI (88 FR 14926, March 10, 2023).

The Regional Administrator has determined that the 2023 ITAC for non-CDQ sablefish by vessels using trawl gear in the Bering Sea subarea of the BSAI will soon be reached. Therefore, the Regional Administrator is establishing a directed fishing allowance of 1,100 mt, and is setting aside the remaining 2,298 mt as bycatch

to support other anticipated groundfish fisheries. In accordance with § 679.20(d)(1)(iii), the Regional Administrator finds that this directed fishing allowance has been reached. Consequently, in accordance with § 679.20(d)(1)(iii), NMFS is prohibiting directed fishing for non-CDQ sablefish by vessels using trawl gear in the Bering Sea subarea of the BSAI. While this closure remains in effect, the maximum retainable amounts at § 679.20(e) and (f) apply at any time during a trip.

Classification

NMFS issues this action pursuant to section 305(d) of the Magnuson-Stevens Act. This action is required by 50 CFR part 679, which was issued pursuant to section 304(b), and is exempt from review under Executive Order 12866.

Pursuant to 5 U.S.C. 553(b)(B), there is good cause to waive prior notice and an opportunity for public comment on this action, as notice and comment would be impracticable and contrary to the public interest, as it would prevent NMFS from responding to the most recent fisheries data in a timely fashion, and would delay the closure of non-CDQ sablefish by vessels using trawl gear in the Bering Sea subarea in the BSAI. NMFS was unable to publish a notice providing time for public comment because the most recent, relevant data only became available as of June 26, 2023.

The Assistant Administrator for Fisheries, NOAA also finds good cause to waive the 30-day delay in the effective date of this action under 5 U.S.C. 553(d)(3). This finding is based upon the reasons provided above for waiver of prior notice and opportunity for public comment.

Authority: 16 U.S.C. 1801 *et seq.*

Dated: June 26, 2023.

Jennifer M. Wallace,

Acting Director, Office of Sustainable Fisheries, National Marine Fisheries Service.

Proposed Rules

Federal Register
Vol. 88, No. 124
Thursday, June 29, 2023

This section of the FEDERAL REGISTER contains notices to the public of the proposed issuance of rules and regulations. The purpose of these notices is to give interested persons an opportunity to participate in the rule making prior to the adoption of the final rules.

FEDERAL COMMUNICATIONS COMMISSION

47 CFR Part 64

[CG Docket No. 02–278; FCC 23–49; FR ID 149026]

Prior Express Consent Under the Telephone Consumer Protection Act of 1991

AGENCY: Federal Communications Commission.

ACTION: Proposed rule.

SUMMARY: In this document, the Federal Communications Commission (Commission) proposes measures to clarify and strengthen consumers' ability to revoke consent to receive both robocalls and robotexts. The Commission proposes to codify past guidance on prior express consent to make these requirements more apparent to callers and consumers. In addition, the Commission proposes to amend its rules to strengthen the ability of consumers to decide which robocalls and robotexts they wish to receive by exercising their right to grant and revoke consent to individual callers. Specifically, the Commission proposes to: ensure that revocation of consent does not require the use of specific words or burdensome methods; require that callers honor do-not-call and consent revocation requests within a reasonable time, not to exceed 24 hours of receipt; codify the ruling that consumers only need to revoke consent once to stop getting all robocalls and robotexts from a specific entity; and allow wireless consumers the option to stop robocalls and robotexts from their own wireless service provider.

DATES: Comments are due on or before July 31, 2023, and reply comments are due on or before August 14, 2023.

ADDRESSES: You may submit comments, identified by CG Docket No. 02–278, by any of the following methods:

- *Electronic Filers:* Comments may be filed electronically using the internet by accessing the ECFS: *https://apps.fcc.gov/ecfs/.*
- *Paper Filers:* Parties who choose to file by paper must file an original and one copy of each filing. If more than one docket or rulemaking number appears in the caption of this proceeding, filers must submit two additional copies for each additional docket or rulemaking number.

Filings can be sent by hand or messenger delivery, by commercial overnight courier, or by first-class or overnight U.S. Postal Service mail. All filings must be addressed to the Commission's Secretary, Office of the Secretary, Federal Communications Commission.

- Commercial overnight mail (other than U.S. Postal Service Express Mail and Priority Mail) must be sent to 9050 Junction Drive, Annapolis Junction, MD 20701.
- U.S. Postal Service first-class, Express, and Priority mail must be addressed to 45 L Street NE, Washington, DC 20554.
- Effective March 19, 2020, and until further notice, the Commission no longer accepts any hand or messenger delivered filings. This is a temporary measure taken to help protect the health and safety of individuals, and to mitigate the transmission of COVID–19. See *FCC Announces Closure of FCC Headquarters Open Window and Change in Hand-Delivery Policy,* Public Notice, DA 20–304 (March 19, 2020), *https://www.fcc.gov/document/fcc-closes-headquarters-open-window-and-changes-hand-delivery-policy.*

FOR FURTHER INFORMATION CONTACT: Richard D. Smith of the Consumer and Governmental Affairs Bureau at (717) 338–2797 or *Richard.Smith@fcc.gov.*

SUPPLEMENTARY INFORMATION: This is a summary of the Commission's Notice of Proposed Rulemaking (*NPRM*), in CG Docket No. 02–278, FCC 23–49, adopted on June 8, 2023 and released on June 9, 2023. The full text of the document is available for public inspection and copying via the Commission's Electronic Comment Filing System (ECFS). To request materials in accessible formats for people with disabilities (Braille, large print, electronic files, audio format), send an email to *fcc504@fcc.gov* or call the Consumer and Governmental Affairs Bureau at 202–418–0530 (voice).

This matter shall be treated as a ''permit-but-disclose'' proceeding in accordance with the Commission's *ex parte* rules. 47 CFR 1.1200 through 1.1216. Persons making oral *ex parte* presentations are reminded that memoranda summarizing the presentations must contain summaries of the substances of the presentations and not merely a listing of the subjects discussed. More than a one or two sentence description of the views and arguments presented is generally required. *See* 47 CFR 1.1206(b). Other rules pertaining to oral and written *ex parte* presentations in permit-but-disclose proceedings are set forth in § 1.1206(b) of the Commission's rules, 47 CFR 1.1206(b).

Initial Paperwork Reduction Act of 1995 Analysis

The *NPRM* seeks comment on proposed rule amendments that may result in modified information collection requirements. If the Commission adopts any modified information collection requirements, the Commission will publish a notice in the **Federal Register** inviting the public to comment on the requirements, as required by the Paperwork Reduction Act. Public Law 104–13; 44 U.S.C. 3501–3520. In addition, pursuant to the Small Business Paperwork Relief Act of 2002, the Commission seeks comment on how it might further reduce the information collection burden for small business concerns with fewer than 25 employees. Public Law 107–198; 44 U.S.C. 3506(c)(4).

Synopsis

1. The Commission initiates this proceeding to clarify and strengthen consumers' rights under the TCPA to grant and revoke consent to receive robocalls and robotexts. Specifically, the Commission proposes to: (1) ensure that revocation of consent does not require the use of specific words or burdensome methods; (2) require that callers honor do-not-call and consent revocation requests within a reasonable time, not to exceed 24 hours of receipt; (3) codify the ruling that consumers only need to revoke consent once to stop getting all robocalls and robotexts from a specific entity; and (4) allow wireless consumers the option to stop robocalls and robotexts from their own wireless service provider. As discussed below,

the Commission seeks comment on these proposals and on the costs and benefits of the proposals, including for smaller businesses and consumers.

A. Revoking Consent in Any Reasonable Way

2. The Commission proposes to codify its 2015 ruling confirming that consumers who have provided prior express consent to receive autodialed or prerecorded voice calls may revoke such consent through any reasonable means. *See Rules and Regulations Implementing the Telephone Consumer Protection Act of 1991,* CG Docket No. 02–278, WC Docket No. 07–135, Declaratory Ruling and Order, published at 80 FR 61129, October 9, 2015. The Commission believes this will make clearer to callers and consumers that a consumer has a right to revoke consent under the TCPA. Specifically, the Commission proposes codifying a rule that would make clear that consumers may revoke prior express consent in any reasonable manner that clearly expresses a desire not to receive further calls or text messages, including using words such as ''stop,'' ''revoke,'' ''end,'' or ''opt out,'' and that callers may not infringe on that right by designating an exclusive means to revoke consent that precludes the use of any other reasonable method. The Commission seeks comment on this proposal.

3. Additionally, the Commission proposes to codify that reasonable methods to revoke consent typically include revocation requests made by text message, voicemail, or email to any telephone number or email address at which the consumer can reasonably expect to reach the caller. The Commission proposes to codify that, when a consumer uses any such method to revoke consent, doing so creates a presumption that the consumer has revoked consent, absent evidence to the contrary. For example, the use of reply text messages is a reasonable and widely recognized means for text recipients to revoke prior consent to text messages. The sending of a ''STOP'' message in reply to an incoming text message is the standard recommended by industry groups such as the Mobile Marketing Association. In addition, text messages may, on occasion, inadvertently be directed to reassigned or wrong numbers. In these instances, the text recipient may have no contact information other than the text itself, since the recipient is not the party that provided prior consent to the sender, and the only method they may have to contact the sender is with a reply text message. Thus, the Commission proposes to codify that the sending of ''STOP'' or a similar message that reasonably conveys a desire to not receive further messages in reply to an incoming text message creates a presumption that the consumer has revoked consent in a reasonable way. Should the text initiator choose to use a texting protocol that does not allow reply texts, we propose that it would bear the risk of potential liability under the TCPA unless it both provides a clear and conspicuous disclosure on each text to the consumer that two-way texting is not available due to technical limitations of the texting protocol and clearly and conspicuously provides alternative ways for a consumer to revoke consent, such as a link or instructions to text a different number. The Commission seeks comment on these proposed rules.

4. The Commission believes that these proposed rules are consistent with the Commission's prior finding that placing significant burdens on the called party who no longer wishes to receive such calls or texts is inconsistent with the TCPA and with our finding that the TCPA requires ''only that the called party clearly express his or her desire not to receive further calls'' to invoke this right to revoke consent. The Commission seeks comment on whether callers have encountered any difficulties in complying with this longstanding precedent that consumers can revoke consent via any reasonable method. Based on this experience, are there specific issues or circumstances that have arisen that the Commission should address in the context of this proceeding to provide clarity as to the factors that make the means of revocation ''reasonable'' both from a consumer's perspective and that of a caller? Has the Commission struck an appropriate balance here between protecting the consumer's privacy interests and facilitating the caller's ability to process opt-out requests?

5. The Commission also recognizes that the scope of a ''reasonable'' means to revoke consent is not unlimited. The Commission seeks comment on any such limitations it should codify. What are the most common situations in which callers are unable to process opt-out requests from consumers? Are there ways that the Commission could address these situations in this proceeding consistent with its goal not to place an unreasonable burden on consumers to opt out of robocalls? The Commission proposes to codify that callers that do not believe that consumers have used a reasonable method to convey a request to revoke consent will be afforded an opportunity to rebut the presumption on a case-by-case basis, should a complaint be filed with the Commission or finder of fact. The Commission seeks comment on the types of evidence that would suffice to rebut the presumption. For example, if the consumer directs the request to a telephone number or email address, and the caller presents evidence that the consumer lacks a reasonable basis to expect that the request will be received by it, should the Commission hold that such a method to revoke consent is not in fact reasonable? The Commission believes such a rule would balance the consumer's right to revoke consent in an easy and reasonable manner with the caller's ability to process such revocation requests. The Commission seeks comment on this proposal, including any impact on small entities.

B. Timeframe for Honoring a Do-Not-Call or Revocation Request

6. The Commission proposes to require that, within 24 hours of receipt, callers must honor company-specific do-not-call and revocation-of-consent requests for robocalls and robotexts that are subject to the TCPA. The Commission's rules currently provide no specific timeframes for honoring revocation-of-consent requests for robocalls and robotexts made to residential or wireless telephone numbers. The Commission's rules currently require callers making telemarketing calls or exempted artificial and prerecorded voice calls to residential telephone numbers and exempted package delivery calls and texts to wireless consumers to honor do-not-call requests within a reasonable time not to exceed 30 days from the date of any such request. This proposal will require amending those existing rules and establishing new rules where no specific timeframe for honoring such requests currently exists. The Commission seeks comment on this proposal, including on the 24-hour period. Is this period reasonable? Should the Commission, rather, require that revocations be honored immediately upon receipt or consider some other timeframe?

7. Consumers are understandably frustrated when they receive robocalls and robotext messages days or even weeks following a request to stop such communications. Such delays also undermine a consumer's right to determine which robocalls and robotexts they wish to receive under the privacy protections afforded by the TCPA. In addition, the Commission believes that advances in technology over the years, including automated and interactive technologies, have made the

processing of do-not-call and consent revocation requests more efficient and timely than in the past. The Commission believes that such technological advances provide callers and senders of text messages with the tools they need to process all do-not-call and consent revocation requests in near real time. The Commission seeks comment on these beliefs.

8. Consistent with the conditions imposed on other calls to wireless telephone numbers that are exempt from the prior-express-consent requirement, the Commission also proposes to amend its rules for exempted package delivery calls to require that such callers honor an opt-out request immediately. This proposal will place such callers on an equal footing with other categories of callers that have been granted an exemption to call wireless telephone numbers without prior express consent. Alternatively, is there any reason that package delivery calls should continue to be treated differently from other exempted callers to allow for up to 30 days to honor an opt-out request? The Commission believes these proposals will provide consumers with certainty that their do-not-call and consent revocation requests are honored in a timely manner, enhancing the ability of consumers to stop unwanted robocalls and robotexts. The Commission seeks comment on these proposals, including any burdens this may impose on callers, including small entities.

C. Revocation Confirmation Text Message

9. The Commission proposes to codify the *Soundbite Declaratory Ruling* clarifying that a one-time text message confirming a consumer's request that no further text messages be sent does not violate the TCPA or the Commission's rules as long as the confirmation text merely confirms the called party's opt-out request and does not include any marketing or promotional information, and the text is the only additional message sent to the called party after receipt of the opt-out request. In the *Soundbite Declaratory Ruling,* the Commission noted that ''confirmation messages ultimately benefit and protect consumers by helping to ensure, via such confirmation, that the consumer who ostensibly opted out in fact no longer wishes to receive text messages from entities from whom the consumer previously expressed an affirmative desire to receive such messages.'' The Commission believes that codifying this ruling will better ensure that both text senders and recipients are aware of it, including the limitations imposed on such one-time confirmation text messages. The Commission seeks comment on this proposal. In the time since it went into effect, have callers or consumers encountered any issues not addressed in the *Soundbite Declaratory Ruling*?

10. The Commission also proposes to codify that senders can include a request for clarification in the one-time confirmation text, provided the sender ceases all further robocalls and robotexts absent an affirmative response from the consumer that they wish to receive further communications from the sender. The Commission further propose that a lack of any response to the confirmation call or text must be treated by the sender as a revocation of consent for all robocalls and robotexts from the sender. It does so in response to Capital One's petition seeking confirmation that the text sender may request clarification in its one-time confirmation message of the scope of the recipient's revocation request when that recipient has consented to receiving multiple categories of informational messages from the sender. The Commission notes that banks and financial institutions support Capital One's request, indicating that consumers often consent to receive multiple categories of informational messages and that opt-out requests in these situations can be ambiguous as to whether the request applies to all or just certain types of those messages. Consumer groups have also expressed support for Capital One's request, provided that a lack of any response to the confirmation text message must be interpreted by the sender to mean that the consumer's revocation request was intended to encompass all robocalls and robotexts and the sender must therefore cease all further robocalls and robotexts to that consumer absent further clarification from the consumer. The Commission seeks further comment on any additional issues not fully addressed in the record.

11. Consistent with the *Soundbite Declaratory Ruling* and Capital One's request, the Commission proposes to codify that any such clarification message must not contain any marketing or advertising content or seek to persuade the recipient to reconsider their opt-out decision. Rather, this proposed clarification is strictly limited to informing the recipient of the scope of the opt-out request absent some further confirmation from the consumer that they wish to continue receiving certain categories of text messages from the sender. The Commission seeks comment on this limitation.

12. The Commission proposes to emphasize that this confirmation text message is limited to a final one-time text message absent an affirmative response from the consumer that they wish to continue to receive certain categories of informational calls or text messages from the sender. The Commission proposes that, in the absence of any such affirmative response, no further robocalls or robotexts can be made to this consumer. In addition, the Commission proposes that a ''STOP'' text sent in response to the one-time request for confirmation does not then allow the text sender to send another request for further clarification. As noted above, both industry and consumer groups support this proposal. Does the record fully address the views of all parties?

13. The Commission seeks comment on these proposals and any other related issues, such as any impact on smaller entities. Is this the appropriate limit to put on the clarification from the *Soundbite Declaratory Ruling*? Are there other limitations the Commission should impose to protect consumers' rights to opt out of text messages yet ensure callers' ability to correctly interpret consumers' intent in revoking consent? Should the Commission instead decline to offer the clarification Capital One seeks?

D. Wireless Carrier Calls to Subscribers

14. The Commission proposes to require wireless providers to honor their customers' requests to cease autodialed, prerecorded voice, and artificial voice calls, and autodialed texts. To effectuate this change, the Commission proposes to alter our prior ruling to require wireless providers to subject such calls to certain conditions that protect the privacy interests of subscribers.

15. In 1992, the Commission concluded that wireless carriers need not obtain consent prior to initiating autodialed, artificial voice, or prerecorded voice calls to their own subscribers because such communications were not charged to the called party. *See Rules and Regulations Implementing the Telephone Consumer Protection Act of 1991,* CC Docket No. 92–90, Report and Order, published at 57 FR 48333, October 23, 1992. Following this ruling, Congress amended the TCPA to grant the Commission express statutory authority to exempt from the prior-express-consent requirement calls to wireless numbers that are not charged to the called party subject to such conditions as the Commission deems necessary to protect the privacy rights afforded under the TCPA. As a result, the ability of wireless carriers to call their own subscribers without prior

express consent, where the consumer is not charged for the call, was based on the language of § 227(b)(1)(A)(iii) and was not a creation of a § 227(b)(2)(C) exemption; therefore, the Commission has not subjected this ability to conditions to protect the privacy rights of wireless subscribers that the Commission has imposed in other analogous situations where callers have been granted an exemption to make robocalls or send robotexts to wireless numbers without prior express consent.

16. This situation has created disagreements as to whether the Commission has authority to impose an opt-out requirement on communications from wireless service providers to their customers. Two wireless subscribers filed petitions seeking clarification that they can revoke consent to receive calls and messages from their wireless provider after such a request to stop such communications was denied by their wireless providers. In response to requests for comments on these petitions, wireless providers and organizations opposed the relief sought, arguing that the TCPA's prohibitions do not apply to communications from wireless providers to their customers because there is no charge to the subscribers for calls and messages to them. As a result, these commenters contend, there is no prior consent to be revoked because prior express consent is not required to make such calls under the TCPA. The Commission seeks comment on these considerations in the context of its proposed exemption.

17. The Commission proposes to revisit the 1992 ruling that ''cellular carriers need not obtain additional consent from their cellular subscribers prior to initiating autodialer and artificial and prerecorded message calls for which the cellular subscriber is not charged.'' Instead of that blanket exemption for all wireless calls for which the subscriber is not charged, the Commission proposes to create and codify a qualified exemption—based on its authority under § 227(b)(2)(C)—for informational robocalls and robotexts from wireless providers to their subscribers. More specifically, those calls would be exempt from the prior-express-consent requirement if, and only if, certain conditions are satisfied. As noted, the Commission has exercised this statutory authority to recognize certain limited exemptions in other analogous situations where such calls also are made without a charge to the called party. The Commission notes that § 227(b)(2)(C)'s authority to grant exemptions from the prior-express-consent requirement is predicated on the ability of callers to make such calls with no charge to the consumer. The Commission believes that requirement would be meaningless if all such calls or texts were deemed to be wholly outside the prior express consent requirement merely because they were free to the end user, as some wireless providers have argued. Consistent with § 227(b)(2)(C), which permits the Commission to impose such conditions it deems necessary in the interest of privacy, the Commission proposes conditions that are similar to those it imposed to protect the privacy interests of consumers in other situations where it has recognized an exemption from the prior-express-consent requirement for robocalls to wireless telephone numbers. The proposed conditions are as follows:

(A) voice calls and text messages are initiated by a wireless service provider only to an existing subscriber of that wireless service provider at a number maintained by the wireless service provider;

(B) voice calls and text messages must state the name and contact information of the wireless provider (for voice calls, these disclosures must be made at the beginning of the call);

(C) voice calls and text messages must not include any telemarketing, solicitation, or advertising;

(D) voice calls and text messages must be concise, generally one minute or less in length for voice calls or 160 characters or less in length for text messages;

(E) a wireless service provider may initiate a maximum of three voice calls or text messages during any 30-day period;

(F) a wireless service provider must offer recipients within each message an easy means to opt out of future such messages; voice calls that could be answered by a live person must include an automated, interactive voice- and/or key press-activated opt-out mechanism that enables the call recipient to make an opt-out request prior to terminating the call; voice calls that could be answered by an answering machine or voice mail service must include a toll-free number that the consumer can call to opt out of future calls; text messages must inform recipients of the ability to opt out by replying ''STOP''; and,

(G) a wireless service provider must honor opt-out requests immediately.

18. The Commission believes such an exemption, subject to the conditions imposed above, balances the privacy interests of the TCPA with the legitimate interests of wireless providers in communicating with their own subscribers. And because the TCPA only restricts calls initiated with an autodialer or using an artificial or prerecorded voice to a wireless telephone number, wireless providers can use a live agent or equipment that does not constitute an autodialer to make such calls or send texts without running afoul of the TCPA. In addition, the Commission proposes that wireless providers have the option to obtain the prior express consent of their subscribers to avoid the need to rely on this exemption and its accompanying conditions, including the numerical limits imposed on such exempted calls. The Commission seeks comment on these conditions. Are further conditions needed for calls from a wireless service provider to its subscribers? Alternatively, the Commission seeks comment on any benefits consumers receive from calls or messages that may be lost as a consequence of an opt-out or limit on the number of calls or messages sent. Are there any potential drawbacks for consumers to the conditions proposed? If so, should the Commission modify its proposed conditions to account for any such drawbacks?

19. Lastly, the Commission believes such an exemption satisfies the obligations of § 8 of the TRACED Act. Specifically, the class of parties that may make such exempted calls in these situations is strictly limited to the wireless service provider. The class of parties that may be called is limited to an existing subscriber of a wireless service provider, and the number of such calls and messages is limited to three calls within any 30-day period. To the extent that there are any calls or texts that wireless service providers are mandated to make to their subscribers pursuant to any federal or state law, the Commission seeks comment on whether such calls or texts should not be counted toward the numerical limit of such communications that are imposed in the 30-day timeframe. The Commission seeks comment on this proposal, including any burdens this proposal may impose on wireless providers, including small entities.

E. Legal Authority

20. The Commission tentatively concludes that its legal authority for the proposed rules contained herein derives from §§ 154 and 227 of the Communications Act of 1934, as amended (the Act). The Commission further proposes to rely on its authority under § 8 of the TRACED Act to establish limitations on the proposed exemption for wireless providers from the TCPA's prior-express-consent requirement. As discussed above, the Commission as the expert agency on the

TCPA has addressed issues relating to prior express consent by robocall consumers on numerous occasions. The Commission believes that these sources grant it sufficient authority to adopt the proposed rules contained herein, and it seeks comment on this conclusion. Are there any other sources of legal authority the Commission should rely on? Do any of these sources of authority not apply to the rules it proposes?

F. Proposed Effective Date

21. The Commission proposes that the rule changes set forth herein go into effect upon publication of an Order in the **Federal Register**, or for those rules that require OMB review under the Paperwork Reduction Act, upon OMB approval and publication of the notice of approval in the **Federal Register**. The Commission seeks comment on whether this proposed timeline provides a sufficient opportunity for affected parties to comply with any new requirements imposed by the proposed rules or whether a longer implementation period is warranted. The Commission also seeks comment on whether these effective dates should be the same for all affected parties, or whether it should provide more time for small entities to comply.

Initial Regulatory Flexibility Analysis

22. As required by the Regulatory Flexibility Act of 1980, as amended (RFA), the Commission has prepared this Initial Regulatory Flexibility Analysis (IRFA) of the possible significant economic impact on a substantial number of small entities by the policies and rules proposed in this *Notice of Proposed Rulemaking* (NPRM). Written public comments are requested on this IRFA. Comments must be identified as responses to the IRFA and must be filed by the deadlines for comments on the NPRM provided on the first page of this document. The Commission will send a copy of the NPRM, including this IRFA, to the Chief Counsel for Advocacy of the Small Business Administration. In addition, the NPRM and IRFA (or summaries thereof) will be published in the **Federal Register**.

A. Need for, and Objectives of, the Proposed Rules

23. The NPRM seeks comment on proposals to clarify and strengthen the right of consumers to grant or revoke consent to receive robocalls and robotexts under the TCPA. Under the Telephone Consumer Protection Act of 1991 (TCPA), certain types of calls and texts may only be sent with the prior express consent of the called party. The ability of consumers to exercise this right to provide or revoke consent is essential to protecting the privacy rights of consumers by allowing them to decide which callers may communicate with them via robocalls and robotexts.

24. The NPRM proposes to codify prior Commission rulings and adopt new requirements to ensure that the requirements relating to providing or revoking consent under the TCPA are clear to both callers and consumers. Specifically, the *NPRM* proposes to make clear that consumers may revoke prior express consent in any reasonable manner that clearly expresses a desire not to receive further calls or text messages, including using words such as ''stop,'' ''revoke,'' ''end,'' or ''opt out,'' and that callers may not infringe on that right by designating an exclusive means to revoke consent that precludes the use of any other reasonable method. The *NPRM* also proposes to require that callers honor do-not-call and revocation requests within a reasonable time not to exceed 24 hours of receipt. Further, the *NPRM* reiterates that consumers only need to revoke consent once to stop getting all calls and texts from a specific entity. It also proposes to codify that a one-time text message confirming a consumer's request that no further text messages be sent does not violate the TCPA or the Commission's rules as long as the confirmation text merely confirms the called party's opt-out request, does not include any marketing or promotional information, and the text is the only additional message sent to the called party after receipt of the opt-out request. Finally, the *NPRM* proposes to require wireless providers to honor a customer's request to cease autodialed, prerecorded voice, and artificial voice calls, and automated texts.

B. Legal Basis

25. The proposed rules are authorized under §§ 4(i), 4(j), and 227 of the Communications Act of 1934, as amended, 47 U.S.C. 154(i), 154(j), 227, and § 8 of the TRACED Act.

C. Description and Estimate of the Number of Small Entities to Which the Proposed Rules Will Apply

26. The RFA directs agencies to provide a description of and, where feasible, an estimate of the number of small entities that may be affected by the rules adopted herein. The RFA generally defines the term ''small entity'' as having the same meaning as the terms ''small business,'' ''small organization,'' and ''small governmental jurisdiction.'' In addition, the term ''small business'' has the same meaning as the term ''small-business concern'' under the Small Business Act. A ''small-business concern'' is one which: (1) is independently owned and operated; (2) is not dominant in its field of operation; and (3) satisfies any additional criteria established by the SBA.

27. *Small Businesses, Small Organizations, Small Governmental Jurisdictions.* The Commission's actions, over time, may affect small entities that are not easily categorized at present. The Commission therefore describes, at the outset, three broad groups of small entities that could be directly affected herein. First, while there are industry specific size standards for small businesses that are used in the regulatory flexibility analysis, according to data from the Small Business Administration's (SBA) Office of Advocacy, in general a small business is an independent business having fewer than 500 employees. These types of small businesses represent 99.9% of all businesses in the United States, which translates to 32.5 million businesses.

28. Next, the type of small entity described as a ''small organization'' is generally ''any not-for-profit enterprise which is independently owned and operated and is not dominant in its field.'' The Internal Revenue Service (IRS) uses a revenue benchmark of $50,000 or less to delineate its annual electronic filing requirements for small exempt organizations. Nationwide, for tax year 2020, there were approximately 447,689 small exempt organizations in the U.S. reporting revenues of $50,000 or less according to the registration and tax data for exempt organizations available from the IRS.

29. Finally, the small entity described as a ''small governmental jurisdiction'' is defined generally as ''governments of cities, counties, towns, townships, villages, school districts, or special districts, with a population of less than fifty thousand.'' U.S. Census Bureau data from the 2017 Census of Governments indicate there were 90,075 local governmental jurisdictions consisting of general purpose governments and special purpose governments in the United States. Of this number, there were 36,931 general purpose governments (county, municipal, and town or township) with populations of less than 50,000 and 12,040 special purpose governments—independent school districts with enrollment populations of less than 50,000. Accordingly, based on the 2017 U.S. Census of Governments data, the Commission estimates that at least 48,971 entities fall into the category of ''small governmental jurisdictions.''

30. *Telemarketing Bureaus and Other Contact Centers.* This industry

comprises establishments primarily engaged in operating call centers that initiate or receive communications for others-via telephone, facsimile, email, or other communication modes-for purposes such as (1) promoting clients products or services, (2) taking orders for clients, (3) soliciting contributions for a client, and (4) providing information or assistance regarding a client's products or services. These establishments do not own the product or provide the services they are representing on behalf of clients. The SBA small business size standard for this industry classifies firms having $16.5 million or less in annual receipts as small. According to U.S. Census Bureau data for 2017, there were 2,250 firms in this industry that operated for the entire year. Of this number 1,435 firms had revenue of less than $10 million. Based on this information, the majority of firms in this industry can be considered small under the SBA small business size standard.

31. *Wireless Telecommunications Carriers (except Satellite).* This industry comprises establishments engaged in operating and maintaining switching and transmission facilities to provide communications via the airwaves. Establishments in this industry have spectrum licenses and provide services using that spectrum, such as cellular services, paging services, wireless internet access, and wireless video services. The SBA size standard for this industry classifies a business as small if it has 1,500 or fewer employees. U.S. Census Bureau data for 2017 show that there were 2,893 firms in this industry that operated for the entire year. Of that number, 2,837 firms employed fewer than 250 employees. Additionally, based on Commission data in the 2022 Universal Service Monitoring Report, as of December 31, 2021, there were 594 providers that reported they were engaged in the provision of wireless services. Of these providers, the Commission estimates that 511 providers have 1,500 or fewer employees. Consequently, using the SBA's small business size standard, most of these providers can be considered small entities.

D. Description of Projected Reporting, Recordkeeping, and Other Compliance Requirements

32. In cases where consumers invoke their right to grant or revoke consent to small entity callers to receive robocalls and robotexts under the TCPA, these callers may need to implement new methods to record and track such requests to honor them within the specified timeframes. At this time however, the Commission is not in a position to determine whether, if adopted, its proposals and the matters upon which it seeks comment will require small entities to hire professionals to comply, and cannot quantify the cost of compliance with the potential rule changes discussed herein. It anticipates the information it receives in comments including where requested, cost and benefit analyses, will help the Commission identify and evaluate additional relevant compliance matters for small entities, including compliance costs and other burdens that may result from the proposals and inquiries it makes in the *NPRM.*

E. Steps Taken To Minimize Significant Economic Impact on Small Entities, and Significant Alternatives Considered

33. The RFA requires an agency to describe any significant alternatives, specifically small business alternatives, that it has considered in reaching its proposed approach, which may include the following four alternatives (among others): ''(1) the establishment of differing compliance or reporting requirements or timetables that take into account the resources available to small entities; (2) the clarification, consolidation, or simplification of compliance or reporting requirements under the rule for such small entities; (3) the use of performance, rather than design, standards; and (4) an exemption from coverage of the rule, or any part thereof, for such small entities.''

34. The *NPRM* specifically seeks comment on any costs or burdens imposed on callers to implement any of the proposals set forth in the *NPRM* which could help the Commission identify burdens for small entities and other actions that can be taken to minimize impact on small entities. For example, the *NPRM* proposes and seeks comment on what constitutes a ''reasonable'' manner to revoke consent, noting that it is not without limitation. An alternative consideration is whether callers will have an opportunity to demonstrate that a consumer has not used a reasonable means to convey their revocation of consent request. Allowing this flexibility may reduce the burden on small entities' ability to respond to process revocation requests. The *NPRM* considers any compliance costs for small businesses if the proposed rules are adopted and seeks comment on ways to minimize any such burdens. The *NPRM* also proposes that callers must honor do-not-call and revocation requests within 24-hours, and seeks comment on whether other timeframes should be considered, including whether small entities may benefit from longer timeframes to implement these requests. Many of the requirements noted in the *NPRM* have been adopted by the Commission in rulings that date back many years. As a result, the Commission anticipates that many callers have already made efforts to comply with these obligations and may have no new burdens.

35. The Commission expects to consider the economic impact on small entities, as identified in comments filed in response to the *NPRM* and this IRFA, in reaching its final conclusions and taking action in this proceeding.

F. Federal Rules That May Duplicate, Overlap, or Conflict With the Proposed Rules

36. None.

List of Subjects in 47 CFR Part 64

Communications common carriers, Reporting and recordkeeping requirements, Telecommunications, Telephone.

Federal Communications Commission.

Katura Jackson,

Federal Register Liaison Officer.

Proposed Rules

For the reasons discussed in the preamble, the Federal Communications Commission proposes to amend 47 CFR part 64 as follows:

PART 64—MISCELLANEOUS RULES RELATING TO COMMON CARRIERS

■ 1. The authority citation for part 64 continues to read as follows:

Authority: 47 U.S.C. 151, 152, 154, 201, 202, 217, 218, 220, 222, 225, 226, 227, 227b, 228, 251(a), 251(e), 254(k), 255, 262, 276, 403(b)(2)(B), (c), 616, 617, 620, 1401–1473, unless otherwise noted; Pub. L. 115–141, Div. P, sec. 503, 132 Stat. 348, 1091.

Subpart L—Restrictions on Telemarketing, Telephone Solicitations, and Facsimile Advertising

■ 2. Section 64.1200 is amended by revising paragraph (a)(9)(i)(F) and adding paragraphs (a)(9)(v), (10), and (11) and revising paragraph (d)(3) to read as follows:

§ 64.1200 Delivery restrictions.

* * * * *.

(a) * * *

(9) * * *

(i) * * *

(F) The package delivery company must offer package recipients the ability to opt out of receiving future delivery notification calls and messages and

must honor an opt-out request immediately; and,

* * * * *

(v) Calls made by a wireless service provider to an existing subscriber, provided that all of the following conditions are met:

(A) voice calls and text messages are initiated by a wireless service provider only to an existing subscriber of that wireless service provider at a number maintained by the wireless service provider;

(B) voice calls and text messages must state the name and contact information of the wireless provider (for voice calls, these disclosures must be made at the beginning of the call);

(C) voice calls and text messages must not include any telemarketing, solicitation, or advertising;

(D) voice calls and text messages must be concise, generally one minute or less in length for voice calls or 160 characters or less in length for text messages;

(E) a wireless service provider may initiate a maximum of three voice calls or text messages during any 30-day period;

(F) a wireless service provider must offer recipients within each message an easy means to opt out of future such messages; voice calls that could be answered by a live person must include an automated, interactive voice- and/or key press-activated opt-out mechanism that enables the call recipient to make an opt-out request prior to terminating the call; voice calls that could be answered by an answering machine or voice mail service must include a toll-free number that the consumer can call to opt out of future calls; text messages must inform recipients of the ability to opt out by replying ''STOP''; and,

(G) a wireless service provider must honor opt-out requests immediately.

* * * * *

(10) A called party may revoke prior express consent, including prior express written consent, to receive calls or text messages made pursuant to paragraphs (a)(1) through (3) of this section by using any reasonable method to clearly express a desire not to receive further calls or text messages from the caller or sender. The use of text message, voicemail, or email to any telephone number or email address at which the consumer can reasonably expect to reach the caller to revoke consent creates a rebuttable presumption that the consumer has revoked consent absent evidence to the contrary. The sending of ''STOP'' or a similar text message that reasonably conveys a desire to not receive further messages in reply to an incoming text message creates a presumption that the consumer has revoked consent in a reasonable way. Callers or senders of text messages covered by paragraphs (a)(1) through (3) of this section may not designate an exclusive means to request revocation of consent. Should the text initiator choose to use a texting protocol that does not allow reply texts, it must provide a clear and conspicuous disclosure on each text to the consumer that two-way texting is not available due to technical limitations of the texting protocol, and clearly and conspicuously provide reasonable alternative ways to revoke consent. All requests to revoke prior express consent or prior express written consent made in any reasonable manner must be honored in a reasonable time not to exceed 24 hours from receipt of such request.

(11) A one-time text message confirming a request to revoke consent from receiving any further text messages does not violate paragraphs (a)(1) through (2) of this section as long as the confirmation text merely confirms the text recipient's revocation request and does not include any marketing or promotional information, and is the only additional message sent to the called party after receipt of the revocation request. To the extent that the text recipient has consented to several categories of text messages from the text sender, the confirmation message may request clarification as to whether the revocation request was meant to encompass all such messages; the sender must cease all further texts absent further clarification that the recipient wishes to continue to receive certain text messages.

* * * * *

(d) * * *

(3) *Recording, disclosure of do-not-call requests.* If a person or entity making an artificial or prerecorded-voice telephone call pursuant to an exemption under § 64.1200(a)(3)(ii) through (v) or any call for telemarketing purposes (or on whose behalf such a call is made) receives a request from a residential telephone subscriber not to receive calls from that person or entity, the person or entity must record the request and place the subscriber's name, if provided, and telephone number on the do-not-call list at the time the request is made. Persons or entities making such calls (or on whose behalf such calls are made) must honor a residential subscriber's do-not-call request within a reasonable time from the date such request is made. This period may not exceed 24 hours from the receipt of such request. If such requests are recorded or maintained by a party other than the person or entity on whose behalf the call is made, the person or entity on whose behalf the call is made will be liable for any failures to honor the do-not-call request. A person or entity making an artificial or prerecorded-voice telephone call pursuant to an exemption under § 64.1200(a)(3)(ii) through (v) or any call for telemarketing purposes must obtain a consumer's prior express permission to share or forward the consumer's request not to be called to a party other than the person or entity on whose behalf a call is made or an affiliated entity.

Notices

Federal Register
Vol. 88, No. 124
Thursday, June 29, 2023

This section of the FEDERAL REGISTER contains documents other than rules or proposed rules that are applicable to the public. Notices of hearings and investigations, committee meetings, agency decisions and rulings, delegations of authority, filing of petitions and applications and agency statements of organization and functions are examples of documents appearing in this section.

UNITED STATES AFRICAN DEVELOPMENT FOUNDATION

Public Quarterly Meeting of the Board of Directors

AGENCY: United States African Development Foundation.

ACTION: Notice of meeting.

SUMMARY: The U.S. African Development Foundation (USADF) will hold its quarterly meeting of the Board of Directors to discuss the agency's programs and administration. This meeting will occur at the USADF office.

DATES: The meeting date is Tuesday, July 25, 2023, 9:00 a.m. to 12:00 noon.

ADDRESSES: The meeting location is USADF, 1400 I St. NW, Suite 1000, Washington, DC 20005.

FOR FURTHER INFORMATION CONTACT: Kerline Perry, (202)233–8805.

Authority: Public Law 96–533 (22 U.S.C. 290h).

Dated: June 26, 2023.

Wendy Carver,

Business Manager.

[FR Doc. 2023–13870 Filed 6–28–23; 8:45 am]

BILLING CODE 6117–01–P

DEPARTMENT OF AGRICULTURE

Submission for OMB Review; Comments Requested

The Department of Agriculture will submit the following information collection requirement(s) to OMB for review and clearance under the Paperwork Reduction Act of 1995, Public Law 104–13 on or after the date of publication of this notice. Comments are requested regarding: whether the collection of information is necessary for the proper performance of the functions of the agency, including whether the information will have practical utility; the accuracy of the agency's estimate of burden including the validity of the methodology and assumptions used; ways to enhance the quality, utility and clarity of the information to be collected; and ways to minimize the burden of the collection of information on those who are to respond, including through the use of appropriate automated, electronic, mechanical, or other technological collection techniques or other forms of information technology Comments regarding these information collections are best assured of having their full effect if received by July 31, 2023. Written comments and recommendations for the proposed information collection should be submitted within 30 days of the publication of this notice on the following website *www.reginfo.gov/public/do/PRAMain.* Find this particular information collection by selecting ''Currently under 30-day Review—Open for Public Comments'' or by using the search function

An agency may not conduct or sponsor a collection of information unless the collection of information displays a currently valid OMB control number and the agency informs potential persons who are to respond to the collection of information that such persons are not required to respond to the collection of information unless it displays a currently valid OMB control number.

Agricultural Marketing Service

Title: Reporting and Recordkeeping Requirements for 7 CFR, part 29.

OMB Control Number: 0581–0056.

Summary of Collection: The Fair and Equitable Tobacco Reform Act of 2004 (7 U.S.C. 518) eliminated price supports and marketing quotas for all tobacco beginning with the 2005 crop year. Mandatory inspection and grading of domestic and imported tobacco were eliminated as well as the mandatory pesticide testing of imported tobacco and the tobacco Market News Program. The Tobacco Inspection Act (7 U.S.C. 511) requires that all tobacco sold at designated auction markets in the U.S. be inspected and graded. Provision is also made for interested parties to request inspection, pesticide testing and grading services on an ''as needed'' basis. The Act also provides for the establishment and maintenance of tobacco standards for U.S. grown types and the collection and dissemination of market news which are funded by appropriated money.

Need and Use of the Information: Information is collected through various forms and other documents for the inspection and certification process. Upon receiving request information from tobacco dealers and/or manufacturers, tobacco inspectors will pull samples and apply U.S. Standard Grades to tobacco samples providing the customer a Tobacco Inspection Certificate (TB–92). Also, samples can be submitted to a USDA laboratory for pesticide testing and a detailed analysis is provided to the customer.

Description of Respondents: Business or other for-profit.

Number of Respondents: 50.

Frequency of Responses: Recordkeeping; Reporting; On occasion.

Total Burden Hours: 3,651.

Agricultural Marketing Service

Title: Discharge and Delivery Survey Summary and Rate Schedule Forms.

OMB Control Number: 0581–0317.

Summary of Collection: The Food for Peace Act (specifically Pub. L. 480 Title II); Section 416(b) of the Agricultural Act of 1949; Food for Progress Act of 1985; 2002 and 2008 Farm Bills authorizing the McGovern-Dole International Food for Education Program; and Commodity Credit Corporation (CCC) Charter Act, all as amended, authorize the International Procurement Division to procure, sell, and transport, as well as sample, inspect and survey, agricultural commodities at both domestic and foreign locations for use in international food aid program. The Kansas City Commodity Office (KCCO) acting under the authority granted by these acts, purchase discharge survey services conducted at the foreign destinations to ensure count and condition of the commodities shipped. Agricultural Marketing Service (AMS) will collect information using forms KC–334, Discharge/Delivery Survey Summary and KC–337, Rate Schedule.

Need and Use of the Information: The information collected on the KC–334 form is a summary of the amount of cargo delivered versus manifested quantity, the amount and type of damage, etc. The KC–337 form is used to obtain rates that the survey companies charge to perform surveys, by country/region. Without the

information CCC could not meet program requirements.

Description of Respondents: Business or other for-profit; Not for-profit institutions.

Number of Respondents: 41.

Frequency of Responses: Recordkeeping; Reporting: On occasion; Quarterly; Weekly; Semi-annually; Monthly; Annually.

Total Burden Hours: 234.

Levi S. Harrell,

Departmental Information Collection Clearance Officer.

BILLING CODE 3410–02–P

DEPARTMENT OF AGRICULTURE

Animal and Plant Health Inspection Service

[Docket No. APHIS–2023–0049]

Notice of Request for Revision to and Extension of Approval of an Information Collection; Importation of Live Swine, Pork and Pork Products, and Swine Semen From the European Union

AGENCY: Animal and Plant Health Inspection Service, USDA.

ACTION: Revision to and extension of approval of an information collection; comment request.

SUMMARY: In accordance with the Paperwork Reduction Act of 1995, this notice announces the Animal and Plant Health Inspection Service's intention to request a revision to and extension of approval of an information collection associated with the importation of live animals, animal germplasm, and animal products into the United States from the European Union.

DATES: We will consider all comments that we receive on or before August 28, 2023.

ADDRESSES: You may submit comments by either of the following methods:

- *Federal eRulemaking Portal:* Go to *www.regulations.gov.* Enter APHIS–2023–0049 in the Search field. Select the Documents tab, then select the Comment button in the list of documents.
- *Postal Mail/Commercial Delivery:* Send your comment to Docket No. APHIS–2023–0049, Regulatory Analysis and Development, PPD, APHIS, Station 3A–03.8, 4700 River Road, Unit 118, Riverdale, MD 20737–1238.

Supporting documents and any comments we receive on this docket may be viewed at *regulations.gov* or in our reading room, which is located in Room 1620 of the USDA South Building, 14th Street and Independence Avenue SW, Washington, DC. Normal reading room hours are 8 a.m. to 4:30 p.m., Monday through Friday, except holidays. To be sure someone is there to help you, please call (202) 799–7039 before coming.

FOR FURTHER INFORMATION CONTACT: For information on the importation of animals and animal products into the United States from the European Union, contact Dr. Alexandra MacKenzie, Senior Veterinary Medical Officer, Live Animal Imports/Ruminants, Swine, Semen, and Embryos, Strategy and Policy, VS, APHIS, 4700 River Road, Unit 39, Riverdale, MD 20737; (301) 851–3411; email: *alexandra.mackenzie@usda.gov.* For more information on the information collection reporting process, contact Mr. Joseph Moxey, APHIS' Paperwork Reduction Act Coordinator, at (301) 851–2483; *joseph.moxey@usda.gov.*

SUPPLEMENTARY INFORMATION:

Title: Importation of Live Swine, Pork and Pork Products, and Swine Semen From the European Union.

OMB Control Number: 0579–0218.

Type of Request: Revision to and extension of approval of an information collection.

Abstract: Under the Animal Health Protection Act (7 U.S.C. 8301 *et seq.*), the Animal and Plant Health Inspection Service (APHIS) of the U.S. Department of Agriculture, among other things, has the authority to detect, control, or eradicate pests or diseases of livestock or poultry. The Secretary may also prohibit or restrict the import or export of any animal or related material if necessary to prevent the spread of any livestock or poultry pest or disease. Disease prevention is the most effective method for maintaining a healthy animal population and for enhancing APHIS' ability to compete in the world market of animal and animal product trade.

In connection with its disease prevention mission, APHIS regulates the importation of animals and animal products into the United States to guard against the introduction of animal diseases not present or prevalent in the United States. The regulations in 9 CFR parts 93, 94, and 98, prohibit or restrict the importation of specified animals, germplasm, and animal products to prevent the introduction of diseases such as classical swine fever (CSF), foot-and-mouth disease, swine vesicular disease, and African swine fever. In part 93, subpart E, among other things, provides importation requirements for live swine. Sections 94.2, 94.4, 94.8, 94.9, and 94.12 through 94.14 deal with the importation of pork and pork products from regions where these diseases exist. Section 94.10 addresses the requirements for the importation of live swine from regions where CSF exists. Section 94.13 concerns restrictions on the importation of pork or pork products from specified regions. Section 98.38 defines APHIS' requirements for the importation of swine semen.

APHIS determined that breeding swine, pork and pork products, and swine germplasm imported from specific regions of the European Union (EU) in accordance with other APHIS import requirements, pose a low risk of introducing foreign animal diseases into the United States. To further ensure that CSF is not introduced into the United States, regulations in parts 93, 94, and 98 allow, under specified conditions, the importation of live swine, pork and pork products, and swine germplasm from the APHIS-defined EU CSF region. These requirements necessitate the use of several information collection activities, including certification statements for the importation of pork, pork products, live swine, and swine germplasm.

We are asking the Office of Management and Budget (OMB) to approve our use of these information collection activities, as described, for an additional 3 years.

The purpose of this notice is to solicit comments from the public (as well as affected agencies) concerning our information collection. These comments will help us:

(1) Evaluate whether the collection of information is necessary for the proper performance of the functions of the Agency, including whether the information will have practical utility;

(2) Evaluate the accuracy of our estimate of the burden of the collection of information, including the validity of the methodology and assumptions used;

(3) Enhance the quality, utility, and clarity of the information to be collected; and

(4) Minimize the burden of the collection of information on those who are to respond, through use, as appropriate, of automated, electronic, mechanical, and other collection technologies; *e.g.,* permitting electronic submission of responses.

Estimate of burden: The public burden for this collection of information is estimated to average 0.96 hours per response.

Respondents: Foreign animal health officials and importers of live swine, pork and pork products, and swine semen.

Estimated annual number of respondents: 16.

Estimated annual number of responses per respondent: 473.

Estimated annual number of responses: 7,566.

Estimated total annual burden on respondents: 7,230 hours. (Due to averaging, the total annual burden hours may not equal the product of the annual number of responses multiplied by the reporting burden per response.)

All responses to this notice will be summarized and included in the request for OMB approval. All comments will also become a matter of public record.

Done in Washington, DC, this 23rd day of June 2023.

Michael Watson,

Acting Administrator, Animal and Plant Health Inspection Service.

[FR Doc. 2023–13803 Filed 6–28–23; 8:45 am]

BILLING CODE 3410–34–P

DEPARTMENT OF COMMERCE

International Trade Administration

TRADE AND DEVELOPMENT AGENCY

[Docket Number: 230615–0150]

Change in Deadline for Public Comments on Climate Adaptation Export Competitiveness Request for Information

AGENCY: U.S. Department of Commerce, International Trade Administration (ITA), U.S. Trade and Development Agency (USTDA).

ACTION: Notice and request for public comments; extension of comment period.

SUMMARY: On May 2, 2023, the International Trade Administration (ITA) and the U.S. Agency Trade and Development Agency (USTDA) published in the **Federal Register** a request for public comment on climate adaptation and resilience-related technologies and services to enhance the U.S. government's understanding of opportunities and challenges for U.S. exporters in these sectors. ITA and USTDA have determined that an extension of the comment period until July 28, 2023, is appropriate. Comments previously submitted need not be resubmitted and will be fully considered.

DATES: The comment period for the notice published on May 2, 2023, requesting public comments on climate adaptation export competitiveness, is extended from June 30, 2023, to July 28, 2023.

ADDRESSES: You may submit electronic comments, identified by Docket Number: 230417–0103 via the Federal e-Rulemaking Portal. Go to *https://www.regulations.gov* and enter Docket Number: 230417–0103 in the Search box. Click on the ''Comment'' icon, complete the required fields, and enter or attach your comments.

If you are unable to comment via *regulations.gov,* you may contact *climate@trade.gov* for instructions on submitting your comment.

Instructions: Comments sent by any other method, to any other address or individual, or received after the end of the comment period, may not be considered by ITA or USTDA. Comments received before the deadline are a part of the public record and will generally be posted for public viewing on *www.regulations.gov* without change.

Commenters should include the name of the person or organization filing the comment. All personal identifying information (for example, name, address) voluntarily submitted by the commenter may be publicly accessible. ITA and USTDA will not accept anonymous comments.

For those seeking to submit confidential business information (CBI) for government use only, please clearly mark such submissions as CBI and submit an accompanying redacted version to be made public.

FOR FURTHER INFORMATION CONTACT:

ITA, Anna Cron, International Trade Administration, 1401 Constitution Ave. NW, Washington, DC 20230; telephone: (202) 843–2376; email: *climate@trade.gov.* Please direct media inquiries to ITA's Office of Public Affairs (202) 482–3809 or *publicaffairs@trade.gov.*

USTDA, Eric Haxthausen, U.S. Trade and Development Agency; 1101 Wilson Blvd., Suite 1100, Arlington, VA 22209; telephone: (703) 875–4357; email: *climateadaptation@ustda.gov.* Please direct media inquiries to Paul Marin in USTDA's Office of Public Affairs at (703) 875–4357.

SUPPLEMENTARY INFORMATION: On May 2, 2023, ITA and USTDA published in the **Federal Register** a request for public comment on climate adaptation export competitiveness (88 FR 27552) to align U.S. government trade promotion and trade policy activities to those sectors and markets that present the greatest opportunities for exporters of climate adaptation and resilience-related technologies and services, as well as to address relevant trade barriers and promote U.S. industry competitiveness, as part of the initiative under Executive Order 14008, ''Tackling the Climate Crisis at Home and Abroad'' (86 FR 7619). E.O. 14008 puts climate considerations at the forefront of U.S. foreign policy and national security. The request for public comment stated that the comment period would close June 30, 2023. An extension of the comment period will provide additional opportunity for the public to prepare comments to address the questions posed by ITA and USTDA. Therefore, ITA and USTDA are extending the end of the comment period from June 30, 2023, to July 28, 2023. Comments previously submitted need not be resubmitted and will be fully considered.

Dated: June 21, 2023.

Man K. Cho,

Deputy Director, Office of Energy and Environmental Industries.

Eric M. Haxthausen,

Senior Advisor for Climate, Partnerships, and Innovation, U.S. Trade and Development Agency.

BILLING CODE 3510–DR–P

DEPARTMENT OF COMMERCE

National Institute of Standards and Technology

Open Meetings of the Internet of Things Advisory Board

AGENCY: National Institute of Standards and Technology (NIST).

ACTION: Notice of open meetings.

SUMMARY: The Internet of Things (IoT) Advisory Board will meet August 22–23, 2023, and September 26–27, 2023, from 11 a.m. until 5 p.m., eastern time. All sessions will be open to the public.

DATES: The meetings will be held on August 22–23, 2023, and September 26–27, 2023, from 11 a.m. until 5 p.m., eastern time.

ADDRESSES: The meetings will be conducted virtually via Webex webcast hosted by the National Cybersecurity Center of Excellence (NCCoE) at NIST. Please note registration instructions under the **SUPPLEMENTARY INFORMATION** section of this notice.

FOR FURTHER INFORMATION CONTACT: Barbara Cuthill, Information Technology Laboratory, National Institute of Standards and Technology, Telephone: (301) 975–3273, Email address: *barbara.cuthill@nist.gov.*

SUPPLEMENTARY INFORMATION: Pursuant to the Federal Advisory Committee Act, as amended, 5 U.S.C. 1001 *et seq.,* notice is hereby given that the IoT Advisory Board will hold open meetings on Tuesday, August 22 and Wednesday,

August 23, 2023; and Tuesday, September 26, 2023, and Wednesday, September 27, 2023, from 11 a.m. until 5 p.m., eastern time. All sessions will be open to the public. The IoT Advisory Board is authorized by section 9204(b)(5) of the William M. (Mac) Thornberry National Defense Authorization Act for Fiscal Year 2021 (Pub. L. 116–283) and advises the IoT Federal Working Group convened by the Secretary of Commerce pursuant to section 9204(b)(1) of the Act on matters related to the Federal Working Group's activities. Details regarding the IoT Advisory Board's activities are available at *https://www.nist.gov/itl/applied-cybersecurity/nist-cybersecurity-iot-program/internet-things-advisory-board.*

The agendas for the August and September meetings are expected to focus on establishing consensus on the recommendations to be included in the IoT Advisory Board's report for the IoT Federal Working Group.

The recommendations and discussions are expected to focus on the specific focus areas for the report cited in the legislation and the charter:

- Smart traffic and transit technologies.
- Augmented logistics and supply chains.
- Sustainable infrastructure.
- Precision agriculture.
- Environmental monitoring.
- Public safety.
- Health care.

In addition, the IoT Advisory Board may discuss other elements that the legislation called for in the report:

- whether adequate spectrum is available to support the growing Internet of Things and what legal or regulatory barriers may exist to providing any spectrum needed in the future;
- policies, programs, or multi-stakeholder activities that—
  - promote or are related to the privacy of individuals who use or are affected by the Internet of Things;
  - may enhance the security of the Internet of Things, including the security of critical infrastructure;
  - may protect users of the Internet of Things; and
  - may encourage coordination among Federal agencies with jurisdiction over the Internet of Things.

Note that agenda items may change without notice. The final agendas will be posted on the IoT Advisory Board web page: *https://www.nist.gov/itl/applied-cybersecurity/nist-cybersecurity-iot-program/internet-things-advisory-board.*

Public Participation: Written comments from the public are invited and may be submitted electronically by email to Barbara Cuthill at the contact information indicated in the **FOR FURTHER INFORMATION CONTACT** section of this notice by 5 p.m. on August 15 for the August meeting, or by 5 p.m. on September 19 for the September meeting, for advance distribution to members.

Each IoT Advisory Board meeting agenda will include a period, not to exceed sixty minutes, for submitted comments from the public to be presented. Submitted comments from the public will be selected on a first-come, first-served basis and limited to five minutes per person for oral presentation if requested by the commenter.

Members of the public who wish to expand upon their submitted statements, those who had wished to submit a comment but could not be accommodated on the agenda, and those who were unable to attend the meeting via webinar are invited to submit written statements. In addition, written statements are invited and may be submitted to the IoT Advisory Board at any time. All written statements should be directed to the IoT Advisory Board Secretariat, Information Technology Laboratory by email to: *Barbara.Cuthill@nist.gov.*

Admittance Instructions: Participants planning to attend via webinar must register via the instructions found on the IoT Advisory Board's page *https://www.nist.gov/itl/applied-cybersecurity/nist-cybersecurity-iot-program/internet-things-advisory-board.*

Alicia Chambers,

NIST Executive Secretariat.

BILLING CODE 3510–13–P

DEPARTMENT OF COMMERCE

National Oceanic and Atmospheric Administration

Agency Information Collection Activities; Submission to the Office of Management and Budget (OMB) for Review and Approval; Comment Request; Marine Recreational Information Program Fishing Effort Survey

The Department of Commerce will submit the following information collection request to the Office of Management and Budget (OMB) for review and clearance in accordance with the Paperwork Reduction Act of 1995, on or after the date of publication of this notice. We invite the general public and other Federal agencies to comment on proposed, and continuing information collections, which helps us assess the impact of our information collection requirements and minimize the public's reporting burden. Public comments were previously requested via the **Federal Register** on April 11, 2023 (88 FR 21628) during a 60-day comment period. This notice allows for an additional 30 days for public comments.

Agency: National Oceanic and Atmospheric Administration (NOAA), Commerce.

Title: Marine Recreational Information Program, Fishing Effort Survey.

OMB Control Number: 0648–0652.

Form Number(s): None.

Type of Request: Regular submission (revision of a current information collection).

Number of Respondents: 183,333.

Average Hours per Response: 5 minutes.

Total Annual Burden Hours: 15,278.

Needs and Uses: This is a request for revision and extension of an approved information collection. The request includes a new pilot study to test a shorter reference period that will increase the utility of survey data and estimates for fisheries managers and stock assessment scientists by providing greater resolution and more timely access to survey products. Additionally, the Reporting Sensitivity Experiment survey has been completed and that collection will be removed from this control number.

Marine recreational anglers are surveyed to collect catch and effort data, fish biology data, and angler socioeconomic characteristics. These data are required to carry out provisions of the Magnuson-Stevens Fishery Conservation and Management Act (16 U.S.C. 1801 *et seq.*), as amended, regarding conservation and management of fishery resources.

Marine recreational fishing catch and effort data are collected through a combination of mail surveys, telephone surveys, and on-site intercept surveys with recreational anglers. The Marine Recreational Information Program (MRIP) Fishing Effort Survey (FES) is a self-administered, household mail survey that samples from a residential address frame to collect data on the number of recreational anglers and the number of recreational fishing trips. The survey estimates marine recreational fishing activity for all coastal states from Maine through Mississippi, as well as Hawaii and Puerto Rico. Currently, MRIP produces estimates for two-month reference waves. The proposed collection will include experimental work to evaluate shorter reference

periods that would more fully support fisheries management and stock assessment needs.

FES estimates are combined with estimates derived from complementary surveys of fishing trips, the Access-Point Angler Intercept Survey, to estimate total, state-level fishing catch, by species. These estimates are used in the development, implementation, and monitoring of fishery management programs by NOAA Fisheries, regional fishery management councils, interstate marine fisheries commissions, and state fishery agencies.

Affected Public: Individuals or households.

Frequency: On occasion.

Respondent's Obligation: Voluntary.

Legal Authority: Magnuson-Stevens Fishery Conservation and Management Act.

This information collection request may be viewed at *www.reginfo.gov.* Follow the instructions to view the Department of Commerce collections currently under review by OMB.

Written comments and recommendations for the proposed information collection should be submitted within 30 days of the publication of this notice on the following website *www.reginfo.gov/public/do/PRAMain.* Find this particular information collection by selecting ''Currently under 30-day Review—Open for Public Comments'' or by using the search function and entering either the title of the collection or the OMB Control Number 0648–0652.

Sheleen Dumas,

Department PRA Clearance Officer, Office of the Under Secretary for Economic Affairs, Commerce Department.

DEPARTMENT OF COMMERCE

National Oceanic and Atmospheric Administration

[RTID 0648–XD111]

New England Fishery Management Council; Public Meeting

AGENCY: National Marine Fisheries Service (NMFS), National Oceanic and Atmospheric Administration (NOAA), Commerce.

ACTION: Notice of a public meeting.

SUMMARY: The New England Fishery Management Council (Council) is scheduling a public meeting of its Monkfish Research Set-Aside Working Group via webinar to consider actions affecting New England fisheries in the exclusive economic zone (EEZ). Recommendations from this group will be brought to the full Council for formal consideration and action, if appropriate.

DATES: This webinar will be held on Monday, July 24, 2023, at 9 a.m.

ADDRESSES:

Webinar registration URL information: https://attendee.gotowebinar.com/register/5103572767688354907.

Council address: New England Fishery Management Council, 50 Water Street, Mill 2, Newburyport, MA 01950.

FOR FURTHER INFORMATION CONTACT: Thomas A. Nies, Executive Director, New England Fishery Management Council; telephone: (978) 465–0492.

SUPPLEMENTARY INFORMATION:

Agenda

The Monkfish Research Set-Aside (RSA) Working Group will meet to discuss any additional challenges to the Monkfish RSA program not previously identified. They will also discuss potential solutions to improve the Monkfish RSA program. For each potential solution, identify a concern/challenge that the solution addresses and any pros and cons for the potential solution. These will be further evaluated by working group members.

Other business may be discussed, as necessary.

Although non-emergency issues not contained on the agenda may come before this Council for discussion, those issues may not be the subject of formal action during this meeting. Council action will be restricted to those issues specifically listed in this notice and any issues arising after publication of this notice that require emergency action under section 305(c) of the Magnuson-Stevens Act, provided the public has been notified of the Council's intent to take final action to address the emergency. The public also should be aware that the meeting will be recorded. Consistent with 16 U.S.C. 1852, a copy of the recording is available upon request.

Special Accommodations

This meeting is physically accessible to people with disabilities. Requests for sign language interpretation or other auxiliary aids should be directed to Thomas A. Nies, Executive Director, at (978) 465–0492, at least 5 days prior to the meeting date.

Authority: 16 U.S.C. 1801 *et seq.*

Dated: June 26, 2023.

Rey Israel Marquez,

Acting Deputy Director, Office of Sustainable Fisheries, National Marine Fisheries Service.

[RTID 0648–XD115]

Mid-Atlantic Fishery Management Council (MAFMC); Public Meeting

AGENCY: National Marine Fisheries Service (NMFS), National Oceanic and Atmospheric Administration (NOAA), Commerce.

ACTION: Notice; public meeting.

SUMMARY: The MAFMC will hold a public meeting (webinar) of its Mackerel, Squid, and Butterfish (MSB) Advisory Panel. See **SUPPLEMENTARY INFORMATION** for agenda details.

DATES: The meeting will be held on Friday, July 14, 2023, from 9 a.m. to 12 p.m.

ADDRESSES: Webinar connection information will be posted to the calendar prior to the meeting at *www.mafmc.org.*

Council address: Mid-Atlantic Fishery Management Council, 800 N. State Street, Suite 201, Dover, DE 19901; telephone: (302) 674–2331; *www.mafmc.org.*

FOR FURTHER INFORMATION CONTACT: Christopher M. Moore, Ph.D., Executive Director, Mid-Atlantic Fishery Management Council, telephone: (302) 526–5255.

SUPPLEMENTARY INFORMATION: The main purpose of the meeting is for the Advisory Panel (AP) to create Fishery Performance Reports that include advisor input on specifications and management measures for Atlantic mackerel and longfin squid, which have management track stock assessments underway. The AP will also review in-progress analyses being done to evaluate the historical performance of the Scup Gear Restricted Areas (GRAs), which impact squid fishing. Public comments will also be taken.

Special Accommodations

The meeting is physically accessible to people with disabilities. Requests for sign language interpretation or other auxiliary aid should be directed to Shelley Spedden, (302) 526–5251, at least 5 days prior to the meeting date.

Authority: 16 U.S.C. 1801 *et seq.*

Dated: June 26, 2023.

BILLING CODE 3510–22–P

DEPARTMENT OF COMMERCE

Patent and Trademark Office

[Docket No. PTO–C–2023–0009]

Study of the Patent Pro Bono Programs; Request for Comments; Extension of the Comment Period

AGENCY: United States Patent and Trademark Office, U.S. Department of Commerce.

ACTION: Request for comments; extension of the comment period.

SUMMARY: The United States Patent and Trademark Office (USPTO) recently sought public comments on topics related to the study of the patent pro bono programs identified in the Unleashing American Innovators Act of 2022. This study builds on the work the USPTO has conducted for over a decade, and has scaled during the Biden Administration, to bring more people in America into the innovation ecosystem. The USPTO believes that broadening access to the intellectual property system will create more jobs, foster economic prosperity, and promote the development of solutions for societal challenges. In response to stakeholder feedback, the USPTO is extending the comment period until August 11, 2023, to give interested members of the public additional time to submit comments.

DATES: Comments must be received by August 11, 2023.

ADDRESSES: For reasons of Government efficiency, comments must be submitted through the Federal eRulemaking Portal at *www.regulations.gov.* To submit comments via the portal, enter docket number PTO–C–2023–0009 on the homepage and click ''search.'' The site will provide a search results page listing all documents associated with this docket. Find a reference to this request for comments and click on the ''Comment'' icon, complete the required fields, and enter or attach your comments. Attachments to electronic comments will be accepted in ADOBE® portable document format (PDF) or MICROSOFT WORD® format. Since comments will be made available for public inspection, information that the submitter does not desire to make public, such as an address or phone

number, should not be included in the comments.

Visit the Federal eRulemaking Portal for additional instructions on providing comments via the portal. If electronic submission of comments is not feasible due to a lack of access to a computer and/or the internet, please contact the USPTO using the contact information below for special instructions regarding how to submit comments by mail or by hand delivery.

FOR FURTHER INFORMATION CONTACT: Will Covey, Deputy General Counsel for Enrollment and Discipline and Director of the Office of Enrollment and Discipline, at 571–272–4097.

SUPPLEMENTARY INFORMATION: On April 12, 2023, the USPTO sought input from the public on the patent pro bono programs to evaluate the programs and make recommendations and improvements that will strengthen their reach and impact. See Study of the Patent Pro Bono Programs; Notice of Public Listening Sessions and Request for Comments, 88 FR 22012. The notice requested public comments by July 11, 2023.

In view of the importance of this effort, and in response to stakeholder feedback, the USPTO is extending the period for public comments on the patent pro bono programs until August 11, 2023. As stated in the April 12, 2023, notice, the USPTO seeks feedback from a broad range of stakeholders, including, but not limited to, inventors, small businesses, entrepreneurs, patent attorneys, patent agents, law firms, nonprofit organizations, academic institutions, public interest groups, and the general public. The USPTO desires feedback from stakeholders so it can, as appropriate, evaluate the programs and make recommendations to Congress regarding possible administrative and legislative actions. All other information provided in the April 12, 2023, notice remains unchanged. Previously submitted comments do not need to be resubmitted.

Katherine K. Vidal,

Under Secretary of Commerce for Intellectual Property and Director of the United States Patent and Trademark Office.

[FR Doc. 2023–13869 Filed 6–28–23; 8:45 am]

BILLING CODE 3510–16–P

COMMODITY FUTURES TRADING COMMISSION

Global Markets Advisory Committee

AGENCY: Commodity Futures Trading Commission.

ACTION: Notice of meeting.

SUMMARY: The Commodity Futures Trading Commission (CFTC) announces that on July 17, 2023, from 9 a.m. to 4 p.m. (Eastern Daylight Time), the Global Markets Advisory Committee (GMAC or Committee) will hold an in-person meeting for GMAC members at the New York Stock Exchange, 11 Wall Street, New York, New York, with options for the public to attend virtually. At this meeting, the GMAC will focus on topics related to U.S. Treasury market reforms, swap block thresholds, and tokenization of assets. The GMAC will also address procedural matters, including topics of discussion on a forward-looking basis.

DATES: The meeting will be held on July 17, 2023, from 9 a.m. to 4 p.m. (Eastern Standard Time). Members of the public who wish to submit written statements in connection with the meeting should submit them by July 24, 2023.

ADDRESSES: The meeting will take place at the New York Stock Exchange, 11 Wall Street, New York, New York, for GMAC members. Members of the public may attend the meeting virtually via teleconference or live webcast. You may submit public comments, identified by Global Markets Advisory Committee, through the CFTC website at *https://comments.cftc.gov.* Follow the instructions for submitting comments through the Comments Online process on the website. If you are unable to submit comments online, contact Brigitte Weyls, Designated Federal Officer, via the contact information listed below to discuss alternate means of submitting your comments. Any statements submitted in connection with the committee meeting will be made available to the public, including publication on the CFTC website, *https://www.cftc.gov.*

FOR FURTHER INFORMATION CONTACT: Brigitte Weyls, GMAC Designated Federal Officer, Commodity Futures Trading Commission, 77 West Jackson Blvd., Suite 800, Chicago, IL 60604; (312) 596–0700; or Gates S. Hurand, GMAC Alternate Designated Federal Officer, Commodity Futures Trading Commission, 290 Broadway, 6th Floor, New York, New York 10007 (646) 746–9700, *GMAC_Submissions@CFTC.gov.*

SUPPLEMENTARY INFORMATION: Members of the public may listen to the meeting by telephone by calling a domestic or international toll or toll-free number to connect to a live, listen-only audio feed. Call-in participants should be prepared to provide their first name, last name, and affiliation. The meeting will also be open to the public via teleconference.

Domestic Toll and Toll-Free Numbers:

COMMODITY FUTURES TRADING COMMISSION

Agricultural Advisory Committee

AGENCY: Commodity Futures Trading Commission.

ACTION: Notice of meeting.

SUMMARY: The Commodity Futures Trading Commission (CFTC) announces that on July 19, 2023, from 9:00 a.m. to 10:45 a.m. (Eastern Daylight Time), the Agricultural Advisory Committee (AAC or Committee) will hold an in-person public meeting at the CFTC's Washington, DC headquarters with options for the public to attend virtually. At this meeting, the AAC will discuss topics related to the agricultural economy, including geopolitical and sustainability issues, as well as recent developments in the agricultural derivatives markets.

DATES: The meeting will be held on July 19, 2023, from 9:00 a.m. to 10:45 a.m. (Eastern Daylight Time). Members of the

public who wish to submit written statements in connection with the meeting should submit them by July 26, 2023.

ADDRESSES: The meeting will take place in the Conference Center at the CFTC's headquarters, Three Lafayette Centre, 1155 21st Street NW, Washington, DC 20581. You may submit public comments, identified by ''Agricultural Advisory Committee,'' through the CFTC website at *https://comments.cftc.gov.* Follow the instructions for submitting comments through the Comments Online process on the website. If you are unable to submit comments online, contact Swati Shah, Designated Federal Officer, via the contact information listed below to discuss alternate means of submitting your comments. Any statements submitted in connection with the committee meeting will be made available to the public, including publication on the CFTC website, *https://www.cftc.gov.*

FOR FURTHER INFORMATION CONTACT: Swati Shah, AAC Designated Federal Officer, Commodity Futures Trading Commission, Three Lafayette Centre, 1155 21st Street NW, Washington, DC; (202) 418–5042; or *aac@cftc.gov.*

SUPPLEMENTARY INFORMATION: The meeting will be open to the public with seating on a first-come, first-served basis. Members of the public may also listen to the meeting by telephone by calling a domestic or international toll or toll-free number to connect to a live, listen-only audio feed. Call-in participants should be prepared to provide their first name, last name, and affiliation.

Domestic Toll-Free Number: 833–435–1820 or 833–568–8864.

Domestic Toll Number: 1–669–254–5252 or 1–646–828–7666 or 1–646–964–1167 or 1–551–285–1373 or 1–669–216–1590 or 1–415–449–4000.

International Toll- and Toll-Free Numbers: Will be posted on the CFTC's website, *https://www.cftc.gov,* on the page for the meeting, under Related Links.

Call-In/Webinar ID: 161 586 1406.

Pass Code/Pin Code: 609636.

Members of the public may also view a live webcast of the meeting via the *https://www.cftc.gov* website. The meeting agenda may change to accommodate other Committee priorities. For agenda updates, please visit *https://www.cftc.gov/About/AdvisoryCommittees/AAC.*

After the meeting, a transcript of the meeting will be published through a link on the CFTC's website, *https://www.cftc.gov.* Persons requiring special accommodations to attend the meeting because of a disability should notify the contact person above.

(Authority: 5 U.S.C. 1009(a)(2).)

Dated: June 26, 2023.

Robert Sidman,

Deputy Secretary of the Commission.

BILLING CODE 6351–01–P

DEPARTMENT OF DEFENSE

Department of the Army

[Docket ID: USA–2023–HQ–0011]

Proposed Collection; Comment Request

AGENCY: Department of the Army, Department of Defense (DoD).

ACTION: 60-Day information collection notice.

SUMMARY: In compliance with the *Paperwork Reduction Act of 1995,* the Department of the Army announces a proposed public information collection and seeks public comment on the provisions thereof. Comments are invited on: whether the proposed collection of information is necessary for the proper performance of the functions of the agency, including whether the information shall have practical utility; the accuracy of the agency's estimate of the burden of the proposed information collection; ways to enhance the quality, utility, and clarity of the information to be collected; and ways to minimize the burden of the information collection on respondents, including through the use of automated collection techniques or other forms of information technology.

DATES: Consideration will be given to all comments received by August 28, 2023.

ADDRESSES: You may submit comments, identified by docket number and title, by any of the following methods:

Federal eRulemaking Portal: http://www.regulations.gov. Follow the instructions for submitting comments.

Mail: Department of Defense, Office of the Assistant to the Secretary of Defense for Privacy, Civil Liberties, and Transparency, 4800 Mark Center Drive, Mailbox #24, Suite 08D09, Alexandria, VA 22350–1700.

Instructions: All submissions received must include the agency name, docket number and title for this **Federal Register** document. The general policy for comments and other submissions from members of the public is to make these submissions available for public viewing on the internet at *http://www.regulations.gov* as they are received without change, including any personal identifiers or contact information.

FOR FURTHER INFORMATION CONTACT: To request more information on this proposed information collection or to obtain a copy of the proposal and associated collection instruments, please write to Army Headquarters Services, 9301 Chapek Road, Ft. Belvoir, VA 22060–5605, ATTN: Mr. Douglas Fravel, or call 571–515–0220.

SUPPLEMENTARY INFORMATION:

Title; Associated Form; and OMB Number: ArmyFit Program Azimuth Check Survey; OMB Control Number 0702–AFIT.

Needs and Uses: This collection supports the mission of the Army Resiliency Directorate (ARD), HQDA G–1, to improve the readiness of the force and quality of life for the soldiers. ARD owns the Army Fitness Platform (ArmyFit). ArmyFit hosts the Global Assessment Tool (GAT), which is an assessment promoting self-development through its user feedback and enables the creation of a customized ArmyFit profile that directs individuals to tailored self-development and training resources for soldiers, their families, and Army civilians. The Family GAT is a self-appraisal survey for assessing an individual's fitness in dimensions of strength: physical, emotional, social, spiritual, and family. It is a tool for building resilience. The survey is taken by all Soldiers and offered to family members, Department of the Army Civilians, and contractors.

Affected Public: Individuals or households.

Annual Burden Hours: 425.

Number of Respondents: 1,700.

Responses per Respondent: 1.

Annual Responses: 1,700.

Average Burden per Response: 15 minutes.

Frequency: On occasion.

Dated: June 22, 2023.

Aaron T. Siegel,

Alternate OSD Federal Register Liaison Officer, Department of Defense.

BILLING CODE 5001–06–P

DEPARTMENT OF DEFENSE

Office of the Secretary

Defense Science Board; Notice of Federal Advisory Committee Meeting

AGENCY: Under Secretary of Defense for Research and Engineering, Department of Defense (DoD).

ACTION: Notice of Federal advisory committee meeting.

SUMMARY: The DoD is publishing this notice to announce that the following Federal advisory committee meeting of the Defense Science Board (DSB) will take place.

DATES: Closed to the public Wednesday, July 19, 2023 from 8:15 a.m. to 5:00 p.m. and Thursday, July 20, 2023 from 8:15 a.m. to 4:00 p.m.

ADDRESSES: The address of the closed meeting is the Executive Conference Center, 4075 Wilson Blvd., Floor 3, Arlington, VA 22203.

FOR FURTHER INFORMATION CONTACT: Mr. Kevin Doxey, Designated Federal Officer (DFO), (703) 571–0081 (Voice), (703) 697–1860 (Facsimile), *kevin.a.doxey.civ@mail.mil* (Email). Mailing address is Defense Science Board, 3140 Defense Pentagon, Room 3B888A, Washington, DC 20301–3140. Website: *http://www.acq.osd.mil/dsb/.* The most up-to-date changes to the meeting agenda can be found on the website.

SUPPLEMENTARY INFORMATION: This meeting is being held under the provisions of 5 United States Code (U.S.C.) chapter 10 (commonly known as the ''Federal Advisory Committee Act (FACA)''), 5 U.S.C. 552b(c) (commonly known as the ''Government in the Sunshine Act''), and sections 102–3.140 and 102–3.150 of title 41, Code of Federal Regulations (CFR).

Purpose of the Meeting: The mission of the DSB is to provide independent advice and recommendations on matters relating to the DoD's scientific and technical enterprise. The objective of the meeting is to obtain, review, and evaluate classified information related to the DSB's mission. DSB membership will meet to discuss the 2023 DSB Summer Study on Climate Change and Global Security (''the DSB Summer Study'').

Agenda: The meeting will begin on Wednesday, July 19, 2023 at 8:15 a.m. with administrative opening remarks from Mr. Kevin Doxey, DFO and Executive Director, and a classified overview of the objectives of the Summer Study from Dr. Eric Evans, the DSB Chair. Next, the DSB members will meet in a plenary session to discuss classified strategies for anticipating the global stresses and possible conflict due to climate change. Following break, the DSB members will meet in a plenary session to discuss classified strategies for anticipating the global stresses and possible conflict due to climate change. Next, members will meet in a breakout session to discuss classified strategies for anticipating the global stresses and possible conflict due to climate change. The meeting will adjourn at 5:00 p.m. On Thursday, July 20, 2023, the DSB members will meet in a breakout session to discuss classified strategies for anticipating the global stresses and possible conflict due to climate change. Next, the DSB members will meet in a plenary session to discuss classified strategies for anticipating the global stresses and possible conflict due to climate change. Following break, the DSB members will meet in a plenary session to discuss classified strategies for anticipating the global stresses and possible conflict due to climate change. The meeting will adjourn at 4:00 p.m.

Meeting Accessibility: In accordance with 5 U.S.C. 1009(d) and 41 CFR 102–3.155, the DoD has determined that the DSB meeting will be closed to the public. Specifically, the Under Secretary of Defense for Research and Engineering, in consultation with the DoD Office of the General Counsel, has determined in writing that the meeting will be closed to the public because it will consider matters covered by 5 U.S.C. 552b(c)(1). The determination is based on the consideration that it is expected that discussions throughout will involve classified matters of national security concern. Such classified material is so intertwined with the unclassified material that it cannot reasonably be segregated into separate discussions without defeating the effectiveness and meaning of the overall meetings. To permit the meeting to be open to the public would preclude discussion of such matters and would greatly diminish the ultimate utility of the DSB's findings and recommendations to the Secretary of Defense and to the Under Secretary of Defense for Research and Engineering.

Written Statements: In accordance with 5 U.S.C. 1009(a)(3) and 41 CFR 102–3.105(j) and 102–3.140, interested persons may submit a written statement for consideration by the DSB at any time regarding its mission or in response to the stated agenda of a planned meeting. Individuals submitting a written statement must submit their statement to the DSB DFO at the email address provided in the **FOR FURTHER INFORMATION CONTACT** section at any point; however, if a written statement is not received at least three calendar days prior to the meeting, which is the subject of this notice, then it may not be provided to or considered by the DSB until a later date.

Dated: June 21, 2023.

Aaron T. Siegel,

Alternate OSD Federal Register Liaison Officer, Department of Defense.

Office of the Secretary

[Docket ID: DoD–2023–HA–0014]

Submission for OMB Review; Comment Request

AGENCY: Office of the Assistant Secretary of Defense for Health Affairs (OASD(HA)), Department of Defense (DoD).

ACTION: 30-Day information collection notice.

SUMMARY: The DoD has submitted to the Office of Management and Budget (OMB) for clearance the following proposal for collection of information under the provisions of the Paperwork Reduction Act.

DATES: Consideration will be given to all comments received by July 31, 2023.

ADDRESSES: Written comments and recommendations for the proposed information collection should be sent within 30 days of publication of this notice to *www.reginfo.gov/public/do/PRAMain.* Find this particular information collection by selecting ''Currently under 30-day Review—Open for Public Comments'' or by using the search function.

FOR FURTHER INFORMATION CONTACT: Angela Duncan, 571–372–7574, *whs.mc-alex.esd.mbx.dd-dod-information-collections@mail.mil.*

SUPPLEMENTARY INFORMATION:

Title; Associated Form; and OMB Number: Health Related Behaviors Survey; OMB Control Number 0720–HRBS.

Type of Request: New.

Number of Respondents: 22,100.

Responses per Respondent: 1.

Annual Responses: 22,100.

Average Burden per Response: 20 minutes.

Annual Burden Hours: 7,367.

Needs and Uses: The Department of Defense's (DoD) Health Related Behaviors Survey (HRBS) is the largest population-based health survey of service members that collects self-report data on a number of important behavioral health issues affecting the wellbeing of active duty and reserve personnel. It provides a valuable snapshot of the overall behavioral health of the Force, both Active and

Reserve Components, and alerts DoD leadership to areas of success, as well as areas where more attention—resources and policies—may be needed.

The survey fulfills several DoD requirements. First, Department of Defense Instruction (DoDI) 1010.01, dated September 13, 2012, on the Military Personnel Drug Abuse Testing Program (MPDATP) states: ''Targeted and periodic surveys will be conducted of DoD MPDATP policy and guidance'' (p. 9); the HRBS is the survey used for that documentation and to assess the effectiveness of DoD's Drug Demand Reduction Program (DDRP). Second, the HRBS permits comparisons between military populations in health behaviors over time. Importantly and contrary to other similar total force surveys in the military, the HRBS is a confidential survey conducted external to the DoD by a Federally Funded Research and Development Center. Thus, the HRBS has the advantage of reducing the possibility of underreporting of health behavior concerns associated with possible career impacts such as substance misuse. The items in the HRBS are informed directly by stakeholders and workgroups across the DoD who use the findings and data to respond to a variety of requests related to frequency of health-related problems in their services and health topic areas. The HRBS also allows for comparisons between military and civilian populations and can be used to assess progress with respect to identified goals and objectives for population health and well-being. For roughly the past 40 years, the Office of Disease Prevention and Health Promotion has developed a set of evidence-based objectives aimed at improving the health of American citizens. Benchmarks are established for 10-year cycles and the current set of goals is outlined in Healthy People 2030 (HP2030). DoDI 1010.10 states that it is Department policy to ''Support the achievement of the Department of Health and Human Services' vision for improving the health of all Americans as outlined in Healthy People 2020.'' Data from the HRBS facilitate comparisons to the updated HP2030 objectives. The 2023 version of the HRBS will assess a number of topics, including substance use and abuse (*i.e.,* alcohol, tobacco, and illicit substances), physical and mental health, suicide, mental health service utilization, sexual health, and current topical issues affecting readiness.

Affected Public: Individuals or households.

Frequency: On occasion.

Respondent's Obligation: Voluntary.

OMB Desk Officer: Ms. Jasmeet Seehra.

You may also submit comments and recommendations, identified by Docket ID number and title, by the following method:

SUPPLEMENTARY INFORMATION:

Title; Associated Form; and OMB Number: Scholar Survey and Sponsoring Facilities (SF) Survey; OMB Control Number 0704–DSSS.

Type of Request: New.

SMART 2.0 Scholar Survey

Number of Respondents: 1,800.
Responses per Respondent: 1.
Annual Responses: 1,800.
Average Burden per Response: 30 minutes.
Annual Burden Hours: 900.

SMART 2.0 SF Survey

Number of Respondents: 60.
Responses per Respondent: 1.
Annual Responses: 60.
Average Burden per Response: 15 minutes.
Annual Burden Hours: 15.

Total Burden

Number of Respondents: 1,860.
Annual Responses: 1,860.
Annual Burden Hours: 915.

Needs and Uses: The information gathered through the ''Scholar Survey'' and ''Sponsoring Facilities Survey'' will inform the Department of Defense (DoD) on the Science, Mathematics and Research for Transformation (SMART) Scholarship for Service Program. The purpose of these surveys is to gain a better understanding of scholars' and sponsoring facilities' (SF) perspectives on the program and its impact on the scholar. Both surveys are part of a third-party evaluation of the SMART Program. The purpose of the scholar survey is to gain a deep perspective of SMART scholars who are participating or have participated in the program, understanding their perspective on how the SMART program operates, identifying program processes that are working well, suggesting what could be improved in the program, and determining the detailed outcomes of the program. The purpose of the SF survey is to gain a perspective of DoD facilities who are participating in the program, understanding their perspective on how the SMART program operates, identifying program processes that are working well, and suggesting what could be improved in the program. Both surveys aim to help improve the SMART Program.

Affected Public: Individuals or households.

Frequency: Once.

R*espondent's Obligation:* Voluntary.

OMB Desk Officer: Ms. Jasmeet Seehra.

BILLING CODE 5001–06–P

DEPARTMENT OF EDUCATION

[Docket ID ED–2020–FSA–0145]

Privacy Act of 1974; Matching Program

AGENCY: Federal Student Aid, U.S. Department of Education.

ACTION: Notice of a new matching program.

SUMMARY: This document provides notice of a new matching program between the between the U.S. Department of Education (ED or Department), as the recipient agency, and the U.S. Department of the Treasury (Treasury), Internal Revenue Service (IRS) as the source agency.

DATES: The period of this matching program is estimated to cover the 18-month period from July 21, 2023 through January 20, 2025. However, the matching program will become applicable at the later of the following two dates: July 21, 2023, or 30 days after the publication of this notice, on June 29, 2023, unless comments have been received from interested members of the public requiring modification and republication of the notice. The matching program will continue for 18 months after the applicable date and may be extended for up to an additional 12 months, if the Data Integrity Boards (DIBs) of ED and Treasury determine that the conditions specified in 5 U.S.C. 552a(o)(2)(D) have been met.

ADDRESSES: Comments must be submitted via the Federal eRulemaking Portal at *regulations.gov*. However, if you require an accommodation or cannot otherwise submit your comments via *regulations.gov*, please contact the program contact person listed under **FOR FURTHER INFORMATION CONTACT**. The Department will not accept comments submitted by fax or by email, or comments submitted after the comment period. To ensure that the Department does not receive duplicate copies, please submit your comments only once. In addition, please include the Docket ID at the top of your comments.

- *Federal eRulemaking Portal:* Go to *www.regulations.gov* to submit your comments electronically. Information on using *Regulations.gov*, including instructions for accessing agency documents, submitting comments, and viewing the docket, is available on the site under the ''FAQ'' tab.

Privacy Note: The Department's policy is generally to make comments received from members of the public available for public viewing in their entirety on the Federal eRulemaking Portal at *http://www.regulations.gov*. Therefore, commenters should include in their comments only information about themselves that they wish to make publicly available.

FOR FURTHER INFORMATION CONTACT: Zelma Barrett, Program and Budget Analyst, U.S. Department of Education, Federal Student Aid, Washington, DC 20202. Telephone: (202) 377–4308.

If you use a telecommunications device for the deaf (TDD) or a text telephone (TTY), you may call the Federal Relay Service (FRS), toll free, at 1–800–877–8339.

SUPPLEMENTARY INFORMATION: Pursuant to the Privacy Act of 1974, as amended by the Computer Matching and Privacy Protection Act of 1988 and the Computer Matching and Privacy Protection Amendments of 1990 (Privacy Act) (5 U.S.C. 552a), and Office of Management and Budget (OMB) guidance on the conduct of matching programs, notice is hereby given of the establishment of a matching program between the U.S. Department of Education, as the recipient agency, and the U.S. Department of the Treasury, Internal Revenue Service, as the source agency, under the authority of the Fostering Undergraduate Talent by Unlocking Resources for Education Act (FUTURE Act), Public Law 116–91, 133 Stat. 1189–1197 (2019), as amended by the Coronavirus Aid, Relief, and Economic Security Act (CARES Act), Public Law 116–136, 134 Stat. 281–615 (2020), and the FAFSA Simplification Act, title VII of division FF of Public Law 116–260, 134 Stat. 3137–3201 (2020) (which is part of the Consolidated Appropriations Act, 2021), as amended by the FAFSA Simplification Act Technical Corrections Act, division R of Public Law 117–103, 136 Stat. 819–821 (2022) (which is part of the Consolidated Appropriations Act, 2022).

The FUTURE Act amended section 6103(l)(13) of the Internal Revenue Code (IRC) to authorize the IRS to disclose to ED certain Federal tax information (FTI) of an individual, upon approval being provided by the individual to ED, for the purpose of determining eligibility for, or repayment of obligations under, Income-Driven Repayment (IDR) plans under title IV of the Higher Education Act of 1965, as amended (HEA)(20 U.S.C. 1070 *et seq.*), with respect to loans under part D of title IV of the HEA; and determining eligibility for, and the amount of, Federal student financial aid under a program authorized under subpart 1 of part A, part C, or part D of title IV of the HEA. The FTI that the IRS discloses to ED under sections 6103(l)(13)(A) and (C) of the IRC may also be used by ED for the purposes of: (a) reducing the net cost of improper payments: (i) under IDR plans and (ii) relating to awards of Federal student financial aid under a program authorized under subpart 1 of part A, part C, or part D of the HEA; (b) oversight by ED's Office of Inspector General (OIG) as authorized by chapter 4 of title 5 of the United States Code, except for the purpose of conducting criminal investigations or prosecutions; and (c) conducting analyses and forecasts for estimating costs related to: (i) IDR plans and (ii) awards of Federal student financial aid under a program authorized under subpart 1 of part A, part C, or part D of the HEA as set forth in section 6103(l)(13)(D) of the IRC. The FTI will not duplicated or redisclosed for these uses. However, the FTI may be redisclosed by ED, with the written consent of the taxpayer with respect to whom the FTI relates, in accordance with section 6103(l)(13)(D)(iii) of the IRC, solely for use in the application, award, and administration of financial aid awarded by the Federal government or certain persons described in sections 6103(l)(13)(D)(iii)(I)–(III) of the IRC to an

institution of higher education participating in a program under subpart 1 of part A, part C, or part D of title IV of the HEA, a State higher education agency, or a scholarship organization which is an entity designated by the Secretary of ED prior to December 19, 2019 under section 483(a)(3)(E) of the HEA.

In accordance with the Privacy Act, OMB ''Final Guidance Interpreting the Provisions of Public Law 100–503, the Computer Matching and Privacy Protection Act of 1988,'' published in the **Federal Register** on June 19, 1989 (54 FR 25818–25829), and OMB Circular No. A–108, notice is hereby provided of the establishment of a matching program between the IRS and ED pursuant to which the IRS will disclose to ED certain FTI of an individual, upon approval being provided by the individual to ED, for the purpose of determining eligibility for, or repayment obligations under, IDR plans under title IV of the HEA with respect to loans under part D of title IV of the HEA; and determining eligibility for, and amount of, Federal student financial aid under a program authorized under subpart 1 of part A, part C, or part D of title IV of the HEA.

The FTI that the IRS discloses to ED under sections 6103(l)(13)(A) and (C) of the IRC may also be used by ED for the purposes of: (a) reducing the net cost of improper payments: (i) under IDR plans and (ii) relating to awards of Federal student financial aid under a program authorized under subpart 1 of part A, part C, or part D of the HEA; (b) oversight by ED's OIG as authorized by chapter 4 of title 5 of the United States Code, except for the purpose of conducting criminal investigations or prosecutions; and (c) conducting analyses and forecasts for estimating costs related to: (i) IDR plans and (ii) awards of Federal student financial aid under a program authorized under subpart 1 of part A, part C, or part D of the HEA, as set forth in section 6103(l)(13)(D) of the IRC. The FTI will not duplicated or redisclosed for these uses.

PARTICIPATING AGENCIES:

ED and IRS.

AUTHORITY FOR CONDUCTING THE MATCHING PROGRAM:

This matching program is authorized by the FUTURE Act, as amended. The FUTURE Act amended section 6103(l)(13) of the IRC to authorize the IRS to disclose to ED certain FTI for the purposes set forth in the **SUPPLEMENTARY INFORMATION** section of this Notice provided certain conditions are satisfied. In addition, 5 U.S.C. 552a(b)(3) provides authority for the IRS to disclose Privacy Act-protected records to ED pursuant to a published routine use in an applicable system of records notice for a purpose that is compatible with the purposes for which the IRS collected the records. Further, ED is authorized to participate in the matching program pursuant to the HEA, including sections 483 and 494(a) and (b) of the HEA (20 U.S.C. 1090 and 1098h(a) and (b)) and the FUTURE Act.

PURPOSE(S):

The purpose of this matching program between the IRS and ED is for the IRS to disclose to ED certain FTI of an individual, upon approval being provided by the individual to ED, for determining eligibility for, or repayment obligations under, IDR plans under title IV of the HEA with respect to loans under part D of title IV of the HEA; and determining eligibility for, and amount of, Federal student financial aid under a program authorized under subpart 1 of part A, part C, or part D of title IV of the HEA.

The FTI that the IRS discloses to ED under sections 6103(l)(13)(A) and (C) of the IRC may also be used by ED for the purposes of: (a) reducing the net cost of improper payments: (i) under IDR plans and (ii) relating to awards of Federal student financial aid under a program authorized under subpart 1 of part A, part C, or part D of the HEA; (b) oversight by ED's OIG as authorized by chapter 4 of title 5 of the United States Code, except for the purpose of conducting criminal investigations or prosecutions; and (c) conducting analyses and forecasts for estimating costs related to: (i) IDR plans and (ii) awards of Federal student financial aid under a program authorized under subpart 1 of part A, part C, or part D of the HEA, as set forth in section 6103(l)(13)(D) of the IRC. The FTI will not be duplicated or redisclosed for these uses.

The FTI information that ED will obtain as a result of this matching program effectuates the purpose of the HEA because it provides an efficient and comprehensive match to determine eligibility for, and the amount of, Federal student financial aid under a program authorized under subpart 1 of part A, part C, or part D of title IV of the HEA, and eligibility for, or repayment obligations under, IDR plans for loans under the Federal Direct Loan Program.

CATEGORIES OF INDIVIDUALS:

This matching program covers students (including a student's spouse for an independent student and a student's parent(s) for dependent student) who apply for Federal student financial assistance under title IV of the HEA through the Free Application for Federal Student Aid (FAFSA®) and borrowers (including spouses of borrowers who are independent students) who have had a loan disbursed and are fully responsible to pay the loan and interest back to the loan holder under applicable Federal student loan programs administered under the authority of title IV of the HEA, or who have such a loan written off due to default. This matching program also includes as a ''borrower'' an individual who is responsible for completing a service obligation and fails to complete the service obligation in exchange for having received a grant under the Teacher Education Assistance for College and Higher Education (TEACH) Grant Program authorized under subpart 9 of part A of title IV of the HEA.

CATEGORIES OF RECORDS:

This matching program covers the following categories of records:

(1) An applicant's information submitted to ED to determine the applicant's eligibility for Federal student financial assistance under a program authorized under subpart 1 of part A, part C, or part D of title IV of the HEA;

(2) A borrower's information submitted to ED to determine the borrower's eligibility for, or repayment obligations under, IDR plans under title IV of the HEA with respect to loans under part D of title IV of the HEA;

(3) An applicant's approval and consent submitted to ED to process an application for determining eligibility for Federal student financial assistance under a program authorized under subpart 1 of part A, part C, or part D of aid under title IV of the HEA;

(4) A borrower's approval and consent submitted to ED to process an application for determining eligibility for, or repayment obligations under, IDR plans under title IV of the HEA with respect to loans under part D of title IV of the HEA; and

(5) FTI on individuals from the IRS' Customer Account Data Engine (CADE) Individual Master File.

More specifically, ED will transmit the following specific data elements to the IRS under the matching program:

(1) Social Security Number (SSN)/ Taxpayer Identification Number (TIN);

(2) Tax year for which FTI is required;

(3) Last name;

(4) Date of birth (DOB);

(5) Unique identifier; and

(6) Date/time stamp of the individual's approval for use of FTI in determining eligibility by ED.

In addition, in response to a valid request submitted by ED to the IRS pursuant to section 6103(l)(13)(A) of the IRC (IDR request) that matches a tax record for the requested SSN/TIN and tax year, the IRS will return the following specific data elements to ED:

(1) SSN/TIN (provided in the request);

(2) Tax year (associated with FTI provided);

(3) Last name;

(4) Filing status code;

(5) Adjusted gross income (AGI) amount;

(6) Total number of exemptions; and

(7) Total number of dependents.

Further, in response to a valid request submitted by ED to the IRS pursuant to section 6103(l)(13)(C) of the IRC (FAFSA request) that matches a tax record for the requested SSN/TIN and tax year, the IRS will return the following specific data elements to ED:

(1) SSN/TIN (provided in the request);

(2) Tax year (provided in the request);

(3) Last name (provided in the request);

(4) Filing status code;

(5) AGI amount;

(6) Total number of exemptions;

(7) Total number of dependents;

(8) Income earned from work (sum of wages, farm income, Schedule C income);

(9) Total amount of income tax paid;

(10) Total allowable education credits;

(11) Sum of untaxed IRA contributions and other payments to qualified plans;

(12) Total amount of untaxed IRA distributions;

(13) Tax exempt interest;

(14) Sum of untaxed pensions and annuities;

(15) Net profit/loss from Schedule C; and

(16) Indicator of filing for Schedules A, B, D, E, F, and H.

SYSTEM(S) OF RECORDS:

ED will disclose, with written consent, to the IRS information under this matching program from ED's systems of records notice entitled ''FUTURE Act System (FAS)'' (18–11–23), which will be published in the **Federal Register**.

The IRS will disclose to ED FTI under this matching program from the IRS's system of records notice entitled ''Customer Account Data Engine (CADE) Individual Master File (IMF)—Treasury/IRS'' (Treasury/IRS 24.030), published in the **Federal Register** on September 8, 2015 (80 FR 54082–54083).

Accessible Format: On request to the program contact person listed under **FOR FURTHER INFORMATION CONTACT**, individuals with disabilities can obtain this document in an accessible format. The Department will provide the requestor with an accessible format that may include Rich Text Format (RTF) or text format (txt), a thumb drive, an MP3 file, braille, large print, audiotape, or compact disc, or other accessible format.

Electronic Access to This Document: The official version of this document is the document published in the **Federal Register**. You may access the official edition of the **Federal Register** and the Code of Federal Regulations at *www.govinfo.gov.* At this site you can view this document, as well as all other documents of this Department published in the **Federal Register**, in text or Portable Document Format (PDF). To use PDF you must have Adobe Acrobat Reader, which is available free at the site.

You may also access documents of the Department published in the **Federal Register** by using the article search feature at *www.federalregister.gov.* Specifically, through the advanced search feature at this site, you can limit your search to documents published by the Department.

Richard Cordray,

Chief Operating Officer, Federal Student Aid.

BILLING CODE 4000–01–P

DEPARTMENT OF EDUCATION

[Docket No.: ED–2023–SCC–0115]

Agency Information Collection Activities; Submission to the Office of Management and Budget for Review and Approval; Comment Request; National Assessment of Educational Progress (NAEP) 2024 Amendment #2

AGENCY: National Center for Education Statistics (NCES), Department of Education (ED).

ACTION: Notice.

SUMMARY: In accordance with the Paperwork Reduction Act (PRA) of 1995, the Department is proposing a revision of a currently approved information collection request (ICR).

DATES: Interested persons are invited to submit comments on or before July 31, 2023.

ADDRESSES: Written comments and recommendations for proposed information collection requests should be submitted within 30 days of publication of this notice. Click on this link *www.reginfo.gov/public/do/PRAMain* to access the site. Find this information collection request (ICR) by selecting ''Department of Education'' under ''Currently Under Review,'' then check the ''Only Show ICR for Public Comment'' checkbox. *Reginfo.gov* provides two links to view documents related to this information collection request. Information collection forms and instructions may be found by clicking on the ''View Information Collection (IC) List'' link. Supporting statements and other supporting documentation may be found by clicking on the ''View Supporting Statement and Other Documents'' link.

FOR FURTHER INFORMATION CONTACT: For specific questions related to collection activities, please contact Carrie Clarady, 202–245–6347.

SUPPLEMENTARY INFORMATION: The Department is especially interested in public comment addressing the following issues: (1) is this collection necessary to the proper functions of the Department; (2) will this information be processed and used in a timely manner; (3) is the estimate of burden accurate; (4) how might the Department enhance the quality, utility, and clarity of the information to be collected; and (5) how might the Department minimize the burden of this collection on the respondents, including through the use of information technology. Please note that written comments received in response to this notice will be considered public records.

Title of Collection: National Assessment of Educational Progress (NAEP) 2024 Amendment #2.

OMB Control Number: 1850–0928.

Type of Review: A revision of a currently approved ICR.

Respondents/Affected Public: Individuals and households.

Total Estimated Number of Annual Responses: 866,587.

Total Estimated Number of Annual Burden Hours: 486,305.

Abstract: The National Assessment of Educational Progress (NAEP), conducted by the National Center for Education Statistics (NCES), is a federally authorized survey of student achievement at grades 4, 8, and 12 in various subject areas, such as mathematics, reading, writing, science, U.S. history, civics, geography, economics, technology, and engineering literacy (TEL), and the arts. The National Assessment of Educational Progress Authorization Act (Pub. L. 107–279 title III, section 303) requires the assessment to collect data on specified student groups and characteristics, including information organized by race/ethnicity, gender, socio-economic status, disability, and limited English proficiency. It requires

fair and accurate presentation of achievement data and permits the collection of background, noncognitive, or descriptive information that is related to academic achievement and aids in fair reporting of results. The intent of the law is to provide representative sample data on student achievement for the nation, the states, and subpopulations of students and to monitor progress over time. NAEP consists of two assessment programs: the NAEP long-term trend (LTT) assessment and the main NAEP assessment. The LTT assessments are given at the national level only and are administered to students at ages 9, 13, and 17 in a manner that is very different from that used for the main NAEP assessments. LTT reports mathematics and reading results that present trend data since the 1970s. In addition to the operational assessments, NAEP uses two other kinds of assessment activities: pilot assessments and special studies. Pilot assessments test items and procedures for future administrations of NAEP, while special studies (including the National Indian Education Study (NIES), the Middle School Transcript Study (MSTS), and the High School Transcript Study (HSTS)) are opportunities for NAEP to investigate particular aspects of the assessment without impacting the reporting of the NAEP results.

The initial request for clearance of NAEP 2024 received OMB approval in April 2023 (OMB# 1850–0928 v.28). Amendment #1 to the NAEP 2024 clearance package received OMB approval in June 2023 (OMB#1850–0928 v.29). Since that package's submission for public comment and OMB approval, changes have occurred to the scope of the 2024 NAEP administration, including the addition of: (1) Addition of Reading Router Pilot for grades 4 and 8, increasing costs, (2) Addition of School and District Technology Coordinator roles and SBE survey completion, increasing burden hours, (3) Addition of protocols for the health and safety of field staff, increasing costs, (4) Reduction in SQ burden time for students, teachers and schools since COVID–19 learning recovery items are no longer adding additional time to the SQs; rather, other items were dropped to accommodate these items, reducing burden hours; and (5) Addition of Field Trial for grades, 4, 8 and 12, increasing burden hours and costs. This revision updates Part A and Part B detailing the changes to scope and references to the communication materials and the amendment schedule, Appendix A, Appendix B, Appendix C, Appendix D (added communication materials), Appendix G, Appendix I, and Appendices J1, J2, J3, and J–S to include the operational survey questionnaires (SQs), COVID–19 Learning Recovery SQs, NIES SQs, and Pilot SQs.

Dated: June 26, 2023.

Stephanie Valentine,

PRA Coordinator, Strategic Collections and Clearance, Governance and Strategy Division, Office of Chief Data Officer, Office of Planning, Evaluation and Policy Development.

BILLING CODE 4000–01–P

DEPARTMENT OF EDUCATION

Applications for New Awards; Personnel Development To Improve Services and Results for Children With Disabilities—National Center for Supporting School Building and Early Intervention Program Administrators To Effectively Implement IDEA and Improve Systems Serving Children With Disabilities

AGENCY: Office of Special Education and Rehabilitative Services, Department of Education.

ACTION: Notice.

SUMMARY: The Department of Education (Department) is issuing a notice inviting applications for a new award for fiscal year (FY) 2023 for a National Center for Supporting School Building and Early Intervention Program (EIP) Administrators to Effectively Implement the Individuals with Disabilities Education Act (IDEA) and Improve Systems Serving Children with Disabilities, Assistance Listing Number 84.325Z. This notice relates to the approved information collection under OMB control number 1820–0028.

DATES:

Applications Available: June 29, 2023.

Deadline for Transmittal of Applications: August 18, 2023.

Pre-Application Webinar Information: No later than July 5, 2023, the Office of Special Education and Rehabilitative Services will post details on pre-recorded informational webinars designed to provide technical assistance (TA) to interested applicants. Links to the webinars may be found at *https://www2.ed.gov/fund/grant/apply/osep/new-osep-grants.html.*

ADDRESSES: For the addresses for obtaining and submitting an application, please refer to our Common Instructions for Applicants to Department of Education Discretionary Grant Programs, published in the **Federal Register** on December 7, 2022 (87 FR 75045) and available at *www.federalregister.gov/documents/2022/12/07/2022-26554/common-instructions-for-applicants-to-department-of-education-discretionary-grant-programs.* Please note that these Common Instructions supersede the version published on December 27, 2021.

FOR FURTHER INFORMATION CONTACT: Sarah Allen, U.S. Department of Education, 400 Maryland Avenue SW, Room 5135, Potomac Center Plaza, Washington, DC 20202–5076. Telephone: (202) 245–7875. Email: *Sarah.Allen@ed.gov.*

If you are deaf, hard of hearing, or have a speech disability and wish to access telecommunications relay services, please dial 7–1–1.

SUPPLEMENTARY INFORMATION:

Full Text of Announcement

I. Funding Opportunity Description

Purpose of Program: The purposes of the program are to (1) help address State-identified needs for personnel preparation in special education, early intervention, related services, and regular education to work with children, including infants and toddlers, and youth with disabilities; and (2) ensure that those personnel have the necessary skills and knowledge, derived from practices that have been determined through scientifically based research, to be successful in serving those children.

Priority: This competition includes one absolute priority. In accordance with 34 CFR 75.105(b)(2)(v), this priority is from allowable activities specified in the statute (see sections 662 and 681 of IDEA; 20 U.S.C. 1462 and 1481).

Absolute Priority: For FY 2023 and any subsequent year in which we make awards from the list of unfunded applications from this competition, this priority is an absolute priority. Under 34 CFR 75.105(c)(3), we consider only applications that meet this priority.

This priority is:

The National Center for Supporting School Building and EIP Administrators to Effectively Implement IDEA and Improve Systems Serving Children with Disabilities.

Background:

Nearly 50 years after the enactment and implementation of the Education for All Handicapped Children Act of 1975 (reauthorized as IDEA), which mandated that all children with disabilities have access to a free appropriate public education (FAPE) in the least restrictive environment (LRE), to the extent appropriate, the IDEA is still not being implemented fully and

consistently across all States and for all eligible children. Sections 616(d) and 642 of IDEA require the Secretary to make an annual determination as to the extent to which each State's Part B and Part C programs are meeting the requirements of IDEA. In FY 2022, only 37 percent of States and entities, or 22 of 60, met the Part B requirements of IDEA. Similarly, only 54 percent, or 30 of 56, States and entities met the Part C requirements of IDEA (U.S. Department of Education, 2022).

Under section 612(a)(11) of IDEA, the State educational agency (SEA) is responsible for ensuring that all local educational agencies (LEAs) within the State provide FAPE in the LRE to all children and youth with disabilities served under Part B (children with disabilities) within their local jurisdiction. Similarly, under section 635(a)(10) of IDEA, the State lead agency, either directly or through its early intervention service (EIS) providers under 34 CFR 303.12, is responsible for providing early intervention services to eligible infants and toddlers with disabilities and their families. School building administrators, including principals and vice principals, and EIP administrators (which may include administrators responsible for managing personnel in State lead agencies, EIS providers, and EIS programs) are on the front lines of IDEA implementation and are responsible for ensuring children with disabilities are provided the services and supports for which they are eligible under the IDEA as well as others intended to protect children with disabilities, including under Section 504 of the Rehabilitation Act. School building and EIP administrators help set high expectations for performance in schools and among EIS providers and ensure that the unique, individualized needs of each infant, toddler, or child with a disability are met consistent with their individualized education program (IEP) or individualized family service plan (IFSP).

School building and EIP administrators must manage resources, personnel, and a myriad of educational and other programs in their schools and EIPs and ensure compliance with multiple interacting laws protecting children with disabilities. Because these administrators are required to make decisions about the operations and financial support of the programs offered in their building, it is essential that these school building and EIP administrators have the knowledge, skills, and competencies to ensure, consistent with the IDEA requirements, the delivery of FAPE in the LRE for children with disabilities or the provision of early intervention services for infants and toddlers with disabilities and their families.

Given that school building and EIP administrators have complex roles, it is not surprising that those who are well trained handle the multi-faceted demands of the role better and tend to stay in their jobs longer (Herman et al., 2022). They are instrumental in supporting teachers and providers' practices, motivating school and EIP staff, maintaining a positive school or program climate, and ensuring inclusive settings are offered. High turnover of school building and EIP administrators can be disruptive to maintaining an environment that supports appropriate outcomes for children with disabilities. As a result, high administrator turnover can lead to higher teacher and provider turnover and lower child outcomes (*e.g.,* lower student achievement, lower gains in learning or development outcomes for young children) (Levin & Bradley, 2019). Access to professional learning opportunities is an important factor influencing job satisfaction and retention of administrators (Boyce & Bowers, 2016). In addition to covering essential research-based content on topics such as learning and teaching, instructional leadership, data-based decision making, and systems improvement, the structure of continued professional development for administrators also matters (Darling-Hammond et al., 2022; Leung-Gagne et al, 2022). Especially important to building the capacity of administrators is access to coordinated, continued professional development with structured learning opportunities such as through a cohort model, mentoring, one-on-one coaching, networking to build a professional community, applied learning opportunities, and problem solving related to the needs of individual children, including children with disabilities, children who are multilingual, and children from diverse socioeconomic backgrounds. In addition, we know that school and district-based administrators' greatest source of evidence-based practices and policy content are their national and state affiliate professional organizations. As such, partnering with these organizations, for the center and local administrators, would be an effective and efficient way to facilitate the dissemination of IDEA implementation information.

The goals of this national center are to (a) increase the capacity of school building and EIP administrators to meet the statutory and procedural requirements of IDEA to ensure that each child with a disability in their school or EIP receives FAPE consistent with the child's IEP or early intervention services consistent with the infant or toddler's IFSP; and (b) increase the capacity of school building and EIP administrators to improve services and outcomes for children with disabilities. The National Center for Supporting School Building and Early Intervention Program Administrators to Effectively Implement IDEA and Improve Systems Serving Children with Disabilities will (1) develop and provide high-quality professional development on IDEA requirements and implementation (*e.g.,* IDEA related professional competencies) and essential research-based content on topics such as learning and teaching, the structure of continued professional development, instructional leadership, data-based decision making, and systems improvement to school building and EIP administrators; (2) build and support partnerships needed to support and sustain the delivery of intensive professional development on IDEA requirements and implementation to school building and EIP administrators to improve the outcomes of children with disabilities; and (3) develop and implement customized professional development and TA to address the unique needs and context of individual States and local environments.

Priority:

The purpose of this priority is to fund a cooperative agreement to establish and operate a National Center for Supporting School Building and EIP Administrators to Effectively Implement IDEA and Improve Systems Serving Children with Disabilities (Center). The Center will help SEAs and Part C lead agencies effectively implement IDEA by building the capacity of school building and EIP administrators to meet the requirements of IDEA.

The Center must achieve, at a minimum, the following expected outcomes:

(a) Establish and maintain State-level partnerships [1] to help local administrators attain and maintain the essential IDEA-related professional competencies needed to ensure the delivery of FAPE in the LRE for children with disabilities and the provision of early intervention services for infants

[1] For the purpose of this priority, ''State-level partnerships'' refers to State affiliates of nationally recognized professional and family networks that form an infrastructure for policy development, dissemination of information, interaction, and learning with, among other entities, SEA and Part C lead agencies, local educational agencies and service providers, and institutions of higher education (''State-level partners'').

and toddlers with disabilities and their families;

(b) Identify the IDEA-related professional competencies required for school building and EIP administrators to ensure the delivery of FAPE in the LRE for children with disabilities and early intervention services for infants and toddlers with disabilities and their families;

(c) Develop and disseminate openly licensed products designed for adult learners to increase knowledge, build skills, and provide practice-based opportunities that focus on the IDEA-related professional competencies that school building and EIP administrators must master to effectively implement IDEA in their school or EIP in order to improve outcomes for children;

(d) Deliver high-quality professional learning programs using the Center's openly licensed products and other available products designed for adult learners to increase knowledge, build skills, and provide practice-based opportunities that focus on the IDEA-related professional competencies that school building and EIP administrators must master to effectively implement IDEA in their school or EIP in order to improve outcomes for children;

(e) Evaluate the effectiveness over the life of the grant of professional development products and services the Center designed to increase the capacity of school building and EIP administrators to effectively implement IDEA, by identifying specific school building and EIP administrators to participate in a structured professional development program; and

(f) Enhance the capacity of State-level partners to use Center products and deliver high-quality professional development designed to increase the capacity of school building and EIP administrators to effectively implement IDEA.

In addition to these programmatic requirements, to be considered for funding under this priority, applicants must meet the application and administrative requirements in this priority, which are:

(a) Demonstrate, in the narrative section of the application under ''Significance,'' how the proposed project will—

(1) Address the need in the field for increased knowledge of the professional competencies needed by school building and EIP administrators to support effective implementation of IDEA. To meet this requirement, the applicant must—

(i) Demonstrate knowledge of common factors for why States do not meet the requirements of IDEA and strategies to address these challenges to improve outcomes for children;

(ii) Demonstrate knowledge of the professional competencies that school building and EIP administrators need to manage effective implementation of IDEA and its interaction with other Federal laws protecting the rights of children with disabilities; and

(iii) Demonstrate knowledge of effective approaches to forming or expanding and maintaining State-level partnerships to collaboratively develop or expand and deliver knowledge, teaching, and learning tools and resources that support leadership development for school building and EIP administrators managing special education programs and EIPs and that focus on the implementation of IDEA. The leadership development activities must focus on a variety of entities, including local educational and early intervention agencies; schools; EIS providers and programs; institutions of higher education (IHEs); other nonprofit organizations that provide special education, early intervention, or related services to children, infants, and toddlers with disabilities and their families; and other TA providers;

(2) Demonstrate knowledge of effective approaches to forming or expanding and maintaining State-level partnerships to collaboratively develop or expand and deliver evidence-based [2] professional development to a variety of entities, including local educational and early intervention agencies; schools; EIS providers and programs; IHEs; other nonprofit organizations that provide special education, early intervention, or related services to children, infants, and toddlers with disabilities and their families; and other TA providers; and

(3) Improve outcomes for children with disabilities and their families by supporting school building and EIP administrators to effectively implement IDEA and improve systems serving children with disabilities and early intervention services for infants and toddlers with disabilities and their families. To meet this requirement, the applicant must—

(i) Present information and data on the current capacity of LEAs and EIS providers, IHEs, and other entities to provide training and TA needed to build the professional competencies of school building and EIP administrators to support delivery of special education and early intervention services, as mandated by IDEA;

(ii) Present information and data on the current capacity of LEAs and EIS providers, IHEs, and other entities to provide training and TA needed to build the professional competencies of school building and EIP administrators to improve systems delivering special education and early intervention services, as mandated by IDEA; and

(iii) Indicate the likely magnitude or importance of the improvements that the project is expected to make.

(b) Demonstrate, in the narrative section of the application under ''Quality of project services,'' how the proposed project will—

(1) Ensure equal access and treatment for members of groups that have traditionally been underrepresented based on race, color, national origin, gender, age, or disability;

(2) Identify the needs of the intended recipients for TA and information, specifically the needs of school building and EIP administrators to meet the statutory and procedural requirements of IDEA, and ensure that products and services meet the needs of the intended recipients;

(3) Achieve its goals, objectives, and intended outcomes. To meet this requirement, the applicant must provide—

(i) Measurable intended project outcomes; and

(ii) In Appendix A, the logic model (as defined in 34 CFR 77.1) by which the proposed project will achieve its intended outcomes that depicts, at a minimum, the goals, activities, outputs, and intended outcomes of the proposed project;

(4) Use a conceptual framework (and provide a copy in Appendix A) to develop project plans and activities, describing any underlying concepts, assumptions, expectations, beliefs, or theories, as well as the presumed relationships or linkages among these variables, and any empirical support for this framework;

Note: The following websites provide more information on logic models and conceptual frameworks: *https://osepideasthatwork.org/sites/default/files/2021-12/ConceptualFramework_Updated.pdf* and *www.osepideasthatwork.org/resources-grantees/program-areas/ta-ta/tad-project-logic-model-and-conceptual-framework.*

(5) Be based on current research and make use of evidence-based practices (EBPs). To meet this requirement, the applicant must describe—

(i) The current research on the professional competencies,

[2] For the purposes of this priority, ''evidence-based'' means, at a minimum, evidence that demonstrates a rationale (as defined in 34 CFR 77.1), where a key project component included in the project's logic model is informed by research or evaluation findings that suggest the project component is likely to improve relevant outcomes.

implementation science, systems change, capacity building, and essential research-based content on topics such as learning and teaching, the structure of continued professional development, instructional leadership, data-based decision making, and systems improvement, for school building and EIP administrators of IDEA;

(ii) The current research about adult learning principles that will inform the proposed product development, training, and TA; and

(iii) How the proposed project will incorporate current research and EBPs in the development and delivery of its products and services;

(6) Develop products and provide services that are of high quality and sufficient intensity and duration to achieve the intended outcomes of the proposed project. To address this requirement, the applicant must describe—

(i) How it proposes to develop or expand the knowledge base that delineates the professional competencies (*i.e.,* knowledge, skills, and dispositions) that school building and EIP administrators need to effectively implement IDEA and comply with other Federal laws protecting the rights of children with disabilities, support the delivery of FAPE to children with disabilities and early intervention services to infants and toddlers with disabilities and their families, and improve systems serving children with disabilities and their families;

(ii) Its plan to collaborate with State-level partners to develop and disseminate products and services for building the capacity of school building and EIP administrators to effectively implement IDEA, which should include, at a minimum, activities focused on—

(A) Establishing a cohort of States to assist in planning and development of products, training, and technical assistance protocols using their State-level partnerships; and

(B) Building the capacity of school building and EIP administrators in States, or in LEAs or EIPs, that do not meet requirements based on the Secretary's annual determination under section 616(d) of IDEA;

(iii) Its proposed approach to universal, general TA,[3] which must identify the intended recipients, including the type and number of recipients, that will receive the products and services under this approach and must include, at minimum, activities focused on—

(A) Partnering with SEAs and Part C lead agencies to support their efforts to develop and disseminate products for effective implementation of IDEA, including adding State-specific policies and procedures to such products, that align with Federal mandates for the delivery of FAPE in the LRE to children with disabilities and early intervention services to infants and toddlers with disabilities and their families;

(B) Partnering with State-level partners to support dissemination and use of Center products in personnel preparation and continuing professional development, and increase the reach of Center products and services to all States, the District of Columbia, U.S. territories, and, for Part B only, the freely associated States; and

(C) Differentiating products and services to address the roles and responsibilities of school building and EIP administrators in policy relating to, and management of, resources, personnel, and programs needed for effective implementation of IDEA;

(iv) Its proposed approach to targeted, specialized TA,[4] which must identify—

(A) The intended recipients, including the type and number of recipients, that will receive the products and services, a description of the products and services that the Center proposes to make available, and the expected impact of those products and services under this approach;

(B) Its proposed approach to identify the need for and measure the readiness of potential TA recipients to work with the project, assessing, at a minimum, the State's current determination status, with priority given to States that do not meet IDEA requirements based on the Secretary's annual determination under section 616(d) of IDEA, infrastructure, available resources, and ability to build capacity at the local level; and

(C) Its proposed approach to partner with SEAs and Part C lead agencies and collaborate with State-affiliated partners and Office of Special Education Programs (OSEP)-funded centers to support dissemination of products, training, and TA designed to address the needs of school building and EIP administrators across policy, management, and service delivery roles and responsibilities; and

(v) Its proposed approach to intensive, sustained TA,[5] which must—

(A) Identify the intended participants, including by Year 2, school building and EIP administrators in States or LEAs or EIPs that do not meet IDEA requirements based on the Secretary's annual determination under section 616(d) of IDEA;

(B) Include a description of the products and services that the Center proposes to make available, and the expected impact of those products and service under this approach;

(C) Describe its proposed approach to measure the readiness of the SEAs and Part C lead agencies to partner with the project; and

(D) Include its proposed plan for assisting SEAs and Part C lead agencies to partner with State-affiliated partners and OSEP-funded centers to build or enhance training systems that include professional development based on adult learning principles and coaching for school building and EIP administrators;

(7) Develop products and implement services that maximize efficiency. To address this requirement, the applicant must describe—

(i) How the proposed project will use technology to achieve the intended project outcomes;

(ii) With whom the proposed project will collaborate and the intended outcomes of this collaboration; and

(iii) How the proposed project will use non-project resources to achieve the intended project outcomes; and

(8) Develop a dissemination plan that describes how the applicant will systematically distribute information, products, and services to varied intended audiences, using a variety of dissemination strategies, to promote awareness and use of the Center's products and services.

[3] ''Universal, general TA'' means TA and information provided to independent users through their own initiative, resulting in minimal interaction with TA Center staff and including one-time, invited, or offered conference presentations by TA Center staff. This category of TA also includes information or products, such as newsletters, guidebooks, or research syntheses, downloaded from the TA Center's website by independent users. Brief communications by TA Center staff with recipients, either by telephone or email, are also considered universal, general TA.

[4] ''Targeted, specialized TA'' means TA services based on needs common to multiple recipients and not extensively individualized. A relationship is established between the TA recipient and one or more TA Center staff. This category of TA includes one-time, labor-intensive events, such as facilitating strategic planning or hosting regional or national conferences. It can also include episodic, less labor-intensive events that extend over a period of time, such as facilitating a series of conference calls on single or multiple topics that are designed around the needs of the recipients. Facilitating communities of practice can also be considered targeted, specialized TA.

[5] ''Intensive, sustained TA'' means TA services often provided on-site and requiring a stable, ongoing relationship between the TA Center staff and the TA recipient. ''TA services'' are defined as negotiated series of activities designed to reach a valued outcome. This category of TA should result in changes to policy, program, practice, or operations that support increased recipient capacity or improved outcomes at one or more systems levels.

(c) In the narrative section of the application under ''Quality of the project evaluation,'' include an evaluation plan for the project as described in the following paragraphs. The evaluation plan must describe measures of progress in implementation, including the criteria for determining the extent to which the project's products and services have met the goals for reaching its target population; measures of intended outcomes or results of the project's activities in order to evaluate those activities; and how well the goals or objectives of the proposed project, as described in its logic model, have been met.

The applicant must provide an assurance that, in designing the evaluation plan, it will—

(1) Designate, with the approval of the OSEP project officer, a project liaison with sufficient dedicated time, experience in evaluation, and knowledge of the project to work in collaboration with the Center to Improve Program and Project Performance (CIPP),[6] the project director, and the OSEP project officer on the following tasks:

(i) Revise the logic model submitted in the application to provide for a more comprehensive measurement of implementation and outcomes and to reflect any changes or clarifications to the model discussed at the kick-off meeting;

(ii) Refine the evaluation design and instrumentation proposed in the application consistent with the revised logic model and using the most rigorous design suitable (*e.g.,* prepare evaluation questions about significant program processes and outcomes; develop quantitative or qualitative data collections that permit both the collection of progress data, including fidelity of implementation, as appropriate, and the assessment of project outcomes; and identify analytic strategies); and

(iii) Revise the evaluation plan submitted in the application such that it clearly—

(A) Specifies the evaluation questions, measures, and associated instruments or sources for data appropriate to answer these questions, suggests analytic strategies for those data, provides a timeline for conducting the evaluation, and includes staff assignments for completing the evaluation activities;

(B) Delineates the data expected to be available by the end of the second project year for use during the project's evaluation (3+2 review) for continued funding described under the heading *Fourth and Fifth Years of the Project;* and

(C) Can be used to assist the project director and the OSEP project officer, with the assistance of CIPP, as needed, to specify the project performance measures to be addressed in the project's annual performance report;

(2) Dedicate sufficient staff time and other resources during the first six months of the project to collaborate with CIPP staff, including regular meetings (*e.g.,* weekly, biweekly, or monthly) with CIPP and the OSEP project officer, to accomplish the tasks described in paragraph (c)(1) of this section; and

(3) Dedicate sufficient funds in each budget year to cover the costs of carrying out the tasks described in paragraphs (c)(1) and (2) of this section and revising and implementing the evaluation plan. Please note in your budget narrative the funds dedicated for this activity.

(d) Demonstrate, in the narrative section of the application under ''Adequacy of resources and quality of project personnel,'' how—

(1) The proposed project will encourage applications for employment from persons who are members of groups that have traditionally been underrepresented based on race, color, national origin, gender, age, or disability, as appropriate;

(2) The proposed key project personnel, consultants, and subcontractors have the qualifications and experience to carry out the proposed activities and achieve the project's intended outcomes;

(3) The applicant and any key partners have adequate resources to carry out the proposed activities; and

(4) The proposed costs are reasonable in relation to the anticipated results and benefits.

(e) Demonstrate, in the narrative section of the application under ''Quality of the management plan,'' how—

(1) The proposed management plan will ensure that the project's intended outcomes will be achieved on time and within budget. To address this requirement, the applicant must describe—

(i) Clearly defined responsibilities for key project personnel, consultants, and subcontractors, as applicable; and

(ii) Timelines and milestones for accomplishing the project tasks;

(2) Key project personnel and any consultants and subcontractors will be allocated and how these allocations are appropriate and adequate to achieve the project's intended outcomes;

(3) The proposed management plan will ensure that the products and services provided are of high quality, relevant, and useful to recipients; and

(4) The proposed project will benefit from a diversity of perspectives, including those of families, educators, TA providers, researchers, and policy makers, among others, in its development and operation.

(f) Address the following application requirements. The applicant must—

(1) Include, in Appendix A, personnel-loading charts and timelines, as applicable, to illustrate the management plan described in the narrative;

(2) Include, in the budget, attendance at the following:

(i) A one and one-half day kick-off meeting in Washington, DC, after receipt of the award, and an annual planning meeting in Washington, DC, with the OSEP project officer and other relevant staff during each subsequent year of the project period.

Note: Within 30 days of receipt of the award, a post-award teleconference must be held between the OSEP project officer and the grantee's project director or other authorized representative;

(ii) A two and one-half day project directors' conference in Washington, DC, during each year of the project period;

(iii) Two annual two-day trips to attend Department briefings, Department-sponsored conferences, and other meetings, as requested by OSEP; and

(iv) A one-day intensive 3+2 review meeting in Washington, DC, during the last half of the second year of the project period;

(3) Include, in the budget, a line item for an annual set-aside of 5 percent of the grant amount to support emerging needs that are consistent with the proposed project's intended outcomes, as those needs are identified in consultation with, and approved by, the OSEP project officer. With approval from the OSEP project officer, the project must reallocate any remaining funds from this annual set-aside no later than the end of the third quarter of each budget period;

(4) Maintain a high-quality website, with an easy-to-navigate design, that

[6] The major tasks of CIPP are to guide, coordinate, and oversee the design of formative evaluations for every large discretionary investment (*i.e.,* those awarded $500,000 or more per year and required to participate in the 3+2 process) in OSEP's Technical Assistance and Dissemination; Personnel Development; Parent Training and Information Centers; and Educational Technology, Media, and Materials programs. The efforts of CIPP are expected to enhance individual project evaluation plans by providing expert and unbiased TA in designing the evaluations with due consideration of the project's budget. CIPP does not function as a third-party evaluator.

meets government or industry-recognized standards for accessibility;

(5) Ensure that annual project progress toward meeting project goals is posted on the project website; and

(6) Include, in Appendix A, an assurance to assist OSEP with the transfer of pertinent resources and products and to maintain the continuity of services to States during the transition to this new award period and at the end of this award period, as appropriate.

Fourth and Fifth Years of the Project: In deciding whether to continue funding the project for the fourth and fifth years, the Secretary will consider the requirements of 34 CFR 75.253(a), including—

(a) The recommendations of a 3+2 review team consisting of experts who have experience and knowledge in implementing IDEA and improving systems serving children with disabilities. This review will be conducted during a one-day intensive meeting that will be held during the last half of the second year of the project period;

(b) The timeliness with which, and how well, the requirements of the negotiated cooperative agreement have been or are being met by the project; and

(c) The quality, relevance, and usefulness of the project's products and services and the extent to which the project's products and services are aligned with the project's objectives and likely to result in the project achieving its intended outcomes.

Under 34 CFR 75.253, the Secretary may reduce continuation awards or discontinue awards in any year of the project period for excessive carryover balances or a failure to make substantial progress. The Department intends to closely monitor unobligated balances and substantial progress under this program and may reduce or discontinue funding accordingly.

Waiver of Proposed Rulemaking: Under the Administrative Procedure Act (APA) (5 U.S.C. 553) the Department generally offers interested parties the opportunity to comment on proposed priorities. Section 681(d) of IDEA, however, makes the public comment requirements of the APA inapplicable to the absolute priority in this notice.

Program Authority: 20 U.S.C. 1462 and 1481.

Note: Projects will be awarded and must be operated in a manner consistent with the nondiscrimination requirements contained in Federal civil rights laws.

Applicable Regulations: (a) The Education Department General Administrative Regulations in 34 CFR parts 75, 77, 79, 81, 82, 84, 86, 97, 98, and 99. (b) The Office of Management and Budget Guidelines to Agencies on Governmentwide Debarment and Suspension (Nonprocurement) in 2 CFR part 180, as adopted and amended as regulations of the Department in 2 CFR part 3485. (c) The Uniform Administrative Requirements, Cost Principles, and Audit Requirements for Federal Awards in 2 CFR part 200, as adopted and amended as regulations of the Department in 2 CFR part 3474.

Note: The regulations in 34 CFR part 79 apply to all applicants except federally recognized Indian Tribes.

Note: The regulations in 34 CFR part 86 apply to IHEs only.

II. Award Information

Type of Award: Cooperative agreement.

Estimated Available Funds: $3,000,000.

Contingent upon the availability of funds and the quality of applications, we may make additional awards in FY 2024 from the list of unfunded applications from this competition.

Maximum Award: We will not make an award exceeding $15,000,000 for a project period of 60 months or an award that exceeds $4,000,000 for any single budget period.

Estimated Number of Awards: 1.

Note: The Department is not bound by any estimates in this notice.

Project Period: Up to 60 months.

III. Eligibility Information

1. *Eligible Applicants:* SEAs; IHEs; other public agencies, including State lead agencies; private nonprofit organizations; public agencies from the freely associated States and outlying areas; Indian Tribes or Tribal organizations; and for-profit organizations.

2.a. *Cost Sharing or Matching:* This program does not require cost sharing or matching.

b. *Indirect Cost Rate Information:* This program uses an unrestricted indirect cost rate. For more information regarding indirect costs, or to obtain a negotiated indirect cost rate, please see *www2.ed.gov/about/offices/list/ocfo/intro.html.*

c. *Administrative Cost Limitation:* This program does not include any program-specific limitation on administrative expenses. All administrative expenses must be reasonable and necessary and conform to the Cost Principles described in 2 CFR part 200 subpart E of the Uniform Guidance.

3. *Subgrantees:* Under 34 CFR 75.708(b) and (c), a grantee under this competition may award subgrants—to directly carry out project activities described in its application—to the following types of entities: IHEs, nonprofit organizations, and public agencies. The grantee may award subgrants to entities it has identified in an approved application or that it selects through a competition under procedures established by the grantee, consistent with 34 CFR 75.708(b)(2).

4. *Other General Requirements:* a. Recipients of funding under this competition must make positive efforts to employ and advance in employment qualified individuals with disabilities (see section 606 of IDEA).

b. Applicants for, and recipients of, funding must, with respect to the aspects of their proposed project relating to the absolute priority, involve individuals with disabilities, or parents

of individuals with disabilities ages birth through 26, in planning, implementing, and evaluating the project (see section 682(a)(1)(A) of IDEA).

IV. Application and Submission Information

1. *Application Submission Instructions:* Applicants are required to follow the Common Instructions for Applicants to Department of Education Discretionary Grant Programs, published in the **Federal Register** on December 7, 2022 (87 FR 75045) and available at *www.federalregister.gov/documents/2022/12/07/2022-26554/common-instructions-for-applicants-to-department-of-education-discretionary-grant-programs,* which contain requirements and information on how to submit an application. Please note that these Common Instructions supersede the version published on December 27, 2021.

2. *Intergovernmental Review:* This competition is subject to Executive Order 12372 and the regulations in 34 CFR part 79. However, under 34 CFR 79.8, we waive intergovernmental review in order to man an award by the end of FY 2023.

3. *Funding Restrictions:* We reference regulations outlining funding restrictions in the *Applicable Regulations* section of this notice.

4. *Recommended Page Limit:* The application narrative is where you, the applicant, address the selection criteria that reviewers use to evaluate your application. We recommend that you (1) limit the application narrative to no more than 70 pages and (2) use the following standards:

- A ''page'' is 8.5″ x 11″, on one side only, with 1″ margins at the top, bottom, and both sides.
- Double-space (no more than three lines per vertical inch) all text in the application narrative, including titles, headings, footnotes, quotations, reference citations, and captions, as well as all text in charts, tables, figures, graphs, and screen shots.
- Use a font that is 12 point or larger.
- Use one of the following fonts: Times New Roman, Courier, Courier New, or Arial.

The recommended page limit does not apply to the cover sheet; the budget section, including the narrative budget justification; the assurances and certifications; or the abstract (follow the guidance provided in the application package for completing the abstract), the table of contents, the list of priority requirements, the resumes, the reference list, the letters of support, or the appendices. However, the recommended page limit does apply to all of the application narrative, including all text in charts, tables, figures, graphs, and screen shots.

V. Application Review Information

1. *Selection Criteria:* The selection criteria for this competition are from 34 CFR 75.210 and are listed below:

(a) *Significance (10 points).*

(1) The Secretary considers the significance of the proposed project.

(2) In determining the significance of the proposed project, the Secretary considers the following factors:

(i) The extent to which specific gaps or weaknesses in services, infrastructure, or opportunities have been identified and will be addressed by the proposed project, including the nature and magnitude of those gaps or weaknesses.

(ii) The importance or magnitude of the results or outcomes likely to be attained by the proposed project.

(b) *Quality of project services (35 points).*

(1) The Secretary considers the quality of the services to be provided by the proposed project.

(2) In determining the quality of the services to be provided by the proposed project, the Secretary considers the quality and sufficiency of strategies for ensuring equal access and treatment for eligible project participants who are members of groups that have traditionally been underrepresented based on race, color, national origin, gender, age, or disability.

(3) In addition, the Secretary considers the following factors:

(i) The extent to which the goals, objectives, and outcomes to be achieved by the proposed project are clearly specified and measurable.

(ii) The extent to which there is a conceptual framework underlying the proposed research or demonstration activities and the quality of that framework.

(iii) The extent to which the services to be provided by the proposed project reflect up-to-date knowledge from research and effective practice.

(iv) The extent to which the training or professional development services to be provided by the proposed project are of sufficient quality, intensity, and duration to lead to improvements in practice among the recipients of those services.

(v) The extent to which the TA services to be provided by the proposed project involve the use of efficient strategies, including the use of technology, as appropriate, and the leveraging of non-project resources.

(c) *Quality of the project evaluation (20 points).*

(1) The Secretary considers the quality of the evaluation to be conducted of the proposed project.

(2) In determining the quality of the evaluation, the Secretary considers the following factors:

(i) The extent to which the methods of evaluation are thorough, feasible, and appropriate to the goals, objectives, and outcomes of the proposed project.

(ii) The extent to which the methods of evaluation provide for examining the effectiveness of project implementation strategies.

(iii) The extent to which the methods of evaluation will provide performance feedback and permit periodic assessment of progress toward achieving intended outcomes.

(d) *Adequacy of resources and quality of project personnel (15 points).*

(1) The Secretary considers the adequacy of resources for the proposed project and the quality of the personnel who will carry out the proposed project.

(2) In determining the quality of project personnel, the Secretary considers the extent to which the applicant encourages applications for employment from persons who are members of groups that have traditionally been underrepresented based on race, color, national origin, gender, age, or disability.

(3) In addition, the Secretary considers the following factors:

(i) The qualifications, including relevant training and experience, of key project personnel.

(ii) The qualifications, including relevant training and experience, of project consultants or subcontractors.

(iii) The adequacy of support, including facilities, equipment, supplies, and other resources, from the applicant organization or the lead applicant organization.

(iv) The relevance and demonstrated commitment of each partner in the proposed project to the implementation and success of the project.

(v) The extent to which the costs are reasonable in relation to the objectives, design, and potential significance of the proposed project.

(e) *Quality of the management plan (20 points).*

(1) The Secretary considers the quality of the management plan for the proposed project.

(2) In determining the quality of the management plan for the proposed project, the Secretary considers the following factors:

(i) The adequacy of the management plan to achieve the objectives of the proposed project on time and within budget, including clearly defined responsibilities, timelines, and

milestones for accomplishing project tasks.

(ii) The extent to which the time commitments of the project director and principal investigator and other key project personnel are appropriate and adequate to meet the objectives of the proposed project.

(iii) The adequacy of mechanisms for ensuring high-quality products and services from the proposed project.

(iv) How the applicant will ensure that a diversity of perspectives are brought to bear in the operation of the proposed project, including those of parents, teachers, the business community, a variety of disciplinary and professional fields, recipients or beneficiaries of services, or others, as appropriate.

2. *Review and Selection Process:* We remind potential applicants that in reviewing applications in any discretionary grant competition, the Secretary may consider, under 34 CFR 75.217(d)(3), the past performance of the applicant in carrying out a previous award, such as the applicant's use of funds, achievement of project objectives, and compliance with grant conditions. The Secretary may also consider whether the applicant failed to submit a timely performance report or submitted a report of unacceptable quality.

In addition, in making a competitive grant award, the Secretary requires various assurances, including those applicable to Federal civil rights laws that prohibit discrimination in programs or activities receiving Federal financial assistance from the Department (34 CFR 100.4, 104.5, 106.4, 108.8, and 110.23).

3. *Additional Review and Selection Process Factors:* In the past, the Department has had difficulty finding peer reviewers for certain competitions because so many individuals who are eligible to serve as peer reviewers have conflicts of interest. The standing panel requirements under section 682(b) of IDEA also have placed additional constraints on the availability of reviewers. Therefore, the Department has determined that applications may be separated into two or more groups and ranked and selected for funding within specific groups for some discretionary grant competitions, applications may be separated into two or more groups and ranked and selected for funding within specific groups. This procedure will make it easier for the Department to find peer reviewers by ensuring that greater numbers of individuals who are eligible to serve as reviewers for any particular group of applicants will not have conflicts of interest. It also will increase the quality, independence, and fairness of the review process, while permitting panel members to review applications under discretionary grant competitions for which they also have submitted applications.

4. *Risk Assessment and Specific Conditions:* Consistent with 2 CFR 200.206, before awarding grants under this competition the Department conducts a review of the risks posed by applicants. Under 2 CFR 200.208, the Secretary may impose specific conditions and, under 2 CFR 3474.10, in appropriate circumstances, high-risk conditions on a grant if the applicant or grantee is not financially stable; has a history of unsatisfactory performance; has a financial or other management system that does not meet the standards in 2 CFR part 200, subpart D; has not fulfilled the conditions of a prior grant; or is otherwise not responsible.

5. *Integrity and Performance System:* If you are selected under this competition to receive an award that over the course of the project period may exceed the simplified acquisition threshold (currently $250,000), under 2 CFR 200.206(a)(2) we must make a judgment about your integrity, business ethics, and record of performance under Federal awards—that is, the risk posed by you as an applicant—before we make an award. In doing so, we must consider any information about you that is in the integrity and performance system (currently referred to as the Federal Awardee Performance and Integrity Information System (FAPIIS)), accessible through the System for Award Management. You may review and comment on any information about yourself that a Federal agency previously entered and that is currently in FAPIIS.

Please note that, if the total value of your currently active grants, cooperative agreements, and procurement contracts from the Federal Government exceeds $10,000,000, the reporting requirements in 2 CFR part 200, Appendix XII, require you to report certain integrity information to FAPIIS semiannually. Please review the requirements in 2 CFR part 200, Appendix XII, if this grant plus all the other Federal funds you receive exceed $10,000,000.

6. *In General:* In accordance with the Office of Management and Budget's guidance located at 2 CFR part 200, all applicable Federal laws, and relevant Executive guidance, the Department will review and consider applications for funding pursuant to this notice inviting applications in accordance with—

(a) Selecting recipients most likely to be successful in delivering results based on the program objectives through an objective process of evaluating Federal award applications (2 CFR 200.205);

(b) Prohibiting the purchase of certain telecommunication and video surveillance services or equipment in alignment with section 889 of the National Defense Authorization Act of 2019 (Pub. L. 115–232) (2 CFR 200.216);

(c) Providing a preference, to the extent permitted by law, to maximize use of goods, products, and materials produced in the United States (2 CFR 200.322); and

(d) Terminating agreements in whole or in part to the greatest extent authorized by law if an award no longer effectuates the program goals or agency priorities (2 CFR 200.340).

VI. Award Administration Information

1. *Award Notices:* If your application is successful, we notify your U.S. Representative and U.S. Senators and send you a Grant Award Notification (GAN); or we may send you an email containing a link to access an electronic version of your GAN. We may notify you informally, also.

If your application is not evaluated or not selected for funding, we notify you.

2. *Administrative and National Policy Requirements:* We identify administrative and national policy requirements in the application package and reference these and other requirements in the *Applicable Regulations* section of this notice.

We reference the regulations outlining the terms and conditions of an award in the *Applicable Regulations* section of this notice and include these and other specific conditions in the GAN. The GAN also incorporates your approved application as part of your binding commitments under the grant.

3. *Open Licensing Requirements:* Unless an exception applies, if you are awarded a grant under this competition, you will be required to openly license to the public grant deliverables created in whole, or in part, with Department grant funds. When the deliverable consists of modifications to pre-existing works, the license extends only to those modifications that can be separately identified and only to the extent that open licensing is permitted under the terms of any licenses or other legal restrictions on the use of pre-existing works. Additionally, a grantee that is awarded competitive grant funds must have a plan to disseminate these public grant deliverables. This dissemination plan can be developed and submitted after your application has been reviewed and selected for funding. For additional information on the open licensing requirements please refer to 2 CFR 3474.20.

4. *Reporting:* (a) If you apply for a grant under this competition, you must ensure that you have in place the necessary processes and systems to comply with the reporting requirements in 2 CFR part 170 should you receive funding under the competition. This does not apply if you have an exception under 2 CFR 170.110(b).

(b) At the end of your project period, you must submit a final performance report, including financial information, as directed by the Secretary. If you receive a multiyear award, you must submit an annual performance report that provides the most current performance and financial expenditure information as directed by the Secretary under 34 CFR 75.118. The Secretary may also require more frequent performance reports under 34 CFR 75.720(c). For specific requirements on reporting, please go to *www.ed.gov/fund/grant/apply/appforms/appforms.html.*

(c) Under 34 CFR 75.250(b), the Secretary may provide a grantee with additional funding for data collection analysis and reporting. In this case the Secretary establishes a data collection period.

5. *Performance Measures:* For the purposes of Department reporting under 34 CFR 75.110, we have established a set of performance measures, including long-term measures, that are designed to yield information on various aspects of the effectiveness and quality of the Technical Assistance and Dissemination to Improve Services and Results for Children With Disabilities program, which apply to projects funded under this competition. Grantees are required to submit data on these measures as directed by OSEP. These measures are:

- *Program Performance Measure 1:* The percentage of Technical Assistance and Dissemination products and services deemed to be of high quality by an independent review panel of experts qualified to review the substantive content of the products and services.
- *Program Performance Measure 2:* The percentage of Special Education Technical Assistance and Dissemination products and services deemed by an independent review panel of qualified experts to be of high relevance to special education personnel preparation and professional development, or practice.
- *Program Performance Measure 3:* The percentage of all Special Education Technical Assistance and Dissemination products and services deemed by an independent review panel of qualified experts to be useful in improving special education personnel preparation and professional development, or practice.
- *Program Performance Measure 4:* The cost efficiency of the Technical Assistance and Dissemination Program, including the percentage of milestones achieved in the current annual performance report period and the percentage of funds spent during the current fiscal year.
- *Long-term Program Performance Measure:* The percentage of States receiving Special Education Technical Assistance and Dissemination services regarding scientifically or evidence-based practices for children and youth with disabilities that successfully promote the implementation of those practices in school districts and service agencies.

Grantees will be required to report information on their project's performance in annual and final performance reports to the Department (34 CFR 75.590).

The Department will also closely monitor the extent to which the products and services provided by the Center meet needs identified by stakeholders and may require the Center to report on such alignment in its annual and final performance reports.

6. *Continuation Awards:* In making a continuation award under 34 CFR 75.253, the Secretary considers, among other things: whether a grantee has made substantial progress in achieving the goals and objectives of the project; whether the grantee has expended funds in a manner that is consistent with its approved application and budget; and, if the Secretary has established performance measurement requirements, whether the grantee has made substantial progress in achieving the performance targets in the grantee's approved application.

In making a continuation award, the Secretary also considers whether the grantee is operating in compliance with the assurances in its approved application, including those applicable to Federal civil rights laws that prohibit discrimination in programs or activities receiving Federal financial assistance from the Department (34 CFR 100.4, 104.5, 106.4, 108.8, and 110.23).

VII. Other Information

Accessible Format: On request to the program contact person listed under **FOR FURTHER INFORMATION CONTACT**, individuals with disabilities can obtain this document and a copy of the application package in an accessible format. The Department will provide the requestor with an accessible format that may include Rich Text Format (RTF) or text format (txt), a thumb drive, an MP3 file, braille, large print, audiotape, or compact disc, or other accessible format.

Electronic Access to This Document: The official version of this document is the document published in the **Federal Register**. You may access the official edition of the **Federal Register** and the Code of Federal Regulations at *www.govinfo.gov.* At this site you can view this document, as well as all other documents of this Department published in the **Federal Register**, in text or Portable Document Format (PDF). To use PDF, you must have Adobe Acrobat Reader, which is available free at the site.

You may also access documents of the Department published in the **Federal Register** by using the article search feature at *www.federalregister.gov.* Specifically, through the advanced search feature at this site, you can limit your search to documents published by the Department.

Glenna Wright-Gallo,

Assistant Secretary for Special Education and Rehabilitative Services.

BILLING CODE 4000–01–P

DEPARTMENT OF EDUCATION

[Docket No.: ED–2023–SCC–0116]

Agency Information Collection Activities; Comment Request; Student Support Services Annual Performance Report

AGENCY: Office of Postsecondary Education (OPE), Department of Education (ED).

ACTION: Notice.

SUMMARY: In accordance with the Paperwork Reduction Act (PRA) of 1995, the Department is proposing a revision of a currently approved information collection request (ICR).

DATES: Interested persons are invited to submit comments on or before August 28, 2023.

ADDRESSES: To access and review all the documents related to the information collection listed in this notice, please use *http://www.regulations.gov* by searching the Docket ID number ED–2023–SCC–0116. Comments submitted in response to this notice should be submitted electronically through the Federal eRulemaking Portal at *http://www.regulations.gov* by selecting the Docket ID number or via postal mail, commercial delivery, or hand delivery. If the *regulations.gov* site is not available to the public for any reason, the Department will temporarily accept comments at *ICDocketMgr@ed.gov.* Please include the docket ID number and the title of the information

collection request when requesting documents or submitting comments. Please note that comments submitted after the comment period will not be accepted. Written requests for information or comments submitted by postal mail or delivery should be addressed to the Manager of the Strategic Collections and Clearance Governance and Strategy Division, U.S. Department of Education, 400 Maryland Ave. SW, LBJ, Room 6W203, Washington, DC 20202–8240.

FOR FURTHER INFORMATION CONTACT: For specific questions related to collection activities, please contact Lavelle Wright, 202–453–7739.

SUPPLEMENTARY INFORMATION: The Department, in accordance with the Paperwork Reduction Act of 1995 (PRA) (44 U.S.C. 3506(c)(2)(A)), provides the general public and Federal agencies with an opportunity to comment on proposed, revised, and continuing collections of information. This helps the Department assess the impact of its information collection requirements and minimize the public's reporting burden. It also helps the public understand the Department's information collection requirements and provide the requested data in the desired format. The Department is soliciting comments on the proposed information collection request (ICR) that is described below. The Department is especially interested in public comment addressing the following issues: (1) is this collection necessary to the proper functions of the Department; (2) will this information be processed and used in a timely manner; (3) is the estimate of burden accurate; (4) how might the Department enhance the quality, utility, and clarity of the information to be collected; and (5) how might the Department minimize the burden of this collection on the respondents, including through the use of information technology. Please note that written comments received in response to this notice will be considered public records.

Title of Collection: Student Support Services Annual Performance Report.

OMB Control Number: 1840–0525.

Type of Review: A revision of a currently approved ICR.

Respondents/Affected Public: Private sector.

Total Estimated Number of Annual Responses: 1,161.

Total Estimated Number of Annual Burden Hours: 17,821.

Abstract: Student Support Services (SSS) program grantees must submit the Annual Performance Report (APR) annually. The reports are used to evaluate grantees' performance for substantial progress, respond to Government Performance and Results Act requirements, and award prior experience points at the end of each project (budget) period. The Department also aggregates the data to provide descriptive information on the projects and to analyze the impact of the SSS program on the academic progress of participating students.

The form has been revised to include an additional field addressing the Higher Education Act provision that requires the Secretary to report comparable data on the performance of not only first-generation and low-income students but also on students with disabilities. This field adds a small amount of additional burden per grantee.

Dated: June 26, 2023.

Kun Mullan,

PRA Coordinator, Strategic Collections and Clearance, Governance and Strategy Division, Office of Chief Data Officer, Office of Planning, Evaluation and Policy Development.

BILLING CODE 4000–01–P

DEPARTMENT OF ENERGY

Federal Energy Regulatory Commission

Combined Notice of Filings

Take notice that the Commission has received the following Natural Gas & Oil Pipeline Rate and Refund Report filings:

Filings in Existing Proceedings

Docket Numbers: PR23–48–001.

Applicants: Spire Storage Salt Plains LLC.

Description: Amendment Filing: Salt Plains revised SOC June 2023 to be effective 4/1/2023.

Filed Date: 6/22/23.

Accession Number: 20230622–5066.

Comment Date: 5 p.m. ET 7/13/23.

Protest Date: 5 p.m. ET 8/21/23

Any person desiring to protest in any the above proceedings must file in accordance with Rule 211 of the Commission's Regulations (18 CFR 385.211) on or before 5:00 p.m. Eastern time on the specified comment date.

The filings are accessible in the Commission's eLibrary system (*https://elibrary.ferc.gov/idmws/search/fercgensearch.asp*) by querying the docket number.

eFiling is encouraged. More detailed information relating to filing requirements, interventions, protests, service, and qualifying facilities filings can be found at: *http://www.ferc.gov/docs-filing/efiling/filing-req.pdf.* For other information, call (866) 208–3676 (toll free). For TTY, call (202) 502–8659.

The Commission's Office of Public Participation (OPP) supports meaningful public engagement and participation in Commission proceedings. OPP can help members of the public, including landowners, environmental justice communities, Tribal members and others, access publicly available information and navigate Commission processes. For public inquiries and assistance with making filings such as interventions, comments, or requests for rehearing, the public is encouraged to contact OPP at (202) 502–6595 or *OPP@ferc.gov.*

Dated: June 23, 2023.

Debbie-Anne A. Reese,

Deputy Secretary.

BILLING CODE 6717–01–P

DEPARTMENT OF ENERGY

Federal Energy Regulatory Commission

[Project No. 2742–039]

Copper Valley Electric Association, Inc.; Notice of Intent To File License Application, Filing of Pre-Application Document, and Approving Use of the Traditional Licensing Process

a. *Type of Filing:* Notice of Intent to File License Application and Request to Use the Traditional Licensing Process.

b. *Project No.:* 2742–039.

c. *Date Filed:* April 28, 2023.

d. *Submitted By:* Copper Valley Electric Association, Inc. (CVEA).

e. *Name of Project:* Solomon Gulch Hydroelectric Project.

f. *Location:* On Solomon Lake and Solomon Gulch Creek, in the Chugach Census Area, in Valdez, Alaska. The project occupies Federal lands under the jurisdiction of the U.S. Bureau of Land Management.

g. *Filed Pursuant to:* 18 CFR 5.3 of the Commission's regulations.

h. *Potential Applicant Contact:* Coreen Palacios, Copper Valley Electric, P.O. Box 45, Mile 187 Glenn Highway, Glenallen, AK 99588; (907) 822–8301; email—*CPalacios@cvea.org*.

i. *FERC Contact:* Lauren Townson at (202) 502–8572; or email at *Lauren.Townson@ferc.gov*.

j. CVEA filed a request to use the Traditional Licensing Process on April 28, 2023. CVEA provided public notice of its request on April 27, 2023. In a letter dated June 23, 2023, the Director of the Division of Hydropower

Licensing approved CVEA's request to use the Traditional Licensing Process.

k. With this notice, we are initiating informal consultation with the U.S. Fish and Wildlife Service and/or NOAA Fisheries under section 7 of the Endangered Species Act and the joint agency regulations thereunder at 50 CFR part 402; and NOAA Fisheries under section 305(b) of the Magnuson-Stevens Fishery Conservation and Management Act and implementing regulations at 50 CFR 600.920. We are also initiating consultation with the Alaska State Historic Preservation Officer, as required by section 106, National Historic Preservation Act, and the implementing regulations of the Advisory Council on Historic Preservation at 36 CFR 800.2.

l. With this notice, we are designating CVEA as the Commission's non-Federal representative for carrying out informal consultation pursuant to section 7 of the Endangered Species Act and section 305(b) of the Magnuson-Stevens Fishery Conservation and Management Act; and consultation pursuant to section 106 of the National Historic Preservation Act.

m. CVEA filed a Pre-Application Document (PAD; including a proposed process plan and schedule) with the Commission, pursuant to 18 CFR 5.6 of the Commission's regulations.

n. A copy of the PAD may be viewed and/or printed on the Commission's website (*http://www.ferc.gov*), using the ''eLibrary'' link. Enter the docket number, excluding the last three digits in the docket number field to access the document. At this time, the Commission has suspended access to the Commission's Public Reference Room. For assistance, contact FERC at *FERCOnlineSupport@ferc.gov* or call toll free, (886) 208–3676 or TTY (202) 502–8659.

o. The licensee states its unequivocal intent to submit an application for a new license for Project No.2742–039. Pursuant to 18 CFR 16.8, 16.9, and 16.10 each application for a new license and any competing license applications must be filed with the Commission at least 24 months prior to the expiration of the existing license. All applications for license for this project must be filed by May 31, 2026.

p. Register online at *http://www.ferc.gov/docs-filing/esubscription.asp* to be notified via email of new filing and issuances related to this or other pending projects. For assistance, contact FERC Online Support.

The Commission's Office of Public Participation (OPP) supports meaningful public engagement and participation in Commission proceedings. OPP can help members of the public, including landowners, environmental justice communities, Tribal members and others, access publicly available information and navigate Commission processes. For public inquiries and assistance with making filings such as interventions, comments, or requests for rehearing, the public is encouraged to contact OPP at (202)502–6595 or *OPP@ferc.gov*.

Dated: June 23, 2023.

BILLING CODE 6717–01–P

ENVIRONMENTAL PROTECTION AGENCY

[EPA–HQ–OPP–2009–0136; FRL–11049–01–OCSPP]

Pesticide Registration Review; Sulfuryl Fluoride Revised Mitigation and Response to Comments on the Draft Interim Re-Entry Mitigation Measures Memorandum; Notice of Availability

AGENCY: Environmental Protection Agency (EPA).

ACTION: Notice.

SUMMARY: This notice announces the availability of EPA's Sulfuryl Fluoride Revised Mitigation and Response to Comments on the Draft Interim Re-Entry Mitigation Measures Memorandum, which is being issued to address human health concerns and in response to EPA's Office of Inspector General 2016 (OIG) Report, *Additional Measures Can Be Taken to Prevent Deaths and Serious Injuries from Residential Fumigations* (No. 17–P–0053). Sulfuryl flouride is currently in registration review which is EPA's periodic review of pesticide registrations to ensure that each pesticide continues to satisfy the statutory standard for registration, that is, that the pesticide can perform its intended function without causing unreasonable adverse effects on human health or the environment. Through this program, EPA is ensuring that each pesticide's registration is based on current scientific and other knowledge, including its effects on human health and the environment. EPA may pursue mitigation at any time during the registration review process if it finds that a pesticide poses unreasonable adverse effects to human health or the environment. EPA believes that the mitigation measures outlined in the Sulfuryl Fluoride Revised Mitigation and Response to Comments on the Draft Interim Re-Entry Mitigation Measures Memorandum are necessary to address identified human health risk concerns from the use of sulfuryl fluoride as a structural fumigant in residential use sites.

ADDRESSES: The docket for this action, identified under docket identification (ID) number EPA–HQ–OPP–2009–0136, is available online at *https://www.regulations.gov.* Additional instructions on visiting the docket,

along with more information about dockets generally, is available at *https://www.epa.gov/dockets.*

FOR FURTHER INFORMATION CONTACT: *For pesticide specific information contact:* Moana Appleyard, Pesticide Re-Evaluation Division (7508P), Office of Pesticide Programs, Environmental Protection Agency, 1200 Pennsylvania Ave. NW, Washington, DC 20460–0001; telephone number: (202) 566–2220; email address: *appleyard.moana@epa.gov.*

For general questions on the registration review program, contact: Melanie Biscoe, Pesticide Re-Evaluation Division (7508P), Office of Pesticide Programs, Environmental Protection Agency, 1200 Pennsylvania Ave. NW, Washington, DC 20460–0001; telephone number: (202) 566–0701; email address: *biscoe.melanie@epa.gov.*

SUPPLEMENTARY INFORMATION:

I. General Information

A. Does this action apply to me?

This action is directed to the public in general and may be of interest to a wide range of stakeholders including environmental and human health advocates; the chemical industry; pesticide users; and members of the public interested in the sale, distribution, or use of pesticides. Since others also may be interested, the Agency has not attempted to describe all the specific entities that may be affected by this action. If you have any questions regarding the applicability of this action to a particular entity, consult the Chemical Review Manager listed under **FOR FURTHER INFORMATION CONTACT**.

B. How can I get copies of this document and other related information?

The docket for this action, identified by docket identification (ID) number EPA–HQ–OPP–2009–0136, is available at *https://www.regulations.gov.*

II. Background

Registration review is EPA's periodic review of pesticide registrations to ensure that each pesticide continues to satisfy the statutory standard for registration, that is, the pesticide can perform its intended function without unreasonable adverse effects on human health or the environment. The sulfuryl flouride decision document, which is ahead of the typical mitigation phase of Registration Review, is in response to the EPA Office of the Inspector General's (OIG) 2016 report entitled *Additional Measures Can Be Taken to Prevent Deaths and Serious Injuries From Residential Fumigations* (available at: *https://www.epa.gov/sites/production/files/2016-12/documents/_epaoig_20161212-17-p-0053.pdf*). The Agency issued the Sulfuryl Fluoride Draft Interim Re-Entry Mitigation Measures in May 2021 for public comment. During the comment period, comments were received that resulted in changes to the Agency's mitigation decision, including revising the aeration procedures. The purpose of the Sulfuryl Fluoride Revised Mitigation and Response to Comments on the Draft Interim Re-Entry Mitigation Measures Memorandum is to announce the final risk mitigation measures to address these recommendations from the OIG Report and provide responses to the comments received on the draft interim risk mitigation measures. EPA expects that the implementation of the mitigation measures described in this risk mitigation document will allow sulfuryl fluoride products to remain available to users while addressing the recommendations from the OIG report.

Once all the risk assessments are completed for all the uses of sulfuryl fluoride, EPA may propose additional mitigation to address potential risks, as part of the normal registration review process. EPA will solicit public input on any additional risk mitigation in a Proposed Interim Decision (PID). Through the registration review program, EPA is ensuring that each pesticide's registration is based on current scientific and other knowledge, including its effects on human health and the environment.

III. Authority

EPA is conducting its registration review of the sulfuryl fluoride documents listed in Unit IV pursuant to section 3(g) of the Federal Insecticide, Fungicide, and Rodenticide Act (FIFRA) and the Procedural Regulations for Registration Review at 40 CFR part 155, subpart C. Section 3(g) of FIFRA provides, among other things, that the registrations of pesticides are to be reviewed every 15 years. Under FIFRA, a pesticide product may be registered or remain registered only if it meets the statutory standard for registration given in FIFRA section 3(c)(5) (7 U.S.C. 136a(c)(5)). When used in accordance with widespread and commonly recognized practice, the pesticide product must perform its intended function without unreasonable adverse effects on the environment; that is, without any unreasonable risk to man or the environment, or a human dietary risk from residues that result from the use of a pesticide in or on food.

IV. What action is the Agency taking?

Pursuant to 40 CFR 155.58, this notice announces the availability of EPA's Sulfuryl Fluoride Revised Mitigation and Response to Comments on the Draft Interim Re-Entry Mitigation Measures, to finalize the Agency's early mitigation in response to the OIG Report.

As provided in 40 CFR 155.58, the registration review docket for each pesticide case will remain publicly accessible through the duration of the registration review process; that is, until all actions required in the final decision on the registration review case have been completed. Background on the registration review program is provided at: *https://www.epa.gov/pesticide-reevaluation.*

Authority: 7 U.S.C. 136 *et seq.*

Dated: June 26, 2023.

Mary Elissa Reaves,

Director, Pesticide Re-Evaluation Division, Office of Pesticide Programs.

BILLING CODE 6560–50–P

ENVIRONMENTAL PROTECTION AGENCY

[EPA–HQ–OAR–2013–0437; FRL–11114–01–OMS]

Agency Information Collection Activities; Submission to the Office of Management and Budget for Review and Approval; Comment Request; Emission Control System Performance Warranty Regulations and Voluntary Aftermarket Part Certification Program (Renewal)

AGENCY: Environmental Protection Agency (EPA).

ACTION: Notice.

SUMMARY: The Environmental Protection Agency (EPA) has submitted an information collection request (ICR), Emission Control System Performance Warranty Regulations and Voluntary Aftermarket Part Certification Program (EPA ICR Number 0116.13, OMB Control Number 2060–0060) to the Office of Management and Budget (OMB) for review and approval in accordance with the Paperwork Reduction Act. This is a proposed extension of the ICR, which is currently approved through June 30, 2023. Public comments were previously requested via the **Federal Register** on October 5, 2022 during a 60-day comment period. This notice allows for an additional 30 days for public comments.

DATES: Comments may be submitted on or before July 31, 2023.

ADDRESSES: Submit your comments, referencing Docket ID Number EPA–HQ–OAR–2013–0437, to EPA online using *www.regulations.gov* (our preferred method), by email to *a-and-r-Docket@epa.gov,* or by mail to: EPA Docket Center, Environmental Protection Agency, Mail Code 28221T, 1200 Pennsylvania Ave. NW, Washington, DC 20460. EPA's policy is that all comments received will be included in the public docket without change including any personal information provided, unless the comment includes profanity, threats, information claimed to be Confidential Business Information (CBI) or other information whose disclosure is restricted by statute.

Submit written comments and recommendations to OMB for the proposed information collection within 30 days of publication of this notice to *www.reginfo.gov/public/do/PRAMain.* Find this particular information collection by selecting ''Currently under 30-day Review—Open for Public Comments'' or by using the search function.

FOR FURTHER INFORMATION CONTACT: Lynn Sohacki, Compliance Division, Office of Transportation and Air Quality, U.S. Environmental Protection Agency, 2000 Traverwood, Ann Arbor, Michigan 48105; telephone number: 734–214–4851; fax number 734–214–4869; email address: *sohacki.lynn@epa.gov.*

SUPPLEMENTARY INFORMATION: This is a proposed extension of the ICR, which is currently approved through June 30, 2023. An agency may not conduct or sponsor and a person is not required to respond to a collection of information unless it displays a currently valid OMB control number.

Public comments were previously requested via the **Federal Register** on October 5, 2022 during a 60-day comment period (87 FR 60393). This notice allows for an additional 30 days for public comments. Supporting documents, which explain in detail the information that the EPA will be collecting, are available in the public docket for this ICR. The docket can be viewed online at *www.regulations.gov* or in person at the EPA Docket Center, WJC West, Room 3334, 1301 Constitution Ave. NW, Washington, DC. The telephone number for the Docket Center is 202–566–1744. For additional information about EPA's public docket, visit *http://www.epa.gov/dockets.*

Abstract: Under Section 206(a) of the Clean Air Act (42 U.S.C. 7521), on-highway engine and vehicle manufacturers may not legally introduce their products into U.S. commerce unless EPA has certified that their production complies with applicable emission standards. Per section 207(a), original vehicle manufacturers must warrant that vehicles are free from defects in materials and workmanship that would cause the vehicles not to comply with emission regulations during their useful life. Section 207(a) directs EPA to provide certification to those manufacturers or builders of automotive aftermarket parts that demonstrate that the installation and use of their products will not cause failure of the engine or result in the vehicle not complying with emission standards. An aftermarket part is any part offered for sale for installation in or on a motor vehicle after such vehicle has left the vehicle manufacturer's production line (40 CFR 85.2113(b)). Participation in the aftermarket certification program is voluntary. Due to the fact that EPA has received only two aftermarket part certification applications since 1989, the Agency does not expect to receive any applications in the next three years. The purpose of this ICR renewal is to preserve EPA's authority to receive such an application in the event that one is submitted. Consequently, for the purposes of this information collection request, EPA has assumed that one manufacturer will apply for aftermarket part certification during the three-year period covered by this collection.

Aftermarket part manufacturers or builders (manufacturers) electing to participate conduct emission and durability testing as described in 40 CFR part 85, subpart V, and submit data about their products and testing procedures. Any information submitted to the Agency for which a claim of confidentiality is made is safeguarded according to policies set forth in CFR title 40, chapter 1, part 2, subpart B—Confidentiality of Business Information (see 40 CFR part 2).

Form Numbers: None.

Respondents/affected entities: Manufacturers or builders of automotive aftermarket parts.

Respondent's obligation to respond: Required to obtain or retain a benefit (Clean Air Act.)

Estimated number of respondents: 1 (total).

Frequency of response: On occasion.

Total estimated burden: 547 hours (per year). Burden is defined at 5 CFR 1320.03(b).

Total estimated cost: $37,208 (per year), which includes $1,955 annualized capital or operation & maintenance costs.

Changes in the Estimates: There is no change in the total estimated respondent burden compared with the ICR currently approved by OMB.

Courtney Kerwin,

Director, Regulatory Support Division.

[FR Doc. 2023–13799 Filed 6–28–23; 8:45 am]

BILLING CODE 6560–50–P

FEDERAL COMMUNICATIONS COMMISSION

[OMB 3060–0790, OMB 3060–0859; FR ID 151041]

Information Collections Being Reviewed by the Federal Communications Commission Under Delegated Authority

AGENCY: Federal Communications Commission.

ACTION: Notice and request for comments.

SUMMARY: As part of its continuing effort to reduce paperwork burdens, and as required by the Paperwork Reduction Act (PRA) of 1995, the Federal Communications Commission (FCC or the Commission) invites the general public and other Federal agencies to take this opportunity to comment on the following information collection. Comments are requested concerning: whether the proposed collection of information is necessary for the proper performance of the functions of the Commission, including whether the information shall have practical utility; the accuracy of the Commission's burden estimate; ways to enhance the quality, utility, and clarity of the information collected; ways to minimize the burden of the collection of information on the respondents, including the use of automated collection techniques or other forms of information technology; and ways to further reduce the information collection burden on small business concerns with fewer than 25 employees. The FCC may not conduct or sponsor a collection of information unless it displays a currently valid control number. No person shall be subject to any penalty for failing to comply with a collection of information subject to the PRA that does not display a valid Office of Management and Budget (OMB) control number.

DATES: Written PRA comments should be submitted on or before August 28, 2023. If you anticipate that you will be submitting comments, but find it difficult to do so within the period of time allowed by this notice, you should

advise the contact listed below as soon as possible.

ADDRESSES: Direct all PRA comments to Nicole Ongele, FCC, via email *PRA@fcc.gov* and to *nicole.ongele@fcc.gov.*

FOR FURTHER INFORMATION CONTACT: For additional information about the information collection, contact Nicole Ongele, (202) 418–2991.

SUPPLEMENTARY INFORMATION:

OMB Control Number: 3060–0790.

Title: Section 68.110 (b), Availability of Inside Wiring Information.

Form Number: N/A.

Type of Review: Extension of a currently approved collection.

Respondents: Business or other for-profit.

Number of Respondents and Responses: 200 respondents; 1,200 responses.

Estimated Time per Response: 1 hour.

Frequency of Response: Recordkeeping requirement and third party disclosure requirement.

Obligation to Respond: Mandatory. Providers of wireline telecommunications services that willfully or repeatedly fail to comply with this rule are subject to forfeitures under 47 CFR 1.80. Statutory authority for this collection of information is contained in 47 U.S.C. 151, 154, 201–205, 218, 220 and 405 of the Communications Act of 1934, as amended.

Total Annual Burden: 1,200 hours.

Total Annual Cost: $5,000.

Needs and Uses: Section 68.110(b) requires that any available technical information concerning carrier-installed wiring on the customer's side of the demarcation point, including copies of existing schematic diagrams and service records, shall be provided by the telephone company upon request of the building owner or agent thereof. The provider of wireline telecommunications services may charge the building owner a reasonable fee for this service, which shall not exceed the cost involved in locating and copying the documents. In the alternative, the provider may make these documents available for review and copying by the building owner or his agent. In this case, the wireline telecommunications carrier may charge a reasonable fee, which shall not exceed the cost involved in making the documents available, and may also require the building owner or his agent to pay a deposit to guarantee the documents' return. The information is needed so that building owners may choose to contract with an installer of their choice on inside wiring maintenance and installation services to modify existing wiring or assist with the installation of additional inside wiring.

OMB Control Number: 3060–0859.

Title: Suggested Guidelines for Petitions for Ruling Under Section 253 of the Communications Act of 1934, as amended.

Form Number: N/A.

Type of Review: Extension of a currently approved collection.

Respondents: Business or other for-profit entities and State, local, or Tribal governments.

Number of Respondents and Responses: 24 respondents; 24 responses.

Estimated Time per Response: 63–125 hours.

Frequency of Response: On occasion reporting requirement.

Obligation to Respond: Voluntary. Statutory authority for this information collection is contained in 47 U.S.C. 253 of the Communications Act of 1934, as amended.

Total Annual Burden: 1,698 hours.

Total Annual Cost: No Cost.

Needs and Uses: The Commission will submit this extension to the OMB after this 60-day comment period in order to obtain the full three-year clearance from them. Although very few petitions for preemption under section 253 have been filed in the past few years, there is reason to believe that the current estimate is more likely to reflect future developments than a reduction in the number of estimated filings. The Commission published a Public Notice in November 1998 which established suggested guidelines for the filing of petitions for preemption pursuant to section 253 of the Communications Act of 1934, as amended, as well as suggested guidelines for the filing of comments opposing such requests for preemption. The Commission will use this information to resolve petitions for preemption of state or local statutes, regulations, or other state or local legal requirements that are alleged to prohibit or have the effect of prohibiting any entity from providing a telecommunications service. Section 253 of the Communications Act of 1934, as amended, which was added by the Telecommunications Act of 1996, requires the Commission, with certain important exceptions, to preempt (to the extent necessary) the enforcement of any state or local statute or regulation, or other state or local legal requirement that prohibits or has the effect of prohibiting any entity from providing any interstate or intrastate telecommunications service. The Commission's consideration of preemption under section 253 typically begins with the filing of a petition by an aggrieved party. The Commission typically places such petitions on public notice and requests comment by interested parties. The Commission's decision is based on the public record, generally composed of the petition and comments. The Commission has considered a number of preemption items since the passage of the Telecommunications Act of 1996, and believes it is in the public interest to inform the public of the information necessary for full consideration of the issues likely to be involved in section 253 preemption proceedings. In order to render a timely and informed decision, the Commission expects petitioners and commenters to provide it with relevant information sufficient to describe the legal regime involved in the controversy and to provide the factual information necessary for a decision.

Federal Communications Commission.

Marlene Dortch,

Secretary, Office of the Secretary.

[FR Doc. 2023–13843 Filed 6–28–23; 8:45 am]

BILLING CODE 6712–01–P

FEDERAL COMMUNICATIONS COMMISSION

[OMB 3060–1285; FR ID 150556]

Information Collection Being Reviewed by the Federal Communications Commission

AGENCY: Federal Communications Commission.

ACTION: Notice and request for comments.

SUMMARY: As part of its continuing effort to reduce paperwork burdens, and as required by the Paperwork Reduction Act (PRA) of 1995, the Federal Communications Commission (FCC or the Commission) invites the general public and other Federal agencies to take this opportunity to comment on the following information collection. Comments are requested concerning: whether the proposed collection of information is necessary for the proper performance of the functions of the Commission, including whether the information shall have practical utility; the accuracy of the Commission's burden estimate; ways to enhance the quality, utility, and clarity of the information collected; ways to minimize the burden of the collection of information on the respondents, including the use of automated collection techniques or other forms of information technology; and ways to further reduce the information collection burden on small business

concerns with fewer than 25 employees. The FCC may not conduct or sponsor a collection of information unless it displays a currently valid control number. No person shall be subject to any penalty for failing to comply with a collection of information subject to the PRA that does not display a valid Office of Management and Budget (OMB) control number.

DATES: Written PRA comments should be submitted on or before August 28, 2023. If you anticipate that you will be submitting comments, but find it difficult to do so within the period of time allowed by this notice, you should advise the contact listed below as soon as possible.

ADDRESSES: Direct all PRA comments to Nicole Ongele, FCC, via email *PRA@fcc.gov* and to *nicole.ongele@fcc.gov*.

FOR FURTHER INFORMATION CONTACT: For additional information about the information collection, contact Nicole Ongele, (202) 418–2991.

SUPPLEMENTARY INFORMATION:

OMB Control Number: 3060–1285.

Title: Compliance with the Non-IP Call Authentication Solution Rules; Robocall Mitigation Database (RMD).

Form Number: N/A.

Type of Review: Revision of a currently approved information collection.

Respondents: Business or other for-profit entities.

Number of Respondents and Responses: 12,800 respondents; 12,800 responses.

Estimated Time per Response: 0.5–6 hours.

Frequency of Response: Recordkeeping requirement and on occasion reporting requirement.

Obligation to Respond: Mandatory and required to obtain or retain benefits. Statutory authority for these collections are contained in sections 227b, 251(e), and 227(e) of the Communications Act of 1934.

Total Annual Burden: 39,663 hours.

Total Annual Cost: No cost.

Needs and Uses: The Pallone-Thune Telephone Robocall Abuse Criminal Enforcement and Deterrence (TRACED) Act directs the Commission to require, no later than 18 months from enactment, all voice service providers to implement STIR/SHAKEN caller ID authentication technology in the internet protocol (IP) portions of their networks and implement an effective caller ID authentication framework in the non-IP portions of their networks. Among other provisions, the TRACED Act also directs the Commission to create extension mechanisms for voice service providers. On September 29, 2020, the Commission adopted its *Call Authentication Trust Anchor Second Report and Order. See Call Authentication Trust Anchor,* WC Docket No. 17–97, Second Report and Order, 36 FCC Rcd 1859 (adopted Sept. 29, 2020). The *Second Report and Order* implemented section 4(b)(1)(B) of the TRACED Act, in part, by requiring a voice service provider maintain and be ready to provide the Commission upon request with documented proof that it is participating, either on its own or through a representative, including third party representatives, as a member of a working group, industry standards group, or consortium that is working to develop a non-internet Protocol caller identification authentication solution, or actively testing such a solution. The *Second Report and Order* also implemented the extension mechanisms in section 4(b)(5) by, in part, requiring voice service providers to certify in the Robocall Mitigation Database that they have either implemented STIR/SHAKEN or a adopted a robocall mitigation program and describe that program in a filed plan. On May 19, 2022, the Commission adopted similar obligations for gateway providers. *See Advanced Methods to Target and Eliminate Unlawful Robocalls, Call Authentication Trust Anchor,* CG Docket No. 17–59, WC Docket No. 17–97, Sixth Report and Order *et al.,* FCC 22–27 (adopted May 19, 2022). Specifically, like voice service providers, gateway providers were required to maintain and be ready to provide the Commission upon request with documented proof that it is participating, either on its own or through a representative, including third party representatives, as a member of a working group, industry standards group, or consortium that is working to develop a non-internet Protocol caller identification authentication solution, or actively testing such a solution.

Gateway providers were also required to implement both STIR/SHAKEN on the IP portions of their networks as well as a robocall mitigation program. They must also certify to their implementation and describe their robocall mitigation program in the Robocall Mitigation Database. On March 16, 2023, the Commission adopted an Order imposing largely the same obligations that applied to gateway providers on a new class of providers: non-gateway intermediate providers. *See Call Authentication Trust Anchor,* Sixth Report and Order and Further Notice of Proposed Rulemaking, WC Docket No. 17–97, FCC 23–18 (adopted March 16, 2023). In that action, the Commission also required all voice service providers to adopt a robocall mitigation program and file a description of that program in the Robocall Mitigation Database as well as requiring all classes of providers to file additional information in the Robocall Mitigation Database. On May 18, 2023, the Commission adopted an Order modifying some of these requirements. *See Call Authentication Trist Anchor, et al.,* WC Docket No. 17–97 et al., Seventh Report and Order et al., FCC 23–37 (adopted May 18, 2023).

Federal Communications Commission.

Marlene Dortch,

Secretary, Office of the Secretary.

BILLING CODE 6712–01–P

FEDERAL COMMUNICATIONS COMMISSION

[OMB 3060–0917; OMB 3060–1270; FR ID 150641]

Information Collections Being Submitted for Review and Approval to Office of Management and Budget

AGENCY: Federal Communications Commission.

ACTION: Notice and request for comments.

SUMMARY: As part of its continuing effort to reduce paperwork burdens, as required by the Paperwork Reduction Act (PRA) of 1995, the Federal Communications Commission (FCC or the Commission) invites the general public and other Federal Agencies to take this opportunity to comment on the following information collection. Pursuant to the Small Business Paperwork Relief Act of 2002, the FCC seeks specific comment on how it might ''further reduce the information collection burden for small business concerns with fewer than 25 employees.'' The Commission may not conduct or sponsor a collection of information unless it displays a currently valid Office of Management and Budget (OMB) control number. No person shall be subject to any penalty for failing to comply with a collection of information subject to the PRA that does not display a valid OMB control number.

DATES: Written comments and recommendations for the proposed information collection should be submitted on or before July 31, 2023.

ADDRESSES: Comments should be sent to *www.reginfo.gov/public/do/PRAMain.* Find this particular information collection by selecting ''Currently under

30-day Review—Open for Public Comments'' or by using the search function. Your comment must be submitted into *www.reginfo.gov* per the above instructions for it to be considered. In addition to submitting in *www.reginfo.gov* also send a copy of your comment on the proposed information collection to Nicole Ongele, FCC, via email to *PRA@fcc.gov* and to *Nicole.Ongele@fcc.gov.* Include in the comments the OMB control number as shown in the **SUPPLEMENTARY INFORMATION** below.

FOR FURTHER INFORMATION CONTACT: For additional information or copies of the information collection, contact Nicole Ongele at (202) 418–2991. To view a copy of this information collection request (ICR) submitted to OMB: (1) go to the web page *http://www.reginfo.gov/public/do/PRAMain,* (2) look for the section of the web page called ''Currently Under Review,'' (3) click on the downward-pointing arrow in the ''Select Agency'' box below the ''Currently Under Review'' heading, (4) select ''Federal Communications Commission'' from the list of agencies presented in the ''Select Agency'' box, (5) click the ''Submit'' button to the right of the ''Select Agency'' box, (6) when the list of FCC ICRs currently under review appears, look for the Title of this ICR and then click on the ICR Reference Number. A copy of the FCC submission to OMB will be displayed.

SUPPLEMENTARY INFORMATION: As part of its continuing effort to reduce paperwork burdens, as required by the Paperwork Reduction Act (PRA) of 1995 (44 U.S.C. 3501–3520), the FCC invited the general public and other Federal Agencies to take this opportunity to comment on the following information collection. Comments are requested concerning: (a) Whether the proposed collection of information is necessary for the proper performance of the functions of the Commission, including whether the information shall have practical utility; (b) the accuracy of the Commission's burden estimates; (c) ways to enhance the quality, utility, and clarity of the information collected; and (d) ways to minimize the burden of the collection of information on the respondents, including the use of automated collection techniques or other forms of information technology. Pursuant to the Small Business Paperwork Relief Act of 2002, Public Law 107–198, see 44 U.S.C. 3506(c)(4), the FCC seeks specific comment on how it might ''further reduce the information collection burden for small business concerns with fewer than 25 employees.''

OMB Control Number: 3060–0917.

Title: CORES Registration Form, FCC Form 160.

Form Number: FCC Form 160.

Type of Review: Extension of a currently approved collection.

Respondents: Businesses or other for-profit entities; individuals or households; not-for-profit institutions; and State, local, or Tribal governments.

Number of Respondents and Responses: 145,726 respondents; 145,726 responses.

Estimated Time per Response: 10 minutes (0.167 hours).

Frequency of Response: One-time reporting requirement.

Obligation to Respond: Required to obtain or retain benefits. Statutory authority for this information collection is contained in the Debt Collection Act of 1996 (DCCA), Public Law 104–134, chapter 10, section 31001.

Total Annual Burden: 24,336 hours.

Total Annual Costs: No cost.

Needs and Uses: Respondents use FCC Form 160 to register in FCC's Commission Registration System (CORES). Entities must register in CORES to do regulatory transactions with FCC, including receiving licenses, paying fees, participating in auctions, etc. Without this collection of information, FCC would not have a database of the identity and contact information of the entities it does regulatory business with.

OMB Control Number: 3060–1270.

Title: Protecting National Security Through FCC Programs.

Form Number: FCC Form 5640.

Type of Review: Revision of a currently-approved collection.

Respondents: Business or other for profit entities.

Number of Respondents and Responses: 3,500 respondents; 6,584 responses.

Estimated Time per Response: 0.5–12 hours.

Frequency of Response: Annual, semiannual, and recordkeeping requirements.

Obligation to Respond: Mandatory and required to obtain or retain benefits. Statutory authority for this information collection is contained in 47 U.S.C. 1603–1604.

Total Annual Burden: 20,236 hours.

Total Annual Cost: $472,500.

Needs and Uses: The Communications Act of 1934, as amended, requires the ''preservation and advancement of universal service.'' 47 U.S.C. 254(b). The information collection requirements reported under this collection are the result of the Commission's actions to promote the Act's universal service goals.

On November 22, 2019, the Commission adopted the *Protecting Against National Security Threats to the Communications Supply Chain Through FCC Programs,* WC Docket No. 18–89, Report and Order, Order, and Further Notice of Proposed Rulemaking, 34 FCC Rcd 11423 (2019) (*Report and Order*). The *Report and Order* prohibits future use of Universal Service Fund (USF) monies to purchase, maintain, improve, modify, obtain, or otherwise support any equipment or services produced or provided by a company that poses a national security threat to the integrity of communications networks or the communications supply chain.

On March 12, 2020, the President signed into law the Secure and Trusted Communications Networks Act of 2019 (Secure Networks Act), Public Law 116–124, 133 Stat. 158 (2020) (codified as amended at 47 U.S.C. 1601–1609), which, among other measures, directs the FCC to establish the Secure and Trusted Communications Networks Reimbursement Program (Reimbursement Program). This program is intended to provide funding to providers of advanced communications service for the removal, replacement and disposal of certain communications equipment and services that poses an unacceptable national security risk (*i.e.,* covered equipment and services) from their networks. The Commission has designated two entities—Huawei Technologies Company (Huawei) and ZTE Corporation (ZTE), along with their affiliates, subsidiaries, and parents—as covered companies posing such a national security threat. *See Protecting Against National Security Threats to the Communications Supply Chain Through FCC Programs—Huawei Designation,* PS Docket No. 19–351, Memorandum Opinion and Order, 35 FCC Rcd 14435 (2020); *Protecting Against National Security Threats to the Communications Supply Chain Through FCC Programs—ZTE Designation,* PS Docket No. 19–352, Memorandum Opinion and Order, DA 20–1399 (PSHSB rel. Nov. 24, 2020).

On December 10, 2020, the Commission adopted the Second Report and Order implementing the Secure Networks Act, which contained new information collection requirements. *See Protecting Against National Security Threats to the Communications Supply Chain Through FCC Programs,* WC Docket No. 18–89, Second Report and Order, 35 FCC Rcd 14284 (2020) (*Second Report and Order*). These requirements allow the Commission to receive, review and make eligibility determinations and funding decisions on applications to participate in the

Reimbursement Program that are filed by certain providers of advanced communications service. These information collection requirements also assist the Commission in processing funding disbursement requests and in monitoring and furthering compliance with applicable program requirements to protect against waste, fraud, and abuse. Participation in the Reimbursement Program is voluntary, but compliance with the information collection requirements is required to obtain Reimbursement Program support.

On August 3, 2021, the Wireline Competition Bureau (Bureau) released a Public Notice adopting procedures for filing and processing applications submitted for the Reimbursement Program. These procedures largely tracked the procedural rules previously adopted by the Commission in the *Second Report and Order,* but also adopted a new requirement that Reimbursement Program participants notify the Commission of changes in ownership, to ensure accurate information is on file for participants and to help protect the Reimbursement Program against waste, fraud, and abuse.

This submission proposes to revise this currently-approved collection by deleting an existing question on FCC Form 5640 and replacing it with a more detailed query. The new question will ask program participants to describe in detail how they have spent Reimbursement Program funds. The addition of this question will allow the Bureau to satisfy its statutory obligations to collect information about how Reimbursement Program funds have been spent, including detailed accounting of the covered communications equipment and services permanently removed and disposed of, and the replacement equipment or services purchased, rented, leased, or otherwise obtained using Reimbursement Program funds, as well as to combat waste, fraud, and abuse, as required under the Secure Networks Act. The Bureau determined that FCC Form 5640 required this revision in order to elicit the information necessary for the Bureau to better satisfy its statutory obligations.

This proposed addition will increase the information collected, and will impose an additional burden on respondents, which will vary with the number of invoices respondents submit during the relevant reporting period. However, this submission also reflects a decrease in the estimated total annual responses, total annual burden hours, and total annual costs for this collection. These adjustments are due to a reduction of the number of respondents for several categories of information to be collected on Form 5640, based on the Bureau's experience with the Reimbursement Program since this collection was first approved.

Federal Communications Commission.

Information Collection Being Reviewed by the Federal Communications Commission

AGENCY: Federal Communications Commission.

ACTION: Notice and request for comments.

SUMMARY: As part of its continuing effort to reduce paperwork burdens, and as required by the Paperwork Reduction Act of 1995 (PRA), the Federal Communications Commission (FCC or Commission) invites the general public and other Federal agencies to take this opportunity to comment on the following information collections. Comments are requested concerning: whether the proposed collection of information is necessary for the proper performance of the functions of the Commission, including whether the information shall have practical utility; the accuracy of the Commission's burden estimate; ways to enhance the quality, utility, and clarity of the information collected; ways to minimize the burden of the collection of information on the respondents, including the use of automated collection techniques or other forms of information technology; and ways to further reduce the information collection burden on small business concerns with fewer than 25 employees. The FCC may not conduct or sponsor a collection of information unless it displays a currently valid Office of Management and Budget (OMB) control number. No person shall be subject to any penalty for failing to comply with a collection of information subject to the PRA that does not display a valid OMB control number.

DATES: Written PRA comments should be submitted on or before August 28, 2023. If you anticipate that you will be submitting comments but find it difficult to do so within the period of time allowed by this notice, you should advise the contact listed below as soon as possible.

ADDRESSES: Direct all PRA comments to Cathy Williams, FCC, via email to *PRA@fcc.gov* and to *Cathy.Williams@fcc.gov.*

FOR FURTHER INFORMATION CONTACT: For additional information about the information collection, contact Cathy Williams at (202) 418–2918.

SUPPLEMENTARY INFORMATION:

OMB Control Number: 3060–1167.

Title: Accessible Telecommunications and Advanced Communications Services and Equipment.

Form Number: N/A.

Type of Review: Extension of a currently approved collection.

Respondents: Individuals or households; businesses or other for-profit entities; not-for-profit institutions.

Number of Respondents and Responses: 3,541 respondents; 42,106 responses.

Estimated Time per Response: .50 hours (30 minutes) to 40 hours.

Frequency of Response: Annual, one-time, and on occasion reporting requirements; recordkeeping requirement; third-party disclosure requirement.

Obligation to Respond: Required to obtain or retain benefits. Statutory authority for this information collection is contained in sections 1–4, 255, 303(r), 403, 503, 716, 717, and 718 of the Communications Act, as amended, 47 U.S.C. 151–154, 255, 303(r), 403, 503, 617, 618, and 619.

Total Annual Burden: 120,999 hours.

Total Annual Cost: $17,800.

Needs and Uses: In 2011, in document FCC 11–151, published at 76 FR 82354, December 30, 2011, the FCC adopted rules to implement sections 716 and 717 of the Communications Act of 1934 (the Act), as amended, which were added to the Act by the Twenty-First Century Communications and Video Accessibility Act of 2010 (CVAA). *See* Public Law 111–260, 104. Section 716 of the Act requires providers of advanced communications services and manufacturers of equipment used for advanced communications services to make their services and equipment accessible to individuals with disabilities, unless doing so is not achievable. 47 U.S.C. 617. Section 717 of the Act established new recordkeeping requirements and enforcement procedures for service providers and equipment manufacturers that are subject to sections 255, 716, and 718 of the Act. 47 U.S.C. 618. Section 255 of the Act requires telecommunications and interconnected VoIP services and equipment to be accessible to individuals with

disabilities, if readily achievable. 47 U.S.C. 255. Section 718 of the Act requires internet browsers built into mobile phones to be accessible to and usable by individuals who are blind or have a visual impairment, unless doing so is not achievable. 47 U.S.C. 619.

In document FCC 11–151, the Commission adopted rules relating to the following:

(a) Service providers and equipment manufacturers that are subject to sections 255, 716, and 718 of the Act must ensure that the information and documentation that they provide is accessible to individuals with disabilities.

(b) Service providers and equipment manufacturers may seek waivers from the accessibility obligations of section 716 of the Act for services or equipment that are designed for multiple purposes, including advanced communications services, but are designed primarily for purposes other than using advanced communications services.

(c) Service providers and equipment manufacturers that are subject to sections 255, 716, and 718 of the Act must maintain records of their efforts to implement those sections.

(d) Service providers and equipment manufacturers that are subject to sections 255, 716, and 718 of the Act must certify annually to the Commission that records are kept in accordance with the recordkeeping requirements. The certification must include contact details of the person(s) authorized to resolve accessibility complaints and the agent designated for service of process.

(e) The Commission established procedures to facilitate the filing of formal and informal complaints alleging violations of sections 255, 716, or 718 of the Act. Those procedures include a nondiscretionary pre-filing notice procedure to facilitate dispute resolution, that is, as a prerequisite to filing an informal complaint, complainants must first request dispute assistance from the Consumer and Governmental Affairs Bureau's Disability Rights Office.

In 2013, in document FCC 13–57, published at 78 FR 30226, May 22, 2013, the FCC adopted rules to implement section 718 of the Act.

Federal Communications Commission.

Marlene Dortch,

Secretary, Office of the Secretary.

BILLING CODE 6712–01–P

DEPARTMENT OF HEALTH AND HUMAN SERVICES

Centers for Disease Control and Prevention

[30Day–23–1180]

Agency Forms Undergoing Paperwork Reduction Act Review

In accordance with the Paperwork Reduction Act of 1995, the Centers for Disease Control and Prevention (CDC) has submitted the information collection request titled ''Airline and Vessel Traveler Information Collection'' to the Office of Management and Budget (OMB) for review and approval. CDC previously published a ''Proposed Data Collection Submitted for Public Comment and Recommendations'' notice on April 27, 2023, to obtain comments from the public and affected agencies. CDC did not receive comments related to the previous notice. This notice serves to allow an additional 30 days for public and affected agency comments.

CDC will accept all comments for this proposed information collection project. The Office of Management and Budget is particularly interested in comments that:

(a) Evaluate whether the proposed collection of information is necessary for the proper performance of the functions of the agency, including whether the information will have practical utility;

(b) Evaluate the accuracy of the agency's estimate of the burden of the proposed collection of information, including the validity of the methodology and assumptions used;

(c) Enhance the quality, utility, and clarity of the information to be collected;

(d) Minimize the burden of the collection of information on those who are to respond, including, through the use of appropriate automated, electronic, mechanical, or other technological collection techniques or other forms of information technology, *e.g.,* permitting electronic submission of responses; and

(e) Assess information collection costs.

To request additional information on the proposed project or to obtain a copy of the information collection plan and instruments, call (404) 639–7570. Comments and recommendations for the proposed information collection should be sent within 30 days of publication of this notice to *www.reginfo.gov/public/do/PRAMain.* Find this particular information collection by selecting ''Currently under 30-day Review—Open for Public Comments'' or by using the search function. Direct written comments and/or suggestions regarding the items contained in this notice to the Attention: CDC Desk Officer, Office of Management and Budget, 725 17th Street NW, Washington, DC 20503 or by fax to (202) 395–5806. Provide written comments within 30 days of notice publication.

Proposed Project

Airline and Vessel Traveler Information Collection (OMB Control No. 0920–1180, Exp. 6/30/2023)—Revision—National Center for Emerging and Zoonotic Infectious Diseases (NCEZID), Centers for Disease Control and Prevention (CDC).

Background and Brief Description

The rapid speed and tremendous volume of international travel, commerce, and human migration enable infectious disease threats to disperse worldwide in 24 hours—less time than the incubation period of most communicable diseases. These and other forces intrinsic to modern technology and ways of life favor the emergence of new communicable diseases and the reemergence or increased severity of known communicable diseases.

Stopping a communicable disease outbreak—whether it is naturally occurring or intentionally caused—requires the use of the most rapid and effective public health tools available. Basic public health practices, such as collaborating with airlines in the identification and notification of potentially exposed travelers, are critical tools in the fight against the introduction, transmission, and spread of communicable disease in the United States. The collection of timely, accurate, and complete conveyance and traveler information enables CDC to notify state and local health departments, in order for them to make contact with individuals who may have been exposed to a communicable disease during travel, or due to an outbreak of disease in a geographic location and identify appropriate next steps.

Section 361 of the Public Health Service Act (42 U.S.C. 264) authorizes the Secretary of the Department of Health and Human Services to make and enforce regulations necessary to prevent the introduction, transmission, or spread of communicable diseases from foreign countries into the United States, or from one State or possession into any other State or possession. Regulations that implement federal quarantine authority are currently

promulgated in 42 CFR parts 70 and 71. Part 71 contains regulations to prevent the introduction, transmission, and spread of communicable diseases into the states and possessions of the United States.

Passenger and crewmember manifests are used to collect travelers' information from airlines and vessels after travel has been completed and when a disease is confirmed or there is a suspected exposure. Manifests include locating and contact information, as well as information concerning where passengers sat while aboard an airline or their location (*e.g.,* cabin numbers) and activities aboard a vessel. Manifests collect the following data elements:

- Full name (last, first, and, if available, middle or others);
- Date of birth;
- Sex;
- Country of residence;
- If a passport is required; passport number, passport country of issuance, and passport expiration date;
- If a travel document, other than a passport is required, travel document type, travel document number, travel document country of issuance and travel document expiration date;
- Address while in the United States (number and street, city, state, and zip code), except that U.S. citizens and lawful permanent residents will provide address of permanent residence in the U.S. (number and street, city, state, and zip code; as applicable);
- Primary contact phone number to include country code;
- Secondary contact phone number to include country code;
- Email address;
- Airline name;
- Flight number;
- City of departure;
- Departure date and time;
- City of arrival;
- Arrival date and time; and
- Seat number for all passengers.
- CDC also requests seat configuration for the requested contact area (example: AB/aisle/CDE/aisle/FG, bulkhead in front of row 9), identification on the manifest of the crew and what zone crew were assigned to, the identification of any babes-in-arms, and finally CDC requests the total number of passengers on board if measles is the cause of the investigation, due to the highly infectious nature of the disease.

CDC then uses this passenger and crew manifest information to coordinate with state and local health departments or International Health Regulation (IHR) National Focal Points (NFPs) so they can follow-up with residents who live or are currently located in their jurisdiction. In most cases, the manifests are issued for air travel and state and local health departments or IHR NFPs are responsible for the contact investigations; airlines and vessels may take responsibility for follow-up of crew members. In rare cases, CDC may use the manifest data to perform the contact investigation directly.

CDC requests OMB approval for an estimated 875 annual burden hours. There is no cost to respondents other than their time to participate.

ESTIMATED ANNUALIZED BURDEN HOURS

Type of respondents	Form name	Number of respondents	Number of responses per respondent	Average burden per response (in hours)
Airline Medical Officer or Equivalent/ Analysist/Travel Specialist/Manager Equivalent.	International Manifest Template/Informal Manifest Request Template.	350	1	150/60

Jeffrey M. Zirger,

Lead, Information Collection Review Office, Office of Public Health Ethics and Regulations, Office of Science, Centers for Disease Control and Prevention.

BILLING CODE 4163–18–P

DEPARTMENT OF HEALTH AND HUMAN SERVICES

Centers for Medicare & Medicaid Services

[Document Identifier: CMS–R–266]

Agency Information Collection Activities: Proposed Collection; Comment Request

AGENCY: Centers for Medicare & Medicaid Services, Health and Human Services (HHS).

ACTION: Notice.

SUMMARY: The Centers for Medicare & Medicaid Services (CMS) is announcing an opportunity for the public to comment on CMS' intention to collect information from the public. Under the Paperwork Reduction Act of 1995 (the PRA), Federal agencies are required to publish notice in the **Federal Register** concerning each proposed collection of information (including each proposed extension or reinstatement of an existing collection of information) and to allow 60 days for public comment on the proposed action. Interested persons are invited to send comments regarding our burden estimates or any other aspect of this collection of information, including the necessity and utility of the proposed information collection for the proper performance of the agency's functions, the accuracy of the estimated burden, ways to enhance the quality, utility, and clarity of the information to be collected, and the use of automated collection techniques or other forms of information technology to minimize the information collection burden.

DATES: Comments must be received by August 28, 2023.

ADDRESSES: When commenting, please reference the document identifier or OMB control number. To be assured consideration, comments and recommendations must be submitted in any one of the following ways:

1. *Electronically.* You may send your comments electronically to *http://www.regulations.gov.* Follow the instructions for ''Comment or Submission'' or ''More Search Options'' to find the information collection document(s) that are accepting comments.

2. *By regular mail.* You may mail written comments to the following address: Office of Strategic Operations and Regulatory Affairs, Division of Regulations Development, Attention: Document Identifier/OMB Control Number:_____, Room C4–26–05, 7500 Security Boulevard, Baltimore, Maryland 21244–1850.

To obtain copies of a supporting statement and any related forms for the proposed collection(s) summarized in this notice, please access the CMS PRA website by copying and pasting the following web address into your web browser: *https://www.cms.gov/Regulations-and-Guidance/Legislation/PaperworkReductionActof1995/PRA-Listing.*

FOR FURTHER INFORMATION CONTACT: William N. Parham at (410) 786–4669.

SUPPLEMENTARY INFORMATION:

Contents

This notice sets out a summary of the use and burden associated with the following information collections. More detailed information can be found in each collection's supporting statement and associated materials (see **ADDRESSES**).

CMS–R–266 Medicaid Disproportionate Share Hospital (DSH) Annual Reporting Requirements

Under the PRA (44 U.S.C. 3501–3520), Federal agencies must obtain approval from the Office of Management and Budget (OMB) for each collection of information they conduct or sponsor. The term ''collection of information'' is defined in 44 U.S.C. 3502(3) and 5 CFR 1320.3(c) and includes agency requests or requirements that members of the public submit reports, keep records, or provide information to a third party. Section 3506(c)(2)(A) of the PRA requires Federal agencies to publish a 60-day notice in the **Federal Register** concerning each proposed collection of information, including each proposed extension or reinstatement of an existing collection of information, before submitting the collection to OMB for approval. To comply with this requirement, CMS is publishing this notice.

Information Collection

1. *Type of Information Collection Request:* Extension of a currently approved collection; *Title of Information Collection:* Medicaid Disproportionate Share Hospital (DSH) Annual Reporting Requirements; *Use:* States are required to submit an annual report that identifies each disproportionate share hospital (DSH) that received a DSH payment under the state's Medicaid program in the preceding fiscal year and the amount of DSH payments paid to that hospital in the same year along with other information that the Secretary determines necessary to ensure the appropriateness of DSH payments; *Form Number:* CMS–R–266 (OMB control number: 0938–0746); *Frequency:* Yearly; *Affected Public:* State, Local, or Tribal Governments; *Number of Respondents:* 51; *Total Annual Responses:* 51; *Total Annual Hours:* 2,142. (For policy questions regarding this collection contact Rich Cuno at 410–786–1111.)

Dated: June 26, 2023.

William N. Parham, III,

Director, Paperwork Reduction Staff, Office of Strategic Operations and Regulatory Affairs.

[FR Doc. 2023–13877 Filed 6–28–23; 8:45 am]

BILLING CODE 4120–01–P

DEPARTMENT OF HEALTH AND HUMAN SERVICES

Administration for Children and Families

Proposed Information Collection Activity; Voluntary Acknowledgment of Paternity and Required Data Elements for Paternity Establishment Affidavits

AGENCY: Office of Child Support Services, Administration for Children and Families, United States Department of Health and Human Services.

ACTION: Request for public comments.

SUMMARY: The Office of Child Support Services (OCSS), Administration for Children and Families (ACF), United States Department of Health and Human Services, is requesting a three-year extension of the Voluntary Acknowledgment of Paternity and Required Data Elements for Paternity Establishment Affidavits (OMB #0970–0171, expiration 1/31/2024). No changes are proposed.

DATES: *Comments due within 60 days of publication.* In compliance with the requirements of the Paperwork Reduction Act of 1995, ACF is soliciting public comment on the specific aspects of the information collection described above.

ADDRESSES: You can obtain copies of the proposed collection of information and submit comments by emailing *infocollection@acf.hhs.gov.* Identify all requests by the title of the information collection.

SUPPLEMENTARY INFORMATION:

Description: Section 466(a)(5)(C) of the Social Security Act requires States to enact laws ensuring a simple civil process for voluntarily acknowledging paternity via an affidavit. The development and use of an affidavit for the voluntary acknowledgment of paternity would include the minimum requirements of the affidavit specified by the Secretary under section 452(a)(7) of the Social Security Act and give full faith and credit to such an affidavit signed in any other State according to its procedures. The State must provide that, before a mother and putative father can sign a voluntary acknowledgment of paternity, the mother and putative father must be given notice, orally, or through the use of video equipment, and in writing, of the alternatives to, the legal consequences of, and the rights (including any rights, if one parent is a minor, due to minority status) and responsibilities of acknowledging paternity. The affidavits will be used by hospitals, birth record agencies, and other entities participating in the voluntary paternity establishment program to collect information from the parents of nonmarital children.

Respondents: The parents of nonmarital children, State and Tribal agencies operating child support programs under Title IV–D of the Social Security Act, hospitals, birth record agencies, and other entities participating in the voluntary paternity establishment program.

ANNUAL BURDEN ESTIMATES

Instrument	Total number of respondents	Annual number of responses per respondent	Average burden hours per response	Annual burden hours
Training	130,240	1	1	130,240
Paternity Acknowledgment Process	1,618,412	1	0.17	275,130
Data Elements	54	1	1	54
Ordering Brochures	2,604,802	1	.08	208,384

Estimated Total Annual Burden Hours: 613,808.

Comments: The Department specifically requests comments on (a) whether the proposed collection of information is necessary for the proper performance of the functions of the agency, including whether the

information shall have practical utility; (b) the accuracy of the agency's estimate of the burden of the proposed collection of information; (c) the quality, utility, and clarity of the information to be collected; and (d) ways to minimize the burden of the collection of information on respondents, including through the use of automated collection techniques or other forms of information technology. Consideration will be given to comments and suggestions submitted within 60 days of this publication.

Authority: 42 U.S.C. 666(a)(5)(C) and 652(a)(7).

Mary B. Jones,

ACF/OPRE Certifying Officer.

[FR Doc. 2023–13855 Filed 6–28–23; 8:45 am]

BILLING CODE 4184–41–P

DEPARTMENT OF HEALTH AND HUMAN SERVICES

Administration for Children and Families

Tribal Consultation Meetings

AGENCY: Office of Head Start (OHS), Administration for Children and Families (ACF), U.S. Department of Health and Human Services (HHS).

ACTION: Notice of meetings.

SUMMARY: Pursuant to the Head Start Act, notice is hereby given of two tribal consultation sessions to be held between HHS/ACF OHS leadership and the leadership of tribal governments operating Head Start and Early Head Start programs. The purpose of these consultation sessions is to discuss ways to better meet the needs of American Indian and Alaska Native (AI/AN) children and their families, taking into consideration funding allocations, distribution formulas, and other issues affecting the delivery of Head Start services in their geographic locations. Two tribal consultations will be held as part of HHS/ACF or ACF Tribal Consultation Sessions.

DATES:

Wednesday, September 13, 2023
Tuesday, December 5, 2023

ADDRESSES:

- September 13, 2023—1–4 p.m. ET (Virtual)
- December 5, 2023—2–5 p.m. PT (Hilton Costa Mesa, 3050 Bristol Street, Costa Mesa, CA 92626)

FOR FURTHER INFORMATION CONTACT: Todd Lertjuntharangool, Regional Program Manager, Region XI/AIAN, Office of Head Start, email *Todd.Lertjuntharangool@acf.hhs.gov,* or phone (866) 763–6481. Additional information and online meeting registration will be forthcoming.

SUPPLEMENTARY INFORMATION: In accordance with section 640(l)(4) of the Head Start Act, 42 U.S.C. 9835(1)(4), ACF announces OHS Tribal Consultation Sessions for leaders of tribal governments operating Head Start and Early Head Start programs.

The agenda for the scheduled OHS Tribal Consultations reflects the statutory purposes of Head Start tribal consultations related to meeting the needs of AI/AN children and families. OHS will also highlight the progress made in addressing issues and concerns raised in the previous OHS Tribal Consultations.

The consultation sessions include elected or appointed leaders of Tribal governments and their designated representatives. Designees must have a letter from the Tribal government authorizing them to represent the Tribe. Tribal governments must submit the designee letter at least 3 days before the consultation sessions to Todd Lertjuntharangool at *Todd.Lertjuntharangool@acf.hhs.gov*. Other representatives of tribal organizations and Native nonprofit organizations are welcome to attend as observers.

Within 45 days of the consultation sessions, a detailed report of each consultation session will be available for all tribal governments receiving funds for Head Start and Early Head Start programs. Tribes can submit written testimony for the report to Todd Lertjuntharangool at *Todd.Lertjuntharangool@acf.hhs.gov* prior to each consultation session or within 30 days of each meeting. OHS will summarize oral testimony and comments from the consultation sessions in each report without attribution, along with topics of concern and recommendations.

Megan E. Steel,

ACF Certifying Officer.

BILLING CODE 4184–40–P

DEPARTMENT OF HEALTH AND HUMAN SERVICES

Food and Drug Administration

[Docket No. FDA–2019–N–3657]

Agency Information Collection Activities; Submission for Office of Management and Budget Review; Comment Request; Accreditation Scheme for Conformity Assessment Program

AGENCY: Food and Drug Administration, HHS.

ACTION: Notice.

SUMMARY: The Food and Drug Administration (FDA) is announcing that a proposed collection of information has been submitted to the Office of Management and Budget (OMB) for review and clearance under the Paperwork Reduction Act of 1995.

DATES: Submit written comments (including recommendations) on the collection of information by July 31, 2023.

ADDRESSES: To ensure that comments on the information collection are received, OMB recommends that written comments be submitted to *https://www.reginfo.gov/public/do/PRAMain.* Find this particular information collection by selecting ''Currently under Review—Open for Public Comments'' or by using the search function. The OMB control number for this information collection is 0910–0889. Also include the FDA docket number found in brackets in the heading of this document.

FOR FURTHER INFORMATION CONTACT: Domini Bean, Office of Operations, Food and Drug Administration, Three White Flint North, 10A–12M, 11601 Landsdown St., North Bethesda, MD 20852, 301–796–5733, *PRAStaff@fda.hhs.gov.*

SUPPLEMENTARY INFORMATION: In compliance with 44 U.S.C. 3507, FDA has submitted the following proposed collection of information to OMB for review and clearance.

Accreditation Scheme for Conformity Assessment Program

OMB Control Number 0910–0889—Revision

Section 514 of the Federal Food, Drug, and Cosmetic Act (FD&C Act) (21 U.S.C. 360d) provides for the establishment of performance standards, authorizing the Accreditation Scheme for Conformity Assessment Program (ASCA Program) under section 514(d). On September 25, 2020 (85 FR 60471), we announced the

implementation of a pilot program under which testing laboratories may be accredited by ASCA-recognized accreditation bodies meeting criteria specified by FDA to assess the conformance of a device to certain FDA-recognized standards. These testing laboratories then receive ASCA Accreditation from FDA. Determinations by ASCA-accredited testing laboratories that a device conforms with an eligible standard included as part of the program are accepted by FDA for the purposes of demonstrating conformity unless FDA finds that a particular such determination shall not be so accepted.[1] The statute provides that FDA may review determinations by accredited testing laboratories, including by conducting periodic audits of such determinations or processes of accreditation bodies or testing laboratories.[2]

Following such a review, or if FDA becomes aware of information materially bearing on safety or effectiveness of a device tested by an ASCA-accredited testing laboratory, FDA may take additional measures as determined appropriate, including suspension or withdrawal of ASCA Accreditation of a testing laboratory, withdrawal of ASCA Recognition of an accreditation body, or a request for additional information regarding a specific device.[3] The establishment of the goals, scope, procedures, and a suitable framework for the voluntary ASCA Program supports the Agency's continued efforts to use its scientific resources effectively and efficiently to protect and promote public health. FDA believes the voluntary ASCA Program may further encourage international harmonization of medical device regulation because it incorporates elements, where appropriate, from a well-established set of international conformity assessment practices and standards (*e.g.,* ISO/IEC 17000 series). The voluntary ASCA Program does not supplant or alter any other existing statutory or regulatory requirements governing the decision-making process for premarket submissions.

We are revising the information collection to reflect recent legislative changes. In accordance with amendments made to section 514 by the FDA Reauthorization Act of 2022 (FDARA),[4] and as part of the enactment of the Medical Device User Fee Amendments of 2022 (MDUFA V),[5] the ''pilot'' language and sunset clause was removed from the section, allowing FDA to conclude the pilot and continue to operate the program consistent with the amended section 514(d) of the FD&C Act. In accordance with these updates and as included in the Center for Devices and Radiological Health Proposed Guidances for Fiscal Year 2023,[6] we intend to update the applicable guidance documents.

Finally, to assist testing laboratories and accreditation bodies in submitting information to FDA, we are developing webforms for applying for ASCA Accreditation and ASCA Recognition, respectively.

Under the ASCA Program's conformity assessment scheme, ASCA-recognized accreditation bodies accredit testing laboratories using ISO/IEC 17025:2017: ''General requirements for the competence of testing and calibration laboratories'' and the ASCA program specifications associated with each eligible standard and test method included in the ASCA Program. ASCA-accredited testing laboratories may conduct testing to determine conformance of a device with at least one of the standards eligible for inclusion in the ASCA Program. When an ASCA-accredited testing laboratory conducts such testing, it provides a complete test report and an ASCA Summary Test Report to the device manufacturer. A device manufacturer who utilizes an ASCA-accredited testing laboratory to perform testing in accordance with the provisions of the ASCA Program can then include a declaration of conformity with supplemental documentation (including an ASCA Summary Test Report) as part of a premarket submission to FDA. Testing performed by an ASCA-accredited testing laboratory can be used to support a premarket submission for any device if the testing was conducted using a standard included in the ASCA Program and in accordance with the ASCA program specifications for that standard.

The ASCA Program includes participation from accreditation bodies, testing laboratories, device manufacturers, and FDA staff. Each of these entities plays a critical role in the ASCA Program to ensure that patients and healthcare providers have timely and continued access to safe, effective, and high-quality medical devices.

To participate in the ASCA Program, accreditation bodies and testing laboratories apply to FDA to demonstrate that they have the qualifications for their respective roles within the program. An application includes agreement to terms of participation. For example, a participating accreditation body or testing laboratory agrees to attend training, regularly communicate with FDA, and support periodic FDA audits. FDA will identify the scope of ASCA Recognition (for accreditation bodies) and ASCA Accreditation (for testing laboratories) for specific standards and test methods to which each participant may accredit or test as part of the ASCA Program.

During the ASCA Program, FDA generally will accept test results from ASCA-accredited testing laboratories to support conformity of a medical device to a particular standard and does not intend to review complete test reports from ASCA-accredited testing laboratories in support of a declaration of conformity submitted with a premarket submission except in certain circumstances.

Note that ASCA Accreditation is separate from any accreditation that an accreditation body may provide to a testing laboratory for purposes other than the ASCA Program.

The ASCA Program does not address specific content for a particular premarket submission. Information collections associated with premarket submissions have been previously approved.

We plan to issue draft guidance updates to the three published ASCA Pilot guidance documents[7] to improve and streamline the ASCA Program. The guidance updates are being issued to discuss the lessons learned during ASCA's pilot phase and to help

facilitate the transition from a pilot to a permanent program. As a result of these guidance updates, there is minimal adjustment to the burden estimate.

Respondents are accreditation bodies (ABs) and testing laboratories (TLs). In tables 1 through 3, these abbreviations are used.

In the **Federal Register** of January 19, 2023 (88 FR 3419), we published a 60-day notice requesting public comment on the proposed collection of information. No comments were received.

We estimate the burden of the information collection as follows:

TABLE 1—ESTIMATED ANNUAL REPORTING BURDEN [1]

Activity	Number of respondents	Number of responses per respondent	Total annual responses	Average burden per response	Total hours [2]
Application by AB for ASCA Recognition	8	1	8	6	48
Request by AB to continue ASCA Recognition	2	1	2	6	12
Request by AB for ASCA Recognition (subsequent to withdrawal).	1	1	1	6	6
Request by AB to expand scope of ASCA Recognition	1	1	1	6	6
AB annual status report	8	1	8	3	24
AB notification of change	8	1	8	1	8
Application by TL for ASCA Accreditation	150	1	150	4	600
Request by TL to continue ASCA Accreditation	75	1	75	4	300
Request by TL for ASCA Accreditation (subsequent to withdrawal or suspension).	5	1	5	4	20
Request by TL to expand scope of ASCA Accreditation	75	1	75	4	300
TL annual status report	150	1	150	1.5	225
TL notification of change	5	1	5	1	5
Request for withdrawal or suspension of ASCA Accreditation (TLs) or request for withdrawal of ASCA Recognition (ABs).	6	1	6	0.08 (5 minutes).	1
Feedback questionnaire (ABs and TLs)	158	1	158	0.5 (30 minutes).	79
Total					1,634

[1] Totals have been rounded to the nearest hour.
[2] There are no capital costs or operating and maintenance costs associated with this collection of information.

TABLE 2—ESTIMATED ANNUAL RECORDKEEPING BURDEN [1]

Activity	Number of recordkeepers	Number of records per recordkeeper	Total annual records	Average burden per recordkeeping	Total hours
AB setup documentation standard operating procedures (SOPs) & training (one-time burden)	3	1	3	25	75
TL setup documentation SOPs & training (one-time burden)	20	1	20	25	500
AB record maintenance	8	1	8	1	8
TL record maintenance	150	1	150	1	150
Total					733

[1] There are no capital costs or operating and maintenance costs associated with this collection of information.

TABLE 3—ESTIMATED ANNUAL THIRD-PARTY DISCLOSURE BURDEN [1]

Activity	Number of respondents	Number of disclosures per respondent	Total annual disclosures	Average burden per disclosure	Total hours
Request for Accreditation (TLs requesting accreditation from ABs).	150	1	150	0.5 (30 minutes).	75
Review/Acknowledgement of accreditation request (ABs)	8	22	176	40	7,040
Test Reports (TLs)	880	1	880	1	880
Total					7,995

[1] There are no capital costs or operating and maintenance costs associated with this collection of information.

Our estimate of eight ABs is based on the number of International Laboratory Accreditation Cooperation signatories in the U.S. economy. We estimate that approximately 150 testing labs will seek ASCA Accreditation. Our estimate of Test Reports is based on the number of premarket submissions we expect per year with testing from an ASCA-accredited testing laboratory.

Our estimates for the number of respondents and average burden per

response, recordkeeping, and disclosure are based on our experience with the pilot program.

Our estimated burden for the information collection reflects an overall decrease of 3,129 hours and an increase of 94 responses/records. We attribute this adjustment to a decrease in the one-time burden for accreditation bodies and testing laboratories training and SOPs because much of this activity was completed during the pilot. In addition, there is an increase in the annual responses/records because there is an increase in renewal requests (by accreditation bodies to continue ASCA Recognition and by testing laboratories to continue ASCA Accreditation) since the pilot program was initiated.

Dated: June 26, 2023.

Lauren K. Roth,

Associate Commissioner for Policy.

BILLING CODE 4164–01–P

DEPARTMENT OF HEALTH AND HUMAN SERVICES

Food and Drug Administration

[Docket No. FDA–2017–N–0366]

Agency Information Collection Activities; Submission for Office of Management and Budget Review; Comment Request; Food and Drug Administration Advisory Committee Regulations

AGENCY: Food and Drug Administration, HHS.

ACTION: Notice.

SUMMARY: The Food and Drug Administration (FDA) is announcing that a proposed collection of information has been submitted to the Office of Management and Budget (OMB) for review and clearance under the Paperwork Reduction Act of 1995.

DATES: Submit written comments (including recommendations) on the collection of information by July 31, 2023.

ADDRESSES: To ensure that comments on the information collection are received, OMB recommends that written comments be submitted to *https://www.reginfo.gov/public/do/PRAMain.* Find this particular information collection by selecting ''Currently under Review—Open for Public Comments'' or by using the search function. The OMB control number for this information collection is 0910–0833. Also include the FDA docket number found in brackets in the heading of this document.

FOR FURTHER INFORMATION CONTACT: Amber Sanford, Office of Operations, Food and Drug Administration, Three White Flint North, 10A–12M, 11601 Landsdown St., North Bethesda, MD 20852, 301–796–8867, *PRAStaff@fda.hhs.gov.*

SUPPLEMENTARY INFORMATION: In compliance with 44 U.S.C. 3507, FDA has submitted the following proposed collection of information to OMB for review and clearance.

FDA Advisory Committee Regulations

OMB Control No. 0910–0833—Revision

This information collection helps support implementation of FDA regulations found in part 14 (21 CFR part 14). These regulations govern procedures applicable to presenting information and views before an FDA advisory committee in accordance with the Federal Advisory Committee Act (FACA) (5 U.S.C. App. 2 and 3, Pub. L. 92–463). FACA is designed to assure that Congress and the public are kept informed with respect to the purpose, membership, and activities of advisory committees. It does not specify the manner in which advisory committee members and staff must be appointed.

Public advisory committee regulations in part 14 set forth requirements governing the administrative procedures to follow for the operation of advisory committees. Agency regulations in part 14, subpart A (§§ 14.1 through 14.15) identify scope of coverage, applicable definitions, and establish general provisions. The regulations in part 14, subpart B (§§ 14.20 through 14.39) set forth content and format requirements along with required schedules for submission of information. The regulations in part 14 subparts C, D, and E (§§ 14.40 through 14.95) set forth requirements governing advisory committee establishment, recordkeeping, and maintenance, respectively.

FDA will also require that nominees to serve on advisory committees submit a consent form authorizing FDA to post, without removing or redacting any information, to FDA's public website (*http://www.fda.gov/AdvisoryCommittees*) the curriculum vitae (CV) submitted as part of their nomination materials if the nominee is selected to serve on an advisory committee. The consent form requires that the nominee affirm that the CV does not include any confidential information, including information pertaining to third parties, that the nominee is not permitted to disclose. A nominee will be required to submit a signed consent form as a part of the nomination package for the nomination to be considered complete.

All nominations for new advisory committee members will be required to be submitted through FDA's website at *http://accessdata.test.fda.gov/scripts/FACTRSPortal/FACTRS/index.cfm,* or any successor system, and the submission will be required to be accompanied by the consent form, on or after the date of OMB approval for this information collection. Although we are developing collection instruments, as communicated on our website, respondents may submit information to: Advisory Committee Oversight and Management Staff, Office of the Commissioner, Food and Drug Administration, 10903 New Hampshire Ave., Bldg. 32, Silver Spring, MD 20993, 800–741–8138 or 301–443–0572.

In the **Federal Register** of February 13, 2023 (88 FR 9294), FDA published a 60-day notice requesting public comment on the proposed collection of information. Four comments were received but were not responsive to the information collection topics solicited under the PRA. On our own initiative, we are clarifying the scope of coverage for the information collections.

We estimate the burden of the collection of information as follows:

TABLE 1—ESTIMATED ANNUAL REPORTING BURDEN [1]

21 CFR part 14	Number of respondents	Number of responses per respondent	Total annual responses	Average burden per response	Total hours
Subpart E—Members of Advisory Committees					
Advisory Committee Membership Nominations	308	1	308	0.25 (15 minutes).	77
Member Submission of Updated Information	452	1	452	0.25 (15 minutes).	113
Total					190

[1] There are no capital costs or operating and maintenance costs associated with this collection of information.

Based on a review of the information collection since our last request for OMB approval, we have made no adjustments to our burden estimate.

Dated: June 26, 2023.

Lauren K. Roth,

Associate Commissioner for Policy.

DEPARTMENT OF HEALTH AND HUMAN SERVICES

Food and Drug Administration

[Docket No. FDA–2016–N–2474]

Agency Information Collection Activities; Submission for Office of Management and Budget Review; Comment Request; New Animal Drugs for Minor Use and Minor Species

AGENCY: Food and Drug Administration, HHS.

ACTION: Notice.

SUMMARY: The Food and Drug Administration (FDA, Agency, or we) is announcing that a proposed collection of information has been submitted to the Office of Management and Budget (OMB) for review and clearance under the Paperwork Reduction Act of 1995.

DATES: Submit written comments (including recommendations) on the collection of information by July 31, 2023.

ADDRESSES: To ensure that comments on the information collection are received, OMB recommends that written comments be submitted to *https://www.reginfo.gov/public/do/PRAMain.* Find this particular information collection by selecting ''Currently under Review—Open for Public Comments'' or by using the search function. The OMB control number for this information collection is 0910–0605. Also include the FDA docket number found in brackets in the heading of this document.

FOR FURTHER INFORMATION CONTACT: Rachel Showalter, Office of Operations, Food and Drug Administration, Three White Flint North, 10A–12M, 11601 Landsdown St., North Bethesda, MD 20852, 240–994–7399, *PRAStaff@fda.hhs.gov.*

SUPPLEMENTARY INFORMATION: In compliance with 44 U.S.C. 3507, FDA has submitted the following proposed collection of information to OMB for review and clearance.

New Animal Drugs for Minor Use and Minor Species

OMB Control Number 0910–0605—Revision

This information collection supports FDA regulations that implement sections 572 and 573 of the Federal Food, Drug, and Cosmetic Act (FD&C Act) (21 U.S.C. 360ccc–1 and 21 U.S.C. 360ccc–2) which establish an index of legally marketed unapproved new animal drugs for minor species and requirements for the designation of minor use or minor species new animal drugs, respectively. Agency regulations are codified in part 516 (21 CFR part 516) and include recordkeeping and reporting requirements. The purpose of these regulations is to encourage the development of these new animal drugs, while still ensuring appropriate safeguards for animal and human health. The general provisions in part 516, subpart A, set forth its purpose, scope, and applicable definitions.

Our regulations in part 516, subpart B, provide for designation status for Minor Use and Minor Species (MUMS) drugs prior to their approval or conditional approval. MUMS-drug designation makes the sponsor eligible for incentives to support the approval or conditional approval of the designated use and is completely optional for drug sponsors. The regulations describe how to apply for designation, what needs to be submitted, and other information pertaining to this option. Sponsors of designated new animal drugs are required to demonstrate due diligence toward approval or conditional approval through submission of annual reports documenting their progress for each designated use. We use this information to allow for determining eligibility for designation and the associated incentives and benefits, including a 7-year period of exclusive marketing rights, as provided by section 573 of the FD&C Act. It enables us to process requests for MUMS-drug designation, requests to amend MUMS-drug designation, changes in sponsorship, termination of MUMS-drug designation, requirements for annual reports from sponsors, and provisions for insufficient quantities of MUMS-designated drugs.

Regulations in part 516, subpart C, are intended to make more medications legally available to veterinarians and animal owners for the treatment of minor animal species. In some cases, a minor species drug is intended for use in species that are too rare or too varied to be the subject of adequate and well-controlled studies in support of a drug approval. In such cases, FDA may add the drug to the public index listing of legally marketed unapproved new animal drugs for minor species animals (Index), as provided for by section 572 of the FD&C Act. Within limitations established by the statute, such indexing provides a basis for legally marketing an unapproved new animal drug intended for use in a minor species. Our regulations in part 516, subpart C, specify, among other things, the criteria and procedures for requesting eligibility for indexing and for requesting addition to the Index, as well as the annual reporting requirements for holders of an index listing. The administrative procedures and criteria for indexing a new animal drug for use in a minor species, as well as modifications and removal of a drug from the Index are also set forth. FDA uses the information for the activities described above.

In the **Federal Register** of August 1, 2022 (87 FR 46961), FDA published a 60-day notice requesting public

comment on the information collection requirements related to designation status for MUMS drugs. No comments were received. We are revising the information collection to add the information collection requirements associated with the index listing of legally marketed unapproved new animal drugs for minor species, for efficiency of Agency operations.

Description of Respondents: The respondents to this information collection are pharmaceutical companies that sponsor new animal drugs for designation or requesters wishing to add a new animal drug to the Index.

FDA estimates the burden of this collection of information as follows:

TABLE 1—ESTIMATED ANNUAL REPORTING BURDEN [1]

21 CFR section; activity	Number of respondents	Number of responses per respondent	Total annual responses [2]	Average burden per response (hours)	Total hours [3]
Designated New Animal Drugs for Minor Use and Minor Species, Part 516, Subpart B					
516.20, 516.26, 516.27, 516.29, 516.30, and 516.36; Reporting burden associated with drug designation requests and termination of designation	26	~2.65	69	4	276
Index of Legally Marketed Unapproved New Animal Drugs for Minor Species, Part 516, Subpart C					
516.119, 516.121, 516.123, 516.125, 516.141, 516.143, 516.145; 516.161, 516.163, and 516.165; Reporting burden associated with requests for index listing and modifying indexed drugs	30	~10.33	310	~16.954	5,256
Total					5,532

[1] There are no capital costs or operating and maintenance costs associated with this collection of information.
[2] Decimal rounded.
[3] Rounded up.

Burden we attribute to reporting activities is assumed to be distributed among the individual elements and averaged among respondents. Our estimate of the burden per disclosure (4 and 16.954 hours, respectively) reflect what we believe is the average burden based on the reporting required by the information collection.

TABLE 2—ESTIMATED ANNUAL RECORDKEEPING BURDEN [1]

21 CFR section, activity	Number of recordkeepers	Number of records per recordkeeper	Total annual records	Average burden per recordkeeping	Total hours
Designated New Animal Drugs for Minor Use and Minor Species, Part 516, Subpart B					
One-time recordkeeping burden associated with reading and understanding the rule [2].	474	1	474	0.68 (~41 minutes) [3].	323
Index of Legally Marketed Unapproved New Animal Drugs for Minor Species, Part 516, Subpart C					
516.141 and 516.165; recordkeeping associated with panel deliberations and the information pertinent to the safety and effectiveness from foreign sources.	40	2	80	0.625 (37.5 minutes).	50
Total					373

[1] There are no capital costs or operating and maintenance costs associated with this collection of information.
[2] Direct Final Rule, ''Defining 'Small Number of Animals' for Minor Use Determination; Periodic Reassessment'' (September 15, 2022; 87 FR 56583). Preliminary Regulatory Impact Analysis (*https://www.regulations.gov/document/FDA-2022-N-1128-0007*).
[3] Rounded up.

Burden we attribute to recordkeeping activities for the indexing provisions is assumed to be distributed among the individual elements and averaged among respondents. Our estimate of the burden per record (0.625 hours) reflects what we believe is the average burden based on the recordkeeping required by the information collection.

For efficiency of Agency operations, we are consolidating the related information collection activities currently approved in OMB control numbers 0910–0605 and 0910–0620 into a single collection request. The burden estimates reflect our current experience with the information collection and requests received by respondents over the past 3 years. We also include burden that may be attributable to rulemaking (RIN 0910–A146), which became effective on December 14, 2022. Although the rulemaking revised the definition of ''small number of animals,'' for purposes of determining whether a particular intended use of a drug in a major species qualifies as a minor use, we believe only nominal adjustments in burden associated with designation status for MUMS drugs may result, other than a one-time recordkeeping burden. In addition, upon review of the previous information collection submission related to

indexing, we include burden associated with recordkeeping to address a data-entry error in the RISC/ORIA Combined Information System (ROCIS system). Cumulatively, these changes and adjustments reflect an overall increase of 5,905 hours and a corresponding increase of 864 responses, annually, to the information collection.

Dated: June 26, 2023.

Lauren K. Roth,

Associate Commissioner for Policy.

BILLING CODE 4164–01–P

DEPARTMENT OF HEALTH AND HUMAN SERVICES

Health Resources and Services Administration

Agency Information Collection Activities: Submission to OMB for Review and Approval; Public Comment Request; Rural Communities Opioid Response Program Performance Measures—OMB No. 0906–0044—Revision

AGENCY: Health Resources and Services Administration (HRSA), Department of Health and Human Services.

ACTION: Notice.

SUMMARY: In compliance with the Paperwork Reduction Act of 1995, HRSA submitted an Information Collection Request (ICR) to the Office of Management and Budget (OMB) for review and approval. Comments submitted during the first public review of this ICR will be provided to OMB. OMB will accept further comments from the public during the review and approval period. OMB may act on HRSA's ICR only after the 30-day comment period for this notice has closed.

DATES: Comments on this ICR should be received no later than July 31, 2023.

ADDRESSES: Written comments and recommendations for the proposed information collection should be sent within 30 days of publication of this notice to *www.reginfo.gov/public/do/PRAMain.* Find this particular information collection by selecting ''Currently under Review—Open for Public Comments'' or by using the search function.

FOR FURTHER INFORMATION CONTACT: To request a copy of the clearance requests submitted to OMB for review, email *paperwork@hrsa.gov* or call Samantha Miller, the HRSA Information Collection Clearance Officer, at (301) 443–3983.

SUPPLEMENTARY INFORMATION:

Information Collection Request Title: Rural Communities Opioid Response Program Performance Measures—OMB No. 0906–0044—Revision.

Abstract: HRSA administers the Rural Communities Opioid Response Program (RCORP), which is authorized by section 711(b)(5) of the Social Security Act (42 U.S.C. 912(b)(5)) and is a multi-initiative program that aims to: (1) support treatment for and prevention of substance use disorder (SUD), including opioid use disorder (OUD); and (2) reduce morbidity and mortality associated with SUD, to include OUD, by improving access to and delivering prevention, treatment, and recovery support services to high-risk rural communities. To support this purpose, RCORP grant initiatives include:

- RCORP—Implementation grants to fund established networks and consortia to deliver SUD/OUD prevention, treatment, and recovery activities in high-risk rural communities;
- RCORP—Neonatal Abstinence Syndrome grants to reduce the incidence and impact of Neonatal Abstinence Syndrome in rural communities by improving systems of care, family supports, and social determinants of health;
- RCORP—Psychostimulant Support grants to strengthen and expand prevention, treatment, and recovery services for individuals in rural areas who misuse psychostimulants; to enhance their ability to access treatment and move toward recovery;
- RCORP—Medication Assisted Treatment (MAT) Access grants aim to establish new access points in rural facilities where none currently exist; and
- RCORP—Behavioral Health Care support grants aim to expand access to and quality of behavioral health care services at the individual-, provider-, and community-levels.
- Note that additional grant initiatives may be added pending fiscal year 2024 and future fiscal year appropriations.

HRSA currently collects information about RCORP grants using approved performance measures. HRSA developed separate performance measures for RCORP's new MAT Access and Behavioral Health Care Support grants and seeks OMB approval for the new collection.

A 60-day notice published in the **Federal Register** on April 23, 2023, vol. 88, No. 63; pp. 19651–52. There were no public comments.

Need and Proposed Use of the Information: Due to the growth in the number of grant initiatives included within RCORP, as well as emerging SUD and other behavioral health trends in rural communities, HRSA is submitting a revised ICR that includes measures for RCORP's new MAT Access and Behavioral Health Care Support grants. For this program, performance measures were developed to provide data on each RCORP initiative and enable HRSA to provide aggregate program data required by Congress under the Government Performance and Results Act of 1993. These measures cover the principal topic areas of interest to the Federal Office of Rural Health Policy, including: (a) provision of, and referral to, rural behavioral health care services, including SUD prevention, treatment and recovery support services; (b) behavioral health care, including SUD prevention, treatment, and recovery, process and outcomes; (c) education of health care providers and community members; (d) emerging trends in rural behavioral health care needs and areas of concern; and (e) consortium strength and sustainability. All measures will speak to the Federal Office of Rural Health Policy's progress toward meeting the goals set.

Likely Respondents: The respondents will be recipients of the RCORP grants.

Burden Statement: Burden in this context means the time expended by persons to generate, maintain, retain, disclose, or provide the information requested. This includes the time needed to review instructions; to develop, acquire, install, and utilize technology and systems for the purpose of collecting, validating, and verifying information, processing and maintaining information, and disclosing and providing information; to train personnel and to be able to respond to a collection of information; to search data sources; to complete and review the collection of information; and to transmit or otherwise disclose the information. The total annual burden hours estimated for this ICR are summarized in the table below.

TOTAL ESTIMATED ANNUALIZED BURDEN HOURS

Form name	Number of respondents	Number of responses per respondent (annually)	Total responses	Average burden per response (in hours)	Total burden hours
Rural Communities Opioid Response Program—Implementation/Neonatal Abstinence Syndrome/MAT Expansion	290	2	580	1.24	719.20
Rural Communities Opioid Response Program—Psychostimulant Support	15	1	15	1.30	19.50
Rural Communities Opioid Response Program—MAT Access—NEW	11	1	11	1.95	21.45
Rural Communities Opioid Response Program—Behavioral Health Care Support—NEW	58	1	58	2.02	117.16
Total	374	.....	664	.....	877.31

Maria G. Button,

Director, Executive Secretariat.

BILLING CODE 4165–15–P

DEPARTMENT OF HEALTH AND HUMAN SERVICES

Health Resources and Services Administration

Agency Information Collection Activities: Submission to OMB for Review and Approval; Public Comment Request; Questionnaire and Data Collection Testing, Evaluation, and Research for the Health Resources and Services Administration, OMB No. 0915–0379 Revision

AGENCY: Health Resources and Services Administration (HRSA), Department of Health and Human Services.

ACTION: Notice.

SUMMARY: In compliance with the Paperwork Reduction Act of 1995, HRSA submitted an Information Collection Request (ICR) to the Office of Management and Budget (OMB) for review and approval. Comments submitted during the first public review of this ICR will be provided to OMB. OMB will accept further comments from the public during the review and approval period. OMB may act on HRSA's ICR only after the 30-day comment period for this notice has closed.

DATES: Comments on this ICR should be received no later than July 31, 2023.

ADDRESSES: Written comments and recommendations for the proposed information collection should be sent within 30 days of publication of this notice to *www.reginfo.gov/public/do/PRAMain.* Find this particular information collection by selecting ''Currently under Review—Open for Public Comments'' or by using the search function.

FOR FURTHER INFORMATION CONTACT: To request a copy of the clearance requests submitted to OMB for review, email Samantha Miller, the HRSA Information Collection Clearance Officer, at (301) 443–3983.

SUPPLEMENTARY INFORMATION:

Information Collection Request Title: Questionnaire and Data Collection Testing, Evaluation, and Research for HRSA—OMB No. 0915–0379—Revision.

Abstract: The purpose of information collections under this generic umbrella ICR package is to allow HRSA to continue collecting feedback from members of the public for HRSA to use when developing new questions, questionnaires, and tools; pilot/pre-test instruments to be deployed by HRSA; and to identify problems in instruments currently in use. This generic clearance is limited to data collection for the development or revision of HRSA tools and data collection instruments, as well as reports for internal decision-making and development purposes. Information collected under this generic clearance will not be used for data collection, reports, or policy documents to be released to the public. It is anticipated that data collection approved under this generic clearance will rely heavily on qualitative techniques and not the collection of numerical data. In general, these activities are not designed to yield results that meet generally accepted standards of statistical rigor but designed to obtain information to develop clearer and more effective and efficient data collection tools that will yield more accurate results and decrease public non-response. The forms submitted under this generic clearance will be voluntary, low-burden, and uncontroversial.

HRSA originally developed this generic umbrella ICR to support similar needs across HRSA's bureaus and offices as reflected in their specific activities informed by their specific authorizing statutes. The purpose is to collect qualitative data from small groups of people in response to short questionnaires, using questions posed on HRSA's website, through focus groups and individual interviews of HRSA staff and members of the public. The abbreviated clearance process of the generic clearance helps ensure timely data gathering on current issues HRSA is addressing (*e.g.,* allows program offices to gather a suitable pool of candidates for piloting future instruments).

HRSA seeks to extend OMB approval of this ICR and existing ICRs that fall under it while including a slight increase in the burden estimate to account for HRSA's implementation of Executive Order 13985, which calls on agencies to advance racial equity and support for underserved communities through identifying and addressing barriers to equal opportunity that underserved communities may face; HRSA will likely conduct additional information collection requests so that HRSA may effectively implement this Executive Order.

A 60-day notice published in the **Federal Register** on April 13, 2023, vol. 88, No. 71; pp. 22459–61. There were no public comments.

Need and Proposed Use of the Information: HRSA conducts interviews, focus groups, usability tests, and field tests/pilot interviews for data collection instrument development and evaluation (including assessment of response errors in data collection instruments). HRSA staff use various techniques to evaluate interviewer-administered, self-administered, telephone, Computer Assisted Personal Interviewing, Computer Assisted Self-Interviewing, Audio Computer-Assisted Self-Interviewing, and web-based questionnaires.

Each information collection under this generic clearance will specify the specific testing and evaluation procedures to be used. Participation will be fully voluntary, and non-participation will not affect eligibility for, or receipt of, future HRSA health services research activities or grant awards, recruitment, or participation. Appropriate consent procedures will be customized and used for each information collection activity and any collection of personal, privacy-protected information will be handled in accordance with all applicable federal requirements. If HRSA wishes to record the encounter, the respondent's permission to record will be obtained before beginning the interview. If consent is not provided, the interview either will not be recorded or not be conducted. When screening is used (*e.g.,* quota sampling), the screening will be as brief as possible, and the screening questionnaire will be provided to OMB for review.

Collection methods—The particular information collection methods used will vary, but may include the following:

- Individual in-depth interviews—In-depth interviews will commonly be used to ensure that the respondent understands the meaning of a questionnaire or strategy. When in-depth interviewing is used, the interview guide will be provided to OMB for review.
- Focus groups—Focus groups will be used to obtain insights into beliefs and understandings of the target audience early in the development of a questionnaire or tool. When focus groups are used, the focus group discussion guide will be provided to OMB for review.
- Expert/Gatekeeper review of tools—In some instances, medical providers or other gatekeepers may review tools to provide feedback on the acceptability and usability of a particular tool. This will usually be in addition to an individual user pretesting the tool.
- Record abstractions—On occasion, the development of a tool or other information collection requires review and interaction with records, rather than individuals.
- ''Dress rehearsal'' of a specific protocol—In some instances, the proposed pre-testing will constitute a walkthrough of the intended data collection procedure. In these cases, the request will mirror what is expected to occur for the larger scale data collection.

Professionally recognized procedures are followed in each information collection activity to ensure collection of high-quality information. Examples of these procedures could include the following:

- Monitoring by supervisory staff of some telephone interviews;
- Conducting interviews using methods including ''think-aloud'' techniques and debriefings;
- Computerizing data-entry from mail or paper-and-pencil surveys using scannable forms or double-key entry (*i.e.,* two people input the data from mail or paper-and-pencil surveys into an electronic format, and then comparing the two sets of entries for anomalies);
- Monitoring by observers of focus groups and recording (*e.g.,* video recording, audio recording) of focus group proceedings (subject to participant consent); and
- Employing commonly used statistical validation techniques to ensure accuracy (such as disallowing out-of-range values) of data submitted through on-line surveys.

HRSA is requesting approval for generic information collections previously approved by OMB. These include:

- Health Center Workforce Well-Being Survey: Listening Sessions
- Health Center Workforce Well-Being Survey: Cognitive Sessions
- Health Center Workforce Well-Being Survey: Pilot Testing
- Health Center Workforce Survey Evaluation and Technical Assistance: Pilot Survey
- Fast Track Interviews with National Hypertension Control Initiative Group 2 Participants

HRSA notes that the previously approved collections are mostly unchanged, except that they may have updates to include any advances in burden estimation or information collection protocols. HRSA also anticipates conducting additional collections as the agency implements Executive Order 13985. To identify areas for improvement, HRSA anticipates collecting and aggregating data by race, ethnicity, gender, disability, income, veteran status, or other key demographic variables, while protecting individual privacy, so that HRSA can use the information to help increase equity in its programs for people from a robust range of demographic groups.

Likely Respondents: Participation in any collections under this clearance will be entirely voluntary, and the privacy of respondents will be preserved to the extent requested by participants and as permitted by law.

Respondents will be recruited by means of advertisements in public venues or through techniques that replicate prospective data collection activities that are the focus of the project. For instance, a survey on physician communication, designed to be administered following an office visit, might be pretested using the same procedure. Each ICR will specify the recruitment procedure to be used.

Burden Statement: Burden in this context means the time expended by persons to generate, maintain, retain, disclose, or provide the information requested. This includes the time needed to review instructions; to develop, acquire, install, and utilize technology and systems for the purpose of collecting, validating, and verifying information, processing and maintaining information, and disclosing and providing information; to train personnel and to be able to respond to a collection of information; to search data sources; to complete and review the collection of information; and to transmit or otherwise disclose the information. The total annual burden hours estimated for this ICR are summarized in the table below.

TOTAL ESTIMATED ANNUALIZED BURDEN HOURS

Type of information collection	Number of respondents	Number of responses per respondent	Total responses	Average burden per response (in hours)	Total burden hours
Mail/email [1]	1,000	1	1,000	0.26	260
Telephone	1,000	1	1,000	0.26	260
Web-based	1,200	1	1,200	0.25	300
Focus Groups	925	1	925	1.00	925
In-person	250	1	250	1.00	250
Automated [2]	500	1	500	1.00	500

TOTAL ESTIMATED ANNUALIZED BURDEN HOURS—Continued

Type of information collection	Number of respondents	Number of responses per respondent	Total responses	Average burden per response (in hours)	Total burden hours
Cognitive Testing	700	1	700	1.41	987
Total	5,575		5,575		3482

[1] May include telephone non-response follow-up in which case the burden will not change.
[2] May include testing of database software, Computer Assisted Personal Interviewing software, or other automated technologies.

Maria G. Button,

Director, Executive Secretariat.

DEPARTMENT OF HEALTH AND HUMAN SERVICES

Health Resources and Services Administration

Agency Information Collection Activities: Submission to OMB for Review and Approval; Public Comment Request; Information Collection Request; Application for Federally Supported Health Centers Assistance Act/Federal Tort Claims Act Particularized Determination of Coverage, 0906–XXXX, New

AGENCY: Health Resources and Services Administration (HRSA), Department of Health and Human Services.

ACTION: Notice.

SUMMARY: In compliance with the requirement for opportunity for public comment on proposed data collection projects of the Paperwork Reduction Act of 1995, HRSA submitted an Information Collection Request (ICR), described below, to the Office of Management and Budget (OMB) for review and approval. Comments submitted during the first public review of this ICR will be provided to OMB. OMB will accept further comments from the public during the review and approval period. OMB may act on HRSA's ICR only after the 30-day comment period for this notice has closed.

DATES: Comments on this ICR must be received no later than July 31, 2023.

ADDRESSES: Written comments and recommendations for the proposed information collection should be sent within 30 days of publication of this notice to *www.reginfo.gov/public/do/PRAMain.* Find this particular information collection by selecting ''Currently under Review—Open for Public Comments'' or by using the search function.

FOR FURTHER INFORMATION CONTACT: To request more information on the proposed project or to obtain a copy of the data collection plans and draft instruments, email *paperwork@hrsa.gov* or call Samantha Miller, the HRSA Information Collection Clearance Officer, at *paperwork@hrsa.gov* or call (301) 443–3983.

SUPPLEMENTARY INFORMATION: When submitting comments or requesting information, please include the ICR title for reference.

Information Collection Request Title: Application for Federally Supported Health Centers Assistance Act/Federal Tort Claims Act Particularized Determination of Coverage. OMB No. 0906–XXXX–New.

Abstract: Section 224(g)–(n) of the Public Health Service (PHS) Act (42 U.S.C. 233(g)–(n)), as amended, authorizes the Secretary to ''deem'' entities receiving funds under section 330 of the PHS Act (HRSA's Health Center Program) as PHS employees for the purposes of establishing eligibility for liability protections under the Federally Supported Health Centers Assistance Act (FSHCAA) including Federal Tort Claims Act (FTCA) coverage, for covered activities and individuals. Health centers submit deeming applications annually to HRSA's Bureau of Primary Health Care, which administers the Health Center Program and the Health Center FTCA Program, in the prescribed form and manner to obtain deemed PHS employee status for this purpose.

FSHCAA and 42 CFR 6.6(d) authorize FTCA coverage for the provision of medical services to non-health center patients in certain situations. Section 224(g)(1)(C) of the PHS Act and 42 CFR 6.6(d) explain the criteria by which the Secretary will determine whether FSHCAA's liability protections, including FTCA coverage, will extend to the provision of medical care to individuals who are not patients of the health center. 42 CFR 6.6(e) identifies examples that are approvable for FTCA coverage under 42 CFR 6.6(d) and section 224(g)(1)(B)(ii) of the PHS Act if there is compliance with all other coverage requirements under FSHCAA. 42 CFR 6.6(e)(4) provides examples of specific activities that the Department has determined are eligible for FSCHAA's liability protections, including FTCA coverage, without the need for a specific application for a coverage determination. As indicated in 42 CFR 6.6(e)(4), if any element of an activity or arrangement does not fit squarely into the examples listed in 42 CFR 6.6(e), the covered entity should request a particularized determination of coverage. Acts and omissions related to services provided to individuals who are not patients of a covered entity that do not fit squarely within the examples in 42 CFR 6.6(e)(4) will be covered only if the Secretary makes a coverage determination under 42 CFR 6.6(d). The FTCA program uses a web-based application system within HRSA's Electronic Handbooks (EHB) system for deeming applications. These electronic application forms decrease the time and effort required to complete the older, paper-based approved deeming application forms. HRSA is proposing a new paper application that will be transitioned into an electronic application within the EHB system for Particularized Determinations (PD). PDs extend liability protections under FSCHAA, including FTCA coverage, for certain medical services provided to individuals who are not patients of a covered entity. This application will help ensure health centers provide all the necessary information required to make determinations appropriately and efficiently in response to their requests. By including the application within the EHBs, health centers will have access to all information from prior applications and have that information readily available if making future requests. The paper form of the application is an interim solution to support health centers until the electronic application becomes available in the FTCA module of the EHBs. After the electronic application is available in the EHBs, all PD requests will be submitted

electronically, and the paper application will no longer be used for submissions.

A 60-day notice published in the **Federal Register** on March 8, 2023, Vol. 88, No. 45; pp. 14377, received no public comments.

Need and Proposed Use of the Information: PDs of coverage applications are provided in compliance with 42 CFR 6.6 and must address certain specified criteria for coverage determinations to be issued. The application provides the Bureau of Primary Health Care with the information that is essential for evaluation of compliance with legal requirements and making a deeming determination of coverage under 42 CFR 6.6.

Likely Respondents: Respondents include recipients of Health Center Program funds with deemed PHS employee status under section 224(g)–(n) of the PHS Act (42 U.S.C. 233(g)–(n)).

Burden Statement: Burden in this context means the time expended by persons to generate, maintain, retain, disclose, or provide the information requested. This includes the time needed to review instructions; to develop, acquire, install, and utilize technology and systems for the purpose of collecting, validating, and verifying information, processing and maintaining information, and disclosing and providing information; to train personnel and to be able to respond to a collection of information; to search data sources; to complete and review the collection of information; and to transmit or otherwise disclose the information. The total annual burden hours estimated for this ICR are summarized in the table below.

TOTAL ESTIMATED ANNUALIZED BURDEN HOURS

Form name	Number of respondents	Number of responses per respondent	Total responses	Average burden per response (in hours)	Total burden hours
Application for Federally Supported Health Center Assistance Act (FSHCAA)/Federal Tort Claims Act (FTCA) Particularized Determination	12	1	12	2	24
Total	12	1	12	24	24

HRSA specifically requests comments on (1) the necessity and utility of the proposed information collection for the proper performance of the agency's functions, (2) the accuracy of the estimated burden, (3) ways to enhance the quality, utility, and clarity of the information to be collected, and (4) the use of automated collection techniques or other forms of information technology to minimize the information collection burden.

Maria G. Button,

Director, Executive Secretariat.

BILLING CODE 4165–15–P

DEPARTMENT OF HEALTH AND HUMAN SERVICES

Meeting of the Secretary's Advisory Committee on Human Research Protections

AGENCY: Office of the Assistant Secretary for Health, Office of the Secretary, Department of Health and Human Services.

ACTION: Notice.

SUMMARY: Pursuant to the Federal Advisory Committee Act, notice is hereby given that the Secretary's Advisory Committee on Human Research Protections (SACHRP) will hold a meeting that will be open to the public. Information about SACHRP, the full meeting agenda, and instructions for linking to public access will be posted on the SACHRP website at *http://www.dhhs.gov/ohrp/sachrp-committee/meetings/index.html.*

DATES: The meeting will be held on Wednesday, July 19, 2023 from 11:00 a.m. until 5:00 p.m., and Thursday, July 20, 2023, from 11:00 a.m. until 5:00 p.m. (times are tentative and subject to change). The confirmed times and agenda will be posted on the SACHRP website as this information becomes available.

ADDRESSES: This meeting will be held via webcast. Members of the public may also attend the meeting via webcast. Instructions for attending via webcast will be posted at least one week prior to the meeting at *https://www.hhs.gov/ohrp/sachrp-committee/meetings/index.html.*

FOR FURTHER INFORMATION CONTACT: Julia Gorey, J.D., Executive Director, SACHRP; U.S. Department of Health and Human Services, 1101 Wootton Parkway, Suite 200, Rockville, Maryland 20852; telephone: 240–453–8141; fax: 240–453–6909; email address: *SACHRP@hhs.gov.*

SUPPLEMENTARY INFORMATION: Under the authority of 42 U.S.C. 217a, section 222 of the Public Health Service Act, as amended, SACHRP was established to provide expert advice and recommendations to the Secretary of Health and Human Services, through the Assistant Secretary for Health, on issues and topics pertaining to or associated with the protection of human research subjects.

The Subpart A Subcommittee (SAS) was established by SACHRP in October 2006 and is charged with developing recommendations for consideration by SACHRP regarding the application of subpart A of 45 CFR part 46 in the current research environment.

The Subcommittee on Harmonization (SOH) was established by SACHRP at its July 2009 meeting and charged with identifying and prioritizing areas in which regulations and/or guidelines for human subjects research adopted by various agencies or offices within HHS would benefit from harmonization, consistency, clarity, simplification and/or coordination.

The SACHRP meeting will open to the public at 11:00 a.m., on Wednesday, July 19, 2023, followed by opening remarks from Julie Kaneshiro, Acting Director of OHRP and Dr. Douglas Diekema, SACHRP Chair. The meeting will begin with a discussion of IRB effectiveness, topic #4 of the recently published GAO report #GAO–23–104721, Institutional Review Boards: Actions Needed to Improve Federal Oversight and Examine Effectiveness. This will be followed by commentary on the FDA draft guidance, Decentralized Clinical Trials for Drugs, Biological Products, and Devices, in addition to discussion of recommendations that address the ethical conduct of decentralized clinical trials in human subjects research more broadly.

Discussion of both topics will continue on July 20, in addition to commentary on the recently released

draft HHS guidance, *Frequently Asked Questions: Limited Institutional Review Board Review and Related Exemptions.* Other topics may be added; for the full and updated meeting agenda, see *http://www.dhhs.gov/ohrp/sachrp-committee/meetings/index.html.* The meeting will adjourn by 5:00 p.m. July 20, 2023.

Time will be allotted for public comment on both days of the meeting. The public may submit written public comment in advance to *SACHRP@hhs.gov* no later than midnight July 12, 2023, ET. Written comments will be shared with SACHRP members and may be read aloud during the meeting. Public comment must be relevant to topics being addressed by the SACHRP.

Dated: June 12, 2023.

Julia G. Gorey,

Executive Director, SACHRP, Office for Human Research Protections.

[FR Doc. 2023–13833 Filed 6–28–23; 8:45 am]

BILLING CODE 4150–36–P

DEPARTMENT OF HEALTH AND HUMAN SERVICES

Office of the Secretary

Findings of Research Misconduct

AGENCY: Office of the Secretary, HHS.

ACTION: Notice.

SUMMARY: Findings of research misconduct have been made against Yiorgos (Georgios) I. Laliotis, M.D. (Respondent), who was a Postdoctoral Fellow, Department of Cancer Biology and Genetics, College of Medicine, The Ohio State University (OSU), and Postdoctoral Fellow, Department of Oncology, Johns Hopkins University (JHU). Respondent engaged in research misconduct in research supported by U.S. Public Health Service (PHS) funds, specifically National Cancer Institute (NCI), National Institutes of Health (NIH), grants R01 CA186729, R01 CA198117, P30 CA016058, K22 CA245487, and R21 CA252530 and included in grant applications submitted for PHS funds, specifically R01 CA186729–07 and R01 CA198117–05 submitted to NCI, NIH. The administrative actions, including supervision for a period of three (3) years, were implemented beginning on June 12, 2023, and are detailed below.

FOR FURTHER INFORMATION CONTACT: Sheila Garrity, JD, MPH, MBA, Director, Office of Research Integrity, 1101 Wootton Parkway, Suite 240, Rockville, MD 20852, (240) 453–8200.

SUPPLEMENTARY INFORMATION: Notice is hereby given that the Office of Research Integrity (ORI) has taken final action in the following case:

Yiorgos (Georgios) I. Laliotis, M.D., The Ohio State University and Johns Hopkins University: Based on the reports of inquiries conducted by OSU and JHU, admissions by Respondent, and analysis conducted by ORI in its oversight review, ORI found that Yiorgos (Georgios) I. Laliotis, M.D., former Postdoctoral Fellow, Department of Cancer Biology and Genetics, College of Medicine, OSU, and former Postdoctoral Fellow, Department of Oncology, JHU, engaged in research misconduct in research supported by U.S. Public Health Service (PHS) funds, specifically NCI, NIH, grants R01 CA186729, R01 CA198117, P30 CA016058, K22 CA245487, and R21 CA252530 and included in grant applications submitted for PHS funds, specifically R01 CA186729–07 and R01 CA198117–05 submitted to NCI, NIH.

ORI found that Respondent engaged in research misconduct by intentionally and knowingly falsifying and/or fabricating data, methods, results, and conclusions by representing a fabricated Exon 2 splice variant of *U2AF2,* which would translate as a Serine-Arginine-Rich deficient U2AF65 isoform, leading to the repression of lung adenocarcinomas and by enhancing the role of splicing in mutant *PIK3CA* breast cancer cell lines in the following three (3) published papers, two (2) NIH grant applications, and two (2) unpublished manuscripts:

- AKT3-mediated IWS1 phosphorylation promotes the proliferation of EGFR-mutant lung adenocarcinomas through cell cycle-regulated *U2AF2* RNA splicing. *Nat. Commun.* 2021 Jul 30; 12(1):4624. doi: 10.1038/s41467–021–24795–1 (hereafter referred to as ''*Nat. Commun.* 2021''). Retraction in: *Nat. Commun.* 2022 Jun 28;13(1):3711. doi: 10.1038/s41467–022–31445–7.
- Phosphor-IWS1-dependent *U2AF2* splicing regulates trafficking of CAR–E-positive intronless gene mRNAs and sensitivity to viral infection. *Commun. Biol.* 2021 Oct 11; 4(1):1179. doi: 10.1038/s42003–021–02668-z (hereafter referred to as ''*Commun. Biol.* 2021''). Retraction in: *Commun. Biol.* 2021 Dec 15;4(1):1419. doi: 10.1038/s42003–021–02941–1.
- Overexpression of the SETD2 WW domain inhibits the phosphor-IWS1/SETD2 interaction and the oncogenic AKT/IWS1 RNA splicing program. *bioRxiv* 2021.08.12.454141. doi: 10.1101/2021.08.12.454141 (hereafter referred to as ''*bioRxiv* 2021''). Withdrawn. The manuscript also was submitted to *Commun. Biol.* in 2021 but was withdrawn prior to completion of peer review.
- R01 CA186729–07, ''The role of IWS1-dependent alternative RNA splicing in lung cancer,'' submitted to NCI, NIH, on November 5, 2020.
- R01 CA198117–05, ''The role of IWS1 in development and tumorigenesis,'' submitted to NCI, NIH, on June 3, 2019.
- The transcriptomic landscape of oncogenic P13K reveals key functions in splicing and gene expression regulation. Manuscript submitted to *Cancer Res.* (hereafter referred to as the ''*Cancer Res.* manuscript'').
- Interpretable deep learning for chromatin-informed inference of transcriptional programs driven by somatic alterations across cancers. Manuscript in preparation (hereafter referred to as ''Manuscript 2021'').

Specifically, ORI finds that Respondent knowingly and intentionally:

- falsified the sequencing data in Figure 1g of *Nat. Commun.* 2021 by splicing two sequencing chromatograms together to falsely represent a novel identification of a previously undescribed *U2AF2* RNA transcript lacking Exon 2
- falsified conclusions about the fabricated *U2AF2* splice variant in RT–PCR results in Figures 1f, 2a, 2b, 2c, 3d, 4a, 4b, 4c, 4e, 5h, 6f, 6i, and 7c of *Nat. Commun.* 2021
- falsified conclusions about the fabricated *U2AF2* splice variant as the source of two endogenous protein isoforms in immunoblot panels in Figures 5c and 5g of *Nat. Commun.* 2021 and Figure 2 of R01 CA186729–07
- falsified the experimental conditions of p-ERK1/2 (Y202/T204), p-CDK1 (Y15), CDK1, and Cyclin B1 immunoblot panels in Figure 5g of *Nat. Commun.* 2021 and Figure 2 of R01 CA186729–07 by using shControl or shIWS1 instead of the samples as reported in the figure labels to falsely represent the immunoblots as the result of *U2AF2* containing spliced Exon 2
- falsified the experimental conditions of the α-actinin immunoblot panel in Figure 1e of *Commun. Biol.* 2021 by using shIWS1 instead of shISWS1/U2AF65β-V5 as reported in the figure label
- in *Commun. Biol.* 2021, *bioRxiv* 2021, R01 CA186729–07, and R01 CA198117–05, reported falsified conclusions highlighting the role of the fabricated *U2AF2* RNA transcript lacking Exon 2 from *Nat. Commun.* 2021

- fabricated and/or falsified the dose response curves in Figures 3k and S5N of the *Cancer Res.* manuscript by treating the MCF7 and T47D cells lines with DMSO or Alpelisib instead of treating with the presence or absence of splicing inhibitors H3B–8800 or E7070 as reported in the figure legend
- fabricated and/or falsified the quantitative RNA immunoprecipitation qPCR data in Figures S4c and S4d of the *Cancer Res.* Manuscript
- fabricated and/or falsified the qPCR data in Figure 6 of Manuscript 2021 to show changes in gene expression between control and inhibitor treatment
- fabricated and/or falsified the experimental methods described in the legend of Figure 6 of Manuscript 2021 by using CREB1 as a control gene instead of ACTIN as reported in the figure legend

Respondent entered into a Voluntary Settlement Agreement (Agreement) and voluntarily agreed to the following:

(1) Respondent will have his research supervised for a period of three (3) years beginning on June 12, 2023 (the ''Supervision Period''). Prior to the submission of an application for PHS support for a research project on which Respondent's participation is proposed and prior to Respondent's participation in any capacity in PHS-supported research, Respondent will submit a plan for supervision of Respondent's duties to ORI for approval. The supervision plan must be designed to ensure the integrity of Respondent's research. Respondent will not participate in any PHS-supported research until such a supervision plan is approved by ORI. Respondent will comply with the agreed-upon supervision plan.

(2) The requirements for Respondent's supervision plan are as follows:

i. A committee of 2–3 senior faculty members at the institution who are familiar with Respondent's field of research, but not including Respondent's supervisor or collaborators, will provide oversight and guidance for a period of three (3) years from the effective date of the Agreement. The committee will review primary data from Respondent's laboratory on a quarterly basis and submit a report to ORI at six (6)-month intervals setting forth the committee meeting dates and Respondent's compliance with appropriate research standards and confirming the integrity of Respondent's research.

ii. The committee will conduct an advance review of each application for PHS funds, or report, manuscript, or abstract involving PHS-supported research in which Respondent is involved. The review will include a discussion with Respondent of the primary data represented in those documents and will include a certification to ORI that the data presented in the proposed application, report, manuscript, or abstract are supported by the research record.

(3) During the Supervision Period, Respondent will ensure that any institution employing him submits, in conjunction with each application for PHS funds, or report, manuscript, or abstract involving PHS-supported research in which Respondent is involved, a certification to ORI that the data provided by Respondent are based on actual experiments or are otherwise legitimately derived and that the data, procedures, and methodology are accurately reported and not plagiarized in the application, report, manuscript, or abstract.

(4) If no supervision plan is provided to ORI, Respondent will provide certification to ORI at the conclusion of the Supervision Period that his participation was not proposed on a research project for which an application for PHS support was submitted and that he has not participated in any capacity in PHS-supported research.

(5) During the Supervision Period, Respondent will exclude himself voluntarily from serving in any advisory or consultant capacity to PHS including, but not limited to, service on any PHS advisory committee, board, and/or peer review committee.

Dated: June 26, 2023.

Sheila Garrity,

Director, Office of Research Integrity, Office of the Assistant Secretary for Health.

BILLING CODE 4150–31–P

DEPARTMENT OF HEALTH AND HUMAN SERVICES

Office of Global Affairs: Stakeholder Listening Session in Preparation for the G20 Health Working Group Ministers Meeting

ACTION: Notice of public listening session; request for comments.

Time and Date: The listening session will be held on Wednesday, August 9, 2023, from 12 to 2:00 p.m., Eastern Daylight Time.

Place: The session will be held virtually, with online and dial-in information shared with registered participants.

Status: This meeting is open to the public but requires RSVP to *oga.rsvp@hhs.gov* by August 4, 2023. See RSVP section below for details.

SUPPLEMENTARY INFORMATION:

Purpose: The U.S. Department of Health and Human Services (HHS), with support from relevant health-related U.S. Government offices, is charged with leading the U.S. delegation to the Group of 20 (G20) Health Working Group Ministers' Meeting and will convene an informal Stakeholder Listening Session.

The Stakeholder Listening Session is designed to seek input from stakeholders and subject matter experts to help inform and prepare for U.S. government engagement with the G20 Health Ministers. The G20 comprises 19 countries (Argentina, Australia, Brazil, Canada, China, France, Germany, India, Indonesia, Italy, Japan, Republic of Korea, Mexico, Russia, Saudi Arabia, South Africa, Turkey, United Kingdom and United States) and the European Union. The G20 members represent around 85% of the global GDP, over 75% of the global trade, and about two-thirds of the world population. The G20 is the premier forum for international economic cooperation and plays an important role in shaping and strengthening global architecture and governance on all major international economic issues.

Each year, a different member country holds the presidency of the group and hosts the meetings. The presidency proposes the group's priorities for the year and hosts discussions to work towards consensus positions and actions on those priorities. This year's G20 presidency is India, which will be hosting the Health Working Group Ministers' Meeting on August 18 and 19, 2023.

Matters to be Discussed: The Stakeholder Listening Session will cover priority areas expected to be addressed at the G20 Health Working Group Ministers Meeting. The following have been identified as priorities for the G20 Health Working Group:

Priority I: Health emergencies' prevention, preparedness and response (including a focus on a One Health approach & antimicrobial resistance).

Priority II: Strengthening cooperation on availability of and access to safe, effective, quality and affordable medical countermeasures during health emergencies.

Priority III: Digital health innovations and solutions to aid universal health coverage and improve health care service delivery.

Participation is welcome from all stakeholder communities.

RSVP: Persons seeking to speak at the listening session must register by Friday, August 4, 2023. Persons seeking to attend the listening session in a listen-only capacity must register by Monday, August 7, 2023.

Registrants must include their full name and organization, if any, and indicate whether they are registering as a listen-only attendee or as a speaker participant to *oga.rsvp@hhs.gov.*

Requests to participate as a speaker must include:

1. The name and email address of the person desiring to participate.
2. The organization(s) that person represents, if any.
3. Identification of the primary topic of interest.

Other Information: Written comments should be emailed to *oga.rsvp@hhs.gov* with the subject line ''Written Comment Re: Stakeholder Listening Session in preparation for the G20 Health Working Group Ministers Meeting'' by Friday, August 11, 2023.

We look forward to your comments on U.S. engagement with the G20 Health Working Group Ministers Meeting.

Dated: June 9, 2023.

Susan Kim,

Principal Deputy Assistant Secretary for Global Affairs.

Time: 1 to 5 p.m.

Agenda: To review and evaluate grant applications.

Place: National Institutes of Health, Rockledge II, 6701 Rockledge Drive, Bethesda, MD 20892 (Virtual Meeting).

Contact Person: Kirk Edward Dineley, Ph.D., Scientific Review Officer, Center for Scientific Review, National Institute of Health, 6701 Rockledge Drive, Room 806E, Bethesda, MD 20892, (301) 867–5309, *dineleyke@csr.nih.gov*.

Name of Committee: Center for Scientific Review Special Emphasis Panel; RFA Panel: Molecular Transducers of Physical Activity Consortium (MoTrPAC) Clinical Centers and Coordinating Center.

Date: July 27, 2023.

Time: 12:30 to 6:30 p.m.

Agenda: To review and evaluate grant applications.

Place: National Institutes of Health, Rockledge II, 6701 Rockledge Drive, Bethesda, MD 20892 (Virtual Meeting).

Contact Person: Heidi B. Friedman, Ph.D., Senior Scientific Review Officer, Center for Scientific Review, National Institutes of Health, 6701 Rockledge Drive, Room 907–H, Bethesda, MD 20892, (301) 379–5632, *hfriedman@csr.nih.gov*.

Name of Committee: Center for Scientific Review Special Emphasis Panel; Member Conflict: Vascular Biology and Hematology.

Date: July 28, 2023.

Time: 10 a.m. to 8 p.m.

Agenda: To review and evaluate grant applications.

Place: National Institutes of Health, Rockledge II, 6701 Rockledge Drive, Bethesda, MD 20892 (Virtual Meeting).

Contact Person: Ai-Ping Zou, MD, Ph.D., Scientific Review Officer, Center for Scientific Review, National Institutes of Health, 6701 Rockledge Drive, Room 4118, Bethesda, MD 20892, (301) 408–9497, *zouai@csr.nih.gov*.

Name of Committee: Center for Scientific Review Special Emphasis Panel; Member Conflict: Cancer Prevention and Therapeutics.

Date: July 28, 2023.

Time: 12:30 to 7 p.m.

Agenda: To review and evaluate grant applications.

Place: National Institutes of Health, Rockledge II, 6701 Rockledge Drive, Bethesda, MD 20892 (Virtual Meeting).

Contact Person: Shahana Majid, Ph.D., Scientific Review Officer, Center for Scientific Review, National Institutes of Health, 6701 Rockledge Drive, Bethesda, MD 20892, (301) 867–5309, *shahana.majid@nih.gov*.

Government-Owned Inventions; Availability for Licensing

AGENCY: National Institutes of Health, HHS.

ACTION: Notice.

SUMMARY: The inventions listed below are owned by an agency of the U.S. Government and are available for licensing in the U.S. to achieve expeditious commercialization of results of federally-funded research and development.

FOR FURTHER INFORMATION CONTACT: Licensing information may be obtained by emailing the indicated licensing contact at the National Heart, Lung, and Blood, Office of Technology Transfer and Development Office of Technology Transfer, 31 Center Drive, Room 4A29, MSC2479, Bethesda, MD 20892–2479; Michael Shmilovich; *shmilovm@nih.gov;* telephone: 301–435–5019. A signed Confidential Disclosure Agreement may be required to receive any unpublished information.

SUPPLEMENTARY INFORMATION: Technology description follows.

Cannabinoid Receptor Modulating Compounds

Available for licensing and commercial development are potentially therapeutic compounds for metabolic, inflammatory and fibrotic disorders. The filed patent applications includes extensive descriptions of the exemplary molecules and their various constituents. The cannabinoid receptor mediating compounds can be neutral antagonists. A CB_1 inverse agonist is a drug that on its own produces an effect opposite to that of a CB_1 agonist, and is also able to block the effect of a CB_1 agonist. In contrast, a CB_1 neutral antagonist can only do the latter (*i.e.,* blocking the effect of a CB_1 agonist), but has no effect on its own. CB_1 inverse agonism is usually documented by the ability of a drug to decrease GTPγS binding and/or to increase adenylate cyclase activity. The compounds may show functional bias for GTPγS or β-Arrestin or activity for both GTPγS and β-Arrestin. Secondary targets could include, but not limited to, the enzyme inducible nitric oxide synthase (iNOS) or adenosine monophosphate kinase (AMPK), as suggested by findings that inhibition of iNOS or activation of AMPK improves insulin resistance, and reduces fibrosis and inflammation. The rights pursued claim compounds, pharmaceutical compositions, and methods of use.

Potential Commercial Applications

- Pharmaceuticals
- Cancer therapy
- Anti-fibrotic therapy
- Inflammatory and autoimmune disease

Development Stage

- Early stage

Inventors: Malliga R. Iyer, Ph.D.; Pinaki Bhattacharjee, Ph.D.; Resat Cinar, PharmD, MBA; George Kunos, M.D., Ph.D.; Szabolcs Dvoracsko Ph.D., (all of NIAAA).

Intellectual Property: HHS Reference No. E–189–2021–0; U.S. Provisional Patent Application No. 63/319,642 filed March 14, 2022; International Patent Application PCT/U2023/014846 filed March 8, 2023.

Licensing Contact: Michael Shmilovich; 301–435–5019; *michael.shmilovich@nih.gov*.

This notice is in accordance with 35 U.S.C. 209 and 37 CFR part 404 to achieve expeditious commercialization of results of federally-funded research and development.

Dated: June 23, 2023.

Michael A. Shmilovich,

Senior Licensing and Patenting Manager, National Heart, Lung, and Blood Institute, Office of Technology Transfer and Development.

National Heart, Lung, and Blood Institute; Notice of Closed Meeting

Pursuant to section 1009 of the Federal Advisory Committee Act, as amended, notice is hereby given of the following meeting.

The meeting will be closed to the public in accordance with the provisions set forth in sections 552b(c)(4) and 552b(c)(6), Title 5 U.S.C., as amended. The grant applications and the discussions could disclose confidential trade secrets or commercial property such as patentable material, and personal information concerning individuals associated with the grant applications, the disclosure of which would constitute a clearly unwarranted invasion of personal privacy.

Name of Committee: National Heart, Lung, and Blood Institute Special Emphasis Panel; Clinical Trials SEP (UG3, U24).

Date: July 27, 2023.

Time: 2:00 p.m. to 6:00 p.m.

Agenda: To review and evaluate grant applications.

Place: National Institutes of Health, Rockledge I, 6705 Rockledge Drive, Bethesda, MD 20892 (Virtual Meeting).

Contact Person: Zhihong Shan, Ph.D., MD, Scientific Review Officer, Office of Scientific Review/DERA, National Heart, Lung, and Blood Institute, National Institutes of Health, 6705 Rockledge Drive, Room 205–J, Bethesda, MD 20892, (301) 827–7085, *zhihong.shan@nih.gov*.

DEPARTMENT OF HEALTH AND HUMAN SERVICES

Substance Abuse and Mental Health Services Administration

Agency Information Collection Activities: Submission for OMB Review; Comment Request

Periodically, the Substance Abuse and Mental Health Services Administration (SAMHSA) will publish a summary of information collection requests under OMB review, in compliance with the Paperwork Reduction Act (44 U.S.C. Chapter 35). To request a copy of these documents, call the SAMHSA Reports Clearance Officer on (240) 276–0361.

Project: SAMHSA Generic Clearance for Grant Program Monitoring Activities

To carry out OMB Circular A–102 [1] and 2 CFR part 215.51,[2] SAMHSA must collect grant program information necessary to ensure compliance with Federal and programmatic requirements. The Generic Clearance for Grant Program Monitoring Activities allows SAMHSA to collect standardized information from its grant recipients necessary to perform agency program oversight activities such as monitoring progress on recipient activities and determining and responding to

[1] Circular A–102: *https://www.whitehouse.gov/wp-content/uploads/legacy_drupal_files/omb/circulars/A102/a102.pdf.*

[2] 2 CFR part 215.51: *https://www.govinfo.gov/content/pkg/CFR-2012-title2-vol1/pdf/CFR-2012-title2-vol1-subtitleA.pdf.*

recipient's training and technical assistance (T/TA) needs. SAMHSA currently manages grant programs that provide prevention, treatment, recovery support services, and T/TA for substance use treatment and mental health providers along the continuum of care including prevention, harm reduction, treatment, and recovery.

SAMHSA's grant recipients are currently required to submit various types of performance reports in accordance with their individual program requirements. The data collections will be designed to standardize program monitoring and performance reports of SAMHSA's grants. Program offices will use information collected under this generic clearance to monitor funding recipient activities and to provide support or take appropriate action, as needed.

A generic clearance would provide SAMHSA's program offices the flexibility to create and use tailored information collection templates based on current program reporting requirements. This is important to allow for SAMHSA's:

- Monitoring of compliance with federal practice, guidelines, and requirements,
- Oversight of the implementation of the scope of the grant activities with the grant recipients' proposed project,
- Assessment of the efficiency and efficacy of recipient activities,
- Quick understanding of and remediation to national, regional, and/or site-specific issues,
- Provision of additional support and technical assistance, as needed,
- Documentation of promising practices, innovative services, and program strengths, and
- Flexible and responsive oversight of federal funds.

A variety of performance reports will be used for collection. Program offices will use information collected under this generic clearance to monitor funding recipient activities and to provide support or take appropriate action, as needed.

A variety of instruments and platforms will be used to collect information from respondents. The annual burden hours requested (180,000) are based on the number of collections we expect to conduct over the requested period for this clearance.

The estimated annual hour burden is as follows:

Type of respondent	Number of respondents	Responses per respondent	Total responses	Hours per response	Total annual burden hours	Hourly wage cost	Total hour cost
Progress Report Template (Annual)	4,000	1	4,000	8	32,000	$26	$832,000
Progress Report (Interim)	2,500	2	5,000	6	30,000	26	780,000
Grant Closeouts	1,000	1	1,000	10	10,000	26	260,000
Site Visit Report Template	4,000	1	4,000	6	24,000	26	624,000
Other	4,000	1	4,000	6	24,000	26	624,000
Total	20,000	.....	28,000	.....	180,000	.....	3,120,000

Written comments and recommendations for the proposed information collection should be sent within 30 days of publication of this notice to *www.reginfo.gov/public/do/PRAMain.* Find this information collection by selecting ''Currently under 30-day Review—Open for Public Comments'' or by using the search function.

Alicia Broadus,

Public Health Advisor.

BILLING CODE 4162–20–P

DEPARTMENT OF HOMELAND SECURITY

U.S. Citizenship and Immigration Services

[OMB Control Number 1615–0092]

Agency Information Collection Activities; Revision of a Currently Approved Collection: E-Verify Program

AGENCY: U.S. Citizenship and Immigration Services, Department of Homeland Security.

ACTION: 60-Day notice.

SUMMARY: The Department of Homeland Security (DHS), U.S. Citizenship and Immigration Services (USCIS) invites the general public and other Federal agencies to comment upon this proposed revision of a currently approved collection of information. In accordance with the Paperwork Reduction Act (PRA) of 1995, the information collection notice is published in the **Federal Register** to obtain comments regarding the nature of the information collection, the categories of respondents, the estimated burden (*i.e.,* the time, effort, and resources used by the respondents to respond), the estimated cost to the respondent, and the actual information collection instruments.

DATES: Comments are encouraged and will be accepted for 60 days until August 28, 2023.

ADDRESSES: All submissions received must include the OMB Control Number 1615–0092 in the body of the letter, the agency name and Docket ID USCIS–2007–0023. Submit comments via the Federal eRulemaking Portal website at *https://www.regulations.gov* under e-Docket ID number USCIS–2007–0023.

FOR FURTHER INFORMATION CONTACT: USCIS, Office of Policy and Strategy, Regulatory Coordination Division, Samantha Deshommes, Chief, telephone number (240) 721–3000 (This is not a toll-free number. Comments are not accepted via telephone message). Please note contact information provided here is solely for questions regarding this notice. It is not for individual case status inquiries. Applicants seeking information about the status of their individual cases can check Case Status Online, available at the USCIS website at *https://www.uscis.gov,* or call the USCIS Contact Center at 800–375–5283 (TTY 800–767–1833).

SUPPLEMENTARY INFORMATION:

Comments

You may access the information collection instrument with instructions or additional information by visiting the Federal eRulemaking Portal site at: *https://www.regulations.gov* and entering USCIS–2007–0023 in the search box. All submissions will be posted, without change, to the Federal eRulemaking Portal at *https://www.regulations.gov,* and will include any personal information you provide. Therefore, submitting this information makes it public. You may wish to consider limiting the amount of personal information that you provide in any voluntary submission you make to DHS. DHS may withhold information provided in comments from public viewing that it determines may impact the privacy of an individual or is offensive. For additional information, please read the Privacy Act notice that

is available via the link in the footer of *https://www.regulations.gov.*

Written comments and suggestions from the public and affected agencies should address one or more of the following four points:

(1) Evaluate whether the proposed collection of information is necessary for the proper performance of the functions of the agency, including whether the information will have practical utility;

(2) Evaluate the accuracy of the agency's estimate of the burden of the proposed collection of information, including the validity of the methodology and assumptions used;

(3) Enhance the quality, utility, and clarity of the information to be collected; and

(4) Minimize the burden of the collection of information on those who are to respond, including through the use of appropriate automated, electronic, mechanical, or other technological collection techniques or other forms of information technology, *e.g.,* permitting electronic submission of responses.

Overview of This Information Collection

(1) *Type of Information Collection:* Revision of a Currently Approved Collection.

(2) *Title of the Form/Collection:* E-Verify Program.

(3) *Agency form number, if any, and the applicable component of the DHS sponsoring the collection:* No Agency Form Number; USCIS.

(4) *Affected public who will be asked or required to respond, as well as a brief abstract: Primary:* Business or other for-profit. E-Verify is a web-based system which allows employers to electronically confirm the employment eligibility of newly hired employees.

(5) *An estimate of the total number of respondents and the amount of time estimated for an average respondent to respond:* The estimated total number of respondents for the information collection E-Verify Program for New Users Entry (Employer Enrollment) is 66,330 and the estimated hour burden per response is 2.26 hours; the estimated total number of respondents for the information collection E-Verify Program for New User Training is 66,330 and the estimated hour burden per responses is 1 hour; the estimated total number of respondents for the information collection E-Verify Program for Existing User Annual Training is 358,670 and the estimated hour burden per responses is 0.5 hours; the estimated total number of respondents for the information collection E-Verify Program for Queries and Initial Cases is 235,985 and the estimated hour burden per responses is 0.121 hours.

(6) *An estimate of the total public burden (in hours) associated with the collection:* The total estimated annual hour burden associated with this collection is 1,966,051 hours.

(7) *An estimate of the total public burden (in cost) associated with the collection:* The estimated total annual cost burden associated with this collection of information is $1,887,000.

Dated: June 23, 2023.

Samantha L. Deshommes,

Chief, Regulatory Coordination Division, Office of Policy and Strategy, U.S. Citizenship and Immigration Services, Department of Homeland Security.

[FR Doc. 2023–13794 Filed 6–28–23; 8:45 am]

Written comments and suggestions from the public and affected agencies should address one or more of the following four points:

(1) Evaluate whether the proposed collection of information is necessary for the proper performance of the functions of the agency, including whether the information will have practical utility;

(2) Evaluate the accuracy of the agency's estimate of the burden of the proposed collection of information, including the validity of the methodology and assumptions used;

(3) Enhance the quality, utility, and clarity of the information to be collected; and

(4) Minimize the burden of the collection of information on those who are to respond, including through the use of appropriate automated,

electronic, mechanical, or other technological collection techniques or other forms of information technology, *e.g.,* permitting electronic submission of responses.

Overview of This Information Collection

(1) *Type of Information Collection:* Revision of a Currently Approved Collection.

(2) *Title of the Form/Collection:* Employment Eligibility Verification.

(3) *Agency form number, if any, and the applicable component of the DHS sponsoring the collection:* Form I–9; USCIS.

(4) *Affected public who will be asked or required to respond, as well as a brief abstract: Primary:* Individuals or households; Business or other for-profit; Not-for-profit institutions. The Form I–9 was developed to facilitate compliance with Section 274A of the Immigration and Nationality Act, as amended by the Immigration Reform and Control Act of 1986, making employment of unauthorized aliens unlawful and diminishing the flow of illegal workers in the United States.

(5) *An estimate of the total number of respondents and the amount of time estimated for an average respondent to respond:* The estimated total number of respondents for the information collection I–9 Employers is 62,063,950 and the estimated hour burden per response is 0.35 hours; the estimated total number of respondents for the information collection I–9 Employees is 62,063,950 and the estimated hour burden per response is 0.15 hours; the estimated total number of respondents for the information collection by Record Keeping is 27,200,000 and the estimated hour burden per response is 0.17 hours.

(6) *An estimate of the total public burden (in hours) associated with the collection:* The total estimated annual hour burden associated with this collection is 35,655,976 hours.

(7) *An estimate of the total public burden (in cost) associated with the collection:* The estimated total annual cost burden associated with this collection of information is $0. Any requirements to support the verification process are already available through other approved collections of information that may be employment related or occur as a part of the hiring process. There is no submission to USCIS of materials which eliminates mailing and photocopying costs.

Dated: June 23, 2023.

Comments are not accepted via telephone message). Please note contact information provided here is solely for questions regarding this notice. It is not for individual case status inquiries. Applicants seeking information about the status of their individual cases can check Case Status Online, available at the USCIS website at *https://www.uscis.gov,* or call the USCIS Contact Center at 800–375–5283 (TTY 800–767–1833).

SUPPLEMENTARY INFORMATION:

Background

With this demonstration project, called ''E-Verify NextGen,'' USCIS intends to further integrate the Form I–9, Employment Eligibility Verification, process with the E-Verify electronic employment eligibility confirmation process to create a more secure and less burdensome employment eligibility verification process overall for employees and employers. This integrated internet-based project will permit employees to create their own secure account, resolve E-Verify tentative non-confirmations (also referred to as ''mismatches'') in advance and directly with the government, instead of through their employer, and then receive an electronic verification response that they can use and update with subsequent employers.

The current employment eligibility verification process relies on employer participation to ensure both employees and employers correctly enter information on the Form I–9 and then subsequently transfer that information into the E-Verify system. This employer intervention with employee-related information is less secure and sometimes results in data entry errors with the cases created in E-Verify. These cases can result in E-Verify mismatches that may require additional actions by the employer, the employee, the Social Security Administration, and DHS, to complete an employment eligibility verification. The burden of initiating this resolution process currently falls mostly on employers. If an employer does not correctly follow the E-Verify steps needed to communicate the mismatch resolution processes to employees, including failing to notify the employee of the mismatch, the employees and the government have difficulty resolving the mismatch, and the employees and employers may not receive timely and appropriate confirmation of their employment eligibility. Employees who are not notified of their mismatch may not have an opportunity to resolve it and can face termination if their E-Verify case results in a final nonconfirmation.

The goal of E-Verify NextGen is to streamline the employment eligibility verification and confirmation process for employers and employees by:

- Resolving E-Verify mismatches and electronically issuing an employment authorized result to individuals who E-Verify finds to be work authorized, which will expedite future E-Verify

checks and make an employee's employment eligibility verification easier for future employment.

• Giving employees more direct control over their data privacy and a more direct stake in their employment eligibility verification process by creating a secure, individual account for employment eligibility verification. This better protects personally identifiable information and helps improve data accuracy.

• Allowing employees to receive notification of and resolve E-Verify mismatches directly with the government without requiring the employer to be an intermediary to print and distribute forms, which is a more secure and private process that can speed up case resolution.

• Removing the employer's primary role in the mismatch resolution process. While employers would be informed about their employee's mismatch, this process removes employers as the intermediary to communicate a mismatch to the employee, as affected employees are instead notified directly and provided the instructions required to resolve the mismatch.

The demonstration project will be built upon the existing USCIS and E-Verify web services capabilities and will be enhanced by two electronic applications for the employee and employer, respectively, each of which will have its own terms of service. USCIS will conduct detailed internal assessments of the demonstration project and intends to provide necessary reports and briefings on the project status as required by law. USCIS now welcomes comments to the proposed collection of information associated with these new functionalities.

Comments

You may access the information collection instrument with instructions or additional information by visiting the Federal eRulemaking Portal site at: *https://www.regulations.gov* and entering USCIS–2023–0011 in the search box. All submissions will be posted, without change, to the Federal eRulemaking Portal at *https://www.regulations.gov,* and will include any personal information you provide. Therefore, submitting this information makes it public. You may wish to consider limiting the amount of personal information that you provide in any voluntary submission you make to DHS. DHS may withhold information provided in comments from public viewing that it determines may impact the privacy of an individual or is offensive. For additional information, please read the Privacy Act notice that is available via the link in the footer of *https://www.regulations.gov*.

Written comments and suggestions from the public and affected agencies should address one or more of the following four points:

(1) Evaluate whether the proposed collection of information is necessary for the proper performance of the functions of the agency, including whether the information will have practical utility;

(2) Evaluate the accuracy of the agency's estimate of the burden of the proposed collection of information, including the validity of the methodology and assumptions used;

(3) Enhance the quality, utility, and clarity of the information to be collected; and

(4) Minimize the burden of the collection of information on those who are to respond, including through the use of appropriate automated, electronic, mechanical, or other technological collection techniques or other forms of information technology, *e.g.,* permitting electronic submission of responses.

Overview of This Information Collection

(1) *Type of Information Collection:* New Collection.

(2) *Title of the Form/Collection:* E-Verify NextGen.

(3) *Agency form number, if any, and the applicable component of the DHS sponsoring the collection:* I–9NG; USCIS.

(4) *Affected public who will be asked or required to respond, as well as a brief abstract: Primary:* Individuals or households; Business or other for-profit; Not-for-profit institutions. E-Verify NextGen, I–9NG, was developed as a demonstration project to further integrate the Form I–9, Employment Eligibility Verification, process with the E-Verify electronic employment eligibility confirmation process to create a more secure and less burdensome employment eligibility verification process overall for employees and employers.

(5) *An estimate of the total number of respondents and the amount of time estimated for an average respondent to respond:* The estimated total number of respondents for the information collection I–9NG Employers, Recruiters and Referrers for a fee, and State Employment Agencies is 189,015 and the estimated hour burden per response is 0.05 hours; the estimated total number of respondents for the information collection I–9NG Employees (New User Account Creation) is 11,668,584 and the estimated burden per response is 0.17 hours; the estimated total number of respondents for the information collection I–9NG Employees (Employment Eligibility Verification, Form I–9NG) is 13,231,050 and the estimated burden per response is 0.08 hours; the estimated total number of respondents for the information collection by Record Keeping and Audits is 13,248,648 and the estimated burden per response is 0.17 hours.

(6) *An estimate of the total public burden (in hours) associated with the collection:* The total estimated annual hour burden associated with this collection is 5,955,966 hours.

(7) *An estimate of the total public burden (in cost) associated with the collection:* The estimated total annual cost burden associated with this collection of information is $0. This is a voluntary program. Any requirements to support the verification process are already available through other approved collections of information that may be employment related or occur as a part of the hiring process.

Dated: June 23, 2023.

Samantha L. Deshommes,

Chief, Regulatory Coordination Division, Office of Policy and Strategy, U.S. Citizenship and Immigration Services, Department of Homeland Security.

[FR Doc. 2023–13786 Filed 6–28–23; 8:45 am]

BILLING CODE 9111–97–P

DEPARTMENT OF HOMELAND SECURITY

U.S. Citizenship and Immigration Services

[OMB Control Number 1615–0075]

Agency Information Collection Activities; Extension, Without Change, of a Currently Approved Collection: I–864, Affidavit of Support Under Section 213A of the INA; I–864A, Contract Between Sponsor and Household Member; I–864EZ, Affidavit of Support Under Section 213A of the INA; I–864W, Request for Exemption for Intending Immigrant's Affidavit of Support

AGENCY: U.S. Citizenship and Immigration Services, Department of Homeland Security.

ACTION: 60-Day notice.

SUMMARY: U.S. Citizenship and Immigration Services (USCIS), Department of Homeland Security (DHS), invites the general public and other Federal agencies to comment upon this proposed extension of a currently approved collection of information. In

accordance with the Paperwork Reduction Act (PRA) of 1995, the information collection notice is published in the **Federal Register** to obtain comments regarding the nature of the information collection, the categories of respondents, the estimated burden (*i.e.,* the time, effort, and resources used by the respondents to respond), the estimated cost to the respondent, and the actual information collection instruments.

DATES: Comments are encouraged and will be accepted for 60 days until August 28, 2023.

ADDRESSES: All submissions received must include the OMB Control Number 1615–0075 in the body of the letter, the agency name and Docket ID USCIS–2007–0029. Submit comments via the Federal eRulemaking Portal website at *https://www.regulations.gov* under e-Docket ID number USCIS–2007–0029.

FOR FURTHER INFORMATION CONTACT: USCIS, Office of Policy and Strategy, Regulatory Coordination Division, Samantha Deshommes, Chief, telephone number (240) 721–3000 (This is not a toll-free number. Comments are not accepted via telephone message). Please note contact information provided here is solely for questions regarding this notice. It is not for individual case status inquiries. Applicants seeking information about the status of their individual cases can check Case Status Online, available at the USCIS website at *https://www.uscis.gov,* or call the USCIS Contact Center at 800–375–5283 (TTY 800–767–1833).

SUPPLEMENTARY INFORMATION:

Comments

You may access the information collection instrument with instructions or additional information by visiting the Federal eRulemaking Portal site at: *https://www.regulations.gov* and entering USCIS–2007–0029 in the search box. All submissions will be posted, without change, to the Federal eRulemaking Portal at *https://www.regulations.gov,* and will include any personal information you provide. Therefore, submitting this information makes it public. You may wish to consider limiting the amount of personal information that you provide in any voluntary submission you make to DHS. DHS may withhold information provided in comments from public viewing that it determines may impact the privacy of an individual or is offensive. For additional information, please read the Privacy Act notice that is available via the link in the footer of *https://www.regulations.gov.*

Written comments and suggestions from the public and affected agencies should address one or more of the following four points:

(1) Evaluate whether the proposed collection of information is necessary for the proper performance of the functions of the agency, including whether the information will have practical utility;

(2) Evaluate the accuracy of the agency's estimate of the burden of the proposed collection of information, including the validity of the methodology and assumptions used;

(3) Enhance the quality, utility, and clarity of the information to be collected; and

(4) Minimize the burden of the collection of information on those who are to respond, including through the use of appropriate automated, electronic, mechanical, or other technological collection techniques or other forms of information technology, *e.g.,* permitting electronic submission of responses.

Overview of This Information Collection

(1) Type of Information Collection: Extension, Without Change, of a Currently Approved Collection.

(2) Title of the Form/Collection: I–864, Affidavit of Support Under Section 213A of the INA; I–864A, Contract Between Sponsor and Household Member; I–864EZ, Affidavit of Support Under Section 213A of the INA; I–864W, Request for Exemption for Intending Immigrant's Affidavit of Support.

(3) Agency form number, if any, and the applicable component of the DHS sponsoring the collection: I–864; I–864A; I–864EZ; I–864W; USCIS.

(4) Affected public who will be asked or required to respond, as well as a brief abstract: Primary: Individuals or households. USCIS uses the data collected on Form I–864 to determine whether the sponsor has the ability to support the sponsored immigrant under section 213A of the Immigration and Nationality Act. This form standardizes evaluation of a sponsor's ability to support the sponsored immigrant and ensures that basic information required to assess eligibility is provided by sponsors.

Form I–864A is a contract between the sponsor and the sponsor's household members. It is only required if the sponsor used income of their household members to reach the required 125 percent of the Federal poverty guidelines. The contract holds these household members jointly and severally liable for the support of the sponsored immigrant. The information collection required on Form I–864A is necessary for public benefit agencies to enforce the Affidavit of Support in the event the sponsor used income of their household members to reach the required income level and the public benefit agencies are requesting reimbursement from the sponsor.

USCIS uses Form I–864EZ in exactly the same way as Form I–864; however, USCIS collects less information from the sponsors as less information is needed from those who qualify in order to make a thorough adjudication.

USCIS uses Form I–864W to determine whether the intending immigrant meets the criteria for exemption from section 213A requirements. This form collects the immigrant's basic information, such as name and address, the reason for the exemption, and accompanying documentation in support of the immigrant's claim that they are not subject to section 213.

(5) An estimate of the total number of respondents and the amount of time estimated for an average respondent to respond: The estimated total number of respondents for the information collection Form I–864 is 453,345 and the estimated hour burden per response is 6 hours; the estimated total number of respondents for the information collection Form I–864A is 215,800 and the estimated hour burden per response is 1.75 hours; the estimated total number of respondents for the information collection Form I–864EZ is 100,000 and the estimated hour burden per response is 2.5 hours; the estimated total number of respondents for the information collection Form I–864W is 98,119 and the estimated hour burden per response is 1 hour.

(6) An estimate of the total public burden (in hours) associated with the collection: The total estimated annual hour burden associated with this collection is 3,445,839 hours.

(7) An estimate of the total public burden (in cost) associated with the collection: The estimated total annual cost burden associated with this collection of information is $159,608,680.

Dated: June 23, 2023.

Samantha L. Deshommes,

Chief, Regulatory Coordination Division, Office of Policy and Strategy, U.S. Citizenship and Immigration Services, Department of Homeland Security.

[FR Doc. 2023–13801 Filed 6–28–23; 8:45 am]

BILLING CODE 9111–97–P

DEPARTMENT OF HOUSING AND URBAN DEVELOPMENT

[Docket No. FR–7070–N 35]

30-Day Notice of Proposed Information Collection: Housing Counseling Notice of Funding Opportunity (NOFO) OMB Control No.: 2502–0621

AGENCY: Office of Policy Development and Research, Chief Data Officer, HUD.

ACTION: Notice.

SUMMARY: HUD is seeking approval from the Office of Management and Budget (OMB) for the information collection described below. In accordance with the Paperwork Reduction Act, HUD is requesting comment from all interested parties on the proposed collection of information. The purpose of this notice is to allow for an additional 30 days of public comment.

DATES: *Comments Due Date:* July 31, 2023.

ADDRESSES: Interested persons are invited to submit comments regarding this proposal. Written comments and recommendations for the proposed information collection should be sent within 30 days of publication of this notice to *OIRA_submission@omb.eop.gov* or *www.reginfo.gov/public/do/PRAMain.* Find this particular information collection by selecting ''Currently under 30-day Review—Open for Public Comments'' or by using the search function.

FOR FURTHER INFORMATION CONTACT: Colette Pollard, Reports Management Officer, REE, Department of Housing and Urban Development, 451 7th Street SW, Washington, DC 20410; email Colette Pollard at *Colette.Pollard@hud.gov* or telephone 202–402–3400. This is not a toll-free number. HUD welcomes and is prepared to receive calls from individuals who are deaf or hard of hearing, as well as individuals with speech and communication disabilities. To learn more about how to make an accessible telephone call, please visit: *https://www.fcc.gov/consumers/guides/telecommunications-relay-service-trs.*

Copies of available documents submitted to OMB may be obtained from Ms. Pollard.

SUPPLEMENTARY INFORMATION: This notice informs the public that HUD is seeking approval from OMB for the information collection described in Section A.

The **Federal Register** notice that solicited public comment on the information collection for a period of 60 days was published on March 21, 2023, at 87 FR 17000.

A. Overview of Information Collection

Title of Information Collection: Housing Counseling Notice of Funding Opportunity (NOFO).

OMB Approval Number: 2502–0621.

OMB Expiration Date: June 30, 2023.

Type of Request: Revision of a currently approved collection.

Form Numbers: HUD–9906–L; HUD–9906–P; NOFO 9906 Charts (A, B, E); HUD 424–CB; HUD–2880; SF–424; SF–LLL.

Description of the need for the information and proposed use: This is a revision of the collection because minor and clarifying revisions were made to the Form 9906 and its supplemental charts. This information is collected in connection with HUD's Housing Counseling Program and will be used by HUD to determine that the Housing Counseling grant applicant meets the requirements of the Notice of Funding Opportunity (NOFO). Information collected is also used to assign points for awarding grant funds on a competitive and equitable basis. HUD's Office of Housing Counseling will also use the information to provide housing counseling services through private or public organizations with special competence and knowledge in counseling low and moderate-income families. The information is collected from housing counseling agencies that participate in HUD's Housing Counseling Program. The information is collected via the Form 9906 (grant application chart) and its supplemental charts.

Respondents: Not-for-profit institutions; State, Local or Tribal government.

Estimated Number of Respondents: 300.

Estimated Number of Responses: 300.

Frequency of Response: 1.

Average Hours per Response: 40.

Total Estimated Burden: 12,000.

B. Solicitation of Public Comment

This notice is soliciting comments from members of the public and affected parties concerning the collection of information described in Section A on the following:

(1) Whether the proposed collection of information is necessary for the proper performance of the functions of the agency, including whether the information will have practical utility;

(2) The accuracy of the agency's estimate of the burden of the proposed collection of information;

(3) Ways to enhance the quality, utility, and clarity of the information to be collected; and

(4) Ways to minimize the burden of the collection of information on those who are to respond; including through the use of appropriate automated collection techniques or other forms of information technology, *e.g.,* permitting electronic submission of responses.

(5) Ways to minimize the burden of the collection of information on those who are to respond, including the use of automated collection techniques or other forms of information technology.

HUD encourages interested parties to submit comment in response to these questions.

C. Authority

Section 3507 of the Paperwork Reduction Act of 1995, 44 U.S.C. chapter 35.

Colette Pollard,

Department Reports Management Officer, Office of Policy Development and Research, Chief Data Officer.

DEPARTMENT OF THE INTERIOR

National Park Service

[NPS–WASO–NAGPRA–NPS0036096; PPWOCRADN0–PCU00RP14.R50000]

Notice of Inventory Completion: Beloit College, Logan Museum of Anthropology, Beloit, WI

AGENCY: National Park Service, Interior.

ACTION: Notice.

SUMMARY: In accordance with the Native American Graves Protection and Repatriation Act (NAGPRA), Beloit College, Logan Museum of Anthropology (LMA) has completed an inventory of human remains and has determined that there is a cultural affiliation between the human remains and Indian Tribes or Native Hawaiian organizations in this notice. The human remains were removed from Yell County, AR.

DATES: Repatriation of the human remains in this notice may occur on or after July 31, 2023.

ADDRESSES: Nicolette B. Meister, Logan Museum of Anthropology, 700 College Street, Beloit, WI 53511, telephone (608) 363–2305, email *meistern@beloit.edu.*

SUPPLEMENTARY INFORMATION: This notice is published as part of the National Park Service's administrative responsibilities under NAGPRA. The determinations in this notice are the sole responsibility of the LMA. The National Park Service is not responsible for the determinations in this notice. Additional information on the determinations in this notice, including

the results of consultation, can be found in the inventory or related records held by the LMA.

Description

Human remains representing, at minimum, one individual were removed from Havana in Yell County, AR. Sometime between 1915 and 1926, these human remains (catalog number 1872) were purchased by the LMA from Warren K. Moorehead. Moorehead was Curator (1901–1924) and Director (1924–1938) of the Phillips Academy Department of Archaeology. No known individual was identified. No associated funerary objects are present.

Cultural Affiliation

The human remains in this notice are connected to one or more identifiable earlier groups, tribes, peoples, or cultures. There is a relationship of shared group identity between the identifiable earlier groups, tribes, peoples, or cultures and one or more Indian Tribes or Native Hawaiian organizations. The following type of information was used to reasonably trace the relationship: geographical.

Determinations

Pursuant to NAGPRA and its implementing regulations, and after consultation with the appropriate Indian Tribes and Native Hawaiian organizations, the LMA has determined that:

- The human remains described in this notice represent the physical remains of one individual of Native American ancestry.
- There is a relationship of shared group identity that can be reasonably traced between the human remains described in this notice and the Caddo Nation of Oklahoma; Quapaw Nation; and The Osage Nation.

Requests for Repatriation

Written requests for repatriation of the human remains in this notice must be sent to the Responsible Official identified in **ADDRESSES**. Requests for repatriation may be submitted by:

1. Any one or more of the Indian Tribes or Native Hawaiian organizations identified in this notice.

2. Any lineal descendant, Indian Tribe, or Native Hawaiian organization not identified in this notice who shows, by a preponderance of the evidence, that the requestor is a lineal descendant or a culturally affiliated Indian Tribe or Native Hawaiian organization.

Repatriation of the human remains in this notice to a requestor may occur on or after July 31, 2023. If competing requests for repatriation are received, the LMA must determine the most appropriate requestor prior to repatriation. Requests for joint repatriation of the human remains are considered a single request and not competing requests. The LMA is responsible for sending a copy of this notice to the Indian Tribes identified in this notice.

Authority: Native American Graves Protection and Repatriation Act, 25 U.S.C. 3003, and the implementing regulations, 43 CFR 10.9, 10.10, and 10.14.

Dated: June 21, 2023.

Melanie O'Brien,

Manager, National NAGPRA Program.

DEPARTMENT OF THE INTERIOR

National Park Service

[NPS–WASO–NAGPRA–NPS0036095; PPWOCRADN0–PCU00RP14.R50000]

Notice of Inventory Completion: Beloit College, Logan Museum of Anthropology, Beloit, WI

AGENCY: National Park Service, Interior.

ACTION: Notice.

SUMMARY: In accordance with the Native American Graves Protection and Repatriation Act (NAGPRA), the Beloit College, Logan Museum of Anthropology (LMA) has completed an inventory of human remains and an associated funerary object and has determined that there is no cultural affiliation between the human remains and associated funerary object and any Indian Tribe. The human remains and associated funerary object were removed from Logan County, Kentucky.

DATES: Disposition of the human remains and associated funerary object in this notice may occur on or after July 31, 2023.

ADDRESSES: Nicolette B. Meister, Logan Museum of Anthropology, 700 College Street, Beloit, WI 53511, telephone (608) 363–2305, email *meistern@beloit.edu.*

SUPPLEMENTARY INFORMATION: This notice is published as part of the National Park Service's administrative responsibilities under NAGPRA. The determinations in this notice are the sole responsibility of the LMA. The National Park Service is not responsible for the determinations in this notice. Additional information on the determinations in this notice, including the results of consultation, can be found in the inventory or related records held by the LMA.

Description

Human remains representing, at minimum, five individuals were removed from mounds in Lewisburg in Logan County, KY. These human remains (lot numbers 1851; 1852; 1853; 1854; 1855; 1856; 1857; 1858; 1859; 1860; 1861) were purchased from Warren K. Moorehead in 1926. Moorehead was Curator (1901–1924) and Director (1924–1938) of the Phillips Academy Department of Archaeology. Lot 1860 is currently missing. No known individuals were identified. The one associated funerary object (15488) is a plainware jar removed from a mound in Lewisburg in Logan County, KY.

Aboriginal Land

The human remains and associated funerary object in this notice were removed from known geographic locations. These locations are the aboriginal lands of one or more Indian Tribes. The following information was used to identify the aboriginal land: a final judgment of the Indian Claims Commission or the United States Court of Claims, a treaty, Act of Congress, or Executive Order.

Determinations

Pursuant to NAGPRA and its implementing regulations, and after consultation with the appropriate Indian Tribes, the LMA has determined that:

- The human remains described in this notice represent the physical remains of five individuals of Native American ancestry.
- The one object described in this notice is reasonably believed to have been placed with or near individual human remains at the time of death or later as part of the death rite or ceremony.
- No relationship of shared group identity can be reasonably traced between the human remains and any Indian Tribe.
- The human remains and associated funerary object described in this notice were removed from the aboriginal land of the Absentee-Shawnee Tribe of Indians of Oklahoma; Cherokee Nation; Eastern Band of Cherokee Indians; Eastern Shawnee Tribe of Oklahoma; Miami Tribe of Oklahoma; Quapaw Nation; Shawnee Tribe; The Osage Nation; and the United Keetoowah Band of Cherokee Indians in Oklahoma.

Requests for Disposition

Written requests for disposition of the human remains and associated funerary object in this notice must be sent to the Responsible Official identified in

ADDRESSES. Requests for disposition may be submitted by:

1. Any one or more of the Indian Tribes identified in this notice.

2. Any lineal descendant, Indian Tribe, or Native Hawaiian organization not identified in this notice who shows, by a preponderance of the evidence, that the requestor is a lineal descendant or a culturally affiliated Indian Tribe or Native Hawaiian organization, or who shows that the requestor is an aboriginal land Indian Tribe.

Disposition of the human remains and associated funerary object described in this notice to a requestor may occur on or after July 31, 2023. If competing requests for disposition are received, the LMA must determine the most appropriate requestor prior to disposition. Requests for joint disposition of the human remains and associated funerary object are considered a single request and not competing requests. The LMA is responsible for sending a copy of this notice to the Indian Tribes identified in this notice.

Authority: Native American Graves Protection and Repatriation Act, 25 U.S.C. 3003, and the implementing regulations, 43 CFR 10.9 and 10.11.

Dated: June 21, 2023.

Notice of Inventory Completion: The Filson Historical Society, Louisville, KY

AGENCY: National Park Service, Interior.

ACTION: Notice.

SUMMARY: In accordance with the Native American Graves Protection and Repatriation Act (NAGPRA), the Filson Historical Society has completed an inventory of human remains and has determined that there is no cultural affiliation between the human remains and any Indian Tribe. The human remains were removed from Muhlenberg County, KY.

DATES: Disposition of the human remains in this notice may occur on or after July 31, 2023.

ADDRESSES: Kelly Hyberger, The Filson Historical Society, 1310 South 3rd Street, Louisville, KY 40208, telephone (502) 635–5083, email *khyberger@filsonhistorical.org.*

SUPPLEMENTARY INFORMATION: This notice is published as part of the National Park Service's administrative responsibilities under NAGPRA. The determinations in this notice are the sole responsibility of the Filson Historical Society. The National Park Service is not responsible for the determinations in this notice. Additional information on the determinations in this notice, including the results of consultation, can be found in the inventory or related records held by the Filson Historical Society.

Description

Human remains representing, at minimum, two individuals were removed from Muhlenberg County, KY. Sometime around 1910, Otto A. Rothert collected these human remains from site 15Mu3, a mound south of the town of Greenville and near Buckner's Stack, in Muhlenberg County, KY. In 1929, Rothert donated these human remains to the Filson Historical Society. No known individuals were identified. No associated funerary objects are present.

Aboriginal Land

The human remains in this notice were removed from known geographic locations. These locations are the aboriginal lands of one or more Indian Tribes. The following information was used to identify the aboriginal land: a treaty.

Determinations

Pursuant to NAGPRA and its implementing regulations, and after consultation with the appropriate Indian Tribes, the Filson Historical Society has determined that:

- The human remains described in this notice represent the physical remains of two individuals of Native American ancestry.
- No relationship of shared group identity can be reasonably traced between the human remains and any Indian Tribe.
- The human remains described in this notice were removed from the aboriginal land of the Cherokee Nation; Eastern Band of Cherokee Indians; and the United Keetoowah Band of Cherokee Indians in Oklahoma.

Requests for Disposition

Written requests for disposition of the human remains in this notice must be sent to the Responsible Official identified in **ADDRESSES.** Requests for disposition may be submitted by:

1. Any one or more of the Indian Tribes identified in this notice.

2. Any lineal descendant, Indian Tribe, or Native Hawaiian organization not identified in this notice who shows, by a preponderance of the evidence, that the requestor is a lineal descendant or a culturally affiliated Indian Tribe or Native Hawaiian organization, or who shows that the requestor is an aboriginal land Indian Tribe.

Disposition of the human remains described in this notice to a requestor may occur on or after July 31, 2023. If competing requests for disposition are received, the Filson Historical Society must determine the most appropriate requestor prior to disposition. Requests for joint disposition of the human remains are considered a single request and not competing requests. The Filson Historical Society is responsible for sending a copy of this notice to the Indian Tribes identified in this notice.

Authority: Native American Graves Protection and Repatriation Act, 25 U.S.C. 3003, and the implementing regulations, 43 CFR 10.9 and 10.11.

Notice of Inventory Completion: California State University, Chico, Chico, CA

AGENCY: National Park Service, Interior.

ACTION: Notice.

SUMMARY: In accordance with the Native American Graves Protection and Repatriation Act (NAGPRA), the California State University Chico (CSU Chico) has completed an inventory of human remains and associated funerary objects and has determined that there is a cultural affiliation between the human remains and associated funerary objects and Indian Tribes or Native Hawaiian organizations in this notice. The human remains and associated funerary objects were removed from Butte County, CA.

DATES: Repatriation of the human remains and associated funerary objects in this notice may occur on or after July 31, 2023.

ADDRESSES: Dawn Rewolinski, California State University, Chico, 400 W 1st Street, Chico, CA 95929, telephone (530) 898–3090, email *drewolinski@csuchico.edu.*

SUPPLEMENTARY INFORMATION: This notice is published as part of the National Park Service's administrative responsibilities under NAGPRA. The determinations in this notice are the sole responsibility of CSU Chico The National Park Service is not responsible for the determinations in this notice. Additional information on the determinations in this notice, including the results of consultation, can be found in the inventory or related records held by CSU Chico.

Description

Accession 47

Human remains representing, at minimum, 14 individuals were removed from site CA–BUT–323 in Butte County, CA. This site was first recorded by John R. Sterling in 1962. It was re-recorded by M. Boyton of Chico State College (now CSU Chico) in 1971, by which time it had been nearly destroyed. Collections records indicate that artifacts and human remains were collected by Chico State College in 1971. The 8,800 associated funerary objects are three antler awls, two charcoal samples, 4,655 fragments of debitage, 98 modified faunal elements, 33 modified shells, 182 modified stone tools, nine oversized stone tools, 115 projectile points, 10 soil samples, five clay samples, 3,316 unmodified faunal elements, 220 unmodified shell fragments, and 152 organics.

Accession 48

Human remains representing, at minimum, 67 individuals were removed from the Cana Highway site (CA–BUT–288) in Butte County, CA. This site was first recorded by Dorothy Hill and Keith Johnson in 1966. From 1971 to 1974, it was excavated by a CSU Chico field class supervised by Professor Makato Kowta. The 7,513 associated funerary objects are 13 organics, 3,165 lots consisting of debitage, 948 modified stones, 150 projectile points, 332 unmodified shells, 32 modified shells, 145 ash samples, 246 charcoal samples, 35 soil samples, 386 faunal remains, 97 modified faunal remains, 157 clay samples, and 1,807 pieces of modified clay.

Accession 79

Human remains representing, at minimum, eight individuals were removed from Butte County, CA. In 1974, after four burials were exposed by land levelling operations, these human remains were collected from The Carmen Ranch Site by John Furry, who was likely a student at CSU Chico. The collection has been at CSU Chico since that time. The 18 associated funerary objects are one bone awl, one stone core, 10 modified stones, five unmodified animal bones, and one antler wedge.

Cultural Affiliation

The human remains and associated funerary objects in this notice are connected to one or more identifiable earlier groups, tribes, peoples, or cultures. There is a relationship of shared group identity between the identifiable earlier groups, tribes, peoples, or cultures and one or more Indian Tribes or Native Hawaiian organizations. The following types of information were used to reasonably trace the relationship: anthropological, archeological, historical, and expert opinion.

Determinations

Pursuant to NAGPRA and its implementing regulations, and after consultation with the appropriate Indian Tribes and Native Hawaiian organizations, CSU Chico has determined that:

- The human remains described in this notice represent the physical remains of 89 individuals of Native American ancestry.
- The 16,331 objects described in this notice are reasonably believed to have been placed with or near individual human remains at the time of death or later as part of the death rite or ceremony.
- There is a relationship of shared group identity that can be reasonably traced between the human remains and associated funerary objects described in this notice and the Mechoopda Indian Tribe of Chico Rancheria, California and the Paskenta Band of Nomlaki Indians of California.

Requests for Repatriation

Written requests for repatriation of the human remains and associated funerary objects in this notice must be sent to the Responsible Official identified in **ADDRESSES**. Requests for repatriation may be submitted by:

1. Any one or more of the Indian Tribes or Native Hawaiian organizations identified in this notice.
2. Any lineal descendant, Indian Tribe, or Native Hawaiian organization not identified in this notice who shows, by a preponderance of the evidence, that the requestor is a lineal descendant or a culturally affiliated Indian Tribe or Native Hawaiian organization.

Repatriation of the human remains and associated funerary objects in this notice to a requestor may occur on or after July 31, 2023. If competing requests for repatriation are received, CSU Chico must determine the most appropriate requestor prior to repatriation. Requests for joint repatriation of the human remains and associated funerary objects are considered a single request and not competing requests. CSU Chico is responsible for sending a copy of this notice to the Indian Tribes identified in this notice.

Authority: Native American Graves Protection and Repatriation Act, 25 U.S.C. 3003, and the implementing regulations, 43 CFR 10.9, 10.10, and 10.14.

Dated: June 21, 2023.

ACTION: Notice.

SUMMARY: In accordance with the Native American Graves Protection and Repatriation Act (NAGPRA), the California State University Chico (CSU Chico) has completed an inventory of human remains and associated funerary objects and has determined that there is a cultural affiliation between the human remains and associated funerary objects and Indian Tribes or Native Hawaiian organizations in this notice. The human remains and associated funerary objects were removed from Butte and Glenn Counties, CA.

DATES: Repatriation of the human remains and associated funerary objects in this notice may occur on or after July 31, 2023.

ADDRESSES: Dawn Rewolinski, California State University, Chico, 400 W 1st Street, Chico, CA 95929, telephone (530) 898–3090, email *drewolinski@csuchico.edu.*

SUPPLEMENTARY INFORMATION: This notice is published as part of the National Park Service's administrative responsibilities under NAGPRA. The determinations in this notice are the sole responsibility of CSU Chico. The National Park Service is not responsible for the determinations in this notice. Additional information on the determinations in this notice, including

the results of consultation, can be found in the inventory or related records held by CSU Chico.

Description

CA–BUT–1

Human remains representing, at minimum, 58 individuals were removed from the Patrick site (CA–BUT–1) in Butte County, CA. This site was first recorded in 1947 by T. D. McCown, University of California, Berkeley, for the U.S. Archeological Survey. In 1965 and 1966, excavations at the Patrick site were led by Donald S. Miller, University of California, Los Angeles (UCLA), and Keith R. Johnson, CSU Chico. Between 1966 and 1969, the collection was at UCLA for storage and analysis. At an unknown point, some of the materials and records were moved to CSU Chico. The 874 associated funerary objects are 55 organics, two lots consisting of debitage, two projectile points, 518 fragments of shell, 25 samples of soil, 239 lots consisting of faunal remains, and 33 fragments of ochre.

Accession 4

Human remains representing, at minimum, eight individuals were removed from the Finch site (CA–BUT–12) in Butte County, CA. This site was first recorded by A. Pilling in 1949 and was rerecorded by Dorothy Hill in 1963. In the summer of 1963, Francis Riddell led a Chico State College (now CSU Chico) field class in excavations at the site, and in the spring of 1964, Professor Keith Johnson, accompanied by Riddell, led a second excavation at the site, again with a Chico State College field class. In the summer of 1967, Joseph Chartkoff (then at UCLA) led an excavation at the site (the 1967 collections are not under the control of CSU Chico). In the spring of 1983 and the spring of 1984, Professor Makoto Kowta led a CSU Chico field class in excavations at the site. The 12,302 associated funerary objects are 373 organics, 7,708 lots consisting of debitage, 272 modified stone fragments, 234 projectile points, 160 unmodified shells, 410 modified shell beads, five lots of ash, 196 samples of charcoal, one piece of petrified wood, 56 lots of soil, 2,479 unmodified faunal elements, 370 modified faunal elements, 23 clay fragments, 14 modified clay fragments, and one ochre fragment.

Accession 10

Human remains representing, at minimum, three individuals were removed from the Sycamore Canyon Rock shelter site (CA–BUT–473) in Butte County, CA. This site was first recorded by Keith Johnson and two Chico State College (now CSU Chico) students in 1964, and in 1965, it was excavated by a Chico State College field class led by Keith Johnson. The 251 associated funerary objects are five organics, 17 lots consisting of debitage, 48 modified stone fragments, 57 projectile points, 114 unmodified shell fragments, three modified shell beads, three unmodified faunal elements, and four modified faunal elements.

Accession 19

Human remains representing, at minimum, 66 individuals were removed from the Llano Seco site in Butte County, CA. This site was first recorded in 1965 by G. Yamamoto, and it was rerecorded by Dorothy Hill and Keith Johnson of Chico State College (now CSU Chico) in 1966. From 1966 to 1968, excavations were conducted at the site by Keith Johnson and the Chico State College field school. The 3,498 associated funerary objects are 190 organics, 1,387 lots consisting of debitage, 504 modified stone fragments, 192 projectile points, three unmodified shells, 439 modified shell fragments, two lots of ash, 96 samples of charcoal, one piece of petrified wood, five lots of soil, 525 unmodified faunal elements, 131 modified faunal elements, and 23 clay fragments.

Accession 21

Human remains representing, at minimum, two individuals were removed from the Rock Creek Levee Mound site in Butte, County, CA. This site was first recorded by Dorothy Hill of CSU Chico. She indicated that the site had been partially destroyed by levelling activities and the creation of a cut for a levee. Collections records suggest that cultural items and human remains were collected at that time and no further collection took place. The three associated funerary objects are modified stone fragments.

Accession 25

Human remains representing, at minimum, one individual were removed from the M&T Ranch site (CA–BUT–434) in Butte County, CA. This site was first recorded by Dorothy Hill of Chico State College (now CSU Chico) in 1962 after a burial was found eroding into the Sacramento River. Collections records indicate that the burial and affiliated artifacts were excavated by Dorothy Hill in 1967. The 283 associated funerary objects are 278 modified shell fragments and five modified faunal elements.

Accession 26

Human remains representing, at minimum, one individual were removed from the Chico Rancheria Cemetery site (CA–BUT–574) in Butte County, CA. This site is a historic Mechoopda cemetery that lies within the city of Chico. In 1967, three burials in cedar caskets were exposed when a septic tank was installed. Burials One and Two were heavily disturbed. Collections records indicate that only human remains and affiliated burial objects from Burial One were brought to CSU Chico, where they are currently housed. Some artifacts and human remains from these burials were removed by construction workers, and their current location is unknown. Burial Three was intact and the contents were reburied on site. The 1,667 associated funerary objects are 315 modified shells, 1,350 glass beads, one modified stone, and one coffin fragment.

Accession 32

Human remains representing, at minimum, 147 individuals were removed from the Wurlitzer Ranch site in Butte County, CA. This site was first recorded by Dorothy Hill in 1968, though it had been known to locals for many years. Chico State College field schools archeologically investigated the site from 1969 to 1971. The collection was formally donated to CSU Chico in 1981. The 4,201 associated funerary objects are five organics, 1,590 lots consisting of debitage, 1,660 modified stone fragments, 454 projectile points, six unmodified shell fragments, 76 modified shell fragments, three lots of ash, 19 samples of soil, 230 faunal elements, 76 modified faunal elements, 77 clay fragments, and five ochre fragments.

Accession 33

Human remains representing, at minimum, one individual were removed from the Whiskey Dog site (CA–BUT–300) in Butte County, CA. This site was first recorded in 1969 by CSU Chico under the direction of Chico State College faculty. The 70 associated funerary objects are seven lots consisting of debitage, 27 modified stone fragments, nine projectile points, 19 samples of charcoal, five modified faunal elements, two clay fragments, and one modified clay fragment.

Accessions 40–44

Human remains representing, at minimum, six individuals were removed from the Richardson Springs site (CA–BUT–7) in Butte County, CA. This site was first located and recorded in 1949 by A. R. Pilling and was rerecorded in 1971. In 1970, it was excavated by a joint Chico State College and Queens College, City University of

New York field school. In 1973, Richardson Springs was listed on the National Register of Historic Places under the name Mud Creek Canyon. The 7,777 associated funerary objects are 89 lots of organics, 3,033 lots consisting of debitage, 1,254 modified stone fragments, 347 projectile points, 398 lots consisting of unmodified shell fragments, 163 modified shell fragments, one sample of ash, 443 samples of charcoal, 11 pieces of petrified wood, 132 samples of soil, 1,849 lots consisting of faunal elements, 42 modified faunal elements, 14 clay fragments, and one ochre fragment.

Accession 52

Human remains representing, at minimum, one individual were removed from the Wilson Landing Road site (CA–BUT–529) in Butte County, CA. This site was first identified by Dorothy Hill at an unknown date. In 1971, after reports of a burial removed by a worker discing the site in preparation for planting, it was recorded by Makato Kowta and M. Boyton, at which time cultural items and human remains were collected. The 22 associated funerary objects are four lots consisting of debitage, one oversized stone tool, and 17 modified stones.

Accession 55

Human remains representing, at minimum, 22 individuals were removed from the Ellsworth Whyler site (CA–GLE–101) in Glenn County, CA. This site was first recorded by Keith Johnson of CSU Chico in 1971. In the summer of 1972, it was excavated by a CSU Chico field class under the supervision of Keith Johnson. The 1,348 associated funerary objects are one organic, 160 lots consisting of debitage, 60 modified stone fragments, 54 projectile points, 14 unmodified shell fragments, six modified shell fragments, 23 ash samples, one soil sample, 926 faunal elements, 100 modified faunal elements, and three modified clay fragments.

Accession 68

Human remains representing, at minimum, six individuals were removed from Site CA–GLE–105 in Glenn County, CA. This site was originally recorded by Keith Johnson in 1973. Johnson noted that potentially 50% of the site had already eroded into the Sacramento River. In the Spring of 1973, Keith Johnson and the CSU Chico field class excavated portions of the site. In 1986, the site was determined to be adversely affected by a planned U.S. Army Corps of Engineers Riverbank Stabilization Project. Consequently, in 1987, the Army Corps of Engineers contracted CSU Chico archeologists to further excavate the site to determine its eligibility for the National Register of Historic Places. The 1987 excavations included removal of three burials. The 844 associated funerary objects are eight organics, 391 lots consisting of debitage, 25 modified stones, 12 projectile points, 34 fragments of shell, 63 samples of soil, five samples of charcoal, 293 faunal elements, three modified faunal elements, and 10 pieces of clay.

Accession 123

Human remains representing, at minimum, three individuals were removed from Site CA–BUT–563 in Butte County, CA. This site was excavated by CSU Chico-affiliated archeologists in the spring of 1977 and the collection has been housed at CSU Chico since that time. The 7,495 associated funerary objects are 15 organics, 5,086 lots consisting of debitage, 486 modified stone fragments, 16 projectile points, 308 fragments of shell, six fragments of modified shell, 21 samples of ash, 343 samples of charcoal, four pieces of petrified wood, 70 samples of soil, 1,133 faunal elements, two modified faunal elements, three pieces of clay, and two ochre fragments.

Accession 148

Human remains representing, at minimum, two individuals were removed from Site CA–GLE–19 in Glenn County, CA. This site was first recorded in 1972 while part of the site was eroding into the Sacramento River. In March of 1979, CSU Chico-affiliated archeologists collected human remains and artifacts from that portion of the site exposed by erosion, and between March and September of 1979, they conducted a complete excavation. All excavated materials have been housed at CSU Chico since their removal from the site. The 826 associated funerary objects are 151 lots consisting of debitage, 26 modified stone fragments, 21 modified shell fragments, three samples of charcoal, five pieces of petrified wood, 63 faunal elements, and 557 ochre fragments.

Cultural Affiliation

The human remains and associated funerary objects in this notice are connected to one or more identifiable earlier groups, tribes, peoples, or cultures. There is a relationship of shared group identity between the identifiable earlier groups, tribes, peoples, or cultures and one or more Indian Tribes or Native Hawaiian organizations. The following types of information were used to reasonably trace the relationship: anthropological, archeological, historical, and expert opinion.

Determinations

Pursuant to NAGPRA and its implementing regulations, and after consultation with the appropriate Indian Tribes and Native Hawaiian organizations, CSU Chico has determined that:

- The human remains described in this notice represent the physical remains of 327 individuals of Native American ancestry.
- The 41,461 objects described in this notice are reasonably believed to have been placed with or near individual human remains at the time of death or later as part of the death rite or ceremony.
- There is a relationship of shared group identity that can be reasonably traced between the human remains and associated funerary objects described in this notice and the Mechoopda Indian Tribe of Chico Rancheria, California.

Requests for Repatriation

Written requests for repatriation of the human remains and associated funerary objects in this notice must be sent to the Responsible Official identified in **ADDRESSES**. Requests for repatriation may be submitted by:

1. Any one or more of the Indian Tribes or Native Hawaiian organizations identified in this notice.

2. Any lineal descendant, Indian Tribe, or Native Hawaiian organization not identified in this notice who shows, by a preponderance of the evidence, that the requestor is a lineal descendant or a culturally affiliated Indian Tribe or Native Hawaiian organization.

Repatriation of the human remains and associated funerary objects in this notice to a requestor may occur on or after July 31, 2023. If competing requests for repatriation are received, CSU Chico must determine the most appropriate requestor prior to repatriation. Requests for joint repatriation of the human remains and associated funerary objects are considered a single request and not competing requests. CSU Chico is responsible for sending a copy of this notice to the Indian Tribe identified in this notice.

Authority: Native American Graves Protection and Repatriation Act, 25 U.S.C. 3003, and the implementing regulations, 43 CFR 10.9, 10.10, and 10.14.

Dated: June 21, 2023.

Melanie O'Brien,

Manager, National NAGPRA Program.

BILLING CODE 4312–52–P

DEPARTMENT OF THE INTERIOR

Office of Natural Resources Revenue

[Docket No. ONRR–2011–0008; DS63644000 DRT000000.CH7000 234D1113RT; OMB Control Number 1012–0006]

Agency Information Collection Activities; Suspensions Pending Appeal and Bonding

AGENCY: Office of Natural Resources Revenue, Interior.

ACTION: Notice of information collection; request for comment.

SUMMARY: In accordance with the Paperwork Reduction Act of 1995 (''PRA''), the Office of Natural Resources Revenue (''ONRR'') is proposing to renew an information collection. Through this Information Collection Request renewal (''ICR''), ONRR seeks renewed authority to collect information related to the paperwork requirements necessary to post a bond or other surety, or to demonstrate financial solvency to suspend compliance with an order or to stay the assessment or accrual of civil penalties.

DATES: Submit written comments on or before July 31, 2023.

ADDRESSES: All comment submissions must (1) reference ''OMB Control Number 1012–0006'' in the subject line; (2) be sent to ONRR before the close of the comment period listed under **DATES**; and (3) be sent using the following method:

Electronically via the Federal eRulemaking Portal: Please visit *https://www.regulations.gov.* In the Search Box, enter the Docket ID Number for this ICR renewal (''ONRR–2011–0008'') and click ''search'' to view the publications associated with the docket folder. Locate the document with an open comment period and click the ''Comment Now!'' button. Follow the prompts to submit your comment prior to the close of the comment period.

Docket: To access the docket folder to view the ICR **Federal Register** publications, go to *https://www.regulations.gov* and search ''ONRR–2011–0008'' to view renewal notices recently published in the **Federal Register**, publications associated with prior renewals, and applicable public comments received for this ICR. ONRR will make the comments submitted in response to this notice available for public viewing at *https://www.regulations.gov.*

OMB ICR Data: OMB also maintains information on ICR renewals and approvals. You may access this information at *https://www.reginfo.gov/public/do/PRASearch.* Please use the following instructions: Under the ''OMB Control Number'' heading enter ''1012–0006'' and click the ''Search'' button located at the bottom of the page. To view the ICR renewal or OMB approval status, click on the latest entry (based on the most recent date). On the ''View ICR—OIRA Conclusion'' page, check the box next to ''All'' to display all available ICR information provided by OMB.

FOR FURTHER INFORMATION CONTACT: To request additional information about this ICR, please contact Kimberly Werner, Financial Services, ONRR, by telephone at (303) 231–3801 or email to *Kimberly.Werner@onrr.gov.* Individuals in the United States who are deaf, deafblind, hard of hearing, or have a speech disability may dial 711 (TTY, TDD, or TeleBraille) to access telecommunications relay services. Individuals outside the United States should use the relay services offered within their country to make international calls to the point-of-contact in the United States.

SUPPLEMENTARY INFORMATION: Pursuant to the PRA, 44 U.S.C. 3501, *et seq.,* and 5 CFR 1320.5, all information collections, as defined in 5 CFR 1320.3, require approval by OMB. ONRR may not conduct or sponsor, and you are not required to respond to, a collection of information unless it displays a currently valid OMB control number.

As part of ONRR's continuing effort to reduce paperwork and respondent burdens, ONRR is inviting the public and other Federal agencies to comment on new, proposed, revised, and continuing collections of information in accordance with the PRA and 5 CFR 1320.8(d)(1). This helps ONRR to assess the impact of its information collection requirements and minimize the public's reporting burden. It also helps the public understand ONRR's information collection requirements and provide the requested data in the desired format.

ONRR is especially interested in public comments addressing the following:

(1) Whether the collection of information is necessary for the proper performance of the functions of the agency, including whether the information will have practical utility;

(2) The accuracy of ONRR's estimate of the burden for this collection of information, including the validity of the methodology and assumptions used;

(3) Ways to enhance the quality, utility, and clarity of the information to be collected; and

(4) How might the agency minimize the burden of the collection of information on those who are to respond, including through the use of appropriate automated, electronic, mechanical, or other technological collection techniques or other forms of information technology, *e.g.,* permitting electronic submission of response.

On January 13, 2023, the Bureau of Indian Affairs (''BIA'') published a proposed rule (88 FR 2430) to amend its regulations to allow ONRR to issue certain types of orders relating to the Osage Nation mineral estate in Osage County, Oklahoma (''Osage Mineral Estate''). The proposed rule would allow a person adversely affected by an ONRR order concerning the Osage Mineral Estate to post a surety instrument to suspend compliance with the order during an appeal (*see* 88 FR 2498–99). On January 19, 2023, ONRR published a 60-day notice (88 FR 3430) proposing to both renew this ICR and expand it to include ONRR's additional surety information collections for Osage Mineral Estate orders if the BIA's proposed amendments become final.

Because the BIA has not published a final rule as of this date, ONRR is not seeking in this 30-day notice to expand this ICR to include Osage Mineral Estate information collections. Accordingly, this 30-day notice only seeks renewed authority to collect information related to the surety and financial solvency paperwork requirements under 30 CFR part 1243. ONRR may later seek to expand this ICR to include surety information collections for Osage Mineral Estate orders if the BIA adopts its proposed amendments.

ONRR did not receive any comments in response to the **Federal Register** 60-day notice available at *www.regulations.gov.* However, ONRR reached out to members of industry to solicit comments and received four comments in response to this information collection request renewal. Three of those comments agreed with the content of this ICR. One commenter disagreed with the amount of time that ONRR uses to calculate the burden hours. ONRR acknowledged and provided responses to all commenters accordingly.

Comments that you submit in response to this 30-day notice are a matter of public record. ONRR will include or summarize each comment in its request to OMB to approve this ICR. Before including your address, phone number, email address, or other personal identifying information in your comment, you should be aware that your entire comment—including your personal identifying information—may be made publicly available at any time. While you can ask ONRR in your comment to withhold your personal

identifying information from public review, ONRR cannot guarantee that it will be able to do so.

Abstract: (a) General Information: ONRR issues orders and assesses civil penalties in performing mineral revenue management responsibilities for the Secretary of the Interior. *See* U.S. Department of the Interior Departmental Manual, 112 DM 34.1 (Sept. 9, 2020). A person who timely appeals an ONRR order may post a bond or other surety instrument pursuant to 30 CFR part 1243, or, for Federal leases, demonstrate financial solvency pursuant to 30 CFR part 1243, subpart C, to suspend its compliance with the order during the appeal. *See* 30 CFR 1243.1. Similarly, if an administrative law judge determines that a stay is warranted, the recipient of a civil penalty notice who timely requests a hearing may post a surety instrument or demonstrate financial solvency under these same subparts to stay the assessment or accrual of penalties pending a hearing on the record and decision by the administrative law judge. *See* 30 CFR 1241.11.

(b) Information Collections: ONRR accepts the following surety types: Form ONRR–4435, Administrative Appeal Bond; Form ONRR–4436, Letter of Credit; Form ONRR–4437, Assignment of Certificate of Deposit; Self-bonding; and U.S. Treasury Securities. *See* 30 CFR 1210.157. Instructions for submitting these surety instruments or self-bonding are located at *https://www.onrr.gov/document/SuretyInst.pdf.* This ICR covers the burden hours associated with submitting surety instruments and self-bonding pursuant to 30 CFR part 1243 as follows:

(1) Form ONRR–4435, Administrative Appeal Bond: A person using this form of surety supplies various information on the form ONRR–4435, such as its contact information, surety company name and address, and surety amount. The bond must be issued by a qualified surety company approved by the U.S. Department of the Treasury (*see* Department of the Treasury Circular No. 570, revised periodically in the **Federal Register**). ONRR maintains the bond in a secure facility.

(2) Form ONRR–4436, Letter of Credit: A person using this form of surety must complete the form ONRR–4436, with no modifications. The person supplies various information on the form, such as bank name and address, bank ABA number, and effective date. ONRR maintains the letter of credit in a secure facility. The person submitting the letter of credit is responsible for verifying that the bank provides a current Fitch rating to ONRR.

(3) Form ONRR–4437, Assignment of Certificate of Deposit: A person seeking to use a Certificate of Deposit (CD) as surety must submit a written request to ONRR to do so. A person using this form of surety supplies various information on the form ONRR–4437, such as the CD number, CD amount, and bank name. ONRR will accept only a book-entry CD that explicitly assigns the CD to ONRR's Director.

(4) U.S. Treasury Securities: A person seeking to use a U.S. Treasury Security (''TS'') as surety must submit a written request to ONRR to do so. The TS must be a U.S. Treasury note or bond with maturity equal to or greater than one year. The TS must equal 120 percent of the appealed amount plus 1 year of estimated interest (necessary to protect ONRR against interest rate fluctuations). ONRR only accepts a book-entry TS.

(5) Self-bonding: For Federal oil and gas leases only (not Indian leases), 30 CFR 1243.201 provides that no surety instrument is required when a person periodically demonstrates, to the satisfaction of ONRR, that it is financially solvent or otherwise able to pay the obligation. ONRR requires the person to submit a consolidated balance sheet, subject to annual audit. In some cases, ONRR also requires copies of the most recent tax returns (up to three years).

In addition, the person must annually submit financial statements, subject to audit, to support its net worth. If the person does not have a consolidated balance sheet documenting its net worth, or if it does not meet the $300 million net worth requirement, ONRR will select a business information or credit reporting service to provide information concerning its financial solvency. ONRR charges a $50 fee each time it reviews data from a business information or credit reporting service. The fee covers ONRR's cost to determine financial solvency.

Title of Collection: Suspensions Pending Appeal and Bonding.

OMB Control Number: 1012–0006.

Form Number: Forms ONRR–4435, ONRR–4436, and ONRR–4437.

Type of Review: Extension of a currently approved collection.

Respondents/Affected Public: Businesses.

Total Estimated Number of Annual Respondents: 105 Federal or Indian appellants.

Total Estimated Number of Annual Responses: 105.

Estimated Completion Time per Response: 2 hours.

Total Estimated Number of Annual Burden Hours: 210.

Respondent's Obligation: Mandatory.

Frequency of Collection: Annual and on occasion.

Total Estimated Annual Non-hour Burden Cost: There are no additional recordkeeping costs associated with this information collection. However, ONRR estimates 5 appellants per year will pay a $50 fee to obtain credit data from a business information or credit reporting service, which is a total ''non-hour'' cost burden of $250 per year (5 appellants per year $50 = $250).

An agency may not conduct or sponsor, and a person is not required to respond to, a collection of information unless it displays a currently valid OMB control number.

The authority for this action is the PRA (44 U.S.C. 3501 *et seq.*).

Howard Cantor,

Director, Office of Natural Resources Revenue.

BILLING CODE 4335–30–P

INTERNATIONAL TRADE COMMISSION

[Investigation No. 731–TA–1330 (Review)]

Dioctyl Terephthalate From South Korea

Determination

On the basis of the record [1] developed in the subject five-year review, the United States International Trade Commission (''Commission'') determines, pursuant to the Tariff Act of 1930 (''the Act''), that revocation of the antidumping duty order on dioctyl terephthalate from South Korea would be likely to lead to continuation or recurrence of material injury to an industry in the United States within a reasonably foreseeable time.

Background

The Commission instituted this review on July 1, 2022 (87 FR 39556) and determined on October 4, 2022 that it would conduct a full review (87 FR 75067, December 7, 2022). Notice of the scheduling of the Commission's review and of a public hearing to be held in connection therewith was given by posting copies of the notice in the Office of the Secretary, U.S. International Trade Commission, Washington, DC, and by publishing the notice in the **Federal Register** on December 22, 2022 (87 FR 78708). Since one party requested cancellation of a hearing and no other parties requested a hearing, the

[1] The record is defined in § 207.2(f) of the Commission's Rules of Practice and Procedure (19 CFR 207.2(f)).

public hearing in connection with the review, originally scheduled for April 27, 2023, was cancelled (88 FR 26598, April 25, 2023).

The Commission made this determination pursuant to section 751(c) of the Act (19 U.S.C. 1675(c)). It completed and filed its determination in this review on June 26, 2023. The views of the Commission are contained in USITC Publication 5433 (June 2023), entitled *Dioctyl Terephthalate from South Korea: Investigation No. 731–TA–1330 (Review).*

By order of the Commission.

Issued: June 26, 2023.

Lisa Barton,

Secretary to the Commission.

[FR Doc. 2023–13862 Filed 6–28–23; 8:45 am]

BILLING CODE 7020–02–P

DEPARTMENT OF JUSTICE

Drug Enforcement Administration

[Docket No. DEA–1197]

Importer of Controlled Substances Application: Irvine Labs, Inc.

AGENCY: Drug Enforcement Administration, Justice.

ACTION: Notice of application.

SUMMARY: Irvine Labs, Inc. has applied to be registered as an importer of basic class(es) of controlled substance(s). Refer to Supplementary Information listed below for further drug information.

DATES: Registered bulk manufacturers of the affected basic class(es), and applicants therefore, may submit electronic comments on or objections to the issuance of the proposed registration on or before July 31, 2023. Such persons may also file a written request for a hearing on the application on or before July 31, 2023.

ADDRESSES: The Drug Enforcement Administration requires that all comments be submitted electronically through the Federal eRulemaking Portal, which provides the ability to type short comments directly into the comment field on the web page or attach a file for lengthier comments. Please go to *https://www.regulations.gov* and follow the online instructions at that site for submitting comments. Upon submission of your comment, you will receive a Comment Tracking Number. Please be aware that submitted comments are not instantaneously available for public view on *https://www.regulations.gov.* If you have received a Comment Tracking Number, your comment has been successfully submitted and there is no need to resubmit the same comment. All requests for a hearing must be sent to: (1) Drug Enforcement Administration, Attn: Hearing Clerk/OALJ, 8701 Morrissette Drive, Springfield, Virginia 22152; and (2) Drug Enforcement Administration, Attn: DEA **Federal Register** Representative/DPW, 8701 Morrissette Drive, Springfield, Virginia 22152. All requests for a hearing should also be sent to: Drug Enforcement Administration, Attn: Administrator, 8701 Morrissette Drive, Springfield, Virginia 22152.

SUPPLEMENTARY INFORMATION: In accordance with 21 CFR 1301.34(a), this is notice that on April 20, 2023, Irvine Labs, Inc. 7305 Murdy Circle, Huntington Beach, California 92647–3533, applied to be registered as an importer of the following basic class(es) of controlled substance(s).

Controlled substance	Drug code	Schedule
Lysergic acid diethylamide	7315	I
Marihuana Extract	7350	I
Marihuana	7360	I
Tetrahydrocannabinols	7370	I
Mescaline	7381	I
Peyote	7415	I
Diethyltryptamine	7434	I
Dimethyltryptamine	7435	I
Psilocybin	7437	I
Psilocyn	7438	I

The company plans to import the bulk substances to support internal research, clinical trials, analytical purposes, and distribution to their customers. In reference to drug codes 7360 (Marihuana), 7350 (Marihuana Extract), and 7370 (Tetrahydrocannabinols) the company plans to import a raw plant material and extracts. No other activities for these drug codes are authorized for this registration.

Approval of permit applications will occur only when the registrant's business activity is consistent with what is authorized under 21 U.S.C. 952(a)(2). Authorization will not extend to the import of Food and Drug Administration-approved or non-approved finished dosage forms for commercial sale.

Matthew Strait,

Deputy Assistant Administrator.

BILLING CODE P

DEPARTMENT OF LABOR

Office of Workers' Compensation Programs

[OMB Control No. 1240–0021]

Proposed Extension of Existing Collection; Comment Request

AGENCY: Office of Workers' Compensation Programs, Labor.

ACTION: Request for public comment.

SUMMARY: The Department of Labor, as part of its continuing effort to reduce paperwork and respondent burden, conducts a pre-clearance request for comment to provide the general public and Federal agencies with an opportunity to comment on proposed collections of information in accordance with the Paperwork Reduction Act of 1995. This request helps to ensure that: requested data can be provided in the desired format; reporting burden (time and financial resources) is minimized; collection instruments are clearly understood; and the impact of collection requirements on respondents can be properly assessed. Currently, OWCP is soliciting comments on the information collection for the Provider Enrollment Form (PE–1168).

DATES: All comments must be received on or before August 28, 2023.

ADDRESSES: You may submit comment as follows. Please note that late, untimely filed comments will not be considered.

Written/Paper Submissions: Submit written/paper submissions in the following way:

• *Mail/Hand Delivery*: Mail or visit DOL–OWCP, Office of Workers' Compensation Programs, U.S. Department of Labor, 200 Constitution Ave. NW, Room S–3323, Washington, DC 20210.

• OWCP will post your comment as well as any attachments, except for information submitted and marked as confidential, in the docket at *https://www.regulations.gov.*

FOR FURTHER INFORMATION CONTACT: Anjanette Suggs, Office of Workers' Compensation Programs, at *suggs.anjanette@dol.gov* (email) or by telephone at (202) 354–9660 (this is not a toll-free number).

SUPPLEMENTARY INFORMATION:

I. Background: The Office of Workers' Compensation Programs (OWCP) is the agency responsible for administration of the Federal Employees' Compensation Act (FECA), 5 U.S.C. 8101 *et seq.,* the Black Lung Benefits Act (BLBA), 30 U.S.C. 901 *et seq.,* and the Energy Employees Occupational Illness Compensation Program Act of 2000 (EEOICPA), 42 U.S.C. 7384 *et seq.* These statutes require OWCP to pay for appropriate medical and vocational rehabilitation services provided to beneficiaries. In order for OWCP's billing contractor to pay providers of these services with its automated bill processing system, providers must ''enroll'' with one or more of the OWCP programs that administer the statutes by submitting certain profile information, including identifying information, tax I.D. information, and whether they possess specialty or sub-specialty training. Form OWCP–1168 is used to obtain this information from each provider. This information collection is currently approved for use through December 31, 2023.

II. Desired Focus of Comments: OWCP is soliciting comments concerning the proposed information collection (ICR) titled ''Provider Enrollment Form'', PE–1164. The Department of Labor is particularly interested in comments which:

• Evaluate whether the proposed collection of information is necessary for the proper performance of the functions of the agency, including whether the information will have practical utility;

• Evaluate the accuracy of the agency's estimate of the burden of the proposed collection of information, including the validity of the methodology and assumptions used in the estimate;

• Suggest methods to enhance the quality, utility and clarity of the information to be collected; and

• Minimize the burden of the collection of information on those who are to respond, including through the use of appropriate automated, electronic, mechanical, or other technological collection techniques or other forms of information technology, *e.g.,* permitting electronic submissions of responses.

Background documents related to this information collection request are available at *https://regulations.gov* and at DOL–OWCP located at 200 Constitution Avenue NW, Room S3323, Washington, DC 20210. Questions about the information collection requirements may be directed to the person listed in the **FOR FURTHER INFORMATION** section of this notice.

III. Current Actions: This information collection request concerns the Provider Enrollment Form, PE–1164. OWCP has updated the data with respect to the number of respondents, responses, burden hours, and burden costs supporting the information collection requests from the previous information request.

Type of Review: Extension.

Agency: Office of Workers' Compensation Programs.

Title: Provider Enrollment Form.

OMB Number: 1240–0021.

Agency Number: OWCP–1168.

Affected Public: Businesses or other for-profit.

Total Respondents: 23,318.

Total Responses: 23,318.

Time per Response: 25 minutes.

Estimated Total Burden Hours: 9,719.

Total Burden Cost (capital/startup): $0.

Total Burden Cost (operating/maintenance): $201,601.81.

Comments submitted in response to this notice will be summarized in the request for Office of Management and Budget approval of the information collection request; they will also become a matter of public record and will be available at *https://reginfo.gov.*

Anjanette C. Suggs,

Agency Clearance Officer, Office of Workers' Compensation Programs, US Department of Labor.

[FR Doc. 2023–13813 Filed 6–28–23; 8:45 am]

BILLING CODE 4510–CR–P

NATIONAL CREDIT UNION ADMINISTRATION

[NCUA–2023–0070]

Minority Depository Institution Preservation Program

AGENCY: National Credit Union Administration (NCUA).

ACTION: Proposed interpretive ruling and policy statement.

SUMMARY: The NCUA Board is issuing proposed revisions to Interpretive Ruling and Policy Statement 13–1, regarding the Minority Depository Institution Preservation Program for credit unions.

DATES: Comments must be received on or before August 28, 2023.

ADDRESSES: You may submit comments by any of the following methods (Please send comments by one method only):

• *Federal eRulemaking Portal: https://www.regulations.gov/.* Follow the instructions for submitting comments for Docket Number NCUA–2023–XXXX.

• *NCUA website:* Rulemakings and Proposals for Comment | NCUA. Follow the instructions for submitting comments.

• *USPS/Hand Delivery/Courier:* Address to Melane Conyers-Ausbrooks, Secretary of the Board, National Credit Union Administration, 1775 Duke Street, Alexandria, Virginia 22314–3428.

Public Inspection: You may view all public comments on the Federal eRulemaking Portal at *https://www.regulations.gov,* as submitted, except for those we cannot post for technical reasons. The NCUA will not edit or remove any identifying or contact information from the public comments submitted. If you are unable to access public comments on the internet, you may contact the NCUA for alternative access by calling (703) 518–6540 or emailing *OGCMail@ncua.gov.*

FOR FURTHER INFORMATION CONTACT: Supervisory Program Manager Kristi Kubista-Hovis or Program Manager Pamela Williams, Office of Credit Union Resources and Expansion, 703–518–6610 or *CUREMDI@ncua.gov.*

I. Background

Congress enacted the Financial Institutions Reform, Recovery, and Enforcement Act of 1989 (FIRREA) in response to the savings and loan industry crisis.[1] FIRREA included provisions designed to encourage Federal financial regulators to preserve

[1] Public Law 101–73, 103 Stat. 183 (1989).

and promote minority depository institutions.[2] Specifically, FIRREA section 308 required the Secretary of the Treasury to consult with the Office of Thrift Supervision (OTS) and the Federal Deposit Insurance Corporation (FDIC) on best methods to achieve the following goals:

- Preserving the number of minority depository institutions;
- Preserving the minority character of a minority depository institution involved in a merger or acquisition;
- Providing technical assistance to prevent the insolvency of minority depository institutions;
- Encouraging the formation of new minority depository institutions; and
- Providing training, technical assistance, and educational programs to minority depository institutions.[3]

Those agencies developed various initiatives aimed at preserving federally insured banks and savings institutions that meet FIRREA's definition of a minority depository institution (MDI).[4]

In 2010, Congress enacted the Dodd-Frank Wall Street Reform and Consumer Protection Act (Dodd-Frank Act).[5] Section 367(4)(A) of the Dodd-Frank Act expanded FIRREA section 308 to require the Secretary of the Treasury to consult with the National Credit Union Administration (NCUA) and the Board of Governors of the Federal Reserve System (Fed), in addition to the FDIC and the Office of the Comptroller of the Currency (OCC) on methods for best achieving the FIRREA goals.[6] Section 367(4)(B) of the Dodd-Frank Act also amended FIRREA section 308 to require each agency to submit an annual report to Congress describing actions it has taken to preserve and encourage MDIs.[7]

In 2013, the NCUA Board proposed Interpretive Ruling and Policy Statement (IRPS) 13–1 to establish a Minority Depository Institution Preservation Program (MDI Program) to encourage the preservation of MDIs and the establishment of new ones.[8] In 2015, the NCUA Board approved final IRPS 13–1, establishing the NCUA's MDI Program.[9]

The NCUA Board subsequently restructured the agency in 2018. Among other changes, the restructuring created the Office of Credit Union Resources and Expansion (CURE). CURE assumed administration of the NCUA's MDI Program from the agency's Office of Minority and Women Inclusion.

II. Summary of Proposed Changes to IRPS 13–1 and Request for Comments

The NCUA is proposing to amend IRPS 13–1 to reflect changes to the agency's structure and current administration of the MDI Program by CURE and improve the MDI Program, including: recognizing the transfer of the MDI program administration to CURE, incorporating recent program initiatives, simplifying ''community it services, as designated in its charter'' to refer to an MDI's field of membership, referencing guidance the NCUA provides examination staff who continue to play a significant role in supporting and guiding MDIs under their supervision, explaining how the NCUA will review an MDI's designation status during routine evaluations, and adding new subsections on engagement, technical assistance, MDI examinations, Community Development Revolving Loan Fund grants and loans, training and education, and MDI preservation.

The Board invites comments on all aspects of the proposed amendments to the IRPS. Additionally, the agency welcomes comments on any other aspects of the IRPS and what additional information the agency could provide to help MDIs and how best to deliver the information.

Authority: 12 U.S.C. 1463 note; Sec. 308, Pub. L. 101–73, 103 Stat. 353; as amended by Sec. 367(4), Pub. L. 111–203, 124 Stat. 1556.

III. Interpretive Ruling and Policy Statement 13–1, Minority Depository Institution Preservation Program, as Amended

The text of IRPS 13–1, with proposed amendments, follows:

a. Goals and Objectives of the MDI Preservation Program

Minority Depository Institutions (MDIs) play an important and unique role in promoting the economic viability of minority and underserved communities. The NCUA employs proactive steps and outreach efforts to preserve MDIs and foster their success. The NCUA's MDI Preservation Program (MDI Program) is designed to comply with section 308 of FIRREA, which requires the NCUA to report on the actions it has taken in furtherance of the following goals:[10]

- Preserve the present number of MDIs;
- Preserve the minority character of MDIs involved in mergers and acquisitions;
- Provide technical assistance to prevent insolvency of MDIs that are not now insolvent;
- Promote and encourage the creation of new MDIs; and
- Provide training, technical assistance, and educational programs for MDIs.

b. Description of the MDI Program

The NCUA's MDI Program consists of proactive steps and outreach efforts to promote and preserve MDIs in the credit union system. The NCUA's Office of Credit Union Resources and Expansion (CURE) administers the agency's MDI Program and will meet periodically with State regulators, other Federal regulators, and other stakeholders to discuss outreach efforts, share ideas, and identify areas to work together to assist MDIs.

The NCUA offers MDI-designated credit unions a variety of initiatives to assist in preserving the economic viability of their institutions. The initiatives include technical assistance, educational opportunities, and funding. Examples of such initiatives include the following:

- Consulting and support program;
- Training; and
- Grants and loans through the NCUA's Community Development Revolving Loan Fund (CDRLF), subject to eligibility.[11]

Examples of broad-based and individualized technical assistance include the following:

- Providing guidance in resolving examination concerns;
- Helping MDIs locate new sponsors, mentors, or merger partners;
- Assisting with field of membership expansions;
- Supporting management in setting up new programs and services;
- Attempting to preserve the minority character of failing institutions during the resolution process; and
- Aiding groups that are interested in chartering a new MDI.

[2] *Id.* Title III, sec. 308, 103 Stat. 353, *codified at* 12 U.S.C. 1463 note, ''Preserving Minority Ownership of Minority Financial Institutions.''

[3] *Id.* sec. (a). The Office of the Comptroller of the Currency and the Board of Governors of the Federal Reserve System also initiated minority depository institution programs to comply with the spirit of FIRREA sec. 308, even though neither was originally required to do so. OTS became part of the Office of the Comptroller of the Currency on July 21, 2011.

[4] *Id.* sec. (b).

[6] 12 U.S.C. 1463 note sec. (a).

[7] *Id.* sec. (c).

[8] 78 FR 46374 (July 31, 2013).

[9] 80 FR 36356 (June 24, 2015).

[10] Public Law 101–73, title III, sec. 308, 103 Stat. 353 (1989), as amended by Public Law 111–203, title III, sec. 367(4), 124 Stat. 1556 (2010), *codified at* 12 U.S.C. 1463 note.

[11] Prior to 2023, under the annual appropriations statutes, grants and loans from the CDRLF were historically only available to low-income designated credit unions, some of which are also MDIs. However, not all MDIs have a low-income designation.

Engagement With MDIs

The NCUA's MDI Program will provide continual engagement with MDIs through interaction with headquarters and field staff. This interaction includes sharing information and expertise on supervisory topics, using various venues to engage in an open dialogue between NCUA, MDIs, and related organizations, seeking feedback on the NCUA's efforts under the MDI program, and providing a variety of training opportunities hosted or sponsored by the NCUA. The NCUA's outreach also includes seeking out, working with, and supporting groups interested in applying for a new Federal or State charter with an MDI designation, and aiding existing credit unions interested in receiving the MDI designation.

Technical Assistance

The NCUA will provide technical assistance to an MDI designated credit union upon request. The agency contacts each MDI at least annually to ask if it would like to receive technical assistance. Also, an MDI can contact its assigned field office, supervisory examiner, or district examiner to request technical assistance.

Technical assistance is not an examination or supervisory activity and will be provided separate from examinations and supervision contacts. Technical assistance includes but is not limited to assistance in understanding applicable laws and regulations, agency processes, reporting requirements, supervisory guidance, accounting standards, supervisory findings and conclusions (only after the conclusion of the applicable examination or supervision contact), applications or requests for agency approval or action (such as field of membership, bidding on a failing institution, regulatory waivers, etc.), and assistance in receiving an MDI designation. In providing technical assistance, agency staff will not perform tasks expected of an institution's management or employees. And while they may help the institution understand how to apply for something or submit a bid, agency staff will not assist or guide the institution in developing the substance of such application or bid.

Examinations of MDIs

MDI-designated credit unions have a unique role in promoting the economic viability of minority and underserved communities, at times necessitating distinct approaches to taking and managing the related financial and operational risks. The NCUA expects examiners to recognize the distinctive characteristics and differences in core objectives of each financial institution and consider these when evaluating the institution's financial and operational condition and related management practices. Examiners are able to evaluate an MDI using peer metrics such as through the Financial Performance Report.

The NCUA provides examiners guidance to educate them about the unique challenges faced by MDIs and the support and services the NCUA offers to assist MDIs to address such challenges. The guidance acknowledges, at times, some MDIs may need more or different support from the NCUA than other credit unions. The guidance also lists specific types of technical assistance an MDI may request of the NCUA. It also advises that MDIs often have unique memberships and provide financial services to consumers and businesses in communities that might not otherwise have access to another federally insured financial institution. Therefore, the policies, processes, risks, and practices of MDIs may vary and comparison to other credit unions based solely on similar size may have limited value. Instead, examiners are instructed to assess each MDI based on its unique strategy and membership.

CDRLF Grants and Loans

The CDRLF provides loans and grants to low-income designated credit unions to expand outreach to underserved populations, improve digital services and cybersecurity, to provide staff training, and to support capacity-building programs for example. In 2023, MDIs without the low-income designation became eligible for CDRLF grants and loans.[12]

Training and Education

The NCUA offers training to credit unions through various formats such as webinars, online courses, videos, and in-person events. Through the Learning Management System, the agency offers training and educational resources to credit union board members, management, employees, and volunteers online and at no charge. Examples of the content provided include guidance on credit union operations, compliance, community partnerships, and strategic planning.[13]

[12] Refer to the Grants and Loans section of the NCUA website for eligibility requirements in future periods.

[13] These training opportunities are accessible to all credit unions through the Learning section the NCUA's website.

Preservation of MDIs

With regard to a potentially failing MDI or the need for an assisted merger of an MDI, as with any insured credit union, the NCUA Board will consider providing Section 208 assistance to reduce the risk or avert a threatened loss to the National Credit Union Share Insurance Fund (NCUSIF), facilitate a merger or consolidation, or to prevent the closing of a credit union that the Board determines is in danger of closing.[14] Requirements concerning field of membership apply to most mergers. In addition, the NCUA must consider resolution costs and safety and soundness implications for all mergers.

The NCUA will attempt to preserve the minority character of failing MDIs during the resolution process. In the event of the potential failure of an MDI, the agency will contact MDIs in the NCUA's merger registry that qualify to bid on a particular failing institution. Agency staff will solicit interest in bidding on the failing MDI and offer technical assistance to any MDI desiring to bid. The NCUA will also provide MDIs interested in submitting a bid with an additional two weeks to submit a bid whenever possible. Except in the cases of conservatorships, liquidations, or assisted mergers, the MDI's board of directors is generally the decision maker on a merger partner provided the selection is consistent with regulatory and safety and soundness standards. For conservatorships, liquidations, or assisted mergers, in the selection process, the NCUA will consider all the requirements applicable to a merger or purchase and assumption, including FIRREA's general preference guidelines.[15]

c. MDI Designation Eligibility

The agency adopted the definition of an MDI in FIRREA section 308 that applies to a mutual institution.[16] Accordingly, a credit union is eligible to receive the MDI designation if it meets all the following criteria:

- A majority of its current members are from any of the eligible minority groups;
- A majority of the members of its board of directors are from any of the eligible minority groups; and

[14] 12 U.S.C. 1788(a)(1)–(2).

[15] Generally, the NCUA is involved in the selection process when the transaction will cause a loss to the Share Insurance Fund or when the failing credit union is in conservatorship and the NCUA Board is the conservator. For additional information on the NCUA's selection process, see Letter to Credit Unions 10–CU–11, *Information on NCUA's Merger and Purchase & Assumption Process.*

[16] 12 U.S.C. 1463 note sec. (b)(1)(C).

• A majority of the community it services, as designated in its field of membership, are from any of the eligible minority groups.

For minority representation to be a ''majority,'' it must be greater than 50 percent.

The NCUA relies on the FIRREA section 308 ''minority'' definition to identify an eligible minority as any Black American, Asian American, Hispanic American, or Native American.[17] For the purpose of this IRPS, Asian American includes anyone who is Native Hawaiian or Other Pacific Islander, and Native American includes anyone who is American Indian or Alaska Native. Also, for the purpose of minority representation under the MDI definition, an individual who falls into more than one of the minority categories will be considered as a single, eligible minority.

A credit union that meets the eligibility requirements can self-certify as an MDI by following agency guidelines as specified on the NCUA's website. The instructions to the NCUA's *Credit Union Profile* form, which credit unions use to self-certify as an MDI, contain detailed directions on how to make the designation.[18] An MDI may participate in the NCUA's MDI Program subject to the eligibility requirements of any specific initiative. An eligible credit union's decision to designate as an MDI or to participate in the MDI Program is voluntary.

A credit union defined as a ''small credit union'' by the NCUA under the Regulatory Flexibility Act (RFA) may self-certify greater than 50 percent representation among its current members, and within the community it services (potential members), based solely on knowledge of those members. Under the RFA, the NCUA currently defines a small credit union as a credit union with total assets of less than $100 million.[19]

A credit union not defined as a small credit union by the NCUA may rely on one of the following methods, as applicable, to determine the minority composition of its current membership exclusively and of the community it services. The credit union must maintain documentation supporting its MDI self-designation.

1. The credit union may ascertain the minority representation using demographic data from the U.S. Census Bureau website, based on the area(s) where the current or potential membership resides, such as a township, borough, city, county, or Metropolitan Statistical Area. If the U.S. Census data—for example, census tracts, zip codes, townships, boroughs, cities, or counties—shows the area's population comprises mostly eligible minorities, the credit union may assume that its current membership and the community it services each have the same minority composition as the Census data indicates.

2. The credit union may use Home Mortgage Disclosure Act (HMDA) data to calculate the reported number of minority mortgage applicants divided by the total number of mortgage applicants within the credit union's membership. If the share of minority representation among applicants is greater than 50 percent, the credit union may assume its current membership has the same minority composition as the HMDA data indicates. If a credit union grants a majority of its mortgage loans to minorities, it is likely the majority of the community the credit union services (its potential members) will consist of minorities.[20]

3. The credit union may elect to collect data from members who voluntarily choose to participate in such collection about their racial identity and use the data to determine minority representation among the credit union's membership. The credit union should consider using an unbiased third party to conduct such a collection. For example, data can be collected through a survey of members, assessing the services they desire, or by mailed electoral ballots for official positions. Once collected, it is essential to maintain the confidentiality of the data; it should not be retained in the members' files or with any personal identifiers, such as, names, accounts, or Social Security numbers. If a majority of its current members are minorities, it is likely the majority of the community the credit union services (its potential members) will consist of minorities.

4. The credit union may use any other reasonable form of data, such as membership address list analyses or an employer's demographic analysis of employees.

An MDI credit union must assess whether it continues to meet the required definition of an MDI whenever there is a significant change in its board of directors, or it changes its field of membership, and update its designation, if necessary, in the NCUA *Credit Union Profile.* In accordance with the regular examination process, the NCUA will review whether a credit union has updated its analysis and made any corresponding changes to its self-certification in the *Credit Union Profile.* Credit unions can expect to have the *Credit Union Profile* reviewed during routine evaluations. An MDI may elect to withdraw its designation by not completing the relevant questions in the *Profile.*

d. Monitoring and Reporting on MDIs

The NCUA will monitor MDIs and report to Congress annually on the number and overall financial condition of MDIs, along with actions taken by the agency to preserve and strengthen them and to encourage the chartering of new ones.[21] The report summarizes the NCUA's efforts to obtain feedback from MDIs on the effectiveness of the agency's MDI support and preservation activities. The NCUA also maintains a list of MDIs on its website.

IV. Regulatory Procedures

Regulatory Flexibility Act

The RFA generally requires that, in connection with a notice of proposed rulemaking, an agency prepare and make available for public comment an initial regulatory flexibility analysis that describes the impact of a proposed rule on small entities. A regulatory flexibility analysis is not required, however, if the agency certifies that the rule will not have a significant economic impact on a substantial number of small entities (defined for purposes of the RFA to include credit unions with assets less than $100 million) [22] and publishes its certification and a short, explanatory statement in the **Federal Register** together with the rule.

The Board fully considered the potential economic impact of the proposed changes during the development of the revised IRPS. As noted in the preamble, the revised IRPS would clarify the NCUA's current policy on MDI preservation and provide additional services to MDIs. The proposed rule would not impose any new significant burden on credit unions designated as MDIs and may provide some additional resources. The resources gained, however, are unlikely to result in a significant economic impact for affected credit unions. Small credit unions are also not obligated to participate in the MDI program. Accordingly, the NCUA certifies that it would not have a significant economic impact on a substantial number of small federally insured credit unions.

[19] 80 FR 57512 (Sept. 24, 2015).

[20] HMDA data can be obtained from the Federal Financial Institutions Examination Council website.

[21] 12 U.S.C. 1463 note sec. (c).

[22] See 80 FR 57512 (Sept. 24, 2015).

Paperwork Reduction Act

The Paperwork Reduction Act of 1995 (PRA) applies to rulemakings in which an agency creates a new information collection or amends existing information collection requirements.[23] For purposes of the PRA, an information collection requirement may take the form of a reporting, recordkeeping, or a third-party disclosure requirement. The NCUA may not conduct or sponsor, and the respondent is not required to respond to, an information collection unless it displays a valid Office of Management and Budget (OMB) control number. The current information collection requirements for the MDI policy are approved under OMB control number 3133–0195, Minority Depository Institution Preservation Program.

The amendments in this proposed revision to IRPS 13–1 do not alter the information collection described under OMB control number 3133–0195, and the NCUA does not anticipate an increase in the burden based on the proposed revisions. There are no additional information collections resulting from these proposed changes.

Executive Order 13132

Executive Order 13132 encourages independent regulatory agencies to consider the impact of their actions on State and local interests. The NCUA, an independent regulatory agency as defined in 44 U.S.C. 3502(5), voluntarily complies with the Executive Order to adhere to fundamental federalism principles. This revised IRPS will not have a substantial direct effect on the States, on the relationship between the national government and the States, or on the distribution of power and responsibilities among the various levels of government. Although State-chartered credit unions are eligible to obtain the MDI designation and receive assistance based on it, the NCUA does not believe this affects State governments generally or State credit union regulators in particular. The NCUA will continue to work cooperatively with State credit union regulators to examine federally insured, State-chartered credit unions and does not expect the proposed IRPS to alter these relationships or allocation of responsibilities. The decision about whether to certify as an MDI or seek MDI program benefits will be an individual business decision for each credit union's board. The NCUA has determined that this revised IRPS does not constitute a policy that has federalism implications for purposes of the executive order.

Assessment of Federal Regulations and Policies on Families

The NCUA has determined that these proposed revisions to IRPS 13–1 will not affect family well-being within the meaning of section 654 of the Treasury and General Government Appropriations Act, 1999.[24] The proposed revisions to IRPS 13–1 may increase the ability of MDIs to provide financial services to families. However, the Board does not have a means to quantify how this might affect family well-being as described in factors included in the legislation, which include the effects of the action on the stability and safety of the family; parental authority and rights in the education, supervision, and nurture of their children; the ability of families to support their functions or substitute governmental activity for these functions; and on increases or decreases to disposable income.

By the National Credit Union Administration Board on June 22, 2023.

Melane Conyers-Ausbrooks,

Secretary of the Board.

NUCLEAR REGULATORY COMMISSION

[Docket No. 50–0320; NRC–2023–0042]

TMI–2 Solutions; Three Mile Island Nuclear Station, Unit No. 2

AGENCY: Nuclear Regulatory Commission.

ACTION: Exemption; issuance.

SUMMARY: The U.S. Nuclear Regulatory Commission (NRC, or Commission) is issuing an exemption in response to a September 29, 2022, request from TMI–2 Solutions, LLC (TMI–2 Solutions, or Licensee) for an exemption from NRC regulations. The action exempts TMI–2 Solutions from the requirements to maintain a radiation monitoring system in each area where licensed special nuclear material is handled, used, or stored that would energize clearly audible alarm signals if accidental criticality occurred during decommissioning. In evaluating the exemption request, the NRC staff determined that the Licensee's proposed decommissioning activities do not present any credible criticality hazards.

DATES: The exemption was issued on and was effective on May 2, 2023.

ADDRESSES: Please refer to Docket ID NRC–2023–0042 when contacting the NRC about the availability of information regarding this document. You may obtain publicly available information related to this document using any of the following methods:

- *Federal Rulemaking Website:* Go to *https://www.regulations.gov* and search for Docket ID NRC–2023–0042. Address questions about Docket IDs in *Regulations.gov* to Stacy Schumann; telephone: 301–415–0624; email: *Stacy.Schumann@nrc.gov.* For technical questions, contact the individual listed in the **FOR FURTHER INFORMATION CONTACT** section of this document.

SUPPLEMENTARY INFORMATION:

I. Background

TMI–2 Solutions is the holder of Possession Only License (POL) No. DPR–73 for Three Mile Island Nuclear Station, Unit No. 2 (TMI–2). The POL provides, among other things, that the facility is subject to all rules, regulations, and orders of the NRC now or hereafter in effect. TMI–2 is located in Dauphin County, Pennsylvania.

The NRC previously granted TMI–2 an exemption from the criticality accident monitoring requirements of section 70.24 of title 10 of the *Code of Federal Regulations* (10 CFR), ''Criticality accident requirements,'' for Special Nuclear Material (SNM) storage, on June 15, 1992 (ADAMS Accession No. ML20210D729). In its exemption request (ADAMS Accession No. ML22276A024), the Licensee noted that the June 15, 1992, exemption stated:

''. . . it is appropriate to request an exemption from 10 CFR 70.24 if an evaluation determines that a potential for criticality does not exist, as for example where the quantities or form of special nuclear material make criticality practically impossible or where geometric spacing is used to preclude criticality.''

The NRC granted the 1992 exemption based on the lack of a credible criticality hazard related to the storage of fissionable material at the facility (ADAMS Package Accession No. ML20210D728). That exemption, however, only covered the initial cleanup of TMI–2 fuel debris. Consequently, as TMI–2 Solutions progresses to radiological decommissioning of TMI–2, including activities beyond the initial cleanup of TMI–2 fuel debris, the 1992 exemption will no longer apply. Therefore, TMI–2 Solutions requested this exemption from 10 CFR 70.24, which will extend until license termination.

II. Request/Action

Section 70.24 requires, in relevant part, that each licensee authorized to possess special nuclear material in a quantity exceeding 700 grams of contained uranium-235, 520 grams of uranium-233, 450 grams of plutonium, 1,500 grams of contained uranium-235 if no uranium enriched to more than 4 percent by weight of uranium-235 is present, or 450 grams of any combination thereof, shall maintain a monitoring system in each area in which such licensed special nuclear material is handled, used, or stored. The monitoring system must use gamma- or neutron-sensitive radiation detectors which will energize clearly audible alarm signals if accidental criticality occurs.

In its exemption application, TMI–2 Solutions states that criticality is not credible at TMI–2, and therefore it considers an exemption to 10 CFR 70.24 for a criticality monitoring system to be appropriate for decommissioning. The licensee states that TMI2–RA–COR–2022–0008, ''Supplemental Information to License Amendment Request—Three Mile Island, Unit 2, Decommissioning Technical Specifications,'' demonstrates that the spent fuel mass limit (SFML) associated with remaining fuel bearing material at TMI–2 is 1361 kilograms (kg) of uranium oxide (UO_2). The licensee notes that this SFML is 24 percent higher than the previous estimate on record for remaining fuel bearing material at TMI–2, which the NRC staff found to analytically preclude a credible criticality accident at TMI–2 (ADAMS Accession No. ML23094A269). The updated SFML result represents a more accurate and updated calculation from the 1990 SFML calculation. The Licensee arrived at this updated calculation by taking credit for impurities and actual enrichment based on the results of physical samples taken during the defueling effort.

III. Discussion

Pursuant to 10 CFR 70.17(a), ''Specific exemptions,'' the Commission may, upon application by any interested person or upon its own initiative, grant exemptions from the requirements of 10 CFR part 70 when the exemption is authorized by law, will not endanger life or property or the common defense and security, and is otherwise in the interest of the public.

The NRC staff has reviewed the exemption request and finds that granting the proposed exemption will not result in a violation of the Atomic Energy Act of 1954, as amended, the Commission's regulations, or other laws. As explained as follows, the proposed exemption will not endanger life or property, or the common defense and security, and is otherwise in the public interest. Therefore, the exemption is authorized by law.

The exemption presents no undue risk to the public health and safety and therefore will not endanger life or property. Based on the NRC staff's evaluation, the NRC staff determined that the Licensee's proposed decommissioning activities do not present any credible criticality hazards. Because there are no credible criticality hazards related to the Licensee's proposed decommissioning activities and because all activities will be conducted such that subcriticality is assured under normal and all credible abnormal conditions, the NRC staff concludes that the Licensee's program will provide reasonable assurance of adequate protection of the health and safety of workers and the public.

The exemption is consistent with the Common Defense and Security because the NRC staff determined there would be no impact to the physical protection plan, emergency preparedness, environmental monitoring, effluent monitoring, or material control and accountability programs at TMI–2. Further, as described in the NRC staff's safety evaluation, the NRC staff conducted independent evaluations and concluded that criticality is not credible; therefore, an exemption from criticality monitoring requirements is warranted. The NRC staff agrees with the licensee's conclusion in its application that the requested exemption to the requirements of 10 CFR 70.24 does not involve information or activities that could potentially impact the common defense and security. The Licensee demonstrated that there is no credible criticality hazard, and the existing administrative restrictions described in the TMI–2 Fuel Bearing Material Program prevent proliferation and limit aggregation. The elimination of the criticality monitoring requirements does not involve information or activities that could potentially impact the common defense and security of the United States.

Further, while administrative controls for geometric spacing are not necessary because there is not enough UO_2 to assemble an optimal critical configuration, TMI–2 Solutions will be implementing local administrative controls as part of its Fuel Bearing Material Management Program for the purpose of defense in depth. These administrative controls will apply to the activities which will handle the highest quantities of fuel bearing material (*e.g.,* segmenting the reactor vessel internals which represent 925 kg UO_2 or 68 percent of the SFML). These defense in depth controls will include control on the physical location of segmentation equipment and limiting the number of waste receptacles (*i.e.,* physical manifestations of controls on geometric spacing).

Finally, the NRC staff concludes that the exemption is in the public interest. As stated previously, the Licensee demonstrated that criticality is not credible during site decommissioning activities under credible normal and credible abnormal conditions. Therefore, conducting criticality monitoring at TMI–2 would expend NRC staff inspection and other NRC staff regulatory resources that could be used for other activities at the facility. Additionally, the Licensee states that, if the exemption request were denied, its personnel would experience a slight increase in occupational dose during the maintenance of criticality monitors, which would not be consistent with as low as reasonably achievable principles. The NRC staff agrees.

IV. Conclusions

Accordingly, the Commission has determined that, pursuant to 10 CFR 70.17(a), the exemption is authorized by law, will not endanger life or property or the common defense and security, and is otherwise in the interest of the public. Therefore, the Commission hereby grants TMI–2 Solutions an exemption from 10 CFR 70.24 during decommissioning.

Dated: June 26, 2023.

For the Nuclear Regulatory Commission.

Jane E. Marshall,

Director, Division of Decommissioning, Uranium Recovery and Waste Programs, Office of Nuclear Material Safety and Safeguards.

BILLING CODE 7590–01–P

POSTAL REGULATORY COMMISSION

[Docket Nos. MC2023–174 and CP2023–178; MC2023–175 and CP2023–179; MC2023–176 and CP2023–180]

New Postal Products

AGENCY: Postal Regulatory Commission.

ACTION: Notice.

SUMMARY: The Commission is noticing a recent Postal Service filing for the Commission's consideration concerning a negotiated service agreement. This notice informs the public of the filing, invites public comment, and takes other administrative steps.

DATES: *Comments are due:* July 5, 2023.

ADDRESSES: Submit comments electronically via the Commission's Filing Online system at *http://www.prc.gov.* Those who cannot submit comments electronically should contact the person identified in the **FOR FURTHER INFORMATION CONTACT** section by telephone for advice on filing alternatives.

FOR FURTHER INFORMATION CONTACT: David A. Trissell, General Counsel, at 202–789–6820.

SUPPLEMENTARY INFORMATION:

Table of Contents

I. Introduction

The Commission gives notice that the Postal Service filed request(s) for the Commission to consider matters related to negotiated service agreement(s). The request(s) may propose the addition or removal of a negotiated service agreement from the Market Dominant or the Competitive product list, or the modification of an existing product currently appearing on the Market Dominant or the Competitive product list.

Section II identifies the docket number(s) associated with each Postal Service request, the title of each Postal Service request, the request's acceptance date, and the authority cited by the Postal Service for each request. For each request, the Commission appoints an officer of the Commission to represent the interests of the general public in the proceeding, pursuant to 39 U.S.C. 505 (Public Representative). Section II also establishes comment deadline(s) pertaining to each request.

The public portions of the Postal Service's request(s) can be accessed via the Commission's website (*http://www.prc.gov*). Non-public portions of the Postal Service's request(s), if any, can be accessed through compliance with the requirements of 39 CFR 3011.301.[1]

The Commission invites comments on whether the Postal Service's request(s) in the captioned docket(s) are consistent with the policies of title 39. For request(s) that the Postal Service states concern Market Dominant product(s), applicable statutory and regulatory requirements include 39 U.S.C. 3622, 39 U.S.C. 3642, 39 CFR part 3030, and 39 CFR part 3040, subpart B. For request(s) that the Postal Service states concern Competitive product(s), applicable statutory and regulatory requirements include 39 U.S.C. 3632, 39 U.S.C. 3633, 39 U.S.C. 3642, 39 CFR part 3035, and 39 CFR part 3040, subpart B. Comment deadline(s) for each request appear in section II.

II. Docketed Proceeding(s)

1. *Docket No(s).:* MC2023–174 and CP2023–178; *Filing Title:* USPS Request to Add Priority Mail, First-Class Package Service & Parcel Select Contract 30 to Competitive Product List and Notice of Filing Materials Under Seal; *Filing Acceptance Date:* June 23, 2023; *Filing Authority:* 39 U.S.C. 3642, 39 CFR 3040.130 through 3040.135, and 39 CFR 3035.105; *Public Representative:* Christopher C. Mohr; *Comments Due:* July 5, 2023.

2. *Docket No(s).:* MC2023–175 and CP2023–179; *Filing Title:* USPS Request to Add First-Class Package Service & Parcel Select Contract 3 to Competitive Product List and Notice of Filing Materials Under Seal; *Filing Acceptance Date:* June 23, 2023; *Filing Authority:* 39 U.S.C. 3642, 39 CFR 3040.130 through 3040.135, and 39 CFR 3035.105; *Public Representative:* Kenneth R. Moeller; *Comments Due:* July 5, 2023.

3. *Docket No(s).:* MC2023–176 and CP2023–180; *Filing Title:* USPS Request to Add First-Class Package Service & Parcel Select Contract 4 to Competitive Product List and Notice of Filing Materials Under Seal; *Filing Acceptance Date:* June 23, 2023; *Filing Authority:* 39 U.S.C. 3642, 39 CFR 3040.130 through 3040.135, and 39 CFR 3035.105; *Public Representative:* Kenneth R. Moeller; *Comments Due:* July 5, 2023.

This Notice will be published in the **Federal Register**.

Erica A. Barker,

Secretary.

OFFICE OF SCIENCE AND TECHNOLOGY POLICY

Request for Information; National Strategy for a Sustainable Ocean Economy

AGENCY: Office of Science and Technology Policy (OSTP).

ACTION: Notice of request for information (RFI).

SUMMARY: The Office of Science and Technology Policy (OSTP) and the Council on Environmental Quality (CEQ), on behalf of the interagency Ocean Policy Committee (OPC), request input from all interested parties to inform the development of a National Strategy for a Sustainable Ocean Economy (National Strategy). The National Strategy will describe the vision, goals, and high-level actions for a robust, equitable, secure, sustainable ocean economy enabled by healthy, resilient ocean ecosystems. It will build on current Federal, Tribal, Territorial, State, and regional sustainable ocean management practices and identify needs and opportunities to enhance these efforts with new and emerging science, technology, knowledge, and policy. Through this request for information (RFI), the Ocean Policy Committee seeks public input on what the goals and outcomes of the National Strategy should be, and how the Federal Government can best advance sustainable management of ocean, coastal, and Great Lakes resources and ecosystems of the United States.

DATES: Responses are due by 11:59 p.m. Eastern Time on August 28, 2023. Submissions received after the deadline may not be taken into consideration.

ADDRESSES: Comments must be submitted via the Federal eRulemaking Portal at *regulations.gov.* However, if you require an accommodation or cannot otherwise submit your comments via *regulations.gov,* please contact the program contact person listed under **FOR FURTHER INFORMATION CONTACT**. OSTP will not accept comments by fax or by email, or comments submitted after the comment period closes. To ensure that OSTP does not receive duplicate copies, please submit your comments only once. Additionally, please include the Docket ID at the top of your comments.

Federal eRulemaking Portal: Go to *www.regulations.gov* to submit your comments electronically. Information on how to use *Regulations.gov,* including instructions for accessing agency documents, submitting comments, and viewing the docket, is available on the site under ''FAQ'' (*https://www.regulations.gov/faq*).

Privacy Note: OSTP's policy is to make all comments received from members of the public available for public viewing in their entirety on the Federal eRulemaking Portal at *www.regulations.gov.* Therefore, commenters should be careful to include in their comments only information that they wish to make publicly available. OSTP requests that no proprietary information, copyrighted information, or personally identifiable information be submitted in response to this RFI.

Instructions: Response to this RFI is voluntary. Each individual or organization is requested to submit only one response. Commenters can respond to one or many questions. Submissions are suggested to not exceed the equivalent of five (5) pages in 12 point or larger font. Submissions should clearly indicate which questions are being addressed. Responses should include the name of the person(s) or organization(s) filing the response. Responses containing references, studies, research, and other empirical data that are not widely published should include copies of or electronic links to the referenced materials. Responses containing profanity, vulgarity, threats, or other inappropriate language or content will not be considered.

Please note that the U.S. Government will not pay for response preparation, or for the use of any information contained in the response. A response to this RFI will not be viewed as a binding commitment to develop or pursue the project or ideas discussed.

FOR FURTHER INFORMATION CONTACT: Deerin Babb-Brott, OSTP Asst. Director for Ocean Policy, (202) 456–3267.

SUPPLEMENTARY INFORMATION:

Background: The Nation's ocean, coasts, and Great Lakes support strong local economies and provide good-paying jobs, healthy food, carbon storage, energy, recreation, culture and heritage, transportation, trade, mobility for our armed forces, natural protection from storm surge and floods, and numerous other benefits. But many of these benefits are not inexhaustible, and the ocean is vulnerable to the impacts of human activity. The myriad impacts of climate change, habitat and biodiversity loss, and ocean pollution, for example, continue to degrade the health, productivity, and resilience of ocean ecosystems and make clear the integral connection between a healthy ocean, coasts, and Great Lakes and the health, prosperity, security, and well-being of all Americans.

To address these continuing challenges, the Administration is committed to advancing the science, knowledge, tools, and activities that support sustainable policies, management, and practices as solutions. Because the challenges are numerous and their scale is great—for example, the country's ocean, coastal, and Great Lakes areas cover as much area as the terrestrial United States—solving them will require a whole-of-country effort, with critical roles for Tribal Nations, local, State, and Territorial governments, the private sector, academia, non-governmental organizations, a wide range of stakeholders, and the public. Actions to address these challenges are being developed and implemented across the country—at all scales, by governments, organizations, businesses, academia, and people of all kinds who are developing new science and tools, recognizing the critical importance of Indigenous Knowledge, building new technologies, and employing policies, management, and practices that prioritize sustainable outcomes and reflect the resilience, interconnectedness, value, and productivity of natural systems. Ocean policies, management, and practices focused on achieving healthy communities, ecosystems, and economies are needed to provide abundant co-benefits, including good-paying jobs, thriving communities, and healthy ocean ecosystems that support future discovery and innovation. These solutions can also provide an opportunity to advance more equitable access to the benefits provided by the ocean to people, and to create and sustain a diverse workforce.

To engage the Nation in developing a vision, goals, and high-level actions for sustainable management of the ocean, coasts, and Great Lakes, the Ocean Policy Committee, a Congressionally mandated, Cabinet-level interagency committee charged with coordinating Federal ocean policy (*https://www.noaa.gov/interagency-ocean-policy*), will develop a National Strategy for a Sustainable Ocean Economy (National Strategy) in consultation with federally recognized Tribes and input from governments, civil society, the private sector, and the public. The National Strategy will: (1) describe a vision and goals for sustainable management of the U.S. ocean, coasts, and Great Lakes; (2) characterize and assess needs and opportunities to achieve the vision and goals; (3) identify existing and new high-level actions by Federal, Tribal, State, Territorial, regional, and local governments that can advance sustainable management; and (4) describe how those actions will be implemented to engage and build on the work of and partnerships with civil society, the private sector, and the public.

Examples of subject matter that may be addressed by the National Strategy include, but are not necessarily limited to: ocean food and human health; ocean energy and resources; ocean-based tourism; ocean transportation; new ocean industries; climate change; marine and coastal ecosystems; ocean pollution; equity and environmental justice; ocean literacy and skills; economic valuation of coastal and ocean natural capital; ocean science and technology; ocean finance; Indigenous Knowledge, ancestral and historical areas of importance, and national security.

At the Federal level, the National Strategy will take into account current actions related to the sustainability of the nation's ocean, coasts, and Great Lakes, including, but not necessarily limited to: the Ocean Climate Action Plan (*https://www.whitehouse.gov/wp-content/uploads/2023/03/Ocean-Climate-Action-Plan_Final.pdf*), the National Nature Assessment (*https://www.globalchange.gov/nna*), and the National Strategy to Develop Statistics for Environmental-Economic Decisions (*https://www.whitehouse.gov/ostp/news-updates/2023/01/19/fact-sheet-biden-harris-administration-releases-national-strategy-to-put-nature-on-the-nations-balance-sheet/*).The Ocean Policy Committee is coordinating the development of the National Strategy in conjunction with the United States'

participation in the ''High Level Panel for a Sustainable Ocean Economy'' (Ocean Panel; *https://oceanpanel.org/*), committing with 16 other nations to develop sustainable ocean plans for their marine areas under national jurisdiction. This initiative aims to advance the prosperity, health, and security of participating nations through the sustainable management of their marine areas, and to provide a range of examples that can be considered as potential models by other nations. The U.S. National Strategy will serve as a sustainable ocean plan for the purposes of the Ocean Panel initiative.

Questions To Inform Development of the Strategy

Respondents may provide information for one or as many topics below as they choose. Submissions should clearly indicate which questions are being addressed. An interagency work group under the Ocean Policy Committee and co-led by the Department of the Interior and the Department of the Navy, in partnership with the CEQ and OSTP, and other Federal agencies and entities, will develop the National Strategy with input from, Tribal Nations, local, State, and Territorial governments, the private sector, academia, non-governmental organizations, a wide range of stakeholders, and the public. The workgroup is seeking input from the public on high-level goals and how to achieve them in the following areas:

- *Sustainable Ocean Economy.* What should the national vision and high-level goals be for a sustainable ocean economy? Are there successful regional or local efforts that could be applied nation-wide? What elements or activities do you consider critical to a sustainable ocean economy? Are there other topics beyond those listed above (*e.g.,* ocean food; ocean energy and resources; ocean-based tourism; ocean transportation; new ocean industries; climate change; marine and coastal ecosystems; ocean pollution; equity and environmental justice; ocean literacy and skills; economic valuation of the ocean's natural capital; ocean science, technology; ocean finance; Indigenous Knowledge and ancestral and historical areas of importance; and national security) that should be addressed?
- *Ocean, Coasts, and Great Lakes Priorities.* What are your priorities for sustainable management of the ocean, coasts, and Great Lakes at a local, state, Tribal, territorial, regional, and/or national scale? What key challenges do you face in achieving them? Are your priorities for ocean, coastal, and Great Lakes management reflected in existing workplans, strategy documents, or other materials? What practices/tactics are you employing or would you need to employ to meet those priorities?
- *An Informed and Responsive National Strategy.* Are there gaps in our knowledge of the ocean, coasts, and Great Lakes that need to be addressed to support sustainable ocean management? Are there opportunities to improve how we manage the use of marine ecosystems to maximize their benefits while minimizing human impacts on them? For example, and as relevant only to the U.S. Exclusive Economic Zone, how can the United States advance its commitment to a precautionary approach to seabed mining and other emerging ocean industries? What co-management and co-stewardship practices are needed to meet ocean, coasts, and Great Lakes sustainability?
- *Additional Considerations.* Is there anything else you would like to be considered in the development of the National Strategy?

Please note that this RFI is designed to complement existing Federal activities in this space. Previous relevant comments submitted to the RFIs for the Ocean Climate Action Plan (*https://www.federalregister.gov/documents/2022/10/04/2022-21480/ocean-climate-action-plan*) and the National Nature Assessment (*https://www.federalregister.gov/documents/2022/10/31/2022-23593/framing-the-national-nature-assessment*) will also be considered to inform the development of the National Strategy.

Dated: June 26, 2023.

Stacy Murphy,

Deputy Chief Operations Officer/Security Officer.

[FR Doc. 2023–13839 Filed 6–28–23; 8:45 am]

BILLING CODE 3270–F1–P

SECURITIES AND EXCHANGE COMMISSION

[SEC File No. 270–323, OMB Control No. 3235–0362]

Proposed Collection; Comment Request; Extension: Form 5—Annual Statement of Beneficial Ownership

Upon Written Request Copies Available From: Securities and Exchange Commission, Office of FOIA Services, 100 F Street NE, Washington, DC 20549–2736

Notice is hereby given that, pursuant to the Paperwork Reduction Act of 1995 (44 U.S.C. 3501 *et seq.*), the Securities and Exchange Commission (''Commission'') has submitted to the Office of Management and Budget this request for extension of the previously approved collection of information discussed below.

Under Section 16(a) of the Securities Exchange Act of 1934 (''Exchange Act'') (15 U.S.C. 78a *et seq.*) every person who is directly or indirectly the beneficial owner of more than 10 percent of any class of any equity security (other than an exempted security) which registered pursuant to Section 12 of the Exchange Act, or who is a director or an officer of the issuer of such security (collectively ''reporting persons''), must file statements setting forth their security holdings in the issuer with the Commission. Form 5 (17 CFR 249.105) is an annual statement of beneficial ownership of securities. The information disclosure provided on Form 5 is mandatory. All information is provided to the public for review. We estimate that approximately 5,939 reporting persons file Form 5 annually and we estimate that it takes approximately one hour to prepare the form for a total of 5,939 annual burden hours.

An agency may conduct or sponsor, and a person is not required to respond to, a collection of information unless it displays a currently valid control number.

The public may view background documentation for this information collection at the following website: *www.reginfo.gov*. Find this particular information collection by selecting ''Currently under 30-day Review—Open for Public Comments'' or by using the search function. Written comments and recommendations for the proposed information collection should be sent within 30 days of publication of this notice by July 31, 2023 to (i) *www.reginfo.gov/public/do/PRAMain* and (ii) David Bottom, Director/Chief Information Officer, Securities and Exchange Commission, c/o John Pezzullo, 100 F Street NE, Washington, DC 20549, or by sending an email to: *PRA_Mailbox@sec.gov*.

Dated: June 23, 2023.

J. Lynn Taylor,

Assistant Secretary.

BILLING CODE 8011–01–P

SECURITIES AND EXCHANGE COMMISSION

[Release No. 34–97789; File No. SR–ICEEU–2023–016]

Self-Regulatory Organizations; ICE Clear Europe Limited; Notice of Filing and Immediate Effectiveness of Proposed Rule Change Relating to Amendments FTSE 100 Index Contracts and SARON Futures Contracts

June 22, 2023.

Pursuant to Section 19(b)(1) of the Securities Exchange Act of 1934 (''Act''),[1] and Rule 19b–4 thereunder,[2] notice is hereby given that on June 9, 2023, ICE Clear Europe Limited filed with the Securities and Exchange Commission (''Commission'') the proposed rule changes described in Items I, II and III below, which Items have been prepared by ICE Clear Europe. ICE Clear Europe filed the proposed rule change pursuant to Section 19(b)(3)(A) of the Act[3] and Rule 19b–4(f)(2) thereunder,[4] such that the proposed rule change was immediately effective upon filing with the Commission. The Commission is publishing this notice to solicit comments on the proposed rule change from interested persons.

I. Clearing Agency's Statement of the Terms of Substance of the Proposed Rule Change

ICE Clear Europe Limited (''ICE Clear Europe'' or the ''Clearing House'') proposes to amend certain clearing transaction fees for FTSE 100 index contracts and SARON futures contracts (the ''Contracts'').[5]

II. Clearing Agency's Statement of the Purpose of, and Statutory Basis for, the Proposed Rule Change

In its filing with the Commission, ICE Clear Europe included statements concerning the purpose of and basis for the proposed rule change and discussed any comments it received on the proposed rule change. The text of these statements may be examined at the places specified in Item IV below. ICE Clear Europe has prepared summaries, set forth in sections (A), (B), and (C) below, of the most significant aspects of such statements.

(A) Clearing Agency's Statement of the Purpose of, and Statutory Basis for, the Proposed Rule Change

(a) Purpose

ICE Clear Europe is proposing to increase certain clearing fees for specified ICE Futures Europe (''IFEU'') contracts, specifically the ICE Futures Europe FTSE 100 Futures and Options Contracts, FTSE 100 Dividend Index Futures Contracts (collectively the ''Equity Index Contracts'') and Three-Month SARON® Index Futures Contracts (the ''SARON Futures.'') The proposed fee changes are set forth in the following tables:

	Existing clearing fee (£/contract)	Proposed new clearing fee (£/contract)
CONTRACT—FTSE 100 Futures and Options Contract		
Outrights/Basis	0.24	0.27
Block	0.29	0.33
Block with Delayed Publication	0.33	0.35
Cash Settlement fee (Futures)	0.35	0.40
Exercise/Assignment fee (Options)	0.35	0.40
Block fee cap (Options)	2,080	2,350
Block fee cap with Delayed Publication (Options)	2,800	3,100
Exercise/Assignment fee cap (Options)	2,400	2,700
FTSE 100 Trade at Index Close Published	0.28	0.31
FTSE 100 Trade at Index Close Delayed Published	0.35	0.38
CONTRACT—FTSE 100 Dividend Index Futures Contract		
Outrights/Basis	0.24	0.27
Block	0.29	0.33
Block with Delayed Publication	0.33	0.35
Cash Settlement fee	0.35	0.40
CONTRACT—SARON Index Futures		
Outrights/Basis	0.40	0.48
Block	0.40	0.48
Block with Delayed Publication	0.56	0.68
Cash Settlement fee	0.50	0.60

The proposed fee changes are intended to become operative on July 1, 2023, subject to regulatory approval.

The proposed increases in clearing fees for the Equity Index Contracts are intended to provide additional revenue to support the ongoing investments by ICE Clear Europe in developing clearing for derivative products on FTSE indexes, including the Equity Index Contracts. The amendments are also intended to bring fees into line with the fees of similar equity index contracts traded on other European exchanges, which have increased in 2023.

The proposed increases in fees for SARON Futures are intended to provide additional revenue to support ongoing clearing of the SARON Futures, including to support marketing and business development efforts relating to Swiss franc denominated interest rate derivatives in light of the continued evolution of European markets as a result of ongoing regulatory changes under EU law and other factors.

[2] 17 CFR 240.19b–4.

[3] 15 U.S.C. 78s(b)(3)(A).

[4] 17 CFR 240.19b–4(f)(2).

[5] Capitalized terms used but not defined herein have the meanings specified in the IFEU Equity Index Contracts and SARON Futures or, if not defined therein, the ICE Clear Europe Clearing Rules.

The amendments to the fees for both Equity Index Contracts and SARON Futures will also generally provide additional revenue to support Clearing House investments that enhance the services provided to market participants, including through new clearing technology to augment the existing clearing platform, reduce systems risk, and add additional regulatory reporting related to MIFID and other regulations. Fee increases also reflect the current inflationary macroeconomic environment.

(b) Statutory Basis

ICE Clear Europe believes that the proposed fee amendments for the Equity Index Contracts and SARON Futures are consistent with the requirements of Section 17A of the Act[6] and the regulations thereunder applicable to it. In particular, Section 17A(b)(3)(D) of the Act[7] requires that ''[t]he rules of the clearing agency provide for the equitable allocation of reasonable dues, fees, and other charges among its participants.'' ICE Clear Europe believes that its clearing fees, as proposed to be amended, would be reasonable and appropriate for the Contracts. ICE Clear Europe's fees are imposed at the product level on a per transaction basis (as are the applicable exchange fees), and would be generally applicable to market participants trading in the contracts. ICE Clear Europe has determined that the increased clearing fees are appropriate to support continued investments in clearing operations. Specifically, the increased fees for the Equity Index Contracts would support ongoing development of clearing of derivatives on FTSE indices, and will be consistent with fees for other contract for similar equity index futures contracts traded on other exchanges. The increased fees for the SARON Futures would facilitate ongoing market and business development with respect to that contract. ICE Clear Europe has further determined that the increased fees would be commensurate with the size and nature of the contracts and would provide an appropriate balance between the costs of clearing for market participants and the expenses incurred by ICE Clear Europe in offering clearing of the relevant contracts, taking into account the investments ICE Clear Europe has made and will continue to make in clearing such products. As such, in ICE Clear Europe's view, the amendments are consistent with the equitable allocation of reasonable dues, fees, and other charges among its Clearing Members and other market participants, within the meaning of Section 17A(b)(3)(D) of the Act.[8]

The proposed amendments are also consistent with the requirements of Section 17A(b)(3)(F) of the Act[9] which requires, among other things, that the ''rules of a clearing agency [. . .] are not designed to permit unfair discrimination in the admission of participants or among participants in the use of the clearing agency.'' As noted above, the proposed fee changes for the Contracts would apply on a per transaction basis and would apply to Clearing Members and market participants generally. As a result, the amendments would not result in any unfair discrimination among Clearing Members in their use of the Clearing House, within the meaning of Section 17A(b)(3)(F) of the Act.[10]

(B) Clearing Agency's Statement on Burden on Competition

ICE Clear Europe does not believe the proposed amendments would have any impact, or impose any burden, on competition not necessary or appropriate in furtherance of the purposes of the Act. Although ICE is increasing certain clearing fees, as set forth herein, it believes such changes are appropriate to reflect the costs and expenses incurred by the Clearing House and to support continued investment in its operations and infrastructure to support clearing activities for these and other contracts. Further, as discussed above, because fees are imposed on a per transaction basis at the product level, the revised fees would be applied equally to all Clearing Members and other market participants who transact in the Contracts. ICE does not believe that the amendments would adversely affect the ability of such Clearing Members or other market participants generally to access clearing services for the Contracts. Further, since the revised fees will apply to market participants generally, ICE believes that the amendments would not otherwise affect competition among Clearing Members, adversely affect the market for clearing services or limit market participants' choices for obtaining clearing services. Accordingly, ICE Clear Europe does not believe that the amendments would impose any impact or burden on competition that is not appropriate in furtherance of the purpose of the Act.

(C) Clearing Agency's Statement on Comments on the Proposed Rule Change Received From Members, Participants or Others

Written comments relating to the proposed amendment have not been solicited or received by ICE Clear Europe. ICE Clear Europe will notify the Commission of any written comments received with respect to the proposed rule change.

III. Date of Effectiveness of the Proposed Rule Change, Security-Based Swap Submission and Advance Notice and Timing for Commission Action

The foregoing rule change has become effective pursuant to Section 19(b)(3)(A) of the Act[11] and paragraph (f) of Rule 19b–4[12] thereunder. At any time within 60 days of the filing of the proposed rule change, the Commission summarily may temporarily suspend such rule change if it appears to the Commission that such action is necessary or appropriate in the public interest, for the protection of investors, or otherwise in furtherance of the purposes of the Act.

IV. Solicitation of Comments

Interested persons are invited to submit written data, views, and arguments concerning the foregoing, including whether the proposed rule change is consistent with the Act. Comments may be submitted by any of the following methods:

Electronic Comments

- Use the Commission's internet comment form (*http://www.sec.gov/rules/sro.shtml*) or
- Send an email to *rule-comments@sec.gov*. Please include file number SR–ICEEU–2023–016 on the subject line.

Paper Comments

- Send paper comments in triplicate to Secretary, Securities and Exchange Commission, 100 F Street NE, Washington, DC 20549–1090.

All submissions should refer to file number SR–ICEEU–2023–016. This file number should be included on the subject line if email is used. To help the Commission process and review your comments more efficiently, please use only one method. The Commission will post all comments on the Commission's internet website (*http://www.sec.gov/rules/sro.shtml*). Copies of the submission, all subsequent amendments, all written statements with respect to the proposed rule change that are filed with the Commission, and all written

[6] 15 U.S.C. 78q–1.
[7] 15 U.S.C. 78q–1(b)(3)(D).

BILLING CODE 8011–01–P

SECURITIES AND EXCHANGE COMMISSION

[SEC File No. 270–598, OMB Control No. 3235–0655]

Proposed Collection; Comment Request; Extension: Regulation 14N and Schedule 14N

Upon Written Request Copies Available From: Securities and Exchange Commission, Office of FOIA Services, 100 F Street NE, Washington, DC 20549–2736

Notice is hereby given that, pursuant to the Paperwork Reduction Act of 1995 (44 U.S.C. 3501 *et seq.*), the Securities and Exchange Commission (''Commission'') has submitted to the Office of Management and Budget this request for extension of the previously approved collection of information discussed below.

Schedule 14N (17 CFR 240.14n–101) requires the filing of certain information with the Commission by shareholders who submit a nominee or nominees for director pursuant to applicable state law, or a company's governing documents. Schedule 14N provides notice to the company of the shareholder's or shareholder group's intent to have the company include the shareholder's or shareholder group's nominee or nominees for director in the company's proxy materials. This information is intended to assist shareholders in making an informed voting decision with regards to any nominee or nominees put forth by a nominating shareholder or group, by allowing shareholders to gauge the nominating shareholder's interest in the company, longevity of ownership, and intent with regard to continued ownership in the company. We estimate that Schedule 14N takes approximately 40 hours per response and will be filed by approximately 10 issuers annually. In addition, we estimate that 75% of the 40 hours per response (30 hours per response) is prepared by the issuer for an annual reporting burden of 300 hours (30 hours per response × 10 responses).

An agency may conduct or sponsor, and a person is not required to respond to, a collection of information unless it displays a currently valid control number.

The public may view background documentation for this information collection at the following website: *www.reginfo.gov*. Find this particular information collection by selecting ''Currently under 30-day Review—Open for Public Comments'' or by using the search function. Written comments and recommendations for the proposed information collection should be sent within 30 days of publication of this notice by July 31, 2023 to (i) *www.reginfo.gov/public/do/PRAMain* and (ii) David Bottom, Director/Chief Information Officer, Securities and Exchange Commission, c/o John Pezzullo, 100 F Street NE, Washington, DC 20549, or by sending an email to: *PRA_Mailbox@sec.gov*.

Dated: June 23, 2023.

J. Lynn Taylor,

Assistant Secretary.

SECURITIES AND EXCHANGE COMMISSION

[SEC File No. 270–112, OMB Control No. 3235–0101]

Proposed Collection; Comment Request; Extension: Form 144—Notice of Proposed Sale of Securities Pursuant to Rule 144 Under the Securities Act of 1933

Upon Written Request Copies Available From: Securities and Exchange Commission, Office of FOIA Services, 100 F Street NE, Washington, DC 20549–2736

Notice is hereby given that, pursuant to the Paperwork Reduction Act of 1995 (44 U.S.C. 3501 *et seq.*), the Securities and Exchange Commission (''Commission'') has submitted to the Office of Management and Budget this request for extension of the previously approved collections of information discussed below.

Form 144 (17 CFR 239.144) is used to report the sale of securities during any three-month period that exceeds 5,000 shares or other units and has an aggregate sales price that does not exceed $50,000. Under Sections 2(a)(11), 4(a)(1), 4(a)(2), 4(a)(4) and 19(a) of the Securities Act of 1933 (15 U.S.C. 77b(a)(11), 77d(a)(1), 77d(a)(2), 77d(a)(4) and 77s(a)) and Rule 144 (17 CFR 230.144) there under, the Commission is authorized to solicit the information required to be supplied by Form 144. The objectives of the rule could not be met, if the information collection was not required. The information collected must be filed with the Commission and is publicly available. Form 144 takes approximately one burden hour per response and is filed by 33,725 respondents for a total of 33,725 total burden hours.

An agency may conduct or sponsor, and a person is not required to respond to, a collection of information unless it displays a currently valid control number.

The public may view background documentation for this information collection at the following website: *www.reginfo.gov.* Find this particular information collection by selecting ''Currently under 30-day Review—Open for Public Comments'' or by using the search function. Written comments and recommendations for the proposed information collection should be sent within 30 days of publication of this notice by July 31, 2023 to (i) *www.reginfo.gov/public/do/PRAMain* and (ii) David Bottom, Director/Chief Information Officer, Securities and Exchange Commission, c/o John

SECURITIES AND EXCHANGE COMMISSION

[Release No. 34–97788; File No. SR–Phlx–2023–26]

Self-Regulatory Organizations; Nasdaq PHLX LLC; Notice of Filing and Immediate Effectiveness of Proposed Rule Change To Amend Phlx Options 7 Regarding PXL Order Pricing

June 22, 2023.

Pursuant to Section 19(b)(1) of the Securities Exchange Act of 1934 (''Act''),[1] and Rule 19b–4 thereunder,[2] notice is hereby given that on June 13, 2023, Nasdaq PHLX LLC (''Phlx'' or ''Exchange'') filed with the Securities and Exchange Commission (''SEC'' or ''Commission'') the proposed rule change as described in Items I, II, and III, below, which Items have been prepared by the Exchange. The Commission is publishing this notice to solicit comments on the proposed rule change from interested persons.

I. Self-Regulatory Organization's Statement of the Terms of Substance of the Proposed Rule Change

The Exchange proposes to amend its Pricing Schedule at Options 7: Section 1, General Provisions; Section 3, Rebates and Fees for Adding and Removing Liquidity in SPY; and Section 6, Other Transaction Fees.[3]

The text of the proposed rule change is available on the Exchange's website at *https://listingcenter.nasdaq.com/rulebook/phlx/rules,* at the principal office of the Exchange, and at the Commission's Public Reference Room.

[1] 15 U.S.C. 78s(b)(1).

[2] 17 CFR 240.19b–4.

[3] On June 2, 2023, the Exchange withdrew SR–Phlx–2023–20 and replaced it with SR–Phlx–2023–24. On June 5, 2023, the Exchange withdrew SR–Phlx–2023–24 and replaced it with SR–Phlx–2023–25. On June 13, 2023, the Exchange withdrew SR–Phlx–2023–25 and replaced it with the instant filing.

II. Self-Regulatory Organization's Statement of the Purpose of, and Statutory Basis for, the Proposed Rule Change

In its filing with the Commission, the Exchange included statements concerning the purpose of and basis for the proposed rule change and discussed any comments it received on the proposed rule change. The text of these statements may be examined at the places specified in Item IV below. The Exchange has prepared summaries, set forth in sections A, B, and C below, of the most significant aspects of such statements.

A. Self-Regulatory Organization's Statement of the Purpose of, and Statutory Basis for, the Proposed Rule Change

1. Purpose

The Exchange proposes to amend Phlx's Pricing Schedule at Options 7: Section 1, General Provisions; Section 3, Rebates and Fees for Adding and Removing Liquidity in SPY; and Section 6, Other Transaction Fees. Specifically, Phlx proposes to: (1) introduce new references in Options 7, Section 1; and (2) amend its Price Improvement XL (''PIXL'')[4] pricing for both options overlying SPY and other options to provide more detail regarding the pricing of unrelated market or marketable interest and make other amendments to utilize the proposed references. Each change is described below.

Options 7, Section 1

The Exchange proposes to amend Options 7, Section 1(c) to introduce four new references: ''Initiating Order'', ''PIXL Auction Order'', ''PIXL Order'', and ''PIXL Response.''

The Exchange proposes to provide that the term ''Initiating Order'' is one-side of a PIXL Auction Order that represents principal or other interest which is paired with a PIXL Order.

The Exchange proposes to provide that a ''PIXL Auction Order'' is a two-sided, paired order, comprised of a PIXL Order and an Initiating Order.

[4] A member may electronically submit for execution an order it represents as agent on behalf of a Public Customer, broker-dealer, or any other entity (''PIXL Order'') against principal interest or against any other order it represents as agent (an ''Initiating Order'') provided it submits the PIXL Order for electronic execution into the PIXL Auction pursuant to Options 3, Section 13.

The Exchange proposes to provide that a ''PIXL Order'' is one-side of a PIXL Auction Order that represents an agency order on behalf a Public Customer, broker-dealer or other entity which is paired with an Initiating Order.

Finally, the Exchange proposes to provide that a ''PIXL Response'' is interest that executed against the PIXL Order pursuant to Options 3, Section 13.

The Exchange believes that these references will bring more transparency to Phlx's PIXL pricing.[5]

Options 7, Section 3

The Exchange proposes to amend PIXL pricing for options overlying SPY in Options 7, Section 3, Part C. The Exchange proposes to replace the current text below with a proposed table. The current text of Options 7, Section 3, related to PIXL Executions in SPY, provides,

- *Initiating Order:* $0.05 per contract. Members or member organizations that qualify for Options 7, Section 2, Customer Rebate Tiers 2 through 6 or qualify for the Monthly Firm Fee Cap are eligible for a rebate of $0.12 per contract for all SPY Complex PIXL Orders greater than 499 contracts when contra to an Initiating Order, provided the member or member organization executes an average of 2,500 contracts per day of SPY Complex PIXL Orders in a month.
- When the PIXL Order is contra to the Initiating Order, a Customer PIXL Order will be assessed $0.00 per contract and all other Non-Customer market participants will be assessed a $0.38 per contract fee when contra to an Initiating Order.
- When the PIXL Order is contra to other than the Initiating Order, the PIXL Order will be assessed $0.00 per contract, unless the PIXL Order is a Customer, in which case the Customer will receive a rebate of $0.40 per contract.
- All other Non-Customer contra parties to the PIXL Order that are not the Initiating Order will be assessed a Fee for Removing Liquidity of $0.50 per contract or will receive the Rebate for Adding Liquidity. When the PIXL Order is contra to a Lead Market Maker or Market Maker quote, which was established at the initiation of a PIXL auction, the Customer PIXL Order will not be eligible for a rebate.

In lieu of the current rule text, the Exchange proposes the below table.

[5] The Exchange also proposes a technical amendment in Options 7, Section 1(c) to add a period to the end of the reference to ''floor transaction.''

Type of market participant	PIXL Order executes against Initiating Order [1]		PIXL Order executes against a PIXL Response or unrelated market or marketable interest			
	Initiating Order fee	PIXL Order fee	PIXL Order rebate	PIXL Order fee	PIXL Response or unrelated market or marketable interest received *during* a PIXL Auction fee	Unrelated market or marketable interest received *prior* to a PIXL Auction fee
Customer	$0.05	$0.00	[2] $0.40	N/A	$0.00	Options 7, Section 3, Part A Rebate for Adding Liquidity/Options 7, Section 3, Part B Fee for Adding Liquidity.
Non-Customer	0.05	0.38	N/A	$0.00	0.50	Options 7, Section 3 Part A Rebate for Adding Liquidity/Options 7, Section 3 Part B Fee for Adding Liquidity.

The current rule text in the first bullet states that the Initiating Order is $0.05 per contract. This fee currently applies to Customers [6] and Non-Customers [7] and is reflected in the proposed table in a manner consistent with the current rule text. The remainder of the sentence was relocated to footnote 1. The Exchange proposes to amend the original rule text by breaking the current sentence into two sentences and restating the rebate that will be paid by the Exchange for SPY Complex Orders in a succinct manner. This non-substantive amendment to new footnote 1 would provide,

A rebate of $0.12 will be paid to members or member organizations that qualify for Options 7, Section 2, Customer Rebate Tiers 2 through 6 or qualify for the Monthly Firm Fee Cap. The rebate will be paid on all SPY Complex PIXL Orders greater than 499 contracts when contra to an Initiating Order, provided the member or member organization executes an average of 2,500 contracts per day of SPY Complex PIXL Orders in a month.

The current rule text in the second bullet applies to the scenario where the PIXL Order is contra to the Initiating Order. In this case, the Customer PIXL Order is assessed $0.00 per contract and Non-Customer PIXL Orders are assessed a $0.38 per contract fee. The proposed table reflects these current PIXL Order fees and does not substantively amend the rule text in this second bullet.

The current rule text in the third bullet applies to the scenario when the PIXL Order is contra to a PIXL Response or unrelated market or marketable interest. In this case, the PIXL Order is $0.00 for Non-Customers and the Customer receives a rebate of $0.40 per contract. The proposed table reflects these current PIXL Order fees and does not substantively amend the rule text in this third bullet.

Finally, the current rule text in the fourth bullet provides that Non-Customer PIXL Responses or unrelated market or marketable interest that trades with a PIXL Order are assessed a Fee for Removing Liquidity of $0.50 per contract. The Exchange notes that this fee is currently appliable to unrelated market or marketable interest that was received *during* the PIXL Auction. This fee is reflected in the proposed table but is not referred to as a Fee to Remove Liquidity, rather simply as a fee. The rule text states that Non-Customers could also receive a Rebate for Adding Liquidity, but such a rebate is not possible in this scenario as the PIXL Responses and unrelated market or marketable interest would be removing liquidity in this scenario. Because the Rebate for Adding Liquidity is not possible in this scenario, it is being removed. The last sentence of the final bullet is reflected in footnote 2 to the table and the language has been amended to replace the words ''contra to'' with ''executed against.'' Also, the word ''unrelated'' was added before Lead Market Maker or Market Maker quote because that interest would have been placed on the order book. The Exchange amended the language to clearly state ''which was received prior to the PIXL Auction'' instead of ''established at the initiation of a PIXL auction.'' [8] The Exchange believes the proposed rule text adds clarity to understand the particular scenario.

The current rule text does not make clear the fee that a Customer PIXL Response or unrelated market or marketable interest, received *during* a PIXL Auction, would be assessed when that response or interest executes against a PIXL Order. Today, the Customer PIXL Response or unrelated market or marketable interest received *during* a PIXL Auction is not assessed a fee in this scenario. The Exchange proposes to memorialize the $0.00 per contract rate in this proposed table at this time to add transparency to the SPY PIXL pricing. This fee is not changing, rather it is being memorialized in the proposed table.

The Exchange notes that unrelated market or marketable interest received in SPY *during* a PIXL Auction is noted in the current rule text, other than the Customer PIXL Response or unrelated market or marketable interest described above. Today, unrelated market or marketable interest in SPY received *prior* to the PIXL Auction is subject to the simple order book pricing within Options 7, Section 3, Part A and the complex order book pricing within Options 7, Section 3, Part B. At this time, the Exchange proposes to memorialize this pricing in the proposed table. The Exchange applies the order book pricing within Options 7, Section 3, Parts A and B to interest received *prior to* the PIXL Auction, which is considered unrelated market or marketable interest for purposes of the PIXL Auction, because at the time the interest was submitted to the order book, the Phlx members and member organizations would have known [9] that

[6] The term ''Customer'' applies to any transaction that is identified by a member or member organization for clearing in the Customer range at The Options Clearing Corporation (''OCC'') which is not for the account of a broker or dealer or for the account of a ''Professional'' (as that term is defined in Options 1, Section 1(b)(45)). *See* Options 7, Section 1(c).

[7] The term ''Non-Customer'' applies to transactions for the accounts of Lead Market Makers, Market Makers, Firms, Professionals, Broker-Dealers and JBOs. *See* Options 7, Section 1(c).

[8] *See* Securities Exchange Act Release No. 80064 (February 24, 2017), 82 FR 11666 (February 24, 2017) (SR–Phlx–2017–15).

[9] Phlx members and member organizations become aware of ongoing PIXL Auctions when Phlx disseminates a PIXL Auction Notification or ''PAN.'' When the Exchange receives a PIXL Order for Auction processing, a PAN detailing the side and size and option series of the PIXL Order is sent

there was no ongoing PIXL Auction and would not expect to be subject to the PIXL pricing. Rather, these market participants would be subject to SPY order book pricing similar to all other orders entered into Phlx's order book. In contrast, the Exchange applies the SPY PIXL pricing within Options 7, Section 3 to the unrelated market or marketable interest that interest arrived *during* a PIXL Auction because Phlx seeks to incentivize members and member organizations to submit PIXL Auction Orders to receive a guaranteed execution and potential price improvement. Phlx members and member organizations submitting interest to the order book during a PIXL Auction are aware that they may be allocated in the PIXL Auction. The Exchange assesses the SPY PIXL pricing within Options 7, Section 3 in the same manner that responders to the PIXL Auction are assessed fees for their PAN responses. The unrelated market or marketable interest that received an allocation within the PIXL Auction would be uniformly subject to the same fees as those Phlx members and member organizations who submitted PAN responses and were allocated, thereby receiving a guaranteed execution and potential price improvement. The pricing for unrelated market or marketable interest received *during* a PIXL Auction is not changing, this is the pricing being assessed today by Phlx.

Options 7, Section 6

The Exchange proposes to amend Options 7, Section 6.A, PIXL Pricing. The Exchange proposes to create paragraphs in lieu of the single block text within Options 7, Section 6.A which describes the Initiating Order, and demarcate each paragraph with a symbol. The Exchange is not otherwise amending that paragraph.

Next, the Exchange proposes to amend the rule text under the heading, ''PIXL Order Executions in Options 7, Section 4, Multiply Listed Options (including ETFs, ETNs and indexes which are Multiply Listed):'' The Exchange is amending the current rule text in the second bullet which currently states,

When a PIXL Order is contra to a PIXL Auction Responder, a Customer PIXL Order will be assessed $0.00 per contract, other Non-Customer PIXL Orders will be assessed $0.30 per contract in Penny Symbols or $0.38 per contract in Non-Penny Symbols. A Responder that is a Lead Market Maker or a Market Maker will be assessed $0.25 per contract in Penny Symbols or $0.40 per contract in Non-Penny Symbols. Other Non-Customer Responders will be assessed $0.48 per contract in Penny Symbols or $0.70 per contract in Non-Penny Symbols when contra to a PIXL Order. A Responder that is a Customer will be assessed $0.00 per contract in Penny Symbols and Non-Penny Symbols.

The Exchange proposes to create two separate bullets in lieu of this one bullet. The first bullet would provide,

When a PIXL Order executes against a PIXL Response or unrelated market or marketable interest received during a PIXL Auction, a Customer PIXL Order will be assessed $0.00 per contract, and other Non-Customer PIXL Orders will be assessed $0.30 per contract in Penny Symbols or $0.38 per contract in Non-Penny Symbols.

In amending this sentence, the Exchange proposes to replace the words ''is contra to'' with ''executes against.'' Also, the Exchange proposes to replace the words ''Auction Responder'' with ''PIXL Response or unrelated market or marketable interest received during a PIXL Auction.'' Finally, the Exchange is adding an ''and'' in the sentence to make the sentence clear. These non-substantive changes utilize the references proposed within Options 7, Section 1. As amended, the second bullet would provide,

A PIXL Response or unrelated market or marketable interest received during a PIXL Auction from a Lead Market Maker or a Market Maker will be assessed $0.25 per contract in Penny Symbols or $0.40 per contract in Non-Penny Symbols. Other Non-Customer PIXL Responses and unrelated market or marketable interest received during a PIXL Auction will be assessed $0.48 per contract in Penny Symbols or $0.70 per contract in Non-Penny Symbols when contra to a PIXL Order. A PIXL Response or unrelated market or marketable interest received during a PIXL Auction from a Customer will be assessed $0.00 per contract in Penny Symbols and Non-Penny Symbols.

Similar to the first bullet, the Exchange proposes to replace ''Responder'' with ''PIXL Response or unrelated market or marketable interest received during a PIXL Auction.'' [10] These non-substantive changes utilize the references proposed within Options 7, Section 1.

The Exchange is also amending the current rule text in the third bullet which currently states,

When a PIXL Order is contra to a resting order or quote a Customer PIXL Order will be assessed $0.00 per contract, other Non-Customer will be assessed $0.30 per contract and the resting order or quote will be assessed the appropriate Options Transaction Charge in Options 7, Section 4.

The Exchange proposes to create two separate bullets in lieu of this one bullet. The first bullet would provide,

When a PIXL Order is a Customer order and executes against unrelated market or marketable interest received prior to a PIXL Auction, the Customer order will be assessed $0.00 per contract. Unrelated market or marketable interest received prior to a PIXL Auction will be assessed the appropriate Options Transaction Charge in Options 7, Section 4.

In amending this sentence, the Exchange proposes to replace the words ''is contra to a resting order or quote'' with ''executes against unrelated market or marketable interest received prior to a PIXL Auction'' and ''PIXL Order'' with ''Customer PIXL Order.'' Any order resting on the order book would have been received prior to the PIXL Auction. The Exchange also proposes to add a new sentence that states, ''Unrelated market or marketable interest received prior to a PIXL Auction will be assessed the appropriate Options Transaction Charge in Options 7, Section 4.'' Today, the rule text does not describe the manner in which the Exchange prices unrelated market or marketable interest received prior to the commencement of a PIXL Auction. This new sentence memorializes the current pricing that Phlx members and member organizations are assessed for such interest, which is order book pricing. As amended, the second bullet would provide,

Non-Customer PIXL Orders will be assessed $0.30 per contract when trading with an unrelated market or marketable interest received prior to the PIXL Auction and the unrelated market or marketable interest received prior to the PIXL Auction will be assessed the appropriate Options Transaction Charge in Options 7, Section 4.

The Exchange is adding the words ''PIXL Order'' after Non-Customer since it started a new sentence to retain the original reference to a PIXL Order at the beginning of the current sentence.[11] To add more context to this scenario, the Exchange is also noting that ''when trading with an unrelated market or marketable interest received prior to the PIXL Auction'' to make clear the type of interest trading with the Non-Customer PIXL Order. The Exchange is also replacing the phrase ''resting order or quote'' with ''unrelated market or marketable interest received prior to the PIXL Auction.'' These non-substantive amendments utilize the references within Options 7, Section 1. Also, of note, any order resting on the order

over the Exchange's TOPO data feed pursuant to Options 3, Section 23(a)(1) and Specialized Quote Feed pursuant to Options 3, Section (a)(i)(B). *See* Phlx Options 3, Section 13(b)(1)(C).

[10] The Exchange proposes other technical amendments for readability of the sentence.

[11] The Exchange is also making other technical changes to start a new paragraph, removing '', other.''

book would have been received prior to the PIXL Auction.

As noted herein, the Exchange applies the order book pricing within Options 7, Section 4 to interest received *prior to* the PIXL Auction, which is considered unrelated market or marketable interest for purposes of the PIXL Auction, because at the time the interest was submitted to the order book, the Phlx members and member organizations would have known that there was no ongoing PIXL Auction and would not expect to be subject to the PIXL pricing. In contrast, the Exchange applies PIXL pricing within Options 7, Section 6 to the unrelated market or marketable interest when interest arrived *during* a PIXL Auction because Phlx seeks to incentivize members and member organizations to submit PIXL Auction Orders to receive a guaranteed execution, and potential price improvement. Phlx members and member organizations submitting interest to the order book during a PIXL Auction are aware that they may be allocated in the PIXL Auction. These market participants would be subject to order book pricing similar to all other orders entered into Phlx's order book. The Exchange assesses the PIXL pricing in Options 7, Section 6 in the same manner that responders to the PIXL Auction are assessed fees for their PAN responses. The unrelated market or marketable interest that received an allocation within the PIXL Auction would be uniformly subject to the same fees as those Phlx members and member organizations who submitted PAN responses and were allocated, thereby receiving a guaranteed execution and potential price improvement.

The Exchange's pricing models for the order book and PIXL Auction each seek to attract liquidity to Phlx and reward members and member organizations differently for the order flow. To this end, the Exchange's pricing considers the manner in which orders interact with the PIXL Auction based on the timing of when the order entered the order book. The Exchange's pricing is consistent with its current practice of assigning the applicable pricing for auctions versus order book pricing depending on how and when the order was submitted to the Exchange.

2. Statutory Basis

The Exchange believes that its proposal is consistent with Section 6(b) of the Act,[12] in general, and furthers the objectives of Sections 6(b)(4) and 6(b)(5) of the Act,[13] in particular, in that it provides for the equitable allocation of reasonable dues, fees, and other charges among members and issuers and other persons using any facility, and is not designed to permit unfair discrimination between customers, issuers, brokers, or dealers.

The proposed changes to its Pricing Schedule are reasonable in several respects. As a threshold matter, the Exchange is subject to significant competitive forces in the market for options transaction services that constrain its pricing determinations in that market. The fact that this market is competitive has long been recognized by the courts. In *NetCoalition* v. *Securities and Exchange Commission* [14] (''NetCoalition''), the D.C. Circuit stated, ''[n]o one disputes that competition for order flow is 'fierce.' . . . As the SEC explained, '[i]n the U.S. national market system, buyers and sellers of securities, and the broker-dealers that act as their order-routing agents, have a wide range of choices of where to route orders for execution'; [and] 'no exchange can afford to take its market share percentages for granted' because 'no exchange possesses a monopoly, regulatory or otherwise, in the execution of order flow from broker dealers'. . . .'' [15]

Numerous indicia demonstrate the competitive nature of this market. For example, clear substitutes to the Exchange exist in the market for options transaction services. The Exchange is only one of sixteen options exchanges to which market participants may direct their order flow. Within this environment, market participants can freely and often do shift their order flow among the Exchange and competing venues in response to changes in their respective pricing schedules. Within the foregoing context, the proposal represents a reasonable attempt by the Exchange to attract additional order flow to the Exchange and increase its market share relative to its competitors.

Options 7, Section 1

The Exchange's proposal to amend Options 7, Section 1(c) to introduce four new references: ''Initiating Order'', ''PIXL Auction Order'', ''PIXL Order'', and ''PIXL Response'' is reasonable, equitable and not unfairly discriminatory because these references will bring more transparency to Phlx's PIXL pricing and also apply in the same manner to all PIXL transactions executed on the Exchange.

Options 7, Section 3

The Exchange's proposal to amend PIXL pricing for options overlying SPY in Options 7, Section 3, Part C by replacing the current text below with a proposed table is reasonable, equitable and not unfairly discriminatory because the proposed table reflects the current pricing offered today on Phlx and adds transparency to that pricing. The proposed table does not amend the current rule text except to add the Customer PIXL Response or unrelated market or marketable interest received *during* a PIXL Auction, which is currently not described in the rule text, and to specify the pricing for unrelated market or marketable interest received *during* a PIXL Auction.

Assessing a SPY Customer PIXL Response or unrelated market or marketable interest received *during* a PIXL Auction is reasonable because the Exchange currently does not assess a Customer a PIXL Order fee when the PIXL Order trades against a PIXL Response or unrelated market or marketable interest. The Exchange believes that not assessing a fee will attract more SPY Customer liquidity to Phlx's PIXL Auction. The proposed SPY Customer PIXL Response and unrelated market or marketable interest of $0.00 per contract reflects the current rate assessed today to these participants.

Assessing a SPY Customer PIXL Response or unrelated market or marketable interest received *during* a PIXL Auction is equitable and not unfairly discriminatory because Customer orders bring valuable liquidity to the market, which liquidity benefits other market participants. Customer liquidity benefits all market participants by providing more trading opportunities, which attracts Lead Market Makers and Market Makers. An increase in the activity of these market participants in turn facilitates tighter spreads, which may cause an additional corresponding increase in order flow from other market participants.

Assessing unrelated market or marketable interest in SPY received *prior* to a PIXL Auction the simple order book pricing within Options 7, Section 3, Part A and the complex order book pricing within Options 7, Section 3, Part B is reasonable because at the time the interest was submitted to the order book, the Phlx members and member organizations would have known that there was no ongoing PIXL Auction and would not expect to be subject to the PIXL pricing. In contrast, applying SPY PIXL pricing within Options 7, Section

[12] 15 U.S.C. 78f(b).

[13] 15 U.S.C. 78f(b)(4) and (5).

[14] *NetCoalition* v. *SEC,* 615 F.3d 525 (D.C. Cir. 2010).

[15] *Id.* at 539 (quoting Securities Exchange Act Release No. 59039 (December 2, 2008), 73 FR 74770, 74782–83 (December 9, 2008) (SR–NYSEArca–2006–21)).

3 to the unrelated market or marketable interest that interest arrived *during* a PIXL Auction is reasonable because Phlx seeks to incentivize members and member organizations to submit PIXL Auction Orders to receive a guaranteed execution and potential price improvement. Phlx members and member organizations submitting interest to the order book during a PIXL Auction are aware that they may be allocated in the PIXL Auction. The Exchange's pricing models for the order book and PIXL Auction each seek to attract liquidity to Phlx and reward members and member organizations differently for the order flow. To this end, the Exchange's pricing considers the manner in which orders interact with the PIXL Auction based on the timing of when the order entered the order book. The Exchange's pricing is consistent with its current practice of assigning the applicable pricing for auctions versus order book pricing depending on how and when the order was submitted to the Exchange.

Assessing unrelated market or marketable interest in SPY received *prior* to a PIXL Auction the simple order book pricing within Options 7, Section 3, Part A and the complex order book pricing within Options 7, Section 3, Part B is equitable and not unfairly discriminatory because all Phlx members and member organizations who submitted unrelated market or marketable interest which rested on the order book *prior* to the commencement of a PIXL Auction will be uniformly assessed the applicable order book pricing for adding liquidity. The Exchange's proposal would treat Phlx members and member organizations who submitted unrelated market or marketable interest in SPY which rested on the order book *prior* to the commencement of a PIXL Auction in the same manner as other Phlx members and member organizations who posted liquidity on the order book as they would both be considered makers of liquidity. Conversely, the Exchange assesses the SPY PIXL pricing within Options 7, Section 3 in the same manner that responders to the PIXL Auction are assessed fees for their PAN responses. The unrelated market or marketable interest that received an allocation within the PIXL Auction would be uniformly subject to the same fees as those Phlx members and member organizations who submitted PAN responses and were allocated, thereby receiving a guaranteed execution and potential price improvement.

The Exchange's proposal to amend the rule text in the last sentence of the final bullet that is being relocated to footnote 2 to state ''which was received prior to the PIXL Auction'' instead of ''established at the initiation of a PIXL auction'' is reasonable, equitable and not unfairly discriminatory because the proposed new language continues to reflect the intent of the original language.[16] The amended rule text makes clear that the Lead Market Maker or Market Maker quote that is being referenced would have been resting on the order book prior to the PIXL Order. Today, the rebate is paid to the PIXL Order where the Lead Market Maker or Market Maker executes against the PIXL Order portion of the paired order as a response. The Exchange would apply new footnote 2 uniformly to Customer PIXL Orders.

Options 7, Section 6

The Exchange's proposal to amend Options 7, Section 6.A, PIXL Pricing to make technical non-substantive rule changes and replace certain text with the proposed references within Options 7, Section 1 is reasonable, equitable and not unfairly discriminatory as it will clarify and harmonize the current rule text by utilizing specified terms.

The Exchange's proposal to add a new sentence that states, ''Unrelated market or marketable interest received prior to a PIXL Auction will be assessed the appropriate Options Transaction Charge in Options 7, Section 4,'' is reasonable because the proposed rule text will describe the manner in which the Exchange prices unrelated market or marketable interest received prior to the commencement of a PIXL Auction. This new sentence memorializes the current pricing that Phlx members and member organizations are assessed for such interest, which is order book pricing. The Exchange applies the order book pricing within Options 7, Section 4 to interest received *prior to* the PIXL Auction, which is considered unrelated market or marketable interest for purposes of the PIXL Auction, because at the time the interest was submitted to the order book, the Phlx members and member organizations would have known that there was no ongoing PIXL Auction and would not expect to be subject to the PIXL pricing. In contrast, the Exchange applies PIXL pricing within Options 7, Section 6 to the unrelated market or marketable interest when interest arrived *during* a PIXL Auction because Phlx seeks to incentivize Participants to submit PIXL Auction Orders to receive a guaranteed execution and potential price improvement. Phlx members and member organizations submitting interest to the order book during a PIXL Auction are aware that they may be allocated in the PIXL Auction. Additionally, the Exchange's pricing models for the order book and PIXL Auction each seek to attract liquidity to Phlx and reward members and member organizations differently for the order flow. To this end, the Exchange's pricing considers the manner in which orders interact with the PIXL Auction based on the timing of when the order entered the order book. The Exchange's pricing is consistent with its current practice of assigning the applicable pricing for auctions versus order book pricing depending on how and when the order was submitted to the Exchange.

The Exchange's proposal to add a new sentence that states, ''Unrelated market or marketable interest received prior to a PIXL Auction will be assessed the appropriate Options Transaction Charge in Options 7, Section 4,'' is equitable and not unfairly discriminatory because all Phlx members and member organizations who submitted unrelated market or marketable interest which rested on the order book *prior* to the commencement of a PIXL Auction will be uniformly assessed the applicable order book pricing for adding liquidity. The Exchange's proposal would treat Phlx members and member organizations who submitted unrelated market or marketable interest which rested on the order book *prior* to the commencement of a PIXL Auction in the same manner as other Phlx members and member organizations who posted liquidity on the order book as they would both be considered makers of liquidity. Conversely, the Exchange assesses the SPY PIXL pricing within Options 7, Section 3 in the same manner that responders to the PIXL Auction are assessed fees for their PAN responses. The unrelated market or marketable interest that received an allocation within the PIXL Auction would be uniformly subject to the same fees as those Phlx members and member organizations who submitted PAN responses and were allocated, thereby receiving a guaranteed execution and potential price improvement.

B. Self-Regulatory Organization's Statement on Burden on Competition

The Exchange does not believe that the proposed rule change will impose any burden on competition not necessary or appropriate in furtherance of the purposes of the Act.

[16] *See* Securities Exchange Act Release No. 80064 (February 24, 2017), 82 FR 11666 (February 24, 2017) (SR–Phlx–2017–15).

Intermarket Competition

The proposal does not impose an undue burden on inter-market competition. The Exchange believes its proposal remains competitive with other options markets and will offer market participants with another choice to initiate a price improvement auction. The Exchange notes that it operates in a highly competitive market in which market participants can readily favor competing venues if they deem fee levels at a particular venue to be excessive, or rebate opportunities available at other venues to be more favorable. In such an environment, the Exchange must continually adjust its fees to remain competitive with other exchanges. Because competitors are free to modify their own fees in response, and because market participants may readily adjust their order routing practices, the Exchange believes that the degree to which fee changes in this market may impose any burden on competition is extremely limited.

Intramarket Competition

The Exchange's proposal to amend Options 7, Section 1(c) to introduce four new references: ''Initiating Order'', ''PIXL Auction Order'', ''PIXL Order'', and ''PIXL Response'' does not impose an undue burden on competition because these references will apply in the same manner to all PIXL transactions executed on the Exchange.

Assessing a Customer PIXL Response or unrelated market or marketable interest received *during* a PIXL Auction does not impose an undue burden on competition because Customer orders bring valuable liquidity to the market, which liquidity benefits other market participants. Customer liquidity benefits all market participants by providing more trading opportunities, which attracts Lead Market Makers and Market Makers. An increase in the activity of these market participants in turn facilitates tighter spreads, which may cause an additional corresponding increase in order flow from other market participants.

Assessing unrelated market or marketable interest within Options 7, Section 3, related to SPY, that was received *prior* to a PIXL Auction the simple order book pricing within Options 7, Section 3, Part A and the complex order book pricing within Options 7, Section 3, Part B does not impose an undue burden on competition because all Phlx members and member organizations who submitted unrelated market or marketable interest which rested on the order book *prior* to the commencement of a PIXL Auction will be uniformly assessed the applicable order book pricing for adding liquidity. The Exchange's proposal would treat Phlx members and member organizations who submitted unrelated market or marketable interest in SPY which rested on the order book *prior* to the commencement of a PIXL Auction in the same manner as other Phlx members and member organizations who posted liquidity on the order book as they would both be considered makers of liquidity. Conversely, the Exchange assesses the SPY PIXL pricing within Options 7, Section 3 in the same manner that responders to the PIXL Auction are assessed fees for their PAN responses. The unrelated market or marketable interest that received an allocation within the PIXL Auction would be uniformly subject to the same fees as those Phlx members and member organizations who submitted PAN responses and were allocated, thereby receiving a guaranteed execution and potential price improvement. The Exchange would apply new footnote 2 uniformly to Customer PIXL Orders.

The Exchange's proposal to add a new sentence that states, ''Unrelated market or marketable interest received prior to a PIXL Auction will be assessed the appropriate Options Transaction Charge in Options 7, Section 4,'' does not impose an undue burden on competition because all Phlx members and member organizations who submitted unrelated market or marketable interest which rested on the order book *prior* to the commencement of a PIXL Auction will be uniformly assessed the applicable order book pricing for adding liquidity. The Exchange's proposal would treat Phlx members and member organizations who submitted unrelated market or marketable interest which rested on the order book *prior* to the commencement of a PIXL Auction in the same manner as other Phlx members and member organizations who posted liquidity on the order book as they would both be considered makers of liquidity. Conversely, the Exchange assesses the SPY PIXL pricing within Options 7, Section 3 in the same manner that responders to the PIXL Auction are assessed fees for their PAN responses. The unrelated market or marketable interest that received an allocation within the PIXL Auction would be uniformly subject to the same fees as those Phlx members and member organizations who submitted PAN responses and were allocated, thereby receiving a guaranteed execution and potential price improvement.

C. Self-Regulatory Organization's Statement on Comments on the Proposed Rule Change Received From Members, Participants, or Others

No written comments were either solicited or received.

III. Date of Effectiveness of the Proposed Rule Change and Timing for Commission Action

The foregoing rule change has become effective pursuant to Section 19(b)(3)(A)(ii) of the Act.[17]

At any time within 60 days of the filing of the proposed rule change, the Commission summarily may temporarily suspend such rule change if it appears to the Commission that such action is: (i) necessary or appropriate in the public interest; (ii) for the protection of investors; or (iii) otherwise in furtherance of the purposes of the Act. If the Commission takes such action, the Commission shall institute proceedings to determine whether the proposed rule should be approved or disapproved.

IV. Solicitation of Comments

Interested persons are invited to submit written data, views, and arguments concerning the foregoing, including whether the proposed rule change is consistent with the Act. Comments may be submitted by any of the following methods:

Electronic Comments
